I have received a great number of telegrams from religious institutions and humanitarian people in reference to this bill, including the following from the president of the Hebrew Immigration Aid Society:

Please support Copeland-Sabath resolution which will admit wives and children now held United States immigration stations because recent Supreme Court ruling. Gottlieb case. Humanity demands these unfortunates not be deported, through no fault theirs.

As I said when the last immigration bill passed, you have left open the borders of Mexico to unlimited immigration. Last year more than 212,000 persons came in. I beg of you, in the interest of humanity, to pass this pending bill, for which I shall vote. [Applause.]

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. BOX. I demand the yeas and nays.

The SPEAKER pro tempore. The gentleman from Texas demands the yeas and nays. All those in favor of taking the question by yeas and nays will stand. [After counting.] Thirty-five gentlemen have arisen, not a sufficient number. The question is on suspending the rules and passing the bill.

The question was taken; and on a division (demanded by Mr. BOX) there were—ayes 153, noes 54.

Mr. RAKER. Mr. Speaker, I object to the vote on the ground that there is no quorum present.

Mr. BOYLAN. Mr. Speaker, I rise to a point of order.

The SPEAKER pro tempore. The gentleman will state it.

Mr. BOYLAN. The decision on the vote had been made before the point of no quorum was made.

The SPEAKER pro tempore. The Chair overrules the point of order. The gentleman from California makes the point that there is no quorum present. The Chair will count. [After counting.] Two hundred and twenty-three Members present, a quorum.

So, two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

### CLAIMS OF THE CHOCTAW AND CHICKASAW NATIONS

The SPEAKER laid before the House the following message from the President of the United States, which was read as follows:

*To the House of Representatives:*

In compliance with the resolution of the Senate (the House of Representatives concurring), I return herewith House bill No. 5325, entitled "An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes."

CALVIN COOLIDGE.

THE WHITE HOUSE, *June 6, 1924.*

### EVENING SESSION

Mr. LONGWORTH. Mr. Speaker, I ask unanimous consent that the House stand in recess from 5.30 o'clock this evening until 8 o'clock this evening.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the House stand in recess from 5.30 o'clock this evening until 8 o'clock this evening. Is there objection?

There was no objection.

### CLAIMS OF CHOCTAW AND CHICKASAW INDIANS

Mr. SNYDER. Mr. Speaker, I present the following concurrent resolution, which I send to the desk and move its adoption.

The Clerk read as follows:

House Concurrent Resolution 29

*Resolved by the House of Representatives (the Senate concurring),* That the action of the Speaker of the House of Representatives and of the President pro tempore of the Senate in signing the enrolled bill (H. R. 5325), entitled "An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims the Choctaw and Chickasaw Indians may have against the United States, and for other purposes," be rescinded, and that in the reenrollment of said bill the following amendment be made, viz: In section 2, after the word "Interior" in the proviso, insert the following: ", with such additional reasonable and necessary expenses for said tribal attorneys, to be approved and paid from the funds of the respective tribes under the direction of the Secretary of the Interior, as may be required for the proper conduct of such litigations."

Mr. GARRETT of Tennessee. Mr. Speaker, this is merely a correction, is it?

Mr. SNYDER. This is merely a correction of the bill as agreed to in the conference report.

Mr. GARRETT of Tennessee. Some one in enrolling it left out some language that should have been inserted?

Mr. SNYDER. Some one inserted language that should not have been in, and this now is a correction and the bill will contain now the agreement of the conferees. That is all.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

BRIDGE ACROSS OCONEE RIVER, GA.

Mr. LARSEN of Georgia. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 9612) granting the consent of Congress to the State of Georgia, through its highway department, to construct a bridge across the Oconee River.

The Clerk read the title.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the State of Georgia, through its highway department, and its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Oconee River at a point near where the line dividing Johnson and Washington Counties touches the waters of the Oconee River on the east side, said bridge connecting one or both of said counties with Wilkinson County on the west side of said river, and being located at or near a point formerly known as Thompson's Ferry, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendment:

Page 1, line 7, after the word "point," insert "suitable to the interests of navigation."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed with amendments the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, in which the concurrence of the House was requested.

DEFICIENCY APPROPRIATION BILL

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, with Senate amendments thereto, disagree to all of the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from Illinois asks unanimous consent to take from the Speaker's table the bill H. R. 9559, a deficiency appropriation bill, with Senate amendments thereto, disagree to all of the Senate amendments, and ask for a conference. Is there objection?

There was no objection.

The SPEAKER appointed the following conferees: Mr. MADDEN, Mr. ANTHONY, Mr. BYRNS of Tennessee.

PROTECTION OF WILD GAME ANIMALS AND BIRDS IN ALASKA

Mr. HAUGEN. Mr. Speaker, I move to suspend the rules and pass Senate Joint Resolution 127, to provide that the powers and duties conferred upon the Governor of Alaska under existing law for the protection of wild game animals and wild birds in Alaska be transferred to and be exercised by the Secretary of Agriculture, which I send to the desk.

The Clerk read the joint resolution, as follows:

Senate Joint Resolution 127

*Resolved, etc.*, That, on and after July 1, 1924, the powers and duties heretofore conferred upon the Governor of Alaska by existing law for the protection of wild game animals and wild birds in Alaska are hereby conferred upon and shall be exercised by the Secretary of Agriculture; and all money available or appropriated in any act for the fiscal year ending June 30, 1925, for carrying into effect the act approved May 11, 1908, entitled "An act for the protection of game in Alaska, and for other purposes," including salaries, traveling expenses of game wardens, and all other necessary expenses, is hereby transferred to the credit of the Department of Agriculture to be expended by the Secretary of Agriculture for such purposes.

The SPEAKER pro tempore (Mr. ROGERS of Massachusetts). Is a second demanded?

Mr. WINGO. Mr. Speaker, I demand a second.

Mr. HAUGEN. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The gentleman from Iowa is entitled to 20 minutes and the gentleman from Arkansas 20 minutes.

Mr. HAUGEN. Mr. Speaker, this resolution simply provides that the powers and duties conferred upon the Governor of Alaska for the protection of wild-game animals and wild birds in Alaska be transferred to the Secretary of Agriculture. The resolution has the approval of the Secretary of the Interior, and the funds appropriated are to be transferred to the Department of Agriculture—$20,000 to one department and $30,000 to the other—and they are to be made available for expenditure by one department.

Mr. WINGO. Mr. Speaker, after the very lucid explanation made by the chairman of the Committee on Agriculture, the distinguished gentleman from Iowa [Mr. HAUGEN], of this very important measure, I have not the temerity to seriously oppose its passage. I think it is recognized generally that there is a very great deal of friendly rivalry between myself and the distinguished gentleman from Iowa in trying to solve the very pressing problem of relief for the American farmer. With the assurance that he has just given the House that this is a part of the administration program for farm relief, the companion bill having just been messaged over from the Senate, making possible, if the President signs it—and he will, as it is a part of his program of farm relief—the regulation and sale of milk and ice cream in the District of Columbia. I presume that our Republican friends will adjourn to-morrow and think that the American farmer will be satisfied.

Mr. SNYDER. Will our Democratic friends be satisfied?

Mr. WINGO. Of course, Mr. Speaker, the chief tragedy in the question of the farmers' relief is that the farmer put some faith in the profession of friendship of the Republican Party as presently controlled. The farmer is an honest man; he is sincere. He never makes promises he does not sincerely intend to keep and that makes him somewhat a credulous man both individually and as a group, and the Republican Party has frequently imposed upon that well-known credulity based upon the inherent honesty of the American farmer. I wonder what the farmers of the Northwest will think when they see "psychological" Frank Mondell presiding as permanent chairman over the Cleveland convention. He justly earned the soubriquet of "psychological Frank" last fall when he took that great Hebrew banker from Wall Street, Eugene Meyer, out with him into the Northwest, at the direction of the President, and, parenthetically, I will state it was always a question I could not get satisfactorily answered whether Eugene Meyer took Frank Mondell to the wilds of the West or Frank took Eugene.

But at any rate they were sent out by this administration for the purpose of finding out, first, whether or not there was anything the matter with the farmer, and if so, what it was, and last October they came back and the sum total of their findings and recommendations that they gave the President was that the farmers were simply suffering psychologically, that they were prosperous but did not know it, and suggested that they be left to the operation of the natural laws—whether the natural law of gravitation or of supply and demand "psychological" Frank did not state. I am not going to charge Mr. Meyer and Mr. Mondell with being the direct cause of the failure of so many banks in the country, but since they have left that country out there it has become one of the chief news items almost every day in the papers that so many of these farmers' banks had failed, and since the trip of these great political doctors and financial advisers, Eugene Meyer and Frank Mondell—I hesitate before I criticize Mr. Meyer because I admit he is one of the ablest bankers that Wall Street ever produced and I think no administration has ever had an abler Secretary of Agriculture than Eugene Meyer, the recognized real agricultural adviser of this administration.

Mr. DENISON. Will the gentleman yield?

Mr. WINGO. I have not reached a period but a semicolon. However, I will yield.

Mr. DENISON. I am enjoying the gentleman's remarks very much, but I would be very glad to have the gentleman's usual clear vision in reference to the measure before us, as to the advisability of the legislation before the House?

Mr. WINGO. Well, I am sorry the gentleman never takes what I say seriously because——

Mr. DENISON. I do take it seriously.

Mr. WINGO. I told you in the first week of this Congress——

Mr. BARKLEY. What is before the House?

Mr. WINGO. It is hard to state whether it is my distinguished friend from Illinois or whether it is myself, but either is worthy of the patience of my friend from Kentucky.

Mr. DENISON. I would like to have some information with regard to the question of the advisability of transferring the great wild life of Alaska from the control of the governor to the Secretary of Agriculture.

Mr. WINGO. It is not the wild life of Alaska that you gentlemen had better watch, it is the wild farmers who have been fooled, deluded, flimflammed, and bunkoed by this administration. [Applause.] To answer the gentleman's first statement: In my humble way I had the temerity to warn the American farmer last December that he could expect nothing from this administration, because it was an administration controlled by and operated in the interest of the New England manufacturers. Everybody knows that but the farmers of the Northwest. They have not yet heard it. And I warned the farmers that while this administration might talk and advocate the reduction of taxes upon the high surtax of the 6,000 millionaires who constituted the financial backers of this administration, they would listen in vain for recommendation from this administration to Congress to relieve the toiling masses of this Nation from the intolerable burden of tariff taxation under which they are staggering and under which the farmers can never prosper. [Applause.]

Mr. DENISON. Mr. Speaker, will the gentleman yield for a question?

Mr. WINGO. Yes.

Mr. STEVENSON. Before that, will the gentleman yield right there?

Mr. WINGO. Yes.

Mr. STEVENSON. I suppose the gentleman has noticed the reports that the administration of Mr. Mondell has been ratified and approved by his selection as permanent chairman of the Republican National Convention that meets at Cleveland next week?

Mr. WINGO. Yes; I remarked before the gentleman came into the Hall that the powers that be, the powers that control not only the wild life of Alaska but the wild life of the West generally, had selected Frank Mondell to be the permanent chairman of the Republican National Convention.

Mr. BARKLEY. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. BARKLEY. I suggest that the gentleman incorporate in his remarks an editorial from the Philadelphia Record upon that appointment.

Mr. WINGO. Well, I really admire Frank Mondell, because he is frank. He frankly admits he is a hard-boiled, bottled-in-bond, 100-per-cent standpatter. He told the farmers out there what he tells President Coolidge here. He tells them that there is nothing wrong with them. He gave out an interview while out there in the Northwest in which he said:

> You farmers have no business to be growling, now that you have a Republican administration. If you just sit steady until we, by this wonderful tariff system that we have, bring prosperity and wealth to the manufacturers of New England, they, out of their generosity and the fullness of their charitable feelings toward the unfortunate in this country, will pass on some alms to the farm producers of the Nation.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield for a question there?

Mr. WINGO. Yes.

Mr. SCHAFER. You seem on numerous occasions to speak as a friend of the farmer in the remarks you make here. Have you carried out in any legislation that you have favored or have you done anything to carry out the policy that you advocate on behalf of the farmers?

Mr. WINGO. Well, the gentleman does not appreciate the fact that instead of his question developing an intelligent desire for information it only betrays his ignorance of the history of this Congress in the last 11 years. You have not had a law on the statute books for the benefit of the farmers that we on this side have not been obliged to jam down the throats of the Republican administration. By the bill for short-term credits, which your party passed in the last Congress, with which you flimflammed the farmers of the West, and by the speeches your people made concerning it, you managed to elect a Republican Congress on the plea that you did something for the agricultural West. But I want to remind you that that bill which you passed would have died in the last Congress if it had not been for myself and the gentleman from Alabama [Mr. STEAGALL]. When one of the standpat Republican conferees on that bill signed the conference report he said, "I would rather sign it with my left foot than with my right hand." If the gentleman will read the history of the Congress in the last few years, he will find that the only intelligent, honest, safe, sensible legislation that has been put on the statute books for the American farmer has been under the leadership of the Democratic Party and by a Democratic Congress. [Applause.]

Mr. SCHAFER. Mr. Speaker, will the gentleman yield again?

Mr. WINGO. No; I can not yield.

Mr. KING. Will the gentleman yield right there for a word?

Mr. WINGO. Well, I will yield to my farmer friend from Illinois. [Laughter.]

Mr. KING. I know that the gentleman is mostly fair, except when he discusses things from the political standpoint. I will ask him in all fairness if it was not in 1920, under a Democratic administiation, that the farmer was deflated and his prices went down? Was it not in December, 1920? Will not the gentleman admit that?

Mr. WINGO. No; I will not admit it. In the sessions of the Joint Farm Commission heretofore, which I am trying to get to meet again and finish its labors, the Republican members of that commission refused to make a report even after we got them an extension of time. The record will show that the real deflation policy was put into effect by the orders of the Republican leaders in this House and in the Senate and by leading Republican financiers, and that it really did not take place—it really did not take place in full force on the western farmer—until April or May, 1921. The statistics of the Federal reserve banks will show that in charts which they themselves have presented and which that standpat commission has deliberately suppressed, and concerning which they will not give us permission to get any further information. Read the Republican platform of 1920. It promised to deflate the farmer, and you did.

Mr. DENISON. Mr. Speaker, will the gentleman yield for a short question?

Mr. SNYDER. Mr. Speaker, will the gentleman yield right there?

Mr. WINGO. Yes.

Mr. SNYDER. The gentleman from Arkansas seems to charge the Republican Party with failure to pass remedial farm legislation. Now, the McNary-Haugen bill was looked upon as in the interest of the farmer, was it not?

Mr. WINGO. Let the gentleman ask his question.

Mr. SNYDER. Was not that considered a Republican measure, framed in the interest of the farmer? And did not the Democrats beat that measure? I am asking the gentleman that question.

Mr. WINGO. No; just sit down and I will tell the gentleman who beat it. Cal Coolidge and the Republican leaders beat it, and the roll calls of the House show it.

Mr. SNYDER. But the Democratic votes beat it.

Mr. WINGO. Oh, no. Whenever you pass anything for the benefit of the farmers the progressive members of the Republican Party have to do it in coalition with the Democrats, but whenever you try to put over a flimflam game and it is about to be exposed you point to some lonely, weakly, little Democrat and say he is bigger than the Republican majority in this House and blame him for your failure.

I will tell you what killed it. You knew in the beginning of this Congress you were going to play the game you played. The other day I noticed in the press the fact, after the Marie Hogan bill had been killed on orders of the President and laid away to rest, that the perspiring leader of the farm bloc on the Agricultural Committee, the sage of Medicine Lodge, the gentleman from Kansas [Mr. TINCHER], according to newspaper reports, visited the White House, and when he went there and took breakfast with the President it was the first time the gentleman from Kansas had the temerity, through all the breakfasts he has had with the President during this winter, to suggest a plan for farm relief to the President. Why do I say that was the first time? Because he stood on this floor the other day, notwithstanding the fact it was well known he frequently took breakfast with the President, and said he did not know how the President stood on the Marie Hogan farm relief bill, and on that very day I advised him if he wanted to give relief to the farmers he had better go down and see Cal and find out what would suit him.

The next day he went down to the White House, after the Marie Hogan bill had been interred, and that was the first time he had the temerity to make any suggestion to the President, because he had been so busy eating hot cakes with the

President before that that he had no time to think about any plan for relief to the farmer. But at that time he said:

The Democrats are getting after us; they have exposed our bunco game as to the farmers and the fact that we are putting up a job on them and do not intend to do anything. For God's sake approve this plan.

And what was it? A plan authorizing the same Eugene Meyer, Wall Street banker, and the same Frank Mondell, who, after an investigation in the Northwest, said there was nothing wrong with the farmer but a bad psychological viewpoint—a plan whereby that great Wall Street banker and the psychological Frank Mondell were to have unlimited power to relieve the distress of the Republican wheat growers of the Northwest. Then the President said, "Leave that on my desk and I will think about it," the longest sentence he has uttered since he has been in the White House. Then the next day we saw the psychological Frank sitting in the office of the genial Republican floor leader, the gentleman from Ohio [Mr. LONGWORTH]. We saw Frank there, and the newspapers said that our friend from Kansas [Mr. TINCHER] was invited into the sanctum sanctorum of the leader of the Republican Party in this House. He went there, as well as several members of the steering committee. They all got in there, and we all know how feverishly newspaper men stood on the outside of that office in order to find out what was to be done for the relief of the farmer. But finally, as the shades of evening fell over the Capitol, the gentleman from Ohio [Mr. LONGWORTH], the Republican leader, came out and announced to the newspaper men that the President had refused to approve the plan of the sage of Medicine Lodge to give relief to the wheat growers of the Northwest, just as he had condemned the late lamented Marie Hogan, and that Congress was ready to adjourn, and that all on earth the Republican farmers of the Northwest could hope to get through this Congress would be the passage of a little resolution of which the gentleman from Kansas [Mr. HOCH] is the author, the title of which is to declare that agriculture is a basic industry. The announcement by the gentleman from Kansas of that well-known fact reminded me of what Mr. Cannon, of Illinois, Uncle Joe, upon one occasion said about Theodore Roosevelt. He said:

I remember the ecstatic joy with which Teddy announced as a new discovery the Ten Commandments.

[Laughter and applause.]

So you have just passed the last of your farm-relief legislation when you say, "We will give the farmers an investigation of freight rates that will take five years and meet the pressing emergency situation we are told exists among the western farmers; and then you are going to pass this bill for the relief of the farmers, and you have already passed a bill to regulate the sale of ice cream and milk in the District of Columbia [laughter], and therefore you expect the farmers of the west to stand pat with Cal and somebody else who may be hand picked and hope, hope, hope, that at the end of five years they may get some relief from the burden of unconscionable freight rates which has been preached to them during campaign time by the Cappers and Tinchers and the Hochs, but about which they never do anything except to pass mere French gestures and resolutions when they get down here on Capitol Hill. [Applause.]

Mr. COLTON. We have listened to the eloquent statement of the gentleman. In his concluding remarks will he not mention some of the things the Democratic Party has done for the farmers?

Mr. WINGO. Has not the gentleman found out? [Laughter and applause.]

Mr. COLTON. No.

Mr. WINGO. And yet you were elected to Congress. [Laughter.]

Mr. COLTON. Neither have the farmers found out.

Mr. WINGO. I thought that district out in Oklahoma that sent Manuel Herrick here was the only district that was lacking in intelligence, and I never thought that anywhere in the United States there could be an electorate that would select a man to represent them in Congress who did not know that the only friend of the man who toils and the only party that has done anything for the farmer by the passage of the agricultural credit acts, farm loan acts, and various acts of that kind which were put upon the statute books by a Democratic Party, in every instance were enacted by the Democrats over a solemn roll-call adverse vote of the stand-pat leaders of the Republican Party. [Applause.]

Mr. COLTON. Will the gentleman yield further?

Mr. BURTNESS. Will the gentleman yield?

Mr. WINGO. I yield to the gentleman from North Dakota.

Mr. BURTNESS. Will not the gentleman be kind enough to come out to the West and explain to the farmers out there why he was so brave he did not vote one way or the other upon the McNary-Haugen bill? [Laughter and applause.]

Mr. WINGO. Yes; I was absent on the day of the McNary-Haugen funeral. I was compelled to be away, but I had a pair with the brains of the Republican side—Mr. MADDEN.

Mr. BURTNESS. And why the gentleman did not make any suggestions about it.

Mr. WINGO. I made suggestions, but the gentleman either was absent or was so indifferent to the welfare of the farmer that he did not listen.

The SPEAKER. The time of the gentleman from Arkansas has expired.

Mr. WINGO. I gladly accept the invitation of the gentleman to come out in the Northwest, even though I fear I will raise a sectional issue when you try to becloud the real issue and dodge your betrayal of the farmer by saying, "Behold a despised Democrat from the solid South." [Applause.]

Mr. HAUGEN. Mr. Speaker, I yield five minutes to the gentleman from Iowa [Mr. GREEN]. [Applause.]

Mr. GREEN of Iowa. Mr. Speaker, after so much eloquence, it might be well to have a few facts. I listened to the statement of the gentleman from Arkansas with a great deal of interest but without much information.

I have no disposition to minimize the unfortunate condition of the farmer, but unfortunate as it is, it is nothing in comparison with the condition in which the Democratic Party left him. As a result of Democratic tariffs and Democratic laws, which existed nearly all through the year 1921, he got the lowest price that he had received for years for his product. [Laughter on the Democratic side.] I said exactly what I mean.

Mr. GARRETT of Texas. Your party took charge on the 4th of March, 1921.

Mr. GREEN of Iowa. We did; but the people suffered through that year from a Democratic tariff.

In the year 1921 the farmer got $9,221,000,000 for his products. As a result of the farmers' emergency tariff, which the Republicans put through and which raised the value of his product and as a result of the Republican tariff law which gave him a market in the eastern part of the country, which he had lost under the Democratic regime, in the year 1922 he got $11,244,000,000 for his product, and in the year 1923 he got $12,204,000,000 for his product.

In talking to the farmers in my district at the time of the last campaign——

Mr. CAREW. Why is he broke?

Mr. ABERNETHY. Tell us why the farmer is broke.

The SPEAKER pro tempore. Gentlemen will not interrupt without obtaining permission of the gentleman occupying the floor.

Mr. GREEN of Iowa. He is broke by reason of Democratic laws and Democratic deflation. In talking to the farmers in my district at the time of the last campaign, I told them the first thing they needed was a home market; that one consumer in the home market was worth a dozen abroad and that they needed to put the business interests of the east and the factories of the east on a sound, substantial, working basis, and then a demand would be created for their products, and they all know it to-day in the results that have followed. They know it in the changed prices, they know it in the improvement of their condition.

Mr. SUMNERS of Texas. Will the gentleman yield?

Mr. GREEN of Iowa. I yield to my genial friend from Texas.

Mr. SUMNERS of Texas. Then, why could you not get by with the argument that if they would give you $1.50 for your wheat you would have more money to buy their manufactured goods?

Mr. GREEN of Iowa. Was my friend from Texas in favor of the McNary-Haugen bill?

Mr. SUMNERS of Texas. Will the gentleman answer my question?

Mr. GREEN of Iowa. Oh, the gentleman was not in favor of it himself. He need not ask that question. He answered it in part himself when he voted against the bill.

Mr. TINCHER. The map out in the lobby shows why.

Mr. HOWARD of Nebraska. Will the gentleman yield?

Mr. GREEN of Iowa. I yield to the gentleman from Nebraska with pleasure.

Mr. HOWARD of Nebraska. The gentleman promised to give information, and I know he can.

Mr. GREEN of Iowa. Did not these figures give the gentleman any information?

Mr. HOWARD of Nebraska. Not yet.

Mr. GREEN of Iowa. Then I despair. I give up all hope of my friend from Nebraska if he can not get any information out of those figures.

Mr. HOWARD of Nebraska. I heard the gentleman state how much more prosperous the farmer is now than he was under the last administration.

Mr. GREEN of Iowa. Yes; under this administration he has received over two billion more than he got for his products under the last administration. That is a considerable sum, according to my opinion.

Mr. HOWARD of Nebraska. Well, if the gentleman will not give me any information, I will have to take what I have got.

Mr. SNELL. Will the gentleman from Iowa inform the gentleman from Nebraska how many men were walking the streets looking for a job under the former administration?

Mr. GREEN of Iowa. Over 4,000,000 men; and in less than a year and a half after the Republican administration came in they were all employed at good wages if they wanted work, and were buying the farmers' products. Now our Democratic friends want to take this market from them, and that is the only remedy they have to propose.

Mr. HAUGEN. Mr. Speaker, I yield three minutes to the gentleman from Kansas [Mr. TINCHER].

Mr. TINCHER. Mr. Speaker, I listened to the 20 minutes' speech of the gentleman from Arkansas [Mr. WINGO] with much interest and without any ungentlemanly interruptions. I think men have a right to make speeches expressing their opinion on matters of this kind, especially when a bill of this importance is up for consideration.

I take it from the speeches that have been made so far that every one is going to vote for the bill. The gentleman from Arkansas wants to put in the last few days making the people forget that there ever was a March 4, 1921; he wants to make them forget the summer of 1921 when 4,000,000 idle men were traveling the streets; he wants them to forget old Boston Common in the summer of 1921 covered with ex-service men seeking employment whereby they might make a living. I think that he thought that he would make the people of the West forget that when Warren G. Harding took the oath of office in this Capitol there was no market at all for the products of the farmers; he wanted to make the people forget that the Government's own obligations were selling for 85 cents on the dollar. When the time comes this fall we will try to remind the folks of what happened, and that the only prosperity the American farmer ever had in the United States under a Democratic administration was attributable directly to the war and getting a $30,000,000,000-bond issue on the part of the United States. [Applause on the Republican side.]

Why, he claims the benefit of the credit act passed by the Sixty-seventh Congress—even claimed credit for acts passed during the Sixty-sixth Congress and passed by Republicans over the veto of a Democratic President. All these things will be dug up. We will fight it out.

I am reminded of a story, and I am going to take the time to tell it. Down in Tennessee a man came along with a magic lantern. It was a little place, but it had one little theater. They would not let him in. They said, "No; you can't come in." He kept hunting around and after a while he found a vacant store where they had moved out. He stuck candles around in the store, so as to have a little light. By some accident they had left a powder keg in which there was a little powder left and a hole where he could stick a candle. No one knew about it. The show was going on and everybody having a good time, and when the candle burned down to the powder it exploded. Different ones had different experiences. One old fellow got up, wiped his eyes, and said, "I wonder what they are going to show next." Just as he said that an old fellow going out of the door, covered with blood, said, "I don't know; I have seen all I want to see." [Laughter.]

So when you go out there and tell the American farmers that you voted against every measure that would help them, that you are now sure going to do something for them, they will tell you that they have seen enough and had all the experience they wanted. [Laughter and applause.]

Mr. HOWARD of Nebraska. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman rise?

Mr. HOWARD of Nebraska. I want to strike out the last word.

The SPEAKER pro tempore. The time is in the control of the gentleman from Iowa.

Mr. HAUGEN. Mr. Speaker, I move to suspend the rules and pass the bill.

Mr. HOWARD of Nebraska. Mr. Speaker, this matter is of such vast importance I think we ought to have more here, and I make the point of no quorum.

The SPEAKER pro tempore. The gentleman from Nebraska makes the point of no quorum.

Mr. CONNALLY of Texas. Mr. Speaker, I ask unanimous consent that the gentleman from Nebraska have five minutes.

Mr. HOWARD of Nebraska. I do not want any time; I want a quorum. [Laughter.]

The SPEAKER pro tempore. The gentleman from Nebraska makes a point of no quorum, and the Chair will count.

Mr. HOWARD of Nebraska. Mr. Speaker, I am human; I do not know how I can stand out against these lovable fellows who are importuning me to withdraw my point. I quit. I withdraw. [Laughter.]

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended, and the bill was passed.

### DISTRICT OF COLUMBIA APPROPRIATION BILL

Mr. DAVIS of Minnesota. Mr. Speaker, I call up the conference report upon the bill (H. R. 8839) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of the said District for the fiscal year ending June 30, 1925, and for other purposes, and move its consideration at this time.

The SPEAKER. The gentleman from Minnesota calls up the conference report upon the District of Columbia appropriation bill, which the Clerk will report.

The Clerk read the conference report, as follows:

### CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8839) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 15, 16, 17, 20, 23, 24, 30, 31, 35, 38, 39, 40, 41, 42, 57, 61, 75, 81, 82, 85, 93, 96, 97, 98, 99, 108, 113, 121, 131, 133, 137, 139, 147, 152, 158, 161, and 162.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 19, 21, 22, 25, 26, 29, 32, 33, 36, 37, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 58, 59, 60, 62, 65, 70, 71, 76, 77, 78, 79, 86, 87, 92, 94, 95, 101, 102, 103, 104, 105, 106, 107, 109, 112, 114, 115, 122, 125, 126, 127, 129, 130, 132, 134, 135, 136, 138, 142, 143, 145, 146, 148, 150, 151, 153, 154, 156, 159, 160, 164, 165, and 167, and agree to the same.

Amendment numbered 1: That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the House insert the following: "any revenue (not including the proportionate share of the United States in any revenue arising as the result of the expenditure of appropriations made for the fiscal year 1924 and prior fiscal years) now required by law to be credited to the District of Columbia and the United States in the same proportion that each contributed to the activity or source from whence such revenue was derived shall be credited wholly to the District of Columbia, and in addition, $9,000,000"; and the House agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following: "; for the purchase of two automobiles at not to exceed $450 each for the use of the assessor's office, $900; in all, $3,900"; and the Senate agree to the same.

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$605,050"; and the Senate agree to the same.

Amendment numbered 63: That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$925,000"; and the Senate agree to the same.

Amendment numbered 66: That the House recede from its disagreement to the amendment of the Senate numbered 66, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "manner provided by law"; and the Senate agree to the same.

Amendment numbered 67: That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$75,000"; and the Senate agree to the same.

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: In lieu of the number proposed insert "three"; and the Senate agree to the same.

Amendment numbered 69: That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: In lieu of the number proposed insert "three"; and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "two motor field wagons at not to exceed $650 each, the purchase of one motor field wagon at not to exceed $650, the purchase of four motor trucks at not to exceed $650 each"; and the Senate agree to the same.

Amendment numbered 73: That the House recede from its disagreement to the amendment of the Senate numbered 73, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$350,000"; and the Senate agree to the same.

Amendment numbered 74: That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$250,000"; and the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "the manner provided by law"; and the Senate agree to the same.

Amendment numbered 88: That the House recede from its disagreement to the amendment of the Senate numbered 88, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$35,000"; and the Senate agree to the same.

Amendment numbered 91: That the House recede from its disagreement to the amendment of the Senate numbered 91, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$53,580"; and the Senate agree to the same.

Amendment numbered 100: That the House recede from its disagreement to the amendment of the Senate numbered 100, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$3,459,740"; and the Senate agree to the same.

Amendment numbered 110: That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment as follows: In lieu of the sum of $160,000 named in said amendment insert the sum "$100,000"; and the Senate agree to the same.

Amendment numbered 111: That the House recede from its disagreement to the amendment of the Senate numbered 111, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$206,939"; and the Senate agree to the same.

Amendment numbered 128: That the House recede from its disagreement to the amendment of the Senate numbered 128, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$45,000"; and the Senate agree to the same.

Amendment numbered 144: That the House recede from its disagreement to the amendment of the Senate numbered 144, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "manner provided by law"; and the Senate agree to the same.

Amendment numbered 149: That the House recede from its disagreement to the amendment of the Senate numbered 149, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "in accordance with the revised plan as set forth in Senate Document No. 37, Sixty-eighth Congress, first session, $150,000, of which amount $125,000 shall be available for expenditure below Benning Bridge and not more than $25,000 may be expended above Benning Bridge in the acquirement of necessary land"; and the Senate agree to the same.

Amendment numbered 155: That the House recede from its disagreement to the amendment of the Senate numbered 155, and agree to the same with an amendment as follows: Restore the matter stricken out amended to read as follows: "on its present site in East Potomac Park"; and the Senate agree to the same.

Amendment numbered 157: That the House recede from its disagreement to the amendment of the Senate numbered 157, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$40,000"; and the Senate agree to the same.

Amendment numbered 163: That the House recede from its disagreement to the amendment of the Senate numbered 163, and agree to the same with an amendment as follows: In lieu of the sum proposed insert: "$1,500,000"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 2, 18, 28, 34, 64, 83, 84, 89, 90, 116, 117, 118, 119, 120, 123, 124, 140, 141, and 166.

STATEMENT

The managers on the part of the House, at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8839) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

On No. 1: Provides a lump-sum contribution by the United States toward the expenses of the District of Columbia of $9,000,000, together with the whole of such revenue arising subsequent to July 1, 1924, which is now credited to the United States and the District of Columbia in the proportion required by law, instead of $8,000,000 and a somewhat similar disposition of miscellaneous revenue, as proposed by the House, and $14,000,000 or a 60–40 division of expenses, as proposed by the Senate.

On Nos. 3 to 11, inclusive, relating to the Executive Office: Appropriates $17,000 for temporary employees, building inspection division, as proposed by the Senate, instead of $15,000, as proposed by the House; fixes the allowances to inspectors for motor cycles and automobiles at $13 and $26 each per month, respectively, as proposed by the Senate, instead of $10 and $20 each per month, respectively, as proposed by the House; and appropriates $4,000 for temporary employees, plumbing inspection division, as proposed by the Senate, instead of $3,000, as proposed by the House.

On Nos. 12 and 13: Appropriates $19,320 for personal services in the license bureau, as proposed by the Senate, instead of $17,820, as proposed by the House.

On No. 14: Provides an allowance at the rate of $26 per month to coroner for furnishing his own automobile for official uses, as proposed by the Senate, instead of $20 per month, as proposed by the House.

On Nos. 15, 16, and 17, relating to the office of superintendent of weights, measures, and markets: Strikes out the appropriation proposed by the Senate for the purchase of a Ford motor truck, and provides for the maintenance of four motor trucks, as proposed by the House, instead of five, as proposed by the Senate.

On No. 19: Strikes out, as proposed by the Senate, the limitation on the contingent fund of the public utilities commission with respect to expenditures incident to the enforcement of the law relating to the relief of street-car motormen.

On No. 20: Strikes out the appropriation of $600 proposed by the Senate for temporary clerk hire in the department of insurance.

On Nos. 21 and 22: Appropriates $42,320 for personal services in the surveyor's office, as proposed by the Senate, instead of $39,920, as proposed by the House.

On No. 23: Restores the appropriation of $1,500 proposed by the House for revision of the highway plan.

On No. 24: Strikes out the appropriation of $10,000 proposed by the Senate for preparation of a city plan outside of the original Federal city of Washington.

On Nos. 25 and 26: Provides for an allowance to the purchasing officer for the maintenance of his own automobile as proposed by the Senate, and fixes the automobile allowance at $26 per month, as proposed by the Senate, instead of $20 per month, as proposed by the House.

On No. 27: Appropriates $900 for the purchase of two automobiles for the assessor's office, instead of $2,400 for the purchase of three automobiles, as proposed by the Senate.

On No. 29: Fixes the allowance for supplying personal automobile at $26 per month, as proposed by the Senate, instead of $20 per month, as proposed by the House.

On No. 30: Strikes out the appropriation of $300,000 toward the construction of a building for the recorder of deeds, and the authorization therefor, proposed by the Senate.

On No. 31: Requires that refunds of erroneous collections shall be credited to the United States and the District of Columbia in the proportion required by law, as proposed by the House, instead of in the proportion that the appropriations were or are paid from the Treasury of the United States and the revenues of the District of Columbia, as proposed by the Senate.

On Nos. 32 and 33: Appropriates $10,000, as proposed by the Senate, for office equipment for the assessor and collector of taxes, instead of $5,000, as proposed by the House.

On Nos. 35 to 56, inclusive, relating to street improvements: Restores the appropriation of $6,000, proposed by the House, for paving Webster Street, Seventh Street to Illinois Avenue; appropriates $14,800 for paving Bryant Street, as proposed by the Senate, instead of $7,400, as proposed by the House, and extends the improvement from Lincoln Road to Fourth Street, as proposed by the Senate, instead of to Third Street, as proposed by the House; provides for the paving of Thirteenth Street from F to Eye Streets, 80 feet wide, as proposed by the House, instead of a smaller width, and from F to K Streets, as proposed by the Senate; restores the appropriation of $15,000, proposed by the House, for paving Kennedy Street, Fifth Street to Eighth Street; restores the appropriation of $4,800, proposed by the House, for paving Seventeenth Street, Webster Street to Allison Street; restores the appropriation of $7,500, proposed by the House, for paving Kansas Avenue, Allison Street to Buchanan Street; restores the appropriation of $10,900, proposed by the House, for paving New Hampshire Avenue, Grant Circle to Allison Street; appropriates $4,600, as proposed by the Senate, for paving Sixteenth Street SE., East Capitol Street to A Street; appropriates $6,200, as proposed by the Senate, for paving Kansas Avenue, Thirteenth Street to Quincy Street; appropriates $2,400, as proposed by the Senate, for grading Fern Street, Blair Road to Eighth Street; appropriates $7,000, as proposed by the Senate, for paving Quebec Place, Tenth Street to Thirteenth Street; appropriates $14,000 for paving Twenty-seventh Street, K Street to L Street, as proposed by the Senate; appropriates $2,800, as proposed by the Senate, for paving Vine Street, Baltimore & Ohio Railroad to Maple Street; appropriates $13,000, as proposed by the Senate, for paving Arkansas Avenue, Georgia Avenue to Emerson Street; appropriates $8,000, as proposed by the Senate, for paving Twelfth Street, C Street to D Street; appropriates $7,300, as proposed by the Senate, for paving Seventeenth Street, Irving Street to Kilbourne Street; appropriates $13,900, as proposed by the Senate, for paving Thirty-ninth Street, Van Ness Street to Yuma Street; appropriates $19,000, as proposed by the Senate, for paving Twelfth Street, Otis Street to Michigan Avenue; appropriates $13,800, as proposed by the Senate, for paving Fifth Street, T Street to W Street; appropriates $3,500, as proposed by the Senate, for paving V Street, Fourth Street to Fifth Street.

On No. 57: Strikes out the provision proposed by the Senate with respect to the compensation of the assistant to the corporation counsel.

On Nos. 58, 59, and 60, relating to repairs of streets: Appropriates for three motor trucks, as proposed by the Senate, instead of one motor truck, as proposed by the House; fixes the allowance for privately owned automobile at $26 per month, as proposed by the Senate, instead of $20 per month, as proposed by the House, and appropriates $600,000, as proposed by the Senate, instead of $550,000, as proposed by the House.

On Nos. 61 to 63, inclusive, relating to gasoline tax, road and street fund: Restores the appropriation of $112,000 proposed by the House for paving Georgia Avenue, Military Road to Fern Street; appropriates $35,000, as proposed by the Senate, for paving Seventh Street, Pennsylvania Avenue to G Street SW.

On Nos. 65 and 66: Provides for an allowance of $26 per month for a privately owned automobile, as proposed by the Senate, instead of $20 per month, as proposed by the House, and provides that certain revenue shall be credited to the United States and the District of Columbia in the manner provided by law, instead of in the proportions required by law, as proposed by the House, and in the proportions that the appropriations have been or may be paid from the Treasury of the United States and the revenues of the District of Columbia, as proposed by the Senate.

On No. 67: Appropriates $75,000, for trees and parking, instead of $55,000, as proposed by the House, and $100,000, as proposed by the Senate.

On Nos. 68 to 75, inclusive, relating to sewers: Provides for the purchase of eight motor vehicles, instead of four motor vehicles, as proposed by the House, and 10 motor vehicles, as proposed by the Senate; appropriates $265,000, as proposed by the Senate, instead of $231,000, as proposed by the House, for cleaning and repairing sewers and basins; provides for the purchase of seven motor vehicles in connection with suburban sewers, instead of four vehicles, as proposed by the House, and eight vehicles as proposed by the Senate; appropriates $350,000 for suburban sewers, instead of $325,000, as proposed by the House, and $370,000, as proposed by the Senate; appropriates $250,000 for assessment and permit work, instead of $200,000, as proposed by the House, and $300,000, as proposed by the Senate; and appropriates $60,000, as proposed by the House, for the extension of the Rock Creek main interceptor, instead of $30,000, as proposed by the Senate.

On Nos. 76 to 81, inclusive, relating to the collection and disposal of refuse: Fixes the allowances for privately owned motor cycles and automobiles at $13 and $26 per month each, respectively, as proposed by the Senate, instead of $10 and $20 per month each, respectively, as proposed by the House; provides that certain revenue shall be credited to the United States and the District of Columbia, in the manner provided by law, instead of in the proportion required by law, as proposed by the House, and in the proportions as the appropriations are paid from the Treasury of the United States and the revenues of the District of Columbia, as proposed by the Senate; and strikes out the appropriation of $40,000 proposed by the Senate for the purchase of land for a garbage transfer station.

On No. 82: Restores the appropriation of $7,000 proposed by the House for the purchase of a site for playground purposes.

On Nos. 85 to 88, inclusive, relating to the electrical department: Appropriates $79,940 for personal services, as proposed by the House, instead of $81,080, as proposed by the Senate; fixes the allowance for privately owned automobiles at $26 per month each, as proposed by the Senate, instead of $20 per month each, as proposed by the House; appropriates $525,000 for lighting, as proposed by the Senate, instead of $500,000, as proposed by the House; appropriates $35,000 for illuminating fixtures, instead of $20,000, as proposed by the House, and $50,000, as proposed by the Senate.

On Nos. 91 to 115, inclusive, relating to public schools: Appropriates $53,580 for personal services in the superintendent's office, instead of $48,300, as proposed by the House, and $56,220, as proposed by the Senate; appropriates $13,020 for personal services in the secretary's office, as proposed by the Senate, instead of $11,700, as proposed by the House; provides for 2,676 teachers, as proposed by the House, instead of 2,690 teachers, as proposed by the Senate; provides for four assistant principals, to be deans of girls of the Business, Western, McKinley Manual Training, and Armstrong Manual Training High Schools, as proposed by the Senate; appropriates $3,459,740 for pay of teachers, instead of $3,450,140, as proposed by the House, and $3,476,540 ,as proposed by the Senate; appropriates $30,000 in connection with vacation schools and playgrounds, as proposed by the Senate, instead of $20,000, as proposed by the House; appropriates $660,000 for longevity pay, as proposed by the Senate, instead of $650,000, as proposed by the House; appropriates $60,000 for payment of annuities, as proposed by the Senate, instead of $50,000, as proposed by the House; appropriates $44,000 for allowance to principals, as proposed by the Senate, instead of $43,280, as proposed by the House; appropriates $90,000 for pay of night-school teachers, as proposed by the Senate, instead of $70,000, as proposed by the House; appropriates $13,330 for Americanization work, as proposed by

the Senate, instead of $9,500, as proposed by the House; appropriates $443,076 for salaries, care of buildings and grounds, as proposed by the House, instead of $452,520, as proposed by the Senate; appropriates $235,000 for fuel, etc., as proposed by the Senate, instead of $226,000, as proposed by the House; appropriates $100,000 for furniture and equipment for the addition to Armstrong Manual Training School, instead of $80,000, as proposed by the House, and $160,000, as proposed by the Senate, and appropriates $4,588 for furniture and equipment for the school building on Spring Road site, as proposed by the Senate; fixes the allowance for privately owned automobiles at $312 per annum each, as proposed by the Senate, instead of $240 per annum each, as proposed by the House; appropriates $125,000 for textbooks and school supplies, as proposed by the House, instead of $150,000, as proposed by the Senate; appropriates $10,000 for laboratory equipment, as proposed by the Senate, instead of $8,000, as proposed by the House; and appropriates $5,000 for preparation of plans and specifications for a new school building for McKinley Manual Training School, as proposed by the Senate.

On Nos. 121 and 122: Strikes out the appropriation of $15,000 proposed by the Senate for the purchase of a site for a new school in the vicinity of South Dakota and Rhode Island Avenues NE.; and appropriates $5,000, as proposed by the Senate, for the preparation of plans, etc., in connection with the Junior High School near Twenty-fourth and N Streets NW.

On Nos. 125 and 126: Provides for 25 policemen to be mounted on horses, as proposed by the Senate, instead of 20, as proposed by the House, and appropriates $1,745,700 for salaries, Metropolitan police, as proposed by the Senate, instead of $1,743,000, as proposed by the House.

On No. 127: Appropriates $400,000 for the policemen and firemen's relief fund, as proposed by the Senate, instead of $350,000, as proposed by the House.

On Nos. 128 to 135, inclusive, relating to the fire department: Appropriates $45,000 for repairs to apparatus, instead of $35,000, as proposed by the House, and $50,000, as proposed by the Senate; appropriates $30,000 for hose, as proposed by the Senate, instead of $25,000, as proposed by the House; appropriates for three pumping engines, as proposed by the Senate, instead of two, as proposed by the House, to cost $10,000 each, as proposed by the House, instead of $12,500 each, as proposed by the Senate; appropriates $2,000 for an automobile, as proposed by the Senate; strikes out the appropriation of $16,000, proposed by the Senate, for a drill tower and concrete smoke-test building; appropriates $62,000 for new truck-company house, as proposed by the Senate, instead of $50,000, as proposed by the House; and appropriates $56,000 for a new engine-company house, as proposed by the Senate, instead of $45,000, as proposed by the House.

On Nos. 136, 137, and 138, relating to the health department: Strikes out, as proposed by the Senate, the limitation proposed by the House on expenditures for personal services in connection with the prevention of contagious diseases; strikes out the allowance of $10,000, proposed by the Senate, in connection with the prevention of diphtheria; and fixes the allowance for a privately owned automobile at $26 per month, as proposed by the Senate, instead of $20 per month, as proposed by the House.

On No. 144: Provides in connection with the Industrial Home School for Colored Children that certain revenue shall be credited to the United States and the District of Columbia in the manner provided by law, instead of in the proportion required by law, as proposed by the House, and in the proportions as the appropriations for such school are paid from the Treasury of the United States and the revenues of the District of Columbia.

On Nos. 145 to 148, inclusive, relating to the militia: Provides for the purchase and maintenance of athletic and other equipment, as proposed by the Senate; appropriates $23,000 for expenses of camps, as proposed by the Senate, instead of $20,000, as proposed by the House; appropriates $7,000 for rent of armory and drill hall, as proposed by the House, instead of $15,000, as proposed by the Senate; and appropriates $9,000 for pay of troops, as proposed by the Senate, instead of $7,000, as proposed by the House.

On No. 149: Appropriates $150,000 on account of Anacostia River and Flats, as proposed by the House, instead of $200,000, as proposed by the Senate, and provides, as proposed by the Senate, for continuing the work in accordance with the revised plan as set forth in Senate Document 97, Sixty-eighth Congress, first session, and further provides, as proposed by the Senate, that not more than $25,000 of the appropriation may be expended above Benning Bridge.

On Nos. 150 and 151: Provides for the purchase of motor cycles for park police, as proposed by the Senate, and appropriates on account of motor cycles, $4,250, as proposed by the Senate, instead of $3,000, as proposed by the House.

On Nos. 152 to 161, inclusive, relating to the improvement and care of public grounds: Strikes out the appropriation of $53,500 proposed by the Senate for laying cement and other walks and drives in various reservations; appropriates $60,000 for improvement, care, and maintenance of various reservations, as proposed by the Senate, instead of $50,000, as proposed by the House; appropriates $35,000 for improvement and care of East Potomac Park, as proposed by the Senate, instead of $25,000, as proposed by the House; provides that the tourists' camp shall be maintained on its present site in East Potomac Park, as proposed by the House, instead of without designation of its location, as proposed by the Senate; appropriates $15,000 in connection with outdoor sports in the parks, as proposed by the Senate, instead of $10,000, as proposed by the House; appropriates $40,000 for increased cost in park maintenance, instead of $30,000, as proposed by the House, and $50,000, as proposed by the Senate; appropriates $10,000 for purification of waters of Tidal Basin, as proposed by the House, instead of $12,000, as proposed by the Senate; appropriates $37,000 for lighting the public grounds, as proposed by the Senate, instead of $35,000, as proposed by the House; appropriates $5,000 for a survey to establish boundary line between the District of Columbia and the State of Virginia, as proposed by the Senate; and strikes out the provision proposed by the Senate allowing the use of appropriations interchangeably.

On No. 162: Strikes out the appropriation of $762,000, proposed by the Senate, for the acquisition of the Klingle Road Valley Park, the Piney Branch Valley Park, and the Patterson tract.

On No. 163: Appropriates $1,500,000 for increasing the water supply, instead of $800,000, as proposed by the House, and $2,500,000, as proposed by the Senate.

On Nos. 164 and 165, relating to the water department: Fixes the allowance for privately owned motor cycles at $13 per month each, as proposed by the Senate, instead of $10 per month each, as proposed by the House; and appropriates $44,000 for laying water main in the vicinity of Fourth Street and Rhode Island Avenue Northeast, as proposed by the Senate.

On No. 167: Fixes the limitation on expenditures for certain personal services from appropriations for water department work at $25,000, as proposed by the Senate, instead of $20,000, as proposed by the House.

The committee of conference have not agreed upon the following amendments of the Senate:

On No. 2, relating to the salary of the engineer commissioner.

On No. 18, relating to the apportionment of appropriations made for the use of the municipal architect in payment for services of draftsmen, etc.

On No. 28, relating to the submission of estimates of appropriations for the fiscal year 1926, in connection with motor-propelled and horse-drawn vehicles.

On No. 34, appropriating $250 to aid in support of the National Conference of Commissioners on Uniform State Laws.

On No. 64, relating to assessments and the disposition of moneys derived therefrom under the gasoline-tax road and street fund.

On Nos. 83 and 84, relating to the purchase of playground sites.

On Nos. 89 and 90, providing for business manager in the public schools.

On Nos. 116 to 120, inclusive, relating to the acquisition of sites for school purposes, and the construction of a junior high school on one of such sites.

On Nos. 123 and 124, relating to the School for Tubercular Pupils.

On Nos. 140 and 141, providing an additional assistant probation officer under the Supreme Court of the District of Columbia.

On No. 166, limiting the expenditures for personal services in connection with various kinds of work.

C. R. DAVIS,
FRANK H. FUNK,
MARTIN B. MADDEN,
W. A. AYRES,
JOSEPH W. BYRNS,
*Managers on the part of the House.*

Mr. DAVIS of Minnesota. Mr. Speaker, I desire very briefly to state the present condition of this bill. It has caused not only your committee but, I think, the committee of the Senate considerable trouble. There are 166 Senate amendments. I do not care to refer to them just now. The report just read, I think, ought to convince this House that we have done considerable work over a matter of this kind. While this city is not as large as Chicago or New York, yet the complications connected with it are almost enough to drive any ordinary man—not your humble servant—crazy in consideration of matters of this kind; and I assure the Members of the House that I worked honestly and conscientiously, as have the other members of the conference committee in this matter, having in mind not only the interests of the District of Columbia but the interests of the Government of the United States. We have done the best that we can. [Applause.]

The total of this bill as passed by the Senate was $29,227,519. The total of the bill as passed by the House was $24,652,697. The amount added by the Senate was $4,574,822. The Senate has receded from their total bill to the extent of $2,772,414. That is quite a concession, I think. The House recession in the conference committee—and the work has been quite laborious—amounts to $1,380,136, and upon matters which might be said to be still in dispute we shall recommend recession to the amount of $422,272. The total House recession, therefore, amounts to $1,804,408, as against the Senate recession of $2,772,414.

I think gentlemen ought to consider that a pretty fair compromise on our part. [Applause.]

The amount of the bill as agreed to by the managers on the part of the House is $26,455,105. The District of Columbia items in the second deficiency appropriation bill—policemen and firemen and schools and so forth—amount to $2,625,162.21. With that your conferees have nothing to do, and they have nothing to say about it. The items in the field service under the classification act chargeable wholly against the District of Columbia amount to $196,886. The total appropriation for the whole thing amounts to $129,277,153.21.

That is for the year 1925. There is payable by the United States under this bill $9,000,000, and payable from the District revenues, including the water revenues and the gas-tax revenues, $20,277,153.21.

These figures look large, and they are large for a city of this size. There is a great effort over in the Senate to still stick to the 60–40 proposition, and I think I deserve some compliment for helping to put through that proposition several years ago. Let me show you a comparison between the 60–40 basis and the new basis, called the lump sum. The total appropriations for 1925, as I said before, amount to $29,277,153.21. There is payable from water rates $1,196,860 and from the gas tax $925,000, making a total of $2,308,750. On the 60–40 basis the amount that the Government would have to pay would be $10,787,361.28 and the amount that the District would pay would be $16,181,041.93. Under the lump-sum arrangement the Government will pay $9,000,000, and the difference amounts to $1,787,361.28. The amount of estimated revenue surrendered by the United States under the lump-sum agreement is $700,000. The real difference in favor of the United States under the lump-sum arrangement, as contradistinguished from the 60–40 basis, amounts to $1,087,361.28. That is what your conferees have agreed upon, and that is what I shall ultimately ask this House to adopt in the conference report. I say to you that this is a fair and square proposition, at least as far as I am able to accomplish, together with my conferees. I am very much obliged to them for the services they have rendered. This has not been child's play. It has been hard work. In my judgment, it is harder work than any that comes before this House, except possibly work from the Ways and Means on a taxation bill. The Army and the Navy and the Agricultural and the other appropriation bills deal in larger sums, but not in intricacies in any case comparable with what we find in this bill.

I shall not want to yield very much time, because I think the conference report, which has been read and which will appear in the RECORD, makes it very plain. I now yield three minutes to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. Mr. Speaker, I congratulate the gentleman from Minnesota [Mr. DAVIS], the chairman of the subcommittee in charge of the District of Columbia appropriation bill, on the successful work that he has accomplished in connection with the settlement of the problems involved in settling the method of paying the expenses of the District of Columbia.

Mr. DAVIS of Minnesota. I hope my friend will not overlook my colleagues on that committee, Mr. FUNK and Mr. AYRES.

Mr. MADDEN. I certainly do not, and I extend my congratulations to them. The settlement made, I think, is about the most equitable I have ever known. We have left behind us the question of the 60–40 or the 50–50 proposition, and we have fixed the amount of the Government's contribution to a flat sum.

And that fixed sum in this case is about 30 per cent of the total instead of 40 per cent. More than that, Mr. Speaker, in the settlement of this problem the conferees have guarded the Public Treasury by insisting that all revenue arising from expenditures made on the 60–40 basis or 50–50 basis, even though it comes in during the next fiscal year and ensuing years, shall be divided between the Government and the District in the proportion to which each was entitled by law during those years. These amount, perhaps, to $200,000 a year. The exact amount is not ascrtainable now. Under the leadership of the gentleman from Minnesota, accompanied by my colleague [Mr. FUNK] and the gentleman from Kansas [Mr. AYRES], there has been no day too long and no work too arduous for them to undertake. They have worked faithfully, they have worked consistently, conscientiously, and honestly for the accomplishment of a settlement which for all time, let us hope, will clarify the atmosphere and leave to the people of the District of Columbia an opportunity to tax themselves as much as they please and get as many improvements as they please at their own expense and to place the contribution of the people of the United States at a fixed sum which is fair. [Applause.]

Mr. MOORE of Virginia. Will the gentleman yield for a question?

Mr. MADDEN. Yes.

Mr. MOORE of Virginia. If that change which has been made continues, does the gentleman contemplate that the Bureau of the Budget shall still function?

Mr. MADDEN. Oh, yes, indeed. I think we ought not to permit the District of Columbia to come out from under the Budget's jurisdiction any more than we would the Bureau of Mines. There is no reason in the world why they should. The District of Columbia is only a child of the United States. This District was established that the Government might have control over its own affairs, and the mere fact that people have come here to help function the Government ought not to give them privileges that will enable them to act independently of the Government. [Applause.]

Mr. MOORE of Virginia. I hope the gentleman will give me credit for understanding that, but I was wondering, now there has been a lump-sum appropriation out of the Treasury of the United States, if it ends the liability of the United States.

Mr. MADDEN. No; I think now, more than ever before, we ought to visé and prevent from destruction the great Government of the District of Columbia by keeping guard over its activities and protecting and preserving in every way the integrity of every dollar of the money paid into the Treasury by the taxpayers of the District and prevent any peculation, dishonesty, or waste.

Mr. MOORE of Virginia. If the gentleman will allow me, then what is proposed in the future is that the Government shall pay a lump sum for the support of the District?

Mr. MADDEN. Yes, sir.

Mr. MOORE of Virginia. Beyond that the Government shall function as heretofore in connection with the Bureau of the Budget in restricting the authorities of the District in the matter of imposing taxes to raise the revenue to make the expenditures.

Mr. MADDEN. Well, I think, of course there must be some guiding spirit somewhere, and this is the guiding spirit over the creature of the Government, the child of the Government, we might say, and the father must not send the child adrift, and we are not going to do it if I have anything to say about it. [Applause.]

Mr. DAVIS of Minnesota. Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Speaker, there are agreements in this conference report on at least a dozen different items that

make the conference report subject to a point of order. I could have made the point of order against it and sent the report back for further action, but it is too late now in the session to do that. The departments of the Government in the District must have money on which to run and function, and, as we are to adjourn to-morrow evening, I did not feel like doing it, but if we had had more time I would have done it, because it is not $9,000,000 but a total of $10,000,000 that the Government is paying the District in this bill, when no more than $5,000,000 should be paid.

Mr. MADDEN. Will the gentleman yield right there? I just want to say there is not anything in the conference report subject to a point of order.

Mr. BLANTON. Oh, if I had time I could convince the gentleman in two minutes that there are many items in here subject to the point of order agreed to in conference, but I have not the time. Of course; the gentleman from Illinois—he is one of the hardest working men in this Congress, and, thank God, we have got him here—has not had time to wade through it all. If we had not had him here this conference report would not have been completed. [Applause.] I can tell you that. He is the only man in Congress who could have brought this conference report to an agreement, and the committee knows it, but he did not have time to study all these matters in detail like I have studied them, and I know some things were put in by agreement that were beyond the scope of the conferees' authority and subject to the point of order, but, as I say, I would not make it. But by this bill we are paying $10,000,000 out of the Government Treasury next fiscal year to run the expenses of this city.

I want to show you what the total appropriation used to be and how they have gradually been enlarged. In 1894, 30 years ago, the total appropriations made for the District of Columbia for all purposes were only $5,413,223, of which the Government contributed half. In 1904 they were $8,888,097; in 1914, only 10 years ago, the total appropriations for this great city were only $7,392,239, of which the Government paid half; and in 1917, when we entered the war, the total appropriations for this city were $12,842,216, of which the Government paid half, but in this bill we are now appropriating the enormous sum of $29,270,000 for the fiscal year 1925, and the Government is to contribute $10,000,000. That should give us pause to think.

I agree with every word the gentleman from Illinois [Mr. MADDEN] has just said. This Government is not going to turn loose this District that is the Nation's Capital. It is going to control it, and in reply to the gentleman from Virginia [Mr. MOORE] I will say that if these people would have a tax rate of as much as $2.50 on the $100, which is less than any city in the United States now pays, if they would fix the tax rate here at $2.50 a hundred, instead of only $1.20 per $100, and let the Government of the United States pay $5,000,000 toward their expenses each year, which is as much as they ought to pay, they would then have more money to spend for everything they want in the way of improvements than they could use.

But they do not do that. They keep their tax rate at $1.20 per $100, and then expect the Government to pay all the balance of their civic expenses. I promise the Congress this: I promise you that when you meet next December, the District committee will bring you a proper bill to require a proper tax rate to be paid here in this city, and I hope you will pass it. [Applause.]

THE SO-CALLED SURPLUS OF $4,438,154.92

I am indebted to and thank my colleagues for permitting me to insert in the main part of the RECORD at this point my discussion of the so-called surplus of $4,438,154.92, which greedy, selfish, citizen associations of Washington are claiming is due the District of Columbia by the Government of the United States.

The Committee on the District of Columbia, neither during this Congress nor during any other Congress, has made any real investigation of this subject. In asking that this bill be passed, it is proposing to take $4,438,154.92 of the people's money out of the Public Treasury and give it to the people who are so fortunate as to live in the District of Columbia; and it is also inviting these Washingtonians to take from the Treasury a little later on the further sum of $819,373.83. If, under the provisions of law, strained or otherwise, this Government were due the District of Columbia any sum, I would unhesitatingly vote to pay it, for I promptly pay my own debts, and I want my Government to do likewise.

But the justice of this claim has not yet been demonstrated. It was hatched up in the minds of certain individuals representing the various citizens' associations of Washington in an attempt to make this Government pay as large a share as possible of the local civic expenses of Washington, in order to continue local taxes at a nominal rate.

COMMITTEE MADE NO INVESTIGATION WHATEVER IN LAST CONGRESS

From my minority report which I filed against this proposal in the last Congress, as then embraced in H. R. 14372, introduced by our colleague from Colorado [Mr. HARDY], I quote from my said report, found on page 4844 of the CONGRESSIONAL RECORD for February 27, 1923, the following:

The House Committee on the District of Columbia was called to meet at 10.30 o'clock a. m. on Wednesday, February 21, 1923. The committee has 21 members. The presence of 11 members is required to make a quorum. When the committee was called to order at 10.40 a. m. only eight members were present, to wit: Chairman FOCHT, ZIHLMAN, Walters, SPROUL, BLANTON, GILBERT, HAMMER, and O'BRIEN. After passing on routine matters, the committee conducted a hearing on the proposed legislation to extend the time for evicting alley residents, hearing the testimony of several witnesses. At 10 minutes before noon, the business of said committee apparently having been concluded, as members were then circulating a eulogy on the chairman, the writer stated that he would have to leave, in order to be in the House when a conference report was to be taken up.

Concerning what transpired thereafter, the press reports that a motion was made to report the alley bill, but was withdrawn when a Member made the point of no quorum, and then, upon motion of the gentleman from Maryland [Mr. ZIHLMAN], the few Members present ordered a favorable report on the Hardy bill (H. R. 14372), to credit said alleged surplus to the District of Columbia. At that time there was no quorum present, and said committee was sitting and acting without authority, for the House of Representatives has never granted authority to said Committee on the District of Columbia to sit during the sessions of the House. The gentleman from Kentucky [Mr. GILBERT] voted against reporting said bill. Such bill has never been considered by said committee. No hearing whatever was had on same by said committee.

None of the few members of said committee present had read even the majority report of said special select committee. None of them had conferred with the gentleman from Nebraska [Mr. EVANS] concerning the minority report he was going to file against said alleged surplus. The only excuse given for reporting out said bill without hearing or consideration was the statement of the gentleman from Maryland [Mr. ZIHLMAN] that he had promised the gentleman from Colorado [Mr. HARDY] to report it out. This ridiculous half-page report shows that an amendment in the Senate is pending to attach this $4,438,154.92 unjust legislation upon the deficiency bill which this House to-day is reading under the five-minute rule. The evident intention is to pass it without debate. These gentlemen do not understand that that surplus claim is wholly without merit.

The foregoing shows conclusively that the Committee on the District of Columbia of the House of Representatives held no hearings and made no investigation whatever of this proposal in the Sixty-seventh Congress, but reported the bill when there was no quorum present merely to comply with a request that had been made by the gentleman from Colorado [Mr. HARDY].

COMMITTEE MADE NO REAL INVESTIGATION IN THIS CONGRESS

When the Committee on the District of Columbia met on Wednesday, May 7, 1924, I then insisted that no action be taken on this bill until there was a hearing upon and an investigation of it. Only after urgent insistence on my part did the committee authorize a hearing. And the committee required, when creating the subcommittee, that it should make its report thereon back to the full committee on the next Wednesday, May 14, 1924. I immediately urged both the gentleman from Wisconsin [Mr. LAMPERT] and the gentleman from Pennsylvania [Mr. BEERS] to begin the hearings at once, but same was not called until 10.30 a. m., Monday, May 12, 1924, which permitted only an hour and a half that day and an hour and a half on Tuesday, as the House met each day at noon, and the report had to be made back to the full committee on Wednesday, May 14, 1924; and I realized full well that no proper hearing could be conducted in three hours, even if I were given the entire time to offer evidence against the bill.

COMMITTEE GAVE NO OPPORTUNITY TO PRESENT EVIDENCE AGAINST THE BILL

As a preliminary to presenting evidence, I tried to show that the main proponent of this measure would benefit materially by its passage, as he owned property here in Washington alleged to be worth about $200,000, but which was assessed for taxes at only $95,010, and at the already low rate of only $1.20 on the $100 made his taxes on same amount to only $1,140.12, and that giving this $4,438,154.92 to the District would naturally cause a further reduction in his taxes. The committee would not allow my statement to go in the record, and further tried to curtail me to just a few minutes, so I turned the sham hearing over to them.

JUST WHAT OCCURRED

In order to show just what did occur, I quote same from the printed hearings, to wit:

Mr. BLANTON. There are one or two matters that I want to start the investigation with, Mr. Chairman, if I may have the consent of the committee. I requested the hearing.

Mr. BEERS. The gentleman from Texas may proceed.

(Mr. BLANTON thereupon made a statement which was later stricken from the record on a point of order raised by Mr. KUNZ.)

Mr. BLANTON. Well, gentlemen, I am sorry, but if I can not put a statement in the record in protection of my position before the committee I respectfully withdraw from the committee and turn it over to you gentlemen. You can do what you please about the bill. This hearing is had at my request. I filed a minority report against this bill in the Sixty-seventh Congress.

Mr. KUNZ. Mr. BLANTON, do you think it is fair to attack a man——

Mr. BLANTON (interposing). I am not attacking him.

Mr. KUNZ. You are.

Mr. BEERS. I do not think you mean to.

Mr. BLANTON. It is not attacking a man merely to state that he owns property here assessed at $95,000. There is my statement, gentlemen [handing statement to representatives of the press].

I had some evidence that I wanted to put in in regard to this alleged surplus. I expect to offer two auditors who will demonstrate that the Government owes the District nothing.

Mr. BEERS. We shall be glad to hear any evidence bearing upon the question that is before us.

Mr. KUNZ. You are going to present evidence as to the question of the surplus?

Mr. BLANTON. Gentlemen, I give notice that I shall file a minority report on the bill. I had a lot of evidence that I wanted to offer, but I now see that it would avail nothing.

Mr. BEERS. We want to hear the evidence.

Mr. KUNZ. Mr. Chairman, let the record show that the gentleman is going to file a minority report before any action is taken by this committee. The gentleman requested that a subcommittee be appointed for the purpose of taking up the consideration of this bill, to show the committee that there is not a surplus.

Mr. BLANTON. I have given close study to this subject for two years, and I filed a minority report against it in the Sixty-seventh Congress. Do you mind my stating this for the record, Mr. Chairman, without mentioning any names—that the party to whom I referred the other day as owning property here, owns property assessed at over $95,000, with a frontage of 543 feet on Twenty-ninth Street NW., that is not needed for residential purposes, in connection with his residence which fronts 100 feet on Cathedral Avenue.

Mr. KUNZ. You may state that; but if you state that he is personally interested and that he legislates because of his interest in the property that he owns in the District of Columbia, then I think you are wrong.

Mr. BLANTON. Mr. Chairman, the only thing I desire to state, without any attempt to reflect upon anyone, is this: That the party to whom I mentioned the other day as a property owner here has property assessed in three different assessments in the District of Columbia, aggregating a total of $95,010.

Mr. KUNZ. In his own name?

Mr. BLANTON. In his own name.

Mr. KUNZ. As shown by the records of the District?

Mr. BLANTON. Yes; as certified by Mr. William P. Richards, the tax assessor of this District. The part embracing his residence is assessed at $81,010, the tax on same being $972.12. Another portion is assessed at $7,000, the tax on same being $84. Another portion is assessed at $7,000, the tax on same being $84. This makes a total assessment of $95,010, with a total tax of $1,140.12.

Mr. KUNZ. Mr. Blanton, referring to the remark you made a few moments ago, when I raised the point of order, is it your contention that the board of assessors in setting a valuation on that property lowered the value and reduced the taxes on his property because he is a Senator?

Mr. BLANTON. Not at all; no lower than any other Congressman or any other Senator.

Mr. KUNZ. Or any other property owner in the District; is that it? Or am I led to believe that Senators and Representatives have influence enough to get a reduction?

Mr. BLANTON. No. It is all assessed low. For instance, there is a Texas man, with large southern interests, who owns the Meridian Mansions, at 2400 Sixteenth Street. It is assessed at something over $1,400,000; less than $1,500,000. I have the statement of E. Kirby Smith, who owns it, that he gave $2,500,000 for it, and that he has spent quite a large sum in improving that property, and that the improvements alone could not be placed there for $3,000,000, let alone the land; and yet it is assessed at less than $1,500,000.

Mr. KUNZ. Do you not think that Congress ought to investigate the valuation and see whether these gentlemen are doing their duty?

Mr. BLANTON. There are numerous pieces of property here, that I have put in the record already, that are assessed at less than half their value—large pieces of property.

Mr. KUNZ. Then, if that injustice is being done to the District and to the people of this country—because they are paying 60 and 40—if it is really an injustice, I think an investigation should be made.

Mr. BLANTON. You can not get full assessment as long as you have a pro rata payment by the Government and the District of 60-40. You have got to fix a tax rate here at a certain reasonable amount.

But I want to finish my statement.

Mr. KUNZ. You can have a just valuation of the property.

Mr. BLANTON. If you are going to take up all my time by asking questions, I can not put anything in the record at all.

Mr. KUNZ. Go on and let us see what else you want to put in.

Mr. BLANTON. Of this property, the main residence fronts 100 feet on Cathedral Avenue, but there are 543.1 feet fronting on Twenty-ninth Street NW., which has recently been graded up, apparently for the purpose of building improvements thereon. Upon same could be built 21 residences having a frontage of 25 feet each, and not hurt the main residence, which has its own frontage of 100 feet on Cathedral Avenue.

Now, Mr. Chairman, I want to show how large a question this is that we are called upon to report on day after to-morrow.

I quote from my minority report filed against this proposal in the last Congress on page 4843 of the RECORD for February 27, 1923:

"When the claim for this so-called surplus was made Congress passed the act of June 29, 1922"—

For the purpose of having this matter investigated—

Which provided:

"A joint select committee * * * is created and is authorized and directed to inquire into all matters pertaining to the fiscal relations between the District of Columbia and the United States since July 1, 1874, with a view of ascertaining and reporting to Congress what sums have been expended by the United States and by the District of Columbia, respectively, whether for the purpose of maintaining, upbuilding, or beautifying the said District, or for the purpose of conducting its government or its governmental activities and agencies, or for the furnishing of conveniences, comforts, and necessities to the people of said District. * * *"

"And on February 5, 1923, after spending nearly $20,000 [on this investigation], the majority of the above special select committee * * * filed their report showing that they had made only—

"'A detailed audit and examination of the District's accounts from June 30, 1911, to June 30, 1922.'"

Mr. KUNZ. You are now talking about the Senate committee; is that it?

Mr. BLANTON. The joint committee. In other words, they reported that they had made a detailed audit and examination only from 1911 to 1922. I quote further:

"Whereas in said act creating said special select committee Congress provided that said committee—

"'Is authorized and directed to inquire into all matters pertaining to the fiscal relations between the District of Columbia and the United States since July 1, 1874.'"

In other words, they skipped from July 1, 1874, to June 30, 1911. All that interim between July 1, 1874, and June 30, 1911, was not investigated at all.

Now, notice, gentlemen, this further quotation from my minority report:

"In explaining why they did not comply with the above direction and go back to 1874, instead of limiting their audit and examination to the short period between June 30, 1911, and June 30, 1922, the majority in their report said:

"'It would have been necessary to ask the Congress for a year's additional time, at least, within which to make a final report, and an additional appropriation of many thousand dollars.'"

In other words, they give as their reason for not going back of 1911, that it would have taken another year and would have required the expenditure of some thousands of dollars more.

"The majority of the committee wholly disregarded the following direction given them by Congress"—

Then I quote where Congress directed them to go back to July 1, 1874.

Now, I want to show you what Mr. Evans, our colleague from Nebraska, says in his report on page 4764, RECORD for February 26, 1923. This is his minority report that I am quoting from:

"*To the Senate and House of Representatives:*

"The minority views of your committee appointed pursuant to the act of Congress approved June 29, 1922, to inquire into the fiscal relations between the District of Columbia and the United States.

"The undersigned is unable to agree with the findings and conclusions of the majority of the committee for the following reasons:

"(1) The construction of the act raising the committee as made by the majority report is erroneous, and the same objection lies as to the

construction or effect of other acts bearing upon or affecting the matter investigated by the committee.

He says that their construction was erroneous. Then he says:

"(2) The investigation made by the committee has covered neither the period nor the extent that Congress directed."

Notice what he says:

"The investigation made by the committee has covered neither the period nor the extent that Congress directed."

Then he goes on:

"(3) The finding by the majority of a balance or surplus of $4,438,154.92 as due to the District of Columbia is not supported by facts or law."

That is what Mr. Evans tells you.

Let me read you a few other excerpts:

"The purpose Congress had in creating the joint select committee was to discover and report to Congress all facts bearing on the fiscal relations between the District of Columbia, hereinafter called the District, and the United States, hereinafter called the Government, in order that Congress might be able to determine the exact state of such fiscal relations. Such a discovery and report has not been made."

That is your Republican member of this committee in the House that is talking—not a Democrat.

Mr. LAMPERT. Mr. Chairman, I want to be fair with the gentleman from Texas, but I do not think it is quite fair on his part to take up all the time this morning. We have called a witness here who is a very busy man, to hear his story.

Mr. BLANTON. Gentlemen, I will beg you to excuse me. I do not care to waste any further time on such a hearing. If the only man who has objected to this report and asked a hearing can not have a few minutes, excluding all interrupting questions to introduce pertinent evidence showing that no such surplus exists, then I withdraw, and will show it in a minority report.

Mr. LAMPERT (interposing). I have not taken up a minute of the time of this committee this morning.

Mr. BLANTON. Well, I have had about five minutes, excluding questions.

Mr. LAMPERT. I do not know anything about this subject. I want to hear something about it.

Mr. BLANTON. I will ask you to excuse me. I do know about it.

Mr. LAMPERT. All right, if you feel that way about it.

(Mr. Blanton thereupon retired.)

SO-CALLED HEARING WAS A COMPLETE FARCE

And the extent of the hearing conducted by this subcommittee consisted in putting on the stand Mr. Daniel J. Donovan, who is employed by the District of Columbia as its auditor, who naturally made a general statement favoring the District's contention. Besides being an interested employee of the District of Columbia, he is an interested citizen and taxpayer of Washington, interested in getting everything out of the Government that he can for Washington. Then for a few minutes the subcommittee heard our colleague from Colorado [Mr. HARDY], who made no attempt to discuss the fiscal business relations of the Government and District back to 1874, as Congress had commanded us to do, but merely made general statements relating wholly to matters between 1911 and 1922; and he was followed by a few words from Mr. Edward F. Colladay, who represents leading citizens of Washington, in getting everything he can out of the Government, and he presented an urgent request that Congress give this $4,438,154.92 to the District, signed by the following:

Theodore W. Noyes, chairman executive committee of Citizens' Joint Committee on District of Columbia Fiscal Relations; E. F. Colladay, president board of trade; Isaac Gans, president chamber of commerce; Anton Stephan, president Merchants and Manufacturers' Association; Charles A. Baker, president Federation of Citizens' Associations; Stanton C. Peelle, president Bar Association; Herbert L. Davis, president Columbia Heights Citizens' Association; Evan H. Tucker, president Northeast Citizens' Association; J. A. Oliver, president Georgetown Citizens' Association; H. E. Stringer, president City Club; H. V. Haynes, president District of Columbia Bankers' Association; J. C. Weedon, president the Real Estate Board; Arthur D. Marks, president Rotary Club; Harry G. Kimball, president Kiwanis Club; James M. Proctor, president Civitan Club.

Mr. COLLADAY. I understand that Major Donovan has dealt fully with the matters of accounting and technique which you might wish to consider and that Congressman HARDY, who is a member of the congressional joint committee which reported this surplus, has given you such information as you might naturally desire from that committee's point of view. Therefore there is no necessity for any statement by way of relating fact or law or setting forth argument on the part of the citizens' joint committee at this time.

We content ourselves with standing upon the report of the joint committee of Congress and upon the action taken by the Senate on the Phipps bill and the merits of the case, and respectfully petition your committee to favorably report the Phipps bill.

Mr. KUNZ. Mr. Chairman, I move that the bill be reported.

Mr. BEERS. Do we not want to hear from Mr. Donovan? I thought he came here to further report.

Mr. KUNZ. I know. I said yesterday I was convinced. What is there more you want to question him on? He has gone over everything, unless you want him to repeat.

Mr. BEERS. It was my impression he had not gone over everything. We stopped him, you remember.

Mr. KUNZ. I know; but he has covered everything. You have covered everything, haven't you, Mr. Donovan?

Mr. DONOVAN. Yes, Mr. Kunz. I think my testimony yesterday went into all the worth-while phases of this hearing.

Mr. KUNZ. It covered every point that Mr. BLANTON had attacked.

Mr. DONOVAN. That is right, except I would like——

Mr. BEERS. Gentlemen, you have heard the motion.

Mr. DONOVAN. Mr. Chairman, with your permission I would like to make one short statement for the record, to answer a statement made by Mr. BLANTON yesterday regarding the valuation of the Meridian Mansions, 2400 Sixteenth Street.

You will recall, Mr. Chairman, one of the statements made by Mr. BLANTON, and if you do not object I would like to make a reply from our assessors' end of it.

Mr. KUNZ. The gentleman from Texas owns that place?

Mr. DONOVAN. Louisiana.

Mr. KUNZ. He said he was from Texas, did he not?

Mr. DONOVAN. I understand Mr. Kirby Smith, the present owner of the property, is from Louisiana and not Texas.

Mr. KUNZ. He said he expended $2,000,000 on the property and is only paying taxes on $800,000.

Mr. DONOVAN. That was not quite the statement. He made the statement to this effect, that the property is assessed, in round figures, on the full valuation basis, at $1,500,000, and that the owner of the property, Mr. Kirby Smith, had told him that since he purchased the property he had put improvements into the building costing more than $3,000,000.

As a matter of fact the only improvements that have been made by Mr. Kirby Smith to the Meridian since the property came into his possession have cost not more than $50,000.

Mr. KUNZ. Mr. Chairman, I move that the hearings be concluded and that the bill be reported favorably.

Mr. BEERS. Gentlemen of the committee, you have heard the motion that we report the bill favorably to the general committee. All those in favor of the motion please say "aye."

(The motion was carried.)

Mr. KUNZ. Mr. Chairman, I move we adjourn.

(Whereupon, at 11.15 o'clock, the committee adjourned.)

NEITHER COULD QUOTE CORRECTLY EITHER FIGURES OR EVIDENCE

You will note that, after I had left the hearing, in attempting to quote me the gentleman from Illinois [Mr. KUNZ] incorrectly asserted that I had stated that—

Mr. E. Kirby Smith had expended $2,000,000 on his property and is only paying taxes on $800,000—

when I did not say anything of the kind, as the following, quoted from the hearings, is what I said:

Mr. KUNZ. Or any other property owner in the District; is that it? Or am I led to believe that Senators and Representatives have influence enough to get a reduction?

Mr. BLANTON. No. It is all assessed low. For instance, there is a Texas man, with large southern interests, who owns the Meridian Mansions, at 2400 Sixteenth Street. It is assessed at something over $1,400,000—less than $1,500,000. I have the statement of E. Kirby Smith, who owns it, that he gave $2,250,000 for it, and that he has spent quite a large sum in improving that property, and that the improvements alone could not be placed there for $3,000,000, let alone the land, and yet it is assessed at less than $1,500,000.

And you will also note that this expert auditor, employed by the District of Columbia, Mr. Daniel J. Donovan, likewise quoted me incorrectly when in reply to Mr. KUNZ's question he asserted that I said what I did not say. Read carefully:

Mr. DONOVAN. I understand Mr. Kirby Smith, the present owner of the property, is from Louisiana and not Texas.

Mr. KUNZ. He said he expended $2,000,000 on the property and is only paying taxes on $800,000.

Mr. DONOVAN. That was not quite the statement. He made the statement to this effect, that the property is assessed in round figures on the full valuation basis at $1,500,000, and that the owner of the property, Mr. Kirby Smith, had told him that since he purchased the property he had put improvements into the building costing more than $3,000,000.

As a matter of fact, the only improvements that have been made by Mr. Kirby Smith to the Meridian since the property came into his possession have cost not more than $50,000.

MY STATEMENT ABSOLUTELY CORRECT

Every word of my statement about Mr. E. Kirby Smith and his Meridian Mansions was correct, but the trouble was that neither Mr. Donovan nor Mr. KUNZ could quote me correctly, for both of their attempted quotations were erroneous.

MR. E. KIRBY SMITH, HIMSELF, ADMITS ALL I SAID

I quote the following excerpts from a letter received by me from Mr. E. Kirby Smith:

MERIDIAN MANSIONS HOTEL,
*Washington, D. C., February 1, 1924.*

Hon. THOMAS L. BLANTON,
*Representative from Texas,*
*House Office Building, Washington, D. C.*

MY DEAR MR. BLANTON: In the Washington Daily News of January 28, under the head of "Properties underassessed," I note that you list Meridian Mansions Hotel, at 2400 Sixteenth Street, which is a property purchased by me on January 1 of last year. * * *

The writer is at this time the president of the Louisiana Society of Washington, and for six years I was a director in the Federal Reserve Bank of Dallas. * * *

The usual assessment on property is 50 per cent of the valuation. This property could not be replaced for less than $3,000,000, in addition to the land * * * it was sold to me on very long-time payments for $2,250,000. * * *

I have spent quite a fortune refurnishing and building over the place to make it attractive.

Very truly yours,

E. KIRBY SMITH.

The tax assessor of the District of Columbia advised me that for last year the Meridian Mansions was assessed at $1,481,960, and at the $1.20 rate of taxation on the $100 paid a tax of only $17,783. The evidence filed before the Rent Commission showed that its annual receipts from rentals aggregate $281,532.20.

COMMITTEE'S FAVORABLE REPORT

It is certainly amusing to read the committee's favorable report on this bill. It is short and sweet. It couldn't be otherwise. Here it is:

Mr. BEERS, from the Committee on the District of Columbia, submitted the following report to accompany S. 703:

"The Committee on the District of Columbia, to whom was referred the bill (S. 703) making an adjustment of certain accounts between the United States and the District of Columbia, having considered the same, report favorably thereon with the recommendation that it do pass."

And upon that simple statement the Committee on the District of Columbia expects the Congress to take out of the people's Public Treasury the enormous sum of $4,438,154.92 and make a present of it to the petted people of Washington.

What reason is given for it? None. What facts are offered in support of it? None. The committee expects the Congress to vote for it blindly. The committee expects the Congress not to be of an inquisitive mind. The committee expects the Congress not to be interested. And most of the time when District business is before the Congress it is not interested. And that is just why these citizens' organizations of Washington are able to get so many millions handed out to them from the Public Treasury.

On May 26, 1924, when we had up the bill authorizing $1,100,000 a year to be spent here in buying additional parks, every year from now to eternity, I began my argument against it, as follows:

Mr. BLANTON. Mr. Chairman, a few hours ago we had 385 Members of Congress present.

Mr. SPROUL of Illinois. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. SPROUL of Illinois. We can have 385 Members here again in a few minutes, and I make the point of order that there is no quorum.

Mr. BLANTON. Oh, do not do that; we want to occupy this time.

Mr. SPROUL of Illinois. If the gentleman will take out of the RECORD the statement that we had 385 Members present and only 25 now, I will withdraw my objection.

Mr. BLANTON. That is a part of my argument, and I must leave it in the RECORD.

Mr. SPROUL of Illinois. I do not think it is a very good argument, and I insist on the point of order.

And after the Members were called over I said:

Mr. BLANTON. Mr. Chairman, when the distinguished gentleman from Illinois [Mr. SPROUL] made the point of order, I had just called attention to the fact that a half hour previous we had 385 Members on the floor to vote on the tax reduction bill, while at that particular time we had only 25 Members left on the floor to pass on this bill involving an annual appropriation of $1,100,000; and that is illustrative of the condition that still prevails here in the District of Columbia with regard to tax matters, to the detriment of the people of the United States who pay much of the bill. That is the reason why there has been no change in the existing law in that respect.

I mention these facts merely to show that it is necessary for some member of the District Committee to make careful investigation of all legislation reported by it. The gentleman from Massachusetts [Mr. UNDERHILL] is a distinguished member of the District Committee. I quote from page 8378 of the CONGRESSIONAL RECORD for May 12, 1924, his reflection on what usually happens to bills from this committee, which shows that proper minority reports are effective:

Mr. UNDERHILL. It has become almost a habit in the Committee of the Whole House on the state of the Union to strike out the enacting clause of every bill the District of Columbia Committee reports. It is a wrong.

And so forth.

ORIGIN OF THIS FICTITIOUS CLAIM

This claim of a so-called surplus due the District of Columbia arose in the following manner: Until 1922 the fiscal arrangement was that the expenses of the District should be paid 50 per cent by the District and 50 per cent by the Government; and since that time such expenses have been paid 60 per cent by the District and 40 per cent by the Government.

As the taxes from the people of the District at their low assessment and low rate of taxation have been collected they have been placed in the Treasury to the separate credit of the District of Columbia. And the license fees, franchise fees, fines, and penalties have also been credited. And because of the fact that in many of the supply bills for the various Government departments Congress has each year made appropriations for various civic enterprises, amounting to millions on the water system alone, which came 100 per cent out of the Government, the appropriations made in the regular District of Columbia appropriation bills did not exhaust all of the credits which the District of Columbia had in the Treasury, credited from such taxes, licenses, franchises, fines, and penalties, simply because the needs and necessities of the District had been provided for by the Government 100 per cent out of its own Treasury in various of its departmental supply bills.

And because of these facts the District of Columbia Commissioners and citizens saw a fine opportunity to make a claim against the Government to the effect that because Congress did not actually exhaust such credits of the District in the Treasury by appropriations in the regular District of Columbia appropriation bills that the aggregate of such credits not so exhausted ought to be given to the District of Columbia. These commissioners and citizens of the District of Columbia specially avoided taking into account the millions and millions of dollars the Government spent in other departmental supply bills taken 100 per cent out of the Government Treasury, which, if matched by funds of the District under the regular fiscal relation agreement, would exhaust two or three times the unexpended credits in the Treasury claimed by the District of Columbia.

WHAT CONGRESS AUTHORIZED

And when the District of Columbia made this claim the Congress required that all of these matters be taken into consideration back to the year 1874. Let me quote from the act of June 29, 1922, which created the joint select committee of Senators and Representatives to investigate this claim, the following:

A joint select committee composed of three Senators to be appointed by the President of the Senate and three Representatives to be appointed by the Speaker of the House of Representatives, is created, and is authorized and directed to inquire into all matters pertaining to the fiscal relations between the District of Columbia and the United States since July 1, 1874, with a view of ascertaining and reporting to Congress what sums have been expended by the United States and by the District of Columbia, respectively, whether for the purpose of maintaining, upbuilding, or beautifying the said District, or for the purpose of conducting its government or its governmental activities and agencies, or for the furnishing of conveniences, comforts, and necessities to the people of said District.

Neither the cost of construction nor of maintenance of any building erected or owned by the United States for the purpose of transacting therein the business of the Government of the United States shall be considered by said committee. And in event any money may be or at any time has been by Congress or otherwise found due, either legally or morally, from the one to the other, on account of loans, advancements, or improvements made, upon which interest has not been paid by either to the other, then such sums as have been or may be found due from one to the other shall be considered as bear-

ing interest at the rate of 3 per cent per annum from the time when the principal should, either legally or morally, have been paid until actually paid. And the committee shall also ascertain and report what surplus, if any, the District of Columbia has to its credit on the books of the Treasury of the United States which has been acquired by taxation or from licenses. And the said committee shall report its findings relative to all the matters hereby referred to it to the Senate and House, respectively, on or before the first Monday in February, 1923.

You will specially note that said committee was required by Congress to audit all of such business relationship of the District of Columbia and the Government back to July 1, 1874, and instructed said committee to take into consideration all sums of money which the Government during that time had spent—

For the purpose of maintaining, upbuilding, or beautifying the said District, or for the furnishing of conveniences, comforts, and necessities to the people of said District.

That required this committee to check up all departmental supply bills, and to glean from the same all sums expended by the Government for the purposes above mentioned during all of the period back to July 1, 1874, and Congress intended that all such sums should offset, in the proportion that the District and Government should pay the expenses, the various credits the District of Columbia had in the Treasury.

BUT COMMITTEE DID NOT OBEY DIRECTIONS OF CONGRESS

The gentleman from Nebraska, Mr. Evans, who was a member of this joint select committee, filed a most comprehensive minority report against this so-called surplus, asserting that the committee refused to obey the directions of Congress and refused to make any investigation or audit of the business during the period between July 1, 1874, and July 1, 1911, as Congress had directed it to do, but that such committee confined its investigation and audit only to the period between July 1, 1911, and July 1, 1922. This minority report of Mr. Evans's is printed in the CONGRESSIONAL RECORD for February 26, 1923, on pages 4763 to 4773, inclusive. Let me quote you a few excerpts from same:

EXCERPTS FROM MINORITY REPORT FILED BY MR. EVANS, OF NEBRASKA

The undersigned is unable to agree with the findings and conclusions of the majority of the committee for the following reasons:

(1) The construction of the act raising the committee as made by the majority report is erroneous, and the same objection lies as to the construction or effect of other acts bearing upon or affecting the matter investigated by the committee.

(2) The investigation made by the committee has covered neither the period nor the extent that Congress directed.

(3) The finding by the majority of a balance or surplus of $4,438,154.92 as due to the District of Columbia is not supported by facts or law.

The language of the act under which the committee was created is clear and positive in its authorization and directions. There is, as to the points upon which the majority of the committee and the writer differ, no ambiguity in the language of the act.

The purpose Congress had in creating the joint select committee was to discover and report to Congress all facts bearing on the fiscal relations between the District of Columbia, hereinafter called the District, and the United States, hereinafter called the Government, in order that Congress might be able to determine the exact state of such fiscal relations. Such a discovery and report has not been made.

The alleged surplus reported by the majority of the committee is not based on such facts or information so gathered, because not all of such facts or information was gathered or searched for. In addition it was desired to have fixed accurately and authoritatively the amounts contributed by the District and the Government, respectively, for "maintaining, upbuilding, or beautifying said District, or for the purpose of conducting its governmental activities and agencies or for the furnishing of conveniences, comforts, and necessities to the people of said District." This direction of Congress has been ignored or so performed as to amount to a disregard of the congressional mandate.

I

The construction of the act raising the committee as made by the majority is erroneous, and the same objection lies to the construction of other acts bearing upon or affecting the investigations by the committee.

The act "authorizes and directs" inquiry into all matters pertaining to the fiscal relations between the District and the Government since July 1, 1874.

First, there is no question but that the act is mandatory. It is not left to the choice or desire of the committee or a majority of the committee to determine whether it is best or proper or just to go into the subject matter presented for inquiry, and the act is equally specific as to the extent. It covers "all matters" pertaining to the fiscal relations * * * since July 1, 1874.

What did the committee do under this authorization and direction? It secured the services of Haskins & Sells, accountants, and secured through them an audit of the District general fund from June 30, 1911, to June 30, 1922. It secured a calculation and stating of the amount of interest on a portion only of the fund found due from one to the other. It inquired of certain persons if they knew of any other items unsettled in the accounts between these interests. It had submitted to it a report of a previous audit made by persons in no way responsible to it, and so far as known such report could not be vouched for as a complete and comprehensive audit of the period prior to June 30, 1911.

Such items as its inquiries developed, it inquired into to only a limited extent. Outside of the audit of the District general fund for the time intervening between June 30, 1911, and June 30, 1922, it has and can produce no certified audit of any period or any account. I wish to emphasize this fact: It does not have an audit that covers fully all accounts between these interests between the dates mentioned in the act, June 30, 1874, and June 30, 1922. None was made. I assume that the construction placed by the majority of the committee, hereinafter called the majority, is measured by its acts, and hence I feel there has been a misconception of the intent of the act. No accountant or auditor, no committee or part of a committee with financial reliability back of its certificate will certify to the correctness of the surplus reported or the completeness and thoroughness of the audit reported.

The effect of the majority report boiled down is that within limits of the time given a thorough audit can not be made. To make such an audit will require more money and more time than was given to the committee. It has inquired of certain persons, former officials, or auditors of a portion of these accounts if they or either of them knew of unreported items, which, if there had been items so known to such persons it would have been their duty to report, and upon receiving an answer denying knowledge of unreported items the majority have accepted as final and complete the investigation of Haskins & Sells as to the District general fund covering the period between June 30, 1911, and June 30, 1922.

Thus it is clearly apparent that this joint select committee did not do what Congress had directed it to do, and that it did not go back to July 1, 1874, but that it merely considered the short period embraced between July 1, 1911, and July 1, 1922. But let me quote further excerpts from Mr. Evans's minority report:

It is also claimed by them that Congress has very materially reduced District appropriations during the war (p. 184). This is an inaccurate statement. The appropriations by years since 1892 follow:

[NOTE.—Total appropriations, including water department.]

| | |
|---|---|
| 1892 | $5,597,125.17 |
| 1893 | 5,372,737.27 |
| 1894 | 5,413,223.91 |
| 1895 | 5,616,138.57 |
| 1896 | 5,761,383.25 |
| 1897 | 5,900,319.48 |
| 1898 | 6,205,015.06 |
| 1899 | 6,536,580.07 |
| 1900 | 6,874,525.77 |
| 1901 | 7,577,369.31 |
| 1902 | 8,502,269.94 |
| 1903 | 8,586,089.97 |
| 1904 | 8,888,097.00 |
| 1905 | 11,023,440.00 |
| 1906 | 9,844,197.62 |
| 1907 | 10,346,062.16 |
| 1908 | 10,442,598.63 |
| 1909 | 10,001,888.85 |
| 1910 | 10,699,531.49 |
| 1911 | 10,840,257.99 |
| 1912 | 12,061,286.50 |
| 1913 | 10,670,733.00 |
| 1914 | 11,392,259.00 |
| 1915 | 12,272,539.49 |
| 1916 | 11,950,063.60 |
| 1917 | 12,842,216.10 |
| 1918, including $956,003 in deficiency acts | 15,129,000.85 |
| 1919, including $830,482.80 in deficiency acts | 15,971,001.46 |
| 1920, including $12,000 in sundry civil act, $726,825.04 in deficiency acts, $591,281.75 in special acts, and $15,264,421 in the District of Columbia act | 16,694,527.79 |
| 1921, including $533,727.90 in deficiency act | 18,881,949.43 |
| 1922 | 21,039,972.99 |
| 1922 (deficiency acts) | 1,566,700.00 |
| 1922 (Army act) | 200,000.00 |
| 1922 (permanent annual and indefinite appropriations) | 1,380,600.00 |
| 1923 | 22,459,609.80 |
| 1923 (deficiency act) | 382,000.00 |
| 1923 (special act) | 10,000.00 |
| 1923 (permanent annual and indefinite appropriations) | 1,624,600.00 |

It will be seen that while there was a slight reduction in one or two years that there has been a gradual increase throughout the entire period.

The majority report also challenges attention to the fact that since 1912 the appropriations have not been equal to the estimates, and by

inference, if not statements, conveys the impression that this is unusual and had not been the fact prior to 1912, and the statement is also made that this failure to appropriate the amount estimated and because appropriations were so reduced the surplus accumulated. The majority fails to state that for some of the years covered there was an estimate calling for expenditure of large amounts exclusively from the Federal funds, but does include those amounts in the estimates copied into the report.

Schedule 1 of the Mapes report shows that the total District revenues in 1912 were $7,078,091.16, and that there was a gradual increase, until in 1922 the amount was $13,917,005.62, approximately doubling in 11 years. This fact and a comparison of the preceding tables refute the majority statements referred to so far as material to the consideration of the subject in hand.

In this connection it is also urged that expenditures for public schools in the District during the war were reduced. The expenditures for schools, by years, since 1914 follow:

[Note: Total for public schools.]

APPROPRIATIONS

| | |
|---|---|
| 1915 | $3,382,840.00 |
| Deficiency | 13,152.00 |
| 1916 | 3,308,740.00 |
| In deficiency acts | 42,204.00 |
| 1917 | 3,090,299.00 |
| Deficiency act | 88,150.00 |
| 1918 | 3,568,225.00 |
| Deficiency | 103,637.00 |
| 1919 | 3,478,840.00 |
| Deficiency | 92,000.00 |
| 1920 | 3,665,950.00 |
| Deficiency | 175,744.00 |
| 1921 | 5,018,160.00 |
| Deficiency | 69,719.56 |
| 1922 | 5,871,140.00 |
| 1922 (deficiency) | 1,544,000.00 |
| 1923 | 7,240,800.00 |
| Deficiency act | 260,000.00 |

ESTIMATES

| | |
|---|---|
| 1915 | 3,781,245.00 |
| 1916 | 3,362,700.00 |
| 1917 | 3,647,721.00 |

It is apparent from this table that schools have been fairly treated.

EVANS INTIMATED THAT COMMITTEE AVOIDED PROPER INVESTIGATION

Let me quote further excerpts from this splended minority report filed by Mr. Evans, of Nebraska.

II. THE INVESTIGATION MADE BY THE COMMITTEE HAS COVERED NEITHER THE PERIOD NOR THE EXTENT THAT CONGRESS DIRECTED

The language of the act is very plain in two particulars, i. e., the period covered, June 30, 1874, to time of the act June 30, 1922, and the matters covered; that is, all matters pertaining to the fiscal relations.

There has been but one fund to which the investigation of Haskins & Sells has gone—the District general fund. If there have been other items followed or investigated, it has been because such items have been connected with the District general fund or the inquiry has been made on special request of the committee or its chairman or a member. The same is true of the Mayes investigation. Nothing has been done outside of the District general fund unless the item was connected with the general fund or unless there were instructions to the accountants to investigate a particular item or group of items.

The remarkable thing about it all is that it is from items outside of the general fund that the debits against the District have nearly always been found. It will be found that when a complete and thorough investigation has been made that the oversights and omissions will be in matters not strictly within the general fund. The reason for this is plain. It is an account with the appropriations and in touch by practically daily audits by both the District and the Treasury. This is not true of the "interest and sinking fund" handled in the Treasury alone, or of an account such as the Washington Market, the District insane, or even rentals when they go into the District account without a check-back.

It is because of these conditions that now is the time to check up all appropriations made wholly from Federal funds and which reach the District or benefit it and at the same time to search all receipts to their sources so as to determine whether or not the District has received revenues equitably belonging to the Government.

No man at either end of the Capitol has such thorough knowledge of the relations between the District and the Government as Hon. BEN JOHNSON of Kentucky. Certainly no one knows more of the House committee work as covered by the Mayes and Spaulding audits covering the period from 1878 to 1911 than he.

It was upon his motion that such action was taken. He was before the joint committee, and I quote a part of his comment before the committee on those audits:

"They were not what you might call, Senator, audits in the strict sense of the word. They were supposed to look through the acts of Congress and find where Congress had made loans or advancements to the District of Columbia, with the distinct understanding that those that the District should reimburse, they should make a report as to those. Now, they did report as to several of those, and the Congress directed what they found, and which finally became undisputed, to be returned to the United States. But there was not an audit of the accounts between the District of Columbia and the United States made by either Mayes or Spaulding.

"The CHAIRMAN. That could be termed a complete audit, you mean?

"Representative JOHNSON of Kentucky. Yes.

"The CHAIRMAN. There were audits made, but you would not term them complete audits?

"Representative JOHNSON of Kentucky. Why, I would term them most incomplete." (Hearings, p. 199.)

It is stated in the majority report that Mr. JOHNSON has spoken "against the necessity for or advisability" of "a further detailed audit" of the period between July 1, 1874, and June 30, 1911.

This is an error. Mr. JOHNSON stated in substance that it was not necessary to audit the portion—not the period—of the accounts audited by Mayes, which was the general fund, and some special items. The Member from Kentucky does not need assistance from the majority or minority either in the expression of his views or their interpretations, and this mention is only made that this statement of the majority may not remain unchallenged.

On page 202 Congressman JOHNSON, in answer to a question by Senator BALL, states:

"Representative JOHNSON of Kentucky. You take it for granted; your premise is laid down now that a former Congress has settled this. There I take issue with you. I do not think the former Congress ever settled it.

"Now, Mayes and Spaulding made reports that they found that many advances to the District of Columbia under certain congressional acts had been paid to the District of Columbia with the provision that the United States was to be reimbursed, and then their report was as to the amounts advanced, and the report also was to the fact that no reimbursement had ever been made. So the two naked facts of advancement to the District and nonpayment by the District to the United States of a specified amount were the extent of their reports.

"Then the Appropriations Committee just put in the appropriation bill clauses requiring the District of Columbia to account for and pay the amounts so reported, saying nothing whatever of interest, as to whether it was to be calculated at some other time or whether it was to be remitted.

"That condition relates to the insane asylum affairs and to a number of other items. If I had known I was coming here, I would have read the report." (Hearings, p. 202.)

When Hon. BEN JOHNSON was before the committee he made the following statement in answer to questions then asked him:

"Representative EVANS. When the committee which presented the report that covered the period prior to July 1, 1911, presented that report, had they covered all of the work that was referred to them?

"Representative JOHNSON of Kentucky. Most certainly not.

"Representative EVANS. What items, if any, were investigated by either the Mayes or Mr. Spaulding which were not specifically mentioned, and they directed to investigate, except the single subject of appropriations and disbursements under appropriations?

"Representative JOHNSON of Kentucky. I do not believe I caught your meaning.

"Representative EVANS. The Mayes, and subsequent to them Mr. Spaulding, were asked to check up the matter of disbursements against the matter of appropriations for the period mentioned, were they not?

"Representative JOHNSON of Kentucky. For the purposes mentioned; yes.

"Representative EVANS. Now, were there any other items investigated by either the Mayes or Mr. Spaulding except such as were specifically called to their attention?

"Representative JOHNSON of Kentucky. If they went into the investigation of anything except matters to which their attention was specifically invited by the House District Committee, I am not aware of it.

"Representative EVANS. Was that investigation under the control of the District Committee?

"Representative JOHNSON of Kentucky. It was under the control of a subcommittee of the District of Columbia Committee.

"Representative EVANS. What relation had you to the District Committee and to that subcommittee?

"Representative JOHNSON of Kentucky. I was chairman of the House District Committee and I was chairman of that subcommittee." (Hearings, p. 209.)

That the Mayes report did not pretend to be a completed investigation of the accounts under consideration was called to the committee's attention. (Id. 240.)

On January 31, being the Wednesday immediately preceding the Monday on which the majority report was filed and presented, the minority member inquired of Mr. Hill, the representative of Haskins & Sells, the accountants employed by the committee, whether or not Haskins & Sells would then, without an additional audit, cover with a certificate or under their signature the accuracy of a statement of account of the period preceding June 30, 1911. His reply was, "Absolutely not."

SALARIES OF ARMY OFFICERS DETAILED TO DISTRICT SERVICE

An item mentioned in the report of Haskins & Sells has not received the attention it merits—Engineer officers detailed by the Army for District work whose salaries are wholly paid by the Government.

These men so detailed are men whose counterparts in similar cities as a rule receive large salaries. No other city can secure a similar detail. It has been suggested that on river work to which they are assigned they are paid by the Government, but the rivers are under the War Department. It is suggested that they are assigned to advise in engineering problems, but even in that case the service rendered is only advisory, of short duration, and nothing more. In this case, however, it is all kinds of engineering work, streets, water, auto vehicles, every branch of engineering work in the city. The salary of the engineer commissioner might be excepted, but even as to that no sufficient reason can be given for the exception.

FINES AND FEES IN DISTRICT COURTS

There is an item in the Haskins & Sells report to which it calls special attention; that is, fines and fees in the District Supreme Court. There is another item in that report to which special attention is not called: Fines in the police court of the District, which during the period covered by the Haskins & Sells audit amounted to $1,536,958.73. It was all covered to the District's credit and should have been divided.

These courts are supported from the joint appropriation, except that clerk and marshal of the former are paid entirely from Government funds. It is the opinion of the writer that both of these should be divided between the District and Government on the basis of their contributions.

CONGRESSMAN EVANS ASSERTED THERE WAS NO SURPLUS DUE DISTRICT

Let me quote a few more excerpts from the concluding portion of Mr. Evans's minority report:

III. THE FINDINGS BY THE MAJORITY OF A SURPLUS OF $4,438,154.92 AS DUE TO THE DISTRICT OF COLUMBIA IS NOT SUPPORTED BY FACTS OR LAW

In order that there shall be a surplus in favor of the District in the Treasury of the United States under the law, it must appear that all accounts between the District and the Government from June 30, 1874, to June 30, 1922, have been audited and that the balance sheet covering that entire period shows such balance.

THE MAJORITY DID NOT SO FIND THE SURPLUS THEY REPORT

The only period that has been covered by the majority audit is that between June 30, 1911, and June 30, 1922. The only account covered in that period is that of the District general fund. Other funds or appropriations not contained in the District appropriation acts have not been checked or audited except as to specific items, and as to the period preceding June 30, 1911, there is only the guess that it is as found by the Mayes, of whom it is established that they only completely checked the District general fund.

To arrive at the conclusions presented by the majority it was compelled to violate the ordinary canons of construction in construing the acts of Congress, and to disregard the directions of the act of June 29, 1922, under which it was supposed to act.

In arriving at its conclusions the majority omitted from consideration the following items for the Government:

One-half of the 5–20 bonds.

One-half of the interest on the 5–20 bonds.

Interest on all items of advances or credits upon which interest has not been paid.

One-half of the fines of the police court for the Government.

One-half of the $5,000 appropriation to buy land for the National Training School for Girls, which, it seems, has been expended but no land bought.

One-half of the salaries of Army officers who work only for the District.

The interest item alone on known changes shows a credit to the United States of $1,691,889.93, as shown by the majority report.

The 5–20 bonds show a credit of over a million for the Government, and interest from the dates of payment should be added.

There are many other items not included in the foregoing which are known to a limited number of persons, which, when properly inquired into, will doubtless disclose other large sums that have gone from the Treasury to the benefit of the District.

EVANS SHOWED THAT COMMITTEE RECOGNIZED INVESTIGATION INCOMPLETE

I quote from Congressman Evans's minority report the following excerpts showing that members of this joint select committee admitted to themselves that their work was only partially done, and were reporting only because they had already expended the $20,000 allowed them by Congress:

Representative WRIGHT. Mr. Chairman, I am impressed that the legislation which created this committee contemplated that the entire period from 1874 on up should be covered; and, if it be necessary, to render a report which would finally settle these mooted questions between the United States and the District of Columbia—in other words, when this report shall have been filed that Congress can take such action upon it as will finally set at rest these disputed items. I think that was thoroughly in contemplation when the legislation was passed.

Now, the chairman has suggested that only 11 years of that period have been covered, and that that, coupled with the formal report, might clear up the situation so that a comprehensive report might be submitted by this committee.

It has developed that the examination of those 11 years alone has consumed practically all the time——

Representative HARDY of Colorado. And all the money.

Representative WRIGHT (continuing). And all the money; so that this committee has very little time to formulate a report, and the question arises as to whether we have sufficient data or information now to render that report.

This thought occurs to me: What would be the status of this committee after the 29th of February, which is the date fixed as that upon which we should render this report? If we submit a preliminary report, would we not necessarily have to ask Congress to extend our time and make an additional authorization of appropriation for the work?

Senator BALL. Would you suggest a preliminary report?

Representative WRIGHT. I think that would be the sensible thing to do. I hardly see how it would be physically possible for this committee to thoroughly investigate all of these items, with the issues which have been raised here, between now and the first Monday in February.

Senator BALL. Personally I would rather submit no report until we were ready with our final report. We might make a statement in this preliminary report, if one were submitted, that we would find afterwards was not well founded, and it would be in existence and would be quoted in the future, probably, against our final report.

Representative WRIGHT. I would certainly want to avoid what the Senator suggests. If you made a preliminary report, it would not particularly bind anybody. My idea would be to have Haskins & Sells submit a preliminay report.

The CHAIRMAN. A preliminary report could be in two forms, as I see it, one including the figures or recommendation, and another, which would be practically a report of progress, with an explanation of the situation that has developed.

Senator BALL. That is the kind of report I would like to see.

The CHAIRMAN. With a recommendation for further time and, if necessary, that further money be allowed for the purpose.

Yet, in the face of the above situation, the majority of said special select committee made its report recommending that Congress allow and pay to the District said alleged surplus of $4,438,154.92.

RECENT SO-CALLED HEARING A SHAM AND PRETENSE

As stated in the beginning of this report, the House Committee on the District of Columbia made no attempt whatever in the Sixty-seventh Congress to hold any hearing on this so-called surplus, and made no investigation whatever of such fiscal relation. And in the present Congress the only consideration which said House Committee on the District of Columbia gave to this bill was to have a subcommittee casually discuss it on May 12, between 10.30 a. m. and noon, and on May 13, between 10.30 a. m. and noon, 1924, at which time I have already shown by quoting the hearings that such subcommittee gave me only about 5 or 10 minutes to present any facts against it.

In an attempt to explain why the joint select committee did not obey the instructions of Congress and investigate the period between July 1, 1874, and July 1, 1911, Mr. Daniel J. Donovan, auditor for the District of Columbia, testified before the subcommittee on May 12, 1924, as follows:

Mr. DONOVAN. To go back for a moment to a previous investigation—because it enters into this question in view of what Mr. BLANTON has said—the joint select committee appointed under the act of June 29, 1922, did not go back of any period prior to July 1, 1911, but continued its examination only from that point down to and including June 30, 1922, and the reason was this: During the time that Mr. BEN JOHNSON was chairman of the Committee on the District of Columbia of the House of Representatives he had got through the House a resolution providing for an investigation into the fiscal relations between the United States and the District covering the period between

July 1, 1874, and June 30, 1911. Mr. JOHNSON's committee employed two accountants, a father and son, by the name of Mays—both from Kentucky—and those two gentlemen did actually conduct that investigation during a period of two and one-half years; and I want to emphasize the fact that it took two and one-half years for that particular examination. Those two accountants did conduct as fine-tooth-combed an investigation and examination into the fiscal relations between the United States and the District of Columbia as was humanly possible.

WAS MR. DONOVAN CORRECT?

Thus Mr. Donovan led the House subcommittee to believe that the investigation which Mr. JOHNSON of Kentucky caused to be conducted while he was the chairman of the House District of Columbia Committee was a complete investigation covering the entire period between July 1, 1874, and July 1, 1911, when, as a matter of fact, that it was a partial investigation covering only specific items of controversy, as I will now show from a statement from Congressman JOHNSON himself.

The following is a copy of a letter written by me to Mr. JOHNSON:

WASHINGTON, D. C., *June 5, 1924.*

Hon. BEN JOHNSON, M. C.,
*House Office Building.*

MY DEAR COLLEAGUE: With reference to the so-called surplus alleged to be due the District of Columbia by the Government, Mr. Daniel J. Donovan, the auditor for the District, testified that the reason the joint congressional committee created June 29, 1922, confined its investigations to the period between June 30, 1911, and June 30, 1922, and did not go back to July 1, 1874, as directed by Congress, was because you had fully covered the period between July 1, 1874, and July 1, 1922, in an investigation you had conducted while chairman of District Committee. And he claimed that you had balanced accounts up to July 1, 1911.

From my conversations with you and in examining many speeches made by you on the many ways the District has overreached the Government on finances, I am constrained to believe that Auditor Donovan is mistaken.

Will you kindly advise me whether you did, in fact, cover all matters involved between July 1, 1874, and July 1, 1911, and whether you agree that the District balanced accounts up to July 1, 1911?

Sincerely yours,

THOMAS L. BLANTON.

The following is Congressman JOHNSON'S reply:

[BEN JOHNSON, M. C., fourth Kentucky district. Member Appropriations Committee]

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
*Washington, D. C., June 7, 1924.*

Hon. THOMAS L. BLANTON,
*House of Representatives, Washington, D. C.*

MY DEAR COLLEAGUE: I am just in receipt of your note asking whether or not, in my opinion, all matters relative to the fiscal relations between the District of Columbia and the United States Government were covered by the investigations made by the Committee on the District of Columbia while I was chairman of that committee.

In reply thereto I wish to say that not only is the statement made by Mr. Donovan incorrect, but that it was never contemplated under the authority given by the House to the District Committee to go into the entire fiscal relations between the United States and the District of Columbia. The authority given and the work undertaken included nothing more than to recover specific items due the United States from the District of Columbia.

In those items were embraced considerably more than a million dollars owing to the United States by the District of Columbia on account of the lunatic asylum, approximately half a million dollars on account of the Center Market, and various other items on account of advancements made for schoolhouse purposes, the jail, the 3.65 bonds, and a number of other items which I can not now enumerate.

When I retired from the chairmanship of the District Committee, I invited the attention of my successor to several other items which, beyond any sort of doubt, were due to the United States by the District of Columbia and volunteered my assistance in helping him to develop them, so that they might be paid. The resolution which would have authorized additional payments to the United States by the District was never asked for, and my offer to designate the specific sums due the United States was not availed of.

In my opinion large sums of money are still owing to the United States by the District between the 1st of July, 1874, and the 1st of July, 1911.

I notice in the local papers that those who are designated as "friends of the District" are asking for another investigation into the fiscal relations between the District of Columbia and the United States. In my opinion the "special committee" now being asked for to once more inquire into these relations is but an excuse to avoid the real issue. It is easily ascertainable that every time the District of Columbia has been called upon to pay a decent rate of taxes without infringing upon the rights of the people of other States to help them pay their taxes they have restored to a "special committee" to inquire into the fiscal relations between the District of Columbia and the United States. It is not the investigation that they want. Instead it is delay and a lack of adjustment that they desire by seeking an investigation.

The last investigation, with all due respect to those who conducted it, was farcical. That "special committee" was particularly directed to make specific findings. If they had complied with the law made two years ago they could not possibly have failed to find the District of Columbia indebted to the United States in excess of $50,000,000 spent in beautifying and upbuilding the District of Columbia.

Instead of going into the matter in detail they treated the proposition in a blanket way, and found that the United States owes the District of Columbia what is now known as "the four and one-half million dollar surplus"; while, as I have said, if they had followed the directions of the law the balance would have been on the other side of the ledger in an amount certainly not less than $50,000,000.

Very truly yours,

BEN JOHNSON.

Remember that Congressman Evans said that Representative BEN JOHNSON of Kentucky is the best posted man in the United States on civic conditions in Washington, and the fiscal relation between the District of Columbia and the United States. And Congressman BEN JOHNSON says in his letter that if an audit were made as Congress directed back to July 1, 1874, such audit would demonstrate that instead of the Government owing the District a surplus of four and one-half million dollars, the District of Columbia owes the Government at least $50,000,000.

Mr. DAVIS of Minnesota has for years framed the District of Columbia appropriation bill. In debate the other day he said that, large and small, there are about 600 parks in Washington. Most of these were paid for or furnished by the Government to the District of Columbia without cost to the people here. For most of them the money came out of the Public Treasury 100 per cent. And Congress has just passed a bill giving $1,100,000 every year for additional parks from now to eternity.

Will any person claim that the beautiful Potomac Park with its wonderful boulevards down to the point opposite the War College, which has cost the Government huge sums, does not beautify the city and furnish conveniences and pleasures for the people that in every other city they must pay for themselves? Will any person claim that the beautiful grounds and reflecting pools surrounding Lincoln Memorial and Washington Monument do not constitute conveniences and pleasures for the people here which to enjoy the people in every other city must furnish and pay for themselves?

Why, the Government paid nearly $500,000 for the playground on Sixteenth Street near Mrs. Henderson's residence. Why should this Government furnish it to the children there?

And why should the Government furnish the $1,000,000 Connecticut Avenue Bridge for the people of Washington? Why should the Government furnish the numerous bridges across the Potomac for the people here? The people everywhere else furnish their own bridges.

Why should this Government furnish part of the expense of paving the streets and alleys, maintaining them, furnishing sewer service and water service for the people here? The people in all other cities furnish these things for themselves. Read the following:

LETTER FROM AUDITOR DONOVAN

The following is the letter referred to as received from Auditor Donovan:

OFFICE OF THE AUDITOR OF THE DISTRICT OF COLUMBIA,
*Washington, January 25, 1924.*

Hon. THOMAS L. BLANTON,
*House of Representatives, Washington, D. C.*

MY DEAR MR. BLANTON: In response to your request of several days ago I take pleasure in furnishing you the information you desire.

Prior to the passage of the Borland amendment property owners were subject to an assessment for sidewalks, alleys, and curbs to the extent of one-half of the total cost. This is also the law at the present time. Property of the United States and the District of Columbia is not subject to assessment for special improvements. Roadway improvements were first charged against property owners by the terms of the Borland law. Service sewers and water mains were and are now also charged in part against abutting property.

The half cost of roadway pavement immediately abutting the frontage of assessable property, excluding street intersections between building lines of the intersecting streets and excluding any pavement area beyond a line 20 feet abutting the property, is assessed as a special

improvement tax against such property. The cost of any pavement area in excess of 40 feet is borne by the United States and the District of Columbia in the proportion that each is charged with the appropriation. On streets where there are street railway tracks the railway companies are chargeable under the law with the whole cost of paving between the tracks and 2 feet exterior to the outer rail of the tracks. The property of the United States and the District of Columbia is not subject to assessment under the Borland law.

For service sewers the law at present provides for a flat rate assessment of $1.50 per front foot, with certain deductions made for corner property. This rate represents approximately 37 per cent of the cost of the work.

The special assessments received for the several forms of improvements indicated are paid into the Treasury of the United States, 60 per cent to the credit of the District of Columbia, and 40 per cent to the credit of the United States, this being the proportion that each bears of the appropriations for the improvements.

For water mains the law provides a special assessment of $2 per front foot, and this amount represents approximately 66 per cent of the cost of the work. Water-main assessments when received are paid into the Treasury of the United States to the credit of the water-department fund.

At the time of the passage of the Borland law approximately 90 per cent of the streets within the limits of the old city of Washington were already paved, and many of the streets outside of those limits also were paved. I am unable at this time to give you an idea of the proportion of the streets outside of the original city of Washington that were paved when the Borland law was passed.

Not only new paving but the resurfacing and replacing of pavements is chargeable against abutting property under the Borland law.

The Knox case in the court of appeals involved the question of the application of the Borland law to outlying sections of the District of Columbia and to the particular matter of paving Naylor Road, near the eastern boundary of the District of Columbia. The Knox property was agricultural property. There were no settlements in the immediate vicinity. There were no sewers, water mains, electric or gas lights, curbs, sidewalks, or building lines, and no other conditions which might be called town or village conditions. The court of appeals held in that case that because of the language of the law Congress intended it to apply to those settlements or sections which exhibited town or village conditions, and that the law did not apply to situations like those presented in the Knox case. The assessments were therefore ordered to be canceled. Similar cases are now pending in the courts in regard to other localities, which are claimed to present conditions that existed in the Knox case.

The following appropriations were made by Congress for repair and maintenance of streets during the fiscal years 1921, 1922, 1923, and 1924, each of such appropriations being charged 60 per cent against the revenues of the District of Columbia and 40 per cent against the revenues of the United States:

| | |
|---|---|
| Fiscal year 1921 | $575,000 |
| Fiscal year 1922 | 575,000 |
| Fiscal year 1923 | 460,000 |
| Fiscal year 1924 | 550,000 |
| Total | 2,160,000 |

The following appropriations covering the same period have been made for repairs to suburban streets and roads, payable 60 per cent from the revenues of the District of Columbia and 40 per cent from the revenues of the United States:

| | |
|---|---|
| Fiscal year 1921 | $250,000 |
| Fiscal year 1922 | 250,000 |
| Fiscal year 1923 | 225,000 |
| Fiscal year 1924 | 275,000 |
| Total | 1,000,000 |

The following appropriations have been made for the same period for street improvements, including the paving and grading of streets, payable 60 per cent from the revenues of the District of Columbia and 40 per cent from the revenues of the United States:

| | |
|---|---|
| Fiscal year 1921 | $614,200 |
| Fiscal year 1922 | 144,840 |
| Fiscal year 1923 | 233,500 |
| Fiscal year 1924 | 573,300 |
| Total | 1,565,000 |

The following appropriations have been made for construction and maintenance of sewers for the fiscal years 1921, 1922, 1923, and 1924, payable 60 per cent from the revenues of the District of Columbia and 40 per cent from the revenues of the United States:

| | |
|---|---|
| Fiscal year 1921 | $515,000 |
| Fiscal year 1922 | 523,000 |
| Fiscal year 1923 | 502,000 |
| Fiscal year 1924 | 690,000 |
| Total | 2,231,000 |

I regret very much that it has not been practicable for me to furnish you with this information at an earlier date. In the event that you desire any more details regarding the several matters herein, I shall be very glad to respond to such a request from you.

Very truly yours,

D. J. DONOVAN,
*Auditor District of Columbia.*

PRESENT DISTRICT OF COLUMBIA APPROPRIATION BILL

We have one of the strangest situations imaginable here. This is a city, according to the last census, of 437,000 people, exclusive of transients and exclusive of Members of the House and Senators and their employees, who maintain their residences in their home States. At one time this was a very small city. It was nothing more than a big town, and the people who then owned the real property remember that its value was a very low figure, indeed; but the Government of the United States has expended millions of dollars here in the construction of magnificent buildings and securing and maintaining magnificent grounds in this Capital, and besides its own property has given $215,000,000 to Washington for civic purposes. Property values have soared upward until now in many instances you find lots that at one time were worth no more than a hundred dollars now are worth, with their improvements, a million dollars.

For instance, our colleague from New York [Mr. BLOOM], according to the paper yesterday, indicated that he is willing to give this Government the stupendous sum of $8,000,000 for the block of land upon which stands the Patent Office.

And what is the tax rate in this great city? One dollar and twenty cents on the hundred dollars, and at a very low valuation, assessed at not much over 50 per cent valuation in most cases, and we are continuing that in a ridiculous fiscal policy that yet requires the taxpayers of the United States to pay 40 per cent of all of the local civic expenditures here in the city of Washington. Until 1922 these same taxpayers paid every year 50 per cent of these expenses of this great city. Why is it that that is permitted? It must be because the membership of this House have not yet all found it out. It is because the membership of this Congress have not all given close investigation to the subject.

The Washington Post for Sunday, May 25, 1924, said in the following big headlines:

Three million four hundred and forty-nine thousand three hundred and twenty-two dollars is added to the District bill by the Senate committee—$28,102,019 is total carried in measure.

And this article then recites:

Carrying appropriations amounting to $28,102,019, which is $3,449,322 more than provided by the House, the District appropriation bill for the fiscal year 1925 was favorably reported to the Senate yesterday by the Committee on Appropriations.

A further increase in the appropriation may be made when the bill is considered on the floor of the Senate this week, as Senator LAWRENCE C. PHIPPS, of Colorado, in charge of the measure, has been authorized by the committee to offer amendments which would add $1,062,000 to the bill.

If the Phipps amendments authorizing appropriations of $762,000 for enlarging the park system and $300,000 toward the construction of a $735,000 fireproof addition to the courthouse are adopted, the bill will go to conference carrying appropriations amounting to $29,164,019, the largest amount ever authorized in a District supply bill.

Senator PHIPPS is expected also to offer an amendment to the bill his bill, recently passed by the Senate, making the District surplus fund, amounting to $4,438,154, available for expenditures. With the adoption of this amendment the bill would carry $33,602,173, which is more than the commissioners and the people of Washington ever expected in the wildest flights of fancy.

Thus, if the plans as indicated in the Washington Post are carried out in the Senate, the appropriations for the District of Columbia in the coming fiscal year will aggregate $33,602,173.

MAKING WASHINGTON BEAUTIFUL DOES NOT MEAN EXEMPTING PEOPLE HERE FROM TAXES

I want to say this to you: I am for making Washington the most beautiful city in the world. I am for taking every million dollars out of the Treasury of the United States for the Government to spend to do it that is justly needed, but I am not willing to continue taxing the already tax-burdened people of this country, who have to pay their own large taxes at home, to pay the civic expenses here, and then let these specially favored, petted, pampered, selfish, spoiled people in Washington pay only $1.20 on the hundred and enjoy all the benefits of this great city at the expense of our constituents back home.

Take this magnificent $6,000,000 Congressional Library that would cost at least $15,000,000 now; is not it enjoyed by every citizen of the District? Take the magnificent Smithsonian In-

stitution, the magnificent museums here, the art gallery, the magnificent parks, the magnificent playgrounds. Are not the people of the District of Columbia getting the benefit? And yet they want to tax the Government of the United States more than $8,000,000 a year, which the Cramton amendment offers them, for the very property that they enjoy hourly here in this District.

THE OLD SLOGAN HAS WORN THREADBARE

Whenever a Member of Congress seeks to change the unjust system of allowing the people of Washington to pay the ridiculous tax rate of only $1.20 on the $100, the newspapers and citizens' associations immediately resort to their old battle cry—

That Washington is the Nation's Capital and must be made the most beautiful city in the world; that the Government should pay a big part of the local city expenses because it owns so much property here.

Washington is the Nation's Capital and should be made the most beautiful city in the world, and I will go just as far as any other man through all legitimate and proper means to make it the most beautiful city in the world. Before the Government built all of its fine institutions here Washington was a mere village. Property here was of little value. It is because of the fact that the United States has spent its millions here that has caused some lots to jump in value from $100 to $100,000. Every piece of property owned by the Government in Washington is daily enjoyed by the people of Washington.

The local pay roll of the Government is a bonanza to the merchants and business enterprises of Washington. The Government pays its nearly 100,000 employees in Washington their wages promptly every two weeks in new money that has never been spent before. Chicago, or any other big city in the United States, would gladly exempt the Government from paying all taxes on its property to get it to move its Capital to such city.

Because we want to make it the most beautiful city in the world is no reason why the Government should pay for building million-dollar school buildings and employing 2,500 teachers and buying the schoolbooks for the 70,000 school children of the thousands of families living in Washington who have no connection whatever with the Government except to bleed it on all occasions and to grow rich on the Government pay rolls expended here.

Because we want to make Washington the most beautiful city in the world is no reason why the Government should pay for the army of garbage gatherers, the army of ash gatherers, the army of trash gatherers, the army of street cleaners and sprinklers, the army of tree pruners and sprayers, and the street-lighting system for the several hundred miles of private residences owned by rich tax dodgers who have no connection whatever with the Government; nor is it any reason why the Government should pay for their water system, their sewer system, their police protection, their fire protection, for playgrounds for their children, for parks for their enjoyment, for their municipal golf grounds, for their numerous public tennis courts, for their bathing beaches, for their skating ponds, for their cricket grounds, for their baseball and football grounds, for their horseback-riding paths, for paving the streets in front of their residences and maintaining and keeping them in repair, for building their million-dollar bridges, furnishing million-and-a-half-dollar market houses, their municipal trial and appellate courts, their jails and houses of correction, their municipal hospitals, asylums for their insane, special asylum schools for their deaf and dumb, asylums for their orphans, a university for their 110,000 colored people, their municipal libraries, their municipal community-center facilities, salaries of all their municipal officers, employees, buildings, furnishings, equipments, sanitary and health departments, and the hundreds of other things that all other cities of the United States must furnish and pay for themselves, but a very substantial part of which the people of Washington have been getting out of the Federal Treasury for years.

The magnificent Capitol and its beautiful grounds are daily enjoyed by Washington people. The Congressional Library, which cost $6,032,124, in addition to the sum of $585,000 paid for its grounds, and for the upkeep of which Congress annually spends a large sum of money, is daily enjoyed by the people of Washington. The Government furnished and maintains the magnificent Botanic Garden here for the pleasure and enjoyment of Washington people.

The Government furnished and maintains the wonderful Zoo Park, with all its interesting animals, for the instruction and amusement of Washington children. The Government furnished and maintains the extensive and most beautiful Rock Creek Park, with its picturesque picnic grounds, its miles of wonderful boulevards, its incomparable scenery, all for the pleasure of Washington people. Congress has spent millions of dollars reclaiming and purchasing the lands now embraced in the Potomac Park and Speedway, daily used and enjoyed by Washington people. The Government has spent several million dollars building the various bridges spanning the Potomac River and huge sums for the bridges spanning the Anacostia River, and spent $1,000,000 building the beautiful "million-dollar bridge" on Connecticut Avenue. The Government has spent millions of dollars on the Lincoln Memorial grounds, and reflecting pool, the Washington Monument Grounds, Lincoln Park on East Capitol Street, and the numerous beautiful little parks scattered all over the city, all for the pleasure and benefit of Washington people.

During the recess of Congress I wrote to the mayor of every city of any size in the United States and asked them to advise us of their local tax rates, of the charges for water, sewer, paving, and so forth, and what rate, in their judgment, they thought Washington people should pay as a minimum. I want to insert just a few in this report. The consensus of opinion was that the rate here should be at least $2.50 per $100, and there was a large per cent who were in favor of it being much higher, and the rates for taxation ranged from $2.75 to over $6.50, and in all these cities the people were charged more for water, sewer, and paving.

Let me again quote a few excerpts from the letter sent me by the mayor of the city of Peoria, Ill.:

[City of Peoria, Ill., mayor's office. Edward N. Woodruff, mayor]
NOVEMBER 1, 1923.

Hon. THOMAS L. BLANTON,
*Representative, Washington, D. C.*

DEAR SIR: Answering your questionnaire of October 15 concerning relative tax rates of the cities of Washington and Peoria:

The tax rates on each $100 taxable valuation levied against the real and personal property of the citizens of Peoria for the year 1922 is itemized as follows:

| | | |
|---|---|---|
| City corporate tax, including liberty, tuberculosis, garbage, and police and fire pension fund | $1.94 | |
| Street and bridge | .24 | |
| School district | 2.70 | |
| Park district | .41 | |
| | | $5.29 |
| State | .45 | |
| County | .59 | |
| County highway | .25 | |
| | | 1.29 |
| Total, all purposes | | 6.58 |

Unless there is a tremendous revenue derived from sources other than from taxes, the rate of $1.20 for Washington is ridiculous. While I have never had my attention called to this disparity, I am amazed that the light has not been let into financial affairs of the Capital City long before this time.

You should be supported by every colleague in your effort to compel the citizens of Washington to do theirs, even as every citizen outside the District is doing his.

Wishing you success, I am,

Very truly yours, E. N. WOODRUFF, *Mayor.*

The foregoing statement from the mayor of Peoria, Ill., fairly indicates the sentiment of the people over the United States. It might be enlightening to quote from a few of the letters received the tax rates of some of the cities over the United States as certified to me by the mayors of such cities.

When I speak of the tax rate of these cities I, of course, mean their total tax—State, county, school, and municipal—which is the total tax citizens of those respective cities have to pay on their property, as compared with the $1.20 on the $100 rate Washington people have to pay in the District of Columbia.

The tax rate paid by the people in Baltimore, Md., $3.27 on the $100; in New Orleans, La., $3.16½ on the $100; in Portland, Oreg., $4.52 on the $100; in my birthplace, Houston, Tex., $4.29½ on the $100; in Ogden, Utah, $3.33 on the $100; in Cheyenne, Wyo., $3.75 on the $100; in Fort Smith, Ark., $3.32 on the $100; in New Bedford, Mass., $3.13; in Burlington, Vt., $3.10 on the $100; in Pittsburgh, Pa., $3.22 on the $100; in St. Louis, Mo., which is a distinct political subdivision of the State, the city tax is $2.43 on the $100; in Boston, Mass., $2.47 on the $100; in Rochester, N. Y., $3.36 on the $100; in Portland, Me., $3.40 on the $100; in Boise City, Idaho, $4.29 on the $100; in Mobile, Ala., $3.40 on the $100; in Detroit, Mich., $2.75 per $100; in Duluth, Minn., $5.79 on the $100; in Atlanta, Ga., $3.15 on the $100; in Kansas City, Mo., $2.93 on the $100; in Minneapolis, Minn., $6.52 on the $100; in Salt Lake City, Utah, $3.18 on the $100; in Oakland, Calif., $4.02 on the $100; in Austin, the capital of Texas, $3.54 on the $100; in Denver, Colo., $2.76 on the $100; in Trenton, N. J.,

$3.22 on the $100; in Racine, Wis., $2.87 on the $100; in Nashville, Tenn., $2.80 on the $100; in Charlottesville, Va., $2.85. And let me illustrate as the tax rate runs generally over Texas: In Paris, Tex., $4.10 on the $100; in Port Arthur, Tex., $3.54 on the $100; in Tyler, Tex., $4.61 on the $100; in Denison, Tex., $3.32 on the $100; in Waco, Tex., $3.63 on the $100; in Amarillo, Tex., $3.55 on the $100; in Temple, Tex., $3.15; in Wichita Falls, Tex., $5.05 on the $100; in Beaumont, Tex., $4.04.

Mr. Edward F. Bryant, tax collector for San Francisco, Calif., has sent me a statement certifying that the following is the tax rate paid by the citizens in the following cities: In Seattle, Wash., $8.80 on the $100; Chicago, Ill., $8 on the $100; in Reno, Nev., $7.38 on the $100; in New York, N. Y., $5.48 on the $100; in Philadelphia, Pa., $6 on the $100; in Detroit, Mich., $4.48 on the $100; in San Francisco, Calif., $3.47 on the $100; in Los Angeles, Calif., $3.89 on the $100.

What excuse have we to offer to our constituents back at home who are paying the above tax rates for permitting by our votes here the 437,000 people in Washington, D. C., to continue paying the measly little pittance of only $1.20 on the $100, based on a half to two-thirds valuation, when our constituents have to pay all the balance of the expenses of this great city?

Numerous millionaires live in Washington, having no connection with the Government, merely to get the benefit of the low taxes. You may offer all the excuses available, but we are responsible, for we could change this system, but we do not do it. Some of you will claim that "this is not the time." But it is the time, if you so ordained it, and voted now to change it.

Some of the finest people in the world live in Washington; they are selfish, but still they are fine people. You can hardly blame them; they have been sponging on the Government for years. They are making a strenuous fight now to continue the 60–40 system. They must have these hand-outs from the Government. I am in favor of making them pay not what our people pay, but $2.75 or $2.50 per $100 at least. I would be satisfied with $2.50. Let them pay $2.50 on the $100 like they used to pay, and let them pay on a full valuation instead of half, and then take every bit of the balance of the expense out of the Federal Treasury, and I am then willing to go the limit with you. I want them to pay only a decent, reasonable, fair tax.

We are to be called upon to build a $44,000,000 plant up here that some of the expert engineers of this city assure me instead of costing $44,000,000 will cost at least $75,000,000 or $80,000,000 before the Government can get out of it. Let me call your attention to the fact that when the Army first attempted to build Muscle Shoals they estimated that all three dams would cost only $19,500,000, and then after we appropriated the first few million dollars for them they came back with the next estimate that the Wilson Dam, No. 2, alone would cost $25,000,000, and then the next estimate was the Wilson Dam, No. 2, would cost $35,000,000, and the latest estimate we have now is that the Wilson Dam, No. 2, alone will cost $45,000,000, while the original estimate of the War Department engineers was that all three dams, all told, would cost only $19,500,000. So you see you can not depend upon these War Department estimates. You are going to be called upon soon to vote for this $44,000,000. These newspapers here are hounding you about it already, with editorials and articles in the paper furthering that cause, and, incidentally, sticking me with pins and needles, pricking me because I am fighting it.

I have secured from the Rent Commission, the offices of the tax assessor and tax collector, and other reliable sources in Washington the facts concerning the rendition of numerous pieces of property which prove conclusively that property in the District of Columbia is assessed far below its value.

The Bradford Apartments is assessed at $229,407, and at $1.20 pays a tax of $2,752. The owner of this property claimed before the Rent Commission that its value is $450,000.

Tudor Hall Apartments is assessed at $266,653, and at $1.20 pays a tax of $3,199. The owner of this property claimed before the Rent Commission that its value is $362,576.

The Argyle Apartments is assessed at $207,437, and at $1.20 pays a tax of $2,489. The owner of this property claimed before the Rent Commission that its value is $344,000.

The Alabama Apartments is assessed at $219,870, and at $1.20 pays a tax of $2,638. The owner of this property claimed before the Rent Commission that its value is $305,000.

The Imperial Apartments is assessed at $207,500, and at $1.20 pays a tax of $2,490. The owner of this property claimed before the Rent Commission that its value is $350,082.

The Pelham Courts Apartments is assessed at $192,760, and at $1.20 pays a tax of $2,313. The owner of this property claimed before the Rent Commission that its value is $250,000.

The Riviera Apartments is assessed at $124,709, and at $1.20 pays a tax of $1,496. The owner of this property claimed before the Rent Commission that its value is $240,000.

The Earlington Apartments is assessed at $151,793, and at $1.20 pays a tax of $1,821. The owner of this property claimed before the Rent Commission that its value is from $225,000 to $240,000.

The Savoy Apartments is assessed at $218,000, and at $1.20 pays a tax of $2,616. The owner of this property claimed before the Rent Commission that its value is $250,000.

The Lonsdale Apartments is assessed at $160,233, and at $1.20 pays a tax of $1,922. The owner of this property claimed before the Rent Commission that its value is $240,000.

Edward B. McLean's residence property at 1500 I Street NW. is assessed at $600,604, and at $1.20 pays a tax of $7,207. It is reliably estimated to be worth double that sum. His magnificent country estate, "Friendship," on Wisconsin Avenue NW., is assessed at $492,944, and at $1.20 pays a tax of $5,915. It is reliably estimated to be worth far in excess of double that sum. As owner and editor of the Washington Post, it is not strange that he should fight for this system of low taxation. And it will be remembered that Mr. McLean is the one who loaned to Mr. Fall, of New Mexico, the $100,000 without security.

The residence of Mr. E. F. Colladay at 3734 Northampton is assessed at $14,356, and at $1.20 pays a tax of $172, when it is reliably estimated to be worth far in excess of double that sum. It is to be expected that through the Washington Star he would lead the fight for this system of low taxation in the District, when the whole people of the United States pay the balance of the expenses. Mr. Colladay has printed many series of articles trying to "cabbage" the alleged surplus. The above reflects in no way upon the Washington Star, which is one of the fairest and best papers in the United States.

The magnificent residence of Mrs. Marshall Field on Sixteenth Street NW. is assessed at $139,722, and pays a tax of $1,676. It is reliably estimated to be worth double that amount.

The magnificent Belmont residence at 1618 New Hampshire Avenue is assessed at $472,502, and at $1.20 pays a tax of $5,670. It is reliably estimated to be worth double that sum.

The New Willard Hotel properties is assessed at $2,594,705, and at $1.20 pays a tax of $31,136. This is the most valuable location in Washington, and is reliably estimated to be worth nearly double that sum.

The Raleigh Hotel properties is assessed at $1,972,200, and at $1.20 pays a tax of $23,666. It is reliably estimated to be worth at least half a million dollars more than that sum.

Hotel Washington is assessed at $1,951,605, and at $1.20 pays a tax of $23,419. It is reliably estimated to be worth far in excess of that sum.

The magnificent semicircular Wardman Park Hotel, covering quite an area of ground and housing many wealthy families, is assessed at $3,105,346, and at $1.20 pays a tax of only $37,264, and I am reliably informed that you could not buy this property for much under $5,000,000. The annual receipts paid this fashionable family hotel by its patrons would astonish any Member of this Congress.

The residence at 1835 Irving Street NW. is assessed at $10,416, and at the $1.20 rate pays a tax of only $125, while it could be sold at any time for as much as $22,500, a similar residence in the same block having recently sold for $25,000.

The residence at 3100 Sixteenth Street NW., which recently sold for more than $40,000, is assessed at $15,181, and at $1.20 pays a tax of $182.

Garfinkle's department store is assessed at $420,975 and pays a tax of $5,051. Woodward & Lothrop (whole block) department store is assessed at $3,468,833 and pays a tax of $41,626. You could not purchase either of these properties for double the amount at which they are assessed.

The residence which I am renting at 1929 Kenyon Street NW. has recently sold for $11,750. It is assessed at $6,486 and pays a tax of $77.84.

A distinguished southern Senator told me the other day that for several years he has been trying to sell his residence in his home town for $7,000, and that he pays more taxes on it in his home State than he pays on his residence in Washington, which under any conditions is worth $22,500, but which could be sold for $25,000.

And the District gets several extra millions annually from the United States Treasury where the whole people pay the full 100 per cent. The Washington Times for Thursday, January 10, 1924, on page 2, in an article headed "District given $1,647,700," mentioned the several local institutions here in the

District which are given the sum of $1,647,700 direct out of the Treasury, concerning which there is no division of 60–40, but all is paid by the whole people, for said items are in the Interior Department appropriation bill now before the House, all of which comes out of the people's Treasury.

This system has prevailed here simply because the 437,000 people in Washington are organized with citizens' associations, who will attempt to ruin any Congressman who fights the situation, and because the people of the United States don't know about the situation. Whenever the people find it out they are going to have it stopped.

What particular halo is there about the head of the rich tax dodgers living in Washington that they should be permitted to pay a total tax rate of only $1.20 on the $100, assessed at about half valuation, while the people of every other city in the United States have to pay all the way from $2.75 to $6.50, and the balance of the local expenses of the people of Washington has to be borne by the whole people? Why should it be continued? Why should Washington people be more favored than all of the balance of the people in the cities of this Nation?

THE TIME HAS COME TO STOP IT

We must disallow this so-called surplus. We must not let this bill pass. It would be a crime against the people of the United States. And we must require the people of the District of Columbia to pay a reasonable, fair, just rate of taxation, and then let the Government pay its part.

TAX EXEMPTIONS

Each taxpayer in the District of Columbia is allowed an exemption from taxes on $1,000 household furniture. And then, too, certain tangible property is exempt. The tax rate on intangible property is only one-half of 1 per cent in the District of Columbia. To show the facts as they exist here, I quote the following written statement issued by the District of Columbia, to wit:

INTANGIBLE PROPERTY

Intangible property, which includes moneys and credits, including moneys loaned and invested, bonds, and shares of stock—except the stock of banks and other corporations within the District of Columbia, the taxation of which banks and corporations is herein provided for—of any person, firm, association, or corporation resident or engaged in business within said District shall be scheduled and appraised in the manner provided by law.

EXEMPTIONS ON INTANGIBLE PROPERTY

1. Savings deposits of individuals in a sum not in excess of $500 deposited in banks, trust companies, or building associations subject to notice of withdrawal and not subject to check.

2. Shares of stock of the local banks, including savings banks, the telephone and electric light companies, the gas companies, and street railway companies; the bonding and title insurance companies and building associations of the District of Columbia and any other corporation paying a tax upon its gross receipts, earnings, premiums, etc.

3. Shares of stock of any business company incorporated in the District of Columbia and receiving no special franchise or privilege in addition to incorporation, whose property, real and personal, or capital stock, is subject to taxation here.

4. Shares of stock of business corporations which are incorporated in other jurisdictions, but chiefly for the purpose of doing business in the District of Columbia, and receive no other special franchise or privilege here, and whose property, real and personal, or capital stock, is subject to taxation here and which are engaged in business here.

5. United States bonds, State and municipal bonds, District of Columbia bonds, Philippine and Porto Rican bonds, and such other bonds as are specifically exempted by Congress from taxation, are not subject to taxation under the intangible personal property act of the District of Columbia.

6. Deposits in banks and trust companies of corporations and individuals neither resident nor doing business in the District of Columbia.

7. Bank notes or notes discounted or negotiated by any bank or banking institution, saving institution, or trust company.

8. Savings institutions having no capital stock, building associations, firemen's relief associations, secret and beneficial societies, labor unions, and labor-union relief associations; beneficial organizations paying sick or death benefits, either or both, from funds received from voluntary contributions or assessments upon members of such associations, societies, or unions.

9. Life or fire insurance companies having no capital stock.

10. Corporations, limited partnerships, and joint-stock associations within said District, liable to tax under the law of the said District on earnings or capital stock, shall not be required to make any report or pay any further tax under this section on the mortgages, bonds, and other securities owned by them in their own right, but such corporations, partnerships, and associations holding such securities as trustees, executors, administrators, guardians, or in any other manner, shall return and pay the tax imposed by this section upon all securities so held by them as in the case of individuals.

11. National-bank stock is exempt from taxation under section 5219 of the United States Statutes. Such stock is taxed in the city or town where the bank is located, and not elsewhere.

12. The exemption provided by law on deposits runs to the sum of $500, subject to notice of withdrawal, and not subject to check. Above that amount, the excess is taxable. As to stock held by individuals in building associations, the same ruling should be followed that applies to stock held in local banks, etc., i. e., that such stock is exempt from taxation, whatever the amount held.

13. An individual residing elsewhere but having a bank deposit in the District of Columbia—as a matter of convenience—would not be taxable in this jurisdiction.

14. Proceeds from war-risk insurance.

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. DAVIS of Minnesota. Mr. Speaker, I yield five minutes to the gentleman from Michigan [Mr. CRAMTON] or so much thereof as he desires.

The SPEAKER. The gentleman from Michigan is recognized for five minutes.

Mr. CRAMTON. Mr. Speaker, the conferees on this bill, headed by the gentleman from Minnesota [Mr. DAVIS], have brought back a splendid report; splendid both from the standpoint of the District and the standpoint of the Nation. It is the largest bill that ever passed for the District. It gives them everything that the Senate added for schools and street improvements that are so greatly needed. On the other hand, it provides for the payment by the District under the lump-sum plan of a million dollars less than otherwise would have been the case, and every deficiency bill that will come in next year will be exclusively their own. This $9,000,000 represents the whole charge upon the Federal Treasury for 1925. The bill which I introduced proposing this plan a year ago fixed the amount at $8,000,000, on the assumption that the Federal share of refunds which would hereafter go to the District would be $1,000,000 as estimated by Auditor Donovan. We learn from the District auditor to-day that that share will not exceed, perhaps, $700,000 or $500,000, so that the increase granted by the conference report over the House proposition the other day is only about $500,000 or $700,000.

We have, then, in a remarkably short period accomplished this change to this new and desirable basis in our fiscal relations. The gentleman from Minnesota [Mr. DAVIS], and the gentleman from Kansas [Mr. AYRES], and the gentleman from Illinois [Mr. FUNK], as well as Mr. MADDEN and Mr. BYRNS of Tennessee, are entitled to a great deal of credit for the result which has been achieved.

There are men in the District who have a large share of responsibility for the condition of hostility and friction that has existed heretofore.

The statements and editorials which the newspapers of the city of Washington have sometimes carried, especially such things as the Washington Times has been running here concerning Members of this House, are a disgrace to journalism. Here is an editorial from the Washington Times of last evening, entitled "The House's injustice to the District of Columbia," and what the paper says about the gentleman from Minnesota particularly is contemptible and in total disregard for the truth. It says:

To offset the injury they may be doing to the National Capital in their attitude, these Congressmen expect to go into their districts and set up the cry that wealthy people of the District are tax dodgers; that they are paying smaller taxes than anywhere else in the United States. They know that there will be nobody on hand to answer them or to explain what taxes or assessments are levied on the people of this city.

Then it continues, referring to the gentleman from Minnesota:

It is about the only thing that may put Congressman DAVIS back into the House.

The gentleman from Minnesota has performed his duty. For more than a quarter of a century in his service here he has been adamant against all the blandishments and flattery and other inducements that surround one in Washington. All honor to the gentleman from Minnesota! I say that Members are bound to resent such editorials as that. [Applause.]

But let us not permit any personal feeling, such as would naturally be raised by irresponsible newspaper articles of that kind, to influence our judgment or our action.

The arrangement on this bill is fair to the District and opens the way to the proper development of this growing city, and the committee are to be highly congratulated.

Mr. STEVENSON. Mr. Speaker, will the gentleman yield?

Mr. CRAMTON. Yes; just briefly.

Mr. STEVENSON. I hope the gentleman will not overlook the statement of Mr. Frank Hogan in the address he made before the realtors, that the people keep their wise men back home and send their fools to Congress, and that the people of Washington consider Congressmen to be representatives of a lower sort of life. [Laughter.]

Mr. CRAMTON. The realtors have now had an opportunity to judge of Hogan's irresponsibility as we have had heretofore. I want to answer a question propounded by the gentleman from Virginia [Mr. MOORE] a little while ago. I say the fact that the money we are appropriating is limited to a lump sum so far as the Federal Treasury is concerned is no reason why we should say, "You can be as extravagant as you want with the money of the taxpayers of the District." But the Budget, next fall, if we make this permanent law, will not have to consider, when the District authorities come before them, what is the tax on the Federal Treasury. They can set down $9,000,000, and the further consideration which they give to the subject will be with a view to ascertaining whether the proposed expenditures are deserving and wise and whether they can be provided under a reasonable tax rate. The Congress has not the time to make the investigation necessary for the accomplishment of that purpose, but the trained officials of the Budget are the best investigators we can get.

Mr. MOORE of Virginia. Mr. Speaker, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. MOORE of Virginia. Aside from the discussion of the editorial and the statement of Mr. Hogan, I want to ask the gentleman this question: What percentage of the total expenditure carried in the bill will the lump-sum contribution represent?

Mr. CRAMTON. Under the bill as it stands, it will be substantially 30 per cent. Of course, there will be from $500,000 to $1,000,000 of deficiences during the year, but the bill as it stands is a 70-30 bill.

Mr. BLANTON. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BLANTON. Would it not be advisable for the people of Washington to understand that abuse of Congressmen from the various newspapers here is not going to get them anywhere?

Mr. CRAMTON. I have passed by many things with reference to myself, but I could not pass by this contemptible article about the deserving gentleman from Minnesota [Mr. DAVIS]. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. DAVIS of Minnesota. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. TUCKER, for an indefinite period, on account of death in family.

WHAT I WILL DO WITH THE MILLION DOLLARS IN WEST VIRGINIA

Mr. ALLEN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD concerning an address made some time ago about my State of West Virginia.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. ALLEN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include a speech delivered at the banquest of the West Virginia Society of the District of Columbia, as follows:

Mr. Toastmaster and fellow mountaineers, it is beyond ordinary pleasure to be counted one of such a patriotic and happy assembly as this, an assembly of people from a great State, met to celebrate the fact that they are from that State and to show their pride in it.

To demonstrate how I would spend a million dollars in West Virginia is no ordinary after-dinner thought, and no doubt you are anxious and very speculative as to just how, when, and where I would use so vast a sum of money among our beloved hills. After second thought you will find the idea far more serious than frivolous, and one that is worthy of your best consideration.

The fundamental basis to which this inspiration is applicable is that part of our Nation which is the most northern of the Southern States, the most southern of the Northern States, the most eastern of the Western States, the most western of the Eastern States, the larger of the smaller States, the smaller of the larger States, and the dearest of all the States.

To take a million dollars and judiciously put it into operation so that it will benefit humanity morally, intellectually, and physically, so that it will lessen the burdens and diminish the evils of the State, will be an undertaking without a selfish motive.

It is beyond question that every human being owes a debt of gratitude to some other human being, community, State, or nation. Our path can not be so smooth but that we may stumble some time, nor can a day be so short that rest will not be needed, a sky so clear that clouds are not needed, nor can humanity be so perfect as to reject assistance.

In making the choice of how to spend the million dollars there are many things about our State which must be taken into consideration. For instance, there are men of honor and prominence, true and loyal West Virginians, whose patriotism and public service to State and Nation bid triumphantly for a monument in order that their name and fame may be carried on for all time.

Again, you all know of places that are patiently waiting for some philanthropic person to appear and start a great industry there, in order that the community might be benefited and wealth produced.

Many opportunities present themselves to create school advantages, so that the day may come when the State would be proud of its intelligence and its superior educational institutions.

Numerous are the places that are sending forth appeals for some one to come and help turn nature's resources into beauty and comfort and to make of our "Little Switzerland" the most ideal playground in America.

Then there is the alluring temptation to dispossess the mind of its power and carry it to some mountain crest and lodge it in a castle of beauty and luxury where the rays of the morning light bring many pleasures, and the sinking of the sun brings quiet and rest.

Still there is another alternative that we may use; our State is not so extensive after all but that we might seek other hills and see other people. Our surroundings are small and our knowledge of the world must be broadened. It would certainly be helpful to know the way people live, think, and act elsewhere. To go to the palatial resorts of the North during the summer months, where the air is cooling and healing, and as the temperature begins to drop, to turn southward to the lands of sunshine would for many persons be a desirable mode of life.

But there is in my mind a more persuasive thought than any of these, although all of these ways have a certain attraction for our million dollars. Let us travel back to our green fields and beautiful valleys and stop on a broad plateau on the top of one of our magnificent hills where nature has given us an ideal setting for happiness and peace of mind. There, with the million dollars we will build a great and endurable mansion with many rooms and with every comfort and convenience; a great hospital, to be directed and operated with supreme skill, where the sick may be made well, the diseased and afflicted cured, the unfortunate and weak made strong, the sorrowing made happy, the poor welcomed, the rich accepted; where the body may be cleansed and the soul made pure.

I do not at present have the million dollars, but I do have faith and hope, and with these powerful influences I trust that I shall be able to accomplish this one desire before my strength shall fail me; build this great hospital where all shall be cared for without prejudice, discrimination, or favor.

DISTRICT APPROPRIATION BILL

Mr. SPROUL of Kansas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the appropriation bill just under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. SPROUL of Kansas. Mr. Speaker and gentlemen of the House, the Capital of the United States Government is located in the city of Washington, D. C. The Government has in its employ 56,000 employees who reside in the city of Washington all or a major portion of each year. They receive an average salary of approximately $2,000 a year, or a total of $112,000,000.

A careful investigation discloses that approximately 200,000 people visit Washington each year, spending on an average of $40 each while here, the sum total of which amounts to approximately $8,000,000 annually. The location of the Capital in the city of Washington brings to the city and its business interests $112,000,000 per year. The incidental expenditures of guests is almost $8,000,000 annually, making a total of $120,000,000 expended in Washington as a result of the location of the Capital in the city.

In addition to the United States Government bringing, through the location of its Capital in the city, the sum of $120,000,000 annually, it has been spending millions of dollars in the past in the purchasing and maintaining of parks, the erection of public-school buildings for the city, the extension of

streets and public highways, and it has also been paying 40 per cent of the general expenses of the city. The result is that taxes in the city of Washington are only from one-third to one-half of what the taxes are in the various other cities in the United States. Now, in order to maintain in the city of Washington a low, unusual tax rate, it is proposed that the United States Government continue to pay 40 per cent of the general governmental expenses of the city of Washington and appropriate therefor annually $29,000,000 or $30,000,000.

Mr. Chairman and gentlemen, there is not a leading city in the United States which would not pay the whole of its general governmental expenses and give the property of the Government all the police protection which is afforded the Government property in the city of Washington. To appropriate $8,000,000 or any other sum out of the National Treasury to help defray the general expenses necessary in the government of the city of Washington is unwarranted and unjust to the taxpayers of the United States. I am therefore opposed to appropriating out of the National Treasury $8,000,000 or any other sum of money for the general expenses of the city of Washington.

DUTY TO FULFILL PREELECTION PROMISES AND PLATFORM

Mr. RAKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of general legislation.

The SPEAKER. The gentleman already has that privilege.

Mr. RAKER. I want this consent in addition to that privilege.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. RAKER. Mr. Speaker and gentlemen, permission was given me to extend my remarks in the RECORD on legislation generally and my work as a Member of Congress since my first appearance in 1910, Sixty-second Congress.

On July 15, 1912, by permission of the House, I then extended my remarks, and I can do no better than insert them here. I have complied with those promises, and all of them have been carried to final and proper determination. The last one was the exclusion by law of the Japanese. This law is now on the statute books. That insertion of July 15, 1912, is as follows:

Mr. RAKER said:

Mr. Speaker, I believe it is but proper and right for me at this time to say a few words upon the important question of the duty of those who seek to represent the people of this great Nation or any branch of it, as well as one of the sovereign States, to fully carry out their preelection promises and platform. The promises made by a man when seeking to obtain the suffrage of the people for any office within their gift should not be lightly made, and when made should not be broken. He should be at all times ready and willing to let the public know, as near as he can, his position upon public questions and matters of public concern. When thus made they should be considered as a moral and legal pledge between the public and himself, binding upon him and to be truly and fully executed.

I have heretofore acted upon and tried to fulfill such promises and shall continue to do so in the future. One who violates his preelection promises and platform is not entitled to the support of any constituency. He is a poor and faithless public servant. He has obtained a high position by fraud and deception if he takes any other course. His title to the office would be obtained and held by committing an offense, while not punishable by any known law yet enacted, though grossly guilty under the moral code. Though his conviction is not always had, it most generally follows when he next appears before the people for their judgment. While not so certain of condemnation in the past, in the future it will be, because the people are taking a closer inventory of their public servants and are now more fully appreciating their rights and the means with which they can execute them.

There can be no moral or legal excuse for a want of fulfillment of preelection pledges.

I made promises to the people of the first—now second—congressional district two years ago. Those promises have been observed and executed by me to the fullest extent of my knowledge, power, and ability.

The promises and platform upon which I was elected to this Congress are made a part of this statement; likewise some of the things in which I have participated as a Member of this House and my future promises and pledges to the California people, in particular those of the second congressional district.

"IMPORTANT QUESTIONS — PLATFORM OF PRINCIPLES — POSITION TAKEN BY JOHN E. RAKER ON IMPORTANT QUESTIONS INVOLVED IN THE ISSUE BEFORE THE PEOPLE ON BEHALF OF BETTER GOVERNMENT

"When a candidate for Congress in 1910 I prepared a statement explaining my position on the important questions facing the voters at that election to be held in November of that year. That statement is as follows:

"This Government should not be a business asset of the favor-seeking corporations. It must be the people's Government and be administered in all departments according to the Jeffersonian maxim, 'Equal rights to all, special privileges to none.'

"'The people must rule' is the living issue which presents itself in all public questions now under discussion.

"That such is the primary issue has become perfectly clear. The course of national legislation in the past shows that gross abuse of power by the 'machine' has emphasized the fact that the people do not rule. This is wrong. This is usurpation of power. It is a control of the Government by the corporations and trusts instead of a control of the corporations and trusts by the Government; and so long as this exists just so long will the people be deprived of their rights.

"I am therefore in favor of—

"1. A progressive, honest, and economical Government.

"2. An end of all official graft.

"3. An honest revision of the tariff downward.

"4. A fair and equitable banking and currency law—not a great central bank controlled by Wall Street.

"5. Conservation of our natural national and State resources and a progressive, upbuilding policy, honestly and economically enforced; that we control our natural resources and use them now, in the present, but still control them so the future use of them will be saved for the people of this Nation—keep them from the hands of the few.

"6. Controlling the trusts and preventing monopoly.

"7. Reciprocity for a progressive purpose and not for retaliation.

"8. A genuine control of railroads, freight and passage rates.

"9. A just and genuine control of railway discrimination between cities and towns.

"10. Controlling overcapitalization of stocks and bonds of railroads and of industrial monopolies.

"11. Physical valuation of railways as a basis of fair rates and fares.

"12. A parcel post and a genuine postal savings bank act, and that it be constituted so as to keep the deposited money in the community where it is established.

"13. Proper control of the gigantic gambling in stocks and bonds and in agricultural products.

"14. A progressive inheritance tax on large and gigantic estates and an income tax.

"15. Permanent system of development of our national waterways and of national good roads.

"16. A national law for publication of campaign funds before all elections and a sound corrupt practices act.

"17. Election of United States Senators by direct vote of the people and an amendment of the Constitution of the United States for such purpose.

"18. Congress providing its own rules, and that the Speaker should not be the ruler of the House, but that the House itself should rule, to the end that honest, just, and proper legislation may be enacted.

"19. Honest, fair, just, and proper legislation on behalf of labor. Labor must be dealt with in a spirit of fairness.

"20. An exclusion law excluding from the United States and Territories all Asiatics except certified merchants, students, and travelers.

"There are many questions presented in the above. I have thus stated them so there can be no misunderstanding as to my position on the important questions now confronting the people of this Nation.

"It is true that those now demanding the principal attention of our people are: Corporation control of our elections, monopoly of our necessaries of life, domination by special-privilege corporations of our legislation, and conservation of our national resources.

"I believe in individual and national success and prosperity. Merit should be rewarded. I have no quarrel with corporations. They are necessary and should be encouraged for the purposes for which they are formed. Corporations being formed for the purpose of serving the general welfare should not partake of the freeman's political rights. It is no part of their business to run the Government or to attempt to run it; and when they do they are stepping beyond their legitimate functions and should be stopped.

"The Aldrich-Payne tariff law is a violation of the first principles of this Government. It is so arranged that it gives to the already wealthy and takes from the needy. It should be revised, and revised downward. The beneficiaries of the tariff should not be given this task.

"Progressive constructive legislation should be had at all times, and I am unalterably opposed to 'obstructive' or 'de-

structive' legislation, just because it is 'obstructive' or 'destructive.'

"If elected I would deem it my duty to do the best within me for the entire Nation. When I could be of special service to this State or to my district, it would be one of my pleasures, if within my power so to do, if not in conflict with duties to the Nation. No task would be too burdensome to thus perform for this district or the State or any part of the State.

"The rivers and harbors of this district and State need material improvement and special care and attention, and the National Government should be prompt and liberal for such common good.

"We have no desert lands in this State when water is applied. With an abundance of water going to waste and not restrained, and an empire of land lying idle, every effort should be made to put the water on the land and utilize it. This can and should be done. No man is doing his whole duty unless he bends his energy to that end.

"I am opposed to the system of which Cannon or Cannonism is but a representative, a symbol. No man who holds the views of parliamentary procedure or national policy of Cannon should be Speaker of the House of Representatives.

"And I would consider that I held a commission from the people of this district to vote against any man of such views, and if elected would vote for a Speaker who is in favor of the House providing its own rules and methods of procedure, which should be free from domination by its Speaker.

"The will of the people would be my guide. This is a Government of the people, for the people, and by the people. The people can be trusted.

"I have no special claim upon the people of this district for their suffrage. I have no 'ax' to grind. Having an abiding faith in our institutions and form of government and holding the views I do, I would consider it a high privilege and right to participate in its affairs, believing that I would not abuse the confidence of this people. Having been a resident of this district for 30 years, I feel I know their wants and needs.

"The matters and things here presented are for the purpose of making my position clear to the public, with a firm belief in the same and with a free and full promise to carry the same into effect as far as it may be in my power and ability so to do.

"JOHN E. RAKER.

"ALTURAS, CALIF., *August 31, 1910.*"

My work as your Representative in Congress, and the CONGRESSIONAL RECORD, will show that I have labored earnestly and hard to carry out these principles. I have accordingly worked and voted for the legislation that had for its objects and purposes the fulfillment of my pledge to the people and the enactment of the same into law.

1. Much progressive legislation has passed the House for which I worked and voted. Such legislation has been efficient, along economic lines, progressive, and constructive.

2. The rules of the House of Representatives have been revised so as to give the Representatives of the American people freedom of speech and of action in introducing, proposing, and defending progressive and remedial legislation.

3. Bills have been passed for the relief of the people and the development of the country.

4. There has been an honest effort to revise the tariff taxes downward in favor of the masses and thus to reduce the high cost of living.

5. There has been proposed an amendment to the Federal Constitution providing for the election of the United States Senators by direct vote of the people.

6. Arizona and New Mexico have been admitted into the Union as sovereign States.

7. A law has been passed requiring the publicity of campaign expenses both before and after election and fixing a limit on campaign expenses of the United States Senators and Representatives.

8. A bill to prevent the abuse of the use of the writ of injunction has been passed.

9. A law establishing an eight-hour day for workmen on all national public works has been secured.

10. A resolution which forced the President to take immediate steps to abrogate the Russian treaty was passed.

11. The great supply bills passed by the House lessened the waste and extravagance and reduced the amount of expenses of the Government by many millions of dollars.

12. The three-year homestead law was passed and is now a law.

13. Laws were passed giving relief to desert-land claimants and to homestead claimants under the Government reclamation projects.

14. A law creating and establishing a Children's Bureau was secured.

15. The phosphate bill was passed.

16. The law establishing the Bureau of Mines was amended and passed, to the end that this bureau might have ample and sufficient power to extend its operations, particularly in metalliferous mining. This affects the great Rocky Mountain and Pacific coast mining States.

17. The Panama Canal bill passed the House exempting from tolls all American ships engaged in constwise trade passing through the Panama Canal and prohibiting the use of the Panama Canal by ships owned or controlled by railroad carriers engaged in transportation competition with the canal.

18. The excise tax bill has passed the House.

19. The bill providing for national post (good) roads, the publication of the names of all owners of all newspapers, together with their stockholders, and indications in said papers as to the authors of all newspaper articles, and a partial parcel post was passed.

20. A bill granting home rule to the Territory of Alaska.

21. A pension bill has passed the House and is now a law which is a better recognition of the soldier than before given.

22. Trial by jury in contempt cases, when alleged to be committed without the view of the court, is now pending and will pass the House.

23. Bills suppressing the pernicious practice of gambling in agricultural products are now pending before the House and will be passed.

24. The various planks of that splendid progressive platform adopted at Baltimore on June 29, 1912, will be carried out and enacted into laws. For the enactment into laws of those progressive policies I will earnestly and diligently labor.

25. A bill providing for workmen's compensation is before Congress and will pass.

There are many important measures now pending in Congress which are intended to give the people of the Nation more progressive and better laws. In fact, every principle enumerated has received much earnest and careful attention and consideration by the House. Many of them have become laws of the land, others have passed both the House and the Senate and have been vetoed by the President. Many others are before the committees of the House, and those that relieve the American citizens of the unjust burdens of taxation, reduce the high cost of living, control the trusts, and prevent monopoly, and being just and wise measures, will receive the consideration and sanction of the House.

In this great constructive work of the House I have endeavored to do my part, and have voted according to my best conscience to carry out what I promised I would do, if elected, and have striven to advance the cause of justice and right.

I am in favor of more liberal laws, rules, and regulations for miners; have given this most vital and important subject personal consideration. Miners and the mining interests desire the right to obtain and must get just and fair treatment.

I am for conservation of our National and State resources. What I said two years ago in my statement is hereby reaffirmed. I am against the destruction of those resources. Since my election two years ago I have, in and out of Congress, worked for progressive and true conservation.

The proper handling of our public lands and coal and oil lands, here and in Alaska, and the proper use, control, and development of our water, water rights, and power sites have been given and will continue to be given every consideration.

Under my statement of two years ago—No. 20—that I was in favor of an exclusion law, excluding from the United States or its Territories all Asiatics except certified merchants, students, doctors, and travelers, I have introduced a bill—H. R. 13500—which fully carries out this pledge. This bill is comprehensive and just and contains proper restrictions, etc. I have given and shall continue to give this bill my best efforts and feel that eventually it will receive the approval of Congress. This is a big and important question, and of necessity takes much care, labor, and time. This I will unswervingly continue to give.

I realize that it is quite hard to do much until after one has had some little experience; but notwithstanding this fact I have been "on the job" and voted and answered roll calls at all times, which will be borne out by the CONGRESSIONAL RECORD.

I have given personal attention to the work before the various committees and have succeeded in assisting and securing much legislation that was necessary. With more experience I know I could do better.

There is much progressive legislation needed. I would like to assist in this work, and, if I have been reasonably faithful in the past, with what experience I have had as your present Representative, with your approval I can and do unhesitatingly say that my work in the future will be to better carry out the statement of principles and work for the enactment of laws that will keep and run this great Government for its 95,000,000 of people and not for a favored few—the interests or the trusts. My sympathies are with the people. I am one of them, a humble worker in the ranks. I stand for advancement all along the line. The people should be permitted to have a full voice and say in this Government of theirs. I stand for progressive legislation, both State and National, to that end.

You generally know whether or not I have given proper care and attention to the interests of the people of the district. No letter has been left unanswered and no inquiry passed by unnoticed and without care and attention.

My attention has been given, maybe not always properly and wisely, but anyway the best that could be given and done. I have endeavored to do as your Representative what I promised I would do when seeking this responsible and honorable position at your hands. How well I have done this you must be the judge. My conscience knows that I have faithfully and truly striven to accomplish it. This will be my promise for the future. Many needs and wants of this district and State have been impressed upon me by personal contact and knowledge and by individuals as well as by the newspapers. Some of the many requirements are set out in this statement, and these and all other just and progressive principles will receive my best efforts.

If my past course, work, and conduct have been such that you can reasonably approve them, considering the inexperience, the principles that I have and do stand for and those that have been carried out and enacted into laws, then I most respectfully request that you give me an opportunity to use this experience for more and better work and better results.

Since that time, as a Member of the House of Representatives, I have voted for, advocated, and championed the following legislation:

United States Shipping Board: To establish and encourage and develop a merchant marine so that American commerce, including our heavy tonnage of exported agricultural products, will not have to depend on foreign ships for ocean transportation. (May 20, 1916, p. 8374, CONGRESSIONAL RECORD.)

Good roads law: This bill provides a system of cooperation between the Federal and State Governments in the building of hard-surfaced highways. Liberal appropriations have been made by Congress under it, and as a consequence more improved highways have been built than during any other similar period in American history. (January 25, 1916, pp. 1536, 1537, CONGRESSIONAL RECORD.)

Immigration restriction: To regulate entry of aliens into the United States and provide certain restrictions against their entry. This law was amended in 1921 and 1922 to still further restrict the number of admissible aliens, and I voted for these amendments in both cases. Also supported legislation to deport undesirable aliens, such as Emma Goldman and Alexander Berkman. As a member of the Committee on Immigration and Naturalization, I have assisted in formulating and passing all immigration laws since 1912.

Farm loan act: Established system of 12 farm-loan banks. System affords farmers opportunity to borrow money, to be used in purchasing or improving homes, at low rate of interest and long terms of payment. (May 15, 1916, p. 8017, CONGRESSIONAL RECORD.)

War revenue act: To provide money for defraying the expenses of the war, levying high surtaxes on large incomes, and excess-profits tax on corporations making large profits during the war. (May 23, 1917, pp. 2818, 2819, CONGRESSIONAL RECORD.)

Food control: To prohibit hoarding of foodstuffs, insure ample supply, and to prevent profiteering in foodstuffs. (June 23, 1917, p. 4190, CONGRESSIONAL RECORD.)

Farm-loan bonds: Authorized the Secretary of the Treasury to purchase farm-loan bonds during the time when the bond market was being absorbed in the sale of Liberty bonds. Under the law the Secretary purchased $195,175,000 farm-loan bonds, which money was in turn loaned by the farm-loan banks to the farmers of the United States. (January 4, 1918, p. 615, CONGRESSIONAL RECORD.)

Wheat guaranty: Provided for fulfillment of Government promise of guaranteed price of wheat raised by the producers. (February 22, 1919, pp. 4051, 4052, CONGRESSIONAL RECORD.)

Amend and liberalize war risk insurance act: This bill, usually known as the Sweet bill, amended the war risk insurance act so as to provide a larger amount of compensation to the wounded and disabled veterans of the World War. The act applies in equal degree to officers and privates. This act has been amended to meet up with new conditions and to correct imperfections not realized when the first act was passed.

Veterans' Bureau: Creates an independent bureau under the President known as the Veterans' Bureau and coordinates under one head hospitalization, vocational training, war-risk insurance, and compensation payments of veterans of the World War. This saves much duplication of work and if properly administered should enable ex-service men to secure more prompt consideration of their claims. There have been important amendments to this law since its enactment which are intended to make the act more workable and just.

War Finance Corporation: A bill to enlarge and extend the facilities of the War Finance Corporation and enable it to make advances to banks, cooperative organizations of farmers, and other financing institutions to assist in production of farm products and livestock and help in the orderly marketing of same. This act has been amended and extended.

Farm-loan-bank deposits: This bill authorizes and directs the Secretary of the Treasury to deposit, from time to time as the needs of the farm-loan banks may require, $25,000,000 to be used by said banks in making farm loans during the time sales of farm-loan bonds are taking place. Said money so deposited to be returned to the Treasury as soon as the sale of bonds is effected. This law is working with excellent results. Under its operation the Treasury has suffered no loss and the loan operations of the farm-loan banks have been greatly helped. Since originally passed the bill has had some valuable and important amendments made to it which make it more workable.

Veterans' hospitals: The Langley bill provides for the construction and purchase immediately of additional hospitals for sick and disabled veterans of the World War and appropriates $17,000,000 for said purpose. Proper amendments for hospitals and hospitalization have been made from time to time. (March 31, 1922, p. 5313, CONGRESSIONAL RECORD.)

Good-roads machinery: A bill requiring the Secretary of War to turn over to the Secretary of Agriculture, for distribution in the several States through the State highway commissions, all surplus Army trucks and other suitable tools and machinery for use in road building. This has put to good use much surplus war material which otherwise would have had to have been sold at great loss. (November 6, 1919, p. 8049, CONGRESSIONAL RECORD.)

Postal salary bill: A bill to increase salaries of postal employees and put their compensation on a more equitable basis.

Farm organization bill: This bill, usually referred to as the Capper-Volstead bill, makes broad and liberal provisions for the organization of farmers in the following language:

Persons engaged in the production of agricultural products, as farmers, planters, ranchmen, dairymen, nut or fruit growers, may act together in associations, corporate or otherwise, with or without capital stock, in collectively processing, preparing for market, handling, and marketing in interstate and foreign commerce such products of persons so engaged.

Such associations and their members may make the necessary contracts and agreements to effect such purposes.

If there ever was the slightest doubt about the complete authority of the farmers to organize and bargain collectively, that doubt has now been entirely removed. (February 11, 1922, p. 2739, CONGRESSIONAL RECORD.)

Have taken a firm stand and worked—

For coordination of Government bureaus: Authorizing the President to consolidate and coordinate functions of executive bureaus more efficiently to conduct the public business to avoid waste and duplication of work.

For the Budget system: To secure more effective economy in Government expenditures by requiring the estimates from the several departments to be carefully examined and revised by the Director of the Budget and all objectionable items eliminated before submission to Congress.

Child labor law: Affording protection to the youth of the land.

Extension of Children's Bureau: To investigate matters pertaining to welfare of children.

Vocational education act: Provided for the promotion of practical education; to cooperate with States and provide for training of teachers in vocational subjects.

Safety of railway employees: Requiring installation of improved safety appliances, affording better protection of railway employees.

Exempting labor organizations from prosecutions under the Sherman antitrust law.

Employees' compensation: Providing compensation for Government employees who are injured while in performance of their duties.

Corrupt practices act: Providing against the unlawful use of money in elections; to prevent vote buying; to prevent corrupt election methods, so elections will be clean, honest, open, and free from crooked dealing.

Good roads: Providing Federal assistance in improvement of highways.

The distribution among the States of Army trucks and other machinery for road construction.

Increasing the pay of soldiers, sailors, and marines.

Taxing the incomes of those able to pay to prosecute the war.

The Government providing educational advantages and employment for disabled and wounded soldiers, sailors, and marines.

The eighteenth amendment: Prohibiting the manufacture, sale, or transportation of intoxicating liquors, and so forth.

The acts to enforce the eighteenth amendment, known as the Volstead Act and Willis-Campbell Act.

The rule creating Committee on Woman Suffrage: Was the author of this rule and the first chairman. This committee reported out the woman suffrage amendment, which passed the House and lacked one vote in the Senate of passing Sixty-sixth Congress.

The nineteenth amendment to the United States Constitution: In the Sixty-seventh Congress the resolution was the first piece of legislation to pass in the House, and then passed the Senate. I was the ranking minority member of the committee at this time reporting this amendment.

Flood control and improving of rivers and harbors.

Amendments to the Federal reserve act: Reducing the normal rate of interest for discounting and giving a fair deal to State banks.

The readjustment of excess profits and income tax.

The readjustment of salaries of post-office employees.

Every measure looking to the best interest and advancement of the cause of education.

The declaration that the labor of a human being is not a commodity.

Legislation giving proper protection and relief to labor.

Against all measures that seek to foist upon America any plan or system that smacks of military despotism.

SIXTY-EIGHTH CONGRESS, FIRST SESSION

I supported, worked, and voted for—

Amending the rules of the House: This gave the House an opportunity to consider bills buried in committee. (January 18, 1924, p. 1143, CONGRESSIONAL RECORD.)

Muscle Shoals: To develop this great national resource and produce fertilizer for the American farmers. (March 10, 1924, pp. 3925–3928, CONGRESSIONAL RECORD.)

Law enforcement, increasing coast guards (prohibition). (March 13, 1924, p. 4091, CONGRESSIONAL RECORD.)

Adjusted compensation to veterans of World War (bonus). (March 17, 1924, p. 4444, CONGRESSIONAL RECORD.) Voted to override the President's veto. (May 17, 1924.)

Postal employees: To adjust and increase compensation.

Tax bill: This had for its purpose adjustment of the income taxes, surtax and normal and inheritance taxes. Voted against the "Mellon tax plan" and for the "Garner plan," and then for the conference report with the "Simmons plan" substituted.

Irrigation relief bill: This had for its purpose relief of the farmers on Federal irrigation projects. (April 7 and 30, 1924, CONGRESSIONAL RECORD.)

Immigration act of 1924: This bill puts on the statute books a real restrictive immigration bill with humane provisions and effective. It includes the exclusion of aliens ineligible to citizenship. This excludes the Japanese. As a member of this committee for many years gave a great deal of care and consideration to this legislation and procured many effective and important amendments adopted by the committee and approved by the House. (April 5, 12, 19, and May 15, 1924, CONGRESSIONAL RECORD.)

Howell-Barkley bill: Providing for adjustment of difficulties between labor and the railroads to the interest and protection of the general public.

Agricultural relief legislation: This legislation for agriculture of all kinds was defeated.

Boulder Canyon Dam, Colorado River: This is to develop the Colorado River, prevent the floods in Imperial and other valleys in California, and the Yuma Valley in Arizona, provide water for irrigation and domestic use, and power for the great Southwest by the Government. (Hearings before House Committee on Irrigation and Reclamation.)

Child labor: Proposing constitutional amendment to the United States Constitution to protect child labor. (April 26, 1924, p. 7295, CONGRESSIONAL RECORD.)

Hawaiian Bill of Rights: Extending the provisions of Federal road acts and other Federal aid acts to the Territory of Hawaii.

As a member of the Committee on Public Lands and Irrigation and Reclamation of the House, have participated in all public land and irrigation legislation for the past 13 years. This has included Alaska's coal and oil fields, about which so much was said before the Sixty-second Congress; the three-year homestead law; desert and mineral laws; stock-raising homestead law; relief land legislation for soldiers, sailors, and marines who were serving and served in the World War; preference right of entry to ex-service men; the coal, oil, and gas leasing bill; creation of national parks; the National Park Service law; exchange bills; Federal water power act; and many other bills, all of which became laws, and assisted greatly in building up the Western, Rocky Mountain, and Pacific Coast States of the Union. This was conservation legislation.

Never failed when possible to help any constituent.

Have been and remained "on the job."

I do not fail to fully appreciate the constituency sending me here for these past years. Have striven to meet up with the confidence given me by repaying in giving all my time, attention, and the ability I may possess to Government work—district, State, and Nation.

The longer you do congressional work the better one becomes equipped to do more and better work and thereby accomplish things. No one knew this from experience and practice better than Speaker Champ Clark when in the House of Representatives on March 16, 1916, speaking to the subject "The Making of a Congressman," he said:

> No man should be elected to the House simply to gratify his ambition. All Members should be elected for the good of the country. * * *
>
> A man has to learn to be a Representative just as he must learn to be a blacksmith, a carpenter, a farmer, an engineer, a lawyer, or a doctor. * * *
>
> Useful and influential Congressmen are made largely by experience and practice. * * *
>
> A new Congressman must begin at the foot of the class and spell up. * * *
>
> Former Speaker Cannon is serving his fortieth year.
>
> I am serving my twenty-second year; Minority Leader Mann is serving his twentieth year; Mr. Kitchin, chairman of Ways and Means, his sixteenth. * * * Messrs. GILLETT and COOPER, who are serving their twenty-fourth year, are the ranking Republicans on Appropriations and Foreign Affairs. * * *
>
> Go through the whole list and you will find, with few exceptions, that the men of long service have the high places. * * *
>
> The best rule, it seems to me, is for a district to select a man with at least fair capacity, industrious, honest, energetic, sober, and courageous, and keep him there as long as he discharges his duties faithfully and well. Such a man will gradually rise to high position and influence in the House. His wide acquaintance with Members helps him amazingly in doing things.

I no doubt may and from certain quarters am sure to get quite severe criticism for this seeming fulsome résumé of "general legislation." That may be expected. It is the result of public service. To be sure, it refers to the author of this extension. The matters referred to relate to facts and what actually occurred and was done. This is my only way of informing the public as to the conduct of their public servant.

Have always voted on every measure either yea or nay and do not answer "present," but vote.

Have conceived it my duty to act and therefore have not "paired," because I was always "on the job" to vote. I was not sent to Congress to remain away from the House or the committees to which I have been elected.

It all is germane to questions on general legislation. Have therefore taken this method in discussing them.

NORTHAMPTON COUNTY (PA.) MEDICAL ASSOCIATION

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. KENT] may have permission to extend his remarks in the RECORD on the subject of Federal legislation as it affects the public health.

The SPEAKER. Is there objection?

There was no objection.

Mr. KENT. Mr. Speaker, in the city of Bethlehem on June 5, 1924, in the ballroom of the beautiful new Hotel Bethlehem, was held the seventy-fifth anniversary of the Northampton County (Pa.) Medical Association. This organization is one of the oldest of its kind in the United States. It has not, and does not, confine its activities to the medical world but is a leader in all social, moral, political, scientific, and industrial activities.

It was my great pleasure and privilege to speak upon that occasion to one of the finest audiences I have ever addressed. My speech was the last set speech upon the program, and as the audience had listened attentively to all preceding speeches, beginning approximately at 8 o'clock in the evening, I very much feared when I began my address at about 11.45 p. m. that the audience would be restive. But I found one of the most intent and responsive audiences that I have addressed in a period of over 20 years.

I am going to say here a few of the things that I said at that time, because I feel that there is no more important service in our Federal Government than that affecting the public health.

I felt very much at home and intensely interested at this anniversary meeting. It was a pleasure to know that 75 years

before the meeting Dr. Robert E. James presided over the first meeting of the association. He was a first cousin of my grandfather. For many years he was a leading medical practitioner in Pennsylvania, and even to-day in and around the village of Stone Church, Northampton County, Pa., where he lived and wrought, are many traditions of his superior skill, of his kindness of heart, and of his progressiveness as a citizen. He was a great physician, and my grandfather, as his cousin, was his hostler. But although his hostler performed honest and efficient service, and although the service might have been considered menial, this big-hearted man, Dr. Robert E. James, during all the time my grandfather worked for him, extending over a period of a few years, endeavored to persuade his hostler to enter upon the study of medicine, and offered to pay all of the expenses in order that his own employee might become skilled in the medical arts and sciences. It was a matter of regret on the part of my grandfather to his dying day that he did not accept the kind offer of his employer.

We owe much, from the standpoint of health and education, to those early pioneer physicians who had the courage, the patriotism, and the love of humanity in establishing themselves to practice one of the greatest of professions in far-away places, secluded from the busy world of industry and away from means of transportation. There is no more interesting figure in our history than the early physician, who braved the wind, the rain, the snow, and the elements generally, fighting cold, heat, dust, and mud through the hills and valleys in our early settlements and pioneer days, alleviating pain and curing bodily ills. He was then, as his successors are, one of the necessary progressive elements in the civilization of that day and the present. Without the physician civilization would have perished.

You have all heard the story of the little island of Torcello, in the Adriatic, outside of Venice. In ancient days this was a flourishing and important center. Palaces, temples, marts of trade, and bustling thoroughfares marked the prosperity of its inhabitants. No doubt the business men of the tenth century in Torcello considered their prosperity as indestructible as the Rock of Gibraltar. But to-day there is hardly a trace of the ancient grandeur of this little world. The monuments of greatness and palaces of luxury have melted away, the marble-lined canals have become sluggish and weedy mudholes, all the beauty has perished, and hardly a ruin is left to mark the place of ancient glory.

Why did Torcello perish? Was she overwhelmed by war, by earthquake, or by tidal wave? Torcello was overthrown by the mosquito and the ravages of malaria carried by these little pests. Torcello died and is almost forgotten, because she failed to keep disease outside her borders.

And so, our ancient pioneer physician and those of to-day stand as the vanguard against the greatest enemy that can threaten or overcome any civilization, the dreaded scourge and germ of disease.

We are living in the most wonderful age in the history of mankind. Democratic and republican citizenship is impressing itself upon all peoples everywhere and, too, we are living in a commercial age. We require almost a social and political revolution to cause the minds of our people to dwell upon the needs of future generations: We became wasteful and extravagant in the control of our resources. We are inclined to ignore the great cry of humanity which comes from the mills, the farms, the mines, the factories, the counting houses, and the schools. The cry is for moral and social advancement. The empire builder in America has thought principally of great commercial achievement. What a blessing it has been to civilization that the physician follows in the wake of this great advancement and becomes the forerunner in practically all of our battles for social legislation affecting the social and moral welfare of our people.

To the physicians of America may be credited in large measure most of our legislation in the several States affecting child health, child life and care, child-labor legislation, restricted hours of labor for men and women in dangerous and burdensome industries, workmen's compensation legislation, and practically all legislation affecting public health.

But there is a line of demarcation between the duties assumed by the physician of half a century ago and those imposed upon the physician of to-day. The old-time doctor spent his energies "curing" people, the doctor of the future will prevent disease. His every energy will be devoted to heading off disease. Preventive medicine will be his chief concern.

We have just passed through the greatest war in history. In its trail in our country it has left many boys with their eyes blinded by the deadly fires of the enemy, their lungs stopped in their functions by poisonous gases, and with their maimed and broken bodies confronting us constantly. In Europe we find hunger, disease, undernourishment of children, social unrest, interrupted education, mentality spent, and broken lives. It will be largely the duty of the physician of to-day and of the future to meet the great problems of health thrust upon us by the great World War. We must reestablish health, vigor, and happiness, which are the natural outcome of peace and industrial activity and freedom.

There are two distinct lines of health service in our country—that maintained by the States and that maintained by the Federal Government. By harmonizing these two lines of service, by constructive cooperation between them, results can be accomplished far beyond the dreams of our forefathers. If the present exodus from the farms of our country shall continue, it will not be many years before the greater part of our population will be found in the congested centers. The greater the congestion becomes in those centers, the greater will become the need of public-health service. In 1922, 1,000,000 people left the farms of our country and moved into towns and cities. They were followed in 1923 by 1,000,000 more from the agrarian population. It has become the duty of the health service in the cities to preserve efficiently the purity of our food and water supply generally and to prevent rather than cure disease. Broadly speaking, the duties of the Federal health service are to prevent disease from entering the country, either brought through immigration and commerce and from spreading from one State to another, to suppress epidemics, investigate disease, and disseminate health information.

The most important of these tasks is the prevention of disease from entering the country and from spreading through it. Exclusion of disease through foreign quarantine was once entirely in the hands of the States but has gradually been surrendered by them to the Federal authorities, who, in the nature of things, are much better equipped to manage it.

Prevention of the spread of disease through domestic quarantine is now efficiently handled by State health boards. The Public Health Service has charge of the State-to-State spread of disease, and the States have charge of the spread within their respective borders. In practice, however, the Federal and State officers cooperate freely whenever there is danger of an epidemic becoming serious.

In this connection, may I sound a warning against the present prevalent tendency to centralize the powers of government, affecting the public health, in the Federal authorities at Washington? The wisdom of the founders of our Republic is exemplified with peculiar force when we deal with the public health. No power affecting the public health of the people of the States should be considered as lodged in the Federal Government where those powers can just as well be exercised by the States and the people in local communities. Congress should always have power to control, prevent, and even cure disease as the same may be spread by entrance into the country through immigration and foreign commerce and as the same may be spread throughout the Nation in interstate commerce.

Maternity legislation and that affecting the most vital and delicate concerns in our family life should not be permitted to be exercised by the Federal Government, because it was never intended by the founders, and it is not intended now, that the strong arm of the Federal Government should reach out from its home in a clearly defined district, passing the borders of State after State, to touch upon the most delicate concerns of family life in local communities. The States, the cities, the towns and townships can properly, with the assistance of local public-spirited physicians, exercise sovereignty and jurisdiction over their people. Federal legislation upon this subject, above all others, should be strictly confined to Federal activities authorized under the Constitution and should be extended to the States largely through departments of research and dissemination of information. Cooperation between the State and Federal departments, each working in its own sphere of activity, should bring about the very best results.

Peace and prosperity will follow a healthy people only, and efficiency in the bodies and minds of future generations can be attained only by properly safeguarding the lives and health of the peoples of the present generation. War and famine fear a people which is happy, healthy, contented, and militant in the protection of their rights.

I am proud of this association of Northampton County's medical men and wish it Godspeed in the great work and accomplishments of its members.

It is my pleasure to recite a little of the history of this association.

In 1847 the American Medical Association was organized.

In April, 1848, the Pennsylvania State Medical Society was organized.

On July 10, 1849, at 3 o'clock in the afternoon, after due notice had been given through the daily press, there met in the armory at Easton, Pa., 22 members of the regular medical profession and organized the Northampton County Medical Society.

There were present at the meeting and enrolled as members of the society the following list of physicians: Drs. Traill Green, Griffith Sholl, R. E. James, Samuel Sandt, Edward Swift, Cridland C. Field, Abram Stout, Samuel Zulick, Evan Slough, Frank Hollinshead, Q. C. Mulhallon, Zachariah Drake, George Klinefetter, Lewis D. Gray, S. E. Cook, H. H. Abernethy, Charles Innes, W. E. Barnes, David Lachenour, John Deichman, A. F. Probst, and Amos Seip.

Dr. Robert E. James, of Upper Mount Bethel, was elected president, and he was reelected annually for eight consecutive terms.

Dr. S. E. Cook was elected vice president and Dr. Traill Green was made secretary.

The society had regular meetings and was active for a few years. Dr. Amos Seip, one of the founders, notes in his historical sketch given at the fiftieth anniversary:

In October, 1857, the society met in Easton. It transacted little business, there being barely a quorum present. For six years after this date there is no record upon the minutes.

Dr. Seip states further:

At last the society existed only on paper. In 1862 the State society's transactions sets forth that the Northampton County Medical Society had ceased to have an organization.

You may be interested to know, however, that more than 100 years before this time what may properly be called the first county medical society in the United States was organized in the section which is now Northampton County.

Allow me to give a little preliminary medical history which leads up to this statement of which I wish you to make especial note:

John Adolph Meyer was the first resident physician in Northampton County. He came over with the Moravian colony of 54 on the *Catherine*. He was located in Bethlehem from 1742 to 1744. He was a botanist and apothecary as well as a physician. He organized his little stock of drugs and herbs into a primitive apothecary shop, which was located in a room of the Gemeinhaus (clergy house) of the little Moravian settlement. This little shop was kept up, enlarged from time to time, and in 1752 a regular laboratory was established and was the beginning of the pharmacy which exists to-day as Simon Rau & Co., Main Street, Bethlehem.

Dr. John Frederick Otto was the second physician of the county. He was also a Moravian. He was a regular graduate in medicine. (There is some doubt that John Adolph Meyer was a regular graduate.) He was a pupil of the celebrated Hoffman of the University of Halle.

John Frederick Otto arrived in this country in 1743. His much more celebrated brother, John Mathew Otto, came over in 1750.

In 1744 Bishop Spangenberg, with proper authority from Hernhut, came to Bethlehem and immediately began the organization of the Bethlehem colony upon a comprehensive community scale.

In this organization was a collegium medicum, having an infirmary as an adjunct. While this college was not composed wholly of physicians, it may very properly be named the first medical school in the United States. There is a historical reference to a meeting of the members of this college at which there were 22 persons in attendance and medical and sanitary matters were discussed. After this followed regular monthly meetings.

Bishop Levering states that this "college" was a combination of hospital staff and board of health.

We may justly claim, therefore, that the first county medical society in the United States met in Bethlehem, November 5, 1745. Though Northampton County had not yet been constituted, it belonged to the region which is now Northampton County.

Unfortunately the present society can not be traced back to this original organization. The spirit of collective study and organized effort was thus early indicated and much of the subsequent scientific and community achievement of our country may be attributed to the influence of those educated and farsighted colonists.

Four physicians stand out as the medical pioneers in the history of Easton.

Dr. Andrew Ledlie was the first resident physician in Easton. The records of his life are a little uncertain, but it seems he was the only resident physician in Easton from 1763 to 1768. He probably lived until 1790.

Then followed John Cooper, 1794–1851. He was for a time a rival of Doctor Ledlie.

Followed then Dr. Amos Seip and Dr. Traill Green, whose history is well known.

Doctor McIntire in his brochure "Contribution to the history of medicine in Northampton County," written for our jubilee meeting in 1899, states, "Andrew Ledlie, John Cooper, Amose Seip, three generations of physicians, compass the history of medicine in Easton."

May 9, 1863, the Northampton Medical Society was reorganized. Dr. H. L. Huebner was elected president. At this meeting the death of Dr. R. E. James, the first president, was reported.

This was the Civil War time and though the society was reorganized there was scant attendance and little interest in the meetings. After the war the society took on new life and has been active ever since.

Of the founders, Traill Green and Amos Seip lived for many years in active work in the society.

Traill Green was of national reputation and was for many years the scientific man and nestor of the physicians of the Lehigh Valley.

Another outstanding member who for 22 years—1876 to 1898—consecutively served as the most painstaking, active, and faithful secretary was Charles McIntire.

To these two men—Trail Green, its founder, and Charles McIntire, its medimediæval enthusiastic secretary—the society owes most for its present existence and prosperity.

Dr. Irving Jordan—Alumni Register of University of Pennsylvania, January, 1900—states that "the Philadelphia Medical Society was instituted February 4, 1765, thus antedating the State Medical Society of New Jersey, which was organized in 1768." (It must be noted, however, that other authorities give the date of this organization of the Medical Society of New Jersey as 1766.)

The Massachusetts Medical Society was organized in 1781.

The Philadelphia College of Physicians was founded in 1787.

The Lancaster County Medical Society antedated the organization of the State Medical Society something like two years.

The Bucks County Medical Society was organized in 1848.

The Northampton County Medical Society was the fourth county medical society in the State, if the information the realtor has is correct.

Three score and fifteen years is a long period of time when measured in terms of medical organization in the United States.

For many years dissension within the profession on account of the branches newly organized—homeopaths, and so forth—retarded the fraternal spirit and behavior of medical men in our country and, of necessity, hindered the growth of the Northampton County Medical Society. Nevertheless the society has grown from 22 to 141 active members in the 75 years.

The past presidents of the Northampton County Medical Society number some of the leading citizens of the United States in their several generations. They are as follows:

PAST PRESIDENTS

Robert E. James, 1850–51–52–53–54–55–56; A. L. Huebner, 1863–64; Edward Swift, 1867–68; Traill Green, 1869–70; P. B. Brenig, 1871; John Sandt, 1872; J. M. Junkin, 1873; A. K. Seem, 1874; Amos Seip, 1875; Samuel Sandt, 1876; Traill Green, 1877; A. A. Seem, 1878; G. T. Fox, 1879; David Englemen, 1880; Abraham Stout, 1881; J. Buzzard, 1882; Isaac Ott, 1883; William L. Estes, sr., 1884; Tobias M. Uhler, 1885; Samuel S. Apple, 1886; C. H. Ott, 1887; J. H. Wilson, 1888; S. J. Weaver, 1889; J. W. Moore, 1890; Joseph S. Hunt, 1891; David Angleman, 1892; Ed. Moore Green, 1893; Ed. D. Schnabel, 1894; Francis H. Erwin, 1895; William H. Dudley, 1896; Evan W. Evans, 1897; Abraham L. Kotz, 1898; Charles McIntire, 1899; Doctor Wilhelm, 1900; David H. Keller, 1901; W. H. McIlhaney, 1902; Henry D. Michler, 1903; Jacob C. Keller, 1904; George N. Swartz, 1905; Arthur D. Reagan, 1906; Sterl. A. Shimer, 1907; Tyrus A. Swan, 1908; William Pomp Walker, 1909; Charles E. Beck, 1910; B. Rush Field, 1911; Walter D. Chase, 1912; James J. Quiney, 1913; Noah Reichard, 1914; Thomas L. Zulick, 1915; C. C. McCormick, 1916; Carl F. Weldon, 1917; W. P. O. Thomason, 1918; Charles Collmar, 1919; Vic. S. Messinger, 1920; Milton W. Phillips, 1921; Delbert K. Santee, 1922; Paul Correll, 1923.

The present officers of the organization are as follows:

OFFICERS

Dr. E. S. Rosenberry, president; Dr. W. L. Estes, jr., first vice president; Dr. J. E. Condran, second vice president; Dr. A. B. Hamilton, secretary-treasurer; Dr. S. G. Beck, 60 West Market, corresponding secretary; Dr. F. J. Hahn, reporter; Dr. W. P. O. Thomason, district censor; Dr. W. P. Walker, county censor; Dr. J. C. Keller, county censor; Dr. C. E. Royce, county censor.

The anniversary committee for the seventy-fifth anniversary was as follows:

ANNIVERSARY COMMITTEE

B. Rush Field, chairman; W. L. Ester, jr., vice chairman; C. H. Stoffett; F. C. Roberts; E. D. Schnabel, treasurer.

This seventy-fifth anniversary meeting was presided over by Dr. E. S. Rosenberry, of Stone Church, Pa. He now practices medicine upon practically the same location as that utilized by the first president of the association, Dr. Robert E. James. Doctor Rosenberry is a skilled physician, and stands out prominently as one of the leaders of his profession in eastern Pennsylvania. The toastmaster was Dr. W. L. Estes, sr., of Bethlehem, Pa., who is renowned throughout the United States as a physician and surgeon. His writings upon medical subjects are considered as authority throughout the world.

Robert E. James, jr., district attorney of Northampton County, Pa., is a grandson of the first president of the association, and made a splendid speech upon the subject "Our Forefathers." Dr. Edward Martin, former commissioner of health of Pennsylvania, spoke upon the subject "Words for the Future." Hon. Russell C. Stewart, president judge of the courts of Northampton County, made a constructive address upon the subject "What Words Mean to the Bench and Doctor." Judge Stewart had addressed this society at its fiftieth anniversary, 25 years before, June 5, 1924. Dr. Judson Daland, of the Jefferson Medical College of Philadelphia, Pa., spoke on "Medical Musings." Dr. Anthony Meyers, of Blooming Glen, Pa., secretary of the Bucks County (Pa.) Medical Society, conveyed the greetings of his county association, and Dr. W. A. Hausman, jr., of Allentown, Pa., conveyed the greetings of the Lehigh County, Pa., physicians. Dr. Albert Rau, dean of the Moravian College, Bethlehem, Pa., made a very interesting impromptu address, which was much appreciated by the audience. Altogether the occasion was a marked success, and I am highly honored at the privilege this congress has accorded me in addressing its members concerning what I regard as one of the most important meetings from a medical standpoint ever held in the State of Pennsylvania.

ENROLLED BILLS SIGNED

Mr. ROSENBLOOM, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 2821. An act authorizing the erection of a sanitary, fireproof hospital at the National Home for Disabled Volunteer Soldiers at Santa Monica, Calif.;

H. R. 3104. An act granting 160 acres of land to the Western State College of Colorado, at Gunnison, Colo., for the use of the Rocky Mountain biological station of said college;

H. R. 8233. An act making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 8237. An act for the relief of Bruusgnard Kiosteruds Dampskibs Aktieselskab, a Norwegian corporation of Drammen, Norway;

H. R. 4442. An act to extend the insurance and collect-on-delivery service to third-class mail, and for other purposes;

H. R. 4012. An act to reimburse William H. Flagg and others for property destroyed by mail airplane *No. 73*, operated by the Post Office Department;

H. R. 2647. An act for the relief of Lena Garagnon Owens;

H. R. 2123. An act for the relief of the Thompson-Vache Boat Co., of Bonnots Mill, Mo.;

H. R. 1438. An act for the relief of D. H. MacAdam;

H. R. 192. An act to provide for a girls' dormitory at the Fort Lapwai Sanatorium, Lapwai, Idaho;

H. R. 5541. An act for the relief of Hubert Reynolds;

S. 966. An act for the continuance of construction work on the San Carlos Federal irrigation project in Arizona, and for other purposes;

H. R. 2126. An act for the relief of C. C. Carson; and

H. R. 4526. An act to incorporate the United States Blind Veterans of the World War.

RESIGNATION

The SPEAKER. The Chair lays before the House the following communication.

The Clerk read as follows:

The SPEAKER,
*House of Representatives, Washington, D. C.*

DEAR SIR: Having been informed that I have been elected a member of the Naval Affairs Committee, will you please accept my resignation as a member of Claims Committee and Committee on Alcoholic Liquor Traffic.

Respectfully submitted.

CHARLES BROWNE.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

POSTWAR CONDITIONS—A PERIOD OF UNREST

Mr. LOWREY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the present state of unrest in the country.

Mr. LONGWORTH. The gentleman's own remarks, I presume?

Mr. LOWREY. Yes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. LONGWORTH. Mr. Speaker, I take it for granted that when a gentleman makes that request they are his own remarks.

The SPEAKER. The request is granted with that understanding.

Mr. LOWREY. Mr. Speaker, Bill Nye, the unique, said: "There are no noble men but Romans and Ohio men." Possibly, were the great humorist alive to-day, he might concede some degree of respectability to Massachusetts. However, I am thinking just now of a son of Ohio who once left his impression, or depression, on the section of the country in which I was born and reared, a seemingly rather ungentle gentleman by the name of William Tecumseh Sherman. I can not say the hearts of our people were among the things he took by storm, yet the South extended him a warm reception. My father, being himself a military man, was away from home attending the reception when I discovered America. So the older members of the family tell me. For myself I do not definitely remember.

In those days this bold Ohio man made a trip across my native State to Vicksburg and back again. This was before our roads were all macadamized, and as he crossed the muddy "bottom" of a Mississippi stream he is said to have given utterance to an epithet concerning war which seemingly has added something to his fame. It is needless to quote. We all readily recall the words.

But the intrepid son of Ohio was never bold enough, in so far as is recorded, to undertake a characterization of the years which follow a great war. If he had done so, he doubtless would have added something to his epithet.

Anyway, I am sure we all realize that a period immediately following a great war is abnormal morally, economically, and politically. I would not have our people abate anything of their effort to get back to normalcy. Yet I wish that they might with a little more patience realize that the abnormal conditions which are now trying us so sorely are just what we should normally expect at such a time. All history so teaches.

War is a time of bloodshed and hate, and hence a time that greatly stimulates the spirit of "kill." Small wonder if it should be followed by a period of discord, personal, political, national, and international, or even by a period of murders and bloody crimes.

War is a time of great waste and extravagance; and a time when men see and take part in the collection and expenditure of large sums of "easy money." Small wonder if it should be followed by a period of extravagant demands and reckless speculation.

War is a time for the exciting and the unusual, a time when men go from home and see and experience many things previously unknown to them. Small wonder if it should be followed by a period when men do not readily settle down to the usual and the commonplace.

War is a time when multiplied thousands of people, soldiers, and civilians live on Government pay with little concern about making a living. Small wonder if it should be followed by a period when many people are grasping for something from the Public Treasury.

In the exigencies of war the Nation looms up large and the Federal Government assumes authority and supervision over many activities that in times of peace are local matters and should be locally administered. Small wonder if in the years immediately following war people expect paternalism and seem to demand that the Government provide everything and take care of everybody.

And so we might go on almost indefinitely discussing the things that are different in a post-war period and that make it a time of discontent and unrest.

But to the often-asked question "What is the matter with the country?" I should simply answer: We are in a post-war period. Things will finally come back to normalcy. They come slowly and may at times even seem to be going the other way. But we must be patient. "Learn to labor and to wait," and learn to do that without fretting. We must be patient with ourselves, with conditions, with private citizens, and with public officials.

The people need, it seems to me, to learn two things especially. First, legislation and government can not work miracles. Many things that are seriously needed are beyond the reach of government, and to demand them of the Government is to work perversion. Second, public officials, like private citizens, are in this confusing whirl. Like private citizens, they differ honestly on political questions and may be honestly wrong. But it is a mistake to blindly discredit and abuse the Congress or the administration at a time like this because hard conditions are not immediately corrected.

All public officials are selected by the people and from among the people, and, like the people who select them, they are just folks, neither wholly bad nor wholly good. Bill Arp quotes a southern negro just out of the penitentiary:

> You see, boys, in de penitentiary it's des like it is ever'whar else. Dey's some good folks, and dey's some bad folks. I'se seed some jest 'bout as mean folks in de penitentiary as I ever seed anywhar in my life.

I may say here that I find the American Congress much like the penitentiary in that respect. We are not saints nor devils; just plain folks. Yet it would be a sad reflection on the people to say that the public officials whom they select are as a lot weak and dishonest. I resent such a charge against the intelligence and the integrity of the American people. My three years of constant and close association with our national legislators and other Federal officials has convinced me that, regardless of party, they measure up to a high level of honesty and ability.

Frank Mondell, after serving for 26 years in this House and attaining the leadership of his party, said:

> I can not close a service of more than a quarter of a century in this House without an expression of my high appreciation of the honor and dignity of service here and of the splendid character of the men whom American constituencies have sent to represent them on this floor. * * *
>
> In expressing my view of the men with whom I have served in this body I am not honoring them more than the people who sent them here. If they were not honest, conscientious, and faithful public servants, devoted to the interests of their constituents, what a sad, sorry reflection on their constituencies. When I express my faith and my confidence in the American House of Representatives I but express faith and confidence in the people. * * *
>
> My respect and my affection for the membership has grown with the passing years. My confidence in this Chamber, in the hands of whose membership rest the destinies of the Republic, has grown firmer with the passing of time.

At the close of this present session we have two distinguished Members retiring to accept high judicial positions—the gentleman from Illinois [Mr. GRAHAM] and the gentleman from North Dakota [Mr. YOUNG]. Both have taken occasion to express similar estimates of the integrity of their associates here.

If this be the cool judgment of large men who have served long in the American Congress, there must yet be honor in the State and safety for our country. We, the Representatives of the people, are to return home soon to mix with our constituencies. Again I am reminded, as I was two years ago, that a campaign year is a time of serious responsibility to men in public life. While we should not cover up the evils and abuses that exist, yet we should not magnify these evils to the exclusion of hope and confidence. We have yet in America the best government known to history and the best conditions that now obtain anywhere on the face of the earth. Millions of people in war-stricken and famine-stricken lands are turning longing eyes toward our happy shores and would risk their lives for but half the liberty, peace, and plenty we enjoy.

Let us go to our fellow citizens of this good land which God has given us, not with expressions of despondency and bitterness, but with messages of cheer and good will.

### THE SILVER BILL OF 1924

Mr. RICHARDS. Mr. Speaker, in addition to the general privilege to extend remarks in the RECORD, I ask unanimous consent to extend my remarks in the RECORD on the so-called silver bill.

The SPEAKER. Is there objection to the request of the gentleman from Nevada?

There was no objection.

Mr. RICHARDS. Mr. Speaker, the bill known as S. 2017 carries with it the undivided attention and interest of the silver-producing section of our country. It is not due to the degree of prosperity it might add to those sections should it become a law that brings this interest. Naturally any man who possesses a commodity desires the highest possible price obtainable. The silver-mine owners would rather receive $1 an ounce than 65 cents, and yet with the purchase of 14,500,000 ounces of silver at $1 per ounce it will not stimulate silver mining to any appreciable degree. The interest that comes to this legislation is the fact that the executive officers of our Government have failed to carry out a mandatory provision of the so-called Pittman Act, to the great detriment of the silver interests of the country. This is strange in a sense, because silver is a precious metal, and although it retains the status of a commodity only, it forms a part of our monetary system along with gold, that carries a fixed value by law. There exists an antagonism toward silver as a money. That fact spells all the trouble. The supply of gold, constituting our money value fixed by law, and the control of it in quantity permits of manipulation that might not so easily exist were the price of silver fixed and its coinage permitted to any extent. This finds the silver producer as a class without any sympathy from those whose interest is best served with the smaller quantity of money for world use.

I am forced to quote the language of our President used by him on last Memorial Day at Arlington; the sentiment therein contained was apropos of the occasion, because it was voiced over the breathless bodies of those who had played the part of real Americans. As I read the paragraph I am about to quote I was struck forcibly with the idea of how much better and with greater realization could it be applied to the living. None honor the fallen soldier more than I. None appreciate the cause for which he fell more than I, but his service has been rendered and his life's cycle has reached a finish. Care and worry are his no longer. We are willing to pause and give him credit for all he is entitled to, but our present concern is with the living. Listen to the words of President Coolidge on the occasion referred to:

> Our prime allegiance must be to the whole country. A sentiment of sectionalism is not harmless because it is unarmed. Resistance to the righteous authority of Federal law is not innocent because it is not accompanied by secession. We need a more definite realization that all of our country must stand or fall together, and that it is the duty of the Government to promote the welfare of each part and the duty of the citizen to remember that he must be first of all an American.

If it were possible for us to take this admonition to heart which is all that is necessary to make it practical, we would find more contentment in government and less complication in our institutions. The selfish side of man is always evident. It seems to be a trait of human character that he is unwilling to divest himself of. Civilization has partially worked to that end. The fact remains that it is ever present and until we reach that degree of perfection where we legislate with a brotherly feeling toward all our country and all our people, the sentiment expressed by President Coolidge has been lost. This is a serious situation, and it is time that its realization was upon us. In my feeble way, I sound a word of caution, I sound a word of warning. Coming from beneath a Nevada sagebrush it will not have the force that it would if echoed from the portals of a palatial Fifth Avenue residence, it will not have the force if broadcasted from the skyscrapers of Wall Street, it will not have the force it would have if they had come from the financial centers of our country; but they are timely nevertheless, and I hope you heed the idea that the sooner we adopt the golden-rule principle in legislation the sooner we will reach the Utopia. That is what the words of President Coolidge mean. They fall upon deaf ears and particularly within his own party. Why not all for each and each for all? Why not silver of definite staple money with a fixed value? That was the intention in the beginning, but it has been juggled out of its rightful place.

### RECESS

The SPEAKER. Under the order of the House heretofore made, the House will stand in recess until 8 o'clock this evening.

Accordingly (at 5 o'clock and 30 minutes p. m.) the House stood in recess.

EVENING SESSION

The recess having expired, the House was called to order at 8 o'clock p. m. by the Speaker.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9429) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1925.

DISTRICT OF COLUMBIA APPROPRIATION BILL

Mr. DAVIS of Minnesota. Mr. Speaker, I call up the items in disagreement on the District of Columbia appropriation bill.

The SPEAKER. The Clerk will report the first amendment in disagreement.

Amendment No. 2: Page 2, line 7, after the figures "$40,500," insert "plus so much as may be necessary to make salary of Engineer Commissioner $7,500."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 18: Page 6, after line 19, insert "All apportionments of appropriations made for the use of the municipal architect in payment for the services of draftsmen, assistant engineers, clerks, copyists, and inspectors, employed on construction work provided for by said appropriations, shall be based on an amount not exceeding 2½ per cent of the amount of the appropriation made for each project."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur.

Mr. HOWARD of Nebraska. Will the gentleman yield?

Mr. DAVIS of Minnesota. Yes.

Mr. HOWARD of Nebraska. Is the gentleman yielding because he believes it is right to yield or because he believes it is expedient?

Mr. DAVIS of Minnesota. We proposed this to the House and it was stricken out on a point of order. It is limiting the compensation to these architects and making it 2½ per cent instead of giving them, as heretofore, 4 or 5 per cent. This is a limitation upon the amount that can be expended for this kind of work.

Mr. HOWARD of Nebraska. The Chair believes it is more or less righteous?

Mr. MADDEN. It is altogether right.

Mr. DAVIS of Minnesota. Absolutely; there is no question about that.

The SPEAKER. The question is on the motion to recede and concur.

The motion was agreed to.

The SPEAKER. The Clerk will report the next item in disagreement.

The Clerk read as follows:

Amendment No. 28: Page 12, after line 4, insert: "All estimates of appropriations for the fiscal year 1926 on account of the purchase, exchange, maintenance, repair, and operation of horse-drawn and motor propelled vehicles, and for allowances to employees for supplying their own vehicles, shall be submitted in three paragraphs under the head of 'Contingent and miscellaneous expenses.' One paragraph shall apply to motor-propelled vehicles, one to horse-drawn vehicles, and one to privately owned vehicles, and each shall be accompanied by detailed information showing numbers and distribution by types, and comparative actual and estimated cost figures for the fiscal years 1924, 1925, and 1926 and file reports of same with the Clerk of the House of Representatives and the Secretary of the Senate. This requirement shall not apply to the police and fire departments, or to the activities provided for herein which are not administered by the Commissioners of the District of Columbia."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur with an amendment.

The SPEAKER. The gentleman from Minnesota moves to recede and concur with an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. DAVIS of Minnesota moves that the House recede from its disagreement to the Senate amendment No. 28 and agree to the same with an amendment as follows:

"Strike out of the matter inserted by said amendment the following: 'And file reports of same with the Clerk of the House of Representatives and the Secretary of the Senate.'"

The SPEAKER. The question is on the motion of the gentleman from Minnesota to recede and concur with an amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 34: Page 17, after line 19, insert: "To aid in support of the national conference of commissioners on uniform State laws, $250."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 64: On page 28, after line 22, insert: "*Provided further*, That assessments in accordance with existing law shall be made for paving and repaving roadways where such roadways are paved or repaved with funds derived from the collection of the tax on motor-vehicle fuels; and hereafter all moneys derived from assessments for paving and repaving roadways under provisions of existing law arising from the expenditure of the fund created by the tax on motor-vehicle fuels, shall be paid into the Treasury of the United States and be credited to and constitute a part of said fund and shall thereafter be available for appropriation in the same manner as the proceeds of the tax on motor-vehicle fuels."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 83: On page 35, after line 18, insert: "For the purchase of three playground sites, $14,300."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 84: Page 35, after the word "playgrounds" in line 25, insert: "$158,570, of which $144,270 shall be paid wholly out of the revenues of the District of Columbia, and $14,300, or so much thereof as may be expended, for the purchase of land for playground purposes, shall be paid 40 per cent out of the Treasury of the United States, and 60 per cent out of the revenues of the District of Columbia."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur with an amendment.

The SPEAKER. The gentleman from Minnesota moves to recede and concur with an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. DAVIS of Minnesota moves that the House recede from its disagreement to the Senate amendment No. 84 and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert "$165,570."

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 89: Page 38, in line 19, after the word "each," insert: "Business manager, to be in charge of the business administration of the public-school system, and to be appointed by and responsible to the Board of Education of the District of Columbia, $3,750."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 90: On page 39, line 1, strike out "$51,900" and insert in lieu thereof "$55,050."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 116: Page 51, after line 3, insert: "For the purchase of a site in the northeast somewhere within a distance of approximately a half mile of the Taylor School, located in square 891, and for construction of a junior high school on said site in accordance with the plans and specifications used in the construction of the Langley and Macfarland Junior High Schools, $600,000."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur with an amendment.

The SPEAKER. The gentleman from Minnesota moves to recede and concur with an amendment which the Clerk will report.

The Clerk read as follows:

Mr. DAVIS of Minnesota moves that the House recede from its disagreement to the Senate amendment No. 116 and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For the purchase of a site in the northeast somewhere within a distance of approximately a half mile of the Taylor School, located in square 891, $150,000."

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Senate amendment No. 117: Page 51, line 10, "for the purchase of a site for a new school in the vicinity of First and Rittenhouse Streets, northwest, $20,000."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur in the Senate amendment.

The motion was agreed to.

The Clerk read as follows:

Amendment No. 118: Page 61, after line 11, insert, "purchase of site Burrville, $7,500."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur in the Senate amendment.

The motion was agreed to.

Mr. O'CONNELL of New York. Mr. Speaker, I would like to ask the gentleman from Minnesota a question. Has the House receded on every single amendment?

Mr. DAVIS of Minnesota. No. Out of 167 we only receded on about half of them.

Mr. O'CONNELL of New York. I have heard nothing but recede and concur, and I thought we must have receded on all of them.

Mr. DAVIS of Minnesota. If the gentleman had been here earlier he would have heard a list as long as his arm that they receded on. They receded on millions of dollars in amendments and we only receded on a small amount.

The SPEAKER. The Clerk will read the next amendment.

The Clerk read as follows:

Amendment No. 119: Page 51, line 13, "Purchase of site in the vicinity of Fifth and Buchanan Streets NW., $50,000."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur in the Senate amendment.

The motion was agreed to.

The Clerk read as follows:

Amendment No. 120: Page 51, after line 14, insert "For athletic field for the Western High School, $125,000."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur in the Senate amendment.

The motion was agreed to.

The Clerk read as follows:

Amendment No. 123: Page 51, after line 22, insert "The Commissioners of the District of Columbia are hereby authorized and directed to erect the school building for the care of tubercular children on such part of the site now occupied by the Tuberculosis Hospital as in their judgment may be best suited for such purpose, the said site being described on the tax records of the District of Columbia as parcels 84-134, 84-146, and 84-147, and the said building having been appropriated for in the act entitled 'An act making appropriations to supply deficiencies in appropriations for the fiscal year ending June 30, 1921, and prior fiscal years, and for other purposes,' approved June 16, 1921."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur in the Senate amendment.

The motion was agreed to.

The Clerk read as follows:

Amendment No. 124: Strike out the figures "$880,000" and insert "$1,707,500."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur in the amendment with an amendment.

The Clerk read as follows:

Mr. DAVIS of Minnesota moves to concur in Senate amendment No. 124 with an amendment as follows: "In lieu of the sum '$1,707,500' insert the sum '$1,242,500'."

The motion was agreed to.

The Clerk read as follows:

Senate amendment No. 140: Page 69, line 6, strike out "Assistant probation officer $1,400" and insert "two assistant probation officers at $1,400 each."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur in the Senate amendment.

The motion was agreed to.

The Clerk read as follows:

Senate amendment No. 141: Page 69, line 10, strike out "$20 per month, $240 in all, $5,137" and insert "$26 per month, $312, in all $6,537."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur in the Senate amendment.

The motion was agreed to.

The Clerk read as follows:

Senate amendment No. 166, page 100, line 3, strike out the figures "$100,000" and insert "$175,000."

Mr. DAVIS of Minnesota. Mr. Speaker, I move to recede and concur with an amendment.

The Clerk read the amendment as follows:

Mr. DAVIS of Minnesota moves to recede and concur with the following amendment: In lieu of the sum appropriated insert "$125,000."

The motion was agreed to.

## LEGISLATIVE APPROPRIATION BILL

Mr. DICKINSON of Iowa. Mr. Speaker, I call up the conference report on (H. R. 9429) the legislative appropriation bill.

The Clerk read the conference report.

### CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9429) making appropriation for the legislative branch of the Government for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 14, 15, 16, 17, 19, 20, 21, 22, 23, and 26, and agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert "$150,000"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 18, 24, and 25.

L. J. DICKINSON,
WM. S. VARE,
C. D. CARTER,
*Managers on the part of the House.*

F. E. WARREN,
REED SMOOT,
*Managers on the part of the Senate.*

### STATEMENT

The managers on the part of the House, at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9429) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1925, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

On Nos. 1 and 2, relating to the Office of the Vice President: Rearranges appropriation for compensation of assistant clerk, as provided by the Senate.

On Nos. 3 and 4: Appropriates $2,100 for pay on annual basis of second assistant in document room of Senate, as proposed by Senate.

On Nos. 5 and 6: Appropriates $2,040 for pay of assistant clerk, Committee on Public Buildings and Grounds of the Senate, as proposed by the Senate, instead of $1,840, as proposed by the House.

On Nos. 7 and 8: Appropriates $3,600 for the pay of a Deputy Sergeant at Arms and storekeeper of the Senate, as proposed by the Senate, instead of $2,740 for the pay of a storekeeper, as proposed by the House.

On Nos. 9 and 10: Appropriates $2,400 for pay of superintendent of folding room of the Senate, as proposed by the Senate, instead of $1,940, as proposed by the House.

On No. 11: Appropriates $3,500 on account of the Vice President's automobile, as proposed by the Senate, instead of $3,000, as proposed by the House.

On No. 12: Appropriates $125,000 for miscellaneous items of the Senate, as proposed by the Senate, instead of $100,000, as proposed by the House.

On No. 13: Appropriates $150,000 for expenses of inquiries and investigations ordered by the Senate, instead of $100,000, as proposed by the House, and $200,000, as proposed by the Senate.

On No. 14: Appropriates $35,000 on account of the Senate kitchens and restaurants, as proposed by the Senate, instead of $30,000, as proposed by the House.

On No. 15, relating to the office of the Doorkeeper of the House: Corrects the text.

On Nos. 16 and 17, relating to furniture, etc., for House Office Building: Restates the appropriation as proposed by the Senate.

On Nos. 19, 20, and 21, relating to the office of legislative counsel: Substitutes, as proposed by the Senate, the designation of "Office of Legislative Counsel" for "Legislative Drafting Service," to conform with the revenue act of 1924.

On No. 22: Appropriates $81,368 for maintenance expenses, Senate Office Building, as proposed by the Senate, instead of $72,368, as proposed by the House.

On No. 23: Appropriates $250,000 for printing and binding, Library of Congress, as proposed by the Senate, instead of $225,000, as proposed by the House.

On No. 26: Excludes from the restriction on the use of money carried by the bill on account of private vehicles the storage of such vehicles, as proposed by the Senate.

The committee of conference have not agreed upon the following amendments of the Senate:

No. 18: Providing for an assistant clerk and stenographer for the Joint Committee on Printing.

No. 24: Relating to expenses incident to inspection of printing and binding equipment, etc., under the Public Printer.

No. 25: Relating to the closing of Jackson Alley on account of the Government Printing Office.

L. J. DICKINSON,
WM. S. VARE,
C. D. CARTER,
*Managers on the part of the House.*

Mr. DICKINSON of Iowa. Mr. Speaker, the conference report on this bill has merely to do with various Senate items that were inserted by the Senate. It has to do with adjustment of certain Senate salaries and the rewording of the amendment of $7,500 that was put in for bookcases and other office furniture in the House Office Building.

Mr. MOORE of Virginia. You have retained that amendment, so far as the substance is concerned?

Mr. DICKINSON of Iowa. Absolutely. It is simply a correction as to the meaning of the amendment. There are no items in dispute. The bill includes about $100,000 more than when it passed the House. Twenty-five thousand dollars is for incidental expenses in the Senate; $50,000 is to pay for inquiries and investigations. We put through the same amount usually carried, of $100,000, and the Senate increased it to $200,000, but we split the difference by making it $150,000. They have enough accrued bills on hand to consume a great deal of the excess at the present time. We also increased the item of $25,000 for printing and binding in the Library. That amount is on account of the expectation that new stacks will be built in another year, and that they ought to bind up various volumes that are now on hand that they can not bind under the present appropriation.

I yield two minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Speaker, we have given the United States Senate already $225,000 for their contingent fund, which they have spent in investigations, and the country ought to know that, because we are putting our John Hancocks to this bill when it passes, and in it we are now giving them an additional $100,000 likewise to be spent in investigations.

Mr. DICKINSON of Iowa. The $100,000 is the usual amount carried for these items and $50,000 is for extras.

Mr. BLANTON. Yes; but it is $150,000, after all, carried for them in this bill.

Mr. DICKINSON of Iowa. Yes.

Mr. BLANTON. And we have already given them $225,000 for their contingent fund, which they have spent, and the $225,000 and the $150,000 make $375,000 of the taxpayers' money that they have spent and are to spend elsewhere in this Capitol on investigations, and the people of the country ought to know something about it.

Mr. DICKINSON of Iowa. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. DICKINSON of Iowa. I want to suggest that the $225,000 is for this year, but that this is for the next year.

Mr. BLANTON. Yes; but it becomes available July 1, 1924, and how many new bills will they ask us to pay in addition to this $150,000?

Mr. DICKINSON of Iowa. Nobody knows.

Mr. BLANTON. Nobody knows and there is no way of stopping it. If there were, I would vote to stop it.

Mr. O'CONNELL of New York. Is part of that for the Teapot Dome investigation?

Mr. BLANTON. Yes.

Mr. O'CONNELL of New York. If it is, it is a good investment.

Mr. SEARS of Florida. Is the gentleman going to leave his remarks in the RECORD just as he made them?

Mr. BLANTON. I am going to correct that "John Hancock" reference, which the gentleman has in his mind.

The SPEAKER. The question is on ordering the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Amendment numbered 18: Page 20, line 25, strike out the words and figures "stenographer, $1,740," and insert in lieu thereof the words "assistant clerk and stenographer, $2,100."

Mr. DICKINSON of Iowa. Mr. Speaker, I offer the following motion.

The Clerk read as follows:

Mr. DICKINSON of Iowa moves to recede and concur with an amendment as follows: On page 20 of the bill, line 25, strike out "$9,830" and insert in lieu thereof "$10,190."

Mr. DICKINSON of Iowa. Mr. Speaker, that is for the purpose of correcting the footing.

The SPEAKER. The question is on the motion of the gentleman from Iowa to recede and concur with an amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 24: Page 32 of the bill, line 7, after the word "printer" insert: "For expenses authorized in writing by the Joint Committee on Printing for the inspection of printing and binding equipment, material, and supplies, and Government printing plants in the District of Columbia or elsewhere (not exceeding $1,000)."

Mr. DICKINSON of Iowa. Mr. Speaker, I move to recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 25: Page 30, after line 21, insert: "The Public Printer is hereby authorized to close Jackson Alley in square 624 between G and H Streets NW., in the District of Columbia to the extent that said alley is abutted on both sides by the property of the Government Printing Office, and upon the closing thereof the land so embraced shall be transferred to the Public Printer for the use of the Government Printing Office."

Mr. DICKINSON of Iowa. Mr. Speaker, I move to recede and concur in the Senate amendment.

The motion was agreed to.

FISCAL RELATIONS BETWEEN THE UNITED STATES AND THE DISTRICT OF COLUMBIA

Mr. CRAMTON. Mr. Speaker, I move to suspend the rules and pass the bill (S. 703) making an adjustment of the fiscal relations between the United States and the District of Columbia, as amended, which I send to the desk.

The SPEAKER. The gentleman from Michigan moves to suspend the rules and pass the bill, which the Clerk will report.

The Clerk proceeded to report the bill.

Mr. BLANTON (interrupting the reading). Mr. Speaker, it was tentatively understood that there were not going to be any quorum calls here to-night prior to 11 o'clock, so that noncontroversial bills could be passed. If the gentleman wants that understanding carried out, he ought not to call up a bill like this, because there is going to be a quorum call just as sure as it is called up, and there will be some more before it is passed. He ought not to call up a controversial measure like this, which involves several million dollars, and there is not a dollar of it that is just. I hope the gentleman will withdraw it.

Mr. CRAMTON. Mr. Speaker, I make the point of order that the debate stage is not yet reached.

Mr. BLANTON. Mr. Speaker, the gentleman ought not to call up a bill like that under the circumstances.

The SPEAKER. The gentleman from Texas is out of order.

Mr. BLANTON. Then let us have a quorum to start this. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Texas makes the point of order that there is no quorum present. The Chair will count.

Mr. CRAMTON. Mr. Speaker——

Mr. BLANTON. I withdraw my point of order, Mr. Speaker.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER. The gentleman from Michigan asks unanimous consent to proceed for three minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. Mr. Speaker, I have offered this bill in cooperation with the chairman of my committee [Mr. MADDEN]. We have in the District bill to-day adopted an absolutely new plan with reference to contributions to District expenses, a fixed sum of $9,000,000. Now, in order for that to be of its full benefit and efficiency, it is necessary that it be not merely on one annual appropriation bill but also permanent law, so that the Budget next fall in making up the District estimates may have authority to make them up on the new basis. Unless we put this new arrangement in permanent legislation it will be no authority to the Budget to proceed any differently than before, and we are in a mess——

Mr. FUNK. And the tax levy.

Mr. CRAMTON. And the tax levy and everything else is at sea. Now, the bill I am offering is a consolidation. It takes the surplus bill, because that has already passed the Senate. It has been favorably reported in the District Committee of the House with only the objection of the gentleman from Texas.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. GARRETT of Tennessee. If this is to be a part of the lump-sum plan, why did not the gentleman from Michigan advise us of that at the time that he offered the amendment?

Mr. CRAMTON. It is part of the plan so far as the District appropriation bill goes——

Mr. GARRETT of Tennessee. But the gentleman says now it is necessary to pass it as part of the plan.

Mr. CRAMTON. In order to secure a plan, not in this annual contentious way on an appropriation bill but as permanent law, we are seeking to put it on as a rider on the surplus bill. Personally I am not in favor of the surplus bill as a piece of legislation. I am frank to say it appears to me the surplus bill is legislation that sooner or later is going to pass and I am only trying to use it as a useful vehicle to put the $9,000,000 business in permanent law. Now, my action in offering it to-night is at the request of the chairman of the Committee on Appropriations, and in order that the House may express itself. If, when it comes up, two-thirds do not support it, of course it can not pass. Now, because of the requests which have been made, more or less urgent, I have consented, after consultation with Mr. MADDEN, to withdraw the bill to-night with the understanding it is to be brought up to-morrow very soon after the opening of the session. Mr. Speaker, I withdraw the motion.

Mr. O'CONNELL of New York. Under suspension of the rules?

Mr. CRAMTON. That is the only way to bring it up. Under leave to extend my remarks I insert the following text of the bill in its proposed amended form:

An act (S. 703) making an adjustment of the fiscal relations between the United States and the District of Columbia.

*Be it enacted, etc.*, That pursuant to the report of the Joint Select Committee appointed under the provisions of the act entitled "An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1923, and for other purposes," approved June 29, 1922—

(a) There shall be credited to the general account of the District of Columbia required under the provisions of the first paragraph of such act to be kept in the Treasury Department the following sums:

(1) $7,574,416.90, representing the balance in the general fund in the Treasury for such District on June 30, 1922, and

(2) $665.46, representing an adjustment of certain errors, and

(b) There shall be charged to such account the following sums:

(1) $2,903,219.93, representing the District's proportion of unexpended balances of appropriations on June 30, 1922, together with certain obligations and encumbrances accruing after such date,

(2) $191,890.35, representing the District's proportion of the annual bonus paid to certain employees of the District,

(3) $41,500, representing the District's proportion of the cost of additional land for the National Zoological Park, and

(4) $317.16, representing the District's proportion of an amount appropriated by special act of Congress for the relief of Eldred C. Davis.

Such credits and charges to the general accounts of the District of Columbia shall be made without the payment of interest thereon by either the United States or the District of Columbia; and the making of such credits and charges shall be held to be in full satisfaction of all claims and demands either for or against the United States or the District of Columbia; and the making of such credits and charges shall be held to be in full satisfaction of all claims and demands either for or against the United States or the District of Columbia in respect to the items involved therein.

The sum of $4,438,154.92, representing the difference between such credits and charges, is hereby made permanently available in such account of the District of Columbia for appropriation by the Congress for purchase of land and construction of buildings for public school, playground, and park purposes: *Provided*, That nothing contained in this act shall be construed to deprive the District of Columbia, as of and on June 30, 1922, in addition to the sum named herein, of credit for the surplus of revenues of said District collected and deposited in the Treasury of the United States during the fiscal year 1922, over and above all appropriations and other charges for that year or of credit for the unexpended balances of District of Columbia appropriations covered into the surplus fund by warrant of the Secretary of the Treasury issued on June 30, 1922; or of credit for the proportion the District of Columbia may be entitled to of miscellaneous receipts paid directly into the Treasury during the fiscal year 1922; or of credit for the amount erroneously charged against the revenues of the District for the fiscal year 1922 on account of appropriations made by the third deficiency act, fiscal year 1922, approved July 1, 1922, as the amount of said appropriations were charged against the revenues of the District of Columbia for the fiscal year 1923, totaling the sum of $819,373.83, which is included in the total sum of $2,903,219.93 heretofore mentioned and taken into account in arriving at the net balance of $4,438,154.92, above stated.

SEC. 2. That on and after July 1, 1924, the Government of the United States shall not bear any fixed proportion of the expenses of the District of Columbia, but shall pay the sum of $9,000,000 annually toward defraying such expenses of the District as may be appropriated for by law.

SEC. 3. That on and after such date there shall be credited wholly to the District of Columbia any revenue (not including the proportionate share of the United States in any revenue arising as the result of the expenditure of appropriations made for the fiscal year 1924 and prior fiscal years) now required by law to be credited to the District of Columbia and the United States in the same proportion that each contributed to the activity or source from whence such revenue was derived.

SEC. 4. That nothing contained in this act shall be construed to prevent, until July 1, 1927, the advancements permitted to be made for expenses of the District by the Treasury Department in accordance with the first paragraph of section 1 of the District of Columbia appropriation act, approved June 29, 1922.

Permit me further to insert here the following comparison of the charge upon the Federal Treasury for 1925 under the 60-40 plan and under the $9,000,000 lump sum now adopted:

| | | |
|---|---|---|
| Total of bill as passed Senate | | $29,227,519.00 |
| Total of bill as passed House | | 24,652,697.00 |
| Added by Senate | | 4,574,822.00 |
| Senate recedes from | | 2,772,414.00 |
| House recessions: | | |
| At conference | $1,380,136.00 | |
| Will recommend | 422,272.00 | |
| | | 1,802,408.00 |
| Amount of bill as agreed upon if the House managers' recommendations are agreed to on amendments returned | | 26,455,105.00 |
| Amount of this bill | | 26,455,105.00 |
| District of Columbia items in second deficiency bill: | | |
| Police, fire, school pay, etc | | 2,625,162.21 |
| Items in field service classification bill chargeable against District of Columbia | | 196,886.00 |
| Total appropriations, 1925 | | 29,277,153.21 |
| Total appropriations for 1925 in all bills | | 29,277,153.21 |
| Payable by the United States | | 9,000,000.00 |
| Payable from District revenues, including water revenues and gas tax revenues | | 20,277,153.21 |

COMPARISON OF 60–40 BASIS AND NEW BASIS

| | | |
|---|---|---|
| Total appropriations for 1925 | | 29,277,153.21 |
| Payable from water fund | $1,196,860.00 | |
| Payable wholly from District of Columbia revenues | 186,890.00 | |
| Payable from gas tax fund | 925,000.00 | |
| | | 2,308,750.00 |
| Payable on the basis of 60–40 | | 26,968,403.21 |
| 40 per cent, United States | | 10,787,361.28 |
| 60 per cent, District of Columbia | | 16,181,041.93 |
| Amount payable by United States on 60–40 basis | | 10,787,361.28 |
| Amount payable by United States on lump-sum plan | | 9,000,000.00 |
| Difference | | 1,787,361.28 |
| Amount of estimated revenues surrendered by United States under lump-sum plan | | 700,000.00 |
| Difference in favor of United States under lump-sum method | | 1,087,361.28 |

Further deficiencies to be appropriated for in the next session are inevitable and will amount to from $500,000 to $1,000,000 or more. Under the lump-sum plan that further sum will be borne exclusively by the District while under the 60–40 plan from $200,000 to $400,000 more would have been borne by the Federal Treasury.

Mr. BLANTON. Mr. Speaker, I ask unanimous consent to proceed for a quarter of a minute.

The SPEAKER. The gentleman from Texas asks unanimous consent to proceed for 15 seconds. Is there objection? [After a pause.] The Chair hears none.

Mr. BLANTON. Mr. Speaker and gentlemen of the House, I want every one of you colleagues in the morning, if you will do me the kindness to do so, to read my discussion on this so-called surplus bill which to-night I am printing in the RECORD, and I guarantee not 40 men will vote for it in the morning when the gentleman from Michigan calls it up for passage.

## MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to the bill (S. 1898) reclassifying the salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the amendment of the Senate numbered 6 to the bill (H. R. 7906) to regulate and fix wages for employees of the Government Printing Office.

The message also announced that the Senate had passed the bill (S. 3397) to remit the duty on a carillon of bells to be imported for the Church of Our Lady of the Rosary, Providence R. I., in which the concurrence of the House of Representatives was requested.

The message also announced that the Senate had insisted upon its amendment to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. WARREN, Mr. OVERMAN, and Mr. HARRIS as the conferees on the part of the Senate.

## BANKRUPTCY LAW OF THE UNITED STATES

Mr. SNELL. Mr. Speaker, I submit a privileged report from the Committee on Rules.

The SPEAKER. The gentleman from New York submits a privileged report from the Committee on Rules, which the Clerk will report.

The Clerk read as follows:

House Resolution 353

*Resolved*, That the following subcommittee of the House Committee on the Judiciary duly appointed by that committee, viz: EARL C. MICHENER (chairman), CHARLES A. CHRISTOPHERSON, NATHAN D. PERLMAN, ANDREW J. MONTAGUE, and SAMUEL C. MAJOR, be, and they are hereby, authorized to examine the present bankruptcy law of the United States for the purpose of suggesting amendments thereto, securing improvement in its administration, and perfecting the same as far as possible, and for these ends to have power to subpœna witnesses and make such investigation as they may deem necessary and also to have power to sit during the sessions of the House and after any adjournment or recess of the House and report their recommendations during the next session to the Committee on the Judiciary of the House.

Mr. SNELL. Mr. Speaker, there has been a general demand throughout the whole country for various amendments to our bankruptcy laws. The Committee on the Judiciary, as you all know, is a very busy committee and it has not had the proper time to give study to individual matters necessary to make proper recommendations to the Congress. They have decided to let a subcommittee of their own committee, who are willing, work in their own time and at their own expense this summer to try to bring these laws down to date and make recommendations to Congress the coming fall. All they ask is to have authority to sit during the recess. It costs the country nothing and if anybody wants to work for the public good during the recess of Congress I think they should have that right.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The question was taken, and the resolution was agreed to.

The SPEAKER. A similar resolution on the calendar will be laid on the table.

There was no objection.

## JOINT COMMISSION OF NATIONAL DEFENSE

Mr. SNELL. Mr. Speaker, I have another resolution.

The SPEAKER. The gentleman from New York offers a resolution which the Clerk will report.

The Clerk read as follows:

Concurrent resolution (H. Con. Res. 1) providing for the creation of a Joint Commission on National Defense

*Resolved by the House of Representatives of the United States of America in Congress assembled (the Senate concurring)*, That a joint commission is hereby created, to be known as the Joint Commission on National Defense, which shall consist of five Senators to be appointed by the President of the Senate and five Representatives to be appointed by the Speaker.

It shall be the duty of said commission to investigate and study the most practicable and effective plan to prevent profiteering in time of war upon either the Government or the civilian population; to insure the national defense by the mobilization in time of war of all the resources of the Nation, both human and material; to discourage any tendency to aggressive warfare; and to equalize the burdens and sacrifices of defensive warfare by requiring a just and fair contribution to the national defense by all the forces and factors of national life without war profit to any private individual, corporation, or combination.

The said commission shall report its acts, proceedings, findings, and conclusions to Congress on or before the first Monday in January, 1925. The commission shall include in its report recommendations for legislation which in its opinion will tend to carry out the purposes of this resolution and shall specifically report upon the limitations of the powers of Congress to enact such legislation.

The commission shall elect its chairman and vice chairman, and vacancies occurring in the membership of the commission shall be filled in the same manner as the original appointments.

The commission or any subcommittee of its members is authorized to sit during the sessions or recesses of Congress, to send for persons and papers, to administer oaths, to summon and compel the attendance of witnesses.

Mr. SNELL. Mr. Speaker, this resolution provides for a joint commission of both Houses, whose duty it shall be to study

and investigate the most practical and effective plan to prevent profiteering in time of war upon either the Government or the civilian population; to insure the national defense by the mobilization in time of war of all the resources of the Nation, both human and material; to discourage any tendency to aggressive warfare, and to equalize the burdens and sacrifices of defensive warfare by requiring a just contribution to the national defense by all the factors of our national life. It also provides that this commission shall report back to the House its various recommendations before January 1, 1925.

The first recommendation along this line was made by President Harding, and this recommendation received a most unanimous response throughout the length and breadth of this country; and on account of the study and investigation of some of our own Members, and the introduction of bills along this line, there has been quite a general demand that Congress take notice of this proposition and give cognizance of our interest in the developments along this line. For that reason the Committee on Rules has thought it proper and just to present this resolution at this time.

Mr. MOORE of Virginia. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. MOORE of Virginia. Is this expected to be a part of the Cleveland platform?

Mr. SNELL. It having come from a Democratic Member, I should not think it would be.

Mr. HUDDLESTON. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. HUDDLESTON. Why was this delayed so late in the session? Why is it necessary to do it now? Is war imminent?

Mr. SNELL. I do not know that it is. A great many people desire to have it presented at this time.

Mr. HUDDLESTON. Why is the national defense more relevant at this time than at other times? The gentleman has delayed until now to lay it before the House for its consideration.

Mr. SNELL. It does not require an appropriation. It just permits these people to investigate the question this summer and make a report next fall.

Mr. HUDDLESTON. Well, this resolution is not as innocent as it might be thought to be. There is a purpose behind it.

Mr. SNELL. If there is, I do not know it.

Mr. HUDDLESTON. I would like to know what the purpose is. I would like to know who really advised that.

Mr. McSWAIN. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. McSWAIN. The gentleman from Alabama [Mr. HUDDLESTON] asked if there is any purpose behind it. I want to say that so far as I know, the purpose is to equalize the burdens of war, so that my children and grandchildren, and yours, if they have to meet the issues that we have had to meet, may meet them with some degree of equity, so that just as America stands on the proposition of equality in time of peace, that there shall be equal rights and special privileges to none, so in time of war there shall be equal sacrifices and equal burdens imposed on all. [Applause.]

Mr. HUDDLESTON. Mr. Speaker, will the gentleman yield?

Mr. SNELL. I will yield to the gentleman from Alabama.

Mr. HUDDLESTON. It is quite evident to me that the Committee on Military Affairs has all the jurisdiction needed to investigate the subject and that there exists no real reason along the line indicated by the gentleman from South Carolina [Mr. McSWAIN] for appointing this commission. The real fact is, as I deduce, that the purpose of appointing this commission is to afford an instrumentality of propaganda and to exercise and advocate it between now and the beginning of the next Congress. The gentleman is providing, as I understand, for the conscription of human labor and all kinds of human material. He may think he is fighting for the conscription of property, but if he expects to get anywhere, I want to say to him that he wants to abandon that portion of the program. And let me say to the gentleman that there is a considerable body of people in the country who are opposed to the conscription of labor and the conscription of human material. Anyhow, there are some of us who are opposed to the conscription of men in time of war, and I for one am altogether opposed to the bringing in here, in the last moment of Congress, of a bill without proper investigation to provide an agency of propaganda such as the gentleman entertains. [Applause.] I think the gentleman ought to give us some time for debate on this question.

Mr. TREADWAY. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. TREADWAY. I understood the gentleman to say, in the course of his brief explanation, that there was a great general demand for this sort of an inquiry. I try to keep up with the times, but I confess that that general demand has overshadowed my information, and I would be glad to know where it is.

Mr. SNELL. There is a general demand all over the country.

Mr. HUDDLESTON. Mr. Speaker, I am unwilling that this should be done without a quorum. I make the point of order that a quorum is not present in the House.

Mr. LONGWORTH. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The gentleman from Ohio moves——

Mr. LONGWORTH. I understand that there is no possibility of a conference report being reported to-night.

Mr. MOORE of Virginia. I ask the gentleman not to press that. A large number of Members will be here after a while. I do not think there will be any difficulty.

Mr. LONGWORTH. Mr. Speaker, I was not aware that such a controversial subject would be brought up.

Mr. SNELL. I will say I did not know there was any controversy about it. Mr. Speaker, I did not understand this bill was going to cause so much trouble.

The SPEAKER. Does the gentleman from Alabama withdraw his point of no quorum?

Mr. HUDDLESTON. Temporarily I withdraw it.

Mr. SNELL. I think we had better withdraw this resolution. It is nothing in which I am especially interested myself.

The SPEAKER. The gentleman withdraws the resolution, and the gentleman from Maine [Mr. HERSEY] is recognized.

### PROBATION SYSTEM IN THE UNITED STATES COURTS

Mr. HERSEY. Mr. Speaker, I move to suspend the rules and pass S. 1042, to provide for the establishment of a probation system in the United States courts, except in the District of Columbia.

The SPEAKER. The gentleman from Maine moves to suspend the rules and pass a Senate bill, which the Clerk will report.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the courts of the United States having original jurisdiction of criminal actions, except in the District of Columbia, when it shall appear to the satisfaction of the court that the ends of justice and the best interests of the public, as well as the defendant, will be subserved thereby, shall have power, after conviction or after a plea of guilty or nolo contendere, for any crime or offense not punishable by death or life imprisonment, to suspend the imposition or execution of sentence and to place the defendant upon probation for such period and upon such terms and conditions as they may deem best; or the court may impose a fine and may also place the defendant upon probation in the manner aforesaid. The court may revoke or modify any condition of probation, or may change the period of probation: *Provided*, That the period of probation, together with any extension thereof, shall not exceed five years.

While on probation the defendant may be required to pay in one or several sums a fine imposed at the time of being placed on probation and may also be required to make restitution or reparation to the aggrieved party or parties for actual damages or loss caused by the offense for which conviction was had, and may also be required to provide for the support of any person or persons for whose support he is legally responsible.

SEC. 2. That when directed by the court, the probation officer shall report to the court, with a statement of the conduct of the probationer while on probation. The court may thereupon discharge the probationer from further supervision and may terminate the proceedings against him, or may extend the probation, as shall seem advisable.

At any time within the probation period the probation officer may arrest the probationer without a warrant, or the court may issue a warrant for his arrest. Thereupon such probationer shall forthwith be taken before the court. At any time after the probation period, but within the maximum period for which the defendant might originally have been sentenced, the court may issue a warrant and cause the defendant to be arrested and brought before the court. Thereupon the court may revoke the probation or the suspension of sentence and may impose any sentence which might originally have been imposed.

SEC. 3. That the judge of any United States court having original jurisdiction of criminal actions, except in the District of Columbia, may appoint one or more suitable persons to serve as probation officers within the jurisdiction and under the discretion of the judge making such appointment or of his successor. All such probation officers shall serve without compensation, except that in case it shall appear to any such judge that the needs of the service require that there should be

a salaried probation officer, such judge may appoint one such officer and shall fix the salary of such officer, subject to the approval of the Attorney General in each case: *Provided*, That probation officers who are to receive salaries shall be appointed after competitive examination held in accordance with the laws and regulations of the civil service of the United States. Such judge may, in his discretion, remove any probation officer serving in his court. The appointment of probation officers shall be in writing, and shall be entered on the records of the court of the judge making such appointment, and a copy of the order of appointment shall be delivered to the officer so appointed. Such court may allow any probation officer his actual expenses necessarily incurred in the performance of his duties. Such salary and expenses when duly approved shall be paid from the appropriations for the courts in which such officer serves.

SEC. 4. That it shall be the duty of a probation officer to investigate any case referred to him for investigation by the court in which he is serving and to report thereon to the court. The probation officer shall furnish to each person released on probation under his supervision a written statement of the conditions of probation and shall instruct him regarding the same. Such officer shall keep informed concerning the conduct and condition of each person on probation under his supervision and shall report thereon to the court placing such person on probation. Such officer shall use all suitable methods, not inconsistent with the conditions imposed by the court, to aid persons on probation and to bring about improvement in their conduct and condition. Each officer shall keep records of his work; shall keep accurate and complete accounts of all moneys collected from persons under his supervision; shall give receipts therefor, and shall make at least monthly returns thereof; shall make such reports to the Attorney General as he may at any time require; and shall perform such other duties as the court may direct. A probation officer shall have the power of arrest that is now exercised by a deputy marshal.

SEC. 5. That this act shall take effect immediately.

Mr. WOLFF. Mr. Speaker, I demand a second.

Mr. HERSEY. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. Without objection, a second is considered as ordered.

There was no objection.

Mr. HERSEY. Gentlemen, this is a bill from the Judiciary Committee, unanimously reported. It passed the Senate unanimously without debate and is a very plain bill. You who have the report and have read it will understand that it is to allow the Federal courts the same power to put persons on probation that the State courts have. There is scarcely a State in the Union which does not have a probation law.

Mr. WOLFF. Will the gentleman yield?

Mr. HERSEY. I do not yield.

Mr. WOLFF. Mr. Speaker, this is a very important bill, and I question whether there is a quorum present. I make the point of order that there is no quorum present.

Mr. LONGWORTH. Mr. Speaker, will the gentleman yield?

Mr. WOLFF. I will.

Mr. LONGWORTH. It appears from what I can learn that there are no matters of very grave importance to come up to-night except that a number of gentlemen are interested in the consideration of the Private Calendar, particularly with regard to Senate bills. If the gentleman persists in his point of order, I would not feel justified in asking for a call of the House. If the gentleman will not insist on his point of order, I shall be glad to ask that we consider Senate bills on the Private Calendar, and this will be our last opportunity.

Mr. MOORE of Virginia. May I ask the gentleman from Ohio, in the event the point of no quorum is not pressed, why should we not proceed with the consideration of the Consent Calendar or bills that may be taken up under suspension of the rules? A good many of us are very much interested, and we have had assurances we would be given an opportunity to take up the calendar.

Mr. LONGWORTH. The trouble with the Consent Calendar is that a number of the bills are not in order because they have not been on the calendar a sufficient length of time.

Mr. MOORE of Virginia. They can be considered, of course, by unanimous consent.

Mr. WOLFF. Mr. Speaker, I withdraw the point of order temporarily.

Mr. HERSEY. I was saying, gentlemen, that there is no Federal law which gives the presiding judge a right to put a party on probation on the first offense, whether it be a boy, a girl, or an adult. A judge can not refuse to sentence, the sentence must be carried out, and the person go to jail, when many a boy, girl, and young man have been saved from a life of crime by being put on probation. Our probation laws, as you will see from the hearings we have held, have paid all the expenses of putting the person convicted in charge of a probation officer.

Mr. BLANTON. Will the gentleman yield?

Mr. HERSEY. I will.

Mr. BLANTON. If the gentleman has in mind only the young boys of the country, why does not he limit his bill to the young boys? You can take a thug who has never been caught before, or any kind of a hardened bootlegger, and under this bill, no matter how old he is, the judge can put him on probation; and you are going to have more bootleggers over the country escaping punishment than was ever dreamed of by even as good a prohibitionist as the distinguished gentleman from Maine.

Mr. O'CONNELL of New York. Surely not after the legislation we passed yesterday.

Mr. BLANTON. I am surprised that the gentleman would be sponsor of such a bill.

Mr. HERSEY. The judges of the Federal court are all in favor of the bill, and I do not think they are of that caliber that they would want to abuse it in any way; that is, by putting a man on probation who is a hardened criminal. This only applies to the first offense and gives discretion to the court. I do not understand that any harm has been done in our State courts by using the same methods.

Mr. BLANTON. But in our State courts they are limited to boys under 21 years of age.

Mr. HERSEY. Oh, they are not.

Mr. BLANTON. In many of them they are. In my State they are limited to certain ages. This is the first time I ever heard of a bill that had no limit in it.

Mr. HERSEY. If the gentleman will read the memoranda in support of this bill by Senator COPELAND, who fully explains it, and if the gentleman will turn to page 5 of the report on the bill and see the indorsements of the bill from all over the Nation and the opinions of the district judges, I do not think he would be opposed to it.

Mr. BLANTON. I heard as distinguished a Representative as the gentleman from Chicago, in whose city there has recently been a most diabolical crime committed, urging us to do away with the death penalty. You can find lots of indorsements to keep down punishment. The human heart is such that we are sympathizing with criminals all the time instead of being severe with them and stopping crime by the severity of the punishment.

Mr. HERSEY. This does not apply to death sentences or life imprisonments; it only suspends the execution of the sentence and puts the party on probation under the court. It is all under the court. An officer of the law takes care of the party put on probation, and he is under an officer of the law who has sworn to carry out the law.

Mr. BLANTON. How many probation officers are you going to have over the country?

Mr. HERSEY. This provides that they need not have any more than the present probation officers, and it is limited to one officer in any one court.

Mr. BLANTON. Would the gentleman accept an amendment to the bill requiring the officer to live in Maine and nowhere else?

Mr. HERSEY. No; the gentleman has no authority for that.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. HERSEY. Yes.

Mr. WILLIAMSON. Does the bill that the gentleman has before him provide that the authority to parole shall extend only to first offenders?

Mr. HERSEY. Yes; this only applies to first offenders.

Mr. BLACK of New York. Will the gentleman yield?

Mr. HERSEY. I yield.

Mr. BLACK of New York. Does the bill by its provisions provide that the probation officers shall report to the judge, between the time of conviction and the time of sentence, recommendations as to the sentence?

Mr. HERSEY. It does. I reserve the balance of my time, Mr. Speaker.

Mr. WOLFF. Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Speaker, I am not for this bill, and I hope the House will not adopt it, for it will prove to be a death stab at law enforcement. It is not only the severity of punishment that deters criminals but it is the surety and the certainty of punishment. It is the certainty of punishment more than anything else that deters criminals from committing crime.

Judges, after all, are human beings. They have their friends, they have their neighbors, and they are under an environment

just like we are and like everyone else. A Federal judge will have a distinguished neighbor sometimes to come before him, or the son of a distinguished friend may come into his court to be tried for offenses. Have you ever sat on the bench and tried a man for crime, and after he has been convicted, have the citizenship of the country coming to you urging that you grant him a new trial? Have you ever experienced that? Well, you will force that on trial judges under this bill if you permit this probation business to be enacted into law, and some courts over the country will probably let numerous kinds of criminals escape.

Mr. HERSEY. Will the gentleman yield?

Mr. BLANTON. Yes; I yield.

Mr. HERSEY. We have a probation law in the District of Columbia and in 24 of the States of the Union, and I do not know but what you have such a law in your own State.

Mr. BLANTON. Concerning this city, my distinguished friend from Illinois [Mr. RATHBONE] and four of his colleagues to-day have filed a report to Congress showing that the law is not enforced in the District of Columbia. [Applause.] We have made in that report a dozen recommendations to the courts and to the district attorney here for him to get busy and see that the law is enforced. I will say here to-night that I know of no place in the United States besides the District of Columbia where the law is overlooked as much; and if you want the law overlooked everywhere else, and if the gentleman from Maine wants bootleggers turned loose in Philadelphia, in New York, in Baltimore, and in Chicago, just pass this bill.

Mr. O'CONNELL of New York. And in Texas.

Mr. BLANTON. You will have lots of bootleggers turned loose as fast as they can be convicted in some courts, and the district attorneys of this land will cease to function. They will become discouraged. They will feel it is no use to make an effort to convict criminals when the judge can turn them loose on probation. [Applause.]

I hope this Congress will not pass any such law as this.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. I yield.

Mr. SCHAFER. Have you got any criminals and bootleggers in Texas and Abilene?

Mr. BLANTON. Yes; and the able courts down there when the criminals are convicted put them in the jails or in the penitentiaries for substantial terms.

Mr. SCHAFER. Will the gentleman yield for an observation?

Mr. BLANTON. Yes.

Mr. SCHAFER. I just want to call the gentleman's attention to the fact that perhaps he inadvertently forgot to mention Abilene and Texas in his speech; and inasmuch as the gentleman's speech might be sent out for home consumption, I thought that ought to be put in.

Mr. BLANTON. The splendid, cultured, educational city of Abilene, Tex., is known to every person in the United States, and I do not have to mention it. [Applause.]

Mr. HOLADAY. Mr. Speaker, I ask unanimous consent to ask the gentleman from Maine [Mr. HERSEY] a question. Can the gentleman point out in this bill where it is limited to first offenders? In what section of the bill is that limitation?

Mr. HERSEY. It appears in the hearings that in all probation enforcement they never put a man on probation unless he is a first offender, and that is true all over the United States.

Mr. HOLADAY. I do not find any such limitation here.

Mr. MICHENER. Will my colleague yield?

Mr. HERSEY. Yes.

Mr. MICHENER. This is not the bill reported by the Judiciary Committee, is it?

Mr. HERSEY. This is the Senate bill.

Mr. MICHENER. And it is not the bill we reported?

Mr. HERSEY. No.

Mr. GRAHAM of Illinois. And this bill applies to any offender?

Mr. MICHENER. And you have asked the House to pass this bill instead of the bill which the Judiciary Committee reported.

Mr. WOLFF. Mr. Speaker, I yield five minutes to the gentleman from Virginia [Mr. WOODRUM].

Mr. WOODRUM. Mr. Speaker and gentlemen of the House, this bill seems to me to grant almost carte blanche pardoning power to the Federal judges of the United States. Some references has been made here to-night to State laws on suspended sentences. In the State of Virginia we have laws that permit courts to suspend sentences in certain cases, minor offenses, misdemeanors, or something of that sort, but this bill does not confine the class of offenses to trivial offenses; but you might take a thug who had robbed a national bank and convict him under the Federal laws, and under this bill the Federal judge would have the right to practically pardon him by putting him out on probation, if he saw fit to do so.

In my humble judgment if you pass this bill you might as well do away with criminal trials in the Federal courts. [Applause.] Everybody knows what pressure is brought to bear on a judge. I have served as a judge in my native State. Everybody knows the pressure brought to bear on a judge when you give the right to exercise the pardoning power. It ought never to be given to a judge. A man ought never to be placed in the position where he will have the sentimental appeal brought to bear upon him to exercise such authority. You give a Federal judge—and I do not mean to cast any aspersions upon the Federal judges—but you give them the power to practically pardon a criminal and you strike a mighty blow at law enforcement in this land. I hope the bill will be overwhelmingly defeated.

The gentleman from Maine said it applied to first offenders. I have read the bill through, and I am unable to find where it makes any reference to the class of offenders.

Mr. BARKLEY. It provides that the probation shall not exceed 5 years, whereas the penalty might be 20 years, so where the penalty is suspended the probation can only last for 5 years.

Mr. WOODRUM. Exactly, and when a bootlegger is convicted, no matter how aggravating the circumstances, you may have the outraged spectacle of a Federal judge putting that bootlegger in the care and custody of some other bootlegger who had been appointed a probation officer.

Mr. BOYLAN. Will the gentleman yield?

Mr. WOODRUM. Yes.

Mr. BOYLAN. What is the idea of picking on the poor bootlegger? [Laughter.] There are other crimes besides bootlegging.

Mr. BLANTON. Is the gentleman from New York in sympathy with them?

Mr. BOYLAN. I have sympathy for any man convicted of crime, because in many cases I think he needs medical treatment rather than imprisonment. Probation, if I may be permitted to say, has worked out very well in many of the States. Why should not it work very well here?

Mr. WOODRUM. I think myself that probation is a great thing for enforcing the law, and I am in sympathy with it. I think that perhaps a bill might be drafted—although I doubt it—a bill might be drafted with proper limitations for probation in the Federal court in certain cases. I myself have seen cases in the Federal court where I would have been glad to have exercised a little power, but do not give the Federal judges any such power as this.

Mr. HERSEY. Mr. Speaker, I understand that to-night we are not to bring up any controversial questions. I did not know that this bill would excite any such controversy, and I ask unanimous consent that the bill be withdrawn and stand on the calendar. [Applause.]

The SPEAKER. The gentleman from Maine asks unanimous consent to withdraw the bill. Is there objection?

There was no objection.

Mr. LONGWORTH. Mr. Speaker, I suggest that the Chair call the Unanimous Consent Calendar as it stands.

The SPEAKER. The Chair will first recognize the gentleman from Pennsylvania [Mr. WYANT].

Mr. WYANT. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 1614) to repeal an act authorizing the construction of bridges across the Great Kanawha River.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the act of Congress entitled "An act to authorize the construction of bridges across the Great Kanawha River below the falls, and to prescribe the dimensions of the same," approved March 3, 1887, be, and the same is, hereby repealed.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

CONSENT CALENDAR

The SPEAKER. The Clerk will call the Consent Calendar.

TO AMEND THE CHINA TRADE ACT

The first bill on the Consent Calendar was the bill (H. R. 7190) to amend the China trade act of 1922.

Mr. DYER. Mr. Speaker, I had an agreement with the gentleman from Texas not to take that up in his absence, and I ask unanimous consent that it be passed without prejudice.

The SPEAKER. Is there objection?

There was no objection.

AIR MAIL SERVICE

The next business on the Consent Calendar was the bill (H. R. 3261) to authorize and provide for the payment of the amount expended in the construction of hangars and the maintenance of flying fields for the use of the Air Mail Service of the Post Office Department.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

Mr. BEGG. I object.

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent that that bill may retain its place on the calendar.

The SPEAKER. Is there objection?

There was no objection.

TO AMEND THE JUDICIAL CODE

The next business on the Consent Calendar was the bill (H. R. 64) to amend section 101 of the Judicial Code, as amended.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. BLANTON. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. The gentleman from Texas asks unanimous consent that the bill may be passed over without prejudice. Is there objection?

There was no objection.

TRANSPORTATION OF LABOR FROM ONE STATE TO ANOTHER

The next business on the Consent Calendar was the bill (H. R. 7698) to regulate the transportation and importation of labor from one State to any point in another State where a labor disturbance or strike is then in progress.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BEGG. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice. There were three or four objections to this the other night.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

ELDORADO NATIONAL FOREST, CALIF.

The next business on the Consent Calendar was the bill (H. R. 5555) to include certain lands in the county of Eldorado, Calif., in the Eldorado National Forest, Calif., and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BEGG. Mr. Speaker, I object.

FORT DUCHESNE RESERVATION, UTAH

The next business on the Consent Calendar was the bill (S. 667) granting to the State of Utah the Fort Duchesne Reservation for its use as a branch agricultural college.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. COLTON. Mr. Speaker, I ask unanimous consent that that bill be passed over without prejudice, to retain its place on the calendar.

The SPEAKER. Is there objection?

There was no objection.

CLAIMS UNDER WAR MINERALS ACT

The next business on the Consent Calendar was the bill (S. 2797) to authorize the payment of claims under the provisions of the so-called war minerals relief act.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLANTON. Mr. Speaker, I object.

Mr. VAILE. Mr. Speaker, that bill is in the wrong place on the calendar. It appears later on the calendar.

Mr. BLANTON. Mr. Speaker, this is one of the most controversial matters on the calendar.

Mr. VAILE. I understand, but if the gentleman will withdraw his objection for a moment, I will say that to-night it will take three objectors, because it is in the latter part of the calendar, and was objected to last night. It is in the wrong place here.

The SPEAKER. The Chair does not understand. Does the Chair understand that the same bill appears twice on the calendar?

Mr. VAILE. Mr. Speaker, last night this bill was objected to, and after it was objected to I filed the usual notice and put it back on the calendar, where it appears at a later place.

The SPEAKER. Then it should be stricken from the calendar in this place.

Mr. BLANTON. Mr. Speaker, but there was a request, if I remember correctly, that it be placed back on the calendar without prejudice.

Mr. VAILE. Oh, no; I objected to that request.

The SPEAKER. The bill will be stricken from the calendar at this place.

TO EQUALIZE THE PAY OF RETIRED OFFICERS OF ARMY, NAVY, ETC.

The next business on the Consent Calendar was the bill (H. R. 5097) to equalize the pay of retired officers of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BEGG. Mr. Speaker, I object.

Mr. BLANTON. Mr. Speaker, I object.

Mr. HULL of Iowa. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection.

ELDORADO NATIONAL FOREST, CALIF.

The next business on the Consent Calendar was the bill (H. R. 104) for the inclusion of certain lands in the Eldorado National Forest, Calif., and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. BEGG. Mr. Speaker, I object.

SHASTA NATIONAL FOREST, CALIF.

The next business on the Consent Calendar was the bill (H. R. 106) for the inclusion of certain lands in the Shasta National Forest, Calif., and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SCHAFER. Mr. Speaker, I object.

TAHOE NATIONAL FOREST, CALIF. AND NEV.

The next business on the Consent Calendar was the bill (H. R. 107) for the inclusion of certain lands in the Tahoe National Forest, in the States of California and Nevada, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. PERLMAN. Mr. Speaker, I object.

RELIEF OF CERTAIN CUSTOMS EMPLOYEES AT PHILADELPHIA

The next business on the Consent Calendar was the bill (H. R. 2858) for the relief of certain customs employees at the port of Philadelphia who served as acting customs guards during the war emergency.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLANTON. I object.

OMAHA INDIANS OF NEBRASKA

The next business on the Consent Calendar was the bill (H. R. 8965) for the relief of the Omaha Indians of Nebraska.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FREE. Mr. Speaker, I object.

RUSSIAN RAILWAY SERVICE CORPS

The next business on the Consent Calendar was the bill (S. 1557) to give military status and discharges to members of the Russian Railway Service Corps, organized by the War Department under authority of the President of the United States for service during the war with Germany.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. JAMES. Mr. Speaker, I object.

MAINTENANCE OF FLYING FIELD, AIR MAIL SERVICE, POST OFFICE DEPARTMENT

The next business on the Consent Calendar was the bill (S. 1051) to authorize and provide for the payment of the amounts expended in the construction of hangars and the maintenance

of flying fields for the use of the Air Mail Service of the Post Office Department.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CLARKE of New York. Mr. Speaker, I object.

TO INCORPORATE THE AMERICAN WAR MOTHERS

The next business on the Consent Calendar was the bill (H. R. 9095) to incorporate the American War Mothers.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. UNDERHILL. Mr. Speaker, I object.

APPEALS IN ADMIRALTY CASES

The next business on the Consent Calendar was the bill (H. R. 9162) to amend section 128 of the Judicial Code relating to appeals in admiralty cases.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. HOWARD of Nebraska. Mr. Speaker, I object.

AMENDING SECTION 5147, REVISED STATUTES

The next business on the Consent Calendar was the bill (S. 2209) to amend section 5147 of the Revised Statutes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. CONNALLY of Texas. Reserving the right to object——

Mr. WOLFF. Mr. Speaker, I object.

WRITS OF ERROR

The next business on the Consent Calendar was the bill (S. 2693) in reference to writs of error.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. WOLFF. Mr. Speaker, I object. Mr. Speaker, I think when we are considering this bill there ought to be a quorum here, and I question the presence of a quorum to-night. I make the point of order of no quorum, and I insist on my point of order.

The SPEAKER. The Chair had almost counted a quorum. Two hundred and seventeen Members are present, a quorum. The Clerk will report the next bill.

CLAIMS OF THE DELAWARE INDIANS

The next business on the Consent Calendar was the bill (H. R. 3913) to refer the claims of the Delaware Indians to the Court of Claims, with the right of appeal to the Supreme Court of the United States.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. FREE. Mr. Speaker, I object.

RESTORATION OF THE LEE MANSION IN THE ARLINGTON NATIONAL CEMETERY

The next business on the Consent Calendar was the joint resolution (H. J. Res. 264) authorizing the restoration of the Lee Mansion in Arlington National Cemetery, Va.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection?

Mr. WOLFF. Mr. Speaker, I object. Mr. Speaker, I withdraw the objection.

Mr. STEPHENS. I object.

Mr. CRAMTON. Mr. Speaker, I ask that the bill be allowed to retain its place on the calendar.

The SPEAKER. The gentleman from Michigan asks that the bill be passed without prejudice. Is there objection? [After a pause.] The Chair hears none.

QUARTERS, FUEL, AND LIGHT FOR THE EMPLOYEES OF THE INDIAN FIELD SERVICE

The next business on the Consent Calendar was the bill (S. 2799) to provide quarters, fuel, and light for employees of the Indian field service.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. BEGG. Mr. Speaker, I object.

Mr. HASTINGS. Will the gentleman withhold his objection for a moment? May I have the attention of the gentleman from Ohio? This is a bill that provides for fuel, light, and quarters for employees in the Indian Service out in the field. It is a Senate bill, and it is a bill in which the department is very much interested, and it is a bill in which the chairman of the committee, Mr. SNYDER, is very much interested.

Mr. BEGG. I will withdraw the objection to this bill.

Mr. HASTINGS. I thank the gentleman.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Interior, in his discretion, may allow quarters, fuel, and light to employees of the Indian Service whose compensation is not prescribed by law, the salaries of such employees to be fixed on this basis and the cost of providing quarters, fuel, and light to be paid from any funds which are applicable and available therefor: *Provided*, That this authorization shall be retroactive to the extent of approving any expenditures for such purposes heretofore authorized by the Secretary of the Interior.

The bill was ordered to be read a third time, was read the third time, and passed.

WASHINGTON GAS LIGHT CO.

The next business on the Consent Calendar was the bill (S. 2848) to validate an agreement between the Secretary of War, acting on behalf of the United States, and the Washington Gas Light Co.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. HOWARD of Nebraska. Mr. Speaker, reserving the right to object, I wish somebody would tell me what it is.

Mr. SHALLENBERGER. Mr. Speaker, I object.

AMENDING TRADE-MARK ACT OF 1905

The next business on the Consent Calendar was the bill (S. 3324) to amend section 5 of the trade-mark act of 1905, as amended, relative to the unauthorized use of portraits.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. McCLINTIC. Mr. Speaker, reserving the right to object, I would like to ask somebody acquainted with the merits of this bill to make an explanation.

Mr. PERKINS. Mr. Speaker, I would be very glad to inform the gentleman. The only purpose is to prevent the registration for trade-mark purposes of portraits of a deceased President during the lifetime of his widow.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the fourth proviso of subdivision (b) of section 5 of the act entitled "An act to authorize the registration of trade-marks used in commerce with foreign nations or among the several States or with Indian tribes, and to protect the same," approved February 20, 1905, as amended, is amended to read as follows: "*Provided further*, That no portrait of a living individual may be registered as a trade-mark except by the consent of such individual, evidenced by an instrument in writing, nor may the portrait of any deceased President of the United States be registered during the life of his widow, if any, except by the consent of the widow evidenced in such manner."

The SPEAKER. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The SPEAKER. The Clerk will report the next one.

VALIDATION OF CERTAIN AGREEMENTS FOR ARBITRATION

The next business on the Consent Calendar was the bill (H. R. 646) to make valid and enforceable written provisions or agreements for arbitration of disputes arising out of contracts, maritime transactions, or commerce among the States or Territories or with foreign nations.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. WOLFF. I object, Mr. Speaker.

Mr. MILLS. Will the gentleman withhold his objection for a moment?

Mr. BLANTON. I hope the gentleman from New York will explain the bill.

Mr. WOLFF. I will withhold my objection.

Mr. MILLS. I will be glad to explain it.

Mr. HOWARD of Nebraska. The bill looks to me as though it were all right.

Mr. MILLS. This bill provides that where there are commercial contracts and there is disagreement under the contract, the court can force an arbitration agreement in the same way as other portions of the contract.

Mr. DYER. The result of such a bill will be to do away with a lot of expensive litigation.

Mr. TILSON. I call attention to the fact that it takes three objections.

Mr. SHALLENBERGER. Mr. Speaker, the chairman of the committee has made satisfactory explanation to me, and I withdraw my objection to Calendar No. 396.

Mr. BLANTON. I did not make any objection on the explanation of the bill.

The SPEAKER. Is there objection to the consideration of this bill, H. R. 646?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That "maritime transactions," as herein defined, means charter parties, bills of lading of water carriers, agreements relating to wharfage, supplies furnished vessels or repairs to vessels, collisions, or any other matters in foreign or interstate commerce which, if the subject of controversy, would be embraced within admiralty jurisdiction; "commerce," as herein defined, means commerce among the several States or with foreign nations, or in any Territory of the United States or in the District of Columbia, or between any such Territory and another, or between any such Territory and any State or foreign nation, or between the District of Columbia and any State or Territory or foreign nation, but nothing herein contained shall apply to contracts of employment of seamen, railroad employees, or any other class of workers engaged in foreign or interstate commerce.

SEC. 2. That a written provision in any contract or maritime transaction or transaction involving commerce to settle by arbitration a controversy thereafter arising between the parties out of such contract or transaction, or the refusal to perform the whole or any part thereof, or an agreement in writing to submit to arbitration an existing controversy arising out of such a contract, transaction, or refusal, shall be valid, irrevocable, and enforceable, save upon such grounds as exist at law or in equity for the revocation of any contract.

SEC. 3. That if any suit or proceeding be brought in any of the courts of the United States upon any issue referable to arbitration under an agreement in writing for such arbitration, the court in which such suit is pending, upon being satisfied that the issue involved in such suit or proceeding is referable to arbitration under such an agreement, shall on application of one of the parties stay the trial of the action until such arbitration has been had in accordance with the terms of the agreement, providing the applicant for the stay is not in default in proceeding with such arbitration.

SEC. 4. That a party aggrieved by the alleged failure, neglect, or refusal of another to arbitrate under a written agreement for arbitration may petition any court of the United States which, save for such agreement, would have jurisdiction under the judicial code at law, in equity, or in admiralty of the subject matter of a suit arising out of the controversy between the parties, for an order directing that such arbitration proceed in the manner provided for in such agreement. Five days' notice in writing of such application shall be served upon the party in default. Service thereof shall be made in the manner provided by law for the service of summons in the jurisdiction in which the proceeding is brought. The court shall hear the parties, and upon being satisfied that the making of the agreement for arbitration or the failure to comply therewith is not in issue, the court shall make an order directing the parties to proceed to arbitration in accordance with the terms of the agreement. If the making of the arbitration agreement or the failure, neglect, or refusal to perform the same be in issue, the court shall proceed summarily to the trial thereof. If no jury trial be demanded by the party alleged to be in default, or if the matter in dispute is within admiralty jurisdiction, the court shall hear and determine such issue. Where such an issue is raised, the party alleged to be in default may, except in cases of admiralty, on or before the return day of the notice of application, demand a jury trial of such issue, and upon such demand the court shall make an order referring the issue or issues to a jury in the manner provided by law for referring to a jury issues in an equity action or may specially call a jury for that purpose. If the jury find that no agreement in writing for arbitration was made or that there is no default in proceeding thereunder, the proceeding shall be dismissed. If the jury find that an agreement for arbitration was made in writing and that there is a default in proceeding thereunder, the court shall make an order summarily directing the parties to proceed with the arbitration in accordance with the terms thereof.

SEC. 5. That if in the agreement provision be made for a method of naming or appointing an arbitrator or arbitrators or an umpire, such method shall be followed; but if no method be provided therein, or if a method be provided and any party thereto shall fail to avail himself of such method, or if for any other reason there shall be a lapse in the naming of an arbitrator or arbitrators or umpire, or in filling a vacancy, then, upon the application of either party to the controversy, the court shall designate and appoint an arbitrator or arbitrators or umpire, as the case may require, who shall act under the said agreement with the same force and effect as if he or they had been specifically named therein; and unless otherwise provided in the agreement the arbitration shall be by a single arbitrator.

SEC. 6. That any application to the court hereunder shall be made and heard in the manner provided by law for the making and hearing of motions, except as otherwise herein expressly provided.

SEC. 7. That the arbitrators selected either as prescribed in this act or otherwise, or a majority of them, may summon in writing any person to attend before them or any of them as a witness and in a proper case to bring with him or them any book, record, document, or paper which may be deemed material as evidence in the case. The fees for such attendance shall be the same as the fees of witnesses before masters of the United States courts. Said summons shall issue in the name of the arbitrator or arbitrators, or a majority of them, and shall be signed by the arbitrators, or a majority of them, and shall be directed to the said person and shall be served in the same manner as subpœnas to appear and testify before the court; if any person or persons so summoned to testify shall refuse or neglect to obey said summons, upon petition the United States court in and for the district in which such arbitrators, or a majority of them, are sitting may compel the attendance of such person or persons before said arbitrator or arbitrators, or punish said person or persons for contempt in the same manner now provided for securing the attendance of witnesses or their punishment for neglect or refusal to attend in the courts of the United States.

SEC. 8. That if the basis of jurisdiction be diversity of citizenship between citizens of several States or one of the parties be a foreign State, citizen, or subject, the district court or courts which would have jurisdiction if the matter in controversy exceeded, exclusive of interest and costs, the sum or value of $3,000, shall have jurisdiction to proceed hereunder notwithstanding the amount in controversy is unascertained or is to be determined by arbitration.

SEC. 9. That if the basis of jurisdiction be a cause of action otherwise justiciable in admiralty, then, notwithstanding anything herein to the contrary, the party claiming to be aggrieved may begin his proceeding hereunder by libel and seizure of the vessel or other property of the other party according to the usual course of admiralty proceedings, and the court shall then have jurisdiction to direct the parties to proceed with the arbitration and shall retain jurisdiction to enter its decree upon the award.

SEC. 10. That the award in any case must be in writing and acknowledged or proved in like manner as a deed for the conveyance of real estate in the State or district where the award is made and delivered to the parties or their attorneys. If the parties in their agreement have agreed that a judgment of the court shall be entered upon the award made pursuant to the arbitration, and shall specify the court, then at any time within one year after the award is made any party to the arbitration may apply to the court so specified for an order confirming the award, and thereupon the court must grant such an order, unless the award is vacated, modified, or corrected as prescribed in the next two sections. If no court is specified in the agreement of the parties, then such application may be made to the United States court in and for the district within which such award was made. Notice of the application shall be served upon the adverse party, and thereupon the court shall have jurisdiction of such party as though he had appeared generally in the proceeding. If the adverse party is a resident of the district within which the award was made, such service shall be made upon the adverse party or his attorney as prescribed by law for service of notice of motion in an action in the same court. If the adverse party shall be a nonresident, then the notice of the application shall be served by the marshal of any district within which the adverse party may be found in like manner as other process of the court.

SEC. 11. That in either of the following cases the United States court in and for the district wherein the award was made may make an order vacating the award upon the application of any party to the arbitration—

(a) Where the award was procured by corruption, fraud, or undue means.

(b) Where there was evident partiality or corruption in the arbitrators, or either of them.

(c) Where the arbitrators were guilty of misconduct in refusing to postpone the hearing, upon sufficient cause shown, or in refusing to hear evidence pertinent and material to the controversy; or of any other misbehavior by which the rights of any party have been prejudiced.

(d) Where the arbitrators exceeded their powers, or so imperfectly executed them that a mutual, final, and definite award upon the subject matter submitted was not made.

(e) Where an award is vacated and the time within which the agreement required the award to be made has not expired the court may, in its discretion, direct a rehearing by the arbitrators.

SEC. 12. That in either of the following cases the United States court in and for the district wherein the award was made may make an order modifying or correcting the award upon the application of any party to the arbitration—

(a) Where there was an evident material miscalculation of figures or an evident material mistake in the description of any person, thing, or property referred to in the award.

(b) Where the arbitrators have awarded upon a matter not submitted to them, unless it is a matter not affecting the merits of the decision upon the matters submitted.

(c) Where the award is imperfect in matter of form not affecting the merits of the controversy.

The order may modify and correct the award, so as to effect the intent thereof and promote justice between the parties.

SEC. 13. That notice of a motion to vacate, modify, or correct an award must be served upon the adverse party or his attorney within three months after the award is filed or delivered. If the adverse party is a resident of the district within which the award was made, such service shall be made upon the adverse party or his attorney as prescribed by law for service of notice of motion in an action in the same court. If the adverse party shall be a nonresident, then the notice of the application shall be served by the marshal of any district within which the adverse party may be found in like manner as other process of the court. For the purposes of the motion any judge who might make an order to stay the proceedings in an action brought in the same court may make an order, to be served with the notice of motion, staying the proceedings of the adverse party to enforce the award.

SEC. 14. That upon the granting of an order confirming, modifying, or correcting an award, judgment may be entered in conformity therewith, no exceptions shall be taken, but an appeal may be taken from such order or judgment, as hereinafter set forth.

SEC. 15. That the party moving for an order confirming, modifying, or correcting an award shall, at the time such order is filed with the clerk for the entry of judgment thereon, also file the following papers with the clerk:

(a) The agreement; the selection or appointment, if any, of an additional arbitrator or umpire; and each written extension of the time, if any, within which to make the award.

(b) The award.

(c) Each notice, affidavit, or other paper used upon an application to confirm, modify, or correct the award, and a copy of each order of the court upon such an application.

The judgment shall be docketed as if it was rendered in an action.

The judgment so entered shall have the same force and effect, in all respects, as, and be subject to all the provisions of law relating to, a judgment in an action; and it may be enforced as if it had been rendered in an action in the court in which it is entered.

SEC. 16. That an appeal may be taken from an order vacating an award or from a judgment entered upon an award as from an order or judgment in an action.

SEC. 17. That this act may be referred to as "the United States arbitration act."

SEC. 18. That all acts and parts of acts inconsistent with this act are hereby repealed, and this act shall take effect on and after the 1st day of January next after its enactment, but shall not apply to contracts made prior to the taking effect of this act.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

### AGREEMENT BETWEEN THE SECRETARY OF WAR AND THE WASHINGTON GAS LIGHT CO.

Mr. ELLIOTT. Mr. Speaker, I ask unanimous consent to return to Calendar No. 396, to which objection was made and, as I understand, afterwards withdrawn.

The SPEAKER. The gentleman from Indiana states that the objection has been withdrawn by the gentleman from Nebraska [Mr. SHALLENBERGER] on Calendar No. 396. The Clerk will report it by title.

The Clerk read as follows:

A bill (S. 2848) to validate an agreement between the Secretary of War, acting on behalf of the United States, and the Washington Gas Light Co.

Mr. BLANTON. Reserving the right to object, Mr. Speaker, will the gentleman from Indiana tell us what this bill embraces?

Mr. ELLIOTT. The Washington Gas Light Co. has a plant down on the Eastern Branch, on the river front. For many years there has been contention between the War Department and the Gas Light Co. over the ownership of certain tracts and parcels of land there. Some two or three years ago they finally, after some litigation, entered into an agreement settling all of those disputes. This bill is to ratify the agreement which has been entered into between the War Department and the Washington Gas Light Co. over these disputes on that water front.

Mr. BLANTON. Did the gentleman from Indiana just casually accept the agreement of the War Department, or did he go into it in detail?

Mr. ELLIOTT. This matter between the War Department and the Washington Gas Light Co. has been gone into carefully. I did not go into all of the details of the litigation between these parties.

Mr. BLANTON. I want to call the gentleman's attention to this—that the War Department, through its various officers, is getting to absolutely run this Government; absolutely. I think the Congress ought not to delegate its power to the War Department to settle controversial matters about Government property.

Mr. ELLIOTT. We have not the time to go into them and settle all lawsuits and disputes.

Mr. BLANTON. I will object.

The SPEAKER. Objection is heard.

Mr. ELLIOTT. Mr. Speaker, I move to suspend the rules and pass this bill.

The SPEAKER. The Chair can not recognize the gentleman for that purpose. The Clerk will report the next bill.

### AWARD OF NATIONAL WAR LABOR BOARD IN FAVOR OF CERTAIN EMPLOYEES OF THE BETHLEHEM STEEL CO.

The next business on the Consent Calendar was the bill (H. R. 5481) to provide for the carrying out of the award of the National War Labor Board of July 31, 1918, in favor of certain employees of the Bethlehem Steel Co., Bethlehem, Pa.

The title of the bill was read.

The SPEAKER. Is there objection to the consideration of this bill?

Mr. WOLFF. I object.

Mr. EDMONDS. Will the gentleman from Missouri reserve his objection?

Mr. WOLFF. I will withhold it.

Mr. EDMONDS. I want to call this to the gentleman's attention: This concerns 30,000 employees of the Bethlehem Steel Co. I do not know whether the gentleman knew that or not.

Mr. WOLFF. I am surprised that gentlemen on that side of the House would be interested in the employees of any company. There must be something wrong with this in some place else. I object, Mr. Speaker; and in doing that I am acting in the interest of 300,000 employees.

The SPEAKER. Objection is made.

### ASSESSMENT WORK ON CERTAIN MINING CLAIMS

The next business on the Consent Calendar was the resolution (H. J. Res. 142) to suspend the requirements of annual assessment work on certain mining claims for a period of three years.

The title of the resolution was read.

The SPEAKER. Is there objection?

Mr. McCLINTIC. Reserving the right to object, I would like to ask a question of some one who is posted about this particular bill. Has this bill anything to do with placer mining?

Mr. BRUMM. No.

Mr. UNDERWOOD. Mr. Speaker, I object.

The SPEAKER. Objection is made. The Clerk will report the next bill.

### CONTINGENT EXPENSES OF THE BUREAU OF INDIAN AFFAIRS

The next business of the Consent Calendar was the bill (H. R. 8086) to amend an act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1915," approved August 1, 1914.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That section 8 of the act of August 1, 1914 (38 Stat. L. pp. 582, 590), be, and the same is hereby, amended by adding after the word "reimbursable," occurring in the thirteenth line of said section 8, the words "From tribal funds of the Chippewa Indians," so that said act shall read in part: "For the payment of high-school teachers at the White Earth Indian School, Minnesota, for instruction of children of the Chippewa Indians in the State of Minnesota, $4,000, or so much thereof as may be necessary, to be used under rules prescribed by the Secretary of the Interior."

With the following committee amendment:

Page 2, line 4, after the word "necessary," insert the words "said sum to be reimbursable from tribal funds of the Chippewa Indians."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

COMPENSATION TO CHIPPEWA INDIANS OF MINNESOTA

The next business on the Consent Calendar was the bill (H. R. 26) to compensate the Chippewa Indians of Minnesota for lands disposed of under the provisions of the free homestead act.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GARRETT of Tennessee. Mr. Speaker, reserving the right to object, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GARRETT of Tennessee. This bill was objected to and stricken from the calendar on June 4.

The SPEAKER. Then the Chair thinks it is not in order.

Mr. BEGG. If that is the ruling of the Speaker, then we are through.

Mr. SINNOTT. Mr. Speaker, I would like to be heard on that.

The SPEAKER. The Chair will hear the gentleman. It is a new question, and the Chair merely gave his offhand opinion.

Mr. BANKHEAD. Mr. Speaker, I make the point of order that it is not in order to consider this bill.

Mr. SINNOTT. The rule provides, Mr. Speaker, that a bill being on the Unanimous Consent Calendar—I am not reading the exact wording until I get to the latter part—may be stricken from the calendar upon one objection, and then it provides:

Should objection be made to the consideration of any bill so called it shall immediately be stricken from such calendar, but such bill may be restored to the calendar at the instance of the Member, and if again objected to by three or four Members it shall be immediately stricken from such calendar and shall not thereafter be placed thereon.

It seems to me, Mr. Speaker, this states as plainly as language can state it that the bill having been restored, after having been once stricken from the calendar, it takes three objections to stop it.

The SPEAKER. There is no doubt about that; but the point made is as to whether, having been upon the calendar for only two days, it can now be considered.

Mr. SINNOTT. I thought the objection was to the other point.

The SPEAKER. No.

Mr. VAILE. Mr. Speaker, may I be heard on that point?

The SPEAKER. The Chair understands that is the point.

Mr. GARRETT of Tennessee. Yes.

Mr. VAILE. The rule provides, in the first place, that bills which have been on the calendar for three days shall be called. That is the first disposition of the bills, and if objection is made they shall be stricken from the calendar, but they may be restored to the calendar at the instance of Members. "Restored" obviously means that a bill would be restored where it was before and where it had been for more than three days. It seems to me very clear that the original purpose of this rule was to provide an opportunity for Members to familiarize themselves with the bills so that they might make objections intelligently and that purpose is abundantly performed when a bill has been on the calendar for three days. It does not appear to me, though, that a bill must be on the calendar the last time for three days. Can we read into a rule requiring that a bill shall be there for three days the further requirement that it must be there twice for three days, which, in effect, is what would be the result of a ruling that it must be there now for three days? That would require a bill being there for six days.

The SPEAKER. But has the gentleman observed the last line of the rule:

That the same shall not be called twice upon the same legislative day?

Mr. VAILE. Yes; and that would seem to support my contention. It would have to be called the next day after it had been restored to the calendar, if at all. To say it shall not be called twice on the same legislative day would seem to indicate it could be called on the following day after it had been restored.

The SPEAKER. These legislative days only occur once in two weeks, as a rule, so that if it could not be called the next day it could not be called for two weeks. Therefore it seems to the Chair the intention was, as the gentleman has stated, that due notice should be given, and when a bill is stricken from the calendar the Members would have reason to suppose that they need not pay any further attention to that particular bill.

Mr. VAILE. But the suggestion of the Chair would not seem to apply to the end of the term, when practically the entire time is devoted to the Consent Calendar or to suspensions.

Mr. BEGG. In connection with the point the gentleman makes, I should like to call the Speaker's attention to the fact that the Consent Calendar is not drafted for the close of the session but for the general run of the session, and at no time, other than at the close of the session and by unanimous consent, does it come on consecutive days. In the framing of the rule I do not believe anybody had any thought of a second-day call or a change in any way of the three-day provision.

And when the bill is stricken from the calendar with one objection, what becomes of the bill? It stays off of the calendar unless the gentleman interested in the bill again secures unanimous consent to do what? To place it back on the calendar. Now, there is not any doubt, it seems to me, but what it is off the calendar, and then there can not be any doubt but what it must be on the calendar three days before being permitted to be taken up for consideration.

Mr. MOORE of Virginia. May I ask the gentleman a question?

Mr. BEGG. Certainly.

Mr. MOORE of Virginia. Is not this the fallacy in the statement the gentleman has just made? He says the bill can only be restored to the calendar by unanimous consent, but the rule does not say so.

Mr. BEGG. But that is the way they have been put back on.

Mr. MOORE of Virginia. But the rule says it shall be restored at the instance of the Member.

Mr. BEGG. Of course, it can be restored to the calendar the next day by the same procedure that it was put on originally, which makes my argument even more forceful than if it is put on by the unanimous-consent process.

Mr. MOORE of Virginia. But is not your argument destroyed by the proviso——

Mr. BEGG. No; I do not think so at all.

Mr. MOORE of Virginia. The proviso says, "the same bill shall not be called twice on the same legislative day." This excludes the idea that three days have to elapse after the restoration of the bill.

Mr. BEGG. I do not think so at all.

Mr. VAILE. Will the gentleman yield further?

Mr. BEGG. Gladly.

Mr. VAILE. I want to submit to the gentleman from Ohio that the rules are made, of course, for the average run of business throughout the session, but we must assume they are also made to take care of all the business of a session, including the last two days as well as the rest of the time.

Mr. WINGO. Mr. Speaker, it occurs to me the last line instead of being a bar, settles the question in favor of the consideration of the bill.

I direct the Speaker's attention to the fact that the language is: "*Provided*, That the same bill shall not be called twice on the same legislative day," not the same calendar day. We must assume that those who prepared this rule did so in the light of the experience of the House and with a certain fixed purpose in mind. Now, what is that? The experience of the House has been by unanimous consent to consider this calendar at other times than consent day, and, in addition to that, the evil that was sought to be protected against was that sometimes a Member made a captious objection to a bill, and in order to overcome this we provided that on the second call it should take three Members to strike it from the calendar, and in order to be sure that those who are really making a serious objection should not be compelled to keep this up, the rule provides that you shall not call it twice upon the same legislative day, but that does not mean the same calendar day. But even if it did mean the same calendar day, what is the situation we find ourselves in now? We are at the close of a session.

The House is operating under the suspension or consent rule now, and to say that it could not be called twice upon the same legislative day would mean that you would pass over for two weeks' time a bill to which a captious objection had been made, even though the House one or two days or a week thereafter should by unanimous consent agree that there should be another call of the Consent Calendar. There is a distinction between calendar day and legislative day.

Mr. LUCE. Mr. Speaker, my understanding of the purpose of a system of parliamentary procedure is that it shall enable the majority of a parliamentary body to express its will, with protection to the minority and sufficient safeguard against surprise. It has been further my understanding that whatever two interpretations of a rule are possible—as the Speaker, of course, is familiar with the fact—the interpretation which will facilitate the business of the House and yet will secure the rights of the minority and bring safeguard against surprise, is the one that is most likely to accomplish our purposes here.

It is manifest that the provision for a three-day warning was meant to give Members notice that this form of procedure would be requested. Now, the notice has certainly been sufficient in all these cases. These measures have been on the calendar for many weeks, most of them. There can be no question that every Member of the House has had full notice that this method of procedure might be requested, and I respectfully submit therefore that the interpretation of the rule which will carry out its spirit is the one which may most safely and wisely furnish a precedent for the future course of the House.

Mr. BEGG. Will the gentleman yield?

Mr. LUCE. Certainly.

Mr. BEGG. The gentleman's reasoning is certainly fallacious regarding the rules being drawn so that the majority can work its will. This rule is specifically drawn so that the minority, without a majority, can work under a gentleman's agreement or understanding there will be no call for a quorum. The gentleman's reasoning would be correct if there was any reason why a man when he opposed a bill could not make the point of no quorum, but with that in operation I submit to the gentleman the rule is drafted to expedite business unobjected to, even if there are only five Members present, and is not majority rule at all, but minority rule.

Mr. LUCE. I think the gentleman fails to notice that I carefully inserted, after saying the majority should carry out its will, that the rights of the minority should be safeguarded. The whole burden of my argument was that the rights of the minority have been safeguarded in this case.

Mr. MAPES. Mr. Speaker, I would like to call the Speaker's attention to the fact that, if the contention of those who say that a bill after it has once been objected to can be restored to the calendar and then called up before the expiration of three days should be sustained, that ruling would give to such a bill a greater preference than a bill has which has been on the calendar for two days that has not been objected to. I submit, Mr. Speaker, when the rule says that a bill must be on the calendar for three days before it can be considered, and then goes on to say that in case of objection it may be restored to the calendar and afterwards it shall take three to object to it or strike it from the calendar, that the word "restored," as used in that connection, means that the bill is placed back on the calendar, and it then has no more right than it had under the other language which provides for its being placed on the calendar in the first instance.

It seems to me quite clear that it would be giving an undue preference to bills on this calendar that have been on only one day since they were objected to over those that have been on two days that have not been objected to. We have reached the point on this calendar now where if the bills that have been restored to the calendar after having been once objected to are now in order under the rule, they will be given greater preference than bills that have never been objected to. There are several bills on the calendar which the membership of this House has the right to assume can not be brought up to-night except by unanimous consent.

Mr. LUCE. Will the gentleman explain how any advantage can accrue from requiring a 3-day interval between the first and the second objection? I mean when once the practice has been established.

Mr. MAPES. I think there might be such a case as this—two or three men in the House might have serious objection to the consideration of a bill on the Unanimous Consent Calendar who could not be present or might not be present as soon as one day after it was stricken from the calendar.

Mr. LUCE. Will the gentleman state what possible good can be accomplished by requiring a 3-day interval between the first and second consideration of the bill?

Mr. MAPES. Suppose we take the old rule before it required an objection of three to a bill, does not the gentleman concede that a bill had to be on the calendar three days after the original objection before it could be called up under the rule except by unanimous consent?

Mr. CRAMTON. Will the gentleman yield for a suggestion?

Mr. MAPES. Yes.

Mr. CRAMTON. If the three-day period means anything it means three days. If we are to hold that on a second appearance a less period is sufficient, you shorten it up to two days and then to one day and then nothing. The rule says there must have been three days, and if you are to say that that three days can be shortened up you can eliminate all time, which proves the absurdity of the contention.

Mr. LUCE. The gentleman has overlooked the provision that it shall not come up again on the same legislative day.

Mr. CRAMTON. I am speaking of the notice that is to precede its coming up.

Mr. MAPES. I desire to emphasize this fact, that the ruling contended for would give a greater preference to bills objected to than they had before the rule was adopted, because it was necessary then that a bill be on the calendar three additional days after the objection was made, taking it off of the calendar before it could be called up again.

Mr. GARRETT of Tennessee. Mr. Speaker, in its practical application the decision upon this point of order is of no great consequence except that it applies to the last six days of the session. It will be remembered by the Chair that the rule, until the adoption of the rule at the beginning of this Congress, did not provide that the second objection should be made by three persons. It could be objected to by one person the first time and by one person the second time, and the second objection by one person sent it permanently from the calendar. At the beginning of this Congress that rule was amended so as to provide that there should be three objections the second time. In ordinary times, of course, an objection being made upon a Monday, there is ample time for the Member interested to restore the matter to the calendar three days before the calendar can be again reached. Therefore, practically it amounts to nothing during those times, but during the last six days of the session it is all important. The purpose of inserting the provision for three objections was to obviate the difficulty which sometimes arises by reason of a bill being taken from the calendar through captiousness, through anger, or through hasty judgment on the part of some one individual. Inasmuch as this is a new question—and I confess that I am somewhat doubtful about it—if the old rule whereby it could be stricken from the calendar by just one objection were still the rule, I would have no hesitation in saying that it ought to be on the calendar three days in advance, even during the last six days in the session, but in view of the fact that we amended the rule at the beginning of this Congress so as to provide that there should be three objections, and that that was done for the purpose of obviating the difficulty growing out of captious, or angry, or hastily formed opinions, causing objection, it seems to me it would be only fair to hold that on the last six days of the session it might be called up even on the day following the day on which it is originally stricken off.

Mr. BEGG. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. BEGG. Does not the gentleman think that if such a ruling be made it would be absolutely unfair to the membership of the House? There is no warning at all five minutes ahead, there was not to-night, and there may be men who are violently opposed to some of these bills who are not here because of the assumption that these bills have not been on the calendar long enough, and it seems to me that if a calendar can be called up at any hour and any minute without warning, then the rule ought to hold.

Mr. GARRETT of Tennessee. They do appear on the calendar, and so far as I know this question has never been raised before. They are bound to appear on the calendar several hours in advance because the calendar appears early in the morning.

Mr. BEGG. I do not mean appear on the calendar, but I mean notice that the calendar is going to be called.

Mr. GARRETT of Tennessee. The calendar is in order the last six days of the session.

Mr. BEGG. Only for individual bills, to the Speaker.

Mr. GARRETT of Tennessee. Oh, indeed, no.

Mr. BEGG. I mean by consent, without notice.

Mr. CARTER. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. CARTER. Can the gentleman tell us whether, when this rule was adopted, there was any discussion in the committee as to whether, after a bill was restored, there should be eliminated the three-day requirement?

Mr. GARRETT of Tennessee. No; I do not recall that that was mentioned in the committee at all. As I said in the beginning, ordinarily it is of no consequence whatever, because the individual has plenty of time to put this bill on

between the two days when it could come up. It is only of importance during the last six days of the session.

Mr. BURTNESS. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. BURTNESS. After a bill is once objected to, theoretically can not a Member interested in the bill get the bill onto the calendar again the very next moment after it is objected to by immediately filing his request and placing it on the Consent Calendar?

Mr. GARRETT of Tennessee. He can file his motion, but of course it can not go on the calendar until the calendar is printed the following day.

Mr. BURTNESS. Does the calendar necessarily have to be printed before the bill is actually on the calendar? Is it not on the calendar when the Member officially makes his request?

Mr. GARRETT of Tennessee. It is printed, however, before anybody knows that it is on the calendar.

Mr. BURTNESS. Certainly; but the thought that occurred to me was this: The gentleman made the point that he felt it ought to require three objectors the next day, and I wondered if, theoretically, that would not really mean that it would require three objections immediately afterwards if, for some reason, they might see fit to go back through the calendar.

Mr. GARRETT of Tennessee. I do not think that question enters into the matter now at all.

Mr. ROGERS of Massachusetts. Mr. Speaker, of course the Chair in determining this question is bound to scan pretty closely the language of the rule itself. Questions as to the wisdom of the rule, questions as to the reasonableness of the rule, are of consequence, I suppose, only in case the Chair is in doubt what the rule means. Now, the rule says that the Speaker under certain circumstances shall direct the Clerk to call the bills which have been for three days upon the Consent Calendar. That seems to be a fairly unequivocal statement as far as it goes. Now, I ask the Speaker to look at a typical case which is now under discussion. Take the case of Mr. Raker's bill, which is No. 413 on the Consent Calendar. Placed on the Consent Calendar May 13, 1924. Objected to and stricken from the Consent Calendar June 4, 1924. A period of three weeks or thereabouts seems to have elapsed during which that bill was on the Consent Calendar. Now, I confess that it seems to me that the three-day rule is a rule which was intended to guard against surprise in view of the notice that a man must have under the required three-day notice.

The first time I can see myself how there is danger that a somewhat neglectful Member may be taken by surprise in this matter. Now, it is suggested that this Consent Calendar rule is a rule which was drafted primarily with a view to the conduct of business during the major part of the session, and that it should be construed with that idea in mind, but if the Chair will look at the early part of the rule he will find that it states that on days when it shall be in order to move to suspend the rules the Speaker may, and so forth. I should have thought it would have been more plausible, if the Consent Calendar applied only to suspension days during the major part of the session, that it would have been phrased so as to say on the first and third Mondays of each month. The only other time when business on Suspension Calendar is in order is during the last six days of the session. It seems to me, so far as there is any implication to be drawn from the rule in its present form, it is that this calendar rule specifically contemplated that the rule was to be peculiarly operative during the last six days of the session. Now, certainly justice is done by allowing the bill a second chance. Certainly it was contemplated that under certain circumstances the bill should come up a second time in this way, and I can not see why the orderly procedure of business is not going to be permitted by allowing the contention which I suggest. It is a question of what the Speaker now decides, perhaps. There may be here and there men who did not realize an objected to bill could come up to-day, but the point of order was raised last night and the point of order was argued, and those gentlemen objecting, if they desired, had an opportunity to be here on the theory that the measures might come up. Now, the last six days of the session, Mr. Speaker, everyone knows is a period of surprises in legislation. No one knows what the Speaker may decide to do in the matter of recognition for suspension. Members are expected to be on the floor the last six days more than any other time. Even the man who is not prepared to be on the floor has notice under the contention which I suggest, because he will find that the bill the morning after his objection has been placed on the calendar, and that it may be brought up under a proper construction of the rule.

Mr. MAPES. Will the gentleman yield?

Mr. ROGERS of Massachusetts. I will.

Mr. MAPES. I would like to ask the gentleman from Massachusetts what he would think of this situation: Suppose a Member had put a bill on the calendar earlier in the session and one man had objected to it upon the call of the Consent Calendar, say in January, knowing this rule, and if the Speaker should hold during the last six days of the session it could be called up on one day's notice, suppose he waited until late yesterday afternoon and had the bill restored to the calendar, and the Speaker in his wisdom should have seen fit immediately upon the call of the House this morning to have the Consent Calendar called. Would not the gentleman have an undue advantage over those who had put bills on in the regular order?

Mr. ROGERS of Massachusetts. I do not think it would be giving an undue advantage. I contend that that is what the rule provides for.

Mr. LEHLBACH. Mr. Speaker, I simply wish to call attention to this point: As the gentleman from Massachusetts [Mr. ROGERS] has said, a bill must be on the calendar for three days before it can be called up. That is to guard against surprise, not so much in order that the Members may acquaint themselves with the provisions of the bill, but that they may have notice that that bill may come up for consideration and passage.

That applies to its place on the Consent Calendar when it is first called up for consideration. Otherwise there might be surprises in the course of a session, eliminating the last three days. For instance, a bill may be on the Consent Calendar and called up and objected to and stricken from the calendar. A Member may wait until the Saturday afternoon before the next Consent Calendar day, and the next day thereafter would be the very day on which he would be enabled to have it called up if this three-day provision did not apply. In other words, this three-day rule means that people can take up the calendar and find out what the situation is. If the bill is not restored on Friday or Saturday it may be restored on Monday, and thereby people may be taken by surprise. I submit that to the Speaker.

Mr. CONNALLY of Texas. Mr. Speaker, there is nothing in the argument about Members not being informed. They are supposed to know this rule, as I have no doubt the Speaker is going to rule. Constructively they know what the situation will be. But I want to call attention to the language of this rule. It is first provided that when a bill is placed on the calendar it must be there three days before it can be called. That is the old portion of the rule. Then what does it provide? "Should objection be made to consideration of a bill so called, it shall be immediately stricken from such calendar, but such bill may be restored to the calendar at the instance of the Member." They do not have to go through this three-day process again. It may be restored to the calendar on the application of a Member; "and if again objected to by three or more Members, it shall be immediately stricken from such calendar, and shall not thereafter be placed thereon." Note that: "It shall not thereafter be placed thereon." But listen to the proviso: "*Provided*, That the same bill shall not be called twice on the same legislative day."

What does that mean? That proviso was added there because in the minds of the House there was a necessity for it. Without that proviso the House feared that that rule would mean that the same bill could be called up again on the same legislative day. So they provided by the rule an exclusion. When you provide that it shall not be called twice on the same legislative day, it means that it may be called up on a separate legislative day.

I contend that the bill is not stricken from the calendar in the original sense. It is simply restored to the calendar, and the amendment does not repeat the three-day provision at all. The Chair will bear in mind that the latter part of the rule is the new rule. The old rule remains the same. The bill may be restored.

Mr. BEGG. The gentleman from Texas seems to be making a great argument on the word "restored," differentiating it from "placing." I want to call the gentleman's attention to the fact that there is not much in that matter of restoration. I can take my watch from my pocket and find it is going and return it.

Mr. CONNALLY of Texas. But if it were provided that your watch were thrown out on the street, it would not be restored.

The SPEAKER. The Chair is ready to rule. The Chair thinks this is a close question, and there is support to decide

in either direction, but, on the whole, the Chair thinks that the reason three days' notice was required was not so much to allow Members that time in which to know that a bill was coming up, but in order that they should have time in which to examine the different bills, make up their minds about them, and determine whether they wanted to object.

If any bill has been on the calendar, the Members have had three days in which to study it. Then the second time, the Chair is disposed to think, there is not the practical need of the same three days that there was before, because the Members have already had three days; they have studied the bills theoretically, know the bills, and know their minds about them. Therefore the only notice that would be required the second time would simply be the notice to them to be present if they wished to object. That notice they get from the calendar in the morning. Theoretically we are all here every day, and a calendar is provided for us to see what the business is.

So the Chair concludes and will rule that it does not require the second time three days' notice but requires only one day's notice, and that the specific bill on which the question was raised is in order.

Mr. LONGWORTH. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LONGWORTH. Under that ruling the next bills which follow, a number of them, which were restored to-day, having been objected to, stricken from the calendar, and restored to-day, would require three objections?

The SPEAKER. Of course they would require three objections.

Mr. LONGWORTH. The bills which were stricken from the calendar and restored would require three objections?

The SPEAKER. Certainly.

Mr. HOWARD of Nebraska. Mr. Speaker, pending the arrival of a quorum, I would like to call up No. 87 on the House Calendar, page 28.

The SPEAKER. Of course the gentleman knows that is not in order. The question in order is the bill against which a point of order was made.

Mr. HOWARD of Nebraska. The Speaker will forgive me. A Member of the House, in whom I have the greatest confidence, told me that I might ask anything of the Speaker, and he could grant it if he wanted to. [Laughter.]

The SPEAKER. The gentleman exaggerated the power of the Speaker. The Speaker is bound by the rules of the House.

Mr. HOWARD of Nebraska. All right.

The SPEAKER. The bill before the House is the one against which a point of order was made and which point of order was overruled. The Clerk will report that bill.

COMPENSATION TO CHIPPEWA INDIANS OF MINNESOTA

The next business on the Consent Calendar was the bill (H. R. 26) to compensate the Chippewa Indians of Minnesota for lands disposed of under the provisions of the free homestead act.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That there is hereby authorized to be appropriated, out of any funds in the Treasury of the United States not otherwise appropriated, the sum of $1,787,751.36, with interest thereon at the rate of 5 per cent per annum from December 31, 1922, to the date of settlement, said total amount to be credited to the general fund of the Chippewa Indians of Minnesota arising under the provisions of section 7 of the act of January 14, 1889.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. SPROUL of Illinois. Mr. Speaker, I make the point of no quorum.

Mr. CRAMTON. Will the gentleman withhold his point of order for just a minute?

Mr. SPROUL of Illinois. Yes.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to revise and extend the remarks I made on the fiscal bill.

The SPEAKER. The gentleman from Michigan asks unanimous consent to revise and extend the remarks he made on the fiscal bill. Is there objection?

Mr. HILL of Maryland. Reserving the right to object, they are the gentleman's own remarks?

Mr. CRAMTON. Well, I especially desire to put in the text of the amendments which I shall offer and which I hope will come up to-morrow.

Mr. HILL of Maryland. But no speech by Mr. Volstead or any others?

Mr. CRAMTON. Neither by Mr. Volstead nor by Nicholas Murray Butler.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. SPROUL of Illinois. Mr. Speaker, I renew my point of no quorum.

Mr. LONGWORTH. Will the gentleman withhold his point of no quorum in order that I may make a unanimous-consent request?

Mr. SPROUL of Illinois. Yes.

Mr. LONGWORTH. Mr. Speaker, I ask unanimous consent that when the House adjourns to-night it adjourn to meet at 11 o'clock to-morrow morning.

Mr. SEARS of Florida. Reserving the right to object, and I doubt whether I shall object, because I have never objected to any request made by the majority leader, as I understand it to-night we took up the Unanimous Consent Calendar under a unanimous-consent agreement?

The SPEAKER. The Chair is not aware of any consent agreement.

Mr. SEARS of Florida. It has to be.

The SPEAKER. No.

Mr. SEARS of Florida. The point I was making was this: We have been promised for about two weeks that we would have a night to consider private bills which had been passed by the Senate, and I was wondering whether to-morrow we could take up those bills which had been passed by the Senate if there was time?

Mr. LONGWORTH. I will say to the gentleman that I have been hopeful that such an arrangement could be made, and if we have a hiatus to-morrow I shall be glad to ask unanimous consent to that effect.

Mr. SEARS of Florida. I have been here for three nights and I will be here at 11 o'clock to-morrow morning, and I have no objection.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

AN ACT ACCEPTING CERTAIN TRACTS OF LAND IN THE CITY OF MEDFORD, OREG.

Mr. SINNOTT. Mr. Speaker, I ask unanimous consent to proceed for one-half minute.

The SPEAKER. The gentleman from Oregon asks unanimous consent to address the House for one-half minute. Is there objection? [After a pause.] The Chair hears none.

Mr. SINNOTT. Mr. Speaker and gentlemen of the House, the national park service connected with Crater Lake National Park needs three lots at Medford, the western approach to Crater Lake National Park. The city council of Medford is donating free of charge, free of assessment, and free of taxes these three lots to the Federal Government, and I ask unanimous consent to consider a 10-line Senate bill accepting these three lots free of charge.

The SPEAKER. Is there objection?

Mr. SPROUL of Illinois. I will withhold the point of order for a few minutes.

Mr. GARRETT of Tennessee. Mr. Speaker, reserving the right to object, if the gentleman is going to make a point of no quorum, he ought to make it. Is this bill on the calendar?

Mr. SINNOTT. Yes; it is only a 10-line Senate bill (S. 1987) donating to the Government three lots which the Government absolutely needs in connection with the Crater Lake National Park. They are donated free of charge, free of taxes, free of assessments, and with a speech extended in the RECORD, if necessary.

Mr. GARRETT of Tennessee. If gentlemen who have bills on this calendar are willing to stand for that—I have none on the calendar——

Mr. WOLFF. I am going to object unless the gentlemen agree to stay here until 11 o'clock, as they have been doing.

Mr. SINNOTT. I hope the gentleman will not object. These lots are absolutely needed by the Government, and it is only a 10-line Senate bill.

Mr. WOLFF. I object unless the gentleman consents to withdraw his point of no quorum.

Mr. SINNOTT. I will help the gentleman to stay here until 11 o'clock.

Mr. WOLFF. The point of order is only withdrawn temporarily until the gentleman passes this bill.

Mr. SINNOTT. Will the gentleman temporarily withdraw his point of order?

The SPEAKER. But the gentleman from Missouri objects.

Mr. WOLFF. Unless you stay here until 11 o'clock, as you have been doing.

Mr. SPROUL of Illinois. I will not agree to withdraw the point of order and wait until 11 o'clock.

Mr. BLANTON. I hope the gentleman will withdraw his point of order. There was a tentative agreement here to-night that the Members would work until 11 o'clock on noncontroversial bills. I hope the gentleman from Illinois will not insist on his point of order, so we can work until 11 o'clock.

Mr. SPROUL of Illinois. We have wasted time on points of order.

Mr. BLANTON. I know that; but we have reached the point where we can work and we can pass 10 of these bills between now and 11 o'clock.

Mr. LaGUARDIA. I did not hear anything about any agreement.

Mr. BLANTON. It was a kind of tentative understanding among the Members.

Mr. SPROUL of Illinois. Mr. Speaker, I withdraw the point of order for the present.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the Clerk will report the bill.

The Clerk read the title of the bill.

Mr. GARRETT of Tennessee. This is not a bill that is in order. It is not on the calendar.

Mr. SINNOTT. Yes; it is on the end of the calendar.

Mr. GARRETT of Tennessee. It is on the end.

Mr. SINNOTT. But there is no objection.

Mr. GARRETT of Tennessee. I thought the calendar was to be taken up in its regular order.

Mr. SINNOTT. This bill is on the Consent Calendar.

Mr. GARRETT of Tennessee. You can not jump to the end of the calendar.

Mr. SINNOTT. My request was to take up the bill.

Mr. GARRETT of Tennessee. Are you gentlemen who have bills on the calendar willing to stand for that?

Mr. MOORE of Virginia. Mr. Speaker, I do not think it is a fair thing to take up bills out of the regular order when there is at least a tacit agreement that the calendar shall be considered in regular order; still, I do not make any objection.

Mr. SINNOTT. I thank the gentleman.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized to accept certain tracts of land in the city of Medford, Jackson County, Oreg., described as lots Nos. 15 and 16, block 9, amended plat to Queen Ann Addition to the city of Medford; and lot 3, block 2, central subdivision to the city of Medford, which have been tendered to the United States of America in fee simple by the city of Medford, Oreg., as sites for buildings to be used in connection with the administration of Crater Lake National Park, Oreg.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the reports of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to bill of the following title:

S. 2257. An act to consolidate, codify, revise, and reenact the laws affecting the establishment of the United States Veterans' Bureau and the administration of the war risk insurance act, as amended, and the vocational rehabilitation act, as amended.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4635) to pay tuition of Indian children in public schools.

The message also announced that the Senate had passed the following resolution:

*Resolved*, That the bill from the House of Representatives (H. R. 9561) making additional appropriations for the fiscal year ending June 30, 1925, to enable the heads of the several departments and independent establishments to adjust the rates of compensation of civilian employees in certain of the field services do pass, with the following amendments:

(1) Page 16, line 14, strike out "$300" and insert "$680."

(2) Page 16, line 15, strike out "$680" and insert "300."

(3) Page 23, after line 2, insert:

DEPARTMENT OF COMMERCE

"Bureau of Fisheries: For protection of the fisheries of Alaska, including travel, subsistence (or per diem in lieu of subsistence) of employees while on duty in Alaska, hire and maintenance of boats, employment of temporary labor, and all other necessary expenses to carry out the provisions of the act entitled 'An act to protect the fisheries of Alaska,' approved June 6, 1924, there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $55,000 for the fiscal year 1924, and to remain available until June 30, 1925."

(4) Page 23, line 3, strike out "$26,302,767.84" and insert "$26,357,767.84."

The message also announced that the Senate had passed the following resolution:

*Resolved by the House of Representatives (the Senate concurring)*, That the action of the Speaker of the House of Representatives and of the President pro tempore of the Senate in signing the enrolled bill (H. R. 5325) entitled "An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes," be rescinded and that in the reenrollment of said bill the following amendment be made, viz: In section 2, after the word "Interior" in the proviso, insert the following: ", with such additional reasonable and necessary expenses for said tribal attorneys to be approved and paid from the funds of the respective tribes under the direction of the Secretary of the Interior, as may be required for the proper conduct of such litigation."

Attest: WILLIAM TYLER PAGE, *Clerk*.

*Resolved*, That the Senate concur in the passage of concurrent resolution of the House of Representatives No. 29.

Attest: GEORGE A. SANDERSON, *Secretary*.
By H. W. CRAVEN, *Chief Clerk*.

STANISLAUS NATIONAL FOREST, CALIF.

The next business on the Consent Calendar was the bill (H. R. 105) for the inclusion of certain lands in the Stanislaus National Forest, Calif., and for other purposes.

The Clerk read the title to the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted etc.*, That within the following-described areas any lands not in Government ownership which are found by the Secretary of Agriculture to be chiefly valuable for national-forest purposes may be offered in exchange, under the provisions of the act of March 20, 1922 (Public, No. 173, 42 U. S. Stat. L., p. 465), upon notice as therein provided, and upon acceptance of title shall become parts of the Stanislaus National Forest; and any of such described areas in Government ownership chiefly valuable for national-forest purposes and not now parts of any national forest may be added to said national forest, as herein provided by proclamation of the President, subject to all valid existing entries: Township 1 south, range 16 east, sections 1 to 5, inclusive, 8 to 15, inclusive, 22 to 27, inclusive, and 34 to 36, inclusive; township 2 north, range 15 east, sections 1 to 12, inclusive; township 2 north, range 16 east, sections 2 to 10, inclusive, 15, 16, and 21; township 4 north, range 14 east, sections 1, 2, 11 to 14, inclusive, and 23 to 26, inclusive; township 5 north, range 14 east, sections 1, 2, 11 to 14, inclusive, 23 to 26, inclusive, 35 and 36; township 6 north, range 14 east, sections 1 to 4, inclusive, 9 to 16, inclusive, 21 to 28, inclusive, 33 to 36, inclusive; township 7 north, range 14 east, sections 9 to 17, inclusive, and 19 to 36, inclusive; all Mount Diablo base and meridian.

The following committee amendment was read:

Page 2, line 4, strike out the word "entries" and insert the words "claimed and provision of existing withdrawal."

The SPEAKER. The question is on the committee amendment.

Mr. TABER. Mr. Speaker, I make the point that there is no quorum present.

Mr. JEFFERS. Will the gentleman withhold that for a unanimous-consent request?

Mr. SEARS of Florida. Will not the gentleman withhold it until the gentleman from California can pass this bill?

Mr. SINNOTT. I hope the gentleman will withdraw the point until the bill can be passed. The bill has been read.

Mr. TABER. I understand that this bill provides for the exchange of a lot of timberland for some old stumpage. I will withhold the point long enough to let the gentleman explain the bill.

Mr. RAKER. We passed two bills like this last night with reference to New Mexico. This is not a bill to exchange worthless lands.

Mr. CLARKE of New York. I would like to have something from the Department of Agriculture approving this bill.

Mr. RAKER. The Department of Agriculture has approved of the bill.

Mr. CLARKE of New York. I have seen nothing in writing, and I object.

The SPEAKER. The gentleman from New York [Mr. TABER] has made the point that there is no quorum.

Mr. JEFFERS. Will the gentleman withhold it for a unanimous-consent request?

Mr. TABER. I will.

CONSCRIPTION OF WEALTH AND INDUSTRY

Mr. JEFFERS. Mr. Speaker, I ask unanimous consent to extend in the RECORD my remarks on the subject of the idea of universal draft in the event of future wars, by inserting a telegram which I have received from the Christian Science Society, of Anniston, Ala. Also a few lines on the subject clipped from an article by National Commander John R. Quin, of the American Legion.

The SPEAKER. The gentleman from Alabama asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. JEFFERS. Mr. Speaker, in connection with this important matter, I ask unanimous consent to extend in the RECORD my remarks on the subject of the idea of universal draft in the event of future wars by inserting in my remarks a telegram which I have received from the Christian Science Society of Anniston, Ala. Also a few lines on the subject clipped from an article by National Commander John R. Quinn, of the American Legion. This article by Commander Quinn appeared recently in the Legion Barrage, published at Birmingham, Ala.

As is now well known throughout the entire Nation, the American Legion is sponsoring and strongly advocating suitable legislation in line with the sentiment in the country for the universal draft, thereby aiming to take the profit out of war, and this telegram from the Christian Science Society is in line with this great movement, and I am glad to insert in the RECORD this expression of their approval of the plan:

ANNISTON, ALA., *May 29, 1924.*

LAMAR JEFFERS, M. C.,
*House Office Building, Washington, D. C.:*

Christian Science Society of Anniston, Ala., yesterday passed following resolution:

"It appearing that bills have been introduced into both Houses of Congress based substantially on the peace plan of the Christian Science Monitor, providing for constitutional amendment authorizing Government to conscript all the forces of the Nation, including wealth and industry, thereby taking the profit out of war:

"*Resolved*, That Christian Science Society of Anniston, Ala., petition its Representatives in Congress to lend their earnest efforts toward the adoption of such amendment to become automatically effective in event of war, and that this resolution be read into the CONGRESSIONAL RECORD."

CHRISTIAN SCIENCE SOCIETY OF ANNISTON, ALA.

Mr. Speaker, the following is the clipping from the Legion Barrage, of Birmingham. It is from the pen of National Commander Quinn, of the American Legion:

The one issue the Legion will insist upon, the one bill the Legion intends shall be enacted into law, is the universal draft law. To draft men to serve for $30 a month while other equally good potential soldiers draw big salaries in safe jobs is unjust.

Equally unjust is it for manufacturers to make huge profits. We intend to put upon the statute books a law drafting men, money, and material to serve without profit during the duration of the emergency. The Nation it is which makes war, and all the Nation and its wealth should serve in that war without profit. Take profit out of war and maybe there will be fewer wars.

PROPAGANDA

Mr. TILSON. Mr. Speaker, the rapid depletion of the timber supply of the country is a fact which thoughtful people, regardless of party affiliations, view with increasing alarm. Unless a halt is called or steps taken to replace our disappearing forests, it requires no prophetic vision to see the day when America will resemble China and India in this regard. It is not practicable now to do more than slow down somewhat the woodman's axe and to urge forward by every reasonable means the gradual process of reforestation. We can, however, and ought to, eliminate one most willful, wicked, and wanton waste of perfectly good timber. No, I do not refer to forest fires—something even worse—I refer to the plague of printed propaganda.

The idea seems to have gone forth—and it is correct—that the two capacious wastebaskets now in general use by Members of Congress will no longer contain the daily deluge of propaganda now being dumped upon us, and it seems to be inferred that if the wastebaskets will not hold it all, there may be a chance of some of the overflow being read, so the avalanche seems to be increasing. Vain hope! I am informed that other and larger wastebaskets are to be procured and that additional facilities are to be provided for handling without the necessity for opening or reading. Hence my notice in the interest of true conservation.

If there is anywhere a more useless, senseless waste of ink and paper, to say nothing of time and vital energy, than the present method now in full swing of propagandizing Congress, then I am not cognizant of it. Most Members of Congress, like most other people, need to be informed, and, as a rule, they are desirous of being informed; but if there were 48 hours in the day instead of 24, no mortal man could possibly read a tithe of the so-called information now being deposited daily in the bulging wastebaskets of Senators and Representatives. Lest something of value be overlooked, it is necessary to have a secretary at least remove the envelope or wrapper and make a superficial examination. Even this takes time that might be employed in useful service.

Nor is the more bulky printed matter the only form of foolish propaganda. Many well-meaning people are misled into signing silly form letters, and some are led so far as to perform the senseless task of laboriously copying what some interested party has placed in their hands with the request that they copy, sign, and send to Washington. They do not realize that when a Member of Congress has received several hundred communications in exactly the same language he will suspect that the identical same inspiration has probably not come to so many persons simultaneously. In fact, the experienced Member of Congress can usually guess quite promptly the exact source of the inspiration, and as a rule knows that the real source is not altogether free from the taint of self-interest. Nothing is more acceptable or, in fact, more helpful to a Member of Congress who desires to serve the best interests of the people effectively than to receive communications from his constituents. I mean their own communications. There is no one so humble that his ideas on matters to which he has given thought ought not to be taken into consideration. People ought to give more thought to matters of government, and when they do their ideas are not only entitled to respect but they should prove helpful. It is worse than wasted energy, however, to transmit the stale ideas of some one else who is perhaps selfishly interested, and it makes no difference whether those ideas are in a form letter, printed, or copied, or more or less cleverly rehashed in order to conceal the origin.

Genuine, unprejudiced public opinion is the life and strongest bulwark of free government, but the manufactured article is a dangerous substitute, especially when emanating from sordid self-interest, and many there be who are deceived thereby.

CONSTRUCTIVE RECORD OF REPUBLICAN ADMINISTRATION, 1921–1924—FARM RELIEF

FAILURE OF DEMOCRATIC POLICY

Mr. WILLIAMSON. Mr. Speaker, the advent of the Wilson administration and the Democratic tariff law resulted in a pronounced industrial depression whose increasing momentum was only stopped by the breaking out of the World War. The war brought on an unprecedented demand for the products of both factory and farm which continued until the time the armistice was signed. With the close of the war, however, came increasing production abroad, and the products of foreign factories and mills soon began to find their way into this country over the low tariff barrier. The depressing effect of these importations soon began to have a very marked influence upon our own industry and by the time the Wilson régime came to an end we had over 5,000,000 idle workmen in our great industrial centers. Agriculture, which had no protection whatever under the Underwood law, also became a victim of huge importations of wool and mutton from Australia; corn and beef from the Argentine, and wheat, milk, and cheese from Canada, with the result that the price of these items fell to a point below the cost of production. To add to the discomfitures of agriculture, the railway systems, then operated by the Government, all but ceased to function during the fall of 1919. As a result, many farmers were unable to market their stock. The following winter proved an unusually severe one and great numbers of cattle perished on our midwestern farms and ranges. On top of all this came the deflation policy instituted

by the Federal Reserve Board. As a result many farm products fell to one-third of their former value, bringing complete ruin to thousands of farmers and cattlemen all over the country.

REPUBLICAN POLICY BRINGS PROSPERITY TO INDUSTRY AND LABOR

It was under these distressing circumstances that the Harding administration came into power. So desperate had the situation become that a special session of Congress was convened on April 4 following the inauguration of the new President. The new Congress lost no time in passing the emergency agricultural tariff and antidumping law. Under the beneficent influence of this statute wool and corn speedily rose in value, and the rapid trend downward of other farm products was arrested. Industry gradually recovered, and at the end of 18 months every man who wanted work could find it at good wages. From that time to this good day industry has been humming, construction work has gone on apace, and new houses have been built by the tens of thousands. Outside of the agricultural industry everybody seems happy and contented.

ACHIEVEMENTS OF SIXTY-SEVENTH CONGRESS

The Sixty-seventh Congress made a record for useful, progressive, and constructive legislation that has probably never been equaled by any other Congress. Among the many measures of this character which received my active personal support and which were enacted into law are the following:

The agricultural emergency tariff bill, which put wool men back on their feet and materially improved the market for corn and small grains.

The Budget and reorganization bills, which have saved hundreds of millions of the taxpayers' money.

The bills reducing the Army from 232,000 enlisted men to 125,000 and the Navy personnel from 133,000 to 86,000 men.

The trading in grain futures act, designed to curb speculation and gambling in grain futures.

The packers and stockyards act, which effectively puts an end to discrimination in favor of certain shippers.

The bill providing monthly pay to Civil War veterans.

The law reviving the War Finance Corporation.

The intermediate credit bank act providing for rural credit loans on chattel security.

The law putting a "dirt" farmer on the Federal Reserve Board.

Relief bills for settlers upon irrigation projects and extending the time for payment of moneys due upon homestead entries and Government land purchases upon Indian reservations.

Amendment to farm loan act providing additional funds.

Bill authorizing Federal farm-loan banks to make loans on lands in irrigation projects.

Disarmament conference bill.

Refunding of foreign debts bill.

Maternity and infancy bill.

Cooperative agricultural association bill, making it possible for farmers to organize with a view to stabilizing their own markets.

Bill appropriating $350,000 for the eradication of the barberry bush which harbors the spores of the grain rust.

The "filled milk" bill prohibiting the transportation of this product in interstate commerce.

Bill providing $1,500,000 for the purchase of seed grain for needy farmers in the drought-stricken area of the United States.

The $17,000,000 veterans' hospitalization bill and the Veterans' Bureau reorganization act.

Law giving independent citizenship to women.

GREAT ECONOMIES ACHIEVED

This Congress also made a notable record for economy and reduced appropriations from $6,454,596,649 for the year ending June 30, 1920, to $3,706,777,163 for the year ending June 30, 1924. This vast reduction of expenditures permitted a large reduction of the tax burden. In carrying out this reduction Congress applied the sound principle that he who is best able to pay should carry a proportionately larger share of the tax load. In drafting the new revenue law, therefore, the largest decreases were given to those who had the smaller net incomes. In spite of the great reductions all useful activities of the Government have been maintained at an increased state of efficiency, and the public debt has been reduced from $24,049,527,788.58 on February 28, 1921, to $21,544,803,395.74 on May 31, 1924.

CONSTRUCTIVE WORK OF SIXTY-EIGHTH CONGRESS

The present session of the Sixty-eighth Congress has also passed a number of bills of first-rate importance, among which are:

Adjusted compensation bill, removing the economic handicap suffered by the World War veterans during the late war.

The immigration law, which for the first time puts immigration upon a scientific basis.

Act extending the life of the War Finance Corporation for nine months for the purpose of extending agricultural credits.

Law authorizing postponement of payments by settlers on irrigation projects.

The narcotic drugs act.

The act to consolidate, codify, revise, and reenact laws affecting the establishment of the Veterans' Bureau, putting an end to many abuses and liberalizing the rules relating to relief of the disabled.

The child labor constitutional amendment.

The revenue act of 1924, making a flat reduction of 25 per cent in the 1923 tax payable this year, and cutting the tax burden payable in 1925, 60 per cent on incomes below $10,000. On incomes above this amount the reduction gradually grows smaller until a minimum reduction of 25 per cent is reached on the largest income.

The bill also repeals all taxes on telephone and telegraph messages; on beverages; on theater tickets under 50 cents; on auto trucks and bodies, chassis costing $1,000 and body $200; on articles of jewelry valued $30 or less; on watches selling at $60 or less; and on automobile accessories and parts a reduction is made from 5 per cent to 2½ per cent.

REVENUE ACT OF 1924 COMPARED WITH MELLON PLAN

Notwithstanding all the criticism leveled at the revenue act of 1924 it is by far the most scientific and the fairest of any income and excise bill passed by the American Congress. While it makes the greatest reductions to those who are the least able to pay, it gives very substantial relief to business and should help materially to reduce the cost of living. The present law, as a matter of fact, makes a very much larger reduction in taxes than the much-advertised Mellon plan. According to statements made by the Actuary of the Treasury, it reduces taxes for the year 1925, $22,000,000 more than the Mellon plan and for the year 1926, $100,000,000 more than the Mellon plan. It also reduces individual income taxes of 1923, payable in 1924, $232,000,000, whereas no reduction whatever in the 1923 tax was provided for in the Mellon bill. The net reduction below the revenue act of 1921 is $250,000,000 in income taxes and $111,000,000 in excise taxes, making a total reduction of $361,000,000 for the fiscal year ending June 30, 1925.

The Mellon plan would have made the largest reduction for the big fellows. This bill gives the advantage to the small taxpayers. With good business management the law will produce sufficient revenue and leave a substantial surplus in the Treasury, even after paying the soldiers' bonus.

TAX-EXEMPT SECURITIES

Personally I had hoped that the proposed amendment to the Federal Constitution permitting incomes from tax-exempt securities to be taxed could have been submitted to the several States for their approval, but the resolution submitting the amendment failed by a narrow margin to secure the necessary two-thirds vote.

M'NARY-HAUGEN BILL

The most outstanding fight waged during this session has been fought by the friends of the farmers on behalf of the McNary-Haugen bill, which had for its object the increase of the price of farm commodities to a point where they would have the same purchasing value in nonagricultural commodities as they had in the 10-year period preceding the World War. This bill has had my active, continued, and unqualified support as the measure giving the largest promise of relief to agriculture, but it was beaten by a combination of eastern Republican and southern Democratic votes.

WHEAT RELIEF BILL

To-day I introduced H. R. 9697, declaring the existence of an emergency arising out of the low price of wheat and providing for the purchase of the surplus of wheat of the crop of 1924 available for export. This is identical with the Sterling bill introduced in the Senate yesterday. This bill ought to receive the favorable consideration of Congress. If enacted into law, it would immediately raise the price of wheat not less than 35 cents a bushel. While this will not give that general relief to agriculture that I believe the farmers are entitled to, it will give aid where it is most needed. In view of the fact that the Government made at least $68,000,000 net profit out of its dealings in wheat during the war, it is only simple justice that some restitution be made.

Congress has adjusted losses alleged to have been suffered by big business on account of cancellation of war contracts, losses sustained by the railways while under Government oper-

ation, losses suffered by mining companies and prospectors in producing or attempting to produce war minerals, and provided adjusted compensation for the ex-service men. These adjustments have already cost the American taxpayers billions of dollars, and more billions will be required to pay the obligations assumed under the adjusted compensation act.

SQUARE DEAL FOR FARMERS DEMANDED

Many of the adjustments to big business have seemed to me unduly liberal. Yet when we of the Middle West ask for a square deal for the farmers of the country we are denounced as wild theorists who are "seeking to lift the farmer by his boot straps." The manifest unfairness of those who have already gotten their adjustments in denying it to agriculture makes their criticism of small validity. No matter what form farm relief measures have taken they have been denounced, blocked, and voted down. Unless the representatives of industry and labor in this House change their tactics toward the American farmer they will find the prosperity of their own people shattered by the misfortunes of the agriculturists. Either the farmers' prosperity must be brought up to the general level of that enjoyed by industry, business, and labor or these top-heavy structures now carried on the backs of the farmers will tumble. Business depression and unemployment will fol-

FARM RELIEF BILL

Mr. MORROW. Mr. Speaker, the McNary-Haugen bill may not be a perfect bill, but it is the only relief offered and should at least have been amended and put in shape so that its provisions could be enacted into a law that would offer the farmer an equal opportunity with all other business in the Nation. Every other business has its thorough organization and protection. Why should not the farmer also be justly dealt with?

Congress as a body is called upon to legislate for the people in regulating and promoting the affairs of government. If the Nation is to be prosperous, the people must be contented and fairly prosperous. In other words, those who spin and those who toil must earn or create sufficient to feed, clothe the body, and keep up living conditions and be able to meet their obligations without being hampered and embarrassed.

This condition does not prevail in the western agricultural and stock-farming districts of the north central, west, and in the Rocky Mountain districts of this United States.

The grain farmer is bankrupt; the stock farmer is bankrupt. The question is: Why are they bankrupt? The one answer, because freight rates are too high; another reason is because the farmer is without an open market for his grain or livestock.

The question naturally arises, Why is the farmer without an open market for his grain and his livestock? Because he is to-day practically isolated from the markets of Europe on account of the protective tariff wall erected by the Fordney-McCumber tariff law, and for the very reason that the markets of America for the sale of both livestock and grain are controlled by and are in the hands of big business. The stockyards offer simply a selected market for livestock, only open to the stockyard speculator; the same may be said of the grain market.

I do say with all the power that I possess that the American farmer, the man who builded and made prosperous this great Nation, can never again be prosperous in this great country until the markets of the world are open to his products. You tell him, "Do not produce so much wheat," but he has his wheat land. You say, "Do not produce so many hogs," but he has his equipment and capital for such. You say the same thing about his cattle, but he has his stock ranch, equipment, and a mortgage to his local banks upon his livestock. If foreclosed, it bankrupts the stock farmer and the banker alike.

Why, then, this condition of the real man of the Nation, the most intelligent, moral citizen of this great America? And when I say this I am willing to back it up with our national data. The great agricultural State of Iowa has the lowest percentage of illiteracy of any State of the entire United States, and perhaps of any equal area and equal population in the entire world, the same being 1.8 for males in the cities, 1.2 for males in the rural or country districts, 1.6 for females in the cities, and 1.1 for females in the rural or country districts.

Gentlemen, is it any wonder you have the Farmer-Labor vote predominating in the Northwest, West, and in the Rocky Mountain divisions of this great Nation? Are those toiling, struggling, progressive citizens who have endured the storms and builded an intelligent part of this Government receiving their share in the profits from toil? They have helped build this Nation. Are they, like the great railroads that span the country, practically guaranteed 5¾ per cent upon their investment?

Were those same farmers given a bonus to tame the wilderness and cause the once desolate country west of the Mississippi River, the home of the buffalo, antelope, and elk, to change by the plow into a fertile country and to blossom like a rose? I ask you, gentlemen, as servants of the masses of this great country, what is to become of the American farmer? Already more than 2,000,000 of them the past year have left the great American farm, the great civilizing and enlightening sphere of nature, and have gone from rural life to the city. Shall this continue until only a remnant of this wonderful, toiling, producing, and equalizing portion of our people remain for the raising of the food products of the whole people? What will it mean? The answer is very clear; it will mean in a very brief period disaster to all the people, and more especially the wage earner.

The all-important question now is, What will help the farmer of the Middle West, Northwest, and Mountain States, in fact the farmers of the whole Nation? What solution can be found for the problem that confronts this greater part of our National Government, so widely separated in the lack of manufacturing and so wound up in livestock and farming production that it does not receive any very direct benefits from national legislation and especially that legislation that goes to very much of the protected interests of the Nation; but in turn this protection is reflected in the high price that the farmer must pay for the things he is compelled to buy.

The Republican Party that was returned to power by the greatest majority ever known in the history of this Government some three and a half years ago and has been responsible to the people of the Nation for legislation and management of the affairs of Government since that date promised the people economy, prosperity, and above all honesty in governmental affairs. Has it made good? This question will be answered by the intelligent electorate in the next election.

It enacted a protective tariff. For whom did it legislate? Principally for the great special interests, the cotton and wool manufacturer. Bankruptcy has come to more than 3,500,000 farmers by increasing the cost of all his supplies and decreasing his market for his products. Look at these figures, and then say whether the party in power has helped the farmer, the producer. A nation that has 34,000,000 people engaged in a gainful operation of feeding the other 70,000,000, and still that 34,000,000 are unable to make both ends meet. It would appear that we are drifting without proper leadership in the Nation. A nation where the farmer sold his farm product in 1923 for $7,500,000,000 on the market provided, and then the same farm product was sold on the retail markets of this Nation for $22,500,000,000.

Should not the farmer realize at least 50 per cent on each dollar of his farm products? A country that has reduced her farm population several millions in the past three years and has reduced farm ownership from 6,500,000 to 3,000,000 farm owners.

Taxes have increased upon the farmers until it has brought ruin to thousands of them. In my own State, New Mexico, the crime of deflation put our livestock men out of business by the thousands. Wall Street, by manipulation of the Federal reserve banks of this country, brought a part of this catastrophe to the American farmer.

The latest data concerning values are: 1917 average value of plow land in the United States, $70 per acre; in 1920 average value, $90 per acre; in 1923 average value of farm land per acre, $22. In 1912, 2,000 farmers went bankrupt. In 1922, 6,000 farmers went bankrupt. In 1923, 1 farmer in every 12 lost his farm. The railroads have $407,464,808 borrowed from the Government; 10 per cent of our public land, or 312 square miles, have been given the railroads of the Nation by the Government of the United States. And yet, through the Interstate Commerce Commission rulings, the railroads of the Nation are to receive in earnings upon invested capital at a fixed valuation a net return of at least 5¾ per cent upon each dollar.

Would not the American farmer be a happy man to-day if after his taxes and fixed charges were paid that he should have left a return of 5¾ per cent upon each dollar of his investment?

To give you some idea of how unequal the distribution of the return of earnings are as compared with the farmer, who receives at this time practically nothing upon his investment, I want to cite here some very important data for the farmers' information and for those who sympathize with his unequal struggle at this period of our history.

This data has been recently published in the leading journals and no doubt is authentic and correct:

The Steel Trust reports a surplus net income of $54,259,993 after all charges and dividends have been met.

The Westinghouse Air Brake Co. reports net profits of $9,788,597 after healthy amounts were set aside to pay for taxes, depreciation, and depletion. This does not include profits of $10,000,000 that were put back into the business in the form of stock dividends. The previous year's profits were $6,954,915.

The Columbia Gas & Electric Co. reports a clear profit of $1,071,004 for February of this year. In January of this year the American Waterworks & Electric Co. made a clear profit of $1,333,907.

The reason for numerous scandals associated with petroleum is indicated by the Phillips Petroleum Co.'s report. Last year this concern made a profit of $12,452,030 after interest and taxes were cared for. These startling figures are against a profit of $9,385,035 the previous year.

The North American Co., a holding company for public utility corporations throughout the country, has a net profit of $9,385,458 after all taxes, interest, depreciation, and other charges have been met. This is equal to $3.11 on every $10 share of common stock.

The California Petroleum Corporation shows a net profit of $6,104,498 after interest, depreciation, depletion, Federal taxes, fancy salaries, and other charges were met. This compares with a profit of $3,655,594 the previous year.

Dividend payments by the 39 companies comprising the Standard Oil group during the first three months of the present year aggregate $34,975,867. This is the largest total for any three months since the United States Supreme Court "smashed" the Oil Trust in 1911.

### THE M'NARY-HAUGEN BILL

Mr. WEFALD. Mr. Speaker, we are about to vote on the McNary-Haugen bill, the only farm-relief measure that we will have a chance to vote on in this session. I have given this measure my support up until this time, and I shall vote for it on final passage. I have taken my orders from the ones that have been in command of the farm-bloc forces in the House. I have only once spoken on the bill during the debate; that was to repel misinformation coming out of my own State as to farm conditions and financial conditions in general. Otherwise I have kept still in order to save time, that it should not be said that I took part in a filibuster. Under the five-minute rule the friends of the bill let the opposition have a hearing and limited replies to the very briefest space of time.

I have also voted against all amendments except one in order to comply with the wishes of those who had the bill in charge. They did not wish to accept any amendments, because that might endanger the passage of the bill. I voted for one amendment by the gentleman from Kentucky [Mr. KINCHELOE], the intent of which was to increase the price to the farmer 10 per cent over the ratio price at which the corporation should purchase the basic agricultural commodities. Of course, this amendment was not adopted, and coming from the sworn enemy of the bill it had no chance of being adopted; but I voted for it because the ratio price of the agricultural commodities that are concerned in this bill is the average price of the same products between the years of 1905 and 1914, and the prices that the farmers received for their products during those years were not in proportion to the price the farmers had to pay for manufactured articles due to tariff laws then in existence. This phase of the bill—this asking for half a loaf or less, where the farmer is supposed to sit in at the table with the rest—is the weakest part of the bill; yet we have said in this discussion that we are asking the same treatment for the farmer as for the other big industries.

It has been very interesting to listen to the discussions on this bill; there have been many true things said, but also a lot of bunk on both sides; it has been very trying to keep still, but no votes have been changed by discussion. We could have voted on this bill the day it was brought in here and the result would have been the same as it will be when we vote to-day. There is no way of convincing the Members from the South that because cotton is a good price to-day it may yet some time take its place on the beggar's seat along with wheat and pork and cattle as far as price goes; nor is it possible to appeal to the heart and the tender feelings of New England, New York, and other sections of our country that revel in pleasure and luxury because of the cheap food that the West furnishes, for they have no heart and nothing but feelings of selfishness.

The men in this House who always prate about taking the wider view of things, who always caution against sectionalism, will in their vote upon this bill show clearer than it has ever been shown in the past that they can not see beyond their own narrow State boundaries.

Mr. Speaker, I am so sorry that the whole country could not have heard the speech of that apostle of the creed of New England, Mr. LUCE. I think it is a long time since a speech was delivered on the floor of this House or on any other rostrum that breathed such a spirit of penury, such narrow sectionalism, such bigoted cocksureness of his own position as that of the gentleman of Massachusetts. Could the whole country have heard that speech it would forever have spelled the doom of the high protective tariff; it would forever have taken away from New England the crutches of tariff protection that we have so often voted it, because we were always met with such a heart-rending appeal when this sanctimonious exponent of puritanism saw the wheels of industry slow up a bit.

This same pharisaical, disguised beggar waxes very wrothy when the great agricultural West now asks at the hands of Congress a staff to lean on while carrying such tremendous burdens as it now carries. Its spokesman here in Congress spoke in no unmistakable terms.

The lucid Mr. LUCE left no one in the dark as to the position of New England on this question.

So long has he and his able colleagues been coming before Congress pleading for help for bleak and barren New England in the shape of high protective tariff, subsidy, bonus, and God knows what not, that he does not want to call the McNary-Haugen bill either a tariff, a subsidy, or a bonus. These remedies were in the first place designed only to help industrial New England; he wants them to be used only for that purpose. Tariff, subsidy, and bonus are all right in their place and for their rightful purpose, namely, to help New England and also to help those that stand by New England; but—perish the thought—they were never intended to help any other part of the country, especially the West. The distinguished gentleman says that the protective tariff was designed to help the whole country. That means it should help the tariff barons of New England—this dying race of parsimonious, race-conscious, self-constituted bearers of American culture—whose interest in the foreign or alien population that toil in its shops and factories extends this far, that it is advisable to have cheap food for them that they can continue to work for cheap wages.

Nothing that has been said during these debates will so elucidate the unbridgeable gulf between the agricultural West and the industrial East as the Luciferian language of the lucid Mr. LUCE.

I am going to do my share with the people of my district and State, that whenever the tariff becomes an issue again my people will understand the position of New England and the rest of the East; that they will not be fooled by the cry that a high protective tariff will help the whole country.

To bring to my people that knowledge I am going to quote from the speech made in this House by the gentleman from Massachusetts on May 22.

The gentlemen in this House that he had heard pleading the cause of the farmers of the West were not radicals. They are regular Republicans, men who have been elected on the Republican platform with its promise to the farmer; men who have been preaching in their various districts the gospel of the blessings of the high protective tariff. The plan of the radicals was not quite so radical. These men believed that "what is sauce for the goose is sauce for the gander," which again applied to the agricultural crisis would mean that if the power of the Government, by special legislation, can be invoked to help New England and the industrial East it can be invoked also to help the West in this its most extraordinary crisis. For that reason they took the leadership in this matter out of the hands of the radicals to employ safe, sound, and workable methods, to apply the same principle that time and again had been used with such success to revive industry.

But New England balks at this proposal. The gentleman from Massachusetts gets very much agitated over the prospect that his city might have to pay $80,000 more per year for the bread it eats, the bread on which the farmer never got paid his cost of production. It is all right that the high protective tariff made his city prosperous, but it is wrong for the western Republicans that helped him pass the Fordney-McCumber tariff act now to come and propose the same kind of a remedy for agriculture, whether it is to be called tariff, subsidy, or bonus. It might cut down the New England profits slightly in order to help the farmers a trifle.

So he turns on these, his erstwhile friends and high-tariff champions, saying, "You are distressed because the farmers operating the worst lands or those in the worst situation can no longer make a living. And you are asking us, 80,000,000 of the consumers of the country, to pay for the cost of cultivating the worst lands."

Yet the people on these "worthless" lands were represented in Congress by men who voted the high protective tariff for

New England, and they came back to their constituents and said:

We voted a high protective tariff that the manufacturers in the bleak New England States may do well and get prosperous so that they can pay you well for the wheat you raise.

But I wish to let Mr. LUCE speak. He says further:

* * * everywhere bread is the staff of life for the poor. The rich man eats little, if any, more bread than the poor man. Indeed, the diversity of his diet makes it probable that he eats less wheat than the poor man. So you are going to impose a tax that will be practically the same whether it is paid by those who are in the greatest distress or those who hardly feel the depression at all.

This is true and very well put, but the gentleman forgets that nearly everything that the industrial East turns out, and upon the output of which there is superimposed a great profit by reason of the protective tariff, is sold to the poor, or the comparatively poor—among which are the farmers on the "worst" lands—such as common clothing, tools, utensils, and the ordinary common necessities of life in the output of industry. The rich buy their fine clothes and luxuries mostly of foreign make and manufacture; their personal wants do not keep many wheels turning or spindles humming in this country.

With the honorable gentleman from Massachusetts the old adage "Even exchange is no robbery" does evidently not hold good. He does not favor even exchange between agriculture and industry; there must be a profit one way, and that to the East.

I wish to pause right here and point out an object lesson that I myself at least have drawn from the gentleman's speech, namely, that if the poor man who toils in the city eats the wheat the farmer raises and if the farmers consume the greatest part of the products turned out by this man's toil the laborers and the farmers have a problem in common, that, namely, of exchanging the products of their toil with each other so that both can live and let live. These people, thinking of each other, should carve on the lintel over their door the adage that Mr. LUCE does not believe in, "Even exchange is no robbery." Whether they then sell each other as dear as they can or as cheap as they can will not make much difference. When the farmer and the laboring man wake up to the importance of one to the other, when they understand that one produces what the other one consumes and that to-day the one that produces neither food nor the products of industry is the one that is benefited by the high protective tariff to enhance the price of his products and also profits by the low price on farm products, they will clean house and set up a nation-wide Farmer-Labor Party, and all will come into their own.

The gentleman from Massachusetts has inquired of experts on the kind of legislation that is proposed here, namely, of the gentleman from Minnesota [Mr. ANDERSON], as to whether or not the wild scheme will work. He tells us that Mr. ANDERSON admitted that it will work for a while. So Mr. LUCE admits:

I grant you this will work. I grant you that for a time you may persuade the farmers to continue the dangerous and costly practice of wasting their energies in the wrong direction.

Of course it is wasting their energies in the wrong direction to try to get cost of production for what they sell.

With blistering scorn he tells his former high tariff friends that they are trying to get the farmers to defy the laws of "supply and demand," and that a catastrophe will follow. Then thunders this gentleman who never thinks a sectional thought, "You set up group against group and class against class and section against section. You come here and demand public alms because you are in distress, and so you invite every other group and every other section in the land to come here for the same purpose."

How it must have gladdened the heart of Mr. TINCHER and all the other Republican farmer leaders who voted for high tariff for the benefit of the East to hear that.

There has been nothing said in the whole debate that throws such an illuminating light on the hopelessness of the Congress doing anything for the farmer at this or any other time and the utter insincerity of the men who frown on every sectional demand on Congress as the colloquy between Mr. LUCE and Mr. SUMMERS of Washington.

I quote from the CONGRESSIONAL RECORD for May 22, as follows:

Mr. SUMMERS of Washington. The gentleman had a good deal to say about supply and demand and economic forces and that sort of thing. Does that apply to this knife, which cost me 75 cents but which I believe could be made to sell at 30 cents; but it would have been manufactured in Japan or Germany instead of Pennsylvania or Connecticut?

Mr. LUCE. I am a Yankee, and it is said to be the prerogative of a Yankee to answer one question by asking another. Did the gentleman vote for the tariff which produced that price? [Laughter and applause.] And if he voted for the tariff, why?

Mr. SUMMERS of Washington. It is the first time I have had the opportunity of saying I will never vote for a tariff that does not give its benefits to all classes and all parts of the country. [Applause.]

So at least one prominent Republican is beginning to see some light, which is good.

But the clincher in this confession of faith and the admission that I would like to bring to the consciousness of every person not a tariff baron was drawn from Mr. LUCE by Mr. CONNALLY of Texas.

Again quoting the RECORD:

Mr. CONNALLY of Texas. The gentleman from Massachusetts asked the gentleman from Washington if he voted for the tariff act that did that. The gentleman from Massachusetts voted for it, did he not?

Mr. LUCE. I voted against the tariff on food——

Mr. CONNALLY of Texas. I am talking about the general tariff law, the Fordney-McCumber bill. Did not the gentleman vote for that?

Mr. LUCE. I have the impression I did.

Mr. Speaker, it has been a waste of time for any sane, sober-minded man to discuss the merits of this bill with anybody so prejudiced, with a vision so warped, as the gentleman from Massachusetts. I have nothing against him personally. I have singled him out because he was the most outspoken one of the Republican opposition to the bill as well as the one who set out his reasons in the clearest language and did not beat around the bush with what he had to say.

You can not make blind men see except by a miracle, and the age of miracles is past. About as much was accomplished by discussing this bill on its merits as to make a goose wet by sprinkling water on her.

And at that I wish to say that the most wonderful propaganda was carried on in favor of this measure that has ever been carried on for any farmer-relief measure in the history of the country. All honor to the men that tried to make blind men see by persuasion.

This measure, I am quite confident, will fail of passage, Mr. Speaker; the Republican majority will be held mainly responsible by the people for its defeat, yet the Democrats are equally guilty with them. In this matter, as so often in other matters, Democrats come to the assistance of the stand-pat element in the Republican Party when the interest of special and favored interests are at stake.

In the matter of sectionalism the South yields very little to New England; having to struggle with the race question shuts it forever off from any understanding of the aims and aspirations of the West. Its leaders are mostly brilliant lawyers—they are all great orators—but they are continually riding their hobbyhorse, the Constitution. In it they can find excuse for any and all of their acts.

Anything that savors of progress and justice for the toiling masses, anything that touches the border line of charity is forbidden by the Constitution.

Their interpretation of the McNary-Haugen bill is that it will put the Government in business, which will be all wrong if that business is not all exclusively for the benefit of the South.

I shall not lay this charge against the whole Democratic membership; we have had some of our best supporters among the Democrats, a scattering few of the rank and file of the men of the South standing with us. But I wish to single out one Democratic leader from the South that delivered telling blows against this bill and show how he has changed his mind since the early part of 1920. I have in mind the gentleman from Kentucky, Mr. KINCHELOE.

Down in Kentucky the farmers raise tobacco, and tobacco is now selling at a good price. Then, why should a Representative from Kentucky be for a bill that would help the farmers in the Northwest? He has sympathy with the farmers; he almost weeps for them, but as long as under the underlying principles of this bill the price of tobacco will not be increased because it is now bringing a relatively high price, he does not want the bill to pass. He pleads for cooperative marketing; he pleads for the farmers working out their own salvation; he quotes President Coolidge's message on the farm situation or farm relief—like all the Democrats who have spoken—and does it only to taunt the Republicans who support this measure.

He said in his speech, among other things, the following:

This corporation will sell its exportable surplus on the markets of the world in Europe, which will permit the laboring people of Europe to get the benefit of it at a low price.

Yet this very same gentleman was willing to extend the aid of the Government to the tobacco growers of the South when tobacco was selling much lower than now in very much the same manner as proposed in this bill. As a proof of this I present a bill introduced in Congress by the gentleman in 1920.

[Sixty-sixth Congress, second session, in the House of Representatives, April 12, 1920]

Mr. KINCHELOE introduced the following bill; which was referred to the Committee on Ways and Means and ordered to be printed:

A bill (H. R. 13578) to amend the War Finance Corporation act

*Be it enacted, etc.*, That the War Finance Corporation act, approved April 5, 1918, is hereby amended by adding to Title I thereof a new section, to read as follows:

"SEC. 22. That the corporation shall be empowered and authorized to pay to any person, firm, corporation, or association engaged in business in the United States the contract price of supplies of tobacco hereafter purchased, or agreed to be purchased, by the Italian or French Governments, or any other European Government buying any of said tobacco which has and maintains a government monopoly thereon, from any such person, firm, corporation, or association, and to accept in full payment of the moneys so advanced the bonds, obligations, or other evidence of indebtedness to be issued by either of said Governments for the payment of moneys so advanced, to bear interest at the rate of 6 per cent per annum from the date of such advance: *Provided*, That the total shall not exceed $50,000,000: *Provided further*, That the War Finance Corporation is hereby authorized and directed to retain a first-mortgage lien in the bonds, obligations, or other evidence of indebtedness to be issued to it by either of said Governments upon all the tobacco so purchased by either of them and upon all the warehouse receipts issued by either of them, upon all of the said tobacco so purchased, to better secure the payment of the indebtedness so incurred.

"There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $50,000,000, or so much thereof as may be necessary, for the purpose of making payments by the said corporation as and when required under the provisions of this section."

How does this bill square with the gentleman's criticism of the McNary-Haugen bill?

The gentleman got no action on his bill in the session in which it was introduced, but, according to the CONGRESSIONAL RECORD for the third session of the Sixty-sixth Congress, page 526, I find that the gentleman from Kentucky, speaking on S. J. Res. 212, "a resolution directing the War Finance Corporation to take certain action for the relief of the present depression in the agricultural sections of the country, and for other purposes," said, among other things:

I introduced an amendment to the War Finance corporation act at the last session of Congress in order to enlarge its powers so that it could loan money directly to foreign governments that had a government monopoly on tobacco for the purpose of buying tobacco.

How is that? What about the Government assisting the tobacco growers with $50,000,000? Is there more justice in that than to assist the whole wheat and cattle raising sections with $200,000,000? It makes some difference whose ox is gored.

Much has been said in the discussions of the McNary-Haugen bill about overproduction that would follow if anything should be done to give the farmers cost of production. It was said by the men from New England and it was said by the men from the South. The viewpoint of the gentlemen from the South has changed since 1920. I found in the CONGRESSIONAL RECORD for the third session of the Sixty-sixth Congress the sanest statement on the fallacy of the cry of overproduction of farm products I have yet met with. Discussing the Senate resolution to extend the scope of the War Finance Corporation, Mr. STEAGALL, of Alabama, speaking on this particular charge of overproduction, said some very pertinent things. The RECORD reads:

There is no overproduction of necessaries in this country to-day. [Applause.] God Almighty does not do things in a foolhardy way. There is not one more drop of water in the ocean than there ought to be, and there has never been a pound more cotton or corn or wheat yielded from the soil of this land than was best for mankind. [Applause.] It is mockery to treat the bounties and blessings of nature as a misfortune, and it is ridiculous to say that large crops are a curse. If such arguments were true, we might ask if it would not be well to import a few more anarchists to burn and destroy some of them. There is nothing to it. [Applause.]

That was when cotton was sick and needed relief; it is different now, when cotton is cocky.

It is plain that there is no use for the people of the West to look to the Democratic Party for relief, either. It should be held jointly responsible with the Republican Party for its failure to grant justice to the farmer. There are enough, both Republicans and Democrats, of the rank and file to pass this, if the Democratic leaders will say the word; but the Democratic Party is a sectional party, a party without vision, as much like the Republican Party as one pea is like another.

Every farmer in the land should have this in mind when he casts his vote at the next election: No party-bound man can rightly serve the interest of the people.

It is true that some men who do not live either in New England or in the South fought this bill hard. They did not do it for sectional reasons. Some men, otherwise progressive, fought the bill for various reasons.

One argument has been used against the bill with telling effect, namely, that it was drawn by Mr. Brand, Assistant Secretary of Agriculture, who is commonly known as a Government official who is unduly intimate with the big packers. This argument has prejudiced many good men against the bill. I vote for it in spite of this. I am willing to give the experiment a trial. I am well aware of the fact that even if the bill is correctly drawn and embodies the soundest of business principles, this whole venture, if the bill becomes a law, may be killed by administration. But I am also willing to risk that. I know that few human inventions are perfect when first thought out; experience and change perfects. Our Government was intended to become the greatest experimental laboratory in political and social science that the world had even seen. We have made plenty of mistakes along those lines before, but we do not stop experimenting on that account.

I am in thorough accord with the basic thought of the McNary-Haugen bill. It is a plain, simple idea, namely, that the farmer shall be entitled to cost of production of the things that he produces plus a profit. It asks the same relative price for farm products that the farmer pays for the goods he must buy. If the bill falls short in any way, it is because it is too modest and does not ask enough. The pre-war price level was also against the farmer. Whether we now win or lose, we have made great strides forward, we people of the West. Four years ago no one would have dared to dream that the farmers would come before Congress and ask something like the same kind of treatment that others have received at its hands. No wonder the industrial East looks horrified; but if we lose now we shall be back again to present our claim for consideration. We shall keep on until either we are placed on the same level with the rest—lifted up to their level—or we shall bring those who now profiteer at our expense down to our level. The longer you stave off the day of reckoning the more we are going to ask of you.

In the McNary-Haugen bill we only ask for a little bagatelle of what has been taken from us by acts of Congress in the laws that it has passed from time to time and thereby allowed others to prosper at our expense. We will be back here some time and ask the same treatment that Congress extended to the Government of Great Britain when it extended the time of payment on its obligations due us to 62 years and cut the interest rate to 3 per cent. We will ask revision of the Federal reserve act in the interest of the people. We will ask reduction of cost of transportation. If the farmer must continue to sell his products in the world market, he will demand that he does not have to buy what he needs in a highly protected one.

The center aisle in this House that now divides the Republican and the Democratic Parties will be less of a dividing line after the next election than it is now. The "old guard" in both parties will be smaller in number and the progressive element will better know how to find each other. Let us hope that men will come back here not with hearts filled with charity but with a sense of justice and a determination to do the right thing regardless of section or party.

## PHILIPPINE INDEPENDENCE

Mr. DYER. Mr. Speaker, there recently arrived in the United States Hon. Manuel L. Quezon, president of the Philippine Senate; Senator Osmeña; and Representative Recto to appear before the Committee on Insular Affairs of the House of Representatives in support of congressional action to give to the Philippine Islands their independence. The statement of Mr. Quezon is the latest to come to our attention from the Filipino people, of which Mr. Quezon is their undisputed leader. On May 5 his statement, in part, before the House Committee on Insular Affairs was as follows:

Mr. Chairman and gentlemen of the committee, I feel that I am appearing before you under the very best auspices. The few kind words of welcome with which the chairman received us are indeed very encouraging and the wonderful presentation of the Philippine cause made by the lady who has just preceded me has, I think, made some impression upon the committee. The influence of women in this country is great and I hope will be decisive to bring about the independence of the Philippine Islands.

Mr. Chairman, I shall be very brief this morning. This committee, as well as the Senate Committee on Territories and Insular Possessions, has had, as I understand, occasion to hear from our able and patriotic representatives here—Speaker Manuel Roxas and Commissioners GABALDON and GUEVARA—the facts regarding the present situation in the Philippines. So unless questioned by members of the committee, I shall not go into details. I shall address myself merely to the purpose of our visit, and this in as brief a manner as possible in view of our desire that these hearings may now close, so that the committee may proceed to take some definite action.

Senator Osmeña, Representative Recto, and myself have been sent here by the Philippine Legislature to lay before the Congress of the United States once more the petition of our people that they be granted immediate and complete independence. Senator Osmeña and I belong to the same party, which constitutes the majority party in the legislature. Representative Recto is the minority leader in the lower house. In this mission, then, the only two political parties in the Philippine Islands are represented. But we are not only speaking for our respective political parties nor even for the legislature alone. We speak for the people of the Philippine Islands, because the question of Philippine independence is not a partisan or merely a political question in the Philippines; it is a national and vital question, one in the proper and prompt solution of which not only those actively engaged in politics are deeply interested, but everybody else—business men, farmers, laborers, men in the professions, and all others.

Our stand on this question has been repeatedly presented to the American people and Government. It has been the same from the first days of the American occupation to this day. We want to be allowed to set up an independent government that will permit the working out of our national life in such a manner as, in our opinion, will best secure our happiness, liberty, and prosperity. We feel that the granting of Philippine independence has been too long delayed, and we sincerely trust that this country may cover itself with glory by enacting legislation that will free the Philippine Islands—a noble culmination of the splendid work jointly undertaken by the American Nation and the Filipino people.

We know of no measure that can be enacted by this Congress whose beneficial results to mankind will be as enduring and far-reaching as this one. You will thereby prove yourselves once more loyal to your history, your traditions, and the principles upon which this Republic was founded, and in addition you will promote the cause of peace, of freedom, and of good will among nations.

We shall not, Mr. Chairman, indulge in any abstract discussion of the right of the Filipino people to have independence now. There is one aspect of this question which deserves special consideration and ought to be, in our opinion, all-sufficient to move Congress to act.

By the enactment of the Jones law in 1916, which, in its preamble, states that it is the purpose of the United States to grant the Philippines their independence as soon as a stable government can be established therein, and by the acceptance by the Filipino people of the terms of this act a solemn covenant was entered into between the people of the United States on the one hand and the Filipino people on the other, whereby we bound ourselves to carry out the provisions of that act and bring about a situation that would make possible the establishment of a stable government, while you bound yourselves to grant us independence as soon as this condition came into existence in the islands.

We have faithfully complied with the terms and provisions of this act. We organized a government in accordance with its terms; we elected the legislature provided therein, a legislature which has now been functioning for seven years; and not only can we establish a stable government but such government is already established and is in operation there. We have therefore fully performed our part of the covenant, and we feel that it is high time for you to do your part. It is beside the point to argue whether or not it would be advantageous economically or otherwise to grant the Philippines independence. The one single issue is whether or not we have a stable government in the Philippines or a stable government can be established therein. If so, as we most emphatically assert, and have time and again demonstrated, it is our belief that your plighted word gives you no alternative but the granting of independence. We rest our case right here, unless you desire to ask me some questions, which I will be only too glad to answer.

Preceding Mr. Quezon, Mr. Osmeña, and Mr. Recto came Hon. Manuel Roxas, speaker of the House of Representatives of the Philippines, as special commissioner for the same purpose. On January 8 of this year he issued a statement to the American Congress, signed by himself and the two Resident Commissioners from the Philippines, Hon. ISAURO GABALDON and Hon. PEDRO GUEVARA. I include that also as a part of my remarks:

PHILIPPINE INDEPENDENCE MISSION,
2034 TWENTIETH STREET,
*Washington, D. C., January 8, 1924.*

*To the Senate and House of Representatives of the United States, Washington, D. C.:*

On behalf of the Philippine Legislature and of the people of the Philippine Islands, the undersigned, members of the special Philippine mission, once more respectfully urge the Congress of the United States to consider the question of Philippine independence. We submit that the solution of this question has already been too long delayed, despite the reiterated petitions of the Filipinos. The people of the United States, with the enactment of the Jones law in 1916, formally and officially promised to recognize the independence of the Philippine Islands as soon as a stable government could be established therein. This requirement having been fully met, the Filipino people, through their legislature, in 1919 sent the first Philippine misson here with instructions to request the fulfillment of this promise. In 1922 a second mission was sent for the same purpose. Both missions laid before the constitutional representatives of the people of this country the facts that establish the existence in the Philippines of a stable government capable of insuring peace and tranquillity and the security of all, nationals and foreigners alike.

We are not unmindful of the fact that the American people and Government have been in the last few years confronted with serious problems that absorbed their attention and precluded the performance of the covenant that touches the life, liberty, and happiness of the Filipinos. But we are constrained to give voice to our people's deep regret and keen disappointment when the two independence missions returned to the Philippines without having secured their principal object. Although the future status of our country as an independent nation has been determined, still the delay in the granting of the promised independence is a matter of grave concern to the Filipino people. If we may speak with the candor of assured friendship, may we not say that the lack of a definite and satisfactory statement as to why the pledge has not been redeemed is paralyzing the progress and development of our country and is filling the hearts of our people with those doubts and misgivings which existed upon the implantation of American sovereignty and which required so many arduous efforts to dispel.

Twenty-five years have elapsed since our country came under the benevolent protection of your flag—an emblem of liberty and not of slavery, a symbol of humanity and civilization and not of selfishness and exploitation. A quarter of a century has passed, teeming with harmonious labors jointly undertaken by Americans and Filipinos for the welfare and freedom of our people. Permit us to bring to your notice that period of seven years of this relationship in which the Filipino people enjoyed a large measure of autonomy. Outside of our country it was a period of upheaval and disorder; within, under a Filipino-controlled government, it was a time of peace, of public tranquillity, of security for all citizens. America was obliged to bend all her energies toward the prosecution of the war and had to withdraw her troops from the Philippines. Without force and solely in virtue of the mutual faith between your people and our people, American sovereignty and international responsibilities in the Philippines were made secure through the agency of a Filipino-controlled government, deriving its powers from the peaceful suffrage of the people. Under such government our progress in all directions was so evident that President Harding himself declared it unequaled by any other people under similar conditions and within the same period of time.

No reason exists, if we read well into the history of our relationship, why there should be further delay in the granting of that which the Filipinos rightfully seek, that which in honor America has promised. Every passing day adds to our impatience, which only our absolute faith in your plighted word can allay. Strong is our confidence in you, but our country is so far away from yours, Filipino problems are so remote from your immediate interests, that our people are ever and naturally apprehensive lest in the course of our relationship some grave error might be committed not through the fault of your people or of our people but of persons called upon to carry out your liberal policies in the islands who mistakenly adopt an attitude at variance therewith. Such unfortunate incidents hamper the constructive work of our government, retard our progress, and destroy the harmonious relations so painstakingly built up between Americans and Filipinos. The present conflict with Governor General Wood is one of such incidents. It constitutes a bitter object lesson for us and should ever be a warning to all.

In keeping with the broad and liberal program mapped out by the Jones law, an autonomous régime was established in the Philippines. It was built up through the Anglo-Saxon process of development, not only by the passage of laws but as well through the establishment of constitutional practices and the adoption of democratic principles, all of which gave our people an ample autonomy compatible with the exer-

cise of America's international responsibilities. It was a government established with the cooperation and approval of the American representative, faithfully interpreting the liberal spirit and provisions of the organic law and the policies that brought about its enactment. It was not based on American theories alone, but adapted to our needs, our environment, and our ideals, and intended to transmute into actuality the avowed aim of the United States to give the Filipinos opportunity to prepare themselves for complete and absolute independence.

The development of the government thus founded has received the approval and encouragement of the American Republic. In 1919, when the first Philippine mission appeared before the Government of the United States, this was said:

> "Gradually and without violence the functions of the government have been taken over by the people of the islands themselves, leaving only the tenuous connection of the Governor General."

The government so organized has successfully functioned. On December 7, 1920, the President of the United States in his message to Congress urged the granting of independence without further delay on the ground that the Filipinos had set up and satisfactorily maintained a stable government, and thus had fulfilled the one condition required in the Jones law.

While awaiting the promised freedom it has ever been unthinkable to our people that some of the political powers already guaranteed to them could be withdrawn, and withdrawn without giving any just and legitimate reason. On the contrary, we have always believed that our government, established and developed with the consent of the United States, would be changed only by the installation of an independent Philippine republic. We have been most loath to think that such a structure could fall to pieces at the beck and command of one man. The American Government has assured us time and again that such a reversion could never happen. The late and well-beloved President Harding on June 20, 1922, said to the second Philippine mission:

> "No backward step is contemplated; no diminution of your domestic control is to be sought."

Yet what we feared might occur, due to the distance of our country from yours and the difference of American from Filipino interests and problems, has come to pass. Governor General Wood has set at naught all understandings the Filipino people have had with the American Government and has ignored the assurance given them by the late President. He has most decidedly taken a backward step by depriving our government of the key and the nerve center of the former autonomous administration, the counsel of the Filipinos. He has surrounded himself with a secret cabinet composed of military and other extra legal advisers, which has encroached upon the legitimate functions of the Filipino officials in the government. He has broken asunder the bonds of concord that united Americans and Filipinos after the bloody struggle of 1899, a concord that reached its highest expression in the first years of autonomous government. He has placed himself over and above the laws passed by the Philippine Legislature, laws that have never been declared null and void by the courts or by the Congress of the United States. He has claimed for himself an unlimited executive responsibility that neither the existing laws nor the practices already established have recognized. He has deviated from the policy of the American Government to give the Filipino people an ever-increasing self-government, a policy announced by every President beginning with President McKinley and ratified by the Congress of the United States in the Jones law. He has abused the veto power, exercising it on the slightest pretext on matters of purely local concern that did not affect the sovereignty of the United States or its international obligations. Thus he has attempted to control our legislature, a prerogative that has never been claimed by the elected executives of America, by the President of the United States, or the governors of the several States. He has disregarded the rights of the Senate in his exercise of the appointing power. He has destroyed our budget system, the greatest achievement in the financial administration of our government. He has endeavored to defeat the economic policies duly laid down by the Philippine Legislature for the protection of the rights and interests of the Filipino people in the development of the resources of the islands.

The theories and principles underlying Governor Wood's actions are utterly repugnant to the policies that go to make up the corner stone of Philippine autonomous government. To inject the autocracy of an irresponsible appointed executive into a representative democracy such as the Congress of the United States implanted in the Philippines sets at defiance every American tradition, violates that good faith that has been the precious and untarnished heritage of the American people, and is incompatible with any workable theory of free government.

The freedom and the happiness of the Filipino people, to which the honor of America and the patriotism of the Filipinos are equally committed, are too sacred to be the plaything of a one-man power. A reactionary and militaristic rule is a flagrant violation of the time-honored policy of the American Government toward the Philippines. It calls back to life old misunderstandings that are now fortunately buried and subverts the moral foundations of the humanitarian work so nobly accomplished by America in the Philippines.

The recent incidents simply serve to bring home the compelling need that the Philippine question be now settled once and for all. The liberal policies adopted and observed for more than two decades, the program of independence outlined after years of constant labor for the realization of which men of your country have given their best years, must not stop. It must be carried on to its logical conclusion. The time for Philippine independence has come. It can be postponed no longer. Filipino welfare calls for it; Filipino ideals long for it; and the good name and pledged faith of America require it. In deep gratitude for all that America has done for the Filipinos, in appreciation of her gracious treatment, in expectation of an even more friendly association in the future, we respectfully and earnestly submit that the next step in the development of our relationship be the fulfillment of the promise of the United States to our people, the immediate establishment of a Philippine free republic, consecrated to the ideals of liberty and justice which America has upheld throughout her history.

Respectfully submitted.

(Signed) MANUEL ROXAS,
*Speaker House of Representatives of the Philippine Islands, Special Commissioner.*

(Signed) PEDRO GUEVARA,
*Resident Commissioner.*

(Signed) ISAURO GABALDON,
*Resident Commissioner.*

Another view of the question of Philippine independence comes from Senator Sergio Osmeña, who is now in the United States as one of the representatives of the Filipino people pleading for independence. He recently made an address before the Philippine barristers of the University of the Philippines. His subject was the "Constitutional development of Philippine autonomy." He spoke as follows:

At first glance this appears to be purely an academic subject, but it is not so. In the background of our constitutional development loom our struggles for liberty against the natural opposition of the forces working for the preservation of the prerogatives of the existing power. This is a topic which is highly practical. We can measure up to the heights of our present-day responsibilities only by maintaining ever aflame in our bosoms the noble spirit animating these struggles, remembering always what our yesterday's duty has been, and what the goal is that we aspire to attain.

In the brief but inspiring annals of our political development there is a date that stands out in bold relief—August 29, 1916. It was then that, with the signature of President Wilson, the act of Congress commonly known as the Jones law went into effect. By virtue of this law the American people, through their constitutional representatives, made the solemn pledge that they would grant us our independence. If there had been some who inadvertently thought of and wished for annexation, all their dreams and hopes vanished once and for all. Congress made it clear that the Philippines was not to be an American colony or a Territory eventually to be made an integral part of the American Union. Our country shall be preserved for us Filipinos, and shall in due time be constituted into a separate nation with its own sovereignty.

Not only is the Jones law our new Magna Charta which proclaims and guarantees for all time our fundamental rights as a nation; recognizing our right to independence and our capacity to establish a government able to maintain that independence, that law has given us besides the facilities that enable us to shape our own destinies in accordance with our own desires, customs, and traditions. As its author, Congressman JONES, expressed it, the law virtually makes us Filipinos the arbiter of our own future. It is in us to determine when we are to occupy our allotted place among the sovereign nations of the world. Congress has placed in our hands the instruments of an autonomous government to the end that through the actual exercise of governmental powers we may be better prepared for the enjoyment of our promised liberty and the full responsibilities resulting therefrom.

What, then, are the duties of the Filipinos pending the concession of independence? Should we take an active part in the organization of a government which will hasten that concession? Must we wield the greatest possible amount of power in that government? My emphatic answer is yes, and I say that to strive for the highest degree of self-government is the patriotic duty of every Filipino, the only duty compatible with the principle upon which we have always insisted from the very beginning—that our country and our people have always had the capacity to maintain an independent government. To surrender our present lease of governmental power or our control over internal affairs for one reason or another is not only sheer cowardice but also is downright desertion of duty—treason against the nation.

The ideal of independence which the Filipinos have espoused, cherished, and upheld even before the advent of the Americans is not a mere abstract proposition. It is a practical problem within the realm of both philosophy and experience. Not only should the fact that capacity exists be alleged; it must also be proved. The past points to only one goal for us—that of liberty and independence. Self-government is the essence of liberty and the foundation stone of independence.

To espouse independence and at the same time renounce self-government are contradictory and incompatible positions. The wars of our past, firstly against Spain, and later against the United States, show beyond question that no foreign domination satisfactory to our people can be established here; that the Filipinos desire to govern themselves, and that, linked by this common aspiration, they stand prepared to sacrifice all of their age-long ideal until its attainment is realized. The defeat of our arms did not shake these basic purposes; the nation ratified them in peace and pledged itself to labor for them.

The task that awaits the Filipinos, pending the granting of our independence is one only, and it is clear—to strive for the reins of governmental power through all means not inconsistent with law. It has been so understood by our people since we had the opportunity to participate in the running of the affairs of our government.

Conscious of this duty, we have organized under the Jones law a domestic government in which we have assumed all the responsibility we could possibly assume by virtue of that legislation. As Congress did not give—because it could not very well have given to the Philippines—a governmental structure already made, and as it merely assured us our autonomy by means of an all-Filipino legislature elected by the people, vested with ample powers to organize an internal government, the first thing the legislature did was to entrust the powers of administration to Filipino hands. In so doing the legislature did not forget that the government sought to be established here was not a government for Americans but for Filipinos, founded on our own civilization; not a government of foreigners inspired by foreign ideals, but a government of Filipinos inspired by their own culture and with the best interests of their country in view. The legislature realized from the very beginning that the Governor General was an integral part of the government, but, not being responsible to the Filipino people, it is clear that his authority should be subordinated to the principle of Philippine autonomy. The legislature endeavored, therefore, to have the Governor General exercise his power with the aid and advice of Filipinos so that the internal government of our country might, in fact, be conducted by the Filipinos themselves.

All this the legislature did in accordance with the fundamental purpose behind the Jones law to place our country on the road leading to political emancipation, and it was done with the express sanction of the representatives of the American people in Congress and out of Congress. This transformation of the Philippine Government from a government of limited powers under American direction to one of autonomous powers under Filipino control was not brought about in an instant; it was the joint accomplishment of Americans and Filipinos working together for a period of more than seven years. Not only did the Governor General approve the measure adopted; the Government at Washington also concurred in that approval, sometimes directly and expressly, at other times tacitly by passive acquiescence. Congress, which, during all that time, had reserved to itself the power to annul the laws of the legislature, in not annulling any of them, showed that it lent its approval to the construction being given to the Jones law by the Filipinos.

There is no question, therefore, that all this governmental power we have, all this autonomy we now enjoy, is not only perfectly legitimate but is also a strictly legal acquisition. It is the voice of a subject people finding partial echo in a liberal legislation. If the detractors of Filipino autonomy think that this is a crime, and desire now to point their accusing fingers to its authors, they can readily do so. The perpetrators are, first, the Filipino people who desire to have control of their government, and second, the American people who, rightly and justly, consent to it.

It is said that the legislature has overstepped the limits of its authority and has promulgated measures that encroach upon the authority of the Governor General. And the argument is advanced that the Jones law, patterned as it is after the American Constitution, should be interpreted in the light of the well-known principle of separation of powers. Let us inquire into the merits of this proposition.

I shall begin by affirming that the organic character of the Jones law is not derived from the American Constitution and that the government in the Philippines is not of the presidential type. The immediate constitutional parent of the Jones law is the law of Congress of July 1, 1902, and the predecessor of this latter law is McKinley's instructions to the Philippine Commission. Neither the act of July 1, 1902, nor the President's instructions to the commission, in so far as anything organic in them is concerned, is based on the Constitution of the United States. Their more immediate source is the American system of Territorial government, more particularly the Territorial plan of government which was prepared for Louisiana by Jefferson, and their remote source is the system of colonial government existing in America before the Thirteen Colonies obtained their independence. I have carefully looked over the various organic charters of the American Colonies, as well as the various laws passed by the Congress of the United States for the government of her so-called Territories, and I failed to find anything substantiating the assertion that those systems of government are identical with the type of government established by the Constitution of the United States.

In order that in the Philippines we may have a presidential type of government it is necessary, among other things, that the chief executive be responsible to the people or be elected by them, and yet that position is now filled by appointment by the President of the United States in accordance with the Jones law. A vital difference between a parliamentary and a presidential system of government consists in the fact that under the parliamentary form the acknowledged spokesman of the people are executive officials and leaders of the legislative branch at the same time. It may be said that the people elect them indirectly in electing the majority in the lower house. In a presidential form of government, on the other hand, the people elect the chief executive, and the chief executive performs his functions independently of congress, and vice versa. In the first case there is practically a fusion between the legislature and the executive; in the second case there is a theoretical separation between the two.

The theory of separation of powers is characteristic of the Constitution of the United States. Locke was the first to formulate a theory about the subject. Montesquieu took it up and completed it. Hence the tripartite division of the functions of a State into legislative, executive, and judicial functions. Montesquieu's theory rapidly spread throughout Europe. It influenced the first constitutions of the American States and was adopted with enthusiasm by the French revolutionists. The profound influence exerted by the French Revolution on all constitutional movements then and after accounts for the fact that in the majority of the constitutions of European countries the principle of division of powers has been proclaimed not in the sense adopted by North American conventions but in the sense outlined by the French National Assembly. When put into practice, however, Montesquieu's theory had to undergo several substantial changes. Far from confining itself to the enjoyment of functions it is supposed to exercise, each branch of the government has assumed additional functions; the legislative power usually exercises not only legislative but also judicial and administrative functions; the judicial power, both judicial and administrative functions; and the executive power usually takes a hand in legislative and judicial acts.

When Montesquieu said that despotism was inevitable if one individual as a delegate of the nation can make laws is a legislator, apply them as a judge, and enforce them as sovereign, he uttered a great truth which Jefferson, Adams, and Hamilton ratified when they defined despotism as the "concentration of sovereignty." But the fact that governmental powers should be separate does not show that they are separate in the sense that they should be absolutely independent of each other, nor that any one of them can function isolated from the rest. If that were the case, an intolerable situation would arise—the inaction of the social unit, the paralyzation of governmental activities. The powers of the State should be independent in the sense that neither of them should override the rest. The autonomy pertaining to each of the branches of government, however, does not and should not in any sense jeopardize that intimate relation and coordination which should exist between them as parts of a unit, as members of a whole.

The best proof that this theory of separation of powers should not be taken in its absolute meaning is furnished by the constitutional history of the United States. In practice the theory has become converted, not into a theory of division and separation but rather into one of mere differentiation. The three branches, far from separating from one another, seek coordination among themselves, seek mutual aid in their frequent and indispensable intercourse.

But whatever may be the real import of the theory of separation of powers in the United States the theory has not been applied by congressional legislation to the Government of the Philippine Islands in the manner in which it was applied there. In the first place, there is the unequivocal declaration by the United States Supreme Court that "the Constitution did not follow the flag into the Philippines," contrary to what was the case with the other territories. In the second place, we have McKinley's pronouncement that the purpose of America in extending her sovereignty here was not to apply her own theories of government but instead to insure the welfare, peace, and prosperity of the Filipino people, with due respect for even their prejudices if necessary. And lastly we have the significant fact that the various provisions of the United States Constitution and the constitutions of various States of the Union which specifically provide for the division of powers had not been incorporated either in the Jones law or in the other organic laws that preceded it. For instance, the well-known provision of the constitutions of the various States prohibiting persons exercising one function to exercise any other function does not exist in any of our organic laws. Neither do we find in the Jones law that portion of the United States Constitution which prohibits a member of the legislature to hold another public office under the authority of the Federal Government. In the act of July 1, 1902, which preceded the Jones law, this prohibition of the Constitution was not only not inserted but it was specifically provided that in the civil commission or upper branch of the Philippine Legislature there should be two groups—one composed of commissioners who at the same time were to hold office as secretaries of department, and another composed of commis-

sioners or legislators simply. The first group exercised both executive and legislative functions, and when acting as secretaries of department they were really a mere committee of the legislature.

Under President McKinley's instructions the civil executive power was, in a sense, also a committee of the legislative power. And under this organization, as was the case with that of the act of Congress of July 1, 1902, the Chief Executive was member and president of that commission. In the Jones law, which provides for a more advanced form of government, although the several powers are differentiated as in the preceding organic law, there is no constitutional provision requiring that there be complete and absolute separation between the executive and the legislative departments. So that when analyzed this law permits members of the legislature to occupy departmental posts, and, as a matter of fact, the position of secretary of the interior war for five years held by a member of the senate not only with the approval of the Governor General but also with the acquiescence of the President and the Congress of the United States. The conclusion reached, therefore, is that the theory of separation of powers, as interpreted in the light of the United States Constitution, has never been a fundamental theory of government in the Philippine Islands.

Whether in accordance with or in spite of the strict letter of our fundamental laws, the government in existence here has been evolved in much the same way that the government of other free countries has developed. There has been no unconditional adherence to one definite political theory. What was done was to establish practices that respond to the necessities of the hour and the legitimate aspirations of the people. Thus it was that when the civil commission was in control, when the Governor General was the chief executive and president at the same time of the upper house, a situation arose which required that there be a close understanding between the chief executive and the lower house through the speaker of the assembly. It was in that manner that the speakership became a sort of an institution in itself, a vital factor in governmental relations, and the center of gravity of Filipino participation in the government. When the autonomous government was established with three representative branches, all Filipino—namely, the senate, the house, and the cabinet—the council of state was conceived to meet the demands of an effective policy of coordination.

But if the present government in the Philippines is not of the presidential type, it is neither of the parliamentary type. The appearance of secretaries of department before either house of the legislature; their being constituted into a council of state together with the legislative leaders; and the preparation of the appropriations according to a budget system, are, among others, the distinctive features which make it more similar to the parliamentary system of government than to the presidential type. But that is all.

What we can state with certainty is that in speaking of our existing government it is unwise to be guided by mere glittering generalities. Let there be no blind submission to exotic theories. Those who maintain that the system of government existing here is the same as that existing in the United States, as well as those who insist that it is the genuine parliamentary system of government in vogue in various countries of Europe, are merely theorizing. Our system of government is ours, truly ours, product of our policies and of the progressive evolution of the institutions of our country, the natural outgrowth of our achievements in self-government. Whatever gaps and contradictions there may be, they merely show that the progress we have attained was attained only after a tenacious and persistent struggle between the people that demand liberty and the representatives of the sovereign power that have naturally resisted popular impatience. The organization of the departments with responsibilities clearly defined, with their heads amenable to popular responsibilities council of state as the symbol of the solidarity of our participation in the government and as a medium of coordination and harmony between the powers of the government; the budgetary system that insures an efficient administration of our finances and an effective popular control over the same; the Filipinization of the government as a whole as the tangible expression of our autonomy and as proof of our political capacity—are the outstanding features of this government of ours, which show our determination fearlessly to assume responsibility for the management of our affairs while we await the concession of our promised freedom.

It is to be noted also that this ideal of the Filipinos has always received the encouragement of the highest governmental authorities, at least in state papers. As early as McKinley's time, there was talk of the most effective Filipino participation in the government. Roosevelt went further when he declared it to be his intention to make of this government here a government by Filipinos aided by Americans instead of a government by Americans aided by Filipinos. Governor Smith, the man who so well knew how to interpret the object of Congress in giving us a national assembly, said that the evolution of the government here from a government by Americans aided by Filipinos into a government by Filipinos aided by Americans, and the education and preparation of the country for self-government had been the liberal policy of McKinley and Roosevelt and of Governors Taft, Wright, and Ide, his predecessors in office. Whatever might have been the difference of opinion among American statesmen as regards the final disposition of the islands and the terms of the concession of their independence, there never has been a responsible man in the successive Republican administrations in Washington that has ever denied the justice and feasibility of granting effective Filipino participation in the affairs of our Government. Indeed, this is now a national policy of the United States from the moment the Democratic administration under the leadership of President Wilson confirmed and reenforced the stand taken by the Republican administration.

That it is possible and practicable to have a government here controlled by Filipinos has been fully demonstrated under the Harrison administration. For seven years we beheld with our own eyes an efficient government functioning. Peace and order reigned throughout the archipelago. There was neither fanaticism nor racial antagonism to disturb the friendship and harmony which Americans, foreigners, and Filipinos enjoyed under the autonomous régime. Never has America been better liked and respected in these islands. Regardless of whatever defects that government might have—and no government on earth is free from defects—it gives to the Filipinos the greatest measure of advancement that they have ever enjoyed under American sovereignty. Despite the persistent opposition of misguided critics, the progress attained by the country was so noteworthy that in the words of President Harding it finds no parallel anywhere in the world. And the President was referring not to a progress that has come from the outside, brought hither by foreign instrumentalities, but to the progress attained by the people of the Philippines themselves "borne of confidence in their own energies and in the management of their own affairs."

The detractors of Filipino autonomy have always invoked the constitutional authority of the Governor General, as if the exercise of that authority must necessarily be in conflict with the powers placed in Filipino hands. In other words, they want it to appear that in the Government of the Philippines at least there is a duality of responsibility, and that if a conflict should arise it would necessarily be decided in favor of the representatives of the sovereign power. And they state that while the legislature and the secretaries of department are responsible solely to the Filipino people the Governor General is responsible to the highest authority—the Government of the United States.

When the question is properly examined, however, the demarcation line between the two responsibilities is well defined, and there can be no conflict between the two if only the spirit and letter of the law were followed. According to the Jones law, the object of the Congress of the United States is "to confer upon the Filipino people as large a control of their domestic affairs as can be given them without in the meantime impairing the exercise of the rights of sovereignty by the people of the United States." Following a cardinal rule of statutory construction, we can not interpret a law by giving effect only to a portion thereof without taking into account the statute in its entirety. If the object of Congress has been to prepare the Filipino people "to fully assume the responsibilities and enjoy all the privileges of complete independence," and to this end ample powers were given to the Filipinos in the management of their affairs, limited solely to a certain degree by the exercise of sovereignty by the people of the United States, the most logical application of the law would be to respect the free exercise by the Filipino people of the powers granted them, so long as that exercise does not hinder the exercise of the rights of sovereignty by the Government of the United States. These powers comprise executive, legislative, and judicial affairs. The only effect of the limitation prescribed by the Jones law in the exercise of our autonomous powers is to reserve in favor of the United States sufficient authority and power to prevent the impairment by the Filipino people of the national sovereignty and international obligations of the United States.

This reservation of power is effective and complete, even if the Jones law were to be construed in a broad and liberal sense. In the first place, the Philippine Legislature can not approve any law without the concurrence of the Governor General and in some cases without that of the President of the United States. Even if a law had received the sanction or concurrence of the Governor General or of the President of the United States, as the case may be, Congress still has the power to annul the same or declare it ineffective. And if Congress does not take action on the matter and the constitutionality of a law is raised in the courts of justice, these have the power to declare it null as unconstitutional. As regards administrative affairs, the same effective check exists; the chiefs of the various offices of the Government are under the administrative control of the department heads, who in turn are under the immediate supervision of the Governor General.

The phrase "responsibility without authority," which appears in recent official reports and which is now invoked as the suprema ratio for the unlimited exercise of executive powers, is nothing new in the history of American occupation in these islands. It was used for the first time when the Schurman commission rejected the proposi-

tion that America recognize the independence of the Philippines under an American protectorate. The phrase was repeated when the plan of government for the Philippine Islands was being discussed. It was said then that as long as America was sovereign in the Philippines her control over the insular government should be absolute and undisputed; and that whatever delegation of powers is granted to the inhabitants of the islands it must be accompanied by the necessary reservation in favor of the sovereign Nation whose rights should remain ample and unquestioned. But those who so believed had in mind precisely a Territorial form of government, because under such a form of government the Congress of the United States retains the right to veto any local legislation. It was never the understanding that the reservation of such authority commensurate with responsibility should be an absolute, unlimited, and all-embracing authority in the hands of an administrative official, be he Governor General or any other.

The authority of our organic laws does not spring from the Constitution of the United States but from the Congress of the United States. Congress can prescribe any form of government for the Philippine Islands. It can suppress present powers and substitute others. It can change our form of government for one more complicated or more simple, as it deems fit. It can concentrate powers in one person or distribute them among various persons or various groups.

But when Congress, in the exercise of powers granted it by the Constitution, organized a government here, and instead of conferring all the powers upon the Governor General, it provides for an autonomous government in the hands of the inhabitants as a preparation for their independence, its intention can not be questioned and must be respected as final. The error of those who insist that there is a duality of responsibility here, in their attempt to nullify our autonomy, consist precisely in mistaking international responsibility for internal responsibility. In the eyes of the foreign powers of the world we are, according to existing treaties, a dependency of the United States; and as such the United States internationally exercises direct, ample, and complete authority over us. But within the circle of our domestic government the authority of the United States has been delegated to the Filipino people, subject only to certain limitations. Absolute authority and control by the United States was possible only during the military régime. As armed resistance weakened the military governor had at first to share with and later on to surrender all his governmental powers to a civil entity—the commission. Those days of concentrated power, either military or civil, have, however, long passed. A liberal régime has taken the place of that of the days of the empire. The times have moved steadily toward liberty. The Filipinos know that theirs is now an autonomous régime; that they and not the Governor General are being subjected to a test; that they and not the Governor General are in duty bound to establish a stable government here; and that they, and only they, are committed to the task of hastening the day for the granting of their independence. They, therefore, have the right to follow and be guided by their own leaders and to expect that their control in the government of their own country be real, ample, and effective.

There recently appeared an editorial in the National Republican, of Washington, D. C., of March 22, 1924, claiming that Congress was without right to surrender the Philippines. As an answer to this charge which has been made a number of times in the United States and elsewhere, I include an article on this subject by Mr. Jorge Bocobo, dean of the College of Law of the University of the Philippines. His article was entitled, "Can Congress declare the Philippines independent?" His statement is as follows:

*It is contended by some advocates of permanent retention of the Philippines by the United States that the Congress has no constitutional power to grant independence to the Philippines, and that an amendment to the American Constitution would be necessary for such purpose. So novel a proposition is seriously advanced for the first time in the history of American occupation of the Philippines. Both the Congress and the executive department of the United States, as well as the American people in general, have always held that the power to declare the Philippines independent resides in the Congress. But, inasmuch as in certain quarters the point is vigorously pressed, the present discussion is submitted, wherein it is shown that the Congress of the United States is authorized by the Constitution to grant the boon of political independence to the Philippines.*

I

THE POWER TO DISPOSE

Article IV, section 3, of the United States Constitution provides that "The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States."

The authority granted to Congress in this clause is twofold—(1) to make all needful rules and regulations and (2) to dispose of territory. The first power enables the Congress to provide for the government of Territories, and the second gives Congress full and ample authority to sell, cede, alienate, part with, relinquish, or otherwise give up any territory of the United States. The phrase "to dispose of" is as comprehensive as any that could have been employed in order to grant to Congress the utmost power to decide upon the fate of Territories. The words "to dispose of" are defined in Webster's New International Dictionary as "to determine the fate of; to fix the condition, employment, etc., of; to direct or assign for a use. To get rid of; to put out of the way; to finish with. To transfer to the control of some one else, as by selling; to alienate; to part with; to relinquish; to bargain away." In view of this settled and undisputable meaning of the phrase "to dispose of," there can be no question but that under Article IV, section 3, of the Constitution the Congress can, in the exercise of its functions as the repository of Federal legislative power, constitutionally pass a law granting independence to the Philippines.

That the authority of Congress over Porto Rico and the Philippines is unlimited has been laid down by the Supreme Court of the United States in the famous "Insular cases." In the case of Downes *v.* Bidwell (1900) (182 U. S. 244, 45 L. Ed. 1088, 1105–1106) Mr. Justice Brown, who announced the opinion of the majority of the court to the effect that the island of Porto Rico by the treaty of Paris had not been incorporated into and made a part of the United States, and therefore the revenue clauses of the Constitution did not apply to said island, said:

> "* * * If it be once conceded that we are at liberty to acquire foreign territory, a presumption arises that our power with respect to such territories is the same power which other nations have been accustomed to exercise with respect to territories acquired by them. If, in limiting the power which Congress was to exercise within the United States, it was also intended to limit it with regard to such territories as the people of the United States should thereafter acquire, such limitations should have been expressed. Instead of that, we find the Constitution speaking only to States, except in the territorial clause, which is absolute in terms and suggestive of no limitations upon the power of Congress in dealing with them. The States could only delegate to Congress such powers as they themselves possessed, and as they had no power to acquire new territory they had none to delegate in that connection. The logical inference from this is that if Congress had power to acquire new territory, which is conceded, that power was not hampered by the constitutional provisions. If, upon the other hand, we assume that the territorial clause of the Constitution was not intended to be restricted to such territory as the United States then possessed, there is nothing in the Constitution to indicate that the power of Congress in dealing with them was intended to be restricted by any of the other provisions."

In another case referring to Porto Rico (De Lima *v.* Bidwell (1900), 182 U. S. 1; 45 L. Ed. 1041, 1056) Mr. Justice Brown, speaking for the majority of the Supreme Court of the United States, said:

> "But whatever the source of this power, its uninterrupted exercise by Congress for a century, and the repeated declarations of this court, have settled the law that the right to acquire territory involves the right to govern and dispose of it. * * * In short, when once acquired by treaty, it belongs to the United States and is subject to the disposition of Congress."

II

THE PHILIPPINES NOT A PART OF THE UNITED STATES

Whatever may be the state of the law in regard to the power of Congress to cede or alienate any territory which has been incorporated into the United States, it is clear that Congress may freely transfer or declare the independence of any territory appurtenant to but not a part of the United States, such as the Philippine Islands.

An examination of the treaty of Paris between the United States and Spain, dated December 10, 1898, and of the acts of Congress relating to the Philippine Islands shows that the Philippine Archipelago has not been made a part of the United States.

Article IX of said treaty stipulates that—

> "The civil rights and political status of the native inhabitants of the territories hereby ceded to the United States shall be determined by the Congress."

The act of Congress of July 1, 1902, temporarily providing for civil government in the Philippine Islands expressly provides that section 1891 of the Revised Statutes of 1878 shall not apply to the Philippine Islands. Said section 1891 gives force and effect to the Constitution and laws of the United States, not locally inapplicable, within all organized Territories.

The above provision of the act of Congress of July 1, 1902, is supplemented in the act of Congress of August 29, 1916, known as the Jones law, section 5 of which states:

> "That the statutory laws of the United States hereafter enacted shall not apply to the Philippine Islands, except when they specifically so provide, or it is so provided in this act."

The Supreme Court of the United States has held that the Philippines has not been made a part of the United States by congressional

action. In the case of Dorr v. United States (1903) (195 U. S. 138, 143–144), Mr. Justice Day, who delivered the opinion of the court, said:

"The legislation upon the subject shows that not only has Congress hitherto refrained from incorporating the Philippines into the United States, but in the act of 1902, providing for temporary civil government (32 Stat. 691), there is express provision that section 1891 of the Revised Statutes of 1878 shall not apply to the Philippine Islands. This is the section giving force and effect to the Constitution and laws of the United States, not locally inapplicable, within all the organized territories, and every territory thereafter organized, as elsewhere within the United States."

In the case of Rasmussen v. United States (1903) (197 U. S. 516, 520), the Supreme Court of the United States, in discussing the status of Alaska, held that, unlike the Philippines, Alaska had been incorporated into the United States. The court said, speaking through Mr. Justice White:

"We are brought then to determine whether Alaska has been incorporated into the United States as a part thereof, or is simply held, as the Philippines are held, under the sovereignty of the United States as a possession or dependency."

Further on, the court said:

"The treaty concerning Alaska, instead of exhibiting, as did the treaty respecting the Philippine Islands, the determination to reserve the question of the status of the acquired territory for ulterior action by Congress, manifested a contrary intention, since it is therein expressly declared, in article 3, that:

"'The inhabitants of the ceded territory shall be admitted to the enjoyment of all the rights, advantages, and immunities of citizens of the United States; and shall be maintained and protected in the free enjoyment of their liberty, property, and religion.'"

Having seen that the Philippine Islands have not been made a part of the United States, and bearing in mind the unlimited power of Congress to dispose of territory of the United States, as already set forth, the conclusion is inevitable that Congress may declare the Philippine Islands independent.

In the concurring opinion of Mr. Justice White in the case of Downes v. Bidwell, supra, he holds that Congress may not sell, alienate, or cede territory which is "an integral part of the United States," but he seems to entertain the belief that territory which has not been incorporated into the United States may be ceded or transferred by Congress. Needless to say, if Congress can alienate the Philippine Islands, that body may also grant independence to the Philippines. Mr. Justice White's observations follow (182 U. S. 244, 315–318):

"The reasoning which has sometimes been indulged in by those who asserted that the Constitution was not at all operative in the Territories is that, as they were acquired by purchase, the right to buy included the right to sell. This has been met by the proposition that if the country purchased and its inhabitants became incorporated into the United States, it came under the shelter of the Constitution, and no power existed to sell American citizens. In conformity to the principles which I have admitted, it is impossible for me to say at one and the same time that territory is an integral part of the United States protected by the Constitution and yet the safeguards, privileges, rights, and immunities which arise from this situation are so ephemeral in their character that by a mere act of sale they may be destroyed. And applying this reasoning to the provisions of the treaty under consideration, to me it seems indubitable that if the treaty with Spain incorporated all the territory ceded into the United States it resulted that the millions of people to whom that treaty related were, without the consent of the American people as expressed by Congress, and without any hope of relief, indissolubly made a part of our common country.

"Undoubtedly, the thought that under the Constitution power to dispose of people and territory, and thus to annihilate the rights of American citizens, was contrary to the conception of the Constitution entertained by Washington and Jefferson. In the written suggestions of Mr. Jefferson, when Secretary of State, reported to President Washington in March, 1792, on the subject of proposed negotiations between the United States and Spain, which were intended to be communicated by way of instruction to the commissioners of the United States appointed to manage such negotiations, it was observed, in discussing the possibility as to compensation being demanded by Spain 'for the ascertainment of our right' to navigate the lower part of the Mississippi, as follows:

"'We have nothing else' (than a relinquishment of certain claims on Spain) 'to give in exchange; for as to territory, we have neither the right nor the disposition to alienate an inch of what belongs to any member of our Union. Such a proposition, therefore, is totally inadmissible and not to be treated for a moment.' (Ford's Writings of Jefferson, vol. 5, p. 476.)

"The rough draft of these observations was submitted to Mr. Hamilton, then Secretary of the Treasury, for suggestions, previously to sending it to the President, some time before March 5, and Hamilton made the following, among other, notes upon it:

"'Page 25. Is it true that the United States have no right to alienate an inch of the territory in question except in the case of necessity intimated in another place? Or will it be useful to avow the denial of such a right? It is apprehended that the doctrine which restricts the alienation of territory to cases of extreme necessity is applicable rather to peopled territory than to waste and uninhabited districts. Positions restraining the right of the United States to accommodate to exigencies which may arise ought ever to be advanced with great caution.' (Ford's Writings of Jefferson, vol. 5, p. 443.)

"Respecting this note, Mr. Jefferson commented as follows:

"'The power to alienate unpeopled territories of any State is not among the enumerated powers given by the Constitution to the General Government; and if we may go out of that instrument and accommodate to exigencies which may arise by alienating that which is peopled, and still a little more by selling the people themselves, a shade or two more in the degree of exigency is all that will be requisite, and of that degree we shall ourselves be the judges. However, may it not be hoped that these questions are forever laid to rest by the twelfth amendment, once made a part of the Constitution, declaring expressly that "the powers not delegated to the United States by the Constitution are reserved to the States respectively"? And if the General Government has no power to alienate the territory of a State, it is too irresistible an argument to deny ourselves the use of it on the present occasion.'" (Ibid.)

"The opinions of Mr. Jefferson, however, met the approval of President Washington. On March 18, 1792, in inclosing to the commissioners to Spain their commission, he said, among other things:

"'You will herewith receive your commission, as also observations on these several subjects reported to the President and approved by him, which will therefore serve as instructions for you. These expressing minutely the sense of our Government and what they wish to have done, it is unnecessary for me to do more here than desire you to pursue these objects unremittingly,' etc. (Ford's Writings of Jefferson, vol. 5, p. 456.)

"When the subject matter to which the negotiations related is considered, it becomes evident that the word 'State' as above used related merely to the territory which was either claimed by some of the States, as Mississippi territory was by Georgia, or to the Northwest Territory, embraced within the ordinance of 1787, or the territory south of the Ohio (Tennessee), which had also been endowed with all the rights and privileges conferred by that ordinance, and all which territory had originally been ceded by States to the United States under express stipulations that such ceded territory should be ultimately formed into States of the Union. And this meaning of the word 'State' is absolutely in accord with what I shall hereafter have occasion to demonstrate was the conception entertained by Mr. Jefferson of what constituted the United States.

"True, from the exigency of a calamitous war or the necessity of a settlement of boundaries, it may be that citizens of the United States may be expatriated by the action of the treaty-making power, impliedly or expressly ratified by Congress.

"But the arising of these particular conditions can not justify the general proposition that territory which is an integral part of the United States may, as a mere act of sale, be disposed of. If, however, the right to dispose of an incorporated American Territory and citizens by the mere exertion of the power to sell be conceded, arguendo, it would not relieve the dilemma. It is ever true that, where a malign principle is adopted, as long as the error is adhered to it must continue to produce its baleful results. Certainly, if there be no power to acquire subject to a condition, it must follow that there is no authority to dispose of subject to conditions, since it can not be that the mere change of form of the transaction could bestow a power which the Constitution has not conferred. It would follow, then, that any conditions annexed to a disposition which looked to the protection of the people of the United States, or to enable them to safeguard the disposal of territory, would be void; and thus it would be that either the United States must hold on absolutely or must dispose of unconditionally.

"A practical illustration will at once make the consequences clear. Suppose Congress should determine that the millions of inhabitants of the Philippine Islands should not continue appurtenant to the United States, but that they should be allowed to establish an autonomous government outside of the Constitution of the United States, coupled, however, with such conditions providing for control as far only as essential to the guaranty of life

and property and to protect against foreign encroachment. If the proposition of incorporation be well founded, at once the question would arise whether the ability to impose these conditions existed, since no power was conferred by the Constitution to annex conditions which would limit the disposition. And if it be that the question of whether territory is immediately fit for incorporation when it is acquired is a judicial and not a legislative one, it would follow that the validity of the conditions would also come within the scope of judicial authority, and thus the entire political policy of the Government be alone controlled by the judiciary."

III

CESSIONS MADE WITHOUT CONSTITUTIONAL AMENDMENT

If Congress should grant independence to the Philippines without constitutional amendment, it would not be acting without a precedent in the history of the United States. These precedents are: (1) The cessions of territory of the United States in treaties settling boundary disputes, and (2) the withdrawal of American authority over Cuba.

As to the treaties of cession whereby the United States, by the treaty-making power of the President and the Senate, the right to cede territory by treaty has been admitted, the only mooted point being whether the consent of the State where the territory is located should be obtained. Inasmuch as the Philippine Islands is not within any State of the Union, the controversy as to the need of consent of the State concerned is not applicable in the present case.

Butler in his work on "The Treaty-making Power of the United States," volume 2, page 193, mentions article 3 of the Adams-De Onis treaty of 1819 between the United States and Spain (U. S. Tr. and Con. 1889, p. 1016), which concludes thus:

> "The two high contracting parties agree to cede and renounce all their rights, claims, and pretensions to the territories described by the said line; that is to say, the United States hereby cede to His Catholic Majesty, and renounce forever, all their rights, claims, and pretensions, to the territories lying west and south of the above-described line; and, in like manner, His Catholic Majesty cedes to the said United States all his rights, claims, and pretensions to any territories east and north of the said line, and for himself, his heirs, and successors, renounces all claims to the said territories forever."

It will be noted that the treaty actually made use of the word "cede." Butler says (p. 193) regarding this treaty:

> "By this treaty the United States renounced, or ceded, a large tract which included the whole of Texas, as well as a great deal of the Mexican territory which was ceded to the United States by the treaty of Guadalupe Hidalgo in 1848, after the Mexican War."

The northeastern boundary dispute between Great Britain and the United States is another instance. Butler refers to that case in the following words (pp. 387–391):

> "In 1842 the dispute between this country and Great Britain over the northeastern boundary reached a very acute condition. Both countries made claims to a large extent of territory and some adjustment had to be arrived at in order to prevent actual hostilities. The controversy was finally settled by the Webster-Ashburton treaty, and a part of the territory claimed by the State of Maine was included in the territory relinquished by the United States to Great Britain. Daniel Webster, then Secretary of State, declared in the course of the correspondence that the United States had no power to dispose of any part of the territory of a State by treaty without the consent of the State. Chancellor Ken differed with him, declaring that 'the better opinion would seem to be that such a power of cession does reside exclusively in the treaty-making power under the Constitution, although a safe discretion would forbid the exercise of it without the consent of any State.'"

Butler is of the opinion that the central Government of the United States can cede territory to another power. He says in the same work (pp. 393–394):

> "476. Conclusions deduced from the settlement of this controversy: The relations between this country and Great Britain had become so greatly strained owing to the disputes as to the northeastern boundary that the only way to prevent war was to absolutely relinquish all title to the northeastern corner of Maine; even if any interested State had refused to grant its consent to the cession, and even if opposition had been interposed, as fortunately was not the case, the central Government of the United States could certainly have ceded to Great Britain all that it did cede by the treaty of 1842, and thereby perform an act inuring to the benefit of every State of the Union, including the States affected by the new boundary line. • • •
>
> "If it be said only a part of a State was involved in that case, and that although the power might possibly be exercised as to a part of a State, an entire State could not have been ceded away, the answer can only be that if the salvation of every other State in the Union depended upon the boundary line being so fixed that an entire State should be included in British possessions, and in default thereof the Union might have been plunged into a war resulting in its destruction, undoubtedly the treaty-making power in the central Government would have been able to accomplish that result, and it might have been just as necessary to exercise it, as at times it has been necessary to amputate a limb in order to save the life itself; in such extreme cases (and it is to be hoped they will never occur) the full extent of the power would have to be exercised—regretfully, indeed, but nevertheless effectually."

As to the case of the independence of Cuba, it is true that the occupation of the island by the United States was brief and temporary, but it can not be gainsaid that American sovereignty attached thereto from the moment the American flag was hoisted there as symbol of American authority. The withdrawal of the American forces was therefore to all intents and purposes a giving us of territory belonging to the United States.

That the United States did exercise sovereignty over Cuba is evident from the wording of joint resolution of Congress of April 20, 1898, declaring war upon Spain. Section 4 of said resolution reads:

> "That the United States hereby disclaim any disposition or intention to exercise sovereignty, jurisdiction, or control over said island, except for the pacification thereof, and asserts its determination when that is accomplished to leave the government and control of the island to its people."

The above language denotes that the United States intended to and actually did exercise sovereignty over Cuba for the purpose of pacification, and that the United States intended to have and did have the government and control of the island before pacification was accomplished.

This conclusion is strengthened by a perusal of the message of President McKinley to Congress on December 3, 1900, which reads in part as follows:

> "Under the authority of the United States, as temporary occupant of Cuba, a general election was held in the island on the third Saturday in September, 1900."

Occupation of Cuba by the United States lasted nearly four years following the treaty of Paris of December 10, 1898. During that time all the functions of government were in operation under the authority of the United States. It was not till May 20, 1902, that American sovereignty was withdrawn from the island. In announcing such withdrawal President Roosevelt, on May 10, 1902, said in a letter to the President and Congress of the Republic of Cuba:

> "On the 20th of this month the military governor of Cuba will by my direction transfer to you the control and government of the island of Cuba, to be thenceforth exercised under the provisions of the constitution adopted by your constitutional convention as on that day promulgated."

The fact that the control and government of the island of Cuba was transferred from the United States to the Republic of Cuba on May 20, 1902, necessarily implies that before that date the control and government of Cuba was vested in the United States. All this was done in virtue of a joint resolution of Congress without any constitutional amendment, and the constitutionality of the withdrawal of American sovereignty from Cuba was not at all doubted.

If it be urged that the government of the island of Cuba under American sovereignty was only temporary and that therefore there can be no analogy between that island and the Philippines, we reply that American occupation of the Philippines is also temporary according to solemn avowals of the executive and legislative departments of the United States.

Doctor Schurman, president of the first Philippine Commission, construed the American policy to mean:

> "Ever-increasing liberty and self-government • • • and it is the nature of such continuously expanding liberty to issue in independence."

President Taft, while civil governor of the Philippine Islands, on the 17th of December, 1903, said:

> "From the beginning to the end of the State papers which were circulated in these islands as authoritative expressions of the Executive, the motto that 'the Philippines are for the Filipinos and that the Government of the United States is here for the purpose of preserving the Philippines for the Filipinos,' for their benefit, for their elevation, for their civilization, again and again appear. • • •
>
> "Whether an autonomy or independence or quasi independence shall ultimately follow in these islands ought to depend solely on the question, Is it best for the Filipino people and their welfare?"

When Mr. Taft was Secretary of War in April, 1904, in the course of a speech upon the Philippines he said:

> "When they—the Filipinos—have learned the principles of successful popular self-government from a gradually enlarged experience therein we can discuss the question whether independence is what they desire and grant it, or whether they prefer the retention of a closer association with the country which, by its guidance, has unselfishly led them on to better conditions."

In 1908, after the Philippine Assembly had been opened, President Roosevelt in his message to Congress said:

"I trust that within a generation the time will arrive when the Filipinos can decide for themselves whether it is well for them to become independent or to continue under the protection of a strong and disinterested power, able to guarantee to the islands order at home and protection from foreign invasion."

President Wilson in a message to the Philippine people, delivered by Governor Harrison in Manila, October 6, 1913, said:

"We regard ourselves as trustees acting not for the advantage of the United States but for the benefit of the people of the Philippine Islands. Every step we take will be taken with a view to the ultimate independence of the islands and as a preparation for that independence."

When Congress for the first time assumed control of the government of the Philippines and passed the Philippine bill of July 1, 1902, that body used the following language in the title of the act:

"An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes."

In the preamble of the Jones law, act of August 29, 1916, the Congress of the United States has declared:

"Whereas it is, as it has always been, the purpose of the people of the United States to withdraw their sovereignty over the Philippine Islands and to recognize their independence as soon as a stable government can be established therein; and

"Whereas for the speedy accomplishment of such purpose it is desirable to place in the hands of the people of the Philippines as large a control of their domestic affairs as can be given them without in the meantime impairing the exercise of the rights of sovereignty by the people of the United States in order that by the use and exercise of popular franchise and governmental powers they may be the better prepared to fully assume the responsibilities and enjoy all the privileges of complete independence."

IV

A POLITICAL ACT

The only purpose of raising the question of the constitutionality of an act of Congress granting independence to the Philippines would be, aside from its obstructionist object, that such a law would be annulled by the Supreme Court of the United States on the ground that it is unconstitutional. But the question is merely theoretical and speculative, inasmuch as the Supreme Court of the United States would never take cognizance of it, because the declaration of independence of the Philippines by the United States Congress would be a political act, beyond the jurisdiction of the courts to question or control. It is a well-settled doctrine steadfastly adhered to by the courts that they will not interfere with acts of a political character of the executive and legislative departments of the Government.

Charles H. Burr, in his essay on "The Treaty-Making Power of the United States and the Methods of its Enforcement as Affecting the Police Powers of the States," which won the Henry M. Phillips prize of $2,000 on April 20, 1912, says on page 301:

"This question of the right of the treaty-making power to cede territory is wholly a political question, and when, if ever, it arises for determination, it will necessarily be determined upon wholly political considerations. If it be found necessary or advisable for the United States Government to cede territory, the manner of the ceding will be immaterial. Whatever the National Government does as a government, will, it is apprehended, be recognized by the Supreme Court as a political act, and as a thing accomplished."

Butler in his work, already mentioned, on "The Treaty-Making Power of the United States," says (Vol. II, p. 193):

"It is apparent that courts of the United States would have no jurisdiction over questions which might arise from the cession of territory by the United States to other powers."

V

JURISTS AND OTHER AUTHORITIES

The opinion of jurists and other authorities on this question supports our proposition.

Professor Willoughby, in his standard work on the Constitution, says (Vol. I, p. 513):

"Should the alienation be by the way of granting independence to particular territory—as, for example, Porto Rico or the Philippine Islands—this could be done by joint resolution."

Justice George A. Malcolm, of the Supreme Court of the Philippine Islands, recognized as the foremost authority on constitutional law affecting the Philippine Islands, has expressed himself in the following manner in his book on "The Government of the Philippine Islands" (pp. 350–351):

"Careful analyses reaching back to other settled constitutional doctrines are here preferable. If, therefore, the United States can acquire or cede territory without express constitutional authority, why can not the same sovereign power which permits of such action likewise permit unincorporated territory to be made independent? What difference is there between cession to another foreign power and cession to another people temporarily under American control? If the United States could by treaty pass on the boon of freedom to Cuba, why can it not a few years later under the power reserved by the same treaty to Congress, pursuant to this power, hand over a similar right to the Philippines? If the freeing of the Philippines is deemed wise from the standpoint of national necessity, or advantage, or for reasons which take into consideration benefits to the Filipino people, what individual citizen can be heard to complain? If other sovereign powers can recognize former portions of their territory as independent, because forced to do so, why can not the United States as a power of equal rank recognize the Philippines as a republic, because she wishes to do so? And if Congress or its agent, the President, shall recognize the Philippines to be a sovereignty, how long on such a political question would a litigant have standing in a court? Plain answers to these interrogatories, if the premises be conceded, must, by a logic inexorable and final, lead to an affirmative conclusion. And the premises, it is believed, can not be undermined.

"It is respectfully submitted that the United States has a legal and constitutional right to admit the Philippine Islands into the Union as a State, or to cede the Philippine Islands to a foreign power, or to declare the Philippine Islands independent."

In the debate in Congress on the Louisiana Purchase Mr. Nicholson said in the course of his speech defending the step taken by Jefferson:

"The Territory was purchased by the United States in their corporate capacity and may be disposed of by them at their pleasure." (Annals of Congress, 1803–4, p. 471, quoted in Magoon's "The law of civil government in territory subject to military occupation," p. 78.)

Carman F. Randolph in his book on "The Law and Policy of Annexation" declares (pp. 147–148):

"* * * Should a project of cession affect State land, the State's consent must be secured, but outlying territory the Federal Government is as free to cede as to acquire without the express consent of the States.

"As I have found no legal objection to our treaty-making body annexing land without the consent of the House of Representatives, I find none to its ceding land of its own motion. And territory may be severed as well as annexed by joint resolution of Congress.

"There is no merit in the assertion that recognition of the Constitution in the Philippines, with its consequence of conferring citizenship upon Filipinos, will preclude, legally or morally, our withdrawal from the islands because of its consequences of alienating citizens.

"As the extension of sovereignty over territory is a political matter not reviewable by the courts, so is withdrawal; and in the latter, as in the former case, the exercise of power is not preventable by the inhabitants."

In view of all the foregoing, the writer is of the opinion that the Congress of the United States has full power, without the need of a constitutional amendment, to grant independence to the Philippine Islands.

Mr. DYER. Mr. Speaker, the people of the United States, as well as the Members of the Congress, are not well informed touching the question of Philippine independence. One reason is that the Philippines are so far away and we have so many problems at home. I bring this information to the attention of the people of the United States, as well as to the Congress, with the hope that they will read it and that the same will invite their further examination into the obligations and promises which we have assumed and made to the Filipino people. In other words, I ask that the Members of Congress and the people generally study this subject for the purpose of learning the facts and the truth.

MODIFY THE VOLSTEAD ACT TO REMOVE THE EVILS OF PROHIBITION

Mr. BERGER. Mr. Speaker and gentlemen, the old saying that we shall use but not abuse seems to hold the best solution of the drink problem also, so far as a solution is discoverable by human wisdom.

And this adage holds good not only in regard to wine, beer, and fermented beverages but as to any article of the daily diet. It is just as easy to overeat as to overdrink, and more people overeat than overdrink.

In ancient Rome, for instance, the national sin did not seem to be drunkenness but gluttony. Tacitus says a good deal more about the food and the sauces than about the wine at the patrician banquets. And gluttony, rather than drunkenness, is the usual theme of the satires of Juvenal.

WORLD NOT PURGED OF CURSE

We are told by the Anti-Saloon League, however, that the world would be a better place without "the curse of drink."

With this I agree. But let me ask, Have the prohibitionists purged the world of the curse of drink? Is there not now more and worse drunkenness to be found in most of the large cities of the United States than ever before?

On the other hand, what about the blessings of drink which consist in true temperance? Is it not a fact that a certain amount of wine or alcoholic drink is necessary to social happiness, witnessed to by the fact that even now there is hardly a festivity, either in the circles of the rich or of the poor, where some wine or other drink is not procured—if it is at all procurable? With this difference, that since an honest and healthy beverage is hard to get on account of prohibition, the American people are often apt to use all sorts of substitutes or concoctions more or less poisonous.

HELPED TO INSPIRE MANY NOBLE MEN

It is unnecessary for me to state what part wine and beer have played in the history of nations.

Wine and beer have helped to inspire the noblest races and the noblest men.

Without wine and beer three-fourths of all poetry and more than one-half of all art would have been lost to us. Without wine and beer the lot of the common man, so terrible during the early and Middle Ages—when the life of the peasant was the pawn of every petty lord—would have been simply unbearable. He would then have been deprived of what little blessedness these drinks sent to him.

And this is the case in no small extent with the workmen of to-day—the modern proletarian—who has been deprived of his beer and his wine, and who, only too often, is now using poisonous moonshine.

SAXON, CELT, AND TEUTON ALIKE IN THIS RESPECT

But let us look over the pages of history of our race.

One of the simplest lessons history teaches even the casual observer is that the drinking races—the liberal consumers of wine and beer and ale—have always been in the vanguard of human progress.

These nations have always been the greatest fighters for human freedom. They have always made the greatest sacrifices for liberty whenever necessary.

We have only to remember the stout English barons who wrested the Magna Charta—England's first charter of liberty—from the unwilling despot, King John. We have just to think of the brave and valiant but beer-drinking Teutons, who successfully resisted and finally overwhelmed the colossal world power of Rome. I might also point to the heroic, wine-loving Celts, who fought for freedom and for everything else in every land. How many genuine Irishmen are prohibitionists to-day?

REASONABLE DRINKING IN FRANCE

We also know it was the gallant citizenry of France, drinking wine every day with its food, which at the end of the eighteenth century in a mighty revolution shattered the thrones of Europe.

In short, if any reasonable amount of drinking destroys the people, it is hard to say where any of the northern races would be. There are the Scotch, for instance. The Scotch were always noted for three very powerful traits—religion, education, and whisky. And if drink were to destroy peoples, the Scots would have ceased to exist long ago. Yet, with all this the Scots are and have been for centuries one of the most noted racial groups in all the human family.

Such are the other northern peoples of Europe—the English, the Germans, the Scandinavians, the Russians—some of them even drinkers of hard liquor—and on the average more drunken than the southern and southeastern Europeans. The hopes of civilization, however, seem to rest on these hardy northern races in spite of their drinking habits.

OUR IMMIGRATION LAW FAVORS DRINKING NATIONS

Just lately Congress passed an immigration bill making the census of 1890 the percentage for admission, which basis strongly favors these drinking nations.

On the other hand, the most abstinent people of the world nowadays, as far as alcohol is concerned—are the Mohammedans (Turks, Arabs, and the rest) and the peoples of Japan, India, and China. But these prohibitionists are evidently almost excluded from settling in our country.

Mohammed forbade alcoholic beverages. Christ did not. Neither did Moses.

THE "PROHIBITION" RACES

The European nations, as a rule, have all through history been great consumers of alcoholic drinks. Nevertheless it would be hard to persuade even the most ardent of prohibitionists that the Europeans are behind the Mohammedans and Hindus in usefulness and virtue and other essentials of civilization.

We all know that the contrary is the case. As a matter of fact, we see a handful of beer and ale drinking Englishmen holding in subjection 300,000,000 Hindu teetotalers.

ALL GREAT MEN WERE DRINKING MEN

Moreover, there can be no question that all the great men known in history, from Noah and Julius Cæsar down to General Grant, have been drinking men. There is an inscription about beer even on Tutankhamen's coffin. George Washington was not a prohibitionist, neither was Thomas Jefferson, nor Alexander Hamilton.

In fact, moderate and temperate drinking seemed to be a help to the ablest men in history, because it meant relaxation. Raphael Sanzio, Michelangelo, and Rembrandt van Rijn, great painters, were moderate drinkers.

So was William Shakespeare; so were Goethe, Schiller, Heine, Shelley, Byron, and every other great poet I know of.

And how about Bismarck, Gladstone, Moltke, Napoleon? And how about our own generals, Sherman and Sheridan, not to mention Grant? They were all moderate drinkers.

Can anyone mention a single great man in history who was a prohibitionist, unless he was great as a prohibitionist?

OUR EARLY HISTORY FAVORED TEMPERANCE, NOT PROHIBITION

If we look for lessons in our own history as to how to deal with intemperance we shall find that under the law of Massachusetts Bay, passed in 1635, no permission was required for the sale of beer and ale, while a license was required for traffic in "ardent spirits."

WHISKY BARRED IN 1637, BEER FAVORED

In 1637 the courts first forbade the sale of strong water in taverns—prohibiting all intoxicants except beer. This was the first attempt in an American colony to promote temperance by favoring the use of beer.

In October, 1649, it was ordered that every grocer and tavern keeper should always be provided with good and wholesome beer for the entertainment of strangers.

In 1721 the tax on beer was discontinued.

An act was passed in June, 1789, "to encourage the manufacture and consumption of strong beer, ale, and other malt liquors," wherein it is declared that "the wholesome qualities of malt liquors are greatly recommended to general use as an important means of preserving the health of the citizens of the Commonwealth."

Intemperance had grown to a public evil in the colony of Virginia as early as 1623.

VIRGINIA AND PENNSYLVANIA PASSED LAWS FAVORING BEER

One of the most important of all colonial laws bearing on the liquor traffic was passed in 1644 in Virginia. Under this law, no intoxicating drinks, except strong beers, were permitted to be sold in the taverns of Virginia. Debts for ardent spirits were declared not recoverable, and a discrimination was made only in favor of beer.

In 1658 a law was passed to encourage the planting of hops. The Pennsylvania Assembly in 1689 imposed an import duty on ardent spirits, but not on beer. In Pennsylvania, as in every other American colony, beer was regarded as one of the necessaries of life, which accounts for the discrimination in its favor.

In his address to the assembly in 1713, Governor Gordon, of Pennsylvania, deplored the decadence of brewing, and recommended that the industry be encouraged.

The lawmakers of Pennsylvania passed acts in 1720 and 1721 to discourage the use of rum and to encourage the making of good beer.

RARENESS OF BEER LEADS TO RUM REBELLION

The cheapness of rum, and the superabundance of grain, making every farmer a distiller, together with the economic circumstances at that time, led to a condition of affairs which culminated in the whisky rebellion. Beer became rare, and in 1790 there were no less than 5,000 stills in operation, the proportion being one still for every 89 inhabitants.

JAMES MADISON FAVORED BEER

Before the House of Representatives in 1789, James Madison, moving the low duty of 8 cents a barrel on malt liquors, hoped "that this low rate will be such an encouragement as to induce the manufacture of beer in every State of the Union."

At the great festival held in Philadelphia in July, 1788, to celebrate the ratification of the new Constitution by 10 States, American beer and American cider were the only liquors permitted to be used.

Dr. Benjamin Rush, at one time professor of medicine at the University of Pennsylvania, after whom the Rush Medical College of Chicago is named, thought that the true solution of the drinking problem lay in encouraging the brewing industry.

FEW USE HARD LIQUOR—THEY DRINK BEER AND WINE

In the course of an essay praising the thrift, industry, temperance, and other virtues of the German inhabitants of Pennsylvania, Doctor Rush said:

Very few of them use hard liquor in their families. Their common drink is beer and wine.

THE VIEW OF ALEXANDER HAMILTON

In his communication to the House of Representatives March 4, 1790, Alexander Hamilton, Secretary of the Treasury, recommending an increase of specific duties on imported spirituous liquors, said:

As far as the decrease might be applicable to distilled spirits, it would encourage the substitution of cider, beer, and ale, benefit agriculture, and open a new and productive source of revenue.

THOMAS JEFFERSON AND WINE

Hamilton's views were fully shared in this regard by his great adversary, Thomas Jefferson.

On December 13, 1818, we find Thomas Jefferson writing to M. de Neuville in advocacy of the culture of grapes in America, as follows:

No nation is drunken where wine is cheap, and none sober where the dearness of wine substitutes distilled spirits as the common beverage.

AND EVEN W. H. TAFT

And to bring matters down to date, permit me to also quote that distinguished statesman and lawyer, Hon. William H. Taft, former President and now Chief Justice of the United States. In his work "Four Aspects of Civic Duty," he says:

NOTHING MORE FOOLISH

Nothing is more foolish, nothing more utterly at variance with sound policy than to enact a law which by reason of conditions surrounding the community is incapable of enforcement. Such instances are sometimes presented by sumptuary laws, by which the sale of intoxicating liquor is prohibited under penalties in localities where the public sentiment of the immediate community does not and will not sustain the enforcement of the law. * * *

By the enactment of a drastic law and the failure to enforce it there is injected into the public mind the idea that laws are to be observed or violated according to the will of those affected. I need not say how altogether pernicious such a loose theory is. * * * The constant violation or neglect of any law leads to a demoralized view of all laws.

LEADS TO SECRET DRINKING

I recommend all of these views to the intelligent lawmakers of our Congress and to the well-meaning but misguided prohibitionists. They now compel the secret drinking of alcoholic poison, because they can not prevent that; but they can prevent and do prevent the use of beer and wine.

THE NEW INDUSTRY

Result? A new "industry," the bootlegging industry, has sprung up. It prospers immensely and in some places has almost acquired the size of a trust. And many Government officials are financially interested.

Lawmakers who understand human nature should not be hypocrites. Nor should they be cowards. And they should not permit prohibitionists and the Anti-Saloon League thus to promote drunkenness.

ALCOHOL NOT A STIMULANT

There seems to be a general misunderstanding as to the part alcoholic beverages play in the human body.

Alcoholic beverages have often been described as a stimulant. I think that is a mistake. They are not a stimulant. They are the cause of relaxation. Every hard-working man needs that relaxation, and especially in our complex civilization. We need that complete rest, that complete relax.

And that is the reason why so many people who are nervous will take drugs when they can not get alcoholic beverages.

Gentlemen, you have no right to take away this means of relaxation and of rest from those who use it legitimately because there are some who do not. Because there are some weak sisters who are not able to use it normally, why should everybody else be forbidden to use it normally?

WHY NOT BAN THE PLAYING OF BASEBALL?

I ask you, because there is a man with a weak heart who can not play baseball, would you forbid the game of baseball to everybody? Because there are some people who have weak stomachs and can not eat beefsteak, would you forbid beefsteak to the Nation? Because bodily exercise is not good for some people, would you forbid bodily exercises to everybody?

Moreover, it can not be done.

MORE ALCOHOL SOLD THAN EVER

It is notorious that in spite of all the efforts of the entire Prohibition Bureau immense quantities of whisky and other intoxicating liquors are produced and sold, not only in the remote country districts where that has been done always but especially in large towns and cities.

During the last few months many thousand illicit stills have been seized and destroyed, and yet that is only a small percentage of the many hundred thousands that are still being operated.

What happens under prohibition is simply this:

PEOPLE GET POISON INSTEAD OF GOOD WHISKY

Instead of the people drinking lawfully produced beer and wine or even genuine whisky, although I personally am opposed to whisky because I believe whisky to be a toxin, people now drink strong alcoholic liquors of all kinds and descriptions, most of them dangerous and poisonous.

And while the Government in the past derived hundreds of millions of dollars in revenue annually and at the same time controlled the liquor trade in every respect, that traffic is now absolutely beyond and outside of all control.

This is clearly shown by the police and health records.

INSANITY SHOWS GAIN

The arrests for drunkenness and the percentage of insanity caused by alcohol are now much greater than in the days when such beverages were produced and sold under the supervision of the United States Government, and when the honest brewers and distillers paid taxes not only to Uncle Sam but also to the respective States and communities in which they lived.

FREE THE PEOPLE FROM ILLICIT ALCOHOLISM

In short, I believe that just at the present time Congress could do few things that would prove to be a greater boon to the great mass of the people than to repeal the foolish Volstead Act. In place of it we should adopt a law which will declare that beer containing 2.75 per cent alcohol and wine that contains no more than 12 per cent are "nonintoxicating" within the meaning of the eighteenth amendment.

Thus Congress would free our people from the curse of illicit alcoholism with which the United States is now afflicted from New York to San Francisco and from the Great Lakes to the Gulf of Mexico. The new law would gladden the hearts of many millions. It would put an end to bootlegging and make moderation a virtue when now "forbidden fruits" foster vice. The new law would cause civic morality to flourish again even in the high places that are rather barren to-day.

Gentlemen, pass a bill repealing the Volstead law and give us back beer and light wines.

A PRACTICAL WAY TO REDUCE TAXES

Mr. CANNON. Mr Speaker, it is now apparent that adjournment will leave practically untouched many of the most pressing problems confronting the Congress when it convened last December. One of the most important and imperative of these relates to the reduction of the number of Federal employees. The country is burdened with a constantly growing army of tax eaters. Notwithstanding the cessation of war-time activities and an insistent demand for a reduction of taxes, the number of Federal employees, consuming a large proportion of the income received through taxation, is increasing rather than diminishing. And this Congress, charged as no other Congress has ever been charged with the responsibility of decreasing expenditures and reducing taxes, is closing the session without a systematic effort to inquire into the number of surplus employees on the pay rolls of the Government or to apply ordinary business methods in reducing the personnel of the departments to a reasonable minimum.

The tax burden of the country is one of the discouraging and demoralizing conditions which confronts us both from an economic and from a moral standpoint.

Homes are being sold because people are unable to pay their taxes. Business men are distressed because they are unable to meet their taxes. Farms upon which people have lived for half a century, giving their time and their industry and their effort to making homes and rearing families, are now passing from them by reason of tax sales.

Our 40,000,000 workers enjoy an estimated gross income of $60,000,000,000. Of that they are contributing about 14 per cent for the maintenance of the Government. If they should contribute labor instead of dollars every worker would give as his share more than seven weeks' labor every year. Every week each one of us would work approximately one day with-

out pay as our share of Government upkeep and our contribution to the cost of operating the administrative machinery.

A large portion of this outlay is consumed in the payment of salaries. During the war vast numbers of additional employees were required in all departments and the salary account of the Government increased almost overnight to the highest totals reached by any nation engaged in that titanic struggle.

It is now more than five years since the close of the war and ample time has elapsed in which to provide for a return to a peace basis, yet the number of Government employees on the pay roll is still more than 100 per cent above that of 1916, and in recent months has grown steadily, not only in stated totals but in proportion to the population and wealth of the country.

This condition not only augments the drain upon the Treasury and thereby directly increases the rate of taxation, but withdraws from productive employment and creative industry large numbers of capable workers whose time and talents are worse than wasted in the treadmill of needless and superfluous departmental routine.

It is true the aftermath of the war created activities which require the service of additional clerks, but the number retained is out of all proportion to such requirements. Practically all such war-created activities are centralized in the departments here in Washington. The number employed in Washington in 1916 was, in round numbers, 37,000. By the time we had reached the peak of the war the number had risen to approximately 137,000. In the five years that have elapsed since the signing of the armistice the number has naturally been much reduced, but there are still in Washington more than 65,000 employees, an increase of something like 100 per cent over pre-war figures and a force grossly in excess of the most lavish estimates of the number required to transact the business of the Government on a peace-time basis.

A national survey discloses 544,671 civilian employees of the Federal Government, and the number of officials of all classes supported by the tax levies is put by the national industrial conference at 3,400,000. Of every dozen wage earners one is a Government employee. The population of the United States has increased something like 40 per cent since 1900, but in that time the number of Government employees has more than doubled.

A fair idea of the growth of the Federal service may be gathered from a consideration of the totals from 1901–1924:

| | | | |
|---|---|---|---|
| 1901 | 256,000 | 1918 | 917,760 |
| 1905 | 301,000 | 1920 | 691,116 |
| 1907 | 306,000 | 1921 | 597,483 |
| 1909 | 340,000 | 1922 | 560,863 |
| 1911 | 360,000 | 1923 | 542,513 |
| 1916 | 438,057 | 1924 | 555,312 |

The significant fact is that, measured by standards of previous years, the service is constantly growing in excess of any previous ratio.

The United States Government is to-day probably the largest employer of labor in the world. With a civil personnel of more than 540,000 persons and an annual pay roll of nearly $750,000,000, it presents problems in employment administration of greater diversity and importance than those of any private industry. One person out of every dozen over 16 years of age gainfully employed in the United States is on the public pay roll, and as a result the American people are footing a huge salary bill of nearly $4,000,000,000 a year.

The total cost of this huge army of Government retainers to every man, woman, and child in the United States is about $34 a year, or 46 per cent of the amount of wages paid by all the factories producing more than $5,000 worth of goods in 1921.

Careful study of the occupational figures of the Census Bureau places the number of public servants in the United States at not less than 2,000,000. In other words, conservative Government statistics show we have working for us to-day in civil life and in the national defense full-time employees to the number of all the military forces we sent abroad during the World War.

If the railroads of the country were to marshal their forces, they would fail to match the army of men and women on Government pay rolls. All the coal mines and all the automobile plants in the country combined fall short of the man power of Government. All the hired men on all the farms in the United States barely equal in number our public pay roll attachés.

And instead of declining the number insists on gradually going up. The population of the country is by no means increasing in the same ratio, nor are the requirements of the people. If the increase in the number of Government employees continues in the same ratio for another 40 years, one out of every five workers will be a Government clerk or official supported by the wage earners and taxpayers of the country.

One of the principal causes for this persistent increase is the tendency of all departments to take over additional functions and enlarge the scope of their jurisdiction.

Before the Civil War there was a very strong attachment to the principle of local self-government in all parts of the country, and theoretically we adhere to this doctrine at the present time, but the Federal Government is to-day with increasing frequency entering new fields of activity, and having once entered such activity continues to grow.

The result is a steady increase in the number of employees and in the expense of administration.

Glancing at a few of the departments in which this tendency is to be noted, we find that the Interior Department, exclusive of Indians and pensions, administered the expenditure of $13,342,000 in 1902, and in 1922 $35,000,000, an increase of nearly 200 per cent within two decades. The Department of Commerce, created since 1902, spent in 1922 $20,000,000. The Interstate Commerce Commission spent in 1902 $275,000, but in 1922, $5,130,000. And other departments and bureaus are growing in proportion.

Some of these departmental usurpations have more, some less, to show for the money they have spent. But few, once started, fail to strike deeper and deeper into the public coffers. As the country grows, of course, the cost of governing it may be expected to mount. But during the past few years, and particularly at the present time, cost is rapidly outstripping growth, with no end in sight.

In eight years the people have paid out nearly $8,000,000 to keep the Federal Trade Commission going. It has grown and spread and reached out until it is operating branch offices and maintaining a long array of subsections, furnishing jobs for 400 people, from doctors and lawyers down to clerks and messengers, at salaries ranging from $10,000 to $480 a year. Thus, a department starting out eight years ago with the idea of spending $75,000 a year is now expending in the neighborhood of $1,000,000 annually. Once create a Federal bureau designed to carry out even a temporary scheme of regulation and it is created in perpetuity.

The Children's Bureau, established in 1912, started out with a staff of six and an annual appropriation of $25,640. At the end of its second year there were 76 employees on its pay roll at an annual expense of $164,000. By 1919 the appropriation was $658,604; in 1923 the cost was approximately $1,000,000 for directors, assistant directors, research agents, field agents, statisticians, and their assistants. It is accomplishing a needed and valuable work, but it illustrates the precipitous and wholly unanticipated increases in personnel and budget typical of all Government bureaus, a mushroom growth wholly out of proportion to the growth of the country in population or wealth and calling for careful scrutiny on the part of the taxpayer.

These are merely individual factors in the cost of maintaining our Government. It is this sort of growth within the Government, adding large numbers every year to already overstaffed corps of employees, that has contributed heavily to the burden of taxation.

Another outstanding feature of the public service is the lack of proper and effective coordination between the various departments and bureaus.

Each department considers itself as an entity almost wholly detached from the remainder of the Government.

As a result investigation shows a duplication of work in many departments. In the matter of the tariff, for example, it is to be observed that there are a number of bureaus all engaged in what may be well regarded as a typical example of needless and costly duplication.

The United States Tariff Commission is the Government's instrumentality for procuring information pertinent to all industries in their relation to the import and export trade of the United States. The commission also studies tariff relations between the United States and other countries, commercial treaties, preferential provisions, and economic alliances.

The division of foreign tariffs, in the Bureau of Foreign and Domestic Commerce, maintains files of information on tariffs, customs, duties, trade-marks, and related subjects.

The Department of State has a foreign trade advisers office. The Pan-American Union makes a study of Latin American tariffs. Thus there are four agencies of the Government investigating the same subject. A coordination of such work by the departments would result not only in improved service but in material reductions in the number of employees required and the corresponding charges upon the Treasury.

In the survey of the Pension Bureau made in May, 1923, it was found possible only after the most rigid insistence to reduce

the force from 1,031 to 867 employees at a saving of $246,000 in salaries. This was accomplished by the elimination of duplication, lost motion, and slack time.

Various sections were consolidated, others were discontinued, and a further saving of some $20,000 annually in supplies and material was accomplished.

What was done in this bureau might be done in others.

In one of the departments where the daily absences from sickness and other causes aggregated 1,000 per day insistence upon administrative attention brought about a reduction to 75 per day.

In one year 19 internal-revenue agents drew $13,400 for traveling expenses. Pointed inquiry resulted in 30 of the same agents drawing but $6,900 in the year following.

In another department an administrative official when informed that there was likely to be a surplus in his department instructed a subordinate to see to it that all the appropriation was exhausted before the end of the fiscal year.

In still another department a chief gave out 15 minutes' work to his force and instructed them to make it last all day.

When Government was costing $2,000,000 a day, Senator Aldrich estimated that $1,000,000 of it was absolute waste. Government now costs about $25,000,000 a day. How much of it is waste to-day?

The only way to determine the amount of this waste and provide for its elimination is through the agency of congressional committees duly authorized to make a thorough investigation. The departmental heads, however conscientious and aggressive, are powerless to remedy the evil.

The problem is trenchantly stated in the following abstracts from a letter written by Mr. Herbert D. Brown, the Chief of the Bureau of Efficiency:

I know that there are a great many unnecessary clerks in Washington—literally thousands—because investigations made by the Bureau of Efficiency have disclosed that fact.

There is no doubt in my mind but that it would be possible for administrative supervisors to reduce the number of their clerical assistants very greatly: (1) Because the volume of work in the departments to which they are attached is considerably less than it was during the period of the war, and (2) because now that the war strain is over time can be found for improvements of methods. Now that the peak of the war load has been passed it should be possible to institute a program of strict economy.

In spite, however, of the conclusion reached by Mr. Brown attempts to weed out superfluous, unnecessary, and inefficient employees are practically impossible. No better illustration of this can be offered than that submitted by the Commissioner of Patents, Mr. Ewing, in the hearings before the House Committee on Patents in January, 1916. In reply to an inquiry as to whether employees once attached to the pay rolls were retained when there was insufficient business to keep them employed, Commissioner Ewing said:

It is mighty hard to get rid of them. The truth of the matter is they are all protected by the civil-service rules, and a dismissal must be accompanied by a statement of reason. The statement of the reason that we have not enough business for them is not a reason why any particular person should be dismissed.

This is the system under which thousands of unnecessary employees are kept on the pay roll and under which the cost of government is maintained at stilted figures, out of all proportion to the service rendered. Until there is a reduction in personnel in all departments by the weeding out of the surplus employees, and with them the incompetent and inefficient; until there is an elimination of duplicated work and a contraction in profitless activities, the cost of conducting the Federal Government will remain at or near its present swollen figures. There seems to be no other possible conclusion.

President Harding on May 23, 1921, declared:

To bring economy and efficiency into Government is a task second to none in difficulty. Few people have any conception of the growth of Government business in the last decades before the World War; still fewer at all realize the pace to which the growth has been speeded up since the war started. The multiplication of departments, bureaus, divisions, functions, has resulted in a sort of geometrical increase in the task which confronts the heads of executive departments when they face reconstruction problems.

Again the President said:

I know the unpopularity of insistent reductions and enforced economics. The spender is freely, though often thoughtlessly, applauded. But in the sober reflections of the people whom we serve the honest and zealous endeavor to reduce the cost of government is sure to win abiding favor.

We must have legislative reorganization of the governmental machinery so as to eliminate overlap and waste. There must be a rigorous retrenchment in public expenditures to eliminate the waste and duplication that still exist in our public economy, as well as a reduction of needless functions and services.

Mr. Speaker, the retrenchment of expenditure and the reduction of taxation was one of the principal, if not the paramount, duties delegated to this Congress. No action by the Congress can effect such retrenchment more directly or more expeditiously than a reduction in the number of employees on the pay rolls of the Government. That there is an excess of employees over the number actually required for the adequate and ample transaction of Government business is universally conceded. The chairman of the Committee on Appropriations, probably the best-informed man on the subject in America and in a position to judge this situation more accurately than any other official of the Government to-day, estimates that 30,000 superfluous employees are being carried on the pay rolls, and no doubt that is a conservative estimate.

An investigation to disclose the extent of this surplus of employees and authorizing recommendations as to methods of reducing to a minimum the number on the rolls is provided in this resolution.

This plan is both practical and economical. The committee is authorized to sit during vacation, when ample time will be afforded for investigation and a thorough study of the situation may be made, as indicated, without the expenditure of a dollar. When Congress reconvenes in December it will have at its command ample and authoritative data and will be in a position to take immediate action providing for a reduction of the number of employees, which will result in an annual saving of hundreds of thousands of dollars now disbursed in useless salaries and in the return to productive industry of surplus employees now needlessly retained at Government expense and engaged in lost motions in the blind alleys of departmental routine.

The same jealous care that would be given to any private trust should be exercised in the administration and use of Government money and time. There should not be one standard for private transactions and another for the Government service. Millions have been wasted because of the failure of Federal personnel to realize their responsibilities as trustees to the Nation. The Congress has the opportunity to discharge its full duty in that respect even at this eleventh hour by the passage of this resolution.

WHAT AND WHO DEFEATED THE M'NARY-HAUGEN BILL

Mr. LEAVITT. Mr. Speaker and gentlemen of the House, lessons are learned from moments of defeat which aid in reaching the hour of final victory. But it is essential to that end that correct conclusions be reached and that the lessons learned be the whole truth and not mere statements with selfish motive and based on half truths only.

It does not follow of necessity because a skillful speaker or writer calls attention to a bad situation that the remedy he himself advances is the right one. He may be simply ambitious or misled. Or, again, he may be purposely stating only that part of a truth which is to his own advantage.

Since the defeat of the McNary-Haugen farm relief bill many wild statements have been made as to what caused it. I was a sincere supporter of that measure. I made the first speech delivered in Congress in behalf of its principle, on the 8th of January, 1924, eight days before the bill was introduced. I used as the basis of my address the report of the Secretary of Agriculture on the wheat situation, which report had just been published. Again, on the 23d of May, when the measure was before the House after long hearings in committee, I spoke for it. During all the time it was being considered I worked for its success. No one was more disappointed than I when the final vote was reached on the 3d of June and it failed of passage.

Why did it fail? That was the first question which began clamoring for an answer in my mind, because to me this is only the first battle and not the end of the war for justice to agriculture. To that end let us see, first of all, who opposed it.

I have checked and mapped as to location every vote for and against this bill. I have classified them all as to party. I have been at great pains to find out whether the vote was sectional, political, or a division between city and country districts. I found that the vote was influenced to some extent by all of these factors, but there are some outstanding facts which will interest you and may help to point the way to the best step to take next.

I will first analyze the vote of the members of the House Agricultural Committee itself. There are 12 Republicans and 9 Democrats on that committee. When the bill was finally voted

on for passage nine of the Republicans voted for it and three against. Of the nine Democrats on the committee, four voted for the bill and five voted against it. But here is another interesting thing: The fight against the bill in the committee and on the floor of the House was led principally by two Members—Mr. VOIGT, of Wisconsin, generally considered a leader of the La Follette Republicans, and Mr. ASWELL, of Louisiana, who would become chairman of the Agricultural Committee as the ranking Democrat in case the Democrats should have a majority in the next Congress.

The opposition of these two gentlemen is particularly significant and interesting. It is generally conceded here, Mr. Speaker, that they had more to do with defeating the McNary-Haugen bill than any other Members of this House. They had both signed the minority report against the bill as dissenting members of the Agricultural Committee, Mr. VOIGT'S name being first and Mr. ASWELL'S name being second of four signing that adverse report. They joined in saying, among other things:

> The plan by which it is proposed to give the producers increased price for "wheat, flour, rice, corn, wool, cattle, sheep, swine, or any food product of cattle, sheep, or swine," as mentioned in the bill, is fully discussed in the majority report, and needs no amplification here. We contend that the plan is unworkable; that it will defeat itself; that if the corporation proposed in the bill were to attempt to put it in operation as to the commodities mentioned it would fail and bring nation-wide distress. It is impossible within the reasonable limits of a minority report to specify all objections which occur to us, but we shall point out the principal objections, which, in our judgment, demonstrate conclusively the futility of the plan.

The gentleman from Wisconsin [Mr. VOIGT] was not content with signing the minority report against the bill, but in order to more effectually kill it he had added to the report what he called "Additional Views of Mr. VOIGT," in which he proposed a bill of his own, and he spoke for an hour and a half against the McNary-Haugen bill as a member of the committee. He did not revise and print his speech until the debate was nearly over so that it could not be taken up in detail.

It is not my purpose to criticize my colleagues nor to question their motives, but the surprise with which the opposition of one who has always placed himself in that group claiming to represent progressive ideas and the common people was received was not in any way lessened when I found that of the 10 Wisconsin Congressmen of that group 5 had voted against this measure for the relief of our farmers and 5 for it, thus dividing so that their vote was neutralized and of no effect in the result. If we add the vote of the one Socialist Member [Mr. BERGER], who voted against the bill and told me it was not socialistic, the balance of Wisconsin's delegation was toward the defeat of the McNary-Haugen bill. The hope, therefore, of those who believe in this legislation does not lie in that direction.

And what about the opposition of the gentleman from Louisiana [Mr. ASWELL]? My farmers will be much interested in his leadership against this bill, because if the Democrats should win a majority in the next House of Representatives he will, as their ranking member of the Agricultural Committee, be the chairman of that committee and the most powerful Member in the framing of farm legislation. They will notice that with very few exceptions the South voted against this bill under his leadership, and they will not look in that direction for the solution of their problem. They will not forget that he closed his speech in this House last Tuesday with this statement about this bill, which my farmers had studied and approved and asked for:

> Except that it is unconstitutional, unworkable, impracticable, socialistic, communistic, bolshevistic, and would enslave the farmers, otherwise it might be all right.

Mr. Speaker, I hold no brief for the Republican Members from the great industrial centers of the East. New England, Republicans and Democrats alike, voted against the McNary-Haugen bill just as solidly as did the Democrats of the South. Massachusetts gave it one vote, a Republican, and New York gave it one vote, a Democrat. It got some support in Pennsylvania from both parties, and then, beginning with West Virginia and Ohio, its support grew as the great West was approached. Of the votes cast in Ohio it got half. West Virginia gave it 4 votes; all that voted. Indiana gave it 11 out of 13 votes, and Illinois gave 16 out of 27, all but one of the opposition being from Chicago, and 2 not voting.

From there on west it was almost a solid vote for the McNary-Haugen bill, only the great cities voting against it. Texas gave it but one vote, and the coast districts of California were against it, but all in all the West, the Northwest, the Southwest, the Middle West, and the Lake States gave it a fine support. In 16 States it had no opposition, and in only 11 was it without some support.

The gentlemen representing great industrial centers expressed the fear that it would raise the cost of living to their working people, and some were not convinced that this bill offered the right solution to problems which they knew to exist. I know, too, that the measure was fought by the packing and milling interests. But it is not my purpose, now that the vote has been taken, to enter again into a discussion of the merits of the bill. We will be here fighting again for agriculture next December, and I am now but studying and mapping the ground upon which we must advance.

There were 161 votes and pairs for the McNary-Haugen bill, and 232 were against it. Seventeen Republicans and twenty-four Democrats did not vote. One hundred and two Republicans and fifty-seven Democrats voted for the measure; to this add the one Independent and one Farmer-Labor vote. One hundred and five Republicans and one hundred and twenty-six Democrats voted against the bill; to this add the one Socialist. This analysis shows that the vote was not exactly political, although the bulk of the support was Republican and the bulk of the opposition Democratic.

But let us in closing come back to the House Agricultural Committee and its stand on this bill. Mr. HAUGEN, the gentleman from Iowa, is the chairman of that committee, and it makes a great deal of difference who is the chairman of a committee when it comes to getting a bill reported out. This was his bill and bore his name, and it was supported by eight other Republicans on the committee and four Democrats. If the Republicans remain in the majority in the next Congress, Mr. HAUGEN will still be chairman of that committee, in all human probability. If the Democrats are in a majority, the seniority rule will place Mr. ASWELL, of Louisiana, the leading opponent with Mr. VOIGT, as the chairman.

Mr. Speaker, this is a practical matter to the people of the farms, who need and deserve the action of this Congress in meeting difficult conditions. This bill did not pass, but there is certainly greater hope for suitable legislation in the future coming out of a committee headed by the one whose name is on this measure—Mr. HAUGEN—than from a committee headed by the gentleman from Louisiana [Mr. ASWELL], who termed the supporters of this measure Bolsheviks. My people will not be pleased with the action of the industrial centers and the South in defeating the McNary-Haugen bill, and they will protest; but they will not forget that its defeat was due to the gentleman from Wisconsin and the gentleman from Louisiana above all others, because they as members of the committee brought out a minority report against it and fought it on the floor of the House. They will resent the opposition of the Northeast and the East, but they will not injure themselves by putting at the head of this great committee the ones who fought and ridiculed them in the Congress of the United States.

And finally, Mr. Speaker, while I can hardly believe such a thought could rule anyone at such a time as this, if it was the intention of anyone to defeat or fail to support this bill so that it might be said in the coming campaign that this Congress has done nothing for the farmers, this analysis of the vote shows who is to be blamed.

### RIVER AND HARBOR IMPROVEMENTS

Mr. PORTER. Mr. Speaker, to-day I introduced a bill authorizing a bond issue in the sum of $204,000,000 to furnish the funds necessary to complete approved river and harbor projects as rapidly as is economically practicable. It is introduced at this time in order that it may be fully discussed and its merits thoroughly established before it is brought up for action at the December session of Congress. The bill does not take the place of the "river and harbor" bills, whose function is to adopt new projects or modify existing ones. It simply provides the means of financing projects which have already been adopted and most of which are partially completed.

We have spent since the beginning of our history approximately $750,000,000 for river and harbor improvements. This does not include the Panama Canal or flood-control expenditures. A large part of this investment has been lying unused for years, the Government bearing the expenses of maintenance and losing the interest on the unproductive investment.

Over 92 years ago Abraham Lincoln when a member of the General Assembly of Illinois made an appeal for the improvement of the Sangamon River, in the course of which he said:

> Yet it is folly to undertake works of this or any other kind without first knowing that we are able to finish them, as half-finished work generally proves to be labor lost.

Less than one-fourth of the total investment in these improvements is now needed to complete them and thereby protect and make productive the existing three-fourths. Sound business principles would seem to demand that this be done promptly to secure the use and benefit of such a vast expenditure of the people's money.

The bill follows:

A bill (H. R. 9730) authorizing the issue and sale of bonds to pay the cost of completing authorized public works on rivers and harbors, and for other purposes

Whereas among the present-day problems none is more acute and pressing for solution than that of transportation, which is the connecting link between producer and consumer; and

Whereas experience has demonstrated the great importance and imperative necessity for the speedy completion of the public works on the waterways of the United States—the great economy resulting from water transportation, as shown by both Government and private operations, is the master key to the transportation problem, as it presents a cheap and dependable highway of commerce; and

Whereas the Government has expended approximately $750,000,000 in the partial improvement of approved river and harbor projects in the United States; and

Whereas not only is the greater part of this investment unproductive by reason of the fact that the improvements have not been completed to a point where they can be economically utilized, but also the Government must bear the expenses of maintenance and lose the interest on its investment; and

Whereas $204,000,000, according to the estimate of the United States engineers, is required to complete all river and harbor projects heretofore approved by the United States engineers and authorized by laws approved by the President; and

Whereas it has been shown that material economies in construction can be obtained by carrying on this work as rapidly as is economically practicable, and this has proven impossible under the present policy of annual appropriations; and

Whereas the prompt completion of these projects is needed both for the purpose of securing the nation-wide benefits which will be derived therefrom and for the purpose of utilizing the large investment already made on the waterways throughout the entire country; and

Whereas it is a just and sound business practice to distribute the cost of permanent improvements over the period during which the benefits from the improvements are to be enjoyed: Now, therefore,

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized to borrow on the credit of the United States, from time to time, as the proceeds may be required to defray expenditures to be made under the direction of the Secretary of War and the supervision of the Chief of Engineers for the construction of authorized public works on rivers and harbors, the sum of $204,000,000, or so much thereof as may be necessary, and to pay upon the request and at the direction of the Secretary of War such sums as may be required by the Secretary of War for the completion of the public works on rivers and harbors heretofore approved by the United States engineers and authorized by laws approved by the President, and the Secretary of the Treasury is further authorized to prepare and issue therefor coupon or registered bonds of the United States in such form and in such denominations as he may prescribe, redeemable in gold coin at the pleasure of the United States after 10 years from the date of their issue and payable 30 years from such date, bearing interest quarterly in gold coin at a rate not exceeding 4½ per cent per annum: *Provided*, That said bonds may be disposed of by the Secretary of the Treasury under such regulations as he may prescribe, giving all citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon; and a sum not exceeding one-tenth of 1 per cent of the amount of the bonds herein authorized is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to pay the expense of preparing, advertising, and issuing the same: *Provided further*, That the proceeds of the sale of the bonds herein authorized shall be used only for the purpose specified in this act.

HISTORY OF RIVER AND HARBOR IMPROVEMENT

From time immemorial people have gravitated toward their waterways. Being the world's most durable and economical traffic bearers, they have been instrumental in building the important commercial centers of the world.

Navigable rivers are the greatest business asset that any nation can possess. They always run down grade to the sea—and the sea is our one wide highway to the markets of the world. It covers three-fourths of the area of the globe—our rivers and harbors are but arms of the sea.

In the United States nature has directed rivers through the heart of the continent in the pathway of our greatest commerce. Near their shores lies the most productive region in the world—rich in agriculture, vast forests, minerals, coal, sand, gravel, clay, and manufactured products. They are crossed by all the great trunk-line railroads of the United States.

Waterways are the people's property. Having been placed under Government control, they should receive consideration at least equal to that afforded the railroads which are owned by private individuals.

On the other hand, this great natural asset has been handled with marked indifference. Millions have been expended here and there, and in many cases not sufficient to conserve the capital already invested.

Gen. Harry Taylor, who has recently been confirmed as the new Chief of Engineers of the Army, in an address before the West Virginia Manufacturers' Association, gave the following figures for the amounts spent by the Federal Government on various classes of river and harbor improvements from the time when such improvements were first instituted up to June 30, 1923:

| | |
|---|---|
| For the improvement and maintenance of harbors on our Atlantic, Gulf, and Pacific coasts, and in Hawaii and Porto Rico | $385,000,000 |
| For coastwise channels and intracoastal canals among the Atlantic and Gulf coasts | 15,000,000 |
| For connecting channels and harbors of the Great Lakes | 142,000,000 |
| For interior rivers and lakes other than the Great Lakes | 445,000,000 |
| For investigations, surveys, and contingent expenses not susceptible of classification | 20,000,000 |
| For projects which have been abandoned or have proved obsolete or have been otherwise dropped from reports | 20,000,000 |
| Grand total | 1,027,000,000 |

The above figures are, of course, approximations. They do not include the amounts spent for levee construction on the Mississippi River nor for flood control on the Sacramento River. They cover both improvement and maintenance.

In this connection General Taylor states:

For a long period in the early days of the administration of improvements separate maintenance accounts were not kept and reliable figures of the total cost of the new work are consequently not available. The best information at hand shows that approximately $750,000,000 represents the capital cost of river and harbor improvement, this figure being, if anything, too large. Great as this expenditure is, it sinks into insignificance in comparison with the capital expenditure on other means of transportation. The capital expenditure on the railroads of this country is in the vicinity of $20,000,000,000. We have been spending money on highways for the last four years at the rate of approximately $500,000,000 per year, so that the expenditures in two years for roads very nearly equals the total expenditure for river and harbor improvements since the beginning of the Government.

The completion and successful operation of our natural system of waterways is the accepted agency for the solution of our transportation problem. The need is so imperative and so apparent and the benefits that will accrue to the Nation as a whole so evident that little argument should be required as to the integrity of the proposition to complete them. With straight-thinking people it becomes therefore only a matter of ways and means.

ECONOMIES AND SERVICE AFFORDED BY WATERWAYS

Waterways are an inseparable part of our national transportation, a system which to be thoroughly efficient and economical should consist of a proper coordination of the three existing agencies, namely, railways, waterways, and highways.

A general recognition that transportation by water is many times cheaper than by either rail or highway has created throughout the United States in the interest of cheaper freight rates and lower cost of living a growing favor for waterway improvement.

In a recent report issued by M. G. Barnes, member of the American Society of Engineers and chief engineer of the division of waterways of the State of Illinois, there appears a statement to indicate relative transportation costs. It shows the number of miles $1 will carry a ton of freight by different methods:

| | Miles. |
|---|---|
| With horse and wagon | 4 |
| Automobile truck | 20 |
| Railroad | 100 |
| New York Barge Canal | 300 |
| Great Lakes freighters | 1,000 |
| Ohio and Mississippi Rivers (downstream) | 3,000 |

Brig. Gen. Frank T. Hines, former Chief of Transportation, Inland and Coastwise Waterways Service, War Department, in a recent article states it in another way: On a highway a single horse with an ordinary dray can draw 2 tons of freight. Hitch him to a car on a railroad track and he can pull, at the

same rate of speed, 15 tons. If, however, he be hitched from the bank to a well-designed boat in the stream he will with the same effort be able to pull 105 tons of freight through still water.

The average rail rate throughout the United States last year was 10.78 mills per ton-mile. The Federal barge line operating on the Mississippi River carried freight last year for 3½ mills per ton-mile and earned a profit for the Government. The Great Lakes steamers are thriving carrying freight at 1.14 mills per ton-mile.

The most convincing example of economy and service afforded by water facilities is the performance since 1918 of the Government owned and controlled barge service. Even with its limited equipment and the delays encountered in service due to lack of proper channel development in the lower Mississippi it has been able to prove the economical value of the water carrier by actual accomplishments the worth of which no one can dispute. During the 30-month period ending December 31, 1923, the line actually saved to shippers in 25 States a total of over $2,000,000 in transportation costs, which represents an average saving of $1.40 per ton.

There has been an attitude on the part of the shipper located away from water transportation facilities that the benefits of water carriers are solely for cities located immediately on the waterways. Nothing could be further from the truth. The vast majority of all water-borne commerce either originates on a railroad line or is delivered to a railroad to be carried to its destination. For instance, the Federal barge line performance for the calendar year ending June 30, 1923, shows that of the total tonnage handled by the line during this period 54.3 per cent, or over one-half, was in connection with joint hauls by railroads. This fact demonstrates the value of water facilities to the inland community. An average of 65 per cent of the total tonnage of the barge line since its inauguration has been handled in conjunction with rail lines and, exclusive of grain, 95 per cent of the tonnage either comes from or goes to rail lines. And, too, we must remember in this same connection that in the 30-month period, above referred to, the barge line's savings of over $2,000,000 affected 25 States, and that the great majority of the cities either receiving or shipping freight in these States can be classified as interior points.

There is not enough tonnage solely at the river points to keep a facility such as the barge line busy. Also these rates at interior points reflect the same saving of 20 per cent as the all-water rate between St. Louis and New Orleans.

Now, a word as to service.

The prevailing opinion of water-borne commerce is not in line with the actual facts as to time consumed. In the case of the barge line, it has established and maintained sailing schedules comparable with the best rail time. For instance, the line recently inaugurated a new express service on the Mississippi River between St. Louis and New Orleans which gives shippers a 5-day service southbound and 10 days northbound.

Five days St. Louis to New Orleans via water is a schedule which the ordinary daily freight train can not meet. Ten days from New Orleans to St. Louis compares favorably with the regular rail time between these two points.

As an illustration to convince that the combination of economy and service applies to the water carrier, I will cite the performance of the self-propelled barge *Birmingham*, which made the initial trip in the new express river service March 29 of this year. The inaugural trip was made from New Orleans to St. Louis as per schedule of 10 days, running time. The *Birmingham* carried a capacity load with a total tonnage of 1,123 tons. Included in the tonnage were 448 tons, or 17 carloads, of sugar. The saving in freight costs accruing to the shippers of this commodity amounted to 10 cents a hundred pounds, or a total of $897 was saved on the entire sugar shipment. A total of 514 tons of coffee, or 27 carloads, carried at the same saving per hundred pounds, netted the shippers of this commodity $1,028. The commodities carried went to many cities of the North and had come from nearly all countries of the world. The above savings are in addition to those enjoyed by the shippers of hundreds of other commodities carried by the *Birmingham* on its initial trip.

I have no available figures as to tonnage carried on the first southbound trip. However, a telegram has been shown me which was received by the Mississippi Valley Association from the Federal manager of the barge line immediately after the boat docked at New Orleans, stating that the first merchandise steamer southbound from St. Louis, leaving April 4, arrived at all ports on time.

Mr. A. B. Shepherd, vice president of the Jones & Laughlin Steel Corporation testified before the Rivers and Harbors Committee as to the time required for delivery of their steel by water. He cited a trip from Pittsburgh to St. Louis by water in 14½ days, as against 10 days by rail.

PARTIALLY COMPLETED WATERWAYS CARRY ENORMOUS TONNAGE

The low cost of river transportation is becoming so well recognized that private capital is investing enormous sums in water equipment. Last year industry on the Ohio alone spent $10,000,000 for new river equipment. A survey recently made shows that the investment of private capital in water facilities on this river totals approximately $20,000,000.

Such outstanding firms as the Pittsburgh Steel Co., the Carnegie Steel Co., the National Tube Co., the Jones & Laughlin Steel Corporation, and others maintain large fleets of barges to take advantage of the economies afforded by this means of transportation. Only last year the Jones & Laughlin Steel Corporation authorized a million-dollar building program to provide new floating equipment to supplement their present facilities, which, by the way, transported steel last year on the Ohio and Mississippi as far as St. Louis at a saving to the consumer of $2.75 a ton, and in shipping to Memphis, Tenn., in spite of the difficulties and delays due to the incompleted conditions of the Ohio River project and to a shift of the channel in the Mississippi after the big flood of 1922, they have made an average saving of between $2 and $3 per ton, as compared with the rail freight charge, and the purchaser has secured the benefit of this saving in the price of steel he bought. The same company handles its own coal on the Monongahela River for a distance of 60 miles at a cost of 15 cents per ton as against a rail rate of 75 cents per ton.

General Taylor stated recently before the House Rivers and Harbors Committee that to the best of his knowledge there is not a boat yard on the Ohio River that is not fully occupied with work building towboats and barges for private concerns.

So much for private interest in water transportation.

We often hear the doubt expressed as to the possible use the waterways will be put to if they are sufficiently improved to permit dependable and economical navigation. This doubt is convincingly answered by the tonnage now being carried on rivers, even under the most adverse conditions.

Let us briefly review the available tonnage figures for three rivers in the Pittsburgh district—the Ohio, Monongahela, and Allegheny Rivers. During the year 1921 a total of 17,353,782 tons was shipped over these three streams; in 1922, 18,211,902 tons; and in 1923, 28,234,000 tons. For the year 1923 a total of 23,560,000 tons was carried on the Monongahela, 4,613,000 tons on the Allegheny, and 7,286,000 tons on the Ohio. In 1923 the Monongahela River alone handled only about 1,600,000 tons less than the Panama Canal and 783,000 more than the Suez Canal. On the Mississippi River between St. Louis and New Orleans the following tonnage was carried: 1922, 655,789 tons; 1923, 595,115 tons; and for the first six months of 1924, 339,522 tons. Officials of the Federal barge service, which carried the tonnage above referred to, are confident that the line will carry 1,000,000 tons in 1924.

The strongest argument in favor of the immediate development of our waterways for transportation purposes is found in the present activities on them.

VALUE OF WATER TRANSPORTATION TO AGRICULTURE

The commerce of the world relies to a surprisingly large extent on agriculture, and agriculture is entitled to the best possible and cheapest form of transportation that human genius can provide. The grain and livestock and all of the products of the soil that move marketward comprise a total volume so large as to baffle the human mind to comprehend. Transportation service and economical shipping rates are of first importance. Lacking either of these the greatest single industry of the world is crippled.

It is the cheapness of waterway transportation that holds out the greatest possibilities for the broadest and most certain prosperity for agriculture. This advantage, which can not be ignored, must be employed if agriculture is to prosper in proportion to the importance of the rôle it plays in the industrial and business affairs of the world.

A study of the map showing the agricultural producing sections of this country, with the thought of waterways in mind, will reveal some interesting and impressive facts. The Mississippi River flows from near the Canadian border almost directly southward to the Gulf of Mexico, dividing the United States in two nearly equal sections. This majestic river, known as "The Father of Waters," furnishes a channel for boat traffic as far north as the Twin Cities, Minneapolis and St. Paul.

The Missouri River heads far in the Northwest, in western Montana, and empties into the Mississippi near St. Louis. In an

early day there was steamboat traffic as far upstream as Great Falls, Mont. In the seventies Sioux City, Iowa; Yankton, S. Dak.; Fort Benton, Mont., and other Missouri River points were shipping ports of very considerable importance. The traffic carried vast quantities of freight downstream to the Gulf and from the Gulf far into the interior.

The Ohio River has long been available for navigation from near its source adjacent to Lake Chautauqua, in western New York, but a short stride from Lake Erie, south and westward to its mouth at Cairo, Ill., where it merges with the Mississippi. There is yet another water course, the Illinois River. This channel directly connects the Great Lakes and the Gulf of Mexico.

These great rivers branch out and encompass the whole agricultural section affording usable highways which, if developed, would provide not only adequate transportation facilities, but provide these at a rate which would prove an enormous impetus to agricultural development and to all the countless industries that inevitably grow with the building of agriculture.

The amount of wheat transported by the Federal barge line in the month of August, 1923, was 1,364,707 bushels and on this single month's shipments the shippers realized a saving in freight of $53,223. When this is accomplished by one barge line of very limited equipment and wholly inadequate dockage the possibilities of the navigable rivers loom large for transportation service and shipping economy. It appears that this single barge line, handicapped though it was, made a profit of very impressive proportions carrying freight at 3½ mills per ton-mile. This is decidedly suggestive when it is understood that the average rail rate throughout the United States was 10.78 mills per ton-mile. Under present conditions the railroads paralleling the waterways are permitted to make a lower rate, so, as a matter of fact, the existence of a barge line effects a much greater saving than the amounts quoted.

The potential agricultural tonnage available for the waterways is enormous. In a statement of Mr. James E. Smith, president of the Mississippi Valley Association, which he made before the Committee on Rivers and Harbors of the House of Representatives on March 20, 1924, he stated that the nine leading agricultural States, including Kansas, Nebraska, South Dakota, North Dakota, Minnesota, Wisconsin, Iowa, Illinois, and Missouri, produced, in 1922, 490,313,000 bushels of wheat, or 56.51 per cent of the total production of the United States; 1,599,465,000 bushels of corn, or 55.04 per cent of the total production of the United States; 828,388,000 bushels of oats, or 68.14 per cent of the total production of the United States; 75,563,000 bushels of rye, or 73.10 per cent of the total production of the United States; 117,510,000 bushels of barley, or 64.54 per cent of the total production of the United States, or a total of 3,111,239,000 bushels of the grains mentioned.

Representative EDWARD C. LITTLE, of Kansas, testifying before the same committee on April 4, in outlining the merit of waterway development on the Missouri River to the farmer, said: "A couple of years ago I made considerable study of this situation, and I find at hand some of the remarks I made then. I said that the State of Kansas paid 10½ cents a bushel to send its wheat to Chicago and 21 cents more to get that wheat to Liverpool—that makes 31½ cents a bushel. We are shy that much on every bushel of wheat we ship to Liverpool.

"You can ship wheat from New Orleans to Liverpool for 8 cents, or you could at that time. You could ship wheat by barges, with tugboats, from St. Louis to New Orleans for 8 cents.

"That makes 8 cents and 8 cents, which is 16 cents. If we could get the tugs and barges running from Kansas City to St. Louis and down the river we would send out wheat to New Orleans for about 10 cents, and 8 cents from there to Liverpool would make 18 cents. We would save the difference between 18 cents and 31 cents on every bushel, or 13 cents a bushel on wheat.

"In 1921 Kansas raised 128,000,000 bushels of wheat. At 13½ cents a bushel that would be over $17,500,000. If you will give us a million and a half a year to fix the Missouri here for a few years we will have a 6-foot channel to St. Louis and then save $17,500,000 a year for the farmers."

Favored thus in the solution of the transportation problem by the maximum use of the waterways the great agricultural producing section of this country will move forward in importance in world commerce and amazingly in the benefits to which it is justly entitled. No other section in the world is favored to such an extent in natural resources. No other section is more clearly entitled to the best transportation facilities and service, and none is more deserving of favorable shipping rates.

PROCEDURE IN ADOPTING RIVER AND HARBOR PROJECTS

There are very few people who realize the great care with which river and harbor projects are scrutinized and the large number of separate and impartial examinations which are made of each such project before its improvement is authorized by Congress.

The late James R. Mann, who was for many years an acknowledged leader in the House of Representatives and one of the best-posted men who ever served in Congress, stated on the floor of the House:

> Whatever men may think about the merits of particular propositions in a bill, there is no legislation which comes before Congress which is so critically scanned by experts as are the river and harbor bills before they reach the House. * * * There are more processes involved, and far more expert men, wholly disinterested, unbiased, uncontrolled by politics, in reference to a river and harbor item than for any other legislation provided by any legislative assembly in the world.

Here are the steps through which any river or harbor project must pass before any work is authorized to be done on it:

1. Authorization by Congress for a preliminary examination and survey. In effect, this authorizes the Chief of Engineers to direct the district engineer, in whose district the proposed improvement lies, to make a preliminary examination and to report to him whether there appears to be sufficient merit in the proposal to justify a thorough examination and survey.

2. The district engineer makes this preliminary examination, and his report, which deals largely with present and prospective commerce and the benefits to commerce which the proposed improvements would afford, is sent to the division engineer.

3. The division engineer, who is a senior officer, with years of experience on river and harbor work, and has supervision over several districts examines the report of the district engineer and makes his comments on it, and any recommendations he may see fit and sends it on to Washington.

4. It is then turned over to the Board of Engineers for Rivers and Harbors, which is a body specially created by law to review all river and harbor projects in an impartial way and from a strictly national point of view. This board reviews the report of the district engineer and the comments of the division engineer, and reports the whole matter to the Chief of Engineers with its views and recommendations.

5. The Chief of Engineers then examines the report of the district engineer and the comments and recommendations of the division engineer and the Board of Engineers for Rivers and Harbors in order to determine whether a thorough examination and survey are justified by the present and prospective commerce and the benefits to commerce which the proposed improvement would afford. If his decision is unfavorable (5a) the Chief of Engineers so reports to Congress. Congress may let the matter drop there, and the matter is ended. If, however, they think that any facts or considerations have been overlooked or not given sufficient weight they may (5b) authorize a further examination of the proposed improvement and a subsequent report to Congress.

If in step 5 the decision of the Chief of Engineers is favorable, or if Congress has authorized further examination, as in step 5b, then—

6. The Chief of Engineers directs the district engineer, or such other officer or board as he may designate, to make a thorough examination and survey of the proposed improvement and to make recommendations as to exactly what work should be done and an estimate of how much it will cost and the rate at which the work should be prosecuted. This report also completes, as far as possible, commercial statistics and gives consideration to such subjects as the adequacy of terminal facilities, the possibility of water-power development, etc.

7. This report is transmitted through the division engineer, who again makes his comments and recommendations and forwards it to Washington.

8. The report, with the comments of the division engineer, goes to the Board of Engineers for Rivers and Harbors, which reviews the whole question and makes its report and recommendations to the Chief of Engineers.

9. The Chief of Engineers examines the report of the district engineer or other officer or board and the comments and recommendations of the division engineer and the Board of Engineers for Rivers and Harbors.

10. The Chief of Engineers sends to Congress his report and recommendations on the proposed improvement, either transmitting in full or summarizing for the benefit of Congress the views and opinions of the district engineer, the division engineer, and the Board of Engineers for Rivers and Harbors.

11. This report is referred to the proper committees of Congress, the Committee on Rivers and Harbors in the House of Representatives and the Committee on Commerce in the Senate.

12. Hearings are held by these committees, at which all interested parties are given an opportunity to be heard, and at which the Chief of Engineers and his assistants may be asked for further information. If the decision of the committee is favorable, then—

13. The committee includes an item for the proposed improvement in a bill which it reports to its House of the Congress with the recommendation that it pass.

14. The bill must pass both Houses of the Congress and be approved by the President. The proposed improvement, then, is an adopted project, and work is authorized upon it when Congress shall have provided the necessary funds.

Surely, Mr. Mann was justified in his statement that no other legislation is given the careful and impartial scrutiny that is accorded river and harbor legislation before a project can be adopted, and the chance of an unwarranted improvement being adopted is practically nil.

ESTABLISHED METHOD OF FINANCING IMPROVEMENTS

But when a project has been adopted there is still the matter of providing funds for its carrying out. This is no small matter under the present procedure. Here are the steps in providing these funds:

1. The district engineer, in his annual report to the Chief of Engineers, includes an estimate of the money required for the next fiscal year for each of the approved projects in his district.

2. The division engineer comments on these estimates in transmitting this report to the Chief of Engineers.

3. The Chief of Engineers reviews the estimates of the district engineers and the comments of the division engineers in preparing his estimate of the total funds required for river and harbor improvements during the next fiscal year.

4. The Chief of Engineers transmits his estimate of the funds required for river and harbor improvements to the Chief of Finance of the War Department for consideration in conjunction with all the other requirements of the War Department.

5. The Chief of Finance prepares for the Secretary of War the preliminary budget estimates to be transmitted to the Bureau of the Budget.

6. The Bureau of the Budget considers these preliminary estimates in conjunction with similar preliminary estimates from all the other departments of the Government and returns them requesting such modifications as it deems necessary to fit them into the financial program of the Government.

7. The Chief of Finance of the War Department, after consultation with the Chief of Engineers, prepares revised estimates to be transmitted by the Secretary of War to the Bureau of the Budget for inclusion in the Budget.

8. The Bureau of the Budget holds hearings to determine the necessity for providing the funds requested in these revised estimates.

9. The President transmits the completed Budget to Congress as his recommendation of the funds required by the different departments of the Government.

10. The Committee on Appropriations of the House of Representatives holds hearings to determine the necessity for providing the funds recommended in the Budget.

11. The Committee on Appropriations reports the bill to the House of Representatives with its recommendations as to the funds required.

12. The House of Representatives votes on the bill as reported by the Committee on Appropriations, and may modify any item in it.

13. The Committee on Appropriations of the Senate holds hearings to determine the necessity for providing the funds contained in the bill as it passed the House of Representatives.

14. The Committee on Appropriations reports the bill to the Senate with its recommendations as to the funds required.

15. The Senate votes on the bill as reported by the Committee on Appropriations and may modify any item in it.

16. If the Senate and the House of Representatives have voted different amounts for any item in the bill, that must be a subject of conference between the two Houses, and the decision of the conferees must be accepted by both Houses before the bill goes to the President for signature.

17. Finally the bill must be approved by the President.

The practical result of this procedure is that it is impossible to predict how much money may be made available for carrying on the improvement of waterways, even after the project has been adopted by Congress, and it is therefore impossible for the engineers to adhere to any definite program of construction. Anyone who has ever done any construction work on a large scale knows the absolute necessity of working to a definite program if waste is to be avoided and the work to be finished at a reasonable cost. That this is impossible under the present procedure is due not only to the long and complicated process of making appropriations but also to the changing personnel of Congress and the lack of understanding or lack of interest, or both, of some Members who are not familiar with the benefits to be derived from waterway improvements nor with the necessary conditions for their economical procurement.

LACK OF RESULTS OF PRESENT METHOD OF FINANCING

During the visit of Lloyd-George to America last year he was asked while in St. Louis what was the most impressive thing he had seen during his tour of this country. At the time the question was put to the great English statesman he was standing on the bank of the Mississippi a short distance north of St. Louis. Without hesitation he replied, "I have witnessed to-day in the nonuse of the Mississippi River the greatest example of extravagant waste I have ever seen."

How long will it take to complete the work of development of our rivers and harbors and render available for public use the badly needed transportation facilities which will result therefrom? Under the present system of appropriating for them nobody knows how long it will take, because the will of Congress varies from year to year, and the engineers who are charged with the duty of carrying out this work are therefore handicapped in carrying out a consistent and comprehensive program.

Consider, for example, the Mississippi and Missouri Rivers. Here is what General Taylor says about the results to them of the present system of appropriations:

> In those cases, where the projects were adopted with a view to completion within a certain specific number of years—in the case of the Mississippi between the Ohio and Missouri, 12 years; in the case of the Mississippi between the mouth of the Missouri and Minneapolis, 12 years; and in the case of the Missouri River from Kansas City to the mouth, 10 years—the appropriations have not been sufficient to permit of the work being done at that economical rate. In some years practically nothing has been done, with the result that these improvements, which might have been completed by this time, and a large part of the work done during the period of low prices before the war, have now run over into the period of high prices, and much work remains to be done. In fact, due to the small appropriations and the lack of continuous and effective prosecution of the work, a considerable portion of the work already done will have to be done over again.

Maj. Gen. Lansing H. Beach, who retires as Chief of Engineers, United States Army, on June 18, stated to the members of the House Rivers and Harbors Committee considering waterway legislation on March 20, that "it would probably take to the year 3,000 to complete waterway improvements if the present system" of piecemeal appropriations is continued.

NEED OF PROMPT COMPLETION OF ADOPTED PROJECTS

Delay in improvement of our waterways is a loss every year in wealth amounting to more than would be required for improvement of the whole system of waterways, and it is subjecting the people to an immeasurable loss of prosperity which is unnecessary.

Waterway improvements are of little value unless completed. It is immaterial how much work may be done on a waterway if one small section remains unimproved the entire project is about as useless as a great bridge with one span out or a railroad with a section of track missing.

We learned during the World War the serious weakness of our transportation system. We must have relief from the freight congestion of a rapidly growing commerce so that facilities will be available to carry great quantities of freight at rates which water facilities alone can afford.

An improvement of such magnitude is calculated to benefit the entire country.

It will save to the farmers at least 20 per cent to 30 per cent of their freight costs, because it will give cheap transportation right through the heart of the great agricultural section of America.

Our farms and our factories must have world markets in which to sell their surplus goods and to take from them the things we want but do not ourselves produce. We must protect our trade lines; other nations have a monopoly on many articles of commerce that are necessary under our standard of living. There must be reciprocity—a swapping of our surplus factory and farm products for their articles of commerce, all of which means transportation in one form or another.

Our system of rail transportation is undergoing a change of life. There are several contributing factors, such as our natural increase in population, the inability of the weak rail lines to keep pace with the stronger ones, the unnecessary multipli-

cation of overhead charges, terminal congestion, and the lack of capital for needed expansion.

From now on the major transportation agencies of the country—its rail, water, and highways—must be so integrated that all avoidable friction shall be eliminated and all be made to work smoothly for one common purpose, namely, the movement of persons and things from one point to another at the lowest cost consistent with good service. In this general scheme of orderly and effective transportation the waterways must be placed in a position to participate under the favorable conditions which only their full and complete development will bring about.

AMOUNT NEEDED TO COMPLETE APPROVED PROJECTS

The latest estimate made by the United States Army Engineers of the amount required to complete all approved river and harbor projects is as follows:

PRINCIPAL SEACOAST HARBORS

| | |
|---|---|
| Portland Harbor, Me | $100,000 |
| Boston Harbor, Mass | 1,545,000 |
| Providence River and Harbor, R. I | 238,000 |
| Bronx River, N. Y | 143,000 |
| Jamaica Bay, N. Y | 10,541,000 |
| Harbor at Flushing Bay, N. Y | 115,800 |
| Newtown Creek, N. Y | 127,300 |
| New York Harbor, N. Y | 783,400 |
| Coney Island Channel, N. Y | 57,000 |
| Red Hook Channel, N. Y | 360,600 |
| Buttermilk Channel, N. Y | 1,609,900 |
| East River, N. Y | 33,372,800 |
| Harlem River, N. Y | 1,059,600 |
| Hudson River Channel, N. Y | 123,400 |
| Newark Bay and Hackensack and Passaic Rivers, N. J | 2,570,000 |
| New York and New Jersey Channels, N. Y. and N. J | 7,300,000 |
| Elizabeth River, N. J | 15,000 |
| Raritan River, N. J | 175,000 |
| Schuylkill River, Pa | 174,000 |
| Delaware River, Pa., N. J., and Del., Philadelphia, Pa., to the sea | 4,190,000 |
| Wilmington Harbor, Del | 257,000 |
| Baltimore Harbor and Channel, Md | 844,000 |
| Norfolk Harbor, Va | 2,222,500 |
| Thimble Shoal Channel, Va | 74,560 |
| Cape Fear River, N. C., at and below Wilmington | 420,000 |
| Charleston Harbor, S. C | 6,040,000 |
| Savannah Harbor, Ga | 1,042,000 |
| Brunswick Harbor, Ga | 1,012,000 |
| St. Johns River, Fla., Jacksonville to the ocean | 441,200 |
| Harbor at Key West, Fla | 970,000 |
| Tampa Harbor, Fla | 655,000 |
| Mobile Harbor, Ala | 1,195,000 |
| Southwest Pass, Mississippi River, La | 1,574,000 |
| Sabine-Neches Waterway, Tex | 1,719,000 |
| Galveston Channel, Tex | 2,466,400 |
| Houston Ship Channel, Tex | 1,100,000 |
| Port Aransas Harbor, Tex | 55,500 |
| Los Angeles Harbor, Calif | 450,000 |
| San Francisco Harbor, Calif | 240,000 |
| Oakland Harbor, Calif | 1,171,450 |
| Richmond Harbor, Calif | 173,500 |
| San Pablo Bay and Mare Island Strait, Calif | 333,000 |
| Coos Bay, Oreg | 2,620,000 |
| Columbia and Lower Willamette Rivers below Vancouver, Wash., and Portland, Oreg | 3,098,000 |
| Grays Harbor and bar entrance, Wash | 600,000 |
| Lake Washington Ship Canal, Wash | 563,000 |
| Honolulu Harbor, Hawaii | 760,000 |
| Hawiliwili Harbor, Hawaii | 325,000 |
| San Juan Harbor, P. R | 300,000 |
| Total | 97,322,910 |

SECONDARY HARBORS AND COASTWISE CHANNELS

| | |
|---|---|
| Beverly Harbor, Mass | 61,000 |
| Harbor of refuge at Nantucket, Mass | 34,000 |
| New Bedford and Fairhaven, Mass | 60,000 |
| Pawtucket River, R. I | 77,000 |
| Harbor of refuge at Block Island, R. I | 21,000 |
| Great Salt Pond, Block Island, R. I | 116,000 |
| Pawcatuck River, R. I. and Conn | 64,700 |
| New London Harbor, Conn | 120,000 |
| Connecticut River below Hartford, Conn | 105,500 |
| Housatonic River, Conn | 41,150 |
| Bridgeport Harbor, Conn | 81,200 |
| Norwalk Harbor, Conn | 118,000 |
| Stamford Harbor, Conn | 120,000 |
| Greenwich Harbor, Conn | 7,400 |
| Port Chester Harbor, N. Y | 12,500 |
| Mamaroneck Harbor, N. Y | 103,000 |
| Westchester Creek, N. Y | 475,000 |
| New Rochelle Harbor, N. Y | 35,000 |
| Port Jefferson Harbor, N. Y | 53,600 |
| Mattituck Harbor, N. Y | 81,800 |
| Great South Bay, N. Y | 5,700 |
| Tarrytown Harbor, N. Y | 6,300 |
| Burlington Harbor, Vt | 217,000 |
| Cheesequake Creek, N. J | 50,000 |
| Matawan Creek, N. J | 12,120 |
| Shoal Harbor and Compton Creek, N. J | 47,130 |
| Shrewsbury River, N. J | 50,000 |
| Mantua Creek, N. J | 40,495 |
| Oldmans Creek, N. J | 58,300 |
| Maurice River, N. J | 61,200 |
| Absecon Inlet, N. J | 148,000 |
| Tuckerton Creek, N. J | 1,640 |
| Inland Waterway from Delaware River to Chesapeake Bay, Del. and Md | 3,000,000 |
| Appoquinimink River, Del | $3,000 |
| St. Jones River, Del | 123,000 |
| Murderkill River, Del | 9,900 |
| Smyrna River, Del | 4,000 |
| Inland waterway between Rehoboth Bay and Delaware Bay, Del | 89,000 |
| James River, Va | 2,811,500 |
| Inland waterway from Norfolk, Va., to Beaufort Inlet, N. C | 3,651,600 |
| Harbor of refuge, Cape Lookout, N. C | 2,162,000 |
| Winyah Bay, N. C | 128,000 |
| Waterway between Charleston and Winyah Bay, S. C | 25,000 |
| Wappoo Gut, S. C | 28,500 |
| Waterway between Beaufort, S. C., and St. Johns River, Fla | 87,000 |
| Oklawaha River, Fla | 108,000 |
| Indian River, Fla | 19,500 |
| St. Lucie Inlet, Fla | 1,436,500 |
| Sarasota Bay, Fla | 7,740 |
| Harbor at St. Petersburg, Fla | 5,000 |
| Apalachicola Bay, Fla | 122,000 |
| La Grange Bayou, Fla | 28,500 |
| Barataria Bay, La | 51,000 |
| Bayou Teche, La | 148,000 |
| Intracoastal waterway from Mississippi River to Bayou Teche, La | 100,000 |
| Intracoastal waterway, Franklin to Morgentau, La | 463,700 |
| Intracoastal waterway, Calcasieu River to Sabine River, La. and Tex | 135,000 |
| Calcasieu River and Pass, La | 25,300 |
| Pascagoula Harbor, Miss | 163,000 |
| Channel from Aransas Pass to Corpus Christi, Tex | 1,394,800 |
| Crescent City Harbor, Calif | 414,000 |
| Humboldt Harbor and Bay, Calif | 1,135,000 |
| Noyo River, Calif | 8,000 |
| Yaquina Bay and Harbor, Oreg | 75,215 |
| Umpqua River, Oreg | 450,000 |
| Willamette Slough, Oreg | 23,350 |
| Lewis River, Wash | 14,400 |
| Anacortes Harbor, Wash | 89,000 |
| Total | 21,023,240 |

LAKE HARBORS AND CHANNELS

| | |
|---|---|
| Narrows of Lake Champlain, N. Y | 163,000 |
| Duluth-Superior Harbor, Minn. and Wis | 265,000 |
| Harbor at Port Wing, Wis | 8,200 |
| Keweenaw Waterway, Mich | 84,500 |
| Harbor of refuge at Grand Marais, Mich | 131,700 |
| Green Bay Harbor, Wis | 30,000 |
| Milwaukee Harbor, Wis | 3,500,000 |
| Racine Harbor, Wis | 27,000 |
| South Haven Harbor, Mich | 115,000 |
| Grand Haven Harbor, Mich | 40,000 |

| Grand total, approved river and harbor projects | 222,216,164 |

Since this estimate was prepared the War Department appropriation act for the fiscal year ending June 30, 1925, has been enacted, carrying $37,250,000 for rivers and harbors. Part of this appropriation will be required for the maintenance of existing improvements and the remainder will be available for expenditure on further improvements under the projects included in the above list. The net result is to reduce the amount still required to be provided to about $204,000,000.

This figure does not include any maintenance work, which can better be provided for by annual appropriations, the amount required being subject to variations in the light of actual experience from year to year. Moreover, maintenance is a current expense and is properly payable from current revenues. The annual maintenance now averages about 2 per cent per annum of the investment involved, and this percentage will be smaller when the projects are completed, as the engineers have testified that while there will be more work to maintain the cost is likely to be less, since completed improvements are less subject to damage by floods or otherwise than partially completed projects.

SOUND BUSINESS METHOD OF PROVIDING FUNDS

Our Government has been compared with a business corporation, the citizens of the country corresponding to the stockholders of a corporation, Congress to the board of directors, the President to the president of the corporation, and the members of the Cabinet to the administrative vice presidents of the corporation. A corporation is run for the benefit of its stockholders and the Government is run for the benefit of the citizens of the country. In the campaign of economy during the last few years, which has made tax reduction possible, the effort has been to get "more business in Government and less Government in business." It is largely due to the fact that business methods have been applied to many of the activities of this Government that economies have been secured, and the application of business methods to the financing of river and harbor improvements will produce equally beneficial results.

A business secures money for the construction of permanent improvements by the sale of securities. The choice of the form of security to be used—stock, bonds, or some other form—is determined by the circumstances in each case, but there is always a capital obligation of some sort representing the cost of all permanent improvements.

There are various reasons for this procedure, but the fundamental one is that it permits the prompt utilization of the improvements and the necessity of paying for them is postponed until the benefits from their use are being realized. In other words, this is a way to make the improvements pay for themselves.

The same line of reasoning applies with equal force to the financing of river and harbor improvements by the Government. Why should the taxpayer of to-day pay the entire cost of these improvements when the taxpayer of to-morrow—and many more to-morrows—will be deriving the benefits from them? The benefits of lower costs of transportation and reduced losses from congestion at critical points will result not only in these direct savings but also in the increased prosperity which the freer and cheaper circulation of commodities will produce. All this will provide the taxpayer of to-morrow with more funds to meet the cost of the improvements—spread over a number of years—than the taxpayer of today has available. It will be literally making the improvements pay for themselves.

The annual appropriations for rivers and harbors are now running from $35,000,000 to $60,000,000 per year, of which about $15,000,000, or 2 per cent of the $750,000,000 investment, is required for maintenance. With a bond issue for $204,000,000 providing for the completion of the approved projects, the annual charge for the first 10 years would be $15,000,000 for maintenance and interest charges on the bonds, gradually rising to $9,180,000 in the fifth year and never going over that figure, making a total of from $17,700,000 to $24,180,000 annually instead of from $35,000,000 to $60,000,000. This is based on the maximum rate of interest—4½ per cent—authorized in the bill. The interest rate, and consequently the interest charges, are almost certain to be materially lower than these figures. Assuming that the bonds would be retired at the rate of $10,000,000 per year, beginning with the eleventh year after their issue, which would retire them all 30 years from their issue, the maximum annual charge would be $34,180,000 in the eleventh year, gradually reducing to $27,540,000 in the thirtieth year, and thereafter would be merely the annual maintenance of $15,000,000 per year. The following tabulation shows how these bonds could be handled to reduce the immediate drain on the Treasury, as indicated above, keep the maximum charge for succeeding years at less than the appropriation for the fiscal year ending June 30, 1925, which is the lowest which has been made for several years, and spread the bulk of the cost, in gradually decreasing amounts, over a period of 20 years, commencing five years after the great majority of the improvements will be completed.

| Year | Bonds issued during year | Bonds outstanding during year | Interest on bonds for year at 4½ per cent | Bonds retired during year | Total bond charges for year | Annual maintenance of all projects | Total charge for year |
|---|---|---|---|---|---|---|---|
| 1 | $60,000,000 | $60,000,000 | $2,700,000 | ---------- | $2,700,000 | $15,000,000 | $17,700,000 |

| 16 | ---------- | 154,000,000 | 6,930,000 | 10,000,000 | 16,930,000 | 15,000,000 | 31,930,000 |
| 17 | ---------- | 144,000,000 | 6,480,000 | 10,000,000 | 16,480,000 | 15,000,000 | 31,480,000 |
| 18 | ---------- | 134,000,000 | 6,030,000 | 10,000,000 | 16,030,000 | 15,000,000 | 31,030,000 |
| 19 | ---------- | 124,000,000 | 5,580,000 | 10,000,000 | 15,580,000 | 15,000,000 | 30,580,000 |
| 20 | ---------- | 114,000,000 | 5,130,000 | 10,000,000 | 15,130,000 | 15,000,000 | 30,130,000 |
| 21 | ---------- | 104,000,000 | 4,680,000 | 10,000,000 | 14,680,000 | 15,000,000 | 29,680,000 |
| 22 | ---------- | 94,000,000 | 4,230,000 | 10,000,000 | 14,230,000 | 15,000,000 | 29,230,000 |
| 23 | ---------- | 84,000,000 | 3,780,000 | 10,000,000 | 13,780,000 | 15,000,000 | 28,780,000 |
| 24 | ---------- | 74,000,000 | 3,330,000 | 10,000,000 | 13,330,000 | 15,000,000 | 28,330,000 |
| 25 | ---------- | 64,000,000 | 2,880,000 | 10,000,000 | 12,880,000 | 15,000,000 | 27,880,000 |
| 26 | ---------- | 54,000,000 | 2,430,000 | 10,000,000 | 12,430,000 | 15,000,000 | 27,430,000 |
| 27 | ---------- | 44,000,000 | 1,980,000 | 10,000,000 | 11,980,000 | 15,000,000 | 26,980,000 |
| 28 | ---------- | 34,000,000 | 1,530,000 | 10,000,000 | 11,530,000 | 15,000,000 | 26,530,000 |
| 29 | ---------- | 24,000,000 | 1,080,000 | 12,000,000 | 13,080,000 | 15,000,000 | 28,080,000 |
| 30 | ---------- | 12,000,000 | 540,000 | 12,000,000 | 12,540,000 | 15,000,000 | 27,540,000 |
| 31 | ---------- | ---------- | ---------- | ---------- | ---------- | 15,000,000 | 15,000,000 |
| 32 | ---------- | ---------- | ---------- | ---------- | ---------- | 15,000,000 | 15,000,000 |
| 33 | ---------- | ---------- | ---------- | ---------- | ---------- | 15,000,000 | 15,000,000 |

The morning papers of June 9, 1924, announce that the latest note issue put out by the Treasury bears interest at the rate of 2¾ per cent. If such a rate can be secured on these bonds when they are issued, it would reduce the maximum interest charge, in the above tabulation, to $5,610,000 instead of $9,180,000 and the maximum total charge for any year to $30,610,000 instead of $34,180,000. All other interest figures in the above would be correspondingly reduced—about 29 per cent—and would carry reduced total charges for each year.

ADVANTAGES OF THIS METHOD OVER PRESENT PROCEDURE

The advantages of this method over the present procedure may be divided into two general classes—first, the advantages from the construction point of view and, second, the advantages from the taxpayer's point of view, which include the first class as well.

From the construction point of view the provision of the necessary funds when and as needed will permit the laying out of a program for the prosecution of the work at the most economical rate, with full assurance that this program will not have to be modified on account of lack of funds. This is particularly important in the matter of the procurement and full utilization of equipment and the building up and maintaining of a well-trained and efficient personnel. There have been instances in the past when equipment has been provided with a view to carrying out a program of construction, and the funds provided in subsequent years have been so restricted that a considerable part of this equipment has lain idle because there was not sufficient money to carry out the program for which it was provided. As in most businesses, it costs money to train personnel to efficiently carry on the work of improving waterways, and when the funds are reduced below the amount required to keep this personnel profitably occupied it is necessary to lay off part of the trained men, some of whom never come back, thereby necessitating the training of others to take their places when sufficient funds are again available.

A further advantage from the construction point of view lies in the possibility of procuring lower costs for a given piece of work when it can be carried on at such a rate as to make the use of larger and more efficient equipment possible. (Quantity production methods are responsible for our ability in this country to compete with, and in many cases to undersell, concerns of other countries on many manufactured products, and that in spite of the fact that our wages and scale of living are higher than in any other country in the world.) The same principles of quantity production applied to work on waterway improvements will produce similar savings in the cost of completing these projects.

General Taylor gave an excellent illustration of the economies which can be achieved when funds are available to do the work at the maximum economical rate. He referred to the Chesapeake & Delaware Canal, which was estimated to cost $13,000,000, and which he states he believes would have cost all of that if it had been built at the rate which was made necessary by limited appropriations. However, due to certain circumstances which made it impossible to proceed with some other projects, some additional funds were available, and under the lump-sum appropriation system it was possible to divert them to other projects. It was decided to divert sufficient to the Chesapeake & Delaware Canal to permit contracting for practically the entire job at one time. The result was a much lower unit price for the work to be done, and it is now expected to complete the canal at a cost of $9,500,000, which represents a reduction in cost of $3,500,000, which is 25 per cent. This was possible only because the contractor, with several years' work assured, felt justified in building a large and efficient dredge, which was able to do the work much cheaper than such smaller and less efficient equipment as he would have had to use if the work had been let in smaller quantities and spread out over a number of years. The same sort of economies can be achieved by the Government engineers if they are assured the funds required to do their work at the most advantageous rate.

From the taxpayer's point of view, in addition to all the advantages enumerated above, there are further advantages which make this method of financing river and harbor improvements most desirable. These consist, first, in securing the completion as promptly as possible of the river and harbor improvements in which so much of his money has already been spent, although few of them have been completed, so that he can enjoy the benefits of cheaper and more satisfactory transportation and the commercial prosperity which that will carry with it, and, second, in distributing the cost of completing these improvements over a period of years during which the improvements will be completed and when the benefits derived from them will help pay off the bonds sold to pay for the construction work, and, third, in reducing the demand on the Treasury for money for this purpose at this time when economy in the Government expenditures is so important.

COOPERATION OF THE FEDERAL GOVERNMENT WITH THE STATES IN CONSTRUCTION OF HIGHWAYS

Mr. BRIGGS. Mr. Speaker, the tremendous development in highway construction in the various States of the Union since the passage of the Federal highway act in 1916 has demonstrated the desire of the people for a system of adequate and permanent highways. The sentiment for good roads has manifested itself in a most tangible form by the construction of an astonishingly large mileage of durable, modern highways that have not only resulted in greatly improved interstate post roads but to an even greater extent the development of excellent intercounty highways which afford greatly improved means of communication between cities and towns and agricultural sections and enable both dwellers in such towns and cities and on the farms to have a better and closer system of communication and better opportunities for the sale and exchange of commodities, for more rapid transportation, and for the growth and development of the localities through which such highways pass, in addition to many other conspicuous benefits.

The Chief of the United States Bureau of Public Roads recently stated in the hearings before the Committee on Roads of the House of Representatives that since the passage of the Federal aid road act in 1916, 33,000 miles of highways have been completed in the United States and 13,800 were under construction on the 1st of March of this year.

No State in the Union has manifested greater interest in the development of a system of modern highways than has Texas. I recently called upon the United States Bureau of Public Roads for a statement of the extent to which the Federal Government had cooperated with the State of Texas in the construction of highways and the extent to which it was continuing to do so. I also asked for information regarding the completed and approved road projects in my own congressional district, and feeling that the information furnished by the Bureau of Public Roads will be of interest to many I am taking occasion to include in my remarks the data submitted:

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF PUBLIC ROADS,
*June 4, 1924.*

Hon. CLAY STONE BRIGGS,
*House of Representatives.*

DEAR MR. BRIGGS: I have your letter of June 3, asking for information relative to Federal-aid road work in Texas, particularly in the counties of the seventh congressional district.

The apportionments made under Federal-aid acts, by fiscal years, and payments made to the State for completed work in each of these years, are as follows:

| Year | Apportionment | Payments made |
|---|---|---|
| 1917 | $291,927.81 | |
| 1918 | 583,855.62 | |
| 1919 | 3,803,206.07 | $204,295.59 |
| 1920 | 5,559,816.81 | 353,267.91 |
| 1921 | 5,861,598.46 | 3,164,850.18 |
| 1922 | 4,425,172.41 | 5,915,045.87 |
| 1923 | 2,950,114.94 | 5,843,077.67 |
| 1924 | 3,838,351.12 | [1] 4,968,464.37 |
| Total | 27,314,043.24 | 20,449,101.59 |

[1] To May 31.

The amount contributed by the Federal Government to each of the counties of the seventh district in which work has been done is shown by projects on the sheet which is attached, giving the status of Federal aid in congressional district No. 7, Texas, as of May 31, 1924. This table shows the project numbers and names, types constructed, the counties in which located, with total cost and Federal aid paid.

For the whole State, as of May 31 of this year, the completed mileage was 3,139, with a total cost of $42,457,817, and Federal aid paid to the amount of $16,307,427.84. There was under construction 1,556 miles, estimated to cost $24,411,935, of which the Federal allotment is $9,605,778.16. In addition, there has been approved for construction 214 miles, estimated to cost $3,824,285, with a tentative allotment of Federal aid amounting to $1,399,550.26. This makes a total program of 4,909 miles, with a total cost of $70,694,038, of which $27,312,256.24 is in Federal funds. The total amount paid to the State as of the above date for work completed was $20,449,101.59.

I trust this information will be of service to you.

Very truly yours,
P. ST. J. WILSON,
*Acting Chief of Bureau.*

(Inclosure.)

*Status of Federal aid in congressional district No. 7, Texas, as of May 31, 1924*

PROJECTS COMPLETED AND FINAL PAYMENT MADE

| Project No. | Name | Type | County | Total cost | Federal aid allotted | Federal aid paid | Miles |

| | Total | | | 400,592.18 | 142,250.00 | | 13.9 |

The advent of the automobile and its widespread distribution throughout the land, numbering something over 16,000,000 in the United States, and nearly 700,000 registered cars in the State of Texas, has undoubtedly been largely responsible for the almost universal demand for good roads and for the rapid and constant increase in new and better highways.

In order that the investment in good roads should result in the greatest and most lasting benefit, the Bureau of Public Roads insists that highways constructed should be, as far as possible, of the most durable and permanent type, and should be maintained and properly protected so as to avoid deterioration and disintegration—thereby avoiding an increased cost of restoration and maintenance.

The linking of the county and city through a system of modern highways is not only resulting in a more rapid development and growth, but is also establishing closer relations between the people and resulting in a better understanding of conditions and has become the means of greater mutual helpfulness and progressive prosperity.

THE PUBLIC DEBT HAS BEEN REDUCED MORE THAN FIVE BILLION DOLLARS IN LESS THAN FIVE YEARS

Mr. HARDY. Mr. Speaker, "Reduce the taxes" has been the cry in all times since before the days of Christ. "Tax reduction" is the slogan to which many a candidate in all elections in a thousand years has pinned his faith. I remember a candidate for county assessor who went into office one time on the slogan, "Vote for Abernathy and reduce your taxes," and he had just about as much to do with the reduction of taxes as had the janitor of the courthouse.

The Congress does have to do with taxes, and the Congress has reduced the Federal taxes greatly—this year and in the four years before. The Federal taxes have been going down year after year since the Republican Congress was elected in 1918. It may be your State, county, school, and city taxes have been going up, but your Federal taxes have been coming down rapidly.

Many people get Federal taxes and local taxes mixed up. The Congress has nothing whatever to do with local taxes—city, county, school, or State. The Federal taxes are collected chiefly from income taxes and the tariff.

I have told how this Congress has cut $232,750,000 off the income taxes you are paying this year and about $472,000,000 off the tax you would have been called upon to pay in the next calendar year. That is great. It is wonderful.

But the last Republican Congress did better than that—vastly better than that, and it has long since been forgotten. It was not much praised at the time. People took it as a matter of course, as they take the sunshine and the rain.

The last Congress which was Republican reduced your taxes for 1923 more than $633,000,000, and you heard hardly a word about it.

It was not carried in red headlines, no thanksgiving services were held, and, so far as I know, no Member of the Congress ever heard anybody commend the action.

Just to remind a few people of the taxes they used to pay but pay no more—thanks to a Republican Congress—let me set out a few items which were eliminated or reduced in your last year's payments and will not be collected this year or nevermore, we hope.

These amounts are the taxes collected in 1922, but were not collected in 1923 because the tax on these items had been abolished or the rates reduced:

| | |
|---|---|
| On freight, express, passenger fares, Pullman, etc | $169,518,727.30 |
| On insurance | 10,855,403.81 |
| Soft drinks, etc | 23,376,964.55 |
| Toilet soap, chewing gum, and drug-store items | 4,372,953.49 |
| Pianos, organs, etc | 4,951,752.13 |
| Sporting goods, etc | 2,215,607.05 |
| Electric fans, thermos bottles | 213,907.28 |
| Articles made of fur | 6,523,971.03 |
| Motion-picture films | 3,678,868.17 |
| Ten-cent admissions, dues, etc | 3,236,475.26 |
| Carpets, rugs, trunks, etc | 7,012,582.31 |
| Reduction in income and profits tax | 397,744,152.29 |
| Total | 633,701,364.67 |

The Republican Congress gave the people the Budget system. The Budget system and an economical Republican Congress are responsible for lifting from the people a vast burden of taxation and a reduction in the public debt by a stupendous sum.

Look at the public debt for a moment. You can hardly comprehend the figures, but they are illuminating. A Republican Congress was elected first in 1918. That is the year I was elected to Congress. The public debt reached its maximum on August 31, 1919, when it was $26,596,701,648.01. In 1919 the Republican Congress began its program for reduced appropriations, economy in government, and reductions in the public debt. On June 20, 1924, the public debt was $21,301,501,055.86, a clear reduction in less than five years of $5,295,200,592.15. Can you beat it—more than $5,000,000,000 paid off on the public debt in less than five years?

In the past year the debt has been reduced more than the usual $1,000,000,000.

Let us look at these figures in detail:

| *The public debt* | |
|---|---|
| Aug. 31, 1919, it was | $26,596,701,648.01 |
| June 20, 1924 | 21,301,501,055.86 |
| Total reduction | 5,295,200,592.15 |
| *This year's reduction* | |
| July 1, 1923, debt was | $22,349,707,365.36 |
| June 20, 1924, debt was | 21,301,501,055.86 |
| Total reduction | 1,048,206,309.50 |

As a matter of fact, by July 1, 1924, about forty-five millions more will be paid off, so the total reductions in the debt for this year will be about one billion and ninety million dollars.

The Republican Congresses since the election of 1918 have accomplished much. Here I am speaking only of the business side of the administration. Surely this businesslike and economical administration of public affairs should commend the

Republican Congress to the people. The like of it has not been known among the nations of the world in all time. I am proud to have been a Member of Congress during these debt-cutting and tax-reducing administrations.

Surely the adoption of the Budget system and the great reductions in taxes and in the public debt in the past five years, even aside from a hundred other big things to its credit, has justified the election of a Republican Congress in 1918, 1920, and 1922—and will guarantee a reelection of a Republican Congress in 1924.

TOM WILLIAMS TELLS OF BOYHOOD DAYS AND WORK IN CONGRESS OF GUY U. HARDY

THOMAS S. WILLIAMS, editor of the Clay County (Ill.) Republican and a Member of Congress, who writes much of Congress and of some here who formerly lived in his district, has furnished his home paper with a story of the boyhood days of Congressman GUY U. HARDY and makes some complimentary remarks about Mr. HARDY's activities in Congress. Mr. WILLIAMS says:

If Congressman GUY U. HARDY of Colorado had not gone West to grow up with the country but had stayed on in the country he grew up in in southern Illinois he would to-day be one of my constituents—or I would be one of his.

The same thing might be said of at least three other prominent Members of this Congress. Senator WILLIAM E. BORAH of Idaho went West from Wayne county where he had grown to manhood, Senator WESLEY L. JONES of the State of Washington spent his boyhood days in White County. Congressman WILLIAM A. AYRES of the Wichita, Kans., district was born and played his boyhood pranks in Hardin County. All of these gentlemen, HARDY, BORAH, JONES, and AYRES come back home occasionally to visit in their old home towns in the twenty-fourth district of Illinois, the district I have the honor to represent in Congress.

I have known GUY HARDY, or of him, for many years. He has relatives in several counties in my district—and a few dozen of them are constituents of mine. I know the stock from which he comes. Good, old-fashioned, conservative, farmer, Protestant, American folks. His forefathers were early-day pioneer settlers in southern Illinois, and many of his relatives still cultivate the land and help to make up that safe, conservative citizenship which makes Illinois the great State it is.

GUY HARDY grew up at Albion, Edwards County, Ill. His father died when Guy, the oldest of three boys, was 13. The widowed mother died when he was 16. Left without means, the boys all went to work. The future Congressman got a job with a little grocery store in Albion and lived with the proprietor. Guy was to get $50 a year and his board and go to the village school in winter time. This he did for two years. Studying nights and taking a short course in a summer normal school at Albion he got a teacher's certificate at 18. It is not always easy for a youthful appearing boy of 18 to find a school to teach. But he found one and his income was raised to the extravagant sum of $30 per month. He taught two years in the country schools of old Edwards County. Then he went down to Florida and taught school in the backwoods among the crackers for two terms. In Florida at 20 he took the civil service examination for railway mail clerk, and after a few months was offered an appointment. This he declined to accept as he had been so thrifty in saving money on a teacher's salary of $30 per month that he had saved up enough to go back to college. In 1893 and 1894 he was a student in the Bible College at Transylvania University, Lexington, Ky. This school has turned out many notable ministers of the Christian church. HARDY's college chums are all ministers and several of his relatives are or have been ministers in this church.

All this time he had been a resident of Albion. In the fall of 1894 the young student, then 22 years of age, went to Colorado for the climate, so he says. He never admits that he went there for his health, although he does say that his father and mother both having died of tuberculosis in early life he thought it wise to select the healthiest place in America in which to live—and he says there is no healthier climate in the world than that of Colorado.

HARDY went to Colorado at 22, without funds or friends, seeking fortune and a healthful climate. He landed in Canon City about the 1st of November, 1894. Before Christmas he had a job as reporter on the local paper, the Canon City Record, at $12 a week. By the first of the next July, 1895, he was the owner of the paper, subject to a fair sized mortgage.

Colorado was a long ways out West in those days. His old friends would have lost track of him if it had not been for his old home town paper, the Albion Journal. It is the old home town paper that keeps track of the boys who have gone away. It records their doings and magnifies their successes. It praises their efforts and records no failure. Many a boy can thank the editor of his old home town paper for many kind words of praise and encouragement.

For 30 years the old home town paper, the Albion Journal, has kept his friends back in the old Illinois home country informed of the doings and success achieved by Congressman GUY U. HARDY.

For a number of years he was the boy editor of Canon City. He kicked in and worked like a slave as most country editors do. He had the newspaper instinct. He made the Weekly Record stand out among Colorado weeklies. At 22 he was a reporter on the paper. At 23 he was the owner of the paper. At 24 he was editing one of only three newspapers in Colorado which were supporting Mr. McKinley for President of the United States in that notable campaign of 1896. This brought him to the attention of Senator Wolcott and President McKinley. At 27 HARDY was appointed postmaster of Canon City. He served only one term, and that is the only office he ever held until elected to Congress. At 27 he was married and now has a happy family of three boys and one girl.

A man who runs a newspaper and runs it intelligently and successfully can be a power for good in his home community. GUY HARDY has run his paper intelligently and successfully. For 30 years he has been doing big things for his town and taking part in the big affairs of his State.

Early in his newspaper career he was elected president of the Colorado Editorial Association. In 1918 he was elected president of the National Editorial Association, in point of membership the largest newspaper organization in the world. During his presidency the National Editorial Association met at Winnipeg and Congressman HARDY led a group of several hundred successful American newspaper publishers and editors on an extended tour of western Canada and down through Washington and Oregon.

In his home town GUY HARDY has been the moving spirit in many things. His newspaper has grown to be one of the best small city dailies in the country. He has served as director of the Red Cross and the Y. M. C. A. He was president of the chamber of commerce and of the University Club for several years until elected to Congress, and still is president of the Fremont Building and Loan Association. He was an active member of the building committees for the Elks Club, the Y. M. C. A., and the Christian Church. He is a trustee for the Christian Church, and for about 28 years has been a member of the Colorado State executive committee for the Y. M. C. A. While a newspaper man is usually about the busiest man in his town Mr. HARDY has found a good deal of time for public service. During the war he devoted most of his time to war-time activities, being food administrator for his county.

In 1918 GUY HARDY was nominated and elected to Congress. It happened this way: The district had always been Democratic. The Republicans felt that they had only a fair show of electing a Congressman. They felt they needed the best man that could be found to make the race. The convention met in Pueblo. Mr. HARDY was not at the convention and was in no sense a candidate. His name had never been suggested in that connection. He was at home attending to business.

After much discussion of candidates GUY HARDY's name was proposed and he was given practically a unanimous nomination. And the following November he was elected by a flattering majority.

Congressman HARDY has been elected three times by the people of the third district of Colorado. Each time his vote shows a substantial lead over other Republicans on his ticket. The people of his district have shown the greatest confidence in him, which has been fully justified by his record in Congress.

As a Member of the House of Representatives Congressman HARDY has not been a spectacular operator. He has made no effort to shoot off fireworks, introduce fool bills, nor spread the buncombe. He has been a serious-minded, conservative, active, energetic, hard-working Member—one of the kind who get results. He was fortunate in the beginning. He was not unknown when he came. He was well acquainted with some of the leaders. He had been in Washington before. He found a good friend in that notable leader, James R. Mann. He had known Uncle Joe Cannon before. The Illinois delegation took him in as one of them. He got more in the organization of the Sixty-sixth Congress than most new Members get. He was put on the Committee on the Post Office and Post Roads, his first choice of committees. He served well on that committee and became one of its leaders. He did much for the postal employees of the country and his name is known by many of them outside of his own district. He served four years on this committee and left it with keen regrets.

In this Congress Mr. HARDY was advanced to the Appropriations Committee. This is the goal for which most Members are aiming. Selections to committeeship usually run by seniority. Probably a hundred Members wanted the few vacancies on the Appropriations Committee, and it was a distinct honor, indicating the greatest confidence on the part of his colleagues, when Mr. HARDY was chosen for one of the much-coveted places.

The Appropriations Committee is considered by many the most important committee in the House. It is made up of 35 members, representing 28 States. The committee passes on and reports out all appropriation bills. The budget that it handles amounts to more than

three and a half billions of dollars. And the power of this committee is so great and the confidence in which it is held by the House is so secure that any amendment offered on the floor to raise an item in or to add an item to an appropriation bill has a slack chance of passing. This Appropriations Committee practically holds the purse strings to the Nation's Treasury. Colorado people should be proud of the fact that Congressman HARDY has secured a place on this important committee so early in his congressional career.

Members of the Appropriations Committee do not come much in the limelight. Their names do not appear on many bills nor get much in the press. They spend weeks and sometimes months in the committee rooms going over the appropriation bills, scanning and inquiring into every item in a thousand page budget.

Congressman HARDY has worked hard and has proved to be a valuable member of this great committee. He takes a broad view of things—a national view—but he is strong for cutting down appropriations and reducing taxes.

Congressman HARDY was a close friend of the late President Harding. Their newspaper instincts and experiences gave them a common tie. They had something in common to talk about besides the affairs of state, and President Harding was always glad to talk about the newspaper game. One of the best stories that went out from here about the late President was one Mr. HARDY wrote about a newspaper chat with President Harding. It was widely copied. Mr. HARDY has written some excellent stories about Congress and Washington life.

Last year newspapers all over the land, big and little, were running his series of stories, "Looking in on Congress," and a number of Congressmen I know have been using material taken from them for their own speeches.

Congressman HARDY is a safe, reliable, conservative, hard-working Member of the House. He handles much business for his constituents. His mail is heavy. He has done a vast amount of work for the ex-service men. He has been one of their best friends in the House.

In the way of legislation I have observed that Mr. HARDY has stood for retrenchment and economy, lower appropriations and lower taxes, the child labor amendment, restricted and selective immigration, better education and naturalization, a tariff for American manufactures and American labor, farm relief, reclamation, and for everything that appears to be good for the West.

Congressman HARDY is a great admirer of President Coolidge and has unbounded faith in him. He met Mr. Coolidge when he was Governor of Massachusetts at a meeting of the National Editorial Association and they have since been friends.

Mr. HARDY is a Republican of the type who can easily follow the lead of a Republican administration headed by a Harding or a Coolidge.

In the Congressional Library the other day I happened to run across a copy of the Pueblo Chieftain, which contained a worthy tribute to Congressman HARDY. It so nearly expresses my own views that I am going to copy it here. I am sure his old Illinois friends will be glad to know of the notable success this Albion boy has made in Colorado, where he has lived for 30 years.

The Pueblo (Colorado) Chieftain says:

> "There were some Representatives and Senators who made a good record and should not be included in any sweeping condemnation. One of these good Congressmen was GUY HARDY, Representative of the third congressional district of Colorado.
>
> "Congressman HARDY has established for himself, both in Washington and in Colorado, a record for practical common sense and efficiency. He is a loyal Republican, but not a narrow and petty partisan. He has given steadfast support to the policies of the Republican administration, and has done everything possible to forward the interests of the people of this district.
>
> "The people of southern Colorado could have no better Representative in Congress, and they should continue to keep him there as long as he is willing to accept their commission."

Mr. BOX. Mr. Speaker, I make the point of no quorum.

ADJOURNMENT

Mr. LONGWORTH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 48 minutes p. m.) the House, under its previous order, adjourned until to-morrow, Saturday, June 7, 1924, at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

553. A letter from the Secretary of War, transmitting report of an accumulation of documents and files of papers in the War Department which are not needed or useful in the transaction of the current business of the department and have no permanent value or historical interest; to the Committee on Disposition of Useless Executive papers.

554. A letter from the Secretary of War, transmitting a section of proposed legislation to remove suspensions and disallowances of payments made by disbursing officers for extra time served on Saturday afternoons from June 15 to September 15 of each year, as authorized by Executive order of June 9, 1914; to the Committee on the Civil Service.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. MAPES: Committee on Interstate and Foreign Commerce. H. R. 9537. A bill to authorize the Secretary of Commerce to transfer to the city of Port Huron, Mich., a portion of the Fort Gratiot Lighthouse Reservation, Mich.; without amendment (Rept. No. 1005). Referred to the House Calendar.

Mr. JOHNSON of South Dakota: Committee on Rules. H. Res. 351. A resolution to empower the Committee on World War Veterans' Legislation or any subcommittee thereof to make a survey of soldiers' homes, hospitals, and hospital facilities, including contract hospitals; without amendment (Rept No 1016). Referred to the House Calendar.

Mr. LAGUARDIA: Committee on the Post Office and Post Roads. S. 3319. An act authorizing the extension and operation of the transcontinental airplane mail service to Boston, Mass.; without amendment (Rept. No. 1008). Referred to the Committee of the Whole House on the state of the Union.

Mr. MILLS: Committee on Ways and Means. H. R. 7918. A bill to diminish the number of appraisers at the port of Baltimore, and for other purposes; without amendment (Rept. No. 1009). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. R. 4495. A bill to provide for the establishment of a dairying and livestock experiment station at Mandan, N. Dak. (Rept. No 1018). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. R. 9092. A bill to authorize the transportation, at public expense, of the remains of officers and employees of the Department of Agriculture who die while away from their official stations; without amendment (Rept. No. 1010). Referred to the Committee of the Whole House on the state of the Union.

Mr. WYANT: Committee on Interstate and Foreign Commerce. H. R. 4522. A bill to provide for the completion of the topographical survey of the United States; without amendment (Rept. No. 1011). Referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. BUTLER: Committee on Naval Affairs. H. R. 8741. A bill for the relief of Flora M. Herrick; with an amendment (Rept. No. 1012). Referred to the Committee of the Whole House.

Mr. EDMONDS: Committee on Claims. S. 51. An act for the relief of the owner of the schooner *Itasca* and her master and crew; with amendments (Rept. No. 1013). Referred to the Committee of the Whole House.

## CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 9152) granting an increase of pension to Samuel F. Brown; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 9583) granting an increase of pension to William H. Grammer; Committee on Invalid Pensions discharged and referred to the Committee on Pensions.

A bill (H. R. 9642) granting a pension to Julia Miller; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BURDICK: A bill (H. R. 9721) to amend the act entitled "An act to provide compensation for employees of the

United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916; to the Committee on the Judiciary.

By Mr. CONNERY (by request): A bill (H. R. 9722) to amend the act entitled "An act to provide revenue, to regulate commerce in foreign countries, and to encourage the industries in the United States, and for other purposes," approved September 21, 1922; to the Committee on Ways and Means.

By Mr. TAGUE: A bill (H. R. 9723) to amend the Federal employer's liability laws to provide for persons other than seamen engaged under maritime contracts; to the Committee on the Judiciary.

By Mr. THATCHER: A bill (H. R. 9724) to authorize an appropriation for the care, maintenance, and improvement of the burial grounds containing the remains of Zachary Taylor, former President of the United States, and of the memorial shaft erected to his memory; to the Committee on the Library.

By Mr. DICKSTEIN: A bill (H. R. 9725) to repeal the act entitled "An act to prohibit the importation and the interstate transportation of films or other pictoral representations of prize fights, and for other purposes," approved July 31, 1912; to the Committee on Interstate and Foreign Commerce.

By Mr. UPSHAW: A bill (H. R. 9726) to prevent the mobilization and cultivation of foreign sentiment on American soil, and for other purposes; to the Committee on the Judiciary.

Also, a bill (H. R. 9727) to encourage the fullest Americanism, and for other purposes; to the Committee on the Post Office and Post Roads.

By Mr. JOHNSON of Texas: A bill (H. R. 9728) to extend the time within which certain causes of action may be brought, growing out of the operation of railroads and other transportation systems under the Federal control act; to the Committee on Interstate and Foreign Commerce.

By Mr. SNYDER: A bill (H. R. 9729) to amend the act entitled "An act to provide revenue, to regulate commerce in foreign countries, and to encourage the industries in the United States, and for other purposes," approved September 21, 1922; to the Committee on Ways and Means.

By Mr. PORTER: A bill (H. R. 9730) authorizing the issue and sale of bonds to pay the cost of completing authorized public works on rivers and harbors, and for other purposes; to the Committee on Ways and Means.

By Mr. THATCHER: A bill (H. R. 9731) to authorize the construction of a lighthouse in the Ohio River near Louisville, Ky.; to the Committee on Interstate and Foreign Commerce.

By Mr. SUMMERS of Washington: A bill (H. R. 9732) to encourage and promote the sale and export of agricultural products grown within the United States; to the Committee on Banking and Currency.

By Mr. FLEETWOOD: Joint resolution (H. J. Res. 288) consenting that certain States may sue the United States, and providing for trial on the merits in any suit brought hereunder by a State to recover direct taxes alleged to have been illegally collected by the United States during the years 1866, 1867, and 1868, and vesting the right in each State to sue in its own name; to the Committee on the Judiciary.

By Mr. EVANS of Montana: Joint resolution (H. J. Res. 289) exempting from tariff duty all articles imported from foreign countries which are exchanged for American farm products for exportation; to the Committee on Ways and Means.

By Mr. SEARS of Florida: Joint resolution (H. J. Res. 290) to provide for the refund of certain taxes; to the Committee on Ways and Means.

By Mr. BACON: Joint resolution (H. J. Res. 291) declaring it to be the policy of the United States not to enter any association of nations which does not uphold the ideals of America as set forth in the Declaration of Independence and the Constitution, urging the calling of an international conference, etc.; to the Committee on Foreign Affairs.

By Mr. RATHBONE: Resolution (H. Res. 352) relating to a governmental investigation of the coffee trade between the United States and Brazil; to the Committee on the Judiciary.

By Mr. CANNON: Resolution (H. Res. 354) empowering the Committee on the Civil Service or any subcommittee thereof to investigate the question relating to the number of persons required to transact Government business in the various departments; to the Committee on Rules.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRAND of Ohio: A bill (H. R. 9733) for the relief of C. Earl Smith and Marie Patton; to the Committee on Claims.

By Mr. CONNOLLY of Pennsylvania: A bill (H. R. 9734) granting an increase of pension to Sarah A. Evans; to the Committee on Pensions.

By Mr. DAVEY: A bill (H. R. 9735) granting a pension to Elizabeth Jane Barton; to the Committee on Invalid Pensions.

By Mr. GARDNER of Indiana: A bill (H. R. 9736) granting a pension to Adaline Elizabeth Fetz; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9737) granting a pension to John T. Smith; to the Committee on Invalid Pensions.

By Mr. GIBSON: A bill (H. R. 9738) granting an increase of pension to Ann E. Spencer; to the Committee on Invalid Pensions.

By Mr. GRIEST: A bill (H. R. 9739) granting a pension to Margaret J. Murr; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9740) granting a pension to Emma Elizabeth Steffy; to the Committee on Invalid Pensions.

By Mr. HULL of Iowa: A bill (H. R. 9741) granting an increase of pension to Ellen E. Webb; to the Committee on Invalid Pensions.

By Mr. LOZIER: A bill (H. R. 9742) granting a pension to Albert M. Vance; to the Committee on Pensions.

By Mr. OLIVER of New York: A bill (H. R. 9743) granting an increase of pension to Cecilia Quinlan; to the Committee on Invalid Pensions.

By Mr. PERLMAN: A bill (H. R. 9744) for the relief of the R. S. Howard Company; to the Committee on War Claims.

By Mr. ROBSION of Kentucky: A bill (H. R. 9745) granting an increase of pension to Laura C. York; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9746) granting a pension to Enoch Cody; to the Committee on Pensions.

Also, a bill (H. R. 9747) granting an increase of pension to Nancy Lankford; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9748) granting an increase of pension to Buster Davis; to the Committee on Pensions.

By Mr. STRONG of Pennsylvania: A bill (H. R. 9749) granting a pension to Jennie C. Gorton; to the Committee on Invalid Pensions.

By Mr. THOMPSON: A bill (H. R. 9750) granting a pension to Franc Murray; to the Committee on Invalid Pensions.

By Mr. TILSON: A bill (H. R. 9751) granting an increase of pension to Kate J. Jerolman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9752) granting an increase of pension to Katherine R. Parker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9753) granting an increase of pension to Michael J. Delaney; to the Committee on Pensions.

By Mr. UNDERWOOD: A bill (H. R. 9754) granting an increase of pension to Mary E. Nutting; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9755) granting an increase of pension to Sarah Wolf; to the Committee on Invalid Pensions.

By Mr. VAILE: A bill (H. R. 9756) granting permission to Lieut. Col. Kyle Rucker, Judge Advocate General's Department, United States Army, to accept the decoration of the Ordre Grand-Ducal de la Couronne de Chene (Commandeur), tendered by the Grand Duchy of Luxemburg; to the Committee on Foreign Affairs.

Also, a bill (H. R. 9757) granting an increase of pension to Elizabeth Lloyd; to the Committee on Invalid Pensions.

By Mr. WOOD: A bill (H. R. 9758) granting an increase of pension to Mary J. Harris; to the Committee on Pensions.

By Mr. WOODRUFF: A bill (H. R. 9759) for the relief of Augustus M. Herring; to the Committee on Patents.

By Mr. ALMON: A bill (H. R. 9760) granting an increase of pension to Thomas Sims; to the Committee on Invalid Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3029. By Mr. ANDERSON of Minnesota: Petition of the Methodist Episcopal Church of Medford, Minn., in support of the constitutional amendment to prohibit sectarian appropriations (H. J. Res. 159); to the Committee on the Judiciary.

3030. By Mr. GILLETT and Mr. UPSHAW: Petition of various religious and patriotic bodies representing over 10,000,000 citizens, urging the adoption by Congress of H. J. Res. 159, a constitutional amendment proposed by the Minute Men of America, an organization of 5,000,000 citizens, forbidding

appropriations of any public funds, Federal, State, or municipal, to any sectarian institutions. The following bodies have united in presenting these petitions: Methodist General Conference, Springfield, Mass.; the presbytery of Genessee of the Presbyterian Church; the presbytery of Clarion of the Presbyterian Church; the presbytery of Columbia of the Presbyterian Church; the presbytery of Portland of the Presbyterian Church; the presbytery of Steuben of the Presbyterian Church; the presbytery of San Jose of the Presbyterian Church; the presbytery of Central Washington of the Presbyterian Church; the presbytery of Peoria of the Presbyterian Church; the presbytery of Geneva of the Presbyterian Church; the Lexington conference of the Methodist Episcopal Church; the Des Moines conference of the Methodist Episcopal Church; the Dakota conference of the Methodist Episcopal Church; the west Wisconsin conference of the Methodist Episcopal Church; the Wisconsin conference of the Methodist Episcopal Church; the presbytery of Blairsville of the Presbyterian Church; the Mississippi Baptist convention; the Indiana Baptist convention; the Kentucky Baptist general convention; Delaware Baptist State convention; the Connecticut Baptist convention; the Michigan Baptist convention; the Nevada Baptist convention; the Colorado Baptist convention; Oklahoma general Baptist convention; the Iowa Baptist convention; the western Washington Baptist convention; the Pennsylvania Baptist general convention; the Florida Baptist convention; the Georgia Baptist convention; the Baptist general convention of Texas; the southern Baptist convention; the Minnesota Baptist convention; Indiana conference Methodist Episcopal Church; south Georgia conference Methodist Episcopal Church South; the Missouri Baptist general association; north Indiana conference Methodist Episcopal Church; the Wilmington conference of the Methodist Episcopal Church; eastern Swedish conference Methodist Episcopal Church; the presbytery of Sacramento of the Presbyterian Church; the presbytery of Detroit of the Presbyterian Church; the presbytery of Zanesville of the Presbyterian Church; the presbytery of Petoskey of the Presbyterian Church; the presbytery of Kalamazoo of the Presbyterian Church; the presbytery of Bot Butte of the Presbyterian Church; the presbytery of Westchester of the Presbyterian Church; the presbytery of Kittanning of the Presbyterian Church; the presbytery of Iowa of the Presbyterian Church; the presbytery of Hudson of the Presbyterian Church; the presbytery of Brooklyn-Nassau of the Presbyterian Church; the presbytery of Mankato of the Presbyterian Church; the presbytery of Nevada of the Presbyterian Church; the presbytery of St. Joseph of the Presbyterian Church; the presbytery of Iowa City of the Presbyterian Church; the presbytery of Philadelphia of the Presbyterian Church; the presbytery of Chillocothe of the Presbyterian Church; the presbytery of Newcastle of the Presbyterian Church; the presbytery of Washington City of the Presbyterian Church; the presbytery of Yellowstone of the Presbyterian Church; the presbytery of Chester of the Presbyterian Church; the presbytery of Bushville of the Presbyterian Church; the presbytery of Boston of the Presbyterian Church; the presbytery of Lackawanna of the Presbyterian Church; the presbytery of Oklahoma of the Presbyterian Church; the presbytery of Winnebago of the Presbyterian Church; the presbytery of Georgia of the Presbyterian Church; the presbytery of Jackson of the Presbyterian Church; the presbytery of Central West of the Presbyterian Church; the presbytery of Freeport of the Presbyterian Church; the presbytery of Hannibal of the Presbyterian Church; the Texas conference of the Methodist Episcopal Church South; the Mississippi conference of the Methodist Episcopal Church South; the Pacific conference of the Methodist Episcopal Church South; the New York Baptist missionary convention; The Montana conference of the Methodist Episcopal Church; the Tennessee conference, Methodist Episcopal Church South; the New Mexico conference, Methodist Episcopal Church South; the north Texas conference of the Methodist Episcopal Church South; the north Georgia conference of the Methodist Episcopal Church South; Louisiana Baptist State convention; the Arkansas Baptist State convention; the Wyoming conference of the Methodist Episcopal Church; the northwest Nebraska conference of the Methodist Episcopal Church; the presbytery of Spokane of the Presbyterian Church; the North Dakota conference of the Methodist Episcopal Church; the Erie conference of the Methodist Episcopal Church; the presbytery of Olympia of the Presbyterian Church; southern Illinois conference Methodist Episcopal Church; Baptist convention of North Carolina; the presbytery of McAlister of the Presbyterian Church; Virginia conference of the Methodist Episcopal Church; and the New Jersey Baptist convention; to the Committee on the Judiciary.

## SENATE

### SATURDAY, *June 7, 1924*

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

Our Father, Thou hast placed us in a beautiful world. The heavens declare Thy glory and the firmament showeth Thy handiwork. Day unto day uttereth speech and night unto night declareth knowledge. Thou hast clothed the lilies with glories surpassing Solomon, and Thou dost take care of us as if we were the only creatures of Thy hand.

We bless Thee for the privileges of service in Thy name, and for all the manifold opportunities to help others along the pathway and to bear the burdens of life and its anxieties. Be pleased to be in this closing session, and grant, we beseech of Thee, the continuance of Thy favor during the intervening months. Be always our guide. Help us to avoid the wrong, to pursue the right, and to honor Thee continually. We ask in Jesus Christ's name. Amen.

The reading clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

#### MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed without amendment the bill (S. 1987) accepting certain tracts of land in the city of Medford, Jackson County, Oreg.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H. R. 9561) making additional appropriations for the fiscal year ending June 30, 1925, to enable the heads of the several departments and independent establishments to adjust the rates of compensation of civilian employees in certain of the field services.

The message further announced that the House had passed bills and a joint resolution of the following titles, in which it requested the concurrence of the Senate:

H. R. 26. An act to compensate the Chippewa Indians of Minnesota for lands disposed of under the provisions of the free homestead act;

H. R. 646. An act to make valid and enforceable written provisions or agreements for arbitration of disputes arising out of contracts, maritime transactions, or commerce among the States or Territories or with foreign nations;

H. R. 8086. An act to amend the act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1915," approved August 1, 1914; and

H. J. Res. 283. Joint resolution to permit to remain within the United States certain aliens in excess of quotas fixed under authority of the immigration act of May 19, 1921.

#### ENROLLED BILLS SIGNED

The message also announced that the Speaker of the House had signed enrolled bills of the following titles, and they were thereupon signed by the President pro tempore:

H. R. 3477. An act for the relief of James B. Porter;

H. R. 4816. An act authorizing the Secretary of War to permit the city of Vicksburg, Miss., to construct and maintain water mains on and under the National Cemetery Road at Vicksburg, Miss.;

H. R. 4835. An act to pay tuition of Indian children in public schools;

H. R. 5325. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes; and

H. R. 6049. An act for the relief of V. E. Schermerhorn, E. C. Caley, G. W. Campbell, and Philip Hudspeth.

#### REPORT OF BOARD OF VISITORS TO NAVAL ACADEMY (S. DOC. NO. 152)

The PRESIDENT pro tempore laid before the Senate the report of the Board of Visitors to the Naval Academy for 1924, which was referred to the Committee on Naval Affairs and ordered to be printed.

#### DISPOSITION OF USELESS PAPERS

The PRESIDENT pro tempore laid before the Senate a communication from the Public Printer, transmitting, pursuant to law, a schedule of useless files of papers and records in the office of the Superintendent of Documents not needed in the conduct of business, and asking for action looking to their disposition, which was referred to a Joint Select Committee on the Disposition of Useless Papers in the Executive De-

partments. The President pro tempore appointed Mr. MOSES and Mr. FLETCHER members of the committee on the part of the Senate and ordered that the Secretary notify the House of Representatives thereof.

He also laid before the Senate a communication from the Secretary of War, transmitting, pursuant to law, a list of documents and files of papers not needed or useful in the transaction of the current business of the department or having no permanent value or historic interest, and asking for action looking to their disposition, which was referred to a Joint Select Committee on the Disposition of Useless Papers in the Executive Departments. The President pro tempore appointed Mr. WADSWORTH and Mr. FLETCHER members of the committee on the part of the Senate and ordered that the Secretary notify the House of Representatives thereof.

DEPRESSION IN COTTON MANUFACTURING INDUSTRIES (S. DOC. NO. 150)

The PRESIDENT pro tempore. The Chair lays before the Senate a report of the Tariff Commission, in response to Senate Resolution 219, on the present depression in and the effect of imports upon the cotton-cloth industry, which, without objection, will be printed as a Senate document, with illustrations.

Mr. WALSH of Massachusetts. I ask unanimous consent that that part of the report which does not include tables be printed in the CONGRESSIONAL RECORD, and that the report be referred to the Committee on Finance.

Mr. SMOOT. The Senator will not object to having the tables printed also?

Mr. WALSH of Massachusetts. They will be printed as a Senate document, but it would be too bulky to print them in the RECORD.

There being no objection, the report was referred to the Committee on Finance, ordered to be printed as a Senate document, and to be printed in the RECORD in part, as follows:

UNITED STATES TARIFF COMMISSION,
*Washington, June 7, 1924.*

Hon. A. B. CUMMINS,
*President pro tempore, United States Senate.*

MY DEAR SENATOR: Herewith I have the honor to transmit a report of the Tariff Commission, in response to Senate Resolution No. 219, a report on the present depression in and the effect of imports upon the cotton-cloth industry.

Respectfully,

THOMAS O. MARVIN, *Chairman.*

(Inclosure.)

---

UNITED STATES TARIFF COMMISSION,
*Washington, D. C.*

On May 12, 1924, the United States Senate adopted the following resolution No. 219:

"Whereas a prolonged depression of exceptional magnitude has, and is, occurring in the cotton textile industry, causing an attendant decrease in production of 40 to 60 per cent and general unemployment and its consequent want and distress in communities where this industry is located: Therefore be it

"*Resolved*, That the United States Tariff Commission be, and hereby is, directed to furnish to the Senate as expeditiously as possible, if not incompatible with the public interests, all available facts requested hereinafter:

"(1) Is the present depression in the cotton manufacturing industry confined to the United States or is it world-wide?

"(2) To what extent and for how long a period has the present depression in the cotton manufacturing industry of this country been apparent?

"(3) What is the quantity and value of cotton cloth imported into and exported from the United States under the present tariff act as compared with those under the acts of 1909?

"(4) What is the percentage of imports and exports, as compared to the domestic production, of cotton cloth in the census years 1909, 1914, 1919, 1921, and 1923?

"(5) What types of cotton cloth constitute the bulk of the import trade, and are these cloths similar or different in character from those produced in this country?

"(6) What are the main reasons for the importation of cotton cloths; in particular, are such imports due primarily to price or to quality?

"(7) To what extent has the domestic industry been affected by the postwar increases in the importation of cotton cloths?

"(8) Would changes in the present tariff rates on cotton cloths be of material assistance in stimulating production and restoring prosperity to this industry?"

In response to the foregoing resolution, the United States Tariff Commission has the honor to submit the following:

I

"Is the present depression in the cotton manufacturing industry confined to the United States or is it world-wide?"

The present depression in the cotton manufacturing industry is practically world-wide, although more severe in some countries than in others.

The United States is the world's largest consumer of cotton. On the basis of number of spindles the cotton manufacturing countries rank as follows: The United Kingdom, the United States, France, Germany, India, Russia, Italy, Japan, Czechoslovakia, China, Spain, Brazil, Belgium, Switzerland, Canada, Poland, and Austria.

A prompt answer to the inquiry of the Senate does not permit a detailed study of the relative extent of the depression in the various countries, and the following statements and quotations are given only as evidence that there is more or less depression existing in the cotton manufacturing industry of almost every country.

United Kingdom: Sir Charles W. Macara, an acknowledged authority, in a pamphlet published April 28, 1924, expresses the opinion that the British cotton industry, dependent upon overseas trade for four-fifths of its employment, has, in the world upheaval resulting from the World War, suffered more severely than the cotton industry of any other country. He says, further, "We can not forget that during the past disastrous three years the industry has suffered an estimated loss of £150,000,000."

The United Kingdom is the predominating factor in the international trade in cotton cloth, but its sales are mainly to Asiatic countries, particularly India and China, where price is the main consideration. The high prices prevailing in recent years have resulted in a great curtailment of this Asiatic trade, primarily because the purchasing power of the masses is strictly limited and has not increased in proportion to the increase in the price of British cottons. In addition there have been various other factors, such as the exchange conditions, the Swadeshi movement in India, internal disturbances in China, keener competition from American export goods, etc., that have militated against any return to full-time operation by the British mills.

The following table (this table is taken from a paper prepared for the Manchester Statistical Society by Prof. G. W. Daniels and reproduced in the International Cotton Bulletin for March, 1924) shows the changes in the distribution of British piece goods exports between 1913 and 1923:

TABLE I

| Country | Percentage distribution | |
|---|---|---|
| | 1913 | 1923 |
| Far East | 50 | 46 |
| Near East | 10 | 9.9 |
| Central and South America | 9.5 | 10 |
| Europe | 6 | 7.3 |
| Self-governing colonies | 5.5 | 8 |
| Africa | 4.8 | 7.5 |
| United States | .6 | 4.2 |
| Other countries | 3.6 | 7.3 |
| Totals (percentages) | 100 | 100 |
| Totals (million yards) | 7,075 | 4,272 |

The above yardage totals show a wide decline in demand for British piece goods. Although, as shown by the above table, the percentage of total distribution of British piece goods exported to the United States increased from 0.6 of 1 per cent in 1913 to 4.2 per cent in 1923, the actual increase in sales of British piece goods to the United States was from 44,404,500 square yards in 1913 to 174,922,200 square yards in 1923, an increase of nearly 4 times.

At the present time many of the British cotton mills are shut down and a substantial proportion are working short time. The spinning mills that use American cotton are, by agreement, operating only 26½ hours a week. Although the spinning mills that use Egyptian cotton in the manufacture of finer goods are more fully employed, it would appear that, all classes of goods considered, the industry as a whole, spinning and weaving, is not operating to more than two-thirds capacity.

One phase of the present depression in the British cotton industry, the fact that there has been not only a loss in production but also a diminution in productive machinery, is illustrated in a recent report (published May 1, 1924, as Special Bulletin No. 310) of the Department of Commerce. In part this is as follows:

"Since the armistice there has been a substantial reduction in the number of spindles and looms in place in Lancashire. Authorities disagree as to the exact figures, but there is no question as to the decline itself. The Cotton Spinners' and Manufacturers' Directory

In its lists showed a decline between the years 1917 and 1923 of 1,462,514 spindles and 17,122 looms. The estimate published by the International Cotton Bulletin is to the effect that the reduced spindleage, 1920–1923, amounted to over 2,000,000 spindles. * * *

"It was particularly commented upon in the cotton districts the great extent to which secondhand machinery was shipped overseas in the years 1921–22. The pent-up demand in the Far East was so great, and the prospect of obtaining new machinery from British or other textile machinists so remote, that high prices were paid for machinery which had been running a number of years in Lancashire. Of course, the other factor—the actual wearing out of machinery—accounted for most of the net reduction in recent years. There is still a great need in Lancashire mills for the replacement of worn-out machinery and a still greater need for improved apparatus, automatic looms, etc.

"Lancashire mill managers are not only concerned about the gradual disappearance of machinery but they are worried about the shrinkage in the size of their work forces. It has recently been estimated that not more than 80 to 85 per cent of the looms in Lancashire could be operated if full-time operations became a rule in 1924. Boys and girls have not been going into the cotton trade in sufficient numbers to fill the gaps of the older people leaving it and the war-time losses have never been made up. This situation applies much more to the weaving sheds than it does to the spinning departments, as the spinning mills have been running at least part time through much of the depression, whereas weavers have found it much more feasible to close down entirely."

France: The International Cotton Bulletin of March, 1924, stated, "France, in direct contrast to the last censur, is the only European country of importance to reduce her total cotton consumption during the half year under review." It contains the following report from French manufacturers:

"The condition of the weaving industry continues satisfactory. Until recently the spinning industry has lagged behind the weaving; however, in some cotton districts an appreciable improvement has taken place in this respect during the last few days. On the whole, stocks are small. In the present condition of things it is not anticipated that any organized short time will take place in the whole of the cotton districts within the near future. However, owing to wild fluctuations in the prices of the raw material and the high tension of the rates of exchange, it is impossible to foretell what the future of the cotton industry will be even within the next few days."

In the bulletin for September, 1923, the French manufacturers reported:

"Prices continue to leave only very little, if any, profit at all. Notwithstanding the perceptible increase in the price of cotton, owing to the rise in the rates of exchange, the average prices obtaining have hardly increased since the publication of the last bulletin."

Germany: The Textile Mercury (published at Manchester, England), in its issue of May 10, states:

"According to a Reuter telegram from Berlin dated May 4, spring business in the German cotton industry has generally been satisfactory. Home demand, it is true, is not so eager as during the first months of the year, and retail business is somewhat quieter, but no great falling off in demand is yet felt. Most mills have work in hand up to the third quarter of the year, some even to the end of the year. Employment, however, varies, 50 to 65 per cent of capacity being general, with 70 to 80 per cent at a large number of mills, and 100 per cent at a few. As regards export, the German mills are placed at a disadvantage by the high prices they are obliged to charge, due to their not having been able to purchase raw material before the rise in price and to the empty running at the mills. The further development of the industry will depend largely on the solution of the question of money and credit, and also on a mitigation of the policy of high prices and severe conditions followed by the combines in the textile industry."

India: The following extract is from the address of Mr. S. D. Saklatwala, chairman of the Bombay Millowners' Association, at the annual meeting on February 26, 1924, as reported in the Indian Textile Journal for March:

"The year that has just passed has clearly indicated to us that we are now drawing very close to the pre-war level of profits, and, perhaps, before normality has established itself our industry may pass through a still more critical time during the current year. Indeed, gentlemen, we are now feeling the effects of the aftermath of war. India can hardly hope to escape the gloom which seems to have enveloped countries with far greater staying powers than India. But the main reasons for this continued depression are, in my opinion, the stringency and uncertainty prevailing in the money market and an inclination on the part of buyers to wait with a view to be able to make a better bargain in the future."

Italy: The International Cotton Bulletin of March, 1924, contains the following report from Italian manufacturers:

"Although the demand is scarce, spinners and weavers have sufficient work to keep the machinery going a few months. In particular, weavers who produce fancy goods and cloths containing artificial silk are sufficiently engaged, whilst those working on gray cloth, shirtings, and such like, are rather short of orders. No organized stoppage is in force, but many mills are working short time, especially those weaving gray cloth. On the whole, the position is sound, and statistics show that stocks are small. It is hoped that a stronger demand will arise with the coming season, but with such an unsettled raw-cotton market the prospects are uncertain."

Spain: The International Cotton Bulletin of March, 1924, contains the following report from Spanish manufacturers:

"The demand for goods is now at a standstill. Stagnation affects, at most, about 40 per cent of the production, with a tendency to increase. Amongst the principal causes of the dullness of trade the following deserve mention:

"1. The reduced consuming capacity of the country, owing to the general depression of business and to the losses suffered in and after the year 1921.

"2. The disproportion existing between wages, especially agricultural wages, and the cost of living. In consequence of this the agricultural worker does not possess any margin for expenditure on clothing.

"3. The depression in the world's economic situation, causing a suspension of Spain's foreign trade. The present industrial crisis has inevitably forced down sale prices in order to enable the sale of current production, leaving a profit which scarcely covers general costs and in some cases of sales from stock leaves no profit at all.

"As long as these conditions persist prosperity is improbable; but, at the same time, a general deterioration is not looked for unless new difficulties arise."

Brazil: The United States trade commissioner at Rio de Janeiro reported May 24, 1924, as follows:

"The market for cotton goods in Rio de Janeiro has shown a general slackening, due to the course of the foreign exchange market and the general falling off in domestic business."

Belgium: The International Cotton Bulletin of March, 1924, contains the following report from Belgian manufacturers:

"The demand for cloth is very limited in this country owing to the high current prices of the Belgian franc. The depreciation of our currency is, on the other hand, favorable to export business. In cotton-spinning mills orders are renewed regularly; and although the orders booked are not very important, there is no reason to consider a reduction in the hours of work for the present. The fluctuations in the rates of exchange enforce on certain days a stoppage of sales, buyers and sellers finding it impossible to cover themselves promptly enough."

Switzerland: The International Cotton Bulletin of March, 1924, contains the following report from Swiss manufacturers:

"The demand is, on the whole, fairly satisfactory. No important changes have taken place. The number of those establishments which, by special permission, are allowed to work 52 instead of 48 hours a week has, however, somewhat increased, and resulted in a corresponding increase in the wages of the workers in those establishments."

Poland: The International Cotton Bulletin of March, 1924, contains the following report from Polish manufacturers:

"The demand is now very small, and this has led to curtailment of production. This state of affairs is caused by the general economic crisis in Poland, which is associated with the stabilization of the Polish mark and the efforts of our Goverument to improve the finances of the State. Under these circumstances the profits of the manufacturers are nil, or, at the most, very small indeed. We do not see any hope of an immediate improvement of things. In our opinion the crisis will be a long one, as was the case under somewhat similar conditions in Austria."

Austria: The United States Assistant Trade Commissioner at Vienna reported, May 9, 1924, as follows:

"The textile industry, with few exceptions, is suffering greatly from the shortage of money, which has become very acute. Dealers are neither able to collect outstanding debts nor to sell their stocks; consequently the industry receives few orders, so that stagnation is most pronounced. The ever-fluctuating price of American cotton also tends to prevent sound business operations. Print works are reported busy on specialties, with no orders for staple printed fabrics."

II

"To what extent and for how long a period has the present depression in the cotton manufacturing industry of this country been apparent?"

The present depression in the cotton manufacturing industry of the United States has been apparent for about 11 months, from July, 1923, to May, 1924, inclusive.

This statement is supported by two tables included herewith. Table 2 (see Appendix) shows the bales of cotton consumed by American mills, and Table 3 shows activity in the cotton-spinning industry of the United States. These tables show that cotton consumption and spindle activity were unusually high in the nine months from October, 1922, to June, 1923, inclusive, but that in July of 1923 there was a sharp drop in cotton consumption and in spindle activity and that both of these, although fluctuating from month to month, have since continued on a generally lower level.

As to the extent of the present depression, answer depends on what factor and what period is to be taken as a base. The total active spindle hours are reported each month by the Bureau of the Census (see Table 3) and can be taken, since there are no similar data as to loom activity, as the best available standard for comparison. Data are available only to April, 1924. The total active spindle hours during the 10 months from July, 1923, the beginning of the depression, through April, 1924, averaged 7,531,775,255. If we compare these figures with the average active spindle hours during the 10 months from July, 1922, through April, 1923, which amounted to 8,410,060,907, we find that the percentage of decline in spindle hours is 10.45.

Tables, which will be found in their proper place in the Appendix, further illustrate this aspect of the subject.

Table 4: Production and sales of fine cotton goods reported by 24 New Bedford mills.

Table 5: Average wholesale prices of raw cotton, cotton yarn, and cotton cloths; also index figures based on 1913, as reported by the Bureau of Labor Statistics.

Table 6: Wholesale prices of a standard print cloth and of bleached and printed cloths made therefrom; also cost of cotton used, as reported by a large mill each January 1 and July 1 since 1909, also wholesale prices of a standard gingham made of print cloth yarns.

Table 4 is a record of the production and sales of fine cotton goods reported by 24 New Bedford mills. This table is pertinent to the inquiry, although, owing to the relatively small production of fine goods in this country, it can not be taken as indicative of conditions in the industry as a whole. This table shows that there was a sharp decline in sales of fine goods by these mills in April, 1923, but that although volume of sales continued low in all but four of the subsequent months the production by these mills continued relatively high until April, 1924. The resulting accumulation of stock reflects clearly the falling off in demand.

In connection with the depression in the industry which began in July, 1923, as shown by tables 2 and 3, as well as by statements of the trade, it may be noted that in July, 1923, there was a sharp drop in the price of cotton, which was reflected in the prices obtainable for yarns and cloths. When cotton later increased in value the prices of the manufactured goods were not increased in the same proportion. This is shown in table 5, but inasmuch as the manufactures there shown are made of higher-priced cotton than the basic middling there quoted, table 6 is added to show the actual margins between the prices obtained for certain cloths and the costs of the cotton actually used therein as reported by a large manufacturer semiannually for a period of years.

In regard to the sharp fluctuations in cotton prices, the president of the National Association of Cotton Manufacturers, in a recent report to his association, remarked:

"Looking back over the last two years, spot cotton ranged from 17.75 cents in April, 1922, to 31.30 cents in March, 1923, down to 22.45 cents in July, 1923, up to 37.65 cents last December, and recently down to 27.05 cents. Future quotations on the New York Exchange have been even more erratic than the spot prices."

It may be noted that Fall River manufactures mainly print cloth and that these goods are exported in large quantities; such competition as it experiences is from the southern mills, as there is no competition from imports. New Bedford, on the other hand, manufactures mainly fine goods and such competition as it experiences is mainly from abroad.

In view of these facts, it is interesting to know that Sanford & Kelley, New Bedford and Fall River stock brokers, in an annual review of the cotton-mill situation at these two places, have expressed the opinion that the Fall River coarse-goods mills had a very difficult time during the year 1923, as there was little or no manufacturing profit available in the industry as conducted at Fall River, whereas the cloth mills in New Bedford had a very good year in 1923.

III.

"What is the quantity and value of cotton cloth imported into and exported from the United States under the present tariff act as compared with those under the act of 1909?"

The total quantity and value of countable cotton cloths (which are the only kinds to which the resolution is understood to relate) imported and exported under the act of 1922 and under preceding acts have been as follows:

*Countable cotton cloths—Totals by tariff acts*

| Tariff acts | Imports for consumption | | Domestic exports | |
|---|---|---|---|---|
| | Square yards | Dollars | Linear yards | Dollars |
| Act of 1890 (1,422 days) | 138,000,131 | 17,700,974 | 692,327,427 | 443,489,967 |
| Act of 1894 (1,062 days) | 128,460,567 | 15,303,196 | 714,862,821 | 40,041,745 |
| Act of 1897 (4,394 days) | 719,356,561 | 107,076,077 | 4,842,985,875 | 272,569,864 |
| Act of 1909 (1,520 days) | 211,151,204 | 34,165,180 | 1,650,366,021 | 112,214,391 |
| Act of 1913 (3,275 days) | 687,466,248 | 168,372,194 | 5,443,867,022 | 857,046,365 |
| Act of 1922 (557 days) [1] | 294,900,445 | 64,999,053 | [2] 690,194,071 | 117,027,995 |

[1] For period from Sept. 22, 1922, to Mar. 31, 1924, inclusive, for which data are available.
[2] Square yards.

Reducing the above to a uniform basis, the year of 365 days, there is obtained the following contrast:

*Countable cotton cloths—Average per year of 365 days*

| Annual average for | Imports for consumption | | Domestic exports | |
|---|---|---|---|---|
| | Square yards | Dollars | Linear yards | Dollars |
| Act of 1890 | 35,421,975 | 4,543,598 | 177,707,110 | 11,163,291 |
| Act of 1894 | 44,150,760 | 5,259,676 | 245,682,024 | 13,761,945 |
| Act of 1897 | 59,755,381 | 8,894,576 | 402,287,971 | 22,641,784 |
| Act of 1909 | 50,704,694 | 8,204,159 | 396,466,183 | 26,946,219 |
| Act of 1913 | 76,618,576 | 20,994,153 | 606,741,057 | 95,518,144 |
| Act of 1922 [1] | 193,247,150 | 42,587,737 | [2] 452,281,573 | 76,688,004 |

[1] For period from Sept. 22, 1922, to Mar. 31, 1924, inclusive, for which data are available.
[2] Square yards.

The figures for the five tariff acts prior to the act of 1922 show that the general tendency has been for the foreign trade, both export and import, of the United States in countable cotton cloths to increase. Under each of these successive tariff acts the rate of increase has been more marked in exports than in imports. Under the act of 1922 the increase in imports has been accentuated, whereas there has occurred a decrease in exports; this act, however, has been in operation not much over a year and a half. It is therefore too early to state that this marks a permanent reversal of the condition of a continually widening margin of exports over imports which is shown by the figures for the five preceding acts.

In amplification of the above answer there are attached tables 7 and 8. Table 7 shows imports for consumption for each year and fraction of a year under the tariff acts of 1890, 1894, 1897, 1909, 1913, and 1922, with details as to quantity, value, duty collected, value per unit, and the rate of duty, the last stated on both the ad valorem and the specific basis. Table 8 shows the quantity and value of domestic exports for each year and fraction of a year under the tariff acts above mentioned.

IV

"What is the percentage of imports and exports, as compared to the domestic production, of cotton cloth in the census years 1909, 1914, 1919, 1921, and 1923?"

The data are as follows:

*Countable cotton cloths—Relation of imports and exports to production*

| Year | Quantity | | | Value | | |
|---|---|---|---|---|---|---|
| | Volume of production | Relation of imports to production | Relation of exports to production | Volume of production | Relation of imports to production | Relation of exports to production |
| | *Square yards* | *Per cent* | *Per cent* | *Dollars* | *Per cent* | *Per cent* |
| 1889 | 3,003,012,007 | 1.05 | 3.55 | 191,933,218 | 2.09 | 4.41 |
| 1899 | 4,433,932,327 | 1.22 | 8.36 | 280,015,368 | 3.00 | 8.25 |
| 1904 | 4,933,561,905 | 1.02 | 4.51 | 300,004,149 | 2.68 | 4.90 |
| 1909 | 6,121,311,718 | 1.13 | 5.41 | 424,578,252 | 2.47 | 5.11 |
| 1914 | 5,599,118,359 | .89 | 5.98 | 456,522,994 | 2.52 | 6.32 |
| 1919 | 5,983,359,767 | .44 | 10.82 | 1,128,819,078 | 1.32 | 13.47 |
| 1921 | 6,097,714,645 | 1.84 | 8.14 | 797,486,207 | 4.77 | 10.12 |
| 1923 [1] | | | | | | |

[1] Production data not available.

The Bureau of Census states that the compilation of production data for 1923 has not been completed. For this reason production and import and export percentages are not given for 1923 in the foregoing table. Using the latest production figures, those for 1921, as a tentative base for 1923, imports in 1923 were 3.38 per cent in quantity and 6.33 per cent in value, whereas exports were 7.61 per cent in quantity and 11.21 per cent in value. Since the consumption of cotton in the calendar year 1923 was greater than in the calendar year 1921, it is probable that when all the figures become available the quantity and value of cotton-cloth production will be found to be greater, in which case the actual percentages for 1923 will prove to be smaller than those indicated.

Exports from the United States have exceeded imports in every year since 1875. The bulk of the exported cloths are woven of coarse or medium numbers of yarn, whereas the bulk of the imported cloths are woven of fine yarns.

Table 9 shows domestic production and imports and exports by years, from 1889 to 1923, inclusive. Tables 10 and 11 show in detail the census records of production of the various cloths; these two tables show the derivation of the figures used above for the production of countable cotton cloths. Export data are given only for countable cotton cloths, and exports of special fabrics, such as pile fabrics, etc., are not recorded thereunder, some being listed separately and some being lumped with "manufactures of cotton n. s. p. f." To obtain a correct comparison, cotton cloths provided for eo nomine, also articles such as towels and blankets, have been excluded from the production and import as well as the export figures. The data as shown, therefore, relate solely to countable cotton cloths such as are now dutiable in paragraphs 903 and 906 of the tariff act of 1922.

V

What types of cotton cloth constitute the bulk of the import trade, and are these cloths similar or different in character from those produced in this country?

The types of cotton cloth predominating in the import trade vary from time to time. For a number of years prior to the World War, in fact until about 1920, the leading cloth imported consisted of dyed Venetians; these were eight-harness warp sateens, with a silk-like finish imparted by secret processes. They were very popular as linings. The next largest import was of medium-fine and fine plain white goods, such as muslins, cambrics, nainsooks, lawns, and organdies. There were substantial importations of fine shirtings and ginghams, of dotted Swisses, of ratines, voiles, piques, filling sateens, typewriter cambrics, poplins, and plain and novelty dress goods. Colored goods predominated, followed by bleached goods, whereas imports of gray goods were relatively small.

In 1920 voiles constituted the main import. Fine plains ranked next in the imports of cloths.

Beginning with 1920 imports increased both in quantity and in value. This increase has been due mainly to the larger importations of fine-yarn goods; in 1913, for instance, cloths woven of fine yarns, above 40s in average yarn number, constituted less than one-half of the total, whereas in 1923 they constituted over two-thirds of the total. The most striking postwar changes have been three: The decline in imports of the eight-harness warp Venetians; the increase in imports of five-harness warp sateens made of fine yarns; and the great popularity of a new fabric that has been named "cotton broadcloth."

The main cotton cloths now imported are as follows: (1) Cotton "broadcloth" shirtings, (2) fine combed warp sateen, (3) voiles, and (4) fine plains (lawns, organdies, nainsooks, cambrics, etc., of average yarn number over 40's). These four types constituted over three-fourths of the total import during 1923 and 1924 to date. Cloths imported in smaller but appreciable quantities have included ratines, Japanese crêpe, venetians, fine ginghams, dotted Swisses, and fancy-woven fabrics. Gray goods have predominated, with colored goods second, and bleached goods last. (For descriptive detail of the cloths referred to see Exhibit A, Appendix.)

The increased proportion of goods entered in the gray has probably been due in part to the lower rates of duty, in the present as in other acts, applicable to unfinished goods. In larger part, however, it has been due to the improvement during the last decade in the finishing facilities in this country for such cloths. One advantage in importing in the gray is that the goods can be finished here as desired to meet the changing demands of the market. It is claimed in the trade that charges for finishing are as low in the United States as in England; this is in line with the facts found by the Tariff Board as far back as 1911. No recent investigation of finishing costs has been made by the Tariff Commission either in the United States or in England.

In answer to the second part of the inquiry it can be stated that a large portion of the imported cloths are entirely different in character from cloths produced in this country. Most of the other imported cloths are similar in general character to domestic fabrics but usually differ therefrom by reason of the type of cotton used, the type of spinning used, variations in design, or variations in finish.

In general, it may be said that the great bulk of the domestic fabrics are woven of yarns ring spun from American cotton, whereas the great bulk of the imports are woven of yarns mule spun from Egyptian cotton. This basic difference results in the imported goods having in general a better "cover" and a smoother feel than the domestic, although the latter will in many instances prove more durable. Swivel-woven cloths, including the genuine dotted Swisses, are not produced in this country, and there is practically no domestic production of fabrics made of yarns above 120's except such as are woven with imported yarns. Japanese crêpe, made of harsh Indian and Chinese cottons, is also different in character from any domestic crêpe. Attempts have been made by American manufacturers to produce several other specialties, such as Penelope canvas, but the efforts have been given up because of the extra care and slow rate of production involved in their manufacture and consequent higher labor cost.

There is domestic production of cotton broadcloth shirtings, fine-combed warp sateens, voiles, and fine plains (other than the extreme fine plains), the four types now constituting the bulk of the imports; also in the case of ginghams. In each of these instances, however, aside from the fact that the imported fabrics are usually made of mule-spun Egyptian cotton and the domestic of ring-spun American cotton, the great bulk of the domestic production is of the lower grades, The imports are mainly of the finer grades. In other words, the market in the United States for the medium-fine goods is controlled by the domestic mills, whereas the market for the fine goods is divided between the imported and the domestic, with the market for the extremely fine goods entirely controlled by importers.

On practically no type of cloth made in bulk by the domestic mills is there serious competition from abroad. On such goods the American mills, aided by their much more extensive use of the automatic loom, not only control their domestic market but offer strong competition in foreign markets. These goods manufactured and exported in bulk include sheetings, print cloths, tobacco cloths, osnaburgs, ducks, cotton flannels, coarse colored cottons (cottonades, denims, ticks, etc.), and ginghams, made of carded yarns not finer than 40's; also certain finer goods, such as single voiles.

In general it may be said that on cloths that can be made of upland short-staple cotton, the spinning limit of which is about 40s, there is little or no competition from abroad. Such imported cloths made from coarse or medium yarns are mainly of the nature of specialties required in limited amounts. There is a large export and a substantial import trade. In the medium-fine range, goods made of yarns from 41s to 60s. In cloths made of fine yarns above 60s there is very little export trade, whereas imports are large. Imports of the extremely fine cloths monopolize the limited demand for such fine high-priced goods.

The United Kingdom supplies most of the cotton cloths imported by the United States. Table 12 contains British statistics of this trade and shows clearly the change from a pre-war predominance of piece-dyed and bleached goods to a post-war predominance of gray goods. Table 13 is appended to show imports by trade names of certain specified cloths. These data have been collected by the Treasury for publication by the Department of Commerce only since the middle of February, 1924. Table 14 gives imports for consumption during the calendar year 1923, and Table 15 imports for consumption during the first quarter of 1924. These two tables are compiled to show quantity and value of imports by yarn ranges. There is also attached Table 16, which shows imports by yarn ranges under the act of 1913 in comparison with those under the act of 1922. The post-war trend toward the importation of finer fabrics is very noticeable.

VI

"What are the main reasons for the importation of cotton cloths? In particular, are such imports due primarily to price or to quality?"

Among the main reasons for the importation of cotton cloths may be listed the following:

1. Quality: That portion of the population of the world which can afford fine cotton fabrics of high quality is accustomed to turn to England, France, or Switzerland to supply their requirements, and the United States is no exception to this rule. The superior quality of imported cotton cloths may be due to more care in manufacture, to the use of Egyptian cotton, to the use of mulespun yarns, to the use of flyer-twisted ply yarns, to differences in construction—for instance, to a larger number of threads, of finer yarns, than customary in the United States—to superior finish, or to other factors.

2. Reputation: Various imported fabrics are sold under trade-marks that have become familiar to the American public as a guaranty of established quality. In such instances the foreign fabric is bought because of reputation and often without knowledge as to whether the goods are of foreign or domestic origin. On the other hand, many goods are sold at high prices simply because they are marked "imported" and irrespective of the fact that domestic goods of equal or superior quality may be available at lower prices.

3. Lack of domestic production: The American cotton industry does not use swivel looms because of their slow rate of production and consequent higher labor cost. All swivel-woven cloths, including substantial amounts of swivel-decorated voiles and crêpes, as well as the more staple "dotted Swisses," must therefore be imported at the present time. These goods are of Swiss or French origin and are produced mainly on hand looms in the homes. The American cotton industry spins but little warp yarn above 100s, and but little filling yarn above 120s, mainly because the demand is relatively so small that it would hardly pay the domestic manufacturer to undertake to produce them. Fine lawns, organdies, mulls, etc., made of the higher range of fine yarns must therefore be purchased abroad. The American cotton industry has no flyer-twisters, and therefore cloths such as fine-ply voiles and fine-ply broadcloths, in which smooth and well-rounded ply yarns of fine counts are essential, must be imported. One domestic firm makes fabrics of quality equal to the imported cloths, using imported yarns, but its output is not sufficient to supply the domestic demand. Japanese crêpe, the only cloth imported from Japan in appreciable quantities, is made of Indian or Chinese cotton, and therefore has a peculiarly rough, strong feel. This type of crêpe is not produced in this country and is of a different character from the crêpes made of the softer American cotton produced in great quantities by the domestic mills. Included in the import trade are various other fabrics of which there is no domestic production.

4. Specialty demand: Much of the importation of cotton cloth from France consists of specialties. Substantial amounts of such specialties come from Switzerland and England, and smaller amounts from other countries. Such specialties cover a wide range, from voile or crêpe grounds, ornamented with novelty yarns, to staple shirting fabrics which are of a confined pattern and which the consumer of exclusive taste buys because he has the guaranty that it will be different. The domestic manufacturer, working on the "mass production" system, is unable to cater profitably to the demand for fabrics of any one type or design required in small amounts. In coutils for corsets, for instance, the American manufacturers supply the bulk demand, which is for smooth piece-dyed fabrics, whereas the smaller demand from custom corsetieres who want something different, is supplied entirely by importations from France of closer woven, rougher-finished coutils, woven of bleached yarns. Any imported specialty that attains a bulk demand is quickly reproduced by American producers, although usually in less expensive qualities by American mills. Illustrations of cotton cloths of comparatively recent origin, introduced as specialties but which now partake more of the nature of staples, are voiles, Russian-cord shirtings, and broadcloths.

5. Lower price: The fact that the United States exports large quantities of cloths made of coarse and medium yarns, such as sheetings, drills, denims, tickings, crêpes, prints, ginghams, etc., also medium fine fabrics such as single voiles, tends to prove that the 1912 findings of the tariff board, to the effect that on such goods the American manufacturer, producing in bulk with the aid of the automatic loom, can compete successfully, are also true to-day. On the extremely fine range and in specialties, where American products are lacking or else produced in insufficient quantities, there is practically no direct price competition in the domestic market.

In the most directly competitive range, that from 40s to 100s average yarn numbers, price is a more important factor, but its relative importance varies according to the class of goods and also from time to time according to the trend of prices here and abroad. Prices in the United States and in England, the chief source of imported cloths, do not always show the same trend and at times in the two countries are much closer together than at others. For instance, from the fall of 1922 to the fall of 1923 the price of American raw cotton, although fluctuating sharply, tended upward, whereas the price of Egyptian raw cotton tended downward. The normal price relation between the two types of cotton was upset, with the result that during this period English yarns and cloths made of Egyptian cotton were, relative to American yarns and cloths made of American cotton, much lower in price than usual. Under such circumstances there was strong price competition on the American market in the competitive range of 40s to 100s average yarn numbers, and imports in this range increased considerably. However, the trade in fine plains was but little affected and the increase in imports was confined mainly to three cloths, namely, broadcloths, fine combed sateens, and voiles. Broadcloth is of recent English development and has not yet become firmly established in American mills as an article of mass production. The demand for fine combed sateens had become, largely by reason of the increase in the use of bloomers, greater than the few domestic mills on such goods could supply. The competition on voiles expressed itself in lower prices, and therefore larger sales, of the high-grade ply voiles, which are made here by only one or two mills, and did not extend to direct competition on the single voiles which continued to be made and exported in large quantities.

In the spring and early summer of 1924 conditions changed. American prices have gone down, whereas English prices have gone up, and at the time of this report, in June, 1924, conditions appear to be rapidly returning to the normal status where imports have to be made on the basis of quality or other factor without the aid of lower prices. An investigation at New York shows that on most of the competitive cloths American manufacturers are now quoting prices lower than those at which the foreign goods can be landed with charges and duties paid.

To sum up, imports of cotton cloths are due primarily to the quality of certain grades rather than to general price competition. The relative importance of the price factor varies and at times it is the deciding factor on a limited number of fabrics, but normally, and at the date of this report, the more important factors appear to be quality, reputation, lack of domestic production, and specialty demand.

VII

"To what extent has the domestic industry been affected by the postwar increase in the importation of cotton cloths?"

This question is difficult to answer with certainty, for the reason that imports constitute but one of many factors that affect the demand for domestic fabrics, and for the further reason that a substantial proportion of the imported fabrics are of a type not made here at all or else not made here in sufficient quantities. If we assume, however, that each yard of imported cloth displaces a yard of domestic fabrics, then, since imports are now on the basis of about 200,000,000 square yards per annum, as compared with a pre-war basis of about 50,000,000 square yards, it would follow that domestic sales have been affected to the extent of approximately 150,000,000 square yards. If the total domestic production be taken as 6,500,000,000 square yards, this postwar increase of 150,000,000 square yards amounts of 2.3 per cent of the total output.

Any attempt to examine more precisely the effect of imports as regards various cloths or groups of cloths involves more or less estimate and conjecture. Even for cloths imports of which are recorded by trade names no accurate contrast is possible. In few cases is there similar record of the domestic production. For instance, the census figures do not record broadcloths separate from other plain-woven fabrics and do not record fine-combed sateens separate from twills and sateens of all kinds. In some cases, such as ginghams and voiles, figures are available for both production and imports; but here, again, as imports are mainly of the finer types, whereas the bulk of domestic production is of the coarse or medium types, sufficient data are not available to permit the desired comparison.

On the basis of such data as are available it seems reasonable to assume that the domestic output of fine cloths, made of yarns averaging above 40s, constitutes about 20 per cent of the total square yards produced in this country. If this total be approximately 6,500,000,000 square yards, there is then obtained the following comparison of the competition experienced by fine cloths and by other cloths in 1923:

| | Estimated production | Actual imports | Imports, of production |
|---|---|---|---|
| | *Sq. yds.* | *Sq. yds.* | *Per cent* |
| Coarse and medium cloths | 5,200,000,000 | 56,036,607 | 1.08 |
| Fine cloths | 1,300,000,000 | 150,110,173 | 11.55 |
| Total | 6,500,000,000 | 206,146,780 | |

Included in the imports of fine goods are some made with yarns finer than any produced in this country. Some of the coarser goods, such as the Japanese crêpes, are also made of yarns different from any produced in this country. It may therefore be assumed, as an approximation of the true condition, that imports of coarse and medium cloths now constitute about 1 per cent of the domestic production of such cloths and imports of fine goods about 10 per cent of the production of such cloths.

VIII

"Would changes in the present tariff rates on cotton cloths be of material assistance in stimulating production and restoring prosperity to the industry?"

The commission has as yet made no investigation of the difference in costs of production of cotton cloths here and abroad, and if such an investigation were to be made it could hardly be completed within less than a year. It is the general opinion, as stated by authorities in the industry, that domestic and foreign, particularly British, selling prices are to-day very close to actual costs, but in the absence of verified domestic and foreign costs of production required by section 315 of the tariff act of 1922 the commission does not feel warranted in suggesting readjustments in the duties on cotton cloths.

Information for use in a consideration of this inquiry is furnished by Table 17, which shows not only the value of the 1923 imports but also the revenue collected and the average rates of duty by yarn ranges; by Table 18, which shows the amount and value of that portion of the 1923 imports that were dutiable at the maximum rate of 45 per

cent ad valorem; and by Chart D, which is a graphical illustration of the rates of duty on cotton yarns and on countable cotton cloths, as arranged in the acts of 1922 and 1913.

INVESTIGATION OF NORTHERN PACIFIC LAND GRANTS

The PRESIDENT pro tempore. The Chair announces that he has appointed the following members of the joint committee under House Joint Resolution No. 237:

The Senator from North Dakota [Mr. LADD], the Senator from South Dakota [Mr. NORBECK], the Senator from Missouri [Mr. SPENCER], the Senator from Wyoming [Mr. KENDRICK], and the Senator from Colorado [Mr. ADAMS].

AGRICULTURE THE BASIC INDUSTRY

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the joint resolution (S. J. Res. 107) declaring agriculture to be the basic industry of the country, and for other purposes.

Mr. SMITH. I move that the Senate disagree to the amendments of the House, ask for a conference on the disagreeing votes of the two Houses, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the President pro tempore appointed Mr. SMITH, Mr. PITTMAN, and Mr. CUMMINS conferees on the part of the Senate.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated below:

H. R. 646. An act to make valid and enforceable written provisions or agreements for arbitration of disputes arising out of contracts, maritime transactions, or commerce among the States or Territories or with foreign nations; to the Committee on Commerce.

H. R. 26. An act to compensate the Chippewa Indians of Minnesota for lands disposed of under the provisions of the free homestead act; and

H. R. 8086. An act to amend the act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1915," approved August 1, 1914; to the Committee on Indian Affairs.

H. J. Res. 283. Joint resolution (H. J. Res. 283) to permit to remain within the United States certain aliens in excess of quotas fixed under authority of the immigration act of May 19, 1921; to the Committee on Immigration.

INSPECTION OF RAILWAY LOCOMOTIVES

Mr. SMITH. Mr. President, I ask unanimous consent for the present consideration of the bill (H. R. 8578) to amend the act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," approved February 17, 1911, as amended. It is a matter of very vital importance, and there is no amendment to the bill. It is a question of providing adequate means for the proper inspection of railway locomotives. It is recommended by the President, by the Budget, and by the Interstate Commerce Commission.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from South Carolina?

There being no objection, the Senate as in Committee of the Whole proceeded to consider the bill which was read as follows:

*Be it enacted, etc.*, That the first sentence of section 1 of the act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," approved February 17, 1911, as amended, is amended to read as follows:

"That when used in this act the terms 'carrier' and 'common carrier' mean a common carrier by railroad, or partly by railroad and partly by water, within the continental United States, subject to the interstate commerce act, as amended, excluding street, suburban, and interurban electric railways, unless operated as a part of a general railroad system of transportation."

SEC. 2. Section 2 of such act is amended to read as follows:

"SEC. 2. That it shall be unlawful for any carrier to use or permit to be used on its line any locomotive unless said locomotive, its boiler, tender, and all parts and appurtenances thereof are in proper condition and safe to operate in the service to which the same are put, that the same may be employed in the active service of such carrier without unnecessary peril to life or limb, and unless said locomotive, its boiler, tender, and all parts and appurtenances thereof have been inspected from time to time in accordance with the provisions of this act and are able to withstand such test or tests as may be prescribed in the rules and regulations hereinafter provided for."

SEC. 3. The last sentence of section 3 of such act is amended to read as follows:

"The office of the chief inspector shall be in Washington, D. C., and the Interstate Commerce Commission shall provide such legal, technical, stenographic, and clerical help as the business of the offices of the chief inspector and his said assistants may require."

SEC. 4. Section 4 of such act is amended by adding thereto a new paragraph to read as follows:

"Within the appropriations therefor and subject to the provisions of this act, the Interstate Commerce Commission may appoint, from time to time, not more than 15 inspectors in addition to the number authorized in the first paragraph of this section, as the needs of the service may require. Any inspector appointed under this paragraph shall be so assigned by the chief inspector that his service will be most effective."

SEC. 5. Section 10 of such act is hereby repealed.

SEC. 6. Hereafter the salary of the chief inspector shall be $6,000 per year; the salary of each assistant chief inspector shall be $5,000 per year; the salary of each inspector shall be $3,600 per year; and the annual allowance for each inspector for office rent, stationery, and clerical assistance, fixed by the Interstate Commerce Commission, shall not exceed $1,000.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DEFICIENCY APPROPRIATIONS—CONFERENCE REPORT

Mr. WARREN. Mr. President, I have a very important conference report for which I ask immediate consideration. Unless we can give early attention to the matter, the entire bill, carrying about $200,000,000, will fail, because we are in disagreement on quite a number of items.

The PRESIDENT pro tempore. The Chair is of the opinion that the conference report has precedence.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives to the bill (H. R. 9559) as follows:

IN THE HOUSE OF REPRESENTATIVES,
*June 7, 1924.*

*Resolved*, That the House recedes from its disagreement to the amendments of the Senate numbered 37 and 39 to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes and concurs therein.

That the House insists upon its disagreement to the amendments of the Senate numbered 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 58, and 59;

That the House agrees to a further conference requested by the Senate on the disagreeing votes of the two Houses thereon; and

That Mr. MADDEN, Mr. ANTHONY, and Mr. BYRNS of Tennessee are appointed managers on the part of the House at the further conference.

Mr. WARREN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 4, 5, 8, 9, 12, 13, 14, 20, 24, 41, 42, 49, and 57.

That the House recede from its disagreement to the amendments of the Senate numbered 7, 11, 16, 17, 19, 22, 25, 26, 38, 40, 43, 44, 45, 46, 47, 48, 50, 51, 52, 53, 54, 55, and 56, and agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

"SENATE

"For miscellaneous items, exclusive of labor, fiscal year 1924, $50,000.

"For payment for services rendered the Senate or committees thereof, as follows: John G. Holland, jr., $250; Ernest K. Hill,

$250; Fred A. Eckstein, $860; Albert Reid, $125; Alexander K. Meek, $1,200; Louis Bose, $40; U. G. Gordon, $40, and James F. Sellers, $200; in all, $2,965."

And the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: On page 2 of the bill, line 22, strike out "five" and insert in lieu thereof "six," and the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows: In the matter inserted by said amendment strike out the following: ", to be paid wholly out of the revenues of the District of Columbia," and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following:

"For carrying out the provisions of the act entitled 'An act to provide for the promotion of vocational rehabilitation of persons disabled in industry or otherwise and their return to civil employment,' approved June 2, 1920, as amended by the act of June 5, 1924, for the fiscal year 1925, $834,000: *Provided*, That the apportionment to the States shall be computed on the basis of not to exceed $1,034,000, as authorized by the act approved June 2, 1920, as amended by the act approved June 5, 1924."

And the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

"For additional hospital and out-patient dispensary facilities for patients of the United States Veterans' Bureau, and facilities for a permanent national training school for the blind at a cost not exceeding $350,000, who are beneficiaries of the United States Veterans' Bureau, by purchase and remodeling or extension of existing plants, and by construction on sites now owned by the Government or on sites to be acquired by purchase, condemnation, gift, or otherwise, such hospitals and out-patient dispensary facilities to include the necessary buildings and auxiliary structures, mechanical equipment, approach work, roads, and truckage facilities leading thereto; and also to provide accommodation for officers, nurses, and attending personnel; and also to provide proper and suitable recreational centers, $3,850,000, to remain available until June 30, 1925, and in addition to this amount obligations may be incurred for the purposes set forth in this paragraph not to exceed in the aggregate $3,000,000. That not to exceed 3 per cent of the total of $6,850,000 shall be available for the employment in the District of Columbia and in the field of necessary technical and clerical assistants at the customary rates of compensation, exclusively to aid in the preparation of the plans and specifications for the projects authorized herein and for the supervision of the execution thereof, and for traveling expenses and field-office equipment and supplies in connection therewith."

And the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows: Before the sum named in said amendment, insert: "fiscal year 1923"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 39, 58, and 59.

F. E. WARREN,
CHARLES CURTIS,
W. L. JONES,
LEE S. OVERMAN,
WM. J. HARRIS,
*Managers on the part of the Senate.*
MARTIN B. MADDEN,
D. R. ANTHONY, Jr.,
JOSEPH W. BYRNS,
*Managers on the part of the House.*

Mr. WARREN. I move the adoption of the conference report.

Mr. ROBINSON. Mr. President, may I ask the Senator from Wyoming what are the outstanding amendments upon which no agreement has been reached?

Mr. WARREN. The outstanding amendments include every item that pertains to reclamation and farming interests. There are sundry others of which I can give the Senator a list.

Mr. NORRIS. Mr. President, I was interrupted and did not hear the Senator's answer to the Senator from Arkansas. Will he kindly repeat it as far as he has gone?

Mr. WARREN. So far as the items in disagreement are concerned, they are all in disagreement as to the reclamation and farming subjects. In addition to that are the items relating to the shale investigation, United States marshals in United States courts, the matter of the Leavenworth bridge, and also quite a number of minor matters, but the main ones I have stated.

Mr. REED of Pennsylvania. Mr. President, will the Senator state whether an agreement has been reached with reference to the Veterans' Bureau hospital item?

Mr. WARREN. There has been no agreement reached with reference to that item.

The PRESIDENT pro tempore. The question is on agreeing to the conference report.

The report was agreed to.

Mr. WARREN. Mr. President, I move that the Senate insist upon its amendments in disagreement, ask the House for a further conference, and that the Chair appoint the conferees on the part of the Senate on the disagreeing votes of the two houses.

The motion was agreed to; and the President pro tempore appointed Mr. WARREN, Mr. CURTIS, Mr. JONES of Washington, Mr. OVERMAN, and Mr. HARRIS conferees on the part of the Senate.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed a joint resolution (S. J. Res. 85) authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensive observance of that greatest of all historic events, the bicentennial of the birthday of George Washington, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the bill (S. 2887) authorizing transfer of certain abandoned or unused lighthouse reservation lands by the United States to the State of New York for park purposes.

## ENROLLED BILLS SIGNED

The message also announced that the Speaker of the House had signed enrolled bills of the following titles, and they were thereupon signed by the President pro tempore:

H. R. 5318. An act to authorize an exchange of lands with the State of Washington;

H. R. 7996. An act to regulate and fix rates of pay for employees and officers of the Government Printing Office;

H. R. 7998. An act granting public lands to the city of Golden, Colo., to secure a supply of water for municipal and domestic purposes;

H. R. 8839. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 9177. An act granting the consent of Congress to the counties of Kittitas and Grant, in the State of Washington, to construct a bridge across the Columbia River at or near Vantage Ferry, Wash.;

H. R. 9345. An act granting the consent of Congress for the construction of a bridge across the Ohio River between Vanderburgh County, Ind., and Henderson County, Ky.; and

H. R. 9429. An act making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1925, and for other purposes.

## PERSONAL EXPLANATION—WAR FINANCE CORPORATION LOANS

Mr. GOODING. Mr. President, I rise to a question of personal privilege. Last evening, in the closing hour of the session, which seemed to be a storm center, the junior Senator from Virginia [Mr. GLASS] made the charge that I had violated a Federal statute and was subject to a fine of $3,000. I am quite sure if the Senator from Virginia had taken time to follow out the matter, or there had been a little better understanding, or the Senate had not been in such a commotion at the time, he would not have made that statement.

I send to the desk a letter from the general counsel of the War Finance Corporation and ask to have it read. It relates to my right or the right of any other Senator to participate, through a corporation, in the matter of the corporation securing loans from the War Finance Corporation.

The PRESIDENT pro tempore. Without objection, the letter will be read as requested.

The reading clerk read as follows:

WAR FINANCE CORPORATION,
THE TREASURY BUILDING,
*Washington, June 7, 1924.*

Hon. FRANK R. GOODING,
*United States Senate.*

MY DEAR SENATOR GOODING: You have asked me to confirm in writing the opinion which I expressed to you this morning as to the legality of certain loans made by the War Finance Corporation to a loan company, secured by the note of a corporation in which you are financially interested.

The loan in question was made to the Southern Idaho Loan Co., a livestock loan company, against its promissory note, secured by a number of notes of livestock growers, among them being a corporation in which I understand that you own a substantial stock interest.

Section 114 of the Penal Code makes it unlawful for any Member of Congress to "undertake, execute, hold, or enjoy in whole or in part, any contract or agreement made or entered into in behalf of the United States by any officer or person authorized to make contracts on its behalf."

Section 115 makes it unlawful for an officer of the United States, on behalf of the United States, to enter into any contract with any Member of Congress.

Section 116 provides that "nothing contained in the two preceding sections shall extend, or be construed to extend, to any contract or agreement made or entered into, or accepted by any incorporated company, where such contract or agreement is made for the general benefit of such incorporation or company."

Even if the sections above referred to are applicable to loans made by the War Finance Corporation, it is apparent that there has been no violation of law in the present case. The loan was made by the War Finance Corporation to a loan company which pledged as security a note of a corporation in which you held stock. There was, therefore, no contract made between yourself and the War Finance Corporation and the provision of section 116 relating to contracts with a corporation in which a Member of Congress may be interested expressly covers the case.

Moreover in the light of recent decisions of the United States Supreme Court, it is clear that a contract made by the War Finance Corporation is not a contract made on behalf of the United States with the meaning of penal provisions. The Supreme court has so held in the case of the United States Shipping Board Emergency Fleet Corporation (U. S. *v.* Strang, 254 U. S. 491), and the same reasoning is applicable to the War Finance Corporation, which is incorporated by special act of Congress. Indeed the War Finance Corporation act specifically provides that the United States is not liable for any obligation incurred by the corporation.

Of course, you understand that it is not a part of my official duties to give opinions upon the interpretations of the criminal statutes of the United States. It is, however, my duty, as general counsel of the War Finance Corporation, to ascertain that loans made by the War Finance Corporation are made in accordance with law, and from this point of view I can express with confidence the opinion that the transactions in question were not in violation of sections 114 to 116 of the Penal Code. The loans in question were made, as are all loans of the War Finance Corporation, in aid of the livestock industry as a whole, upon the merits of the security tendered and without regard to what individuals may be interested therein.

Yours very truly,

GERALD C. HENDERSON,
*General Counsel.*

Mr. GLASS. Mr. President, the Senator from Idaho has anticipated me in a statement which I would very cheerfully have made before the reading of the letter had I known that he proposed having the letter read.

Last evening in the confusion of the Senate Chamber I understood the Senator from Idaho to speak of this loan as his loan. When he did so, I recalled section 114 of the criminal statutes, which prohibits a Member of the Senate or of the House of Representatives from entering into a contract, directly or indirectly, with the United States Government. Subsequently I understood the Senator from Idaho to amend his statement by saying that a corporation with which he was connected had made the loan. I confess that that did not at the time modify my opinion, because I was not then aware of the fact that section 116 of the Criminal Code—which had not been brought to my attention, while section 114 had—expressly exempts Senators and Members of the House of Representatives from the operation of section 114 when they are merely stockholders in the corporation.

Therefore I perceive and frankly avow that to that extent I did the Senator from Idaho an injustice. I do not think he is amenable to the statute.

Mr. GOODING. Mr. President, I felt last night that the Senator from Virginia did not intend, of course, to cast any reflection on my acts in any way, because I had not willfully violated the law and the law had not been violated. I am glad to have him make the statement which he has that, in his opinion, I am completely exonerated from violating a Federal statute, because when I get through with my public service I am going to know in my own conscience that I have never intentionally violated any law of my country.

Mr. President, I am entitled to have Senate Resolution 208, in which I have asked for an investigation of my acts in connection with this loan, disposed of in some way or other by the Senate, and I therefore ask for its immediate consideration.

I will say, Mr. President, that I should like to have a member of the Committee to Audit and Control the Contingent Expenses of the Senate make a statement in regard to a letter which he received from the War Finance Corporation. It was charged that I had secured loans to the injury of the farmers of my State. No part of that is true. I spent more time in the early days of my service in the Senate in trying to secure relief for the farmers of my State through the War Finance Corporation than along any other line. There were some disappointments. The law did not go far enough to take care of the individual farmer, but in my State nearly 2,500 farmers were taken care of, and I know that it was more or less through my efforts that corporations were formed in Idaho that gave farmers an opportunity to secure loans, and in some communities the farmers were saved their homesteads.

I ask unanimous consent for the present consideration of Senate Resolution 208, to which I have referred.

The PRESIDENT pro tempore. The Senator from Idaho asks unanimous consent for the present consideration of the resolution. The Secretary will read the resolution.

The reading clerk read the resolution (S. Res. 208) submitted by Mr. GOODING on April 10, 1924, and referred to the Committee to Audit and Control the Contingent Expenses of the Senate, as follows:

*Resolved*, That the President of the Senate pro tempore is authorized to appoint a special committee of three Members of the Senate to investigate and report to the Senate as soon as practicable the facts in respect of the activities of the War Finance Corporation in distributing loans and advances for agricultural and livestock purposes in the State of Idaho, and particularly any alleged favoritism shown in such distribution to FRANK R. GOODING, a Senator from the State of Idaho, or any member of his family, or any of his business associates.

The committee is authorized to hold hearings, to sit during the sessions and recesses of the Sixty-eighth Congress, and to employ such stenographic and other assistants as it may deem advisable. The committee is further authorized to send for persons and papers; to require by subpœna the attendance of witnesses, the production of books, papers, and documents; to administer oaths; and to take testimony. Subpœnas for witnesses shall be issued under the signature of the chairman of the committee. The cost of stenographic service to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of the committee shall be paid from the contingent fund of the Senate.

Mr. GOODING. I send to the desk a short letter from the War Finance Corporation, which I ask may be read, and then I shall have said my last word. I hope the Senate will take some action on the resolution.

The PRESIDENT pro tempore. The Secretary will read as requested.

The reading clerk read as follows:

(Personal)

WAR FINANCE CORPORATION,
*April 25, 1924.*

Hon. F. R. GOODING,
*United States Senate.*

MY DEAR SENATOR: Replying to your letter of April 22, would say that I do not find anywhere in our files any reference to an application made on behalf of the Canyon County Farm Bureau for a loan. If such an application was made, it would necessarily be made through one of the classes of financing organizations through which we are authorized under the law to make loans. Canyon County is within easy reaching distance of Boise, where the War Finance Corporation agency is located. Any inquiry made direct to this office would be referred to the local agency. I do not, however, find any correspondence from or in regard to the organization in question.

I find that on April 24, 1922, you wrote Hon. Dwight F. Davis, Director of the War Finance Corporation, and sent him letters from various Idaho people with regard to War Finance Corporation loans,

asking that the situation referred to be looked into. Congressman SMITH also wrote Mr. Meyer about the same time, and I find that Mr. Davis answered your letter the same day he received it. I think the matter referred to in that correspondence was all straightened out.

We do not, of course, know what inquiries may have been made of the Idaho agency, but I am satisfied that no one who approached the agency with reasonable security for an agricultural loan was discouraged or turned down. Possibly more banks could have applied for loans than did, but that is a matter over which the corporation had no control. The livestock loan companies in your State have been doing particularly good work. The last day or two a very considerable portion of the work of the corporation has been in the renewal and extension of loans of from $100 to $1,000, and averaging about $300, on dairy cows through the Northside Live Stock Loan Co. at Jerome.

Yours very truly, F. W. MONDELL.

P. S.—You will understand that this is not an official letter, but the facts are as stated.

F. W. M.

Mr. McKELLAR. Mr. President, I ask unanimous consent that the Committee to Audit and Control the Contingent Expenses of the Senate be discharged——

Mr. ROBINSON. Mr. President, I suggest to the Senator from Tennessee that the Senator from Idaho, as a matter of privilege, is entitled to have the resolution which he has presented disposed of.

Mr. McKELLAR. I was seeking to do that. I was about to ask unanimous consent that the Committee to Audit and Control the Contingent Expenses of the Senate be discharged from the further consideration of the resolution, and that the resolution be agreed to.

The PRESIDENT pro tempore. Unanimous consent is asked that the Committee to Audit and Control the Contingent Expenses of the Senate be discharged from the further consideration of the resolution presented by the Senator from Idaho and that it be immediately considered. Is there objection? The Chair hears none.

The question is on agreeing to the resolution.

The resolution was agreed to.

## POSTMASTERS AND POSTAL EMPLOYEES—VETO MESSAGE (S. DOC. NO. 149)

The PRESIDENT pro tempore. The Chair lays before the Senate a message from the President of the United States.

Mr. WALSH of Massachusetts. May I inquire if the message from the President is his veto of the postal employees' salary bill?

The PRESIDENT pro tempore. The Chair so understands, but the message will be read.

The message was read, and ordered to be printed as a Senate document, as follows:

*To the Senate:*

Herewith is returned, without approval, S. 1898, a bill "Reclassifying salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes."

This bill adds approximately $68,000,000 to the annual expenditures of the Government. It makes no provision for raising this amount as postal revenue. The money must come from the pockets of the taxpayers. To the extent that we create further obligations which must be met from the moneys derived from taxation, to that extent do we reduce the possibility of further reduction in taxes. Before such obligations are created it should be conclusively shown that they are essential in the best interests of the Nation.

Government extravagance must stop. The people of the Nation are paying all that it is possible for them to pay. I have taken my position in relation to Government economy, which I have stated and restated until it is well known. I feel that that position ought to be consistent. I do not see how I can approve the large increase in expenditure of this kind, except on the plea of urgent necessity. It may be that some adjustments would be justified, but an organized effort by a great body of public employees to secure an indiscriminate increase in compensation should have the most searching scrutiny. The needs of the public, the ability of the people to pay, must have some consideration. These salaries had been adjusted three times since 1918, the last time in 1920. Since then the cost of living has decreased, rather than increased.

The postal service rendered the public is good. The service conditions under which the employees perform their duties are probably more satisfactory than ever before in the history of the Post Office Department. The Government has been solicitous of the welfare of postal employees. Their compensation has been the subject of several recent legislative acts and adjusted to scales of pay as favorable as any in the public service. The act of July 2, 1918, increased the compensation of clerks and carriers in post offices and railway postal clerks $200 a year, and rural carriers $240 a year. In addition there were increases in compensation to a large number of the supervisory force. The act of November 8, 1919, further increased the compensation of postal employees from $100 to $200 per annum. This was followed by the act of July 5, 1920, which provided further increases in compensation ranging from $200 to $300 for clerks and carriers and railway postal clerks, and $260 for rural carriers. Substantial increases were also provided in the salaries of the supervisory force, ranging from $200 to $600 a year.

The effect of these increases in salary grades over those for the fiscal year 1918 was an increase of $600 to clerks and carriers in post offices, $500 to railway postal clerks, and $600 to rural carriers.

By reason of these increases the Government has paid out during the fiscal years from 1919 to 1923 an additional aggregate of $450,000,000 in salaries to postal employees above what would have been paid under the scale in effect before these changes, as follows:

| | |
|---|---|
| During the fiscal year 1919 | $33,202,600 |
| During the fiscal year 1920 | 68,901,000 |
| During the fiscal year 1921 | 110,756,000 |
| During the fiscal year 1922 | 114,256,000 |
| During the fiscal year 1923 | 123,256,000 |

It is apparent that the Government has dealt generously with this service.

As a result of these readjustments the average salaries for 1923 are—

Post-office clerks, $1,751, increase of $919 since 1909, or 110 per cent.

Post-office carriers, $1,752.83, increase of $862 since 1907, or 96 per cent.

Railway postal clerks, $2,107, increase of $946 since 1907, or 81 per cent.

Railway postal clerks, including travel allowance, $2,292, increase of $1,131 since 1907, or 97 per cent.

Rural carriers, $1,849.52, increase of $1,140 since 1907, or 160 per cent.

The average for all salaries of clerks now receiving from $1,140 to $2,040 per annum in the clerical, administrative, and fiscal services in all the departments in Washington will be approximately $1,554 on July 1, 1924, under the provisions of the classification act of 1923. It is thus seen that the lowest average of the salaries of the postal employees in the field service is nearly $200 more than the average for employees in the Government departments in Washington.

At the request of the committee which considered this legislation the Post Office Department made a special investigation of the range of salaries paid to persons employed in business institutions throughout the country and reported the results. These investigations covered representative cities ranging in population from 2,000 to over 5,000,000. It was found that in all cases of employees of a similar character the average salaries paid were much lower than those paid in the Postal Service.

The conditions under which employment is undertaken in the Postal Service and those under which it is undertaken in business are not altogether alike. The scale of salaries in the Postal Service should be sufficiently high to attract those who will make it a life work. This can not be done without providing for a salary high enough to enable the employee to take upon himself the obligations of citizenship and his place in society and render satisfactory service to the Government. Therefore it is just to pay to postal employees a scale of wages that is somewhat higher than the scale paid to employees in the business world.

I am informed there is generally no difficulty in maintaining lists of eligibles to fill vacancies. There are certain localities where difficulty exists, these localities being almost without exception large cities and industrial communities affected in the one case by high costs of living due to metropolitan conditions, and in the other case by the higher wage scale and living costs. But there are approximately 6,000 eligibles on the civil-service list at the present time to fill vacancies in the Railway Mail Service, and there were 25,000 applicants for the examination held throughout the country by the Civil Service Commission on May 3.

This bill increases the salaries of all postmasters excepting those at offices of the first class. It increases the salaries of supervisory officers in post offices, post-office inspectors,

and the officers of the Railway Mail Service $300 each, and in some instances more. It increases the salaries of clerks and carriers $300 each and of rural carriers on the average $293 for each carrier on a standard route. These increases apply alike to all classes of post offices. They ignore the fact that there is a wide difference in the cost of living in the larger cities and industrial centers as compared with the smaller cities and towns. If there is real need for revision of salaries in the Postal Service, it is to provide a wage differential for those employees serving in post offices located in the large cities and industrial centers. There is no justification for increasing salaries to apply to all offices when the need for such increases does not apply to a large number of the offices. Aside from this, no provision is made in this bill for raising the money which would be required to meet the additional expenditures which it proposes. Under its provisions we would be required to take an additional amount of approximately $08,000,000 per year from the moneys paid by the taxpayers and pass it on to the employees of the Postal Service. Certainly the interests of the people demand that any legislation increasing the cost of the Postal Service should give consideration to the raising of the moneys necessary to defray the additional cost.

For the fiscal year 1923 the postal revenues were $32,000,000 less than the cost of the service for that year. This deficit had to be met from the moneys paid by the taxpayers. We should not add to the amount of the postal deficit, as is proposed by this bill, but should attempt as a sound business principle to have the users of the mails approximately pay the cost of the service. The law gives the Postmaster General the power, with the approval of the Interstate Commerce Commission, to increase parcel-post rates. Even if the proposed increase of $68,000,000 contemplated by this bill was justified, it would not only be unfair to the users of the parcel post to recoup the whole amount in that manner, but it would be wholly impracticable to secure it from the parcel-post business without destroying that service. The farmers, who are the largest users of parcel post, are not in a position to contribute a large sum to the postal employees.

The Post Office Department is now engaged by direction of Congress in a cost ascertainment for which half a million dollars was appropriated. This inquiry has been prosecuted with diligence and is nearing completion. When the results of this inquiry are available they will form the basis for an intelligent consideration by the Postmaster General and by Congress of all questions relating to the adequacy of postage rates. They will afford a proper basis for consideration of the relation of the cost of the Postal Service and the revenues derived therefrom. The time has arrived to consider putting the Postal Service on a sound business basis, so far as expenditures and revenues are concerned. It is apparent that the matter of increasing the salaries of postal employees should be considered in connection with the ways and means whereby the postal revenues may be correspondingly increased, not apart therefrom. This report will be available when the Congress convenes in December, and this matter can then be considered.

If that provision stood alone, I should approve that part of the bill relating to campaign funds.

CALVIN COOLIDGE.

THE WHITE HOUSE, *June 7, 1924.*

REMISSION OF CUSTOMS DUTIES ON GOVERNMENT PROPERTY

Mr. KING obtained the floor.

Mr. SMOOT. Mr. President, will my colleague yield to enable me to report a House bill?

Mr. KING. If I do not lose the floor.

Mr. SMOOT. If there is the least objection to it, I will withdraw it.

Mr. KING. If it is privileged, I yield.

Mr. SMOOT. Mr. President, last evening the House passed House bill 9111, a bill directing the remission of customs duties on certain property of the United States imported by the War Department. The War Department has imported $616,696,731 of war material into the United States. In order to give the customs officials legal authority for free entry of all dutiable supplies so returned, I ask that this bill, passed by the House yesterday, be considered and passed here.

Mr. KING. Mr. President, if I do not lose the floor, I yield.

The PRESIDENT pro tempore. The Chair was about to state the question when the Senator from Utah arose. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding?

Mr. KING. Mr. President——

The PRESIDENT pro tempore. Is there objection to the unanimous-consent request of the senior Senator from Utah?

Mr. KING. I shall not yield for that purpose if it jeopardizes my right to hold the floor.

The PRESIDENT pro tempore. The Chair will hold that the Senator from Utah retains the floor.

Mr. KING. I have no objection, then.

The PRESIDENT pro tempore. The Chair hears no objection.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 9111) directing the remission of customs duties on certain property of the United States imported by the War Department, which was read, as follows:

*Be it enacted, etc.,* That the Secretary of the Treasury is authorized and directed to remit all unpaid customs duties on material belonging to the United States and heretofore imported into the United States by the War Department.

Mr. WALSH of Massachusetts. Mr. President, I should like to inquire what is the nature of the property that has been imported by the War Department, in a general way?

Mr. SMOOT. I will tell the Senator. From France, between November 11, 1918, and November 11, 1919, there were imported airplanes and spare parts, balloons and balloon supplies, aviators' clothing, hydrographic and photographic material, to the extent of $29,997,120.

Mr. WALSH of Massachusetts. Is it new material purchased abroad?

Mr. SMOOT. No.

Mr. WALSH of Massachusetts. It is material the Government has had in France and is bringing back?

Mr. SMOOT. That is exactly what it is.

Mr. WALSH of Massachusetts. So there is no new material involved?

Mr. SMOOT. Not a dollar's worth.

Mr. WALSH of Massachusetts. I have no objection.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ORDER OF BUSINESS

The PRESIDENT pro tempore. The Chair desires to say, without taking the Senator from Utah off the floor, that it is within the power of the Senate, if it so desires, to fix some other time for the consideration of the veto message.

Mr. KING. I do not yield for that purpose.

Mr. President, a few days ago, as I was proceeding to state, the Senate passed——

Mr. BURSUM. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from New Mexico?

Mr. KING. I yield for a question, if I do not jeopardize my standing.

Mr. BURSUM. Will the Senator yield to permit me to take up a conference report?

Mr. KING. Mr. President, is that privileged?

Mr. BURSUM. Yes.

Mr. KING. Will the conference report have a privileged status?

The PRESIDENT pro tempore. The conference report is privileged for the purpose of presenting it.

Mr. McKELLAR. Mr. President, if the Senator yields the floor for that purpose, it will take him off the floor.

Mr. KING. Then, if that is true, I should not care to yield for that purpose.

Mr. McKELLAR. That is what it will do.

The PRESIDENT pro tempore. The Senator declines to yield.

Mr. BURSUM. Did I understand the Senator to yield or not to yield?

Mr. KING. I was advised, in response to what the Senator said, that if I should yield I would lose the right to the floor upon the conclusion of the consideration of that report, and in view of that fact I can not yield. I regret it, because I should be glad to yield.

The PRESIDENT pro tempore. The Chair did not hold that.

Mr. KING. I beg the Chair's pardon.

The PRESIDENT pro tempore. The Senator from Tennessee held that.

Mr. KING. May I inquire of the Chair, because I feel that conference reports are entitled to consideration, whether I will jeopardize my right to resume the floor if I yield for the consideration of a conference report?

The PRESIDENT pro tempore. The Chair is of the opinion that the veto message is the question before the Senate until

it is otherwise disposed of, and that the Senator would not lose his right to the floor by yielding for the purpose of considering the conference report, assuming it is done by unanimous consent.

Mr. McKELLAR. If it takes unanimous consent, I object.

The PRESIDENT pro tempore. It does not take unanimous consent to present the report. It requires the action of the Senate to proceed to the consideration of the report.

Mr. ROBINSON and Mr. BURSUM addressed the Chair.

The PRESIDENT pro tempore. The Senator from Arkansas.

Mr. KING. I yield to the Senator from Arkansas for a question.

Mr. ROBINSON. The Senator from Tennessee [Mr. McKELLAR] indicated a few moments ago that he desired to request consideration of unobjected bills upon the calendar under Rule VIII for a period of two hours. I am wondering if an arrangement of that kind can be effected. I am not submitting any request for unanimous consent. I understand he intends to do so.

The PRESIDENT pro tempore. The Senate will be in order.

Mr. ROBINSON. Would the Senator from Utah object to an arrangement by which the Senate could proceed, after the consideration of the conference report, to the consideration of unobjected bills on the calendar under Rule VIII for a period of two hours? I have no right to submit the request in the Senator's time unless he yields for that purpose.

Mr. KING. I should be very happy to, with the consent of the Senator from Maine, but I feel under moral obligations to carry out a promise which I made, so I can not, without his consent.

Mr. NORRIS. May I interrupt the Senator?

Mr. KING. I yield to the Senator for a question.

Mr. NORRIS. I wanted to ask the Senator if he would not be willing to yield so that we could have morning business? We adjourned last night, and there are a few reports of committees ready for submission. I know I am interested in one from the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. ROBINSON. I suggest——

Mr. KING. I yield to the Senator from Arkansas for a question.

Mr. ROBINSON. That we can have morning business disposed of without regard to the desire of the Senator who has the floor.

Mr. NORRIS. I do not want to take the Senator off his feet.

Mr. ROBINSON. The Senator would not want to interfere with the morning business?

Mr. KING. No.

Mr. NORRIS. I would rather have an understanding in regard to it.

Mr. KING. Let me say to the Senate, in all candor, that a bill was passed the other day, the naval bill, authorizing the expenditure of a very large sum of money. It was passed at a time when, in my judgment, it should not have been passed. There was no opportunity given for several of us who desire to debate it to present our views. The Senator from Idaho [Mr. BORAH] was here on guard—if I may use the expression—and I left the Chamber only for a moment, with the understanding that the Senator from Idaho would remain here——

Mr. ASHURST. Will the Senator yield to me at that juncture?

Mr. KING. Let me complete the sentence. I understood the Senator from Idaho would remain here, for the purpose of objecting to the passage of the bill at that time, or obtaining sufficient time for reasonable debate. The Senator from Idaho asked the leader upon the other side, the Senator from Kansas [Mr. CURTIS], whether anything would be taken up after the conclusion of the bill then under consideration, and I am advised by the Senator from Idaho that the information was conveyed to him that the Senate would proceed immediately to the consideration of executive business.

Mr. BORAH. Just a moment.

Mr. KING. I yield.

Mr. BORAH. The situation, as I understood it, was this, that the naval bill was to be made the unfinished business, and then, after it was made the unfinished business, we were to take up executive business.

Mr. KING. I am glad to be corrected. At any rate, the Senator from Idaho received such assurances that he felt perfectly at ease, and left the Chamber. I returned to the Chamber within five or six minutes and discovered that the bill had been passed without a moment's consideration. Perhaps its title was read.

Mr. HALE. Mr. President——

Mr. KING. I thereupon moved to reconsider the vote by which the bill had passed, and the motion for reconsideration is pending.

I stated to the Senator from Maine, as he had a right, of course, to have the motion for reconsideration disposed of at an early date, that I would seek recognition this morning, and that if I should be recognized I would proceed to a discussion of that bill and such other discussion as I might feel disposed to indulge in. I have in good faith sought recognition——

Mr. ROBINSON. I inquire of the Senator from Utah if he would just as leave proceed after morning business has been disposed of?

Mr. KING. I would be very glad to.

Mr. ROBINSON. I call for the regular order.

Mr. KING. It would accommodate me very much, for the reason that a very important committee is now waiting for me; but I can not do it, under the promise I made to the Senator from Maine, unless he will release me from that promise, and if he will assent to an arrangement by which we may proceed to the consideration of unobjected bills during the morning hour, or look after the business of the morning hour, and that I can take the floor then, I shall be very glad to accede to the request of the Senator from Arkansas.

Mr. HALE. Mr. President, I think, in view of what has been said about the bill for the construction of new cruisers and for other purposes, to which the Senator has alluded, I will make an explanation about how the bill happened to go through without debate. Early last week I secured a special order whereby that bill took its place upon the calendar——

Mr. KING. Does the Senator ask me to yield?

Mr. HALE. I ask the Senator to yield.

Mr. KING. I can not yield. The Senator can make his explanation in his own time.

Mr. NORRIS. I rise to a point of order.

The PRESIDENT pro tempore. The Senate will be in order.

Mr. ROBINSON. I call for the regular order.

Mr. NORRIS. I want to call the attention of the Chair to the fact that the Senator from Arkansas has demanded the regular order.

The PRESIDENT pro tempore. The regular order at the present moment is the consideration of the President's veto message.

Mr. NORRIS. The regular order is morning business, Mr. President.

Mr. ROBINSON. It is the disposition of the morning business. The Senate adjourned last evening, and the regular order is the morning business. I make a point of order that the regular order of business is the morning business of the Senate, under the rules of the Senate.

The PRESIDENT pro tempore. Does the Senator from Arkansas remember the clause in the Constitution which makes it the duty of Congress to proceed to the consideration of the message, unless—although the Constitution does not so declare—the Senate or the House of Representatives shall otherwise dispose of the matter? The Chair recognizes that it is within the power of the Senate to refer the message, or to postpone its consideration to another time, but the Chair has no option in regard to what he must do if there is no other disposition of the matter.

Mr. STERLING. Mr. President——

Mr. KING. I have the floor.

Mr. STERLING. Will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Utah yield?

Mr. KING. For a question. May I say that I shall not yield if in any manner my right to maintain the floor is jeopardized. I shall be happy to yield whenever I can do so, with that reservation.

Mr. STERLING. I do not believe it would take the floor from the Senator; at least, I would like to have an understanding that it does not take the Senator from the floor. But, Mr. President, I wanted to make a motion relative to the veto message of the President on the postal salaries bill. I make that motion. If the Senator from Utah will yield for that purpose.

Mr. KING. A parliamentary inquiry, in my own time. If I yield for the purpose of permitting the Senator from South Dakota to move to refer this message to the appropriate committee, do I lose my right to retain the floor after the disposition of that motion?

The PRESIDENT pro tempore. The Chair is of opinion that the Senator would not lose his right to retain the floor, but it would be subject to a demand for the regular order.

Mr. KING. May I inquire of the Senator from South Dakota whether the motion which he would like to make, and which I have yielded for him to make, will lead to any debate?

Mr. STERLING. I think not. I do not think it will. At least, I shall not want to debate the motion, and I hardly think it will lead to debate. It may.

Mr. KING. I dislike to make these qualifications, but I feel compelled to. If there will be no debate, if the motion will go pro forma, and the message be referred to the appropriate committee, and I do not lose my right to retain the floor, I shall be glad to yield for that purpose.

Mr. WALSH of Massachusetts. Mr. President——

Mr. LODGE. The regular order has been demanded.

Mr. WALSH of Massachusetts. I do not think any Senator can agree that there will be no debate on an important matter.

Mr. STERLING. Mr. President——

Mr. KING. Mr. President, I am afraid I shall have to decline to yield.

Mr. STERLING. The subject of the President's veto——

Mr. KING. I yield for a question.

Mr. STERLING. The postal salaries bill is before the Senate, as I understand it, the President of the Senate being about to submit to a vote of the Senate the question as to whether the bill should pass or not, the President's veto to the contrary notwithstanding. My motion is—and I make it now—that the veto message of the President on the postal salaries bill——

Mr. KING. I did not yield for that purpose.

Mr. STERLING. Be referred to the Committee on Post Offices and Post Roads.

The PRESIDENT pro tempore. The Senator refuses to yield for that purpose.

Mr. HARRISON. Before the Senator takes his seat——

The PRESIDENT pro tempore The Senate will be in order.

Mr. ROBINSON. Mr. President——

The PRESIDENT pro tempore. The Senator from Arkansas.

Mr. KING. I yield to the Senator from Arkansas for a question.

Mr. ROBINSON. Mr. President, I have demanded the regular order and suggested to the Chair that the regular order is the consideration of morning business. There is nothing in the Constitution that prescribes the time or manner in which either House of Congress shall proceed to the consideration of a veto message.

Mr. KING. Will the Senator pardon me just a moment? I presume the Senator from Arkansas is rising to a parliamentary inquiry, and that, of course, would not take me from the floor, and with that understanding, I yield.

Mr. ROBINSON. I make the point of order that the regular order is the transaction of morning business under the rules of the Senate. There is nothing in the Constitution that contravenes that position. The practice of the Senate and of the House of Representatives is to proceed to the consideration of executive messages at the pleasure of the respective bodies. The Constitution does not require that upon the presentation of a veto message the same shall be immediately considered, and the practice has never been to do that. A veto message may be deferred, and under the rules of the Senate the proper procedure is the consideration of morning business, and in that contention the Senator from Massachusetts agrees with me absolutely.

Mr. NORRIS. Mr. President, on that point I would like to read——

Mr. KING. I yield——

Mr. NORRIS. An extract from the Constitution.

Mr. KING. For a parliamentary question.

Mr. NORRIS. It bears on the parliamentary situation.

Mr. KING. Yes.

Mr. NORRIS. The language I am about to read is in section 7, Article I, of the Constitution, and speaking of the duty of the President in signing a bill or returning it with his objections, this language is used:

> If he approve he shall sign it, but if not he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their Journal and proceed to reconsider it.

It seems to me technically right to say, under the Constitution, that we have no right to consider it except by unanimous consent until these objections of the President have been entered on the Journal.

Mr. ROBINSON. Clearly that is true.

Mr. NORRIS. That has not yet been done.

Mr. ROBINSON. We could not even consider it now if the Senate desired to do so, upon objection. A motion to proceed to the consideration of the Executive message would be defeated upon a point of order that the objections have not been entered upon the Journal, because the Constitution itself requires that the message shall not be considered until the objections shall have been entered on the Journal, and that has not been done. It could not have been done, because the message has just reached the Senate.

Mr. NORRIS. It has not even been printed.

The regular order of business is the morning business of the Senate, and I make the point of order and demand the regular order, which is that the Senate proceed to morning business. When the clerk shall have informed the Chair that the objections of the President have been entered in full on the Journal, then it will be in order for some Senator to move to consideration of the Executive veto message, but not until that has been done, under the express terms of the Constitution.

Mr. STERLING and Mr. KING addressed the Chair.

The PRESIDENT pro tempore. The Chair is inclined to believe that the point of order now made is well taken and that the bill shall not be reconsidered until the objections of the President shall have been entered on the Journal.

Mr. KING and Mr. STERLING addressed the Chair.

The PRESIDENT pro tempore. Will Senators allow the Chair to rule?

Mr. KING. With very great deference, of course.

The PRESIDENT pro tempore. Therefore the veto message is not before the Senate at this time. On the demand for the regular order, the Chair holds that the regular order is the presentation of petitions and memorials.

Mr. KING and Mr. STERLING addressed the Chair.

The PRESIDENT pro tempore. The Senator from Utah is recognized.

Mr. KING. I presume at the close of the morning hour I will be entitled to consideration at the hands of the distinguished Presiding Officer?

The PRESIDENT pro tempore. The Chair pledges nothing to the Senator from Utah upon that point. The presentation of petitions and memorials is in order.

Mr. STERLING. Mr. President, I desire to withdraw for the present the motion made a moment ago.

Mr. ROBINSON. I demand the regular order.

The PRESIDENT pro tempore. The Chair has called for the regular order.

Mr. ROBINSON. Very well. I suggest that it be enforced.

The PRESIDENT pro tempore. The presentation of petitions and memorials is in order. There being none, reports of committees are in order.

### DISTRICT COURT CLERKS' FEES

Mr. BRANDEGEE. From the Committee on the Judiciary I report back favorably, without amendment, three House bills, and I call the attention of the Senator from Pennsylvania [Mr. PEPPER] to one of them. I desire to state that the committee has previously reported identically the same bills that are now upon the Senate Calendar. These bills came over from the House as passed by the House, and the committee has been polled and authorized their report, because they have already reported the same bills. The Senator from Pennsylvania desires to make a motion.

Mr. PEPPER. After the bills have been reported——

The PRESIDENT pro tempore (rapping for order). The Senate must be in order. Proceedings can not go on until the Senate is in order. Will Senators who are on their feet take their seats and will the bystanders take the seats provided for them? The Senate must be in order.

Mr. PEPPER. After the bills have been reported I shall ask the indulgence of the Senate to make a very brief statement in explanation of them.

The PRESIDENT pro tempore. Is there objection to a statement being made by the Senator from Pennsylvania?

Mr. ROBINSON. What is the request?

Mr. FLETCHER. Has there been unanimous consent granted for consideration of the report?

Mr. BRANDEGEE. I reported the bill from the Committee on the Judiciary.

Mr. ROBINSON. And now is it proposed to get unanimous consent to consider three of them at once?

Mr. BRANDEGEE. No. If the Senator will allow me, they are very short bills that have been passed by the House and have been previously reported to the Senate by the Judiciary Committee, and it was thought that the Senate should pass the House bills. It ought to take only a moment.

Mr. ROBINSON. It is a question of unanimous consent before either the Senate or the House bills can be considered?

Mr. BRANDEGEE. Oh, certainly.

Mr. PEPPER. I merely did not wish to interrupt the process of reporting the bill. I am going to make a request for unanimous consent when it has been reported.

The PRESIDENT pro tempore. The Clerk will state the title of the first bill.

The READING CLERK. A bill (H. R. 5420) to provide fees to be charged by clerks of the district courts of the United States.

Mr. KING. Mr. President, I think that should go to the calendar.

Mr. PEPPER. I ask unanimous consent for the immediate consideration of the measure, and crave the indulgence of the Senator from Utah, if he has the floor, to make this brief statement respecting it.

The PRESIDENT pro tempore. The Senator from Pennsylvania has the floor.

Mr. PEPPER. A series of bills relating to practice in the offices of clerks of the United States courts throughout the country were introduced into both Houses at the request of the American Bar Association. The bills were referred in both Houses to the Judiciary Committee, in both Houses were reported out unanimously, and three of those bills have now passed the House, and are the three which have just been referred to by the Senator from Connecticut.

Mr. ROBINSON. Mr. President, may I ask the Senator a question?

Mr. PEPPER. I yield to the Senator from Arkansas.

Mr. ROBINSON. Why were they embraced within three bills instead of one bill?

Mr. PEPPER. Each of the bills relate to a distinct and specific subject matter.

Mr. ROBINSON. Let us take them one at a time.

Mr. PEPPER. That is what I am proposing to do. Only one of the bills has been reported, and it is to that one that I am addressing myself.

Mr. SHIELDS. Mr. President, is this the bill that proposes to give the Supreme Court power to make rules for legal proceedings at law as they have now made them in equity?

Mr. PEPPER. Not at all, Mr. President. The bill relates merely to a matter affecting the convenience of practitioners in courts of the United States, substituting a different arrangement of fee bills for that which now exists, simplifying the accounting, and making certain what the charges are that the clerks are to make to suitors in United States courts.

Mr. SHIELDS. I object to the consideration of the bill. Let the bill go over. There are several bills that have been reported on that subject from the American Bar Association, and I shall object to all of them.

The PRESIDENT pro tempore. Debate at this time is not permissible. Is there objection to the request of the Senator from Pennsylvania?

Mr. ROBINSON. The Senator from Tennessee objects to all the bills.

Mr. SHIELDS. I object to the consideration of the bill.

The PRESIDENT pro tempore. Objection is made, and the regular order will be resumed. Are there further reports of the committees?

REPORTS OF COMMITTEES

Mr. BRANDEGEE, from the Committee on the Judiciary, to which were referred the following bills, reported them severally without amendment:

A bill (H. R. 5423) to amend section 2 of the act of August 1, 1888 (25 Stat. L. p. 357); and

A bill (H. R. 5425) to provide for the disposition of moneys paid to or received by any official as a bribe, which may be used as evidence, in any case growing out of any such transaction.

Mr. SMITH, from the Committee on Interstate Commerce, to which was referred the bill (S. 3394) to amend section 26 of the interstate commerce act, as amended, reported it with amendments.

Mr. CAPPER, from the Committee on Claims, to which was referred the resolution (S. Res. 227) to authorize an adjustment of the claim of the city of New York for expenses incurred on behalf of the United States during the Civil War, reported it with an amendment.

Mr. KEYES, from the Committee to Audit and Control the Contingent Expenses, to which were referred the following resolutions, reported them each without amendment:

A resolution (S. Res. 244) continuing until the end of the Sixty-eighth Congress the employment of an assistant clerk to the Committee on the District of Columbia; and

A resolution (S. Res. 250) authorizing payment to Emma B. Woods, widow of the late Elliott Woods.

ENROLLED BILLS PRESENTED

Mr. WATSON, from the Committee on Enrolled Bills, reported that on June 6, 1924, that committee presented to the President of the United States an enrolled bill and a joint resolution of the following titles:

S. 966. An act for the continuance of construction work on the San Carlos Federal irrigation project in Arizona, and for other purposes; and

S. J. Res. 142. Joint resolution providing for the United States Government to have representation at the celebration of the centennial of the first meeting of the Legislative Council of the Territory of Florida.

REPORTS OF COMMITTEE ON CONTINGENT EXPENSES

Mr. KEYES. From the Committee to Audit and Control the Contingent Expenses of the Senate I report back favorably without amendment Senate Resolution 248, submitted by the Senator from Wisconsin [Mr. LA FOLLETTE]; Senate Resolution 250, submitted by the Senator from Wyoming [Mr. WARREN]; Senate Resolution 244, submitted by the Senator from Delaware [Mr. BALL]; Senate Resolution 251, submitted by the Senator from Nebraska [Mr. NORRIS]. I also report back favorably with an amendment Senate Resolution 241 submitted by the Senator from Oklahoma [Mr. HARRELD], and Senate Resolution 249, submitted by the Senator from South Dakota [Mr. NORBECK], also with an amendment.

The PRESIDENT pro tempore. The resolutions will go to the calendar.

TRI-COUNTY SUPPLEMENTAL WATER PROJECT, NEBRASKA

Mr. NORRIS. Mr. President, I ask unanimous consent for the immediate consideration of the one resolution just reported as submitted by me, Senate Resolution 251. It will not do any good if it goes to the calendar, as will be seen when the resolution is read. To accomplish anything at all it must be passed now.

Mr. KING. Let the resolution be read.

The PRESIDENT pro tempore. The resolution will be read for the information of the Senate.

The principal clerk read the resolution (S. Res. 251), submitted yesterday by Mr. NORRIS, as follows:

Whereas in the Sixty-seventh Congress a Senate joint resolution (S. J. Res. 215) was approved September 22, 1922, as follows:

"*Resolved, etc.*, That the Secretary of the Interior, upon the payment to him in advance of the necessary funds to defray the expenses thereof, be, and he is hereby, authorized to make an additional investigation of the tricounty project in Nebraska, comprising the counties of Gosper, Phelps, and Kearney, in said State, and to extend said investigation into Adams County, Nebr., with a view of ascertaining whether it is practicable to convey for irrigation purposes flood waters from the Platte River onto lands in said counties";

And—

Whereas in accordance with such resolution a survey of said tricounty project in Nebraska has been made by the Bureau of Reclamation, and the expenses of such survey and investigation amounting to more than $15,000 have been paid for by the State of Nebraska and the citizens living in the vicinity of said project: Now, therefore, be it

*Resolved*, That the Committee on Irrigation and Reclamation be authorized to appoint a subcommittee to visit the tricounty project in Nebraska during the recess of Congress and report to the full committee on the practicability of said project and the advisability of installing the same. There is hereby appropriated out of the contingent fund of the Senate the sum of $300 for the purpose of defraying the expenses of said investigation.

The PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution was considered by unanimous consent and agreed to.

Mr. NORRIS. Before we leave the subject, I ask unanimous consent to insert in the RECORD as a part of my remarks, so that Senators can read it, a report on the project made by Professor Burr, of the Nebraska State University.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

TRICOUNTY SUPPLEMENTAL WATER PROJECT

(By Prof. W. W. Burr of Nebraska University)

This report summarizes briefly some of the agricultural aspects, concerning the feasibility of supplemental irrigation in the area now generally known as the Tricounty Project in Central Nebraska. It does not consider any engineering features of the project, which involve the type, manner, and cost of construction of laterals, canals, and storage. Naturally the feasibility of the entire project depends upon the delivery of water to the land at reasonable cost.

The distinctive feature of this project is that it lies well within the subhumid area where the rainfall is almost, but not quite, sufficient for the satisfactory production of crops. There is needed a supplementing supply of water to insure more certain and profitable production. The early contemplation of this project was to meet the deficiency of rainfall entirely through the storage of water in the subsoil. This project is, therefore, a departure from the usual custom of establishing irrigation projects under recognized arid conditions and it takes into consideration the possibilities of subsoil storage of water. Certain questions concerning the feasibility of the project have arisen. These questions are, first: The average deficiency of rainfall during the growing season; second, whether or not the subsoil will hold sufficient water to make up the rainfall deficiency; third, what increase in crop production may be expected from supplemental irrigation. This brief report will be an answer to these questions. More detailed information concerning soils, climate, crop yields, and the value of supplemental water is found in a complete report written by Mr. A. Lincoln Fellows, of the United States Department of Agriculture.

Location of project: This project is located in south-central Nebraska, comprising portions of Adams, Kearney, Phelps, and Gosper Counties. It lies between north latitudes 40° 20″ and 40° 40″, and west longitudes 88° 15″ and 99° 35″. It is bounded on the north by the breaks of the Platte River which are irregular, more or less sandy and unirrigable. On the south and west it is bounded by highly dissected and eroded portions of the plain, locally known as Canyon Lands. On the east it expands into a comparatively level plain of rather heavy textured soil. It is approximately 65 miles in length, east to west, and from 10 to 20 miles in width and comprises some 500,000 acres of irrigable land.

Topography: The project lies on an extensive upland prairie table, the surface of which is flat to slightly undulating; natural drainage is fairly well established in the eastern portion of the area but in the western portion the drainage is into depressional areas or basins which as yet have not established complete drainage outlet to the rivers.

Elevation: The elevation is from 1,900 feet above sea level in the eastern portion of the area to 2,600 feet above sea level in the western portion of the area, the slope to the east being approximately 8 feet per mile, with a less abrupt slope southward toward the Republican River valley.

CLIMATE

The project lies in what is known as the subhumid area between the humid and the arid districts. Of the several climatic factors that influence crop production the rainfall alone throughout this area makes crop production hazardous. Drought, resulting either from an insufficient total supply of rainfall or from a very unfavorable distribution of the rainfall that does come is of frequent occurrence. These periods of drought, coupled with the loss of a considerable portion of the virgin fertility of the soil, combine to give quite generally low yields of crops. The crop record for the past 20 years shows that in not more than one year out of five are profitable crops produced.

The temperature ranges from a mean of 24.4° for January to a mean of 75.9° for July, with rare extremes as low as 40° below and 110° above. The growing season, or frost-free period, is sufficient for the production of all crops common to the general territory. The relative humidity is a little lower than in eastern Nebraska, which tends to decrease somewhat the efficiency of a given amount of rain. It is only during periods of drought and high winds that the temperature, wind velocity, and relative humidity become injurious to crop production. During such periods they combine to greatly increase the rate of transpiration and the consequent demand of the crop for water. If the soil is lacking in moisture injury results. The amount of damage depends upon the dryness of the soil and length of time such unfavorable conditions obtain.

Precipitation: Rainfall is the one great limiting factor to crop production within the area. Not only is the total amount generally insufficient for good crop yields, but the distribution is uncertain and frequently very unfavorable. Droughts of greater or lesser severity are frequent, occurring almost every year, and in the main, during the past 20 years, have resulted in unprofitably low yields. While the rainfall is probably as favorable as formerly, there has been a gradual loss of organic matter from the cultivated soil, which has made the rainfall less efficient and has resulted in a gradual decline in crop yields. The difficulty of putting the land to grass or legumes under a limited rainfall makes the maintenance of the organic content of the soil almost impossible.

INADEQUACY OF PRESENT RAINFALL

The mean annual rainfall at Holdrege, Minden, and Hastings Government weather stations are 23.35, 24.05, and 25.42 inches, respectively, and average 24.27 inches for the three stations. The average annual precipitation of the three stations has varied in the 20 years, 1904 to 1923, from a minimum of 18.27 in 1921 to a maximum of 40.46 inches in 1915. In 20 years 14 years have been below normal, averaging — inches. The 6 years above normal have averaged — inches. The variation in average annual rainfall at the three stations is shown in Figure I.

The rainfall in the area is of the continental type, the periods of minimum and maximum rain being in winter and summer, respectively. Figure II shows the distribution of the average rainfall at the three stations by months, — inches of rainfall during the six summer months, April 1 to September 30. May and June are, on the average, the wettest months.

In order to show the adequacy or inadequacy of a 24-inch annual rainfall, more than two-thirds of which falls during the growing season, it is necessary to take a number of things into consideration, in particular, the nature of the rainfall and the frequency and severity of rainless periods.

NATURE OF THE RAINFALL

To determine the nature of the rainfall rains have been divided into four classes, viz: (1) 0–24 inches, light showers, invariably valueless; (2) 0.25–0.49 inches, medium showers, generally valueless, especially when falling as an isolated rain between April 1 and October 31; (3) 0.50–0.99 inches, light rains; (4) 1 inch and over. The two latter classes of rains have more or less value, depending upon their frequency, and together make up the effective precipitation of the region.

Chart G [omitted in RECORD] shows the distribution of the four classes of rains in winter and summer at Holdrege, based on 20 years' records. The months included in the winter period are October to March, inclusive, and the months included in the summer are April to September, inclusive. At Holdrege 78.6 of the total precipitation comes during the six summer months; 13.60 inches of the total 23.35 inches falls in rains of over 0.50 inch during the summer. About half the years are above the average and half below.

FREQUENCY OF THE DROUGHT PERIODS

One of the peculiarities of the section of the Great Plains in which this project is located is the frequent occurrence of prolonged dry periods, during which little or no rain falls. These periods are usually terminated by a succession of heavy rains, which make an average of the rainfall by months over a period of years appear favorable to the country, whereas many a single season may have been disastrous in one way or another.

The periods during which crops are most affected by shortage of moisture may be described as follows:

1. April 1 to May 15. High winds which drift the loose, dry soil and uproot small grains occur frequently and often are responsible for reduced yields of wheat, even when succeeding moisture conditions are highly favorable. The germination and early growth of oats is more or less seriously affected by shortage of rain during this period. Unless the soil be well filled with moisture, a period of 30 days at this season, during which little or no rain falls, may ruin all prospects for a good crop of wheat or oats. Occasionally such periods are made more serious by the winter being unusually open and dry.

2. May 15 to July 1. Brisk winds which increase the evaporating powers of the air are frequent. Occasionally early June is excessively hot, which causes wheat and oats to "fire" while in the bloom or milk stage, unless the soil is adequately filled with water. During this period wheat and oats are making their heaviest draft on soil moisture. Excessive dryness of the surface soil at this period is unfavorable for germination and early growth of corn. Unless a soil be filled with moisture to a depth of 4 feet or more, a period of 30 days with little or no rainfall coming at this season may be disastrous for the wheat and oat crop.

3. July 1 to August 21. High temperatures reaching 100° to 108° can be expected during this period. Hot winds coming around August 1 may do serious damage to corn when it is tasseling or silking. During this period corn is transpiring water often at the rate of a quarter inch of rainfall daily. A period of 30 days during which little or no rain falls coming at this season may ruin a corn crop, unless the soil be well filled with water to the full depth of root penetration.

4. August 21 to October 31. During the first half of the season the land is being prepared for winter wheat. A rainless period at this time seriously interferes with tillage operations and leads to delayed work and poor seed-bed condition. Seeding, which should normally be over by October 1, must occasionally be postponed until adequate rains come to insure its germination and growth. It is highly important that the soil be filled with water to a depth of 3 feet or more if wheat is to enter the winter with good prospects and escape the hazards of winds in early April. A period of 30 days either in the first or the last part of this season during which little or no rains fall is often a serious handicap in the succeeding year's wheat crop.

Periods of 30 days or more coming between April 1 and October 31 and during which no rain at all falls are not common in this section, but periods of 30 days or more during which no effective rain falls occur in about one year in two. Periods of 30 days or more during

which less than 1 inch of effective rain falls are very common. There has not been a single year in the last 20 years at either Hastings, Minden, or Holdrege in which such dry periods have not occurred from one to four times between the dates of April 1 and October 31.

Tables 1, 2, and 3 show the frequency of dry periods at Hastings, Minden, and Holdrege. A dry period is considered as being a period of 30 days or longer during which less than 1 inch of effective rain has fallen. By effective rain is meant any rain of over 0.30 inch or rains of over 0.25 inch coming on consecutive days. The experience of workers in the Great Plains has been that daily precipitation of less than 0.30 inch is generally valueless from the standpoint of breaking a drought. At Hastings in the last 20 years 42 dry periods have occurred, averaging 46 days each and during which only 0.56 inch effective precipitation occurred. At Minden 44 such periods have occurred, averaging 44 days each, with 0.41 inch effective rains. At Holdrege 48 dry periods have occurred, averaging 48 days each, with 0.47 inch of effective rainfall.

The distribution of dry periods is shown in Charts 4 and 5 [omitted in RECORD]; these charts also show graphically the yield of corn and wheat during the same years. The seriousness of the dry period of over 40 days will depend upon conditions of moisture preceding the drought and when the dry period begins and ends. However, when such dry periods come as frequently as they do in central Nebraska it is probable that damage results almost every year.

TABLE NO. 1.—*Frequency of dry periods at Hastings*

| Year | Period | Length (days) | Total rainfall (inches) | Effective rainfall | |
|---|---|---|---|---|---|
| | | | | Inches | Date |
| 1904 | Apr. 26–May 31 | 36 | 1.64 | 0.85 | May 4 |

INADEQUACY OF RAINFALL FOR CORN PRODUCTION

That a period of drought coming between July 1 and August 21 may ruin a corn crop is well known to all farmers in central Nebraska. That such a disaster can be averted or at least mitigated to a considerable extent by adequate moisture up to July 1 is not so well understood.

If the subsoil is well filled with water on July 1, as would be the case if rainfall during the preceding spring and fall had been heavy, a good crop of corn can usually be expected. Only most extreme drought coming at the most critical state in the plant's development can bring about serious damage. Table No. 4 shows the correlation of

the effective rainfall which has gone to produce the corn crops with yield in Adams and Phelps Counties since 1905, the data being arranged in descending order of yields, not chronologically. The same data are shown graphically in chart. It is obvious that the effective rainfall during fall and spring up to July 1 is what determines the yield of corn. The only exceptions have been the years 1907, 1913, and 1918, when with adequate moisture on the soil for a good crop, a seriously reduced yield was caused by extremely dry and hot weather in July and August.

TABLE NO. 4.—*Correlation of the yield of corn with effective rainfall in Adams and Phelps Counties, Nebr.*

[Effective rainfall=total rains of over 0.50 inch during the months of September, October, November, April, May, June, and July]

VALUE OF SUPPLEMENTAL WATER

Supplemental irrigation contemplates the application to the soil of sufficient water to make up the difference between the crop requirements and the rainfall. The water may be applied either before the crop is seeded and held in storage in the subsoil, or as a direct application to the growing crop. The fact that a deficiency of rainfall can in a large measure be met by water stored in the soil is generally recognized. The experience of farmers in the Great Plains has been that in those years when they had a considerable amount of water in the soil at seeding time, either as carry over from the previous year or from early spring rains, they were much more certain of satisfactory yields than in the years when the seeding period found the entire soil dry. In the latter case the crop is entirely dependent upon opportune rains, while a reserve supply of water tends to carry the crops through the dry period. For several years farmers near Lexington, Nebr., have been practicing supplemental irrigation and report greatly increased yields of crops from the practice.

The value of water stored in the soil has also been demonstrated by many experiment stations. At North Platte Experiment Station it has been found that an abundance of water in the subsoil is a great protection to the crop against drought, the protection being in almost exact proportion to the total available soil water within reach of the crop. This was found particularly true for the small grains. In the drier years, during the 16 years that the station has been under operation, the water stored by summer tillage has more than doubled the yield of winter wheat, as compared to winter wheat following small grain. Several years during this time only 2 or 3 feet of soil had been filled with water. It is not claimed that water in storage in the soil will completely produce a crop, but with considerable water in the subsoil there are very few years when there is not sufficient rainfall to produce quite satisfactory crops. Mr. Zook, in Nebraska Experiment Station Bulletin 192, says: "Average yields per acre of all crops were higher on fallow than under any system of continuous cropping. Yields of grain on fallow were frequently more than double those of grain after grain. Of crops grown on fallow the largest gains were made by winter wheat and the smallest by corn."

In circular No. 72, of the Kansas State Agricultural College, Mr. George F. Knapp reports: "Experiments at the Garden City Branch Experiment Station, covering a period of five years, have shown that sufficient water can be stored in the soil by winter irrigation alone to produce good crops of corn, kafir, milo, and certain other row crops. The soil on which these experiments were made is a deep silt loam, representative of most of the upland in the western part of the State. Good yields have been obtained each year with all crops grown on the winter irrigated land. At the same time, with the exception of the wet season of 1915, unirrigated land produced practically nothing." Abundant evidence as to the value of water either stored or applied direct to the crop might be presented but it seems hardly necessary to do it in view of the evidence already offered and the fact that it is now so generally recognized that water is the limiting factor in crop production in the area known as the Great Plains.

In an exhaustive study along this line Mr. Fellows concludes that sufficient water stored in the subsoil will probably almost double the yield of crops now obtained throughout this project. There will be years, as there has been in the past, when rainfall will be largely sufficient, but those years are of infrequent occurrence. It is entirely probable that the above estimate is quite correct. Mr. Fellows concludes further that even greater yields might be obtained if, in addition to the stored water, there might be water available to put on the lands at any time when it is needed. At any rate, experience has shown that a deficiency of rainfall can, in a large measure, be made up by water in storage.

SOILS OF THE AREA

The questions now come: (1) Are the soils of the area suitable for irrigation? (2) Do they have sufficient water capacity to hold the water required to supplement the rainfall? (3) Do they have an inherent fertility that warrants an irrigation project to supply additional water?

Character of the soils: The soils of the proposed irrigation area are all of loessial formation. The loess material below the line of soil development is of general uniform composition and texture and extends to a depth of 100 feet or more without any fault such as rock strata, hardpan, or gravel seams. There is nothing in the soil profile to interfere with the water penetration and with its recovery through the development of plant roots. The soils in the virgin state were fertile prairie soils, rich in both organic and inorganic elements of plant food. During the period that they have been under cultivation the organic and nitrogen content have been materially reduced. There is no evidence and little probability that alkali will ever become a problem in this area even under irrigation.

The rate at which a soil will absorb water is of practical importance under irrigation. It has a direct bearing on the possibility of spreading water over the land. Determinations on this point throughout the project showed that all the soils were able to take water at a rate entirely satisfactory for irrigation purposes. The surface soils are generally friable and easily tilled, and experience has shown that even in their present state of fertility they are capable of producing satisfactory crops when they have sufficient moisture available and climatic conditions are not too unfavorable. Considering all the various factors the soils of the area are apparently entirely suitable for irrigation farming.

Water capacity: The soils of the area have a uniformly high-water holding capacity. Field experiments show that they will hold on the average 22.86 inches of water in the upper 6 feet of soil. Of this amount more than half—in fact, 12.28 inches—would be available for use of the crops. This is a high available water capacity.

It means that more than 2 inches of available water can be stored in each foot section of the soil, and that it is possible to carry in the soil a total of 12 inches of water within the root zone of most of the farm crops. This amount of water would probably be all that is needed to supplement the rainfall and would entirely take care of all small grain crops. While it will go a long way toward insuring a corn crop,

experience seem to indicate that corn will respond to additional summer irrigation. The water capacity of the soil both in total and available water is shown in Table 5 and Chart 1.

The feeding depth of crop plants: It will be noted that the water-carrying capacity of the soil is determined for a 6-foot column of soil. This was done in order to include the root zone for the common farm crops. Water stored below the root zone is not available to the crops, as capillarity is negligible except when there is free water. Most of the farm crops feed deeper than is ordinarily supposed, and are able to recover any available water within the limit of their root zone providing it is needed. Where sufficient water is not obtained by the plant near the surface most agricultural plants will root more deeply, providing they can find available water in the subsoil. Investigations by Miller, Weaver, Burr, and others show that the 6-foot depth represents the practical feeding zone of most of the farm crops in this section and on this type of soil with the exception of alfalfa, which feeds more deeply. If the lower subsoil is dry, so that the plants can obtain no water from that region, the roots will not be extended into it. As an average for five years' observations at North Platte of the crops grown on summer tilled land which had moisture stored in the lower subsoil spring wheat, oats, barley, and corn developed their root system to a depth of from 5 to 6 feet, while winter wheat fed approximately 1 foot deeper into the soil.

TABLE NO. 5.—*Field carrying capacity and available water capacity of upper 6 feet of soil at various points in area*

| Soil | Sample | Moisture equivalent | Field carrying capacity | Hygroscopic coefficient | Field carrying capacity | Available water capacity |
|---|---|---|---|---|---|---|
| | | *Per cent* | *Per cent* | *Per cent* | *Inches* | *Inches* |
| Grundy | Hastings, Colo. | 27.5 | 24.4 | 12.0 | 21.84 | 11.10 |
| | Ingleside | 27.8 | 24.5 | 11.9 | 21.90 | 11.10 |
| | A | 27.2 | 24.8 | 11.7 | 22.36 | 11.75 |
| | B | 27.7 | 25.2 | 12.0 | 22.62 | 11.85 |
| | Q | 26.7 | 24.3 | 11.8 | 21.81 | 11.22 |
| | A I | 27.2 | 24.8 | 11.0 | 22.36 | 12.38 |
| Average | | 27.4 | 24.7 | 11.7 | 22.12 | 11.57 |
| Holdrege | Norman | 27.7 | 26.4 | 11.5 | 25.68 | 14.52 |
| | Holdrege | 26.9 | 24.4 | 10.8 | 24.24 | 13.50 |
| | Swedish Mission | 26.1 | 23.5 | 9.7 | 23.34 | 13.50 |
| | Bertrand | 24.4 | 23.0 | 11.0 | 22.86 | 11.82 |
| | D | 27.2 | 24.8 | 11.7 | 24.49 | 12.94 |
| | E | 28.3 | 25.8 | 12.1 | 25.48 | 13.53 |
| | F | 28.0 | 25.5 | 12.2 | 25.18 | 13.14 |
| | K | 26.3 | 23.9 | 11.1 | 23.60 | 12.64 |

| | A II | 25.7 | 23.4 | 10.3 | 23.10 | 12.94 |
| Average | | 26.4 | 24.2 | 11.0 | 24.00 | 12.98 |
| Colby | Kenesaw | 24.4 | 22.2 | 9.2 | 21.54 | 12.54 |
| | C | 29.1 | 26.5 | 12.4 | 26.17 | 13.92 |
| | G | 19.9 | 18.1 | 8.5 | 17.87 | 9.48 |
| | H | 23.7 | 21.6 | 9.8 | 21.32 | 11.65 |
| | N | 22.1 | 20.1 | 9.2 | 19.85 | 10.76 |
| Average | | 23.8 | 21.7 | 9.8 | 21.33 | 11.67 |
| Wabash | I | 26.5 | 24.1 | 10.6 | 21.63 | 12.12 |
| | J | 25.2 | 22.9 | 11.6 | 20.56 | 10.15 |
| | O | 31.7 | 28.8 | 13.6 | 25.87 | 13.65 |
| | P | 29.2 | 26.6 | 12.4 | 23.89 | 12.75 |
| Average | | 28.2 | 25.6 | 12.1 | 22.99 | 12.17 |
| Grand average | | 26.4 | 24.6 | 11.1 | 22.86 | 12.28 |

The feeding depth of winter wheat is shown graphically in the accompanying chart [omitted in RECORD]. While it is seldom that the soil will be filled with water to a depth of 6 feet, either by irrigation or by summer fallow, yet it shows the possibility for getting a large reserve of moisture in the subsoil within reach of the plant roots.

Loss in the winter carry-over of water: The question will doubtless arise that if water is applied in the fall, will it not be lost through evaporation or by percolation beyond the feeding depth of the plant roots during the winter months? There will be some loss through evaporation but none through percolation to lower depths. Percolation does not take place except when there is free water, which is only present when the amount is greater than the field carrying capacity of the soil. The loss through direct evaporation may be as high as 3 or 4 per cent, or even higher for the first foot section of soil, but there is very little loss below the first foot. It is well recognized that during the winter months the rate of evaporation is relatively low and that the loss is not great. This fact is borne out by consideration of both charts [omitted in RECORD], which show the soil well filled with water at the time of the fall sampling, and show further that there has been very little loss up to the sampling of April 21, the following year. Chart [omitted in RECORD] is a composite of five years' results, taking the last sampling in the fall as showing the maximum accumulation of water by summer tillage. Out of the five years, three show a loss of 2 to 4 per cent in the first foot and two show a small loss in the second foot. In two of the five years spring rains before the sampling date completely covered up the loss. The answer to the question is therefore that there will be very little loss during the winter, the greatest loss being in the first foot section. Water can be applied to the land and carried through the winter if desirable.

When we consider the large amount of available water that these soils will hold, the comparatively small loss in carrying stored water through the winter, and the possibility of the plants to recover water to a considerable depth in this region it can be safely said that the soils of this area do have sufficient water capacity to hold the water required to supplement the rainfall. It may not be the best practice to apply it all at once and carry it as storage water, except perhaps for the small grains, but if 12 inches of water represents the water required to supplement the rainfall it can in a large measure be carried in the soil.

Fertility: In the virgin state the soils of this area were very fertile, rich in both organic and inorganic elements of fertility, and capable of producing high yields. Under cultivation there has been a gradual decrease in the organic content of the soil. Many farmers with long experience in this section report a steady decrease from the maximum yields obtained when the land was new, and also that it requires more work than formerly. The decreased yield and the fact that the land is harder to handle is due quite entirely to the decrease of the organic content of the soil. The soils still contain sufficient phosphoric acid and potash for many years to come. The lime content, especially in the subsoil, is comparatively high, and liming is not necessary for the successful production of legumes. While maximum yields can hardly be expected without building up the organic content of the soils, the soil is still sufficiently fertile to produce good yields of all crops grown when there is sufficient water available. The inherent fertility of the soil is high, but proper rotation of crops and the growing of legumes are very difficult to obtain under a limited rainfall. With a supplemental supply of water satisfactory yields can be maintained.

SUPPLEMENTAL EVIDENCE

The land under the proposed project is now and has been for many years under private ownership. The farmers are already on the land, which is held in units mainly ranging from 160 acres up. Probably 90 per cent of the land is under cultivation. It is generally quite well improved as to buildings, fences, etc. The farmers have the horses and machinery necessary for farming the land under the present system. There is already invested in this area a tremendous amount of capital, largely resting with the farm owners.

The area has splendid transportation facilities both as to railroads and highways. There is a highway on almost every section line, generally kept in fairly satisfactory condition. Shipping points are close, no farm having more than a few miles to deliver its products to a loading point. The area lies relatively close to several important primary markets. It is within 200 miles of Omaha; within 700 miles of Chicago; and within less than 400 miles of St. Joe and Kansas City. These primary markets afford a ready outlet for all agricultural products.

The question may arise as to what will be the effect of irrigation on the permanency of the agriculture of this area. The effect, of course, is problematic, depending largely upon the degree of intensity of the agriculture that would follow irrigation. It is safe to assume, however, that a more permanent and profitable form of diversified agriculture would follow irrigation than is possible without it.

It was mentioned above that the organic content of the soil is being depleted and that there is a consequent decline in yields. Organic matter, while not itself a plant food, is essential to proper soil conditions. A sufficient supply of organic matter makes the soil more receptive of water from rains and makes all tillage operations easier. It is the greatest factor in the fertility and management of the soil. The lower yields and increased labor coincident with the depletion of the organic content of the soil have not only made farming less profitable but are having a discouraging effect upon the farmers. Under present conditions the situation will grow worse. Soil maintenance under limited rainfall is more difficult than in humid or irrigated sections. Getting stands of grass or legumes is frequently impossible because of drought. The keeping of more livestock is curtailed by the problems of dependable pastures and adequate feed supplies. While there is no question as to the permanency of some form of agriculture in this section, it is evident that a far greater development can be brought about with additional water.

W. W. BURR.

ORDER OF BUSINESS

Mr. BURSUM. Mr. President, I move that the Senate proceed to the consideration of the conference report upon House bill 6941, and I move that the conference report be agreed to.

Mr. McKELLAR. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state the inquiry.

Mr. McKELLAR. Is that motion in order at this time? If not, I demand the regular order.

The PRESIDENT pro tempore. The Chair is of opinion that after 1 o'clock a motion of that kind can be made. That is the understanding of the Chair with regard to the rule.

Mr. ROBINSON. We were proceeding with the disposition of morning business.

Mr. REED of Pennsylvania. Mr. President, will the Senator withhold the motion?

Mr. ROBINSON. If not, let us vote it down.

Mr. BURSUM. I would like to get a chance to hear what is being said.

Mr. ROBINSON. I suggest that the Senator withhold his motion until morning business has been completed.

Mr. BURSUM. I will withhold the motion for the present.

The PRESIDENT pro tempore. The motion of the Senator from New Mexico must be disposed of.

Mr. LA FOLLETTE. He has withdrawn it. The Chair did not hear the withdrawal of the motion.

The PRESIDENT pro tempore. Does the Senator from New Mexico withdraw his motion?

Mr. BURSUM. On request, I will withhold the motion until after morning business has been declared finished.

ALIENS IN THE UNITED STATES

The PRESIDENT pro tempore. Are there further reports of committees?

Mr. REED of Pennsylvania. From the Committee on Immigration, I report back favorably with an amendment House Joint Resolution 283, to permit to remain within the United States certain aliens in excess of quotas fixed under authority of the immigration act of May 19, 1921, and I ask unanimous consent for its immediate consideration.

Mr. BURSUM. I object.

Mr. REED of Pennsylvania. I hope the Senator will not object.

Mr. BURSUM. The understanding was that we were to proceed with morning business.

Mr. REED of Pennsylvania. That is what we are doing. This will not take two minutes of explanation.

Mr. BURSUM. What is the joint resolution?

Mr. REED of Pennsylvania. It is a joint resolution permitting the retention in the United States of those aliens who came in under the ruling of the department.

Mr. BURSUM. I have no objection to that. I withdraw my objection.

Mr. REED of Pennsylvania. It applies to approximately 8,800 aliens who are now here and about 500 who are on the ocean. The committee were unanimously in favor of it.

The PRESIDENT pro tempore. Is there objection to the present consideration of the House joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which had been reported from the Committee on Immigration with an amendment to strike out all after the resolving clause, and to insert:

That the following aliens arriving in excess of quotas fixed under authority of the act entitled "An act to limit the immigration of aliens into the United States," approved May 19, 1921, as amended and extended, may, if otherwise admissible and if not subject to deportation for other causes, be permitted to enter and remain in the United States without regard to the provisions of such act of May 19, 1921, as amended and extended:

(1) Aliens heretofore admitted in excess of quota and charged to the quota of a later month;

(2) Aliens heretofore admitted under a construction of such act of May 19, 1921, required by court decision;

(3) Aliens arriving in the United States after May 26, and before July 1, 1924, who departed for the United States from the last port outside the United States or outside foreign contiguous territory on or before May 26, 1924, believing in good faith that they would be admitted pursuant to a construction of such act of May 19, 1921, required by court decision; and

(4) Aliens heretofore temporarily admitted under bond to relieve cases of extreme hardship.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended and the amendment was concurred in.

Mr. GEORGE. Mr. President, I should like to make an inquiry of the Senator from Pennsylvania. I favor the resolution as amended, but I desire to ask if this amendment will charge the number of those coming over under the nisi prius court's decision to future quotas? I understand that to be the case.

Mr. REED of Pennsylvania. The Senate committee amendment makes the joint resolution much stricter than it was when it passed the other House.

Mr. GEORGE. But does it add to the quota?

Mr. REED of Pennsylvania. It does not charge these immigrants against the quota of next year, and all of the quotas for the present year are exhausted now; there are no remaining quotas for this year except from one or two countries.

Mr. GEORGE. It will not reduce the quota for next year?

Mr. REED of Pennsylvania. No. The admission of these persons this year will not affect the quota for next year in any way.

Mr. ROBINSON. Mr. President, will the Senator from Pennsylvania yield for a question?

Mr. REED of Pennsylvania. Yes.

Mr. ROBINSON. I have heard a statement to the effect that the legal result of the passage of this joint resolution will be to confirm the right to remain in the United States of all immigrants who are here, even including those who came in violation of the law; I mean through fraudulent arrangements.

Mr. REED of Pennsylvania. No, Mr. President; that is not true, especially in view of the manner in which the committee has proposed to amend the joint resolution. We have taken care of the cases to which the Senator from Arkansas refers. We were afraid of that.

Mr. ROBINSON. So that only those who come within the ruling in the Gottlieb case will be permitted to remain?

Mr. REED of Pennsylvania. Those who came in good faith, believing that under the court decisions they were entitled to enter the United States, will be permitted to remain.

Mr. ROBINSON. Very well. Under that statement of facts I make no objection to the joint resolution.

The PRESIDENT pro tempore. The joint resolution is in the Senate and is open to amendment.

Mr. HEFLIN. Mr. President, for many years I have been an ardent advocate of restricted immigration. I hold that the manner in which immigrants have been illegally slipped into the United States during the last three years is a disgrace to this Nation. Immigration agents have made money; they have grown rich selling passports into the United States. Some of the newspapers of the country have bitterly assailed those crooked agents. We passed a law here not long ago cutting down the number of immigrants that might come into our country. You were filling this land with Bolsheviks, with anarchists, with kidnapers, and with people who are the deadly enemies of the American form of government. The sentiment of four-fifths of the American people is against loose immigration laws and strongly in favor of restricted immigration.

Mr. President, where the wives of men who are already American citizens and their children desire to come to our shores, I know it makes a sympathetic appeal to us; but I believe that this is a fixed-up job on the American Nation. I think that the immigrant agents held those immigrants back and slipped in their full quota, relying upon the sympathy and big-heartedness of our people to let these 14,000 additional immigrants come in. Is this law to be enforced or is it not to be enforced? That is the question which now confronts us.

Mr. President, it must be that the immigration agents have been apprehended by somebody who has been watching or we never would have heard of these 14,000 persons; they would have been slipped in as hundreds of thousands of others have been, with the agents holding their hands behind them, growing fat and rich upon bartering the birthright of the American boy and girl. Here there comes in the closing hours of the session a pitiful appeal to our generosity and our big-heartedness to open the door and let 14,000 immigrants come in, with the story that they are the wives and children of citizens who are already here. What are these citizens doing here, leaving their wives and children at home? Why did they not bring them in when their quotas were not exhausted?

Mr. President, it looks to me as though a trick had been played upon us. The agents go over there and bring in 10,000 males, and then, after they are in and the quota is exhausted by those coming in, it is said, "Well, these men's wives and children ought to come in." We are all touched by such an appeal. I want those wives to be with their husbands and the children to be with their parents, for them to be all together; but I am calling the attention of the Congress and of the country to the fact that we are confronted by a situation which we have got to watch.

Mr. REED of Pennsylvania. Mr. President, will the Senator from Alabama yield to me for a parliamentary inquiry?

Mr. HEFLIN. I yield.

Mr. REED of Pennsylvania. I should like to inquire whether debate at the present time is under the five-minute rule under Rule VIII?

The PRESIDENT pro tempore. It is not. We are not considering the calendar under Rule VIII.

Mr. HEFLIN. Mr. President, just another word, for I do not desire to detain the Senate. I want Senators who claim to be in favor of restricted immigration to quit bringing these matters into this body. I am going to fight for restricted immigration. If I had it in my power, I would close the doors of my country for 12 months at least, and it might be for from 3 to 5 years, until this Government has an accounting of those already here. We have got all sorts of groups in this country, who are bringing all kinds of poisonous doctrines into the household of sovereign States. I for one am opposed to it, and I wished to say this much to the Senate on this question.

The amendment was ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time.

The PRESIDENT pro tempore. The question is, Shall the joint resolution pass?

Mr. HEFLIN and Mr. ASHURST asked for the yeas and nays.

The yeas and nays were not ordered.

The PRESIDENT pro tempore. The question is, Shall the joint resolution pass?

Mr. HOWELL. Mr. President——

Mr. ASHURST. I asked for the yeas and nays.

The PRESIDENT pro tempore. The demand for the yeas and nays was not sufficiently seconded.

Mr. HOWELL. Mr. President——

The PRESIDENT pro tempore. The time for debate on the joint resolution has passed.

Mr. ASHURST. A question of order. Under the Senate rules a bill must be read three times and on different days. I demand that this bill have its third and last reading on another day than to-day. That is our rule.

Mr. REED of Pennsylvania. The yeas and nays, Mr. President.

Mr. ASHURST. The bill must be read three times.

Mr. REED of Pennsylvania. Mr. President, a point of order. I submit that the joint resolution has been read the third time and is now on its final passage.

Mr. ASHURST. Then I withdraw the point. The Senator is a lawyer and knows that under our rules a bill must be read three times on different days, if such demand is made.

Mr. REED of Pennsylvania. It has been read three times.

The PRESIDENT pro tempore. The point of order is overruled. The yeas and nays are demanded. Are they seconded?

Mr. HOWELL. Mr. President——

The PRESIDENT pro tempore. The demand for the yeas and nays is sufficiently seconded, and the Secretary will call the roll.

Mr. HOWELL. Mr. President, is there to be no opportunity to debate the joint resolution?

The PRESIDENT pro tempore. The time for debate on this joint resolution has passed. The Secretary will call the roll.

The principal clerk proceeded to call the roll.

Mr. PHIPPS (when his name was called). I have a pair with the junior Senator from South Carolina [Mr. DIAL], which I transfer to the senior Senator from New Jersey [Mr. EDGE] and vote "yea."

The roll call was concluded.

Mr. WARREN (after having voted in the affirmative). I am paired with the Senator from North Carolina [Mr. OVERMAN], who does not appear to be here at the moment. I am informed, however, that if that Senator were present he would vote as I have voted, and therefore I will allow my vote to stand.

Mr. HARRISON. I am paired with the Senator from Vermont [Mr. GREENE] and withhold my vote.

Mr. ROBINSON. I desire to announce that the Senator from Rhode Island [Mr. GERRY] is necessarily absent. If present, he would vote "yea."

The result was announced—yeas 66, nays 15, as follows:

YEAS—66

| | | | |
|---|---|---|---|
| Adams | Colt | Fletcher | King |
| Ball | Copeland | Glass | Ladd |
| Bayard | Cummins | Gooding | La Follette |

| Elkins | Lenroot | Ralston | |

So the joint resolution was passed.

Mr. HARRIS. Mr. President, some days ago I wrote to the Secretary of Labor asking him to give me a comparative statement of the number of aliens admitted under the present quota and those who would be admitted under the new quota. I ask unanimous consent to place his reply in the RECORD. His report shows an unusually large number admitted from Canada and Mexico. The Senate voted down my amendment placing Canada and Mexico under the quota so as to limit the number coming from those countries.

The PRESIDENT pro tempore. Without objection the letter of the Secretary of Labor will be printed in the RECORD.

The letter referred to is as follows:

DEPARTMENT OF LABOR,
OFFICE OF THE SECRETARY,
*Washington, June 6, 1924.*

Hon. WILLIAM J. HARRIS,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR: This will acknowledge your letter of the 6th, requesting information concerning aliens admitted to the United States during certain periods, and asking my views on the effect of the immigration act of 1924. In my reply, for your convenience I am restating the questions and following each with the answer in the order presented.

"1. How many aliens were admitted to the United States during the first year prior to the enactment of the first quota law on May 19, 1921?"

During the fiscal year ended June 30, 1921, 978,163 were admitted to the United States.

"2. How many were admitted in each of the years following the enactment of the quota law?"

During the fiscal year ended June 30, 1922, the first full year of operation of the 1921 act, there were admitted 432,505. During the fiscal year ended June 30, 1923, there were admitted 673,406, while during the first nine months of the present year the total had reached 719,152.

"3. Except for a few restrictions the quota acts have not applied to the Dominion of Canada and Mexico. How many aliens not charged to a quota were admitted from the Dominion of Canada under that act?"

Nonquota immigrants from Canada, admitted during the fiscal year ended June 30, 1922, numbered 48,372. During the fiscal year ended June 30, 1923, 112,651. During the first nine months of the present fiscal year, 1924, 141,135 have been admitted. To show the character of this Canadian immigration, I analyze below the figures for 1923. The admissions are divided into 39,295 English, 30,438 French, 17,045 Scotch, 12,000 Irish, 4,486 Hebrews, and smaller numbers of other peoples, chiefly of European origin.

"4. How many nonquota aliens were admitted from the Republic of Mexico during the same periods?"

Nonquota aliens admitted from Mexico during the fiscal year ended June 30, 1922, numbered 32,916. This number was increased during the year ended June 30, 1923, to 77,231. During the first nine months of the present fiscal year, 1924, this number had increased to 77,981.

"5. How many 'quota' aliens have been admitted each year from Canada since the passage of the quota act?"

"Quota" immigrants from Canada and Mexico are those who had not acquired the necessary period of residence in those countries to acquire a status of nonquota. During the year ended June 30, 1922, the number of quota immigrants from Canada amounted to only 7,721. During the fiscal year ended June 30, 1923, 11,425 of this class were admitted, and during the first nine months of 1924, 12,116.

"6. How many 'quota' aliens have been admitted each year from the Republic of Mexico since the passage of the quota act?"

During the fiscal year ended June 30, 1922, "quota" aliens from Mexico numbered 136; during the fiscal year ended June 30, 1923, 628; and during the first nine months of the present fiscal year, 1,019.

The totals of quota and nonquota immigrants admitted from Canada and Mexico for the same periods are therefore—

*Canada*

| | |
|---|---|
| Fiscal year ended June 30, 1922 | 56,093 |
| Fiscal year ended June 30, 1923 | 124,076 |
| First nine months, 1924 | 153,251 |

*Mexico*

| | |
|---|---|
| Fiscal year ended June 30, 1922 | 33,052 |
| Fiscal year ended June 30, 1923 | 77,859 |
| First nine months, 1924 | 79,000 |

"7. It is reported that a great many aliens have obtained entry into the United States surreptitiously from Canada and Mexico. What is your estimate of the number who have thus illegally gained entry? You will recall I offered an amendment to bring Mexicans and Canadians under the quota law."

From the very nature of this illegal traffic, we can have no accurate statistics. The number gaining surreptitious entry from Canada is no doubt smaller than in the case of the Mexican border. Numerical estimates on surreptitious entries run from 100 to 1,000 daily.

"8. Can this smuggling be stopped; and if so, how?"

This is a big question. I am one of those who believe that nothing is impossible, and that this applies just as much to the smuggling game as any other. Congress has recently given us a million dollars for border patrol, and undoubtedly our efforts are going to be much more effective by reason of that appropriation; but I am of the opinion that even with the added patrol this traffic will not be completely eliminated.

However much we may reduce these surreptitious entries from contiguous territory, our efforts would not in any way decrease the number of Mexicans or Canadians who would or could enter through regular channels. To the limit of its ability the Immigration Service has sought out and reported those unlawfully here, and prosecutions have been instituted and in a great many cases convictions have been obtained against those responsible for and participating in the illegal entry of aliens, but such activity can never take the place of a law restricting the number which may be admitted by inspectors. That can only be done by an amendment to the law such as you offered, bringing Mexico and Canada under the provisions of the quota law. The number of lawful admissions will increase rather than decrease with the tightening of the border and the increasing demand for common labor, which can not be supplied from Europe.

So far as I know, there is but one way in which we can cope with this smuggling situation, and that is by an annual enrollment of all aliens in the United States. I propose this mehod for two reasons—first, as a protection and assistance to the alien who honestly and conscientiously seeks to comply with our laws and fit him for the duties and responsibilities of citizenship; and, second, to clear the way for the elimination of the foreigner who is here in defiance of our laws. Only by knowing who is here and gaining some information concerning them can we hope to have a final check upon this traffic.

"9. How many alien seamen have gained entry into the United States through desertion since the passage of the quota law of 1921?"

During the fiscal year ended June 30, 1922, 5,879; during the fiscal year ended June 30, 1923, 23,194; during the first nine months of the fiscal year 1924, 26,680.

"10. How many quota aliens are admissible under the limitation act of 1924?"

The report of the Committee on Immigration and Naturalization of the House of Representatives estimates the number at 161,184.

"11. What is your estimate of the number of nonquota aliens that will be admitted under the act of 1924?"

This number is estimated at 200,000.

"12. Approximately how many aliens will enter each year from Central and South America under subdivision (c) of section 11 of the immigration act of 1924?"

From Central America, 2,000; from South America, 8,000.

"13. State whether or not in your opinion a greater or lesser number of Japanese will gain admission to the United States under the immigration act of 1924 than gained admission under the gentlemen's agreement."

The exclusion section was undoubtedly intended by Congress to mean total exclusion; but if construed in connection with the interpretation to be placed upon other provisions of the act I can not state what will be its actual effectiveness as an exclusion measure. The department does not have a copy of the gentlemen's agreement, and I am not familiar with the treaty relating to commerce and navigation now in effect between the United States and the Japanese Government. As you know, the smuggling of orientals into the United States, both by land and by water, in itself presents a serious problem. The exclusion provisions of the immigration act of 1924 will not curtail that traffic. It can only be curbed by resort to the method I have indicated in answer to your question No. 8.

"14. State whether or not in your opinion a greater or lesser number of alien seamen will gain admission through desertion than gained admission under the quota act of May 19, 1921."

Since the enactment of the quota law of May 19, 1921, experience and official records show that desertion of alien seamen has increased rapidly. The immigration act of 1924 in no manner changes the status of seamen. It leaves the door wide open for their entrance, and the bureau and the department are left without any means of combating the practice.

"15. Do you consider the immigration act of 1924 an improvement over the quota act of May 19, 1921?

While the immigration act of 1924 is not all that I would like to see in a permanent restrictive immigration law, it is a decided improvement over the old quota act because it permits of a partial examination of immigrants abroad, eliminates a great deal of uncertainty as to the condition of quotas because of assignment at foreign ports rather than at the port of entry, and more adequately handles the cases of separated families. The increased penalty placed upon steamship companies for bringing inadmissible aliens will also assist in the enforcement of the law.

"16. What defects have you noted in the immigration act of 1924 which should be remedied by additional legislation?"

My principal criticism of the immigration act of 1924 is its inelasticity to meet the varying needs of American industry, and while restricting the importation of labor from Europe, places no ban upon competition from Mexican labor, which may be admitted in unlimited number. If, within the quota given to European countries, some means were provided to select the types and classes meeting the certain industrial and agricultural needs arising from time to time, it seems to me that we would have a much better law. For instance, under this act 50 per cent or more of the quota could be street peddlers or small tradesmen, of which we have an ample supply, while an acute shortage might be registered in the steel industry, slate quarries, or tin mills. Obviously, a confirmed street salesman will not make a section hand. In my recommendations for legislation I suggested a method of importing skilled and unskilled labor for any industry when labor of like kind could not be found unemployed in the United States. If some such system were devised and kept within the limits prescribed by Congress, I think we would have a policy more in line with our needs. I also believe that it is a decided mistake to discriminate against European labor in favor of Mexican, and for that reason I am in hearty accord with the amendment to bring the Western Hemisphere as well as the Eastern under the provisions of the quota law.

Cordially yours, JAMES J. DAVIS.

## BILLS INTRODUCED

Bills were introduced, read the first time, and by unanimous consent the second time, and referred as follows:

By Mr. LODGE:

A bill (S. 3486) to authorize the Secretary of State to enlarge the site and erect buildings thereon for the use of the diplomatic and consular establishments of the United States in Tokyo, Japan; to the Committee on Foreign Relations.

By Mr. WADSWORTH:

A bill (S. 3487) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto; to the Committee on the Judiciary.

By Mr. DALE:

A bill (S. 3488) granting an increase of pension to Ellen A. Sawyer (with accompanying papers); to the Committee on Pensions.

By Mr. DALE (for Mr. GREENE):

A bill (S. 3489) providing reimbursement to J. M. Lacalle for services as instructor at the United States Naval Academy, Annapolis, Md., from October 1, 1914, to October 19, 1914; to the Committee on Claims.

By Mr. WALSH of Massachusetts:

A bill (S. 3490) making an appropriation for the United States Tariff Commission; to the Committee on Appropriations.

By Mr. COPELAND:

A bill (S. 3491) for the relief of Martin Brauer; to the Committee on Claims.

By Mr. SHIELDS:

A bill (S. 3492) to amend the World War veterans' act, 1924, consolidating, codifying, revising, and reenacting the laws affecting the establishment of the United States Veterans' Bureau and the administration of the war risk insurance act; to the Committee on Finance.

## INVESTIGATION OF ADMINISTRATION OF THE PUBLIC DOMAIN

Mr. STANFIELD submitted the following resolution (S. Res. 257), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

*Resolved*, That a special committee of five Senators, to be appointed by the President of the Senate pro tempore, is authorized and directed to conduct an investigation with respect to the laws relating to the public domain administered by the Department of Agriculture or by the Department of the Interior and all departmental rules, regulations,

and practices thereunder. The committee shall, as soon as practicable, report its findings to the Senate with such recommendations, including recommendations for legislation, as it deems proper.

SEC. 2. For the purposes of this resolution the committee is authorized to meet at such times and places during the sessions and recesses of the Sixty-eighth Congress, to employ such experts and clerical and other assistants, to require by subpœna or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, and to take such testimony as it deems advisable. Subpœnas for witnesses shall be issued under the signature of the chairman of the committee. The cost of the stenographic service to report the proceedings shall not be in excess of 25 cents per 100 words. The expenses of such investigation shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

EXPENDITURES IN THE PRESIDENTIAL CAMPAIGN

Mr. LA FOLLETTE. Mr. President, I ask unanimous consent for the present consideration of Senate Resolution 248, reported from the Committee to Audit and Control the Contingent Expenses of the Senate.

The PRESIDENT pro tempore. The Senator from Wisconsin asks unanimous consent for the present consideration of Senate Resolution 248. Is there objection?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDENT pro tempore. Does the Senator desire it to be read?

Mr. LA FOLLETTE. Mr. President, I wish to amend it in one respect.

On page 2, line 13, after the word "chairman," I wish to perfect the resolution by inserting the words "or any member," so that the provision as amended would read:

Subpœnas for witnesses shall be issued under the signature of the chairman or any member of the committee.

The amendment was agreed to.

The PRESIDENT pro tempore. The question now is upon agreeing to the resolution as amended.

Mr. LENROOT. Let it be read, Mr. President.

The PRESIDENT pro tempore. The Secretary will read the resolution.

The resolution as amended was read, as follows:

*Resolved*, That a special committee of five Senators be elected forthwith to investigate and report to the Senate on December 5, 1924, the campaign expenditures made by or on behalf of, or in support of, or in opposition to, any and all candidates for President and Vice President and presidential electors; the names of the persons, firms, or corporations contributing to the said candidate or candidates or their party committee or committees, or any other agency, the amounts contributed, pledged, loaned, or otherwise made available for use, the method of expenditure of said sums, and all the facts in relation thereto, not only as to the subscriptions of money and the expenditures thereof but as to the use of any other means of influence, including the promise of patronage, and all other facts in relation thereto that would not only be of public interest but would aid the Congress in any necessary remedial legislation.

That said committee is hereby empowered to sit and act during the adjournment of Congress at such time and place as it may deem necessary; to require by subpœna, or otherwise, the attendance of witnesses, the production of books, papers, and documents; to employ stenographers at a cost of not exceeding 25 cents per hundred words. The chairman of the committee, or any member thereof, may administer oaths to witnesses. Subpœnas for witnesses shall be issued under the signature of the chairman or any member of the committee. Every person who, having been summoned as a witness by authority of said committee, willfully makes default, or who, having appeared, refuses to answer any question pertinent to the investigation heretofore authorized, shall be held to the penalties provided by section 102 of the Revised Statutes of the United States.

The expenses thereof shall be paid from the contingent fund of the Senate on vouchers ordered by said committee, signed by the chairman thereof, and approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

The PRESIDENT pro tempore. The question is upon agreeing to the resolution as amended.

The resolution as amended was agreed to.

Mr. LODGE. Mr. President, under the provision in the resolution I offer the following list of names for the members of the committee of five to serve under the resolution; and on that, under the resolution, we are to take a vote.

The PRESIDENT pro tempore. The Secretary will read the list of names submitted by the Senator from Massachusetts.

The principal clerk read as follows:

Senator BORAH, chairman; Senator JONES of Washington; Senator SHIPSTEAD, of Minnesota; Senator CARAWAY, of Arkansas; and Senator BAYARD, of Delaware.

The PRESIDENT pro tempore. The question is upon the election of these five Senators as members of the committee. [Putting the question.] The ayes have it, and the committee is duly elected.

Mr. REED of Missouri. Mr. President, I ask unanimous consent to amend the resolution just passed by including candidates for the Senate. It can be done by unanimous consent.

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from Missouri. The Chair is of the opinion that the vote by which the resolution was adopted must be reconsidered.

Mr. REED of Missouri. I think almost anything can be done by unanimous consent, and I ask unanimous consent for the reconsideration of the vote and for the insertion of the amendment.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Missouri? The Chair hears none, and the vote is reconsidered.

Mr. REED of Missouri. I now ask unanimous consent to insert, after the word "electors," in line 6, the words "and Senators of the United States Senate."

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. After the word "electors," in line 6, it is proposed to insert "and Senators of the United States Senate."

Mr. OVERMAN. Let us have the resolution read as it would read if amended.

The PRESIDENT pro tempore. The Secretary will read that portion of the resolution proposed to be amended.

The reading clerk read as follows:

or in support of, or in opposition to, any and all candidates for President and Vice President and presidential electors and Senators of the United States Senate.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The resolution as amended was agreed to.

HEARINGS BEFORE COMMITTEE ON INDIAN AFFAIRS

Mr. HARRELD. Mr. President, I ask unanimous consent to take up Senate Resolution 241. If it is not agreed to at this time, it will be worthless. I ask to have it read.

The PRESIDENT pro tempore. The Senator from Oklahoma asks unanimous consent for the present consideration of Senate Resolution 241.

Mr. OVERMAN. What is the resolution?

Mr. HARRELD. Senate Resolution 241. It has just been reported by the Committee to Audit and Control the Contingent Expenses of the Senate, and unless it is passed to-day it is absolutely worthless and useless. I should like to have it considered at this time.

Mr. OVERMAN. Let it be read.

The PRESIDENT pro tempore. The resolution will be read.

The principal clerk read Senate Resolution 241, submitted by Mr. HARRELD May 28, 1924, as follows:

*Resolved*, That Senate Resolution 112, agreed to January 7, 1924, authorizing the Committee on Indian Affairs or any subcommittee thereof during the Sixty-eighth Congress to hold and report hearings upon any subject which may come before said committee, be, and hereby is, amended to enable said committee or any subcommittee thereof to hold such hearings at such times and places as may be considered necessary by the committee or its subcommittee, the expenses incident thereto to be paid out of the contingent fund of the Senate.

Mr. OVERMAN. Mr. President, the contingent fund of the Senate is over $300,000 more than it has been in past years. I am not going to object to the resolution, but I just want to inform the Senate that in every deficiency bill that comes here we have to make a $100,000 appropriation here, $50,000 there, $150,000 here, for the contingent fund; and therefore we ought to be very careful what we do about appropriating for junketing committees to go all over this country.

The PRESIDING OFFICER (Mr. MOSES in the chair). Is there objection to the present consideration of the resolution? The Chair hears none. The amendments of the committee will be stated.

The PRINCIPAL CLERK. On page 1, line 6, after the word "enable," it is proposed to strike out "said committee or any"

and insert "a," and at the end of line 6 to strike out "to" and to insert "consisting of not more than three members to."

The amendments were agreed to.

The resolution as amended was agreed to, as follows:

*Resolved*, That Senate Resolution 112, agreed to January 7, 1924, authorizing the Committee on Indian Affairs or any subcommittee thereof during the Sixty-eighth Congress to hold and report hearings upon any subject which may come before said committee, be, and hereby is, amended to enable a subcommittee thereof consisting of not more than three members to hold such hearings at such times and places as may be considered necessary by the committee or its subcommittee; the expenses incident thereto to be paid out of the contingent fund of the Senate.

Mr. WALSH of Massachusetts. I ask for the regular order.

Mr. NORBECK. Mr. President——

The PRESIDING OFFICER. The regular order is demanded. Reports of committees are in order.

PRICES OF FARM PRODUCTS

Mr. NORBECK. Mr. President, the Committee to Audit and Control the Contingent Expenses of the Senate has just reported on Senate Resolution 249. That permits an investigation by the Committee on Agriculture and Forestry during the recess as to the losses to the farmers in the price of wheat on account of Government interference through price fixing. It permits the committee to hold hearings in Washington or elsewhere.

It was talked over in the committee, and it was agreed that there would be no expensive investigation; that there might be a few hearings prior to the convening of Congress, but a great deal of the information would be secured from the department here later. The resolution provides for a report on the 1st of January, or before.

This is the only thing along the line of looking after the wheat situation, except the so-called Bursum bill, which is pending here. That is a measure really providing for reimbursing the farmers $50,000,000, which the Government took away from them in prices. It provides for a bonus of 35 cents a bushel on the export of wheat, in the belief that it will put the domestic price up some 25 to 35 cents per bushel. It is too late to get that bill through. The parliamentary situation does not permit that. Therefore, I just want to give notice that when some House bill comes up we from the Northwest have agreed that we will offer that proposition as a rider or an amendment to that bill. It is estimated that the cost for one year would be approximately $50,000,000. A suggestion has been made that it should also include corn, and the export on corn being very small, and the bonus proposed being 15 cents a bushel, it is estimated that it will cost something like $4,000,000.

I ask unanimous consent that Senate Resolution 249 be considered.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the resolution, which had been reported from the Committee on Agriculture and Forestry with an amendment to strike out all after the resolving clause and to insert a substitute, so as to make the resolution read:

Whereas the Government of the United States during the World War generally maintained a policy of noninterference with the prices of staple commodities; and

Whereas this policy resulted in the prices of most commodities soaring to entirely new and unheard-of price levels; and

Whereas the Government did not follow its policy of noninterference in regard to wheat; but, on the other hand, by various means, did depress the price of wheat until it was finally fixed at $2.20 per bushel; and

Whereas such price was much below the prevailing market price at the time it was fixed: Now, therefore, be it

*Resolved*, That the Senate Committee on Agriculture and Forestry, or any subcommittee thereof, be and is authorized and directed to hold hearings in Washington and elsewhere to investigate the amount of losses that were sustained by the wheat growers of the United States during the period of governmental interference with and regulation of the price of wheat, and make report to Congress not later than January 1, 1925.

Said Committee on Agriculture and Forestry, or any subcommittee thereof, is authorized to send for persons, books, and papers, to administer oaths, and to employ a stenographer, at a cost not exceeding 25 cents per hundred words, to report such hearings as may be had on this subject before said committee, all expenses incurred in furtherance of the purpose hereof to be paid out of the contingent fund of the Senate.

The amendment was agreed to.

The resolution as amended was agreed to.

TRANSPORTATION OF COTTON

Mr. SMITH. Mr. President, yesterday a resolution (S. Res. 252) offered by me was passed, the resolution being in reference to investigating certain alleged infractions of the antitrust law. Inadvertently I left out a part which should have been incorporated. I ask unanimous consent that the vote by which the resolution was agreed to be reconsidered and that I be allowed to substitute the resolution which I send to the desk.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Chair lays before the Senate the resolution in modified form.

The modified resolution (S. Res. 252) was read, considered, and agreed to, as follows:

That for the purpose of providing the Congress with information to serve as a basis for such legislation as may in its opinion be found necessary for the regulation of the shipment or sale of cotton in interstate and foreign commerce and to investigate and report the facts relating to any alleged violations of the antitrust acts by any corporation, the Federal Trade Commission is authorized and directed to investigate (in pursuance of the powers conferred upon it by subdivision (d) of section 6 of the act entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September 26, 1914, as amended, and in pursuance of any other power conferred upon it by such act) the facts relating to alleged shipments and sales in interstate or foreign commerce by cotton factors or shippers of cotton held by them as security for advances or otherwise, and to report to the Senate, not later than December 1, 1924, its findings thereon, together with such recommendations as it may deem advisable.

LEASES UPON NAVAL OIL RESERVES

Mr. WALSH of Montana. Mr. President, yesterday I entered a motion that the Senate adopt the report presented by the Committee on Public Lands investigating the naval oil leases. I merely desire to say in this connection that it seems quite unnecessary to review the facts recited in the report as they are substantially the same as they were given by me to the Senate some two months ago, save for the facts developed in relation to naval reserve No. 2, of no very great importance.

The committee has informed the Senate generally concerning these disclosures, and I feel entirely justified in saying that the report is substantially as the facts have been given to the Senate heretofore.

I feel that before the session expires the Senate ought to express either its approval or disapproval of the work of the committee.

The PRESIDING OFFICER. The question is upon agreeing to the motion entered yesterday by the Senator from Montana and now called up.

Mr. SPENCER. Mr. President, I very much regret this situation. In that report there is no recommendation which requires action. The motion is for the Senate to adopt a report which, of course, the Senate has not read, for it was filed only yesterday, to adopt a report from a committee five members of which have begged for an opportunity to investigate the facts of the report.

If any action were required now, I should make no opposition to the motion. If there were any recommendation that required any action, it would be another question. We are called upon to pass upon the report and adopt it when the five members of the committee which had the matter under investigation are not sufficiently familiar with the report to pass upon it, and of course no Member of the Senate has had an opportunity to read it.

I can not let that report be adopted without some fair expression of the reasons which even upon a casual examination lead me to think it ought to be further considered, and I beg the Senate to believe me when I say that I regret the situation exceedingly, for in the necessity of the case it will take much time to go over the facts which I must present to the Senate.

I begged that it might be deferred. I am met with a condition which I deplore, and which I could not prevent, and therefore I must take up the report with the Senate.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Kansas?

Mr. SPENCER. I yield.

Mr. CURTIS. In view of the statement of the Senator from Missouri, I want to ask if the report could not go over? This is the last day of the session, and there are a good many measures coming up. Besides, I wanted to get an hour, if I could, for the consideration of unobjected bills on the calendar.

Mr. WALSH of Montana. Mr. President, I have a number of bills on the calendar in which I am very deeply interested, but this comes up in its regular order. I can see no reason why it should not be disposed of. I do not think there is any occasion for any protracted discussion. The Senator from Missouri is at perfect liberty at any time to submit a report of his own. He might at any time have prepared a report of his own. The hearings were discontinued quite a while ago. The report has been in his hands for three days. It seems to me by this time that he ought to have been in shape to submit to the Senate any observations he may care to make in respect to it.

Mr. SPENCER. Mr. President, I am sure the Senator will recognize the fairness of the statement when I say that three days, in the present condition of business in the Senate, is no time for consideration. If I stood alone—because I have not been long upon that committee, and because I recognize the ability of the Senator from Montana on that committee—I should not be here taking this position, but when five members of that committee, including the senior Senator from Utah [Mr. SMOOT], who was formerly the chairman, begged the Senator from Montana to defer the report, which requires no immediate action, I can not let it go in without a fair statement of the reasons why I do not agree to that report.

PAYMENT OF TAXES TO STEVENS AND FERRY COUNTIES, WASH.

Mr. DILL. Mr. President, will the Senator yield?

Mr. SPENCER. I yield.

Mr. DILL. Before the Senator takes up that matter, would he yield to me for a moment to have passed a little bill to pay taxes to two counties in my State?

The PRESIDING OFFICER. Does the Senator from Missouri yield?

Mr. DILL. If it will lead to any debate, I will withdraw it.

Mr. SPENCER. I yield with pleasure, if I do not lose my right to the floor.

The PRESIDING OFFICER. The Chair can not guarantee that.

Mr. SPENCER. Then I must go on. I would yield to the Senator in a moment. Or, I will say now, I ask for unanimous consent to allow me to yield to the Senator to have his measure acted upon, to resume the floor at the conclusion of the consideration of his bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from Washington is recognized.

Mr. DILL. I ask unanimous consent for the immediate consideration of House bill 1414, to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes.

The PRESIDING OFFICER. The bill will be read for the information of the Senate.

The reading clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to pay to Stevens and Ferry Counties, in the State of Washington, as taxes claimed by said counties under section 2 of the act of July 1, 1892, relating to the payment of local taxes on allotted Colville Indian lands, the following sums, to wit: To Stevens County, $44,309.67; to Ferry County, $71.458: *Provided*, That there may be deducted from said amounts by the Secretary of the Interior such sum or sums as he may find have been paid to said counties for Indian tuition; also the excess, if any, where the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable land.

SEC. 2. That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, $115,767.67, or so much thereof as may be necessary, for the payment of said sums to said counties, as provided in the foregoing section.

Mr. WALSH of Montana. Mr. President——

Mr. DILL. This bill has passed the Senate twice. It came over from the House. These counties have been waiting many years for this money, and I hope the Senator will not object.

Mr. WALSH of Montana. I do not care to object, and I would not object to it, but I notice other Senators standing here with bills in their hands ready to make similar requests?

Mr. DILL. I think the Senator might give notice that he will not yield to any others.

Mr. WALSH of Montana. I do not object.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BICENTENNIAL CELEBRATION OF BIRTH OF GEORGE WASHINGTON

Mr. FESS. Mr. President.

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Ohio?

Mr. SPENCER. Mr. President, I ask unanimous consent that after I have yielded to the Senator from Ohio I may resume the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from Ohio is recognized.

Mr. SPENCER. I yield to the Senator from Ohio.

Mr. FESS. I ask that the Chair lay before the Senate Senate Joint Resolution 85, authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensive observance of that greatest of all historic events, the bicentennial of the birthday of George Washington.

Mr. PITTMAN. I would have to object to that unless it is understood that the pending motion is simply temporarily laid aside for this purpose.

The PRESIDING OFFICER. The unanimous-consent agreement, as the Chair understands it, was that the Senator from Missouri was to yield to the Senator from Ohio, and then the Senator from Missouri was entitled to resume the floor and continue discussion of the motion entered by the Senator from Montana.

Mr. PITTMAN. And that proceeding does not displace that motion?

The PRESIDING OFFICER. Under the Chair's understanding of the unanimous-consent agreement, what may be regarded as the unfinished business before the Senate is the motion of the Senator from Montana.

Mr. PITTMAN. Very well.

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the joint resolution (S. J. Res. 85) authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensive observance of that greatest of all historic events, the bicentennial of the birthday of George Washington, which were:

To strike out the preamble.

On page 2, lines 8 and 9, to strike out "the President pro tempore" and insert "Presiding Officer."

On page 3, to strike out all after "to" where it appears the first time in line 15, down to and including "participation" in line 16, and to insert "communicate with governments of such nations."

On page 4, line 8, after the word "duties," insert a comma and "out of the amount appropriated."

On page 4, strike out all after "enacted" in line 11 down to and including "approved" in line 12.

Mr. FESS. I move that the Senate concur in the House amendments.

The motion was agreed to.

Mr. WARREN. I will ask the Senator from Missouri if he will yield to me a moment without taking him from the floor.

Mr. SPENCER. I ask unanimous consent that when I shall have yielded to the Senator from Wyoming I may resume the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Missouri? The Chair hears none. The Senator from Wyoming is recognized.

MRS. EMMA B. WOODS

Mr. WARREN. I ask for the present consideration of Senate Resolution 250, reported this morning from the Committee to Audit and Control the Contingent Expenses of the Senate.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wyoming?

There being no objection, the resolution was read, considered by unanimous consent, and agreed to, as follows:

*Resolved*, That the Secretary of the Senate is authorized and directed to pay out of the contingent fund of the Senate the sum of $6,000 to Mrs. Emma B. Woods, widow of the late Elliott Woods, Architect of the Capitol, said sum being the amount of one year's salary received by him at the time of his death.

REARRANGEMENT OF SENATE CHAMBER

Mr. COPELAND and others addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Missouri yield; and if so, to whom?

Mr. SPENCER. I ask unanimous consent that after I have yielded to the Senator from New York [Mr. COPELAND] I may resume the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Missouri?

Mr. NEELY. Mr. President, I shall have to object after this. I shall object to any more unanimous-consent requests, because the Senator from Missouri will in that way be able to keep the floor all afternoon.

Mr. COPELAND. I ask that the Senator from West Virginia withhold his objection until I have made a statement. I have a resolution which, unless it is passed to-day, will be of no value.

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from New York?

Mr. SPENCER. I understand the objection of the Senator from West Virginia was that after this unanimous consent he would object, but not to this one.

Mr. NEELY. Yes; I said after this.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from Missouri? The Chair hears none, and under the unanimous-consent agreement the Senator from New York is recognized.

Mr. JONES of Washington. Mr. President, I hope the Senator from West Virginia will not make that statement too positive until he may know the circumstances involved with reference to other cases.

Mr. NEELY. We will cross that bridge when we come to it.

Mr. JONES of Washington. I thought the Senator was closing the bridge.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. COPELAND. I ask unanimous consent for the present consideration of Senate Resolution 231, relating to the ventilation of the Senate Chamber.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New York?

Mr. BORAH. As I understand it, the resolution is to bring the Senate in touch with the outside world?

Mr. COPELAND. That is included as a possibility.

There being no objection, the resolution was considered by unanimous consent and was agreed to, as follows:

*Resolved*, That the Architect of the Capitol be authorized and directed, under the supervision of the Senate Committee on Rules, to consult with architects of repute and expert in ventilation and acoustics with a view to improving the living conditions of the Senate Chamber, and giving attention to rearrangement and reconstruction, including a plan to place the Chamber in direct contact with the outer wall or walls of the building, and to report with plans to the President pro tempore of the Senate on the first Monday of December, 1924. The expenses hereunder, not to exceed the sum of $10,000, shall be paid out of the contingent fund of the Senate.

### IMPORTATION OF CRUDE OPIUM

Mr. SMOOT. Mr. President, will the Senator from Missouri yield to me?

Mr. SPENCER. I ask unanimous consent that when I shall have yielded to the Senator from Utah I may be allowed to resume the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Missouri? The Chair hears none, and under the unanimous-consent agreement the Senator from Utah is recognized.

Mr. SMOOT. The bill (H. R. 7079) prohibiting the importation of crude opium for the purpose of manufacturing heroin is the bill which I ask unanimous consent to have considered at this time. There is a convention to be held in Europe within a very short time, and it is necessary that we pass the bill before that convention if we are going to have any effect in the convention as a Nation.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That subdivision (b) of section 2 of the act entitled "An act to prohibit the importation and the use of opium for other than medicinal purposes," approved February 9, 1909, as amended, is amended by striking out the period at the end of the first sentence and inserting in lieu thereof a comma and the following: "but no crude opium may be imported or brought in for the purpose of manufacturing heroin."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### CLAIMS OF COWLITZ INDIANS

The PRESIDING OFFICER. The Senator from Missouri will proceed.

Mr. JONES of Washington. Mr. President, will the Senator from Missouri yield to me?

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Washington?

Mr. SPENCER. I ask unanimous consent that when I have yielded to the Senator from Washington I may be allowed to resume the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and under the unanimous-consent agreement the Senator from Washington is recognized.

Mr. JONES of Washington. The bill (H. R. 71) is a bill authorizing the Cowlitz Indians to take certain of their claims to the Court of Claims. The bill has passed the Senate several times, and has now passed the House. It is in the ordinary form, referring the matter to the Court of Claims.

Mr. OVERMAN. Does the bill provide for judgment?

Mr. JONES of Washington. It does provide for judgment, but I am willing to modify it if the Senator insists upon it. It passed the House in that form, and I hope the Senator will not object.

Mr. OVERMAN. Hereafter I wish to suggest to Senators that all bills referring matters to the Court of Claims leave out the words "proceed to judgment." They have no jurors in that court. Just let the matter be referred to the court and let the court state the facts and report them to Congress.

Mr. JONES of Washington. I am willing to modify it to that extent.

Mr. FLETCHER. I think it is in the usual form.

Mr. OVERMAN. But many bills pass without that provision.

Mr. JONES of Washington. I am willing to strike out those words.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 71) authorizing the Cowlitz Tribe of Indians, residing in the State of Washington, to submit claims to the Court of Claims.

The PRESIDING OFFICER. The Clerk will state the amendment proposed by the Senator from Washington.

The READING CLERK. On page 1, line 10, strike out "to render final judgment" and insert "report to Congress," and on page 2, line 3, after "premises," insert the words "and report the same to Congress," so as to make the bill read:

*Be it enacted, etc.*, That all claims of whatsoever nature, both legal and equitable, which the Cowlitz Tribe of Indians, residing in the State of Washington, may have against the United States shall be submitted to the Court of Claims, with the right of appeal by either party to the Supreme Court of the United States for determination; and jurisdiction is hereby conferred upon the Court of Claims to hear and determine any and all such claims and report to Congress thereon.

The Court of Claims shall have authority to determine and adjudge the rights, both legal and equitable, of the said Cowlitz Tribe and of the United States in the premises, and report the same to Congress, notwithstanding lapse of time or statutes of limitations, and any payment including gratuities which the United States may have made to the said Indians shall not be pleaded as an estoppel, but may be pleaded as an offset in any suit or action, and the United States shall be allowed credit for all sums, if any, paid or expended for the said tribe. Any other band or tribe of Indians the court may deem necessary to a final determination of any suit or suits brought hereunder may be joined therein as the court may order. The suit or suits instituted hereunder shall be begun within five years after the date of the passage of this act by the Cowlitz Tribe of Indians as parties plaintiff and the United States as the party defendant. The petition or petitions may be verified by the attorney or attorneys employed in said claims by the Cowlitz Tribe upon information and belief as to the facts therein alleged, and no other verification shall be necessary: *Provided*, That upon the final determination of such suit or suits the Court of Claims shall have jurisdiction to fix and determine a reasonable fee, not to exceed 10 per cent of the recovery, and in no event to amount in the aggregate to more than $25,000, together with all necessary and proper expenses incurred in preparation and prosecution of the suit, to be paid to the attorney or attorneys employed by the said Cowlitz Tribe of Indians under contract approved as required by existing law, and such fee shall be included in the decree and shall be paid out of any sum or sums found due said tribe.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill bill to be read a third time.

The bill was read the third time and passed.

### L. A. SCOTT

The PRESIDING OFFICER. The Senator from Missouri will proceed.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Florida?

Mr. SPENCER. I ask unanimous consent that when I shall have yielded to the Senator from Florida I may be allowed to resume the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Missouri?

Mr. WADSWORTH. Reserving the right to object, my curiosity at last has been aroused. We are calling the calendar? If so, I wish to ask the Senator from Missouri to yield to me for the consideration of three or four bills that are on the calendar.

Mr. FLETCHER. We are not calling the calendar.

Mr. WADSWORTH. We ought to give an hour or two of the time of the Senate to the consideration of bills on the calendar instead of proceeding in this way.

The PRESIDING OFFICER. The Chair will suggest to the Senator from New York that under the present procedure, if continued, the calendar will be completed in a short time.

Mr. WADSWORTH. I have no objection. I merely want to understand the situation.

Mr. FLETCHER. The bill could have been passed while we have been having this discussion.

Mr. WADSWORTH. We had better understand how we are doing this, because I expect to participate if it is continued.

The PRESIDING OFFICER. The Senator from Missouri has proposed a unanimous consent request that after yielding to the Senator from Florida he be permitted to continue his remarks. Is there objection? The Chair hears none, and the Senator from Florida is recognized.

Mr. FLETCHER. I ask unanimous consent for the present consideration of the bill (H. R. 3537) for the relief of L. A. Scott. A similar bill has passed the Senate two or three times, and this bill has now passed the House.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury is authorized and directed to pay the sum of $3,578.62 out of any money in the Treasury not otherwise appropriated to L. A. Scott as compensation for and in full satisfaction of any claim for damages as a result of a collision between the mine planter *Maj. Albert G. Jenkins* and the American schooner *Golden State* at Pensacola, Fla.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. The Senator from Missouri will continue his remarks.

NORTHWEST TERRITORY GRANTS

Mr. NEELY and Mr. SIMMONS addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Missouri yield; and if so, to whom?

Mr. SPENCER. I ask unanimous consent that after I shall have yielded to the Senator from West Virginia [Mr. NEELY] I may be allowed to resume the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Missouri? The Chair hears none, and under the unanimous-consent agreement the Senator from West Virginia is recognized.

Mr. NEELY. I ask unanimous consent to have printed in the RECORD an article appearing in the West Virginia Bar, relating to the claims of West Virginia against the Federal Government growing out of the northwest territory grants.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AN IMPORTANT MESSAGE TO THE BAR OF WEST VIRGINIA—SENATOR CHILTON PRESENTS AN ILLUMINATING EXPOSITION OF THE CLAIM OF THIS STATE BASED UPON THE CESSION OF THE NORTHWEST TERRITORY

*To the Bar:*

For the purpose of bringing an important legal and public matter to the attention of the lawyers, as well as the people of West Virginia, I am asking you to do me the favor of publishing some notes of facts and authorities upon the claim of West Virginia against the National Government. As you are no doubt aware, in April, 1912, I introduced a bill in the Senate of the United States, the object of which was to give the consent of the United States to the bringing of a suit by West Virginia or any of the thirteen original States, to settle the trust, which, in my judgment, was created by the cession of the Northwest Territory to the old Confederation and which was accepted by the Continental Congress on March 1, 1784. This bill was approved by the Senate Judiciary Committee of two Congresses. It was passed by the Senate in the Sixty-fourth Congress, and was reported favorably by the Judiciary Committee of the House shortly before the expiration of my term as Senator.

The essential facts upon which this claim is based are set forth in the address which I had the honor to make in the Senate of the United States, on April 10, 1912. There are two barriers of a general nature to overcome before this claim can be brought out into the light of day and decided upon its merits. One is that, so to speak, it is covered with the dust of ages. The other is that lawyers and the people generally have not taken the time to study its merits. I fully realized at the time I brought the matter to the attention of the United States Senate that, in a way, I was challenging accepted history. Virginia has been held up by her own people and the people of the country as a great benefactor for having made the sacrifice of giving to the Nation the vast territory northwest of the Ohio River, comprising the States of Ohio, Illinois, Wisconsin, Michigan, and a part of Minnesota, to the National Government. Thus it is written down in history. And since it is now proposed to show to the country that such is not the exact truth, we must surmount, not only the plea of long acquiescence, but also hundreds of historical encomiums on the munificence of the mother State, extending from 1784 until a few years ago. None of the praise given Virginia for her munificence, in the hour of national peril and necessity, need be withdrawn. She gave with a bountiful hand, but history has, in its enthusiasm for a patriotic act, exaggerated, as usually is the case. I venture to say that if the bar of West Virginia, and the reading people of the State, will give but a few hours time to a study of the facts as they are, they will agree with me that our case is so strong and clear that it will survive both the inaccuracies of history and everything that can possibly be construed into acquiescence, on our part, in the assumed attitude of the Government.

In pressing this claim, as I have done on more than one occasion in the Senate, before the Committee on the Judiciary and before its subcommittees, to which this measure was referred, I have been confronted with the query: "Why do not the people of West Virginia take more interest in the claim and press it?" I was relieved somewhat by the resolution of the legislature of 1913, calling upon Senators and Representatives in Congress from this State to urge upon Congress, legislation which would enable West Virginia to be heard. The Legislature of Virginia has also passed resolutions of the same purport. However, it is plain that, as yet, there is not behind the movement that earnestness of conviction which is necessary to success. This is not said in a sense of complaining, because it is quite natural. It is not to be expected that many of our people have given that study and thought to the subject necessary to overcome impressions of accepted history; and it is to the credit of the people that they demand more than mere assertion before pressing a claim against their Government. I have an abiding conviction that when the whole State of West Virginia shall understand this case as it is, they will see to it that it shall be pressed upon Congress. It is in the earnest hope that the bar, the press, and the people may study this question, and be convinced of the justice of our claim, as I am, that I want to present, in your columns, the facts, and some of the arguments, in favor of the claim.

We must bear in mind always that the present Constitution of the United States was not ratified by sufficient States to make it effective until 1789. Before that we had a Confederation of the States, which was a very weak organization in which the Federal authority could not compel the States to pay taxes, nor do anything else. Up to 1781 Maryland had not joined the Confederation, so that instead of it being a federation of 13 States, it was a federation of only 12 States. In 1779 Maryland passed resolutions laying before the Continental Congress the reasons why she did not join the federation. These reasons were, speaking generally, that some of the States, including Virginia, had claims to western lands, and, Maryland argued, that in case the Colonies or States should gain their independence by the Revolutionary War, then being fought, those States could sell their lands in the West, thereby lessening their taxes, and thereby attracting population from the States not so favorably situated.

The Continental Congress then passed the following resolution:

> "*Resolved*, That copies of the several papers referred to the committee be transmitted, with a copy of the report, to the legislatures of the several States, and that it be earnestly recommended to those who have claims to the western country to pass such laws and give their Delegates in Congress such powers as may effectually remove the only obstacle to a final ratification of the Articles of Confederation; and that the Legislature of Maryland be earnestly requested to authorize the Delegates in Congress to subscribe the said article."

Note, in passing, that the western land situation was "the only obstacle to the final ratification of the Articles of Confederation" and that the Continental Congress was urging Maryland to ratify the articles, and thus complete the Confederation.

After this, to wit, in January, 1781, Virginia passed a resolution of her legislature, setting forth the terms upon which she would convey to the Federation her northwestern lands. In that resolution it was provided that the territory should be laid out and formed into States not less than 100, nor more than 150 miles square, and that the States should be distinct republican States, and admitted as members of the Federal Union. It provided, further, that the expenses incurred by Virginia in subduing the British posts and maintaining forts and garrisons and acquiring the territory, should be reimbursed by the United States; that the French and Canadian inhabitants, who professed themselves citizens of Virginia, should be protected in their holdings, and that a quantity of land, not exceeding 150,000 acres, should be allowed to Gen. George Rodgers Clark, and to his officers and soldiers, and thereafter it contained the following clause:

> "That all the land within the territory so ceded to the United States and not reserved or appropriated to any of the before-mentioned purposes, or disposed of in bounties to the officers and soldiers of the American Army, shall be considered as a common fund for the use and benefit of such of the United States as have become or shall become members of the Confederation, or Federal Alliance, of the said States, Virginia inclusive, according to their usual respective proportions in the general charge and expenditure, and shall be faithfully and bona fide disposed of for that purpose and for no other use or purpose whatsoever."

Immediately after this resolution of the Legislature of Virginia was passed—that is, in March, 1781—Maryland ratified the Federal compact, and from that time there was a Confederation of the thirteen original States. The bounty of Virginia had been sufficient to complete the Federal compact. All that the Continental Congress had asked her to do was "to remove the only obstacle to a final ratification of confederation" so as to bring Maryland into the Union. Virginia did it; and even before the cession was formally made, Maryland, relying upon the honor of Virginia to act in accordance with the resolutions of her legislature, and upon Congress to accept the trust, ratified and signed the Federal compact.

On March 1, 1784, Thomas Jefferson, Samuel Hardy, Arthur Lee, and James Monroe, Delegates from Virginia to the Continental Congress, presented the deed of cession to the Congress, in which deed the resolutions of January, 1781, were set forth at length, including the trust clause quoted above. Thereupon, Mr. Howell, of Rhode Island, presented a series of resolutions accepting the deed and the same was "enrolled among the acts of the United States in Congress assembled." As a matter of fact, before the final resolution was passed, a motion was made to accept the deed without the conditions named by Virginia, but that motion was laid on the table, and then the resolution of Mr. Howell prevailed. This action is contemporaneous with, in fact a part of, the history of the grant and its acceptance, which almost conclusively proves that Virginia, as well as the Congress, set some store upon the "conditions and stipulations" of the deed as Chief Justice Marshall afterwards designated this trust clause.

After this the United States decided to make five States out of the territory, and recognizing the conditions of the deed of cession, on July 7, 1786, it made application to the State of Virginia for its consent to change the conditions, so far as it related to the limits of new States; and on December 30, 1788, the General Assembly of the State of Virginia made the modification requested by Congress. See Journal of Congress, July 7, 1788; Hennings Statutes of Virginia, volume 12, page 780. This is mentioned here to show that the fact that the grant was not absolute was recognized by the Confederation. If the deed were absolute, what had Virginia to do with the situation afterwards? The necessity to obtain Virginia's consent arose out of the "conditions and stipulations" of the deed of cession; that same deed contained "conditions and stipulations" as specific as were those relating to the political status.

In 1789 the present Constitution of the United States was adopted. It is provided in that instrument that when adopted by nine of the States it should become effective as to the nine adopting it, and the ninth State ratified it in that year.

The Constitution, Article IV, section 3, provided that—

> "The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States or of any particular State."

The deed of cession gave the power to the Continental Congress to dispose of the land. It says that the property "shall be faithfully and bona fide disposed of," etc. But recognizing that it was necessary that there should be delegated to the new Government the power to dispose of the public domain, Article IV, section 3, was inserted. But can we not see the hand of the Virginian in the second clause, so modifying the general power of disposing of the public domain as to make it clear that the claim "of any particular State" should not be prejudiced by that general grant of power? What claim of any "particular State" could there have been except the claim arising from the grant or grants of western lands? Why should this clause guarding the "claim of any particular State" be inserted in the section dealing with the public domain except to protect the States under the western land grant?

Again, by accepting the grant, the old Confederation was made a trustee under the terms of the trust set out in the grant. Therefore, Article VI of the Constitution provides:

> "All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation."

The effect of this provision is that when the acts of the Confederation made it a trustee, the new United States became likewise a trustee. Note the words again, "all debts contracted and engagements entered into," etc. The framers of the Constitution were not satisfied to protect "contracts." It might be doubtful that the acceptance of the trust was a contract on the part of the Confederation, since the latter probably had no power to enter into such a contract. But it had, nevertheless, engaged to do so. The Confederation had an "engagement" to act as trustee, and that "engagement" was recognized in the new Constitution. There are many other material facts and details of this momentous transaction, all of which, so far as I have been able to construe them, speak for the contention of Virginia and West Virginia rather than against it, and I do not take the space to recite them here. If this movement shall ever develop into a litigation, no doubt the industrious lawyers will bring them out and analyze and mass them upon the one side or the other of the controversy. But no one will ever find any release or waiver by Virginia of the trust contained in the original grant and in the resolutions of 1781.

I now desire to call attention to the terms of that trust. First, let us inquire what land was embraced in it: for besides the political considerations of the grant, Virginia conveyed the fee of the land. The trust provides that "all the land within the territory so ceded and not reserved or appropriated," etc., "shall be considered as a common fund," etc. This is clear, because immediately preceding this clause of the deed of cession it explicitly states what land should be reserved. In administering the trust the United States had no trouble in specifying the reserved lands, and it promptly and without trouble took possession of all of the land not so reserved or appropriated in the grant. This brings us to the other terms of the trust, as follows: "Shall be considered as a common fund for the use and benefit of such of the United States as have become or shall become members of the Confederation, or Federal Alliance, of the said States, Virginia inclusive," etc. It is my contention and claim that this clause meant that the thirteen original States should be the beneficiaries, and not the forty-eight States which constitute the Union, nor the entity, the United States, as afterwards organized; and that for the following reasons: First, the States were to participate "according to their usual respective proportions in the general charge and expenditure." The only States which could have paid, or did, in fact, pay anything into the general charge and expenditure, were the thirteen original States which formed the Confederation, which continued in the Federation until the new Constitution was adopted, carried on the Revolutionary War, and brought it to a successful conclusion. There is nothing uncertain about this description, because by Article VIII of the Confederation the expenses of the war were paid out of a common fund "supplied in proportion to the value of the land in each State." This provision of the Articles of Confederation was carried into effect by the appointment of commissioners to value the land in each State, and upon this basis of valuation each State paid into the common fund. Not a single one of the 35 States which have been admitted into the Union since the Constitution was adopted could come in as answering the descriptive terms "according to the usual respective proportions in the general charge and expenditure," nor could any one of them claim they "had become members of the Confederation or Federal Alliance."

At the time Virginia passed her resolution, and at the time the deed of cession was made and accepted, there were no entities or organization of States except the thirteen original States.

The reason why Virginia described them as States which "have become, or shall become, members, etc.," was that Maryland had not at that time joined the confederation, and the very purpose of Virginia in making the grant, as I have shown, was to induce Maryland to become a member of the confederation. If Maryland had not joined the confederation she could not have participated. It seems impossible to escape this conclusion, when the history of the transaction is taken into consideration. How can it be controverted that the 35 States, which then had no political or other existence, and did not pay, and could not have paid, anything into the "general charge and expenditure," were not meant to be embraced as beneficiaries in the trust. Secondly, bear in mind the words, "Virginia inclusive" in the trust clause. Virginia intended to make it plain that she, the grantor, should be included among the beneficiaries of the trust. The Constitution could have been ratified by 9 States, and it was among the possibilities that Virginia would not ratify it. Indeed, it was ratified by only 10 majority in the Virginia convention. It might have happened that 9 States would have adopted the new Constitution and

that Virginia would have failed or refused to do so, and that then the 9 adopting it would have formed the present United States Government. In that event, those who may claim that the adoption of the Constitution wiped out all that happened before, or that the condition of the grant embraced the States which were afterwards admitted into the present United States, would put Virginia in the strange attitude of creating a trust, in which the trustee would have the right to ignore, not only the essential conditions of the trust, but also leave out Virginia as a beneficiary. By the words, "Virginia inclusive" the intent to make the beneficiaries separate States and not the general entity of the Union as it might thereafter develop, becomes clear. It so happened that Virginia did ratify the Constitution, but we must look upon this trust and construe it so as to make it consistent with the ratification or failure of ratification by Virginia. If Virginia had failed to ratify the Constitution, certainly the 9 States could not have dissolved the old confederation, converting a trust intended for the 13 States into a trust for the benefit of the 9 States ratifying, leaving Virginia entirely out. It is clear to me that this trust, or what is the same thing, "the use and benefit of this land," was intended for the 12 States which had ratified the old confederation, and for Maryland, if she did thereafter come in, which she did, and that Virginia and the old confederation thoroughly understood that the bounty of Virginia extended to the 13 colonies or States with whom she had been associated during the Revolutionary War, and each was to participate in the "use and benefits" in the proportion that it had contributed to the expenses. Thus there was created a trust wherein the property is described, the trustee is named, the beneficiaries designated with accuracy, so that a clerk with a pencil can in a short time ascertain from public records the exact interest which each beneficiary has in the trust. With that intention, Virginia provided that this trust fund or property "shall be faithfully and bona fide disposed of for that purpose, and for no other purpose whatsoever." What defense could the defaulting or delinquent trustee make under such an instrument in a court of equity were the beneficiaries and trustee individuals instead of sovereign States?

West Virginia claims that the United States has not been faithful to that trust. This territory embraced, as nearly as can be ascertained, the following acreage:

| | |
|---|---|
| In Ohio | 25, 576, 960 |
| In Indiana | 21, 937, 760 |
| In Illinois | 35, 465, 093 |
| In Wisconsin | 34, 511, 360 |
| In Michigan | 36, 128, 640 |
| In Minnesota, east of Mississippi River | 16, 588, 800 |
| Total | 170, 208, 613 |

This land has been granted to States for local uses, to individuals, to colleges and schools, and the rest of it has been sold and the money covered into the Treasury of the United States, and even this latter, instead of being paid to each of the thirteen original States in the proportion that they severally paid into the "general charge and expenditure" during the time of the confederation, has been expended for governmental purposes on the general account of the United States Government.

There is no contention that the land can be recovered, because the right to dispose of the land was specifically vested in the trustee by the deed of cession, and section 3 of article 4, as we have shown, also gives the Congress that power. It need not be inquired into now as to how this power granted by the Constitution would have affected the situation if the original deed had not granted the power. Inasmuch as both the deed and the Constitution gave the power to Congress to sell the trust subject, no one of the beneficiaries can complain that the property was sold. But the beneficiaries can complain that the trustee gave away the trust subject and converted the proceeds of the land sold to purposes other than those specified in the trust.

If the above propositions are correct, the United States stands in the position of a delinquent trustee, which is one of the most unenviable positions which an individual, a corporation, or a municipality can occupy. The old confederation had taken into her hands a sacred trust. The reasons which moved Virginia to part with her land were that the original Federal compact, formed to prosecute the Revolutionary War, could not be completed without a sacrifice on Virginia's part. Besides, the Federal Government at that time was without funds and without much credit. Virginia placed a vast domain of over 170,000,000 acres of land into the hands of the then Federal Government, which at once gave it credit and standing and removed causes of dissension among the thirteen original States. Virginia was willing that her 12 sister States should participate with her in this "common fund," and she, therefore, guarded the grant so that these 12 sister States should each participate with her, each to have the same proportion in the proceeds of the land that it had contributed to the "general charge and expenditure." But Virginia never contemplated that 9 States, or 13 States, either with her or without her, could thereafter form a government, put into the Constitution of the new Government a clause making the new Government a trustee, as was the old confederation, and convert the deed of trust into an absolute deed in fee simple to any Government of the United States which might thereafter develop. She did not contemplate that there would be 35 States formed from the territory conveyed as from territory purchased from Spain and France, and from territory acquired by war or treaty, and that these 35 States, who had no existence and were not in contemplation when the original deed was made, and which could not, and did not, pay anything into the "general charge and expenditure" for prosecuting the Revolutionary War, should be the beneficiaries the same as those it had so specifically described in the original deed. It is not right, legally or morally, for the present National Government to take any position which will do violence to the self-evident intention of the parties to this transaction in 1784.

One word regarding Virginia's title. It is sufficient to state that under the deed the United States acquired possession and has conveyed title to the land embraced in the deed. It does not now lie in the mouth of the United States to say that the grantor in the deed of trust did not have title to the land, as an excuse or defense for not paying over the money in her hands as trustee derived from its sale. No claim is being made by any grantee. The United States has never been called upon to repay a dollar which she received for the sale of any of these lands. Her title, derived from Virginia, has been sanctioned by the Supreme Court of the United States (Graham's Receiver *v.* McIntosh, 8 Wheat. 543). By the way, in this case Chief Justice Marshall recognized that the deed from Virginia to the confederation was made upon "certain stipulations and conditions," and that is all that West Virginia claims now. But whatever may be said about the claims of New York, Connecticut, Massachusetts, or other States to the Northwest Territory, Virginia had the oldest title and asserted it. By her energy, and with her arms and means, she conquered the Northwest Territory, and converted her paper title into an actual possession. Virginia arms, under George Rogers Clark, Lord Dunmore, Gen. Andrew Lewis, and others, settled by conquest the question of the paper title; and with her deed in 1784, Virginia gave actual possession, as well as the right of possession, to the then existing Federal Government.

If it should ever be decided that after the United States, as a trustee, had taken actual possession of the trust subject and had disposed of it and converted it into money without the title which she conveyed being challenged by a single grantee, she can herself raise the question of title, it may be safely said that Virginia will have no trouble in demonstrating that her grant from England was prior in time to all other claimants, and that she added to her superior paper title and energetic and successful fight for possession. The lawyers can hardly imagine that such a monstrous proposition of law will ever be urged.

Of course, the rights of West Virginia are based upon her partnership with Virginia up to the separation in 1863. It could hardly be possible that the considerations which have been gone over in the Virginia debt suit could fail to lead to the conclusion that West Virginia is entitled to a just and equitable proportion of all of the assets of Virginia up to the time that the new State was formed. I know of no opposition in Virginia now to this basis of settlement, so far as this claim is concerned. The two Senators from Virginia stated, at the time my bill was introduced in the Senate, that Virginia conceded that West Virginia would be entitled to her proportion of whatever might be recovered from the Federal Government. I am sure that upon that point there will be no serious dispute.

I have always entertained grave doubt as to whether or not this suit could be brought in the Court of Claims. I had not examined the question with much care when I introduced the first bill. My theory then was that legislation would be required to give the consent of the Federal Government to its being sued.

I confess that a more recent investigation of the subject has left some doubt in my mind as to whether a suit can be brought now in the Court of Claims. In the case of the United States *v.* Louisiana (123 U. S. 32) it is held that the Court of Claims has jurisdiction of an action brought by a State against the United States for a demand arising upon an act of Congress. Before that time it had been contended that the clause of the Constitution giving the Supreme Court original jurisdiction in a suit in which a State was a party would prevent a State from suing in the Court of Claims. The case quoted settles that question, but it leaves open two points: First, whether or not this is a demand arising upon an act of Congress; and, second, when the statute of limitations of six years would begin to run, if it could run at all in favor of a trustee under the circumstances in this case. I will not discuss these two points, because I think the better way is to get authority from Congress to bring the suit in the Supreme Court of the United States and settle the question once and for all. But it might be well for those in authority to look into this question of the right to sue in the Court of Claims and the advisability of doing so. That is not a matter for me to decide, but it would seem to me that the right to do so would be very doubtful.

The purpose of the bill which I have introduced is to give the consent of the Federal Government to a suit. It does not ask for any money settlement by the Federal Government; it does not ask Congress to commit itself to anything, except to the proposition that the Federal Government can not afford to occupy the relation of a defaulting or delinquent trustee, especially where the beneficiaries are sovereign States. West Virginia can well urge, and I fell convinced that Virginia will second her every move in this direction, that the United States can not afford to deny to a sovereign State the right to litigate so important a matter. Indeed, it would seem to me that the Federal Government ought not to deny to a State the right to sue in the Federal court on any matter. But when it comes to a case wherein it is claimed that the Federal Government is a defaulting, delinquent, or negligent trustee, and that she is taking the benefit of a defect in the Constitution to withhold from States money or property which was placed in her hands for a purpose as sacred as the consummation of the original Federal compact and the successful prosecution of the Revolutionary War, the citizens of the country should hang their heads in shame till a settlement be made. The right to sue in the Court of Claims has already been given to Indians, Indian tribes, corporations, and individuals. Liberal with all private interests, why should the Government be a hard taskmaster with the sovereign States which gave it birth? Some court, some tribunal, must sooner or later do justice in this important matter, and it has seemed to me that now is the time for the legal profession to give the matter consideration, and for the people to consider the question fully and carefully; and, unless the judgment of the State is against my contention, let us press this claim with the vigor and determination which we have shown in other matters where the rights of all are involved.

We have been forced to submit to the decision of the Supreme Court of the United States in a case wherein a judgment for over $12,000,000 has been rendered against us. Whatever we may do or say, however much we may believe that no such judgment should have been rendered, it is on record against us as the judgment of the highest court in the land, and to us that means the highest court on earth. In our uncertainty and doubt over this unfortunate situation in which we have been placed we find that the Federal Government owes us on a solemn contract the proceeds of an inheritance reserved to us by our forefathers of Virginia, possibly written by the hand of the great Jefferson, as he was one of the delegates who presented the deed. Shall we give it up? Shall we ignore a claim which seems so just and the evidence of which is so clear? Shall we sit by and do nothing? Or shall we grasp this opportunity like young, vigorous West Virginians are accustomed to do in everything, and by compelling power of a united, determined effort make the Halls of Congress ring with the demand for justice. With such a cause we can not and will not fail if we do our full duty.

CHARLESTON, W. VA., *July 23, 1915.*

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. SIMMONS and Mr. BRUCE addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Missouri yield; and if so, to whom?

Mr. SPENCER. I ask unanimous consent that when I shall have yielded to the Senator from North Carolina I may be allowed to resume the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from North Carolina is recognized.

MEMORIAL ADDRESSES ON THE LATE HON. CLAUDE KITCHIN

Mr. SIMMONS. Mr. President, I ask unanimous consent to have printed in the RECORD a brief statement by myself with reference to the life and public services of the Hon. CLAUDE KITCHIN, late minority leader of the House of Representatives. Memorial services were held in the House for the late Mr. KITCHIN and the volume embracing the speeches of Mr. KITCHIN'S colleagues on that occasion will shortly be printed. I wish my brief statement to appear in that volume. Mr. KITCHIN was one of the greatest parliamentary leaders and debaters of the present day.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. SIMMONS. Mr. President, I can not permit this session of Congress to close without paying a personal tribute to the great party and parliamentary leader of the body at the other end of the Capitol who has lately passed to the Great Beyond. The House has already held memorial services in honor of Mr. KITCHIN and his colleagues in that body have spoken in just and deserved eulogy of his life and his high public service.

The old practice of holding memorial services in the Senate for Members of the House, however distinguished, has fallen into disuse. The position which CLAUDE KITCHIN attained and occupied in the Republic was so eminent and unusual, however, that it would not be fitting for the Senate to adjourn without further notice of his death than the resolutions of sorrow and condolence that have already been unanimously adopted in this Chamber.

CLAUDE KITCHIN was twelve consecutive times elected a Representative in Congress from the second congressional district of North Carolina. He entered the House at the early age of 31 years and his conspicuous ability and devotion to his country did not have to wait long for proper recognition. It is not too much to say that Mr. KITCHIN was the greatest debater and floor leader that the Democratic Party has had in the House of Representatives in this generation. I do not think that in the forum of debate he had any superior in his day in the United States. His work in committee and in the councils of his party was equally able and useful.

For nearly a decade prior to the time he was stricken on the floor of the House, our relations were peculiarly intimate and constant. Under the two terms of the Wilson administration Mr. KITCHIN was, during the greater part of the time, chairman of the Ways and Means Committee of the House and I was chairman of the Committee on Finance of the Senate, these two committees having direct charge and jurisdiction over financial, tariff, and internal revenue legislation of the Congress. In those hard and strenuous days and nights of the World War I had opportunity extraordinary to learn the quality of the steel and the character with which CLAUDE KITCHIN was fashioned. Although just a few years before, Mr. KITCHIN had opposed my reelection to the United States Senate, advocating instead the election of his brother, ex-Governor William W. Kitchin, who was one of the candidates opposing me and who himself had served many years in the House, the late House minority leader (then the majority leader) and I became the closest of friends in our work during the war.

For years before CLAUDE KITCHIN'S death, I do not think I had a more devoted or unselfish friend than he. I was proud of his friendship and I shall take joy from the memory of it as long as I live. One of the last letters that I received from him—it was written by his own hand—assured me that if I should have opposition for re-election to the Senate this year for my fifth term, he would, if humanly possible, arise from his sick bed and take the stump for me in the campaign. I fully reciprocated his affection, and the illness that struck him down in the prime of superb manhood and at the height of his power and usefulness brought deep personal grief to me, not only because of my affection for him but because I realized the severe loss that the country suffered in being deprived of CLAUDE KITCHIN'S services.

His gallant spirit was undaunted to the day of his death, and he never gave up. His love for his country reached the flood-tide, even as disease laid its hand heavily and more heavily upon his body. He never abated his intense interest in legislation and the government of his country. I have in my files letters from him, written with trembling hand, to show that even as he walked down into the Valley of the Shadow of Death his thoughts and solicitude were only for his country and his family and not at all for himself.

Mr. KITCHIN sprang from a brave and manly race. Both himself and his brother ex-Governor Kitchin were almost perfect specimens of the finest physical, intellectual, and moral manhood. For two hundred years, every drop of their blood had been American blood and North Carolina blood. Their father served in Congress before them. Their mother was a member of the distinguished Arrington family that had also given Representatives in Congress to the State.

CLAUDE KITCHIN'S home life was ideal. He was devoted to his wife and children and they were devoted to him. His private life was as pure as that of the purest woman. His life and career can not fail to be an inspiration for all time to the youth of the State that he loved and served so well.

Browning must have had in mind one such as CLAUDE KITCHIN when he wrote:

> One who never turned his back, but marched breast forward,
> Never doubted clouds would break,
> Never dreamed though right were worsted, wrong would triumph,
> Held we fall to rise, are baffled to fight better,
> Sleep to wake.

On May 31, 1923, in his home district, where he was loved as probably no man had been loved before, the knightly spirit of the great Democratic leader of the House of Representatives passed to the Master. He died as he lived, loving his friends, his family, his country, and his God—and quite unafraid.

I stood beside his grave and saw loving hands commit his body to his native soil, every inch of which he had loved with a holy love, while a vast multitude of North Carolinians stood

by, overcome with sorrow, and dazed with the realization that they would see him and have him for their leader and champion no more.

And now—

The storm of life has softened to a breeze
That gently woos the lilies on his grave;
No more of shipwreck, or of angry seas;
God give him rest—rest for the true and brave.

Mr. OVERMAN. Mr. President, I understood there were to be memorial services for CLAUDE KITCHIN in the Senate. I understand from the statement just made by my colleague that that is not going to be done. I therefore ask a similar privilege to that just rendered to my colleague, and ask the same order.

The PRESIDING OFFICER. Without objection permission is granted to the junior Senator from North Carolina as requested.

Mr. OVERMAN. CLAUDE KITCHIN was indeed a great man. His career was comparatively a short one, but like a star of the first magnitude he gradually rose higher and brighter in the political firmament until he could be seen and admired by all. Unfortunately his brilliant career was cut short before it had reached its zenith and his death caused the entire country to mourn. His fame, deservedly great, was not inclosed by the boundaries of his own State or section, and when the sad news of his death was spread over the country by the press it was given the place of honor in all of the papers of the country and carried in big headlines which told the people of the passing of one of their really great leaders.

Few North Carolinians ever shed more luster and glory upon their native State than did Mr. KITCHIN. It was shortly after he entered the House of Representatives that he impressed his colleagues and his countrymen with his great abilities and common sense and they knew at once that a new leader had come among them. In the last 60 years the House has had some great parliamentary leaders. Sam Randall, of Pennsylvania; Tom Reed, of Maine; James D. Richardson, of Tennessee; Champ Clark, of Missouri; and Joe Cannon, of Illinois, are some of the greatest. CLAUDE KITCHIN was the equal of any of these and in some respects their superior, especially in a running debate. When he drew his keen Damascus blade all with whom he contended went down thoroughly discomfited before his able reasoning, his shining wit, and his biting sarcasm, but because the contest was always pitched by Mr. KITCHIN upon such fair and friendly grounds none of the victims of his power ever went down with the sting which usually accompanies defeat. He was loved and admired both by his friends and opponents. He was recognized as a statesman of sublime courage, which was perhaps his chief characteristic. Other noble qualities which he possessed in a remarkable degree were his ringing sincerity, a strong love of truth and fair play, and an utter hatred of all sham, deceit, and hypocrisy. He was a militant "Son of Truth." Neither his friends nor his enemies could persuade him to depart from what he believed to be right in principle and morals. Once he saw the principle in a contest or question he would fight to the last ditch to establish it, and neither the thrill of winning a specious victory by compromise nor the enhancing of his reputation or popularity could move him from it.

The first time I ever met him was as a member of the platform committee of the State Democratic convention of 1900, both of us having had the honor of serving upon that committee, which was composed of some of the great leaders of the party, such as Gov. Thomas J. Jarvis, Josephus Daniels, Gov. R. A. Doughton, and James A. Lockhart. At that time the party was face to face with a crisis and the future success or failure of the party hung upon its action upon a certain resolution which had been presented to the convention by the leaders of the Populist Party. The resolution proposed that the Democrats fuse with the Populists in the coming campaign, and it was submitted to the platform committee for recommendation. Four years before the Populists had fused with the Republicans and they had carried the State by a very large majority, and consequently the temptation to fuse was great. When the resolution came before the committee Mr. KITCHIN, Mr. Lockhart, and myself fought it bitterly. The vote was very close when Gov. W. W. Kitchin, who was also a member of the committee and the only Democratic Member of Congress from North Carolina at that time, appealed to his brother to support the resolution, saying that W. J. Bryan, the Democratic presidential nominee, had written a letter advising such fusion, and that the failure to adopt the resolution would be a slap in the face of Mr. Bryan and would mean his (the governor's) defeat for Congress and the defeat of the party in the coming campaign in the State. But Mr. KITCHIN replied: "You are my brother, to whom I am devoted and whom I would be pleased to serve, but the integrity and success of the Democratic Party is nearer and dearer to me than your election to Congress and I can not go with you on the resolution." Then other outside and powerful influences were brought to bear upon him, but without avail. The resolution was defeated by a majority of one, CLAUDE KITCHIN casting his vote against it. Mr. KITCHIN was then a very young man, just beginning his political career, and I have never seen such sublime and heroic courage as was exhibited by him on that occasion, for when his youth, the time and place, and the influences brought to bear upon him are considered, it will be seen that such a vote could only have been given by a very strong and brave young man. The resolution was defeated by his vote and the result was the election of Charles B. Aycock as governor of the State, the reelection of his brother to Congress and a great Democratic victory, the disruption of his party avoided, and the preservation of its time-honored principles.

At another time in a great crisis was this wonderful courage and independence shown. The war resolution was before Congress, and both parties were almost unanimously in its favor and the public sentiment throughout the entire country and the people of his State and district were in favor of it, yet against the advice and appeals of his friends Mr. KITCHIN almost solitary and alone voted against it. He was honest. He sincerely believed that war between this country and Germany could be avoided; that it was unnecessary, and therefore he voted against it. But when war was declared, with all his energy and ability, he gave Woodrow Wilson and his administration his unbounded and patriotic support, leading his party and the Republicans as well in the support of all of the great war appropriations and all legislative matters recommended by the administration for the carrying on of the war to the end that we might achieve a glorious victory. He loved his country and his people, but never could he be swerved by party or personal considerations from doing that which his conscience told him was right and proper.

He was a great student and was thoroughly prepared whenever he undertook the discussion of a great question so that it was impossible to trap him or throw him off his base in debate. He always invited interruption, and was never so strong and invincible as when on his feet answering interrogatories.

Of high character, of unimpeachable integrity, of sublime courage, a great lover of truth, a splendid statesman, never deserting a friend nor striking an enemy while he was down, few greater men have lived in our day and generation.

Within the circle of his home he was ever blessed with the devotion of a noble wife and with the passionate love of his children, and he was never so happy as when surrounded by his wife and children in his beautiful home. His family worshiped him, his district and his State were proud of him and loved him, and the country at large felt the same pride and gave him the same confidence it always feels and gives a great public servant in whose courage and integrity it has complete confidence.

He was sick a long time, but he bore it all with the same courage and patience exhibited by him during his whole life. Finally weak, tired, and exhausted, he fell asleep. He so lived that when his summons came to join—

The innumerable caravan which moves
To that mysterious realm where each shall take
His chamber in the silent hall of death,
He went, not like the quarry slave at night
Scourged to his dungeon, but sustained and soothed
By an unfaltering trust, approaching his grave
Like one that draws the drapery of his couch
About him, and lies down to pleasant dreams.

## MEAT-PACKING INDUSTRY

Mr. BRUCE and Mr. FRAZIER addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Missouri yield; and if so, to whom?

Mr. SPENCER. I ask unanimous consent that when I shall have yielded to the Senator from North Dakota [Mr. FRAZIER] I may be allowed to resume the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. FRAZIER. I ask unanimous consent to have printed in the RECORD a statement from the Farmers' National Council in regard to the effort to modify the setting aside of the

packers' agreement. The statement shows how the packers in the past have controlled the meat products to the injury of both the producers and the consumers.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota? The Chair hears none, and it is so ordered.

The statement is as follows:

[Farmers' National Council, Bliss Building, Washington, D. C., Hon. Herbert F. Baker, president; Mrs. George P. Hampton, treasurer; Benjamin C. Marsh, managing director]

WHY THE MEAT PACKERS FIGHT DESPERATELY TO HAVE CONSENT DECREE SET ASIDE

The Federal Trade Commission, in its report to the President on profiteering in 1918, said regarding the meat packers:

"Five meat packers, Armour, Swift, Morris, Wilson, and Cudahy, and their subsidiary and affiliated companies have monopolistic control of the meat industry and are reaching for like domination in other products. Their manipulations of the market embrace every device that is useful to them without regard to law. Their reward, expressed in terms of profit, reveals that four of these concerns have pocketed in 1915, 1916, and 1917, $140,000,000. However delicate a definition is framed for 'profiteering,' these packers have preyed upon the people unconscionably."

BIG FIVE MEAT PACKERS CONTROLLED FORTUNES OF COMPETITORS

The Federal Trade Commission reported to the President on the meat-packing industry:

"It appears that five great packing concerns of the country—Swift, Armour, Morris, Cudahy, and Wilson—have attained such a dominant position that they control at will the market in which they buy their supplies, the market in which they sell their products, and hold the fortunes of their competitors in their hands.

"Not only is the business of gathering, preparing, and selling meat products in their control but an almost countless number of by-product industries are similarly dominated; and not content with reaching out for mastery as to commodities which substitute for meat and its by-products, they have invaded allied industries and even unrelated ones.

"The combination has not stopped at the most minute integration but has gone on into a stage of conglomeration, so that unrelated heterogeneous enterprises are brought under control."

BIG FIVE MEAT PACKERS CONTROLLED 500 SUBSIDIARY CONCERNS

The commission stated:

"The menace of this concentrated control of the Nation's food is increased by the fact that these five corporations and their five hundred and odd subsidiary, controlled, and affiliated companies are bound together by joint ownership, agreements, understandings, communities of interest, and family relationships.

"The combination among the Big Five is not a casual agreement brought about by indirect and obscure methods, but a definite and positive conspiracy for the purpose of regulating purchases of livestock and controlling the price of meat, the terms of the conspiracy being found in certain documents which are in our possession."

HOW BIG FIVE USES POWER UNFAIRLY AND ILLEGALLY

The commission states:

"The power of the Big Five in the United States has been and is being unfairly and illegally used to—

"Manipulate livestock markets;

"Restrict interstate and international supplies of foods;

"Control the prices of dressed meats and other foods;

"Defraud both the producers of food and consumers;

"Crush effective competition;

"Secure special privileges from railroads, stockyard companies, and municipalities; and

"Profiteer.

"The packers' profits in 1917 were more than four times as great as in the average year before the European war, although their sales in dollars and cents at even the inflated prices of last year had barely doubled."

THE BIG FIVE MISSED NOTHING FROM HIDES TO CURLED HAIR

The commission's investigation showed:

"Control of the meat industry carries with it not only control of all kinds of fresh and preserved meats, but in addition a very great competitive advantage in more than a hundred products and by-products arising in connection with their preparation and manufacture, ranging in importance from hides and oleomargarine to sandpaper and curled hair. In all these lines the Big Five's percentage of control, as compared with other slaughterers, is greater even than the percentage of animals killed, because of the fact that many of the small packers are not equipped or have been unable to utilize their by-products."

The Big Five were strongly entrenching themselves in the following among hundreds of lines of unrelated business.

1. All possible substitutes for meat, such as "fish, poultry, eggs, milk, butter, cheese, and all kinds of vegetable-oil products, and have secured strategic points of collection, preparation, and distribution of these products."

2. Canned fruits, vegetables, etc.:

"Fruit and vegetable canning and preserving are remote from slaughtering and meat packing, but the big packers, through ownership of refrigerator car lines and their branch house system of distribution, possess special advantages for control of this field of industry. The Big Five's advantage in this field rests not so much on their ownership of canning factories, although in some branches their output amounts to more than a quarter of the total for the United States, as upon their rapidly growing control of the wholesale distribution of canned goods."

3. Staple groceries and vegetables—such as rice, sugar, potatoes, beans, and coffee, and they had "increased their sales at such a great rate that in certain of these lines they have become dominant factors."

4. Fertilizers, hides, leather, and wool: "The Big Five not only handle more than three-fourths of the hides and skins produced by interstate slaughterers but directly or through their subsidiaries, or through leases or contracts, tan a large part of the leather produced in the United States," the Trade Commission showed.

INSTRUMENTS OF CONTROL AND MONOPOLY

"These strategic positions, which serve not only to protect the controls which the big packers have already acquired but to insure their easy conquest of new fields are:

"Stockyards, with their collateral institutions, such as terminal roads, cattle-loan banks, and market papers.

"Private refrigerator-car lines for the transportation of all kinds of perishable foods.

"Cold-storage plants for the preservation of perishable foods.

"Branch-house system of wholesale distribution.

"Banks and real estate."

BIG FIVE PLAN TO CONTROL NATION'S FOOD SUPPLY SOON

"Last year (1917) the Big Five's combined sales totaled $2,127,245,000. At the present rate of expansion, within a few years the big packers would control the wholesale distribution of the Nation's food supply."

BIG FIVE GET EASY CREDIT THROUGH CONTROL OF BANKS

The Big Five meat packers were represented, the Federal Trade Commission reported, "on the board of directors through members of the individual families or through officers, directors, or confidential employees of the packing companies" in three banks in each of the cities: Boston; Kansas City, Mo.; Wichita, Kans.; and Omaha; 9 in New York; 25 in Chicago; 5 in St. Joseph, Mo.; 2 in each of the cities of South St. Paul and San Francisco; and 1 in Portland, Oreg.; Denver, Colo.; Fort Worth, Tex.; Oklahoma City; Sioux City, Iowa; and East St. Louis, Ill. All of these are important packing centers.

BIG FIVE WANT TO CUT MELLONS IN EVERY FIELD

In 1921 the gross income of corporations manufacturing food products, liquor, and tobacco was $8,269,546,864, of those manufacturing leather products $1,417,997,579—a total of nearly $10,000,000,000.

The packers' consent decree entered by the court in 1920 by agreement between the then Attorney General, A. Mitchell Palmer, and the meat packers, was largely due to the fear of the "Big Five" meat packers that Congress would enact legislation definitely keeping them out of these unrelated lines of business.

They had good reason to fear this. On May 26, 1903, the Supreme Court of the United States issued a permanent injunction against the big packers, ordering them to refrain from specified practices which were in violation of the antitrust law.

The Federal Trade Commission in its report on the meat-packing industry stated:

"But how little the big packers respected the courts of the Nation and feared its law is revealed by the fact, which has since come to light, that almost coincident with the application for an injunction the three largest—Armour, Swift, and Morris—secretly set to work to buy up many of their actual and potential competitors, with the object of forming a gigantic merger, monopolizing almost completely the entire meat industry."

BIG FIVE MEAT PACKERS FEARED INDICTMENTS

The Federal Trade Commission gives details of the meat packers' conspiracy and violation of the injunction and laws of the Nation.

The injunction forbade the meat packers to refrain from bidding against each other in the purchase of livestock or at the sale of livestock, or "by combination, conspiracy, or contract raising or lowering prices," but the meat packers violated nearly every provision of this injunction, so that in 1916 the representatives of several of these meat packers—R. C. McMannus, J. M. Chaplin, and R. D. White—wrote to their employers:

"If we are to avoid indictments, we must immediately decide upon such steps as will first bring better feeling, by showing a disposition to cooperate."

Another committee of packers' employees stated that year:

"As matters now stand criminal prosecutions are sure to follow."

In 1916 the Federal Trade Commission made its marvelous report on the entire meat-packing industry, the most complete exposé of big business methods and manipulations ever made by a government agency. The Nation was shocked by the revelations as it has been shocked by the current revelations about Teapot Dome, the Veterans' Bureau, the Shipping Board scandals, and the Department of Justice.

* * * * * * *

HOW THE BIG FIVE WROTE THE LAW TO CONTROL THEM, AND CONTROLLED THEIR "CONTROLLER"

The Big Five meat packers next proceeded to control the Senate and the House of Representatives of the United States in the writing of the so-called "packers and stockyards act of 1921," keeping all teeth out of it.

They defeated the effort of the progressive forces of the Nation to have the administration of the packers and stockyards act vested in the Federal Trade Commission, and put it under the Secretary of Agriculture, Mr. Wallace.

They next forced or persuaded Secretary Wallace to appoint two of their tools, Mr. Chester Morrill and Mr. Charles J. Brand, to enforce the act, and so they have controlled their controllers. They then "persuaded" Secretary Wallace not to compel them to install a uniform system of accounts; for that would have revealed their manipulations and profits. They pulled the wool over Secretary Wallace's eyes, till Armour and Morris were merged.

Over two years ago they made a big effort to have the consent decree set aside. They failed. The present is their second effort to get back into the trough with both feet.

The American people must not permit a nation-wide food trust.

BIG FIVE WIN POINT IN COURT DECISION

The decision of the Court of Appeals of the District of Columbia that the California Cooperative Canneries may intervene in action to set aside or modify the packers' consent decree appears to be a significant point in favor of the meat packers who projected the consent decree to prevent legislation to stop their monopolization of food distribution. The court asserts that a lower court would not be sustained in declaring the packers' combination illegal "if its effect is to safeguard one public interest by the destruction of another."

The circuit court of appeals recommends that the District of Columbia Supreme Court investigate whether the effect of the packers' consent decree has been to encourage a monopoly by the wholesale grocers. This is an implied criticism of the lower court for entering the packers' consent decree of former Attorney General Palmer for agreeing to the consent decree and of present Attorney General Stone for not proceeding against the wholesale grocers with sufficient vigor or at least investigating whether they are creating or threaten a monopoly.

The decision does not set the consent decree aside nor modify it; it does indicate a question in the mind of the court whether such action would not be wise. This decision makes clear, however, the imperative need of legislation to keep the meat packers out of unrelated lines of business, which will be sought in the next Congress. The possibility of a monopoly does not justify court protection of an established and growing monopoly, which the Federal Trade Commission's report on the meat-packing industry showed the Big Five packers to be even before the Armour-Morris merger. Definite congressional action, not the decision of a court, is the proper and orderly way to determine questions of such scope and importance.

ATTORNEY GENERAL SOUGHT TO END PACKERS' MONOPOLIES

In the Attorney General's petition for the entry of the packers' consent decree filed in the Supreme Court of the District of Columbia February 27, 1920, he stated:

"This petition is filed and these proceedings are instituted to put an end to any and all monopolies which the defendants may have created or obtained in the interstate trade or commerce of livestock, meat products, and substitute foods and to prevent the continuance of unlawful monopolies by the defendants, in the aforesaid trade or commerce in the products and commodities so described and to deprive said defendants of certain instrumentalities, facilities, and advantages by which they have been enabled theretofore to more effectively perfect their attempts to monopolize; to compel the defendants to desist from dealing in certain of the substitute foods and certain of the unrelated commodities; to limit in the manner hereinafter set forth the interests which the individual defendants may have in corporations handling certain substitute foods and unrelated commodities; and to dissolve any and all contracts, combinations, and conspiracies in restraint of trade or commerce between the several States, which contracts, combinations, or conspiracies are more fully hereinafter described, and to prevent said defendants from maintaining said contracts, combinations, or conspiracies with each other, or from entering into further contracts, combinations, or conspiracies with each other or with other persons."

BIG FIVE MEAT PACKERS HAD MACHINERY COVERING THE NATION

Discussing the machinery the Big Five meat packers had established to enable them to continue and expand their monopolization of food distribution throughout the United States, the Attorney General stated in this petition:

"The parent companies operated as of June, 1918, 1,297 route cars, which constituted 90 per cent of the total number operated in the packing industry. Said route cars reach and serve dealers in 37,176 towns and operate in 37 of the States of the United States.

"Autotrucks: This is a further development of the route-car plan. It had its origin in the development of the motor truck, and because of its freedom from railway limitations and schedules it is enabled to reach a wider radius and smaller towns than is the route car. The autotrucks have been adopted primarily by Armour & Co. as a supplement to the car routes. These autotrucks reach and serve a total of 20,836 towns throughout the United States."

CONTROL OF SUBSTITUTE FOODS

The Attorney General stated that (in default of adequate legislation) a decree of the court was necessary to prevent control of the Nation's food by the meat packers. He said:

"Having eliminated competition in the meat products, the defendants (the Big Five meat packers) next took cognisance of the competition which might be expected from what we here refer to as substitute foods," and stated:

"These attempts to monopolize have resulted in complete control in many of the substitute food lines. They have made substantial headway in others. The control is extensively and rapidly increasing. New fields are gradually being invaded, and unless prevented by a decree of this court the defendants will within the compass of a few years control the quantity and price of each article of food found on the American table."

BIG FIVE CONTROLLED NEARLY SIX HUNDRED CORPORATIONS

The Attorney General stated:

"The parent companies of the individual defendants (the Big Five) and their families maintain and control 574 corporations or concerns, including 131 trade names. They have a significant minority stock interest in 95 others and an interest of unknown extent in an additional 93. Thus the total number of concerns in which they have control or interest is some 762. In the years that are past the parent companies have acquired or organized many other concerns and have maintained them so long as they were useful for their purposes. When no longer useful these concerns so acquired or organized have been dissolved and their businesses have been merged into that of the parent companies or that of other subsidiaries. Such dissolved corporations and concerns are omitted in the above compilation except in those instances where their names have been continued as trade names. The total of 762, above stated, therefore, falls far short of representing the total number of concerns that corporate and individual defendants have acquired or have organized in furtherance of the general scheme and plan of action already explained."

CALIFORNIA COOPERATIVE CANNERIES DUMMY FOR ARMOUR & CO.

The fact that the California Cooperative Canneries is a dummy for or influenced by Armour & Co. is shown by the admission of Mr. Vernon Campbell, its vice president and general manager, before the Interdepartmental Committee, representing the Attorney General, and the Departments of Agriculture and Commerce, which held hearings in 1922 on Mr. Campbell's application for a modification of the packers' consent decree to permit Armour & Co. to continue the distribution of the canneries' fruit pack. Mr. Campbell admitted that Armour & Co. loaned his company $200,000, which was used to construct their first packing plant at San Jose, Calif., upon which Armour & Co. held the mortgage at that time. He further admitted that Mr. Armour had given him Mr. Armour's authority to offer Mr. Armour's indorsement for the notes of the California Cooperative Canneries, and that both Mr. Armour and Mr. Wilson (of Wilson & Co.) had told him "that they would not resist modification of the decree."

MR. CAMPBELL FOUND SUBSTITUTE DISTRIBUTOR

Mr. Campbell testified to this committee that in 1921—a full year after the consent decree went into effect—they had sold a larger per cent of their pack at that time than they had sold the preceding year at the same time, although claiming a smaller pack.

It was provided in Mr. Campbell's contract with Armour & Co. that the prices to be paid the canneries for its product should be the same as those fixed by the California Packing Co., and that such

products were resold by Armour & Co. at the usual market prices. If any saving was effected by Armour & Co. in such distribution, that saving was kept by Armour & Co. itself as additional profits and did not benefit the consumer.

STEPS THE BIG FIVE PACKERS HAVE FOLLOWED TO CREATE MONOPOLY

The Big Five meat packers—

1. Agreed to the packers' consent decree to prevent legislation being urged before Congress to keep them out of unrelated lines of business. Mr. Campbell said regarding the decree: "When I talked to Mr. White, vice president (now president) of Armour & Co., I asked him why they had signed such a foolish arrangement, and he said they were holding a gun at his head and he had to do something."

2. Killed any real and adequate packer-control legislation.

3. Secured control of the enforcement of the packers and stockyards act, and have made it largely a nullity, as producers know from prices they get and consumers from prices they pay.

4. Have succeeded in getting a dummy to be allowed to intervene to break down the packers' consent decree, while they can seem to be satisfied with it.

The PRESIDING OFFICER. The Senator from Missouri will proceed.

AMENDMENT OF THE CONSTITUTION

Mr. BRUCE. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Maryland?

Mr. SPENCER. I ask unanimous consent that when I shall have yielded to the Senator from Maryland I may be allowed to resume my remarks.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Missouri? The Chair hears none, and under the unanimous-consent agreement the Senator from Maryland is recognized.

Mr. BRUCE. I ask permission to have inserted in the RECORD an essay urging conventions in the matter of constitutional amendments, by Mr. George Stewart Brown.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Maryland? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

[From the Baltimore Sun of May 22, 1924]

URGES CONVENTIONS FOR ALL AMENDMENTS—RECENT ACTS OF RATIFYING LEGISLATURES CITED TO SHOW NEED OF PEOPLE BEING CONSULTED ON CONSTITUTIONAL CHANGES

(By George Stewart Brown)

NEW YORK, May 21.—The people who have to live under constitutional changes have a right to be consulted in making those changes. If radical constitutional changes, however desirable they may seem to their advocates, are made without consulting the people, that is not only unfair and unjust to the people, but it is bound to result in irritation, confusion, and disrespect for our institutions.

John Marshall said in one of his most famous decisions:

> "The people made the Constitution, and the people can unmake it. It is the creature of their will. But this supreme and irresistible power to make or unmake resides only in the whole body of the people; not in any subdivision of them. The attempt of any of the parts to exercise it is usurpation and ought to be repelled by those to whom the people have delegated the power of repelling it."

After the experience of ratifications by legislatures in the case of the last two amendments no one can honestly claim that "legislatures" can be trusted to accurately record the will of the people of their States in ratifying Federal amendments.

A few glaring illustrations should be sufficient to demonstrate this to the most obtuse.

In Missouri and California the legislatures which voted to ratify the eighteenth amendment were elected at the same time that a popular referendum was had in those States on State prohibition. In both the people voted down prohibition by large majorities. Yet in the teeth of that popular decision the Missouri and California Legislatures ratified. No man can honestly claim that those legislatures had the moral right to thus falsely record the assent of the people of California and Missouri to the eighteenth amendment.

In our own State of Maryland we are all familiar with the fact that our legislature which voted to ratify was a hold-over legislature, elected before the amendment was proposed by Congress, upon entirely different issues, with absolutely no mention of national prohibition in the campaign. It is as plain as a pikestaff that our Maryland Legislature had no popular mandate and therefore no moral right to record the assent of the people of Maryland to the eighteenth amendment.

In Ohio the people of that State on referendum, by a close vote in one of the largest popular votes ever held in the State of Ohio, repudiated their own legislature's ratification of the eighteenth amendment itself. At the same time by a large majority they adhered to local prohibition. This showed that the people of Ohio had the sense to discriminate between local prohibition, remaining under their own control, and embodying a police law in practically irrepealable form into our charter of liberty known as the Federal Constitution.

This last illustration shows conclusively that ratifying legislatures in so-called dry States—and they were legion—had no right to assume that because their people had "local prohibition" they would necessarily approve degrading the Federal Constitution by inserting an irrepealable police law therein.

Those illustrations should be enough to convince any reasonable man that it is an outrage to submit Federal amendments to legislatures instead of to the people who must live under them.

The behavior of legislatures in voting upon the nineteenth amendment was even worse. There, out of the 38 legislatures counted as ratifying, one (Vermont) was elected by the vote of the women after the amendment had been actually proclaimed; 34 were elected before the amendment was proposed by Congress; 30 of these having been called into special session and some of them racing with each other to see which could ratify first. This was truly an appalling spectacle. Of the remaining 10, 9, which were mostly elected after proposal, and had a right, therefore, to claim a popular mandate, rejected the amendment, and one (Florida) respected the provision of its State constitution forbidding it to ratify because elected before proposal of the amendment.

Moreover, 13 of the 38 ratifying legislatures ignored previous negative referenda in their own States against State suffrage.

If in the light of these facts any Senator or Congressman insists upon referring this new grant of Federal legislative power to mere legislatures, he seems to be willing to get power, no matter how, and whether the people want him to have it or not.

Reference to "conventions," on the contrary, is, in effect, a popular referendum. There is no such thing as a "hold-over" convention. They must all be chosen after proposal and therefore enjoy a popular mandate for their acts.

Their members must be elected upon the direct issue, free and unconfused with all other issues. In each district a candidate will run pledged "for ratification" against a candidate pledged "against ratification," thus giving a direct popular vote.

After such conventions meet they will have nothing else to do except this particular duty for which they are especially chosen. They will therefore have full and complete opportunity to debate the proposal in all its ramifications and complications, for every grant of power covers implied powers not expressed in the amendment itself. There can be no stampede.

If after the above-recited performance of legislatures in recent ratifications Congress closes its eyes and blindly refers to them this new grant of Federal power, which invades the heart of American "local self-government" and practically destroys the very basis of American constitutional liberty, it will commit a grave wrong upon the American people. And if we sit supinely by and let them do it without protesting, we close our mouths for any further protest against the way the eighteenth amendment was put over us without our consent.

In other words, we will sanction and approve what has been previously done and deliberately invite its repetition.

Moreover, there will be little left to protest about in the future, for with express Federal power over child labor enabling statesmen from Utah and Texas to prescribe the rules for family life in Maryland and New York, and with similar power necessarily implied therefrom over child education, and Heaven knows what else, to enforce the labor mandate, no self-government worthy of the name, free from Federal interference, will remain to the people of the several States.

Of course, if our desire for self-government and individual liberty is limited to "booze," then we have already become a Nation of political illiterates and are past saving, and hardly deserve any protection from tyranny, even tyranny over our dining tables, and we might as well resign ourselves entirely to the tender care of the new ecclesiastical politicians who, from their pulpits, direct the ways of Congress.

Unless the Senate of the United States has lost its poise—and no matter how desirable it considers the child labor amendment may be—it will insist that the people be consulted in its ratification.

We are not petitioning our Federal agents in Congress for favors at their hands; nor are we discussing a question of policy. We are demanding that they obey and observe the most elementary principle of American liberty, familiar to every schoolboy who has read the Declaration of Independence, that governments derive their just powers only from the consent of the governed.

ORDER OF BUSINESS

The PRESIDING OFFICER. The Senator from Missouri is recognized again.

Mr. HARRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Georgia?

Mr. SPENCER. I ask unanimous consent that when I have yielded to the Senator from Georgia I may be allowed to resume.

The PRESIDING OFFICER. Is there objection? If not——

Mr. HALE. Mr. President, I object. There is a very important motion that has been made this morning to take up the motion to reconsider House bill 8687. I understood that at the close of morning business that matter was to be brought before the Senate. I shall object to any further unanimous-consent agreement of this nature.

The PRESIDING OFFICER. Objection is made and the Senator from Missouri will proceed.

Mr. HARRIS. Mr. President, I thought the Chair had recognized me.

The PRESIDING OFFICER. The Chair merely presented the request of the Senator from Georgia for recognition, and the Senator from Missouri asked unanimous consent that he might be permitted to yield. The Chair in his haste had about completed the formula, but the Senator from Maine was on his feet making his objection known, and therefore the Senator from Missouri can not, of course, yield to the Senator from Georgia.

The Chair will say further that the motion of the Senator from Montana [Mr. WALSH] stands in the same position as a resolution coming over from the previous day, and there being, strictly speaking, no unfinished business before the Senate, the Senator's motion is in order.

Mr. HALE. Mr. President, I move that the Senate take up for consideration the motion made by the Senator from Utah [Mr. KING] to reconsider the action by which House bill 8687 was passed.

Mr. WALSH of Montana. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Missouri [Mr. SPENCER] has the floor.

Mr. WALSH of Montana. Then I make the point of order that the Senator from Maine has no right to address the Chair.

The PRESIDING OFFICER. The point of order is well taken.

Mr. HALE. Mr. President, will the Senator from Missouri yield to me?

Mr. SPENCER. Mr. President, I did not catch the statement of the Chair with regard to the parliamentary situation. Will the Chair be good enough to repeat what he said?

The PRESIDING OFFICER. The motion entered by the Senator from Montana on yesterday in the opinion of the Chair stands before the Senate in the same position as a resolution coming over from a previous day and was reached in its regular order prior to 2 o'clock. There being strictly speaking no unfinished business before the Senate, the Senate continued discussion of that motion in the nature of a resolution coming over from a previous day, and upon that question the Senator from Missouri [Mr. SPENCER] has maintained his right to the floor. The Senator from Maine, as the Chair understands, wishes the Senator from Missouri to yield.

Mr. SPENCER. I call the attention of the Chair to Rule IX as to whether or not the motion of the Senator from Montana to proceed to the consideration of his report is in order after 2 o'clock.

The PRESIDING OFFICER. Of course it is in order after 2 o'clock, in the opinion of the Chair, because there was no unfinished business, and the motion is in the nature of a resolution coming over from the previous day.

## LEASES UPON NAVAL OIL RESERVES

The Senate resumed the consideration of the motion of Mr. WALSH of Montana to adopt the report of the Committee on Public Lands and Surveys submitted pursuant to Senate Resolution 147.

Mr. SPENCER. I call the attention of the Chair to the suggestion that under Rule IX, after 2 o'clock there is a regular procedure on the calendar itself, a general order, and that therefore the motion of the Senator from Montana is out of order if a point of order is raised. It falls at 2 o'clock, because after 2 o'clock there is a special order.

The PRESIDING OFFICER. Does the Senator refer to the calendar under Rule VIII?

Mr. SPENCER. No. I refer to Rule IX, which provides:

> and not later than 2 o'clock, if there shall be no special orders for that time, the calendar of general orders—

Which is the general calendar—

> shall be taken up and proceeded with in its order, beginning with the first subject on the calendar next after the last subject disposed of in proceeding with the calendar; and in such a case—

There are certain motions which may be made, and only those motions. In neither one of those classes does the motion of the Senator from Montana come.

Mr. WALSH of Montana. Mr. President, this is an extraordinary situation. The Senate did proceed to the consideration of the motion; the Senator from Missouri claimed the floor to debate the motion, and now makes a point of order that the motion is not properly before the Senate.

Mr. SPENCER. I did so because I did not want to debate the motion.

Mr. WALSH of Montana. Rule IX is as follows:

> Immediately after the consideration of cases not objected to upon the calendar is completed—

We have not yet reached that, and therefore Rule IX can not possibly apply. That applies to what should happen after consideration of cases not objected to upon the calendar, and we have not yet reached that point—

> and not later than 2 o'clock, if there shall be no special orders for that time, the calendar of general orders shall be taken up.

We may reach that in due course, but it is not before us now.

Mr. PITTMAN. Mr. President, prior to 2 o'clock, at the time this procedure of the Senator from Missouri started, he yielding the floor to various Senators, I made a parliamentary inquiry and asked that the unanimous-consent request should include the statement that any interruption would not interfere with the business before the Senate. This matter was pending as the business before the Senate before 2 o'clock, and by unanimous consent was to continue as such, notwithstanding the interruptions of the Senator from Missouri.

The PRESIDING OFFICER. Even in view of reference to Rule IX, the Chair is of the opinion that the motion of the Senator from Montana is properly before the Senate. The Senator from Missouri is recognized, and is holding the floor to speak upon it.

Mr. SPENCER. Mr. President, again I wish to say to the Senator from Montana that now and at any time while I am speaking, if the judgment of the Senator from Montana leads him to defer this motion, which calls for no immediate action, I shall cooperate with him, for it is a duty and not at all a pleasure which I feel is imposed upon me at this time.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Montana?

Mr. SPENCER. I yield.

Mr. WALSH of Montana. I am very glad to advise the Senator from Missouri that the Senator from Montana does not even entertain the idea of postponement.

Mr. SPENCER. Knowing the Senator from Montana as I do, I am afraid that that is true.

Mr. WALSH of Massachusetts. Mr. President, will the Senator from Missouri yield to me for a question?

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. SPENCER. I will yield for a question.

Mr. WALSH of Massachusetts. Do I understand that the colloquy between the Senator from Montana and the Senator from Missouri means that the Senator from Missouri is likely to hold the floor until 7 o'clock this evening?

Mr. SPENCER. I shall finish as soon as I can, but I intend to discuss the matter at some length.

Mr. WALSH of Massachusetts. I judge from the Senator's statement that he does not intend to have a vote on this motion to-day.

Mr. SPENCER. I have no desire to prevent consideration of the motion; I shall not speak merely to prolong the consideration of the motion of the Senator from Montana; but in the presentation of the reasons why I do not think it ought to be agreed to there will be some time consumed by me.

Mr. WALSH of Massachusetts. And that may be until 7 o'clock this evening?

Mr. SPENCER. I should think not; I can not conceive of it being so long as that.

The PRESIDING OFFICER. The Senator from Missouri will proceed.

Mr. SPENCER. Mr. President, the report which is now before the Senate has been somewhat changed from the report that was originally presented to the Senate on June 4. Some of the corrections which I indicated when the report was first presented to the committee have been made in this report. I did not have the opportunity to present other mistakes and misstatements which a casual reading of the report evidenced, and many of them are still in the present report.

Mr. President, on page 3 of the report as presented by the Senator from Montana it is stated definitely and without qualification:

It was not intended at any time that the store of oil thus assured should be drawn upon for current use or for use at any time when the requirements of the Navy could be met by purchases in the open market.

That statement is not in accordance with the fact or the record of the testimony.

George Otis Smith stated that the withdrawals were made "for the present and future needs of the Navy."

One of the very issues in connection with the whole question of naval oil leases is as to whether or not the oil ought to remain in the ground or to be taken out of the ground and stored for use somewhere aboveground. The statement which I have just quoted which was made in the report that "it was not intended at any time that the store of oil thus assured should be drawn upon for current use," is not, as I have said, borne out by the record in the case.

I have quoted what George Otis Smith stated, that the withdrawals were made "for the present and future needs of the Navy."

More than this, a few years before 1920—in 1917—the Senator from Virginia [Mr. SWANSON] introduced a bill, referred to by Mr. Finney in his testimony of record before us, which proposed to authorize the Navy to drill the reserves or to have them drilled and to utilize the oil. That bill did not become a law, but it indicated the general trend of opinion at that time that the oil in the naval oil reserves should be utilized as the needs of the Navy might require.

From 1909 to 1920 the policy on the non-Navy oil lands might be characterized as no policy at all or even an attempt to define any definite policy, and the policy as to the naval oil reserves was precisely the same. The Walsh-Pittman bill, which was enacted as the general leasing act of February 25, 1920, gave no benefit to the Navy whatever. This fact ought not to be forgotten that under that general leasing act the Navy received nothing. The proceeds of the oil from the ground were divided, 10 per cent to the Government, a part to the States, and a part to the Reclamation Service, but the Navy secured no part of it. Secretary Daniels had a different policy and secured the passage of the act of June 4, 1920, with all the extensive powers which that bill gave to him as Secretary of the Navy, to which I may refer later on. The point we are now considering is as to whether the policy of Secretary Daniels when the bill of June 4, 1920, was introduced and passed was to keep the oil in the ground and not use it for the Navy or whether it was to utilize it. Commander Stuart, on page 783 of the record in the case, made a statement and then continued:

The reason that I say that is that the letter—

Referring to the letter from Secretary Daniels, which transmitted a draft of the act of June 4, 1920—

states that we wanted the oil for current use.

So that there was, at least, a difference of opinion, if not a well-defined purpose under the law of June 4, 1920, to secure that oil from the ground and, if necessary, to use it for immediate needs.

Secretary Daniels was opposed to drilling, even to protect the naval reserves from drainage, a policy which has cost the Government millions of barrels of oil. He wanted that oil conserved in the ground, and, as I shall show, or attempt to show, in a few moments, the oil in the ground did not help the Navy much. The oil stored on the surface for future use was of tremendous aid to the Navy. If a foreign nation should attack us, either upon the Pacific or the Atlantic coast, before we could get out the oil stored in the ground its usefulness in that attack would be nil. It takes two or three years to get the oil out of the ground.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Page, its Clerk, announced that the House had passed the joint resolution (H. J. Res. 259) establishing a commission for the participation of the United States in the observance of the one hundred and fiftieth anniversary of the Battle of Lexington and Concord, authorizing an appropriation to be utilized in connection with such observance, and for other purposes, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two House on the amendment of the Senate to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes.

## JOINT RESOLUTION REFERRED

The joint resolution (H. J. Res. 259) establishing a commission for the participation of the United States in the observance of the one hundred and fiftieth anniversary of the Battle of Lexington and Concord, authorizing an appropriation to be utilized in connection with such observance, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

## ADDITIONAL CLERK FOR THE COMMITTEE ON THE DISTRICT OF COLUMBIA

Mr. BALL. Mr. President——

The PRESIDING OFFICER (Mr. MOSES in the chair). Does the Senator from Missouri yield to the Senator from Delaware?

Mr. SPENCER. I ask unanimous consent that when I have yielded to the Senator from Delaware I may be allowed to resume.

The PRESIDING OFFICER. Is there objection? The Chair hears none. The Senator from Delaware.

Mr. BALL. I ask unanimous consent for the immediate consideration of Senate Resolution 244.

The PRESIDING OFFICER. The Senator from Delaware asks unanimous consent for the consideration of Senate Resolution 244, which will be read for the information of the Senate.

Mr. ASHURST. Let it be read in full.

The Secretary read the resolution (S. Res. 244), which had been reported from the Committee to Audit and Control the Contingent Expenses of the Senate on June 7 instant, as follows:

*Resolved*, That Senate Resolution No. 13, agreed to December 19, 1923, authorizing the Committee on the District of Columbia to employ an assistant clerk, be, and hereby is, continued in full force and effect until the end of the Sixty-eighth Congress.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

## POSTMASTERS AND POSTAL EMPLOYEES—VETO MESSAGE

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. SPENCER. I yield for a question.

Mr. WALSH of Massachusetts. I rise to make a point of order.

The PRESIDING OFFICER. The Senator will state his point of order.

Mr. WALSH of Massachusetts. A short time ago there was presented to the Senate a message from the President vetoing the salary bill for the postal employees. I understand that immediate action was not taken because no entry of the message has been made in the Journal of the Senate as required by the Constitution. I rise to ask the Chair when an entry will be made in the Journal of the President's veto message? How long does it take to make an entry in the Journal?

The PRESIDING OFFICER. The Chair understands that the Journal clerks are now entering in full the objections of the President to the bill, and that the Chair will be informed when that work of transcription has been completed.

Mr. WALSH of Massachusetts. My information is that the Chair has given no order to the clerks to enter upon the Journal the message, and I rise to ask if it is necessary for the Chair to issue such an order.

The PRESIDING OFFICER. The present occupant of the chair was not in the chair at the time the point of order was raised and decided; but the Chair is of the opinion that no special order need be given by the Presiding Officer to a clerk of the Senate to perform his duties.

Mr. WALSH of Massachusetts. So the situation is that when the clerks enter the message the Chair will be so informed, and the Senate will be informed by the Chair?

The PRESIDING OFFICER. That is the Chair's understanding of the situation.

Mr. WALSH of Massachusetts. I thank the Chair. I shall renew my request for action on the veto at the earliest possible moment.

Mr. ASHURST. Mr. President, I rise to a question of order.

The PRESIDING OFFICER. The Senator from Arizona will state his point of order.

Mr. ASHURST. I do not wish it to be established without dissent as a precedent or a part of the practice of the Sen-

ate that before the Senate may consider a veto message the objections of the President must first be entered upon the Journal. I do not so construe the Constitution, and I express my dissent to such precedent being established.

The PRESIDING OFFICER. The point of order was made by the minority leader, the senior Senator from Arkansas [Mr. ROBINSON], and was sustained by the President pro tempore. Far be it from the present occupant of the chair so soon to override the decision of the President pro tempore.

Mr. ASHURST. It is not my view of the Constitution that before the Senate may consider a veto message the objections must be entered at large on the Journal. In other words, the Senate of the United States is not the agent of its clerk. Ninety-six Senators are not required to wait upon the tedious processes of a clerk. It would be absurd to say that the Senate would be powerless to act upon a message from the President of the United States unless and until a clerk had made certain black marks on certain white paper.

Mr. WALSH of Massachusetts. I should like to ask the Senator if he understood the minority leader to raise a point of order against immediate action?

Mr. ASHURST. I have great respect for the minority leader. Indeed, I digress to say that he has led his party with a sagacity and an ability unsurpassed in the past 50 years of the Senate's history. I did not know he had made that observation; but since I am informed that he made the observation, I nevertheless adhere to my view of the Constitution.

Mr. WALSH of Massachusetts. If he made an objection, it was in his individual capacity, of course; and not for the purpose of delaying action.

Mr. ASHURST. Whilst I am speaking of the Constitution, I shall emulate the manly example of the Senator from Virginia [Mr. GLASS] this morning, who corrected an error that he made. I was in error when I said that the Constitution required a bill to be read three times. The constitutions of the States require such readings, and our Senate rules require such readings; not the Constitution of the United States.

Mr. BROUSSARD. Mr. President, will the Senator yield to me?

Mr. ASHURST. The Senator from Missouri [Mr. SPENCER] has the floor.

The PRESIDING OFFICER. No; the Senator from Arizona has the floor, because he was raising a point of order.

Mr. ASHURST. I thought the Senator from Missouri had the floor. I yield, however.

Mr. BROUSSARD. I should simply like to suggest to the Senator from Arizona that my understanding of the transaction was not exactly correctly stated by the Chair.

The PRESIDING OFFICER. The Chair undertook to state only his own understanding of the transaction, and not that of the Senator from Louisiana.

Mr. BROUSSARD. The minority leader simply stated that he demanded the regular order, and upon that we proceeded to the regular order without involving the question of the inscription on the Journal of this document.

The PRESIDING OFFICER. The point of order raised by the Senator from Arizona apparently presents no question upon which the present occupant of the chair would be called upon to rule, and therefore the Senator from Missouri will resume his remarks.

### LEASES UPON NAVAL OIL RESERVES

The Senate resumed the consideration of the motion of Mr. WALSH of Montana to adopt the report of the Committee on Public Lands and Surveys submitted pursuant to Senate Resolution 147.

Mr. SPENCER. Mr. President, the first statement in this report to which I have called attention—namely, that "it was not intended at any time that the store of oil thus assured should be drawn upon for current use"—is demonstrated to be a mistaken statement. I think it is fair to say that under the administration of Secretary Daniels he wanted to preserve as much oil as possible in the ground and only yielded to the taking of any oil out of the ground when he felt that it was necessary to protect the oil against loss by drainage; but the oil which he did take out of the ground, if Commander Stuart was right in his quotation from the letter of Secretary Daniels, was to be for current use.

It ought to be stated here, because it is in connection with the first point to which I have called the Senate's attention, that the policy of the present administration has been not to use any oil for present needs but to store it at strategic points, to be kept for future use when an emergency requires its use.

I may refer to this matter a little later on, but I pause here to emphasize again the fact that oil in the ground has no emergency utility; that it is impossible to get oil out of the ground in time to meet any emergency need for oil. If the battleships of the United States—most of which are now oil burning; and all, under the policy of this Government, are to be made oil burning—if those warships, either upon the Atlantic or upon the Pacific, find themselves at any moment in need of an immediate quantity of oil, the fact that we may have millions of barrels of oil stored in the ground would not be of the least avail; and therefore the present administration, in the leases to which I shall of necessity refer in a little while, provided that the oil should be taken out of the ground. It was necessary to do this, for drainage otherwise would have taken the oil away from the naval reserves and put it into the hands of the adjoining property owners.

Mr. President, it is interesting to note that recently the President has appointed an oil commission, composed of a naval officer, the Director of the United States Geological Survey, and a petroleum engineer, to report among other things on a program and policy for oil for the Navy. I do not more fully comment upon that, for, as my recollection goes, that was not referred to in our testimony; but it is a significant fact in connection with the quotation which I have just made.

Why did the Navy lease the reserves?

At the time that the leases on the naval reserves were granted, the Government of the United States and the Navy in particular had already suffered many million dollars loss, due to the drainage of oil from naval lands by neighboring wells. It was abundantly established in the testimony that where, for example, a certain territory owned by the Government and set aside for naval purposes was highly productive of oil, if those who had the right to drill wells around the edge or near to the edge of that naval reserve did so, the result was that the oil in the naval reserve was drained out, and flowed into the adjoining, the neighboring, the adjacent wells, and was lost to the Navy, and the value of that oil enriched those who operated the adjoining property and neither the Navy nor the United States profited as they should; and the Government has lost millions of dollars due to the drainage of oil from the naval lands by neighboring wells.

Up to the passage of what I speak of as the Daniels Act of June 4, 1920—I call it that because it came to the Congress with his approval, and, I think, was formulated by him—which directed the Secretary of the Navy to take possession of the lands subject to the Navy's authority, and granted him authority to lease them in any way he thought best, and to conserve and store and exchange the oil. Congress had provided no means whatever of protecting those properties from such drainage. The first attempt to use this power was the natural one of giving small leases to particular tracts immediately subject to drainage. While wide discretion was given the Secretary, and there is nothing in the act which requires advertising—a point that may come up for consideration later—or granting of leases on competitive bids; while there was nothing in the act that had to do with the leasing of these lands that require either of these things to be done—in fact, certain clauses of the general leasing act of February 25, 1920, passed by the same Congress that passed the Daniels Act on June 4, 1920, seemed to indicate that Congress deliberately removed such requirements when the oil was to be taken for Government use—still, probably from habit rather than from much thought, formal proposals were drawn up early in 1921, advertised in April, and a lease was granted in June.

The long delay in permitting unrestrained drainage by the Standard Oil Co. so cut down the value of the ground—and I call the attention of the Senate to this in passing—that companies which in April offered royalties of 46 and 48 per cent, in June withdrew their bids.

The successful bidder in June lost heavily on the lease, and therefore the Government was never able to get bids nearly so high for any land offered in that vicinity.

Promptness in action is of the first importance in getting down offset wells, and experience shows that if the Government was never to drill any but offset wells and then only after advertising for competitive bidding, in connection therewith it would never receive its due share of what is called the "flush," or the first production, which is the largest and the cheapest part of the oil which a well yields.

"Thrice armed is he whose cause is just," but four times he who gets his well down "fust."

Accordingly, one of the things designed to be accomplished, and which in fact has been accomplished by leasing reserves Nos. 1 and 3 as units, No. 1 in California, and No. 3 in Wyoming, is that the Navy is in a position to put drills into the field overnight if need be at any point where danger is threatened, and with lessees who have established reputa-

tions for unusual skill and promptness. The Navy can then be assured of getting oil from any part of its reserves as quickly as its neighbors can, if not more quickly.

The heavy handicap of Government red tape is effectually overcome in this particular, and that means in the long run many more barrels of oil than could result from any policy of delayed leasing strip by strip.

I venture those observations, Mr. President, at this time, in order to show that there are two sides upon the question of competitive bidding. My own judgment, as I am now advised, is that competitive bidding is as a general policy a desirable, if not an essential, requisite in the leasing of oil land, but there are two sides to the question.

Furthermore, the leasing in large units presents the most economical layout and most economical methods of development, which in turn makes for good conservation, decreases waste, and in other ways insures larger net yield.

The operation of the leases is under a very real control through the Bureau of Mines, and over the larger part of the western half of reserve No. 1 in California the Navy reserves the right to hold back drilling as long as it cares to do so. In other words, the drilling on the naval oil reserves is, generally speaking, confined to such drilling as in a liberal judgment is necessary to protect the oil in those naval reserves from drainage, whether from direct drainage or from the loss of gas pressure, which results in the same loss of oil.

If it is wise to hold oil in the ground anywhere, that is where it can be done, namely, in the western half of reserve No. 1 in California. In the lease presented to the Pan American Petroleum Co. there is no limit or restriction on the Navy's right to keep this area intact, but the lessee, on the other hand, must drill there when he is ordered so to do.

It is also true that in this lease the lessee has the priority preference right of drilling when the time comes, if it ever does come, that the Navy wants to drill that land.

With regard to the royalties in the leases, there has been no criticism of the royalties paid for the California lands. They are admittedly higher than the regular Government royalties for public land and higher than those paid for similar undeveloped land leased from private owners. In the case of the Wyoming reserve—reserve No. 3—it has been pointed out that the actual royalty now accruing from the Navy lands—about 17 per cent—is less than that from the public lands adjacent.

That is true; but it is not the whole story. The lands immediately adjacent to the naval reserve No. 3 pay a royalty of 25 per cent and other blocks farther away pay 33⅓ per cent; but the great bulk of the oil taken from Government lands in the Salt Creek field is under lease at lower rates, so that the actual average for the field as a whole, comparable to the reserve as a whole, is 22 per cent.

The leases outside the reserve are flat royalty—that is, the amount does not increase, no matter how big the wells may be. Within the reserve the royalties vary from month to month, depending upon the average yield per well.

### MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House insisted upon its amendments to the joint resolution (S. J. Res. 107) declaring agriculture to be the basic industry of the country, and for other purposes, disagreed to by the Senate; agreed to the conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. WINSLOW, Mr. HOCH, and Mr. RAYBURN were appointed managers on the part of the House at the conference.

The message also announced that the Speaker of the House had signed enrolled bills of the following titles, and they were thereupon signed by the President pro tempore:

H. R. 1306. An act for the relief of Henry McGuire;

H. R. 1830. An act for the relief of Charles T. Norman;

H. R. 4830. An act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote the continuous production of timber on lands chiefly suitable therefor;

H. R. 6255. An act to amend an act entitled "An act to authorize the incorporated town of Ketchikan, Alaska, to issue its bonds in any sum not to exceed $100,000 for the purpose of constructing a schoolhouse in said town and equipping the same," approved February 7, 1920;

H. R. 6652. An act to authorize the city of Los Angeles, in the State of California, to construct and operate a line of railroad across the Fort MacArthur Military Reservation, in the State of California;

H. R. 6950. An act to authorize the incorporated town of Cordova, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in said town of Cordova, Alaska;

H. R. 6972. An act for the relief of William H. Nelson;

H. R. 9111. An act directing the remission of customs duties on certain property of the United States imported by the War Department;

H. R. 9314. An act to amend section 98 of the Judicial Code;

H. R. 9361. An act granting the consent of Congress to the construction of a bridge across the Rio Grande;

H. R. 9402. An act granting the consent of Congress to the Fullerton & Portsmouth Bridge Co. to construct a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky.;

H. R. 9457. An act granting the consent of Congress to the States of Alabama and Georgia, through their respective highway departments, to construct and maintain a bridge across the Chattahoochee River, at or near Alaga, Ala., connecting Houston County, Ala., and Early County, Ga.;

H. R. 9515. An act granting the consent of Congress to the Delaware State Highway Department to construct a bridge across the canal near Rehoboth, Del.;

H. R. 9517. An act granting the consent of Congress to the North Texas Co., of St. Jo, Tex., a corporation organized under the laws of the State of Texas, to construct a toll bridge across the Red River in the vicinity of Illinois Bend, Tex.;

H. R. 9610. An act granting the consent of Congress to the Board of Supervisors of Lowndes County, Miss., to construct a bridge across Tombigbee River; and

H. R. 9612. An act granting the consent of Congress to the State of Georgia, through its highway department, to construct a bridge across the Oconee River.

### NOTIFICATION TO THE PRESIDENT

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. SPENCER. I ask unanimous consent that after I shall have yielded to the Senator from Massachusetts I may be allowed to resume the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. SPENCER. I yield.

Mr. LODGE. I thank the Senator.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. LODGE. I offer the resolution which I send to the desk. It is a routine resolution.

The PRESIDING OFFICER. The Senator from Massachusetts asks unanimous consent to introduce a resolution, which, without objection, will be received and read.

The principal clerk read the resolution (S. Res. 258), as follows:

*Resolved*, That a committee of two Senators be appointed by the Presiding Officer of the Senate to join a similar committee appointed by the House of Representatives to wait upon the President of the United States and inform him that the two Houses, having completed the business of the present session, are ready to adjourn, unless the President has some other communication to make to them.

The PRESIDING OFFICER. The Senator from Massachusetts asks unanimous consent for the present consideration of the resolution. Is there objection?

Mr. McKELLAR. Mr. President, I have no objection to this resolution, and of course it is perfectly proper that it should be agreed to; but I want to serve notice right now that if the Senator from Missouri yields any more, I am going to make a point of order about it.

Mr. SPENCER. The Senator from Missouri will not yield unless he has unanimous consent to resume.

Mr. McKELLAR. I will arrange it so that the Senator will not get consent.

The PRESIDING OFFICER. The question is on agreeing to the resolution offered by the Senator from Massachusetts.

The resolution was agreed to.

The PRESIDING OFFICER. The Chair names as the committee under the resolution presented by the Senator from Massachusetts the senior Senator from Massachusetts [Mr. LODGE] and the senior Senator from Arkansas [Mr. ROBINSON].

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Montana?

Mr. SPENCER. I yield for a question.

Mr. WALSH of Montana. I inquire when this notification to the President is to be made.

Mr. LODGE. I suppose in time to reach him before 7 o'clock.

Mr. WALSH of Montana. Whenever to-day the Senate shall conclude to adjourn?

Mr. LODGE. I do not know what the arrangement will be.

Mr. ROBINSON. The Senate has agreed to adjourn not later than 7 o'clock.

Mr. LODGE. Not later than 7. We should have to go before that, because under the concurrent resolution Congress will adjourn at 7 o'clock.

Mr. WALSH of Montana. This resolution does not arrange for the adjournment of the Senate instanter?

Mr. ROBINSON. Oh, no.

Mr. LODGE. The President will simply be notified at the proper time that the Senate is ready to adjourn.

Mr. ROBINSON. It is a formality that is universally observed.

Mr. REED of Missouri. Mr. President, I trust it will be so employed as not to interrupt the speech of the Senator from Missouri.

WAR FINANCE CORPORATION LOANS

The PRESIDING OFFICER (Mr. MOSES in the chair). Will the Senator from Missouri permit the Chair to interrupt him long enough to name the committee provided for under Senate Resolution 208? The committee will be composed of the junior Senator from Nebraska [Mr. HOWELL], the junior Senator from Connecticut [Mr. MCLEAN], and the junior Senator from North Carolina [Mr. OVERMAN].

LEASES UPON NAVAL OIL RESERVES

The Senate resumed the consideration of the motion of Mr. WALSH of Montana to adopt the report of the Committee on Public Lands and Surveys submitted pursuant to Senate Resolution 147.

Mr. SPENCER. The first point that I discussed and had nearly completed—I wish it were the last instead of the first—was the statement that was made in the report which the Senator from Montana insists that the Senate shall adopt without having any opportunity to read or consider it, and was that it was not intended at any time that the store of oil thus assured should be drawn upon for current use. I have shown that the policy of Secretary of the Navy Daniels, in his keen desire to protect the Navy, was to refuse to take steps to conserve the Government oil, which for the sake of the Government were essential, and which he did not take, doubtless with the best of intention. He intended to use the oil he did obtain for current purposes, and therefore the statement of the report is inaccurate, if it is not a misstatement.

I referred to the reasons why the Navy leases were made, and I said that within the naval reserves the royalties vary from month to month, dependent on the average yield per well. It may go as high as 50 per cent of the product of oil; and if the wells in Teapot had turned out as big as they were in the neighboring part of Salt Creek at the time the Teapot lease was negotiated, the royalty would have been 50 per cent instead of 17 per cent. The low royalty is due to the wells being small. There is much less oil in the ground covered by the Teapot Dome lease than either the Government or the lessee anticipated when the bargain was made. It may be said here as a statement that is worthy of consideration that when Senators have time to examine the report which the Senator from Montana now insists we shall adopt without opportunity to examine it it may result in the conclusion that so far as the two great naval oil leases—the one to Sinclair in Wyoming and the other to Doheny's company in California—are concerned, whatever may be said about the technicalities of their grant now before the court for decision and not before the Senate, the leases themselves have been of great benefit to the United States, and that either one of the lessees would be glad to cancel the leases and get back the money which has been spent in pursuance of their contract with the Government.

The hearings will never sustain the finding that the Government has been cheated in those leases, though there is a real difference of opinion as to whether the legality of the granting of the leases is assured. Those questions, as I have said, are now before the court. Probably that is one reason why there is no recommendation in the report in connection with those matters.

The mere fact that there was much less oil in the naval reserve than either the Government or the lessees anticipated is not the whole story. One of the features of the Mammoth Oil contract—and the Mammoth Oil Co. is the Sinclair Co., and the Mammoth Oil contract is the contract incident to the lease with the Sinclair Oil Co.—was that the company agreed to pay and paid the Navy full Mid-Continent prices for the oil as against the ordinary Salt Creek price. That may seem like a technical statement. As a matter of fact, it means that the price for oil in the Salt Creek district in Wyoming where the oil was located is one thing, and the price of oil in the middle of the continent where it may have been taken by a pipe line, where refineries are near and markets are available, is another thing. The price of oil in the Mid-Continent territory is much higher than the price of oil in the Salt Creek district. Therefore the provision in the contract that Salt Creek prices should not control, but that the Government for its oil produced from the Salt Creek district should receive, not the Salt Creek price, but the price that was paid in Mid-Continent, was one of great value to the Government. At the time it amounted to a premium of 65 cents a barrel, and for the first year the average premium which the Government secured by virtue of that contract was 41 cents a barrel, realizing to the Government millions of dollars of profit. At present prices even the 17 per cent royalty at the naval price brings in more than 22 per cent would have brought in at the Salt Creek price. The Navy had a further advantage of 10 cents per barrel based on a year's average in the price at which it draws or may draw fuel oil under the exchange provisions of the contract.

It will also be remembered—and I call attention to this in passing—that for each barrel of royalty crude oil turned over to the Mammoth Co. in Wyoming the Navy is entitled to a full barrel of bunker A fuel oil delivered free at a specified Atlantic or Gulf coast terminal. The fuel oil in the first year of operation under the contract varied in price from 1.5 cents to 1.23 cents per gallon more than the simultaneous prices of crude oil in Wyoming. The average received by the Navy for Teapot royalty for the year was $1.65 per barrel, and bunker A fuel oil was selling at approximately $2.20 a barrel, so even at the lower royalty resulting from the smaller wells the Navy, under the contract, comes out far ahead.

Incidentally, the possession of this contract by the Navy raised prices in the entire Salt Creek district and permitted the Government in terms to contract royalty oil at Mid-Continent prices. This in the year 1923 resulted in a clear gain in one year of $3,003,709, which did not come to the Navy because it was outside of the naval reserves; but it was money that came to the Government and was distributed between the State of Wyoming and the reclamation fund and the 10 per cent that went into miscellaneous receipts of the Government.

Mr. President, so much for the first point of the report to which I have called attention. On page 5, line 2, of paragraph 2, the report provides that the act which was then being discussed in the report—

> authorized the Secretary of the Interior to lease any producing wells within the reserve, and further—

I call attention to this—

> authorized the President to lease all or any part of any claim—

That is, placer-mining claim—

> within which there should be any such producing wells.

It is not a full or accurate statement. It refers to section 18A of the act of February 25, 1920, which has also been construed to authorize not only what the report said but also to authorize the President to lease claims in naval reserves included in the withdrawal of September 17, 1909, which—

> have been or may hereafter be drawn in question on behalf of the United States in any department or judicial proceeding.

I call the attention of the Senate, on page 10 of the report, to what undoubtedly is a mere mistake and does not affect any great issue. The report reads that three of these claims that have been drilled to the shallow Shannon sands yielded, it was claimed at the time they were first brought in, from three to eight barrels of oil per day.

The Senator is mistaken in regard to the number of wells. The record shows that there were four wells instead of three and that the cost of the fourth well, as he will find on pages 428 and 1197 of the record, was $1,252.45.

On page 10 of the report, in making its argument as to why lessees who had claims were content to surrender their rights if they could get a lease from the Government, the statement is made:

> Their application for a lease was undeniably an admission that they were not entitled to patent for the land, for obviously they would not have contented themselves with a lease of one well if under the facts of the case they were entitled to a patent for the entire 160 acres embraced in the claim.

The argument would be unanswerable if the premises were conceded, but the difficulty is that the facts are not correctly stated, for what the applicant or claimants contended for and what they got were not leases for one well, but leases for the

whole 160 acres upon which they may have had many wells. The fact was brought out in the record on pages 445 and 447. It was better to take a lease undisputed for 160 acres with the right to drill as many wells as they desired on that 160 acres than it was to fight about the title to land when the main value of the title was to give them the very oil privilege which they secured in the lease.

On page 10 of the report it is stated that "the only basis upon which a right to any of the land could be founded is a discovery; that is, a discovery of oil antedating the withdrawal order of 1909." This presumably refers to the order of September 27, 1909.

The Senator is mistaken in that; it is not a full statement; it is not a correct statement. This report has to do with fundamental rights in connection with the oil leases, and it ought to be accurate. I do not for one moment claim either here or elsewhere that there is any intentional misstatement, but the misstatements are there nevertheless. The fact is that a right to land can be founded not only upon—

a discovery of oil antedating the withdrawal order of September 27, 1909, but as well upon the order of July 2, 1910, and also upon diligence in seeking such discovery from the date of withdrawal until discovery was actually made.

On the same page, page 10 of the report, a statement is made which, I am sure, must have been inadvertently made, because it is a misstatement, a misquotation of what the Assistant Secretary of the Interior said. No one, judging from what the senior Senator from Montana has often said upon the floor of the Senate and in the committee, holds a higher opinion of the Assistant Secretary of the Interior than does the senior Senator from Montana. The statement, however, that he makes at the bottom of page 10 and in the first line of page 11 is this:

Secretary Fall, in his letter to the President, treats this action seriously, but Assistant Secretary Finney, intimately familiar with the practice of the department and with all of the laws in relation to the disposition of the public domain from an experience of over 20 years in the department, asserts that no such proceeding is recognized by the rules of practice of the department.

In other words, that under the rules of practice and under the rules of procedure there was no authority for the Secretary of the Interior to review a case, as he did do in the case to which the Senator from Montana is referring. What Mr. Finney said, as found on page 2332 of the record, was:

There is—

Not that there is not—

There is a sort of supervisory power recognized in the Secretary, and claimants do sometimes file a request or petition—I think petition is really a better name than anything else—for the exercise of some supervisory power by the Secretary to give the matter another review. Quite a number of those have been filed at various times. Now it is not a right. I should say it is a mere privilege. * * * It does not act as a supersedeas.

But the fact that it always had been done; that it did have recognition in the practice of the department is undoubted; and the statement to the contrary in the report is a mistake. The subject of the supervisory power was also covered even more carefully on page 1600 of the record, as follows:

It is specifically provided for in the circular entitled "Rules of practice in cases before the United States district land offices, the General Land Office, and the Department of the Interior," approved December 9, 1910, reprinted July 13, 1921, with amendments. The circular provides:

SUPERVISORY POWER OF SECRETARY—RULE 85

Motion for the exercise of supervisory power will be considered only when accompanied by positive showing of extraordinary emergency or exigency demanding the exercise of such authority.

I submit to the Senate how unwise to go before the country with a report which states that upon the testimony of the Assistant Secretary of the Interior no such supervisory power of the Secretary is recognized by the rules of practice of the department, when the exact opposite is the fact, as the Assistant Secretary himself explained. The fact is that in the Department of the Interior there is that supervisory power of the Secretary of the Interior to pass upon questions on petition for review, not as of right on the part of the petitioner but as a matter of privilege, and it is recognized in the department. In leaving this subject, I want to quote from the syllabus of a decision on June 19, 1895, in Volume III, Land Decisions, 595, as follows:

The privilege of discussing a case orally before the Secretary is accorded within the discretion of the department, but not as a matter of right.

The syllabus of the decision of July 19, 1900, in Volume XXX, Land Decisions, 161, reads:

The Secretary of the Interior, in the exercise of his supervisory power as head of the Land Department, may, even in the absence of an appeal, transfer the consideration of any matter pending before the General Land Office to the department, and, after due opportunity to the parties in interest to be heard, may render decision therein correcting and obviating errors or irregularities in the proceedings or decisions of that office.

The next point in the report to which I desire to call attention is found on page 11. Undoubtedly the time which elapsed between May 14, when we closed the hearings, and June 4, when this report was presented to the committee, was not sufficient to enable even one so diligent and so familiar with this matter as the senior Senator from Montana thoroughly to review and study the testimony. There were thousands of pages of testimony that, in a sense, ought at least to have been reviewed. In view of the circumstances the mistakes that occurred were to be expected, and undoubtedly there will be many more that will be manifest upon a careful examination, for no Senator has as yet had adequate time afforded him to go through the testimony or even to examine the report.

The argument the Senator makes on page 11—and it is interesting to note how he is hoisted by his own petard in that instance—is this:

The facts are that all of the claims were held or controlled by the Pioneer Oil Co., a subsidiary of the Midwest Co., which in turn is a subsidiary of the Standard Oil.

Mark the intimate relation between the Pioneer Oil Co. and the Midwest Co. and the Standard Oil Co:

One or more of these companies had, at least since 1919, been endeavoring to secure a lease of naval reserve No. 3, or some portion of it. They were all amply able to undertake the development of the territory and were potential competitors for the lease. Sinclair paid, or agreed to pay, to the Pioneer Oil Co. some short time before the execution of the lease a million dollars nominally for the claims so reported, as above stated, to be worthless.

I will resume that quotation in a moment.

All those claims in the Salt Creek district—and there were many of them—had more or less foundation. No one knows how much. I doubt if they had much foundation. I think that many of them were equitable claims, which upon legal proceedings would have been disallowed. I agree with the Senator from Montana in that general observation; but when the Secretary of the Interior came to execute leases of this property to Sinclair's company, the Mammoth Oil Co., he said, in effect, we are not going to have all those outstanding claims unsettled; we are going to have them settled so that there shall not be constant litigation between those claimants, with or without good ground for their claims, and the Government of the United States. Therefore he made with Sinclair's company as one of the conditions of this lease that they acquire all those outstanding claims and quitclaim them to the Government of the United States so that the title of the Government of the United States to this land should be unquestioned. Then your lease to this ground, the title of which is thus unquestioned in the United States, will be granted. Sinclair, in pursuance of that condition in his contract, paid a million dollars to secure the control of those claims. The senior Senator from Montana does not think that that million dollars was paid for those claims; the senior Senator from Montana thinks that those claims were absolutely worthless; but doubtless the senior Senator from Montana, like any other lawyer in this body, has often found that claims that were deemed by himself or by his client to be worthless when it came to litigation were found, as the result of the judgment or decree in the case, not to be so worthless as had been imagined, but, on the contrary, to have substantial merit. That was precisely what was in the mind of the Secretary of the Interior when he said:

All these claims must be wiped out and the title to the Government must be assured before the Government will grant you this lease.

In any event a million dollars was paid for those claims, and the report goes on to say:

Though that construction of the transaction is denied by Sinclair—

That is, that he paid the million dollars not for the claims but for other purposes, perhaps bribery, and to discourage competitors—

Though that construction of the transaction is denied by Sinclair, your committee is of the opinion that the payment was not made in fact for the transfer of the title of these claims but to remove from the field a formidable competitor for the lease and that the true nature of the transaction was thoroughly understood by Secretary Fall.

What does the senior Senator from Montana want the Senate of the United States to do? He wants the Senate of the United States to adopt this report without opportunity of examination and by its adoption to say, in effect, "We, the Senate, never having read the report or knowing anything about the facts, declare that the $1,000,000 which Sinclair said he paid and which, as a matter of fact, he did pay to the holders of those claims against the Government in the Salt Creek district was paid not to cancel those supposed claims, which were worthless, but it was a corrupt bargain to discourage competition, to bribe competitors, and the Secretary of the Interior was a party to it, and between the two that corrupt, illegal act was consummated."

I undertake to say for myself that without far stronger evidence than we have yet secured I should not attempt to pass judgment on the matter. There was no need in this report of attempting to take such snap judgment, and it is not fair to ask the Senate of the United States to pass their judgment without sufficient evidence to warrant the unfair inference and without any opportunity to examine into the facts.

But look at it further. The weakness, the ridiculousness, of the conclusion arrived at by the senior Senator from Montana is apparent from the very face of the statement. His conclusion is absurdly erroneous.

If the Pioneer Oil Co. is controlled by the Standard Oil Co. of Indiana, as the senior Senator from Montana declares in this paragraph, and if the Standard Oil Co. of Indiana owns one-half of the Sinclair Crude Oil Purchasing Co., as is stated on page 13 of this report—that company which purchases and conveys the Teapot Dome oil eastward—it follows, if the senior Senator from Montana is correct, that there was an attempt on the part of one subsidiary of the Standard Oil Co. to bribe another subsidiary of the Standard Oil Co., or, in other words, that the right hand was at war with the left hand, a ridiculous conclusion, Q. E. D., and emphasizes, if I may say so, what I want to make clear, that there has been no adequate opportunity either to prepare a correct or fair report or to examine the report even as made.

On page 16 the Senator makes the following statement:

Though the production from the reserve—

That is, the naval oil reserve No. 3—

has never exceeded seven or eight thousand barrels daily, the construction of the pipe line by the Sinclair Crude Oil Purchasing Co. is in progress, that company having assumed whatever obligation in that regard was due from the Mammoth Oil Co. under the lease.

Unquestionably this pipe line would not have been built when it was built if the pipe line company had not secured the Salt Creek royalty oil. The fact of the matter is that a pipe line—I think 700 miles long—has been built from the Teapot Dome and the Salt Creek district that carries the oil from that field to where it can be refined and used, and the Sinclair Co. were required by their contract to build that pipe line; and, more than that, the Government were given the prior right to transport every barrel of their oil through that pipe line before any other customer could be served—a right in itself that was and is of exceeding value.

On the same page—page 16—the report reads:

The daily production of the Salt Creek field may reach 175,000 barrels, but by agreement between the operators the output was limited—

The original report said "is limited"—

To 40,000 barrels, that amount being all that can be handled by the local refineries.

The inference is clear that a limitation of 40,000 barrels per day is in force. There was an original limitation. There is to-day no such limitation, and as a matter of fact the Salt Creek field, excluding Teapot Dome, is now producing daily between 90,000 and 100,000 barrels of oil.

Mr. WALSH of Montana. Mr. President——

Mr. SPENCER. Mr. President, I regret that I can not yield, unless with unanimous consent to resume. I am sure the Senator from Montana does not desire to take me off my feet, or plan so to do, and yet he was the one who gave notice that if I yielded again he would raise the point of order that I had yielded the floor.

Mr. WALSH of Montana. I merely desire to remark that the Senator is not discussing the committee's report at all. He is discussing my original draft.

Mr. SPENCER. As I said at the outset, there was submitted on June 4 a report, and the next day, or the next day after, an amended report was produced, with which was made the statement, I think upon the floor of the Senate, certainly in the committee, that there were no substantial changes between that and the original report, except that certain concluding paragraphs were left out.

Mr. WALSH of Montana. It was changed in the particular the Senator is now talking about.

Mr. SPENCER. And it may be that here and there there will be an item to which I refer that is corrected in the final majority report. I hope that is true. I wish every one of the errors and misstatements were corrected. If they had all been corrected there would have been no necessity of the duty that is now imposed upon me.

Mr. WALSH of Montana. All were corrected that seemed to need correction.

Mr. SPENCER. I know that the next misstatement which I had marked has been corrected in the majority report, for on page 17 the report inadvertently referred to oil which was delivered to the Navy when it never meant the Navy; it meant the Shipping Board. That happened to strike my eye quickly, and I called the attention of the senior Senator from Montana to it, and that correction has been made. There is no need of comment upon it.

On page 17, at the bottom of the page, there occurs this statement:

When on the stand Admiral Robison, who succeeded Admiral Griffin and represented the Navy Department in connection with the contracts, insisted that considerations connected with the national defense were influential in the course pursued with relation to them, which he asked an opportunity to present at an executive session.

In other words, the Navy Department said, in effect, "We took certain action with regard to that oil in the naval reserves which we would like to discuss in executive session. Questions of national defense were involved."

Now, the concluding paragraph on that page reads as follows:

No information was conveyed to the committee which, in its opinion, had not in substance been made public, nor has the committee been able to appreciate how the public interest would be subserved or the common defense promoted by secrecy with reference to any feature of the contracts.

I do not care particularly about the slur on Admiral Robison. I do not care about the Senate's committee saying that the Navy did not know what they were talking about when they said that national defense suggested that this matter be brought up in executive session; but the statement is made that no information was conveyed, when the record will show that when that matter was discussed by the committee, five of them being present, three members agreed to the statement as it is made in this report and two members—the Senator from Utah [Mr. SMOOT] and the Senator from Wisconsin [Mr. LENROOT]—dissented, as will be found on page 963 of the record. It is not a fair statement, and it ought not to go out with the sanction of the Senate.

On page 18—and I call the attention of the Senate again, as I hurriedly proceed, to the fact that I do not pretend that this is any exhaustive examination of this report. It is the mere picking up here and there, from casual examination, of the mistakes that are apparent to those who have examined it. I want the opportunity to examine it carefully and to have it examined carefully; but the mere physical matter of time has absolutely prevented since June 4, and every Senator in this Chamber will recognize how impossible it has been to give any adequate consideration to such matters in the last few days of this session.

On page 18 the statement is made—and this has to do with a fundamental policy—on the point of drainage and its effect:

On this point there is no difference of opinion among the geological experts.

We have a very interesting difference of opinion, as I shall hope to show a little later.

They differ only as to the extent and seriousness of the drainage and the appropriate means of meeting the situation.

If the Government oil reserve were to be indicated by a Senate desk, before which I stand, on which at any point oil wells could be drilled, and the private land of others that was not Government land and to which the Government did not have

title were represented by the adjoining desk, all experts agree that if the adjoining holders were to sink producing wells along on the line of their land the result would be that those wells would drain the oil from the adjacent Government lands, and that the loss of oil to the Government in the ground would be great, and the gas pressure which is responsible for bringing the oil to the surface would be lessened by these adjoining wells, so that it would not be available to drive oil to the surface in the Government wells when they saw fit to drill them.

All experts agreed upon this. Some experts are of the opinion that that drainage, that loss of pressure, was so limited that what is called a line well—that is, a well sunk close to the line, within a comparatively few feet or a hundred feet of the adjoining land—would protect all the oil land back of that line well from any drainage or from any loss of gas pressure. Other experts believe that the drainage was so imminent, was so great, and the loss of gas pressure was so severe, that it required the substantial drilling of the Government land if the Government wanted to get out the oil that was under it. Otherwise it would be wasted; it would be drawn away; it would be drained by wells that were perhaps as far as 2 miles distant; and if the Government left their oil fields alone, and never sunk oil wells or produced any oil, but relied upon the hope that the oil would remain in the ground, it would happen that when, in the course of 5, 10, 15, or 20 years the Government, in expectancy of great results, should come to its oil reserves and say, "Now we will drill our wells and get out our oil," it would be found that the wells were barren wells, and that the oil that was once there in the ground had been drained away by the adjacent wells; and therefore there was and is a real difference of opinion as to how far drainage imperiled adjoining land, and as to how extensively it was necessary to sink protecting wells.

The report says:

As to this it is easily discernible—

Notice what seems to be an exceedingly unfair inference—

that those wedded to the policy of keeping the oil in the ground minimize the importance and the effect of the drainage that may take place, while those who advocate or are tolerant of the policy of extracting the oil and storing it magnify the loss that has ensued or that may ensue. Generally speaking, the experts of the Geological Survey belong to the former class—

Those who believe in keeping the oil in the ground—

and those of the Bureau of Mines to the latter.

The latter class being those who believe in taking it out of the ground and storing it.

I undertake to say, in passing, that it can be demonstrated beyond peradventure, and that every argument of economy and of efficiency requires that that oil in the naval oil reserves should be taken out of the ground and should be stored—not used but stored—ready for any emergency that may result, for, as I said a little while ago, an emergency for oil is an emergency, and can not be met by oil in the ground that may take months or a year or two to get it out of the ground.

The efficiency of the Navy of the United States, in the opinion of every navy in the world, has been doubled by reason of the fact that there are a million and a half barrels of oil stored at Pearl Harbor in the Hawaiian Islands, which they know is ready for instant use; and 2,400,000 more barrels of oil will be stored in the tanks that are about nearing completion. Not one barrel of all that oil so long as it remained in the ground was of the slightest help to the Navy in meeting any emergency need for oil.

More than that, it is fair to state that those who believe that the drainage is slight and that a mere lineal well, a well along the line, will protect the whole area back of it are mainly those who are what I might call areal or surface geologists, men of culture and of standing in their profession but having to do with the geological manifestations upon the surface. Those who have had to do with the geology underground, with the drilling of wells, with the production of oil, who know about the administration of oil wells and their products, are all agreed that the drainage is severe and it should be guarded against, not by mere lineal wells, but by wells back in the interior if the Government desires to preserve its oil.

On page 18, about a third way through the second paragraph, it is stated that—

On the escape of the gas through a well, paraffin or asphalt carried as a base is precipitated and gums up the passage leading to the orifice, effectively shutting off eventually the exit of oil through it or the escape of gas.

Many people think that a pool of oil is a pool of liquid; that if you had a dipper and could get down to the pool of oil you could dip it up; that it is a liquid mass of black, crude oil, either with an asphalt or paraffin base. That is not an oil pool, Mr. President. An oil pool is merely a great body of sand in the interstices of which there is oil, and the amount of oil is dependent upon the porous character of the sand, and when we get oil from an oil well we draw out of the sand the oil that is there, and it is true that as that oil is drawn out the paraffin that is in the oil has a tendency to clog up the little spaces between the grains of sand and therefore to prevent drainage from wells adjacent. But the report gives an entirely unfair impression, because the removal of that paraffin, that gumming-up process, that interference with the drainage is easily accomplished and is accomplished by every practical well driller, who cleans out his well as often as necessary.

As soon as a well ceases to produce because of being paraffined up it is cleaned out so that it may produce freely.

On page 19 we have an unqualified statement which is eminently unfair. The impression it creates I am sure could not be intended by any fair man who wrote it. It states, in regard to these leases, that "the Government actually realizes for use as fuel but 6 per cent of the total content of the reserves under the plan being followed."

Any man who reads it would come to the conclusion at once that 6 per cent of the oil came to the Government and the rest went to other people. As a matter of fact, in another part of the report it does speak of the Government receiving 6 per cent and the lessees receiving 94 per cent when that is not the fact at all.

Mr. NORBECK. Mr. President——

The PRESIDING OFFICER (Mr. KING in the chair). Does the Senator yield?

Mr. SPENCER. Mr. President, I can not yield unless I have unanimous consent to be allowed to proceed, for I have been warned upon the other side that if I yield again I will be taken from the floor.

Mr. NORBECK. The Senator can get the floor again.

Mr. SPENCER. I regret that I can not yield.

The PRESIDING OFFICER. The Senator declines to yield.

Mr. NORBECK. I do not think the Senator understands what I am after.

Mr. SPENCER. It is not up to the Senator from Missouri; it is up to the Chair. If the Senator has any point of order that entitles him to be heard, I shall, of course, wait for him to state it, but I can not yield.

Mr. NORBECK. If I understand correctly——

The PRESIDING OFFICER. Does the Senator make a point of order?

Mr. NORBECK. If I understand it aright, the protest is against taking a vote. I just want to submit that yielding does not bring the matter to a vote. The debate will go on just the same afterwards.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. SPENCER. On page 19, at the end of the first paragraph, I quoted from the report as follows:

The Government actually realizes for use as fuel but 6 per cent of the total content of the reserves under the plan being followed.

As a matter of fact, what actually happens, and about which there can be no dispute, is that that is only one-third of what the Government gets. The Government gets 6 per cent of its royalty in oil and gets two-thirds of its royalty in permanent storage, in which this 6 per cent is stored. The Government's portion is three times that which this report leads any man who reads it to assume was the total return to the Government. The Government does not get only 6 per cent of the oil. The Government gets three times that in royalty; but by its own contract——

Mr. CARAWAY. Will the Senator yield?

Mr. SPENCER. I wish I could; but under the ruling of the Chair I can not. But under its own contract it takes two-thirds of its royalty, and has that represented by tanks and storage facilities, and keeps the other third in oil itself.

Mr. WALSH of Massachusetts. Mr. President——

Mr. SPENCER. On page 19——

The PRESIDING OFFICER. Does the Senator yield?

Mr. SPENCER. I can not yield.

Mr. WALSH of Massachusetts. A point of order, Mr. President.

The PRESIDING OFFICER. The Senator will state his point of order.

Mr. WALSH of Massachusetts. Will the Senator, now occupying the floor, lose the floor if he yields to another Senator for a question?

The PRESIDING OFFICER. The Chair does not think that if the Senator yields for the purpose of permitting another Senator to ask a question he will lose the floor.

Mr. SPENCER. Mr. President, under that statement, I yield with pleasure for a question. I was informed differently by the Chair.

Mr. WALSH of Massachusetts. I have no question to ask, but the Senator has declined to permit questions to be asked on the theory that he would lose the floor. I do not understand the Senator would lose the floor by permitting a Senator to inquire as to the matter he is discussing.

Mr. SPENCER. Mr. President, such was my understanding.

Mr. ASHURST. A question of order.

The PRESIDING OFFICER. It is a moot question which is presented, and therefore the Chair makes no ruling on it.

Mr. ASHURST. The fiction has grown up in the Senate to the effect that a Senator may hold the floor and also yield it in an hour like this, when every moment is precious. A Senator may not, in the very nature of events, hold the floor and also yield the floor.

Mr. WALSH of Massachusetts. Does the Senator hold that a Senator can not yield the floor to have a question put to him?

Mr. ASHURST. After a Senator has spoken twice on the same day, upon the same question, he may not yield for a question without losing the floor.

Mr. WALSH of Massachusetts. Then the proper practice has never been followed in the Senate, if that is true.

The PRESIDING OFFICER. The Senator from Missouri has the floor.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. SPENCER. I can not yield.

The PRESIDING OFFICER. The Senator declines to yield.

Mr. WALSH of Massachusetts. I would like to have a decision on the point of order. I understood the Chair to make a decision and then withdraw it.

The PRESIDING OFFICER. The Chair said it was a moot question, because no question had been asked. Does the Senator desire to ask a question?

Mr. WALSH of Massachusetts. The Senator from Arkansas asked a question, and the Senator declined to yield, because, he said, he would lose the floor.

The PRESIDING OFFICER. The present occupant was not in the chair at the time when the Senator from Arkansas asked the question. The Senator from Missouri is recognized.

Mr. SPENCER. Mr. President, on page 19 of the report—and I am sure the Senate will be quite as glad as I am to know I am more than half through with the report—it is stated:

> In 1920 highly productive wells were brought in in territory immediately outside the southeasternmost extremity of naval reserve No. 1—

That is in California.

> and Secretary Daniels, prior to his retirement on March 4, 1921, had called for bids for the drilling of 22 offset wells within that reserve.

This is not in accordance with the facts as they appear in the hearings. Lieutenant Commander Stuart was asked the following questions and gave the following answers (page 770 of the record):

> Commander STUART. After seeing this, as I recall it, the bids were made on the 15th of April, 1921.
>
> The CHAIRMAN. That is, the proposal for the bids?
>
> Commander STUART. Yes, sir.
>
> Senator WALSH. That is signed by whom?
>
> Commander STUART. Edwin Denby, Secretary of the Navy.
>
> Senator WALSH. You do not recall that prior to that time Secretary Daniels had called for bids for any drilling on any of the reserves?
>
> Commander STUART. No, sir; I do not think he had. It has been talked about, but Secretary Daniels was very loath to start any drilling on the reserves because of the prime purpose of the reserves.

Lieut. Commander Stuart on page 769 corroborated this general statement. It has for the committee some interest, because it was the subject of a good deal of discussion, and the misstatement is unfortunate.

On page 20, about a third through the first paragraph—and I only make a passing observation, because the record does not show what the exact fact is—the following is stated:

> Doheny submitted two bids, one of which was in strict conformity with the proposals and the other offering to do the work at a less cost but securing to him a preference right to a lease of practically the eastern half of the reserve. (Rec., pt. 4, p. 1003.) His alternate proposal was accepted and the contract entered into accordingly under date of April 25, 1922. The negotiations for this contract were carried on simultaneously with those culminating in the lease of naval reserve No. 3.

The inference is that no other bidder had any opportunity to compete under the different provisions called for under the contract provision. As a matter of fact, the Department of the Interior has written a letter, of which I have seen a copy, but which did not come to the committee in time for our hearing, which shows that other bidders had the same opportunity which Mr. Doheny had.

On page 20, at the beginning of the last paragraph, it is stated:

> The conditions giving rise to this lease (in naval reserve No. 1) are of such supreme importance as to require detailed attention.

Then, having said that the matter was of such supreme importance, it starts out with the statement:

> There was here no impending loss from drainage.

Evidently it was entirely overlooked that large actual loss had occurred from many wells drilled in section 36, and that the loss was impending, and was severe. Yet it is, as the Senator states, a question of extreme importance about which this misstatement is made.

On page 24, speaking of the financial relations between Mr. Doheny and Secretary Fall, the committee recites in its report:

> Its sinister import is appreciated when it is borne in mind that without competitive bidding—

As a matter of fact the records will show there was competitive bidding; there were others who had the opportunity to bid—

> as heretofore explained, Doheny got from Fall in the month of April following the contract for the construction of the tanks at Pearl Harbor, and with it a preference right to a lease of a large share of naval reserve No. 1, to be followed, without competitive bidding, by a lease of the entire reserve, comprising over 30,000 acres, estimated to contain 250,000,000 barrels of oil, out of which, Doheny told the committee, he would be in bad luck if he did not make $100,000,000 profit.

The fact of the matter is there were others seeking the lease. There were others who were negotiating for it, and at least one of them was conferring with the Secretary of the Interior in the matter. The statement is not fair as to its absolute lack of any competitive bidding.

On page 25 we have a reference to section 36 in the reserves of California which is entirely inaccurate:

> The State of California, apparently relying upon the return of the surveyor and the mention of the character of the land appearing on the plats prepared by him, alleging that section 36 was mineral in character, filed an application in the Land Office asking to be permitted to select other lands in lieu of said section 36, a right it was entitled to exercise under the granting act, if that section was indeed mineral in character.

Here is where the misstatement begins:

> This application was denied upon the ground that the lands applied for had already been appropriated, and the motion was amended so as to be directed to other tracts, section 36 as a base having been withdrawn by an amended application filed in 1905.

The facts are that on January 4, 1902, the State of California applied this section 36 as a base for new land—pages 1475–1477—that is, when a section of land has been granted to a State by the Government and it is found that the section granted to the State is mineral and, thus classified as mineral land, the State is not permitted to take possession of that section thus designated as mineral but is permitted to use that section as a base for making entry upon other equivalent land. On November 20, 1905, the State withdrew section 36 as the base, as will be shown on page 1481 of the record. Those were the only relations of section 36 to new land selections. The first action was evidently taken because the land surveyor had classified section 36 as mineral land. The second action was eventually taken because the department, on the report of Special Agent Ryan, had classified the land as then being not known mineral land, but the statement of the report in regard to section 36 is quite inaccurate.

Mr. President, on page 27, in referring again to the right of review before the Secretary of the Interior, about which I made

some comments awhile ago and which I shall not now repeat, the report states:

> Such a proceeding as that entertained by the Secretary of the Interior is wholly unknown in the practice of the land department. No precedent for it was known by anyone so far as the committee was able to learn.

This declaration goes out from the committee, and the committee wants the Senate to adopt it, that the action of the Secretary of the Interior in hearing these matters was in violation of all practice, of all procedure, and against the uniform course of action in the department. If the committee had taken pains to look at page 1600 of the hearings, they would have found that statement to be doubtful as to its accuracy; that such practice is quite within the rules of procedure as has been again and again demonstrated and expressly affirmed in opinions.

On page 28——

Mr. BURSUM. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from New Mexico?

Mr. BURSUM. Would it not be possible for the Senate to agree to take a vote on this proposition without so long a debate?

Mr. SPENCER. I should be very glad to end the necessity of debating this question.

Mr. BURSUM. This is the last day of this session——

Mr. SPENCER. I recognize that fully.

Mr. BURSUM. To my mind the proposition of taking all the time in a debate at this time is simply outrageous and unjust.

Mr. SPENCER. I recognize the force of that. I hope it will not be applied to me. I will stop right now if the Senator from Montana will not ask for the immediate adoption of his report. If that is adopted, that puts the Senate back of his report, and all I want is an opportunity, and a fair opportunity, to examine that report before we vote on it.

Mr. ROBINSON. Mr. President——

Mr. BURSUM. Let us vote on it now. What is the difference?

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Arkansas?

Mr. SPENCER. I yield for a question.

Mr. ROBINSON. I inquire of the Senator from Missouri whether he thinks he is justified in preventing the Senate from doing other business in order to escape a vote on the majority report made by the Senator from Montana respecting the oil investigation?

Mr. SPENCER. Mr. President, I will answer the Senator from Arkansas that I have no intention of preventing a vote. I have no desire to indulge in what is commonly called a filibuster.

Mr. ROBINSON. If the Senator will pardon me, that is not the question I asked him. I asked the Senator from Missouri whether he feels that he is justified in preventing the Senate from transacting any other business in order to avoid a vote on the majority report presented by the Senator from Montana; and in that connection, if the Senator will indulge me for a brief statement, I would like to state that apparently the Senator, in order to keep the Senate from registering its will on the subject matter of this report respecting the oil-lease investigation, has taken the floor and proposes to debate the report until the session ends. If he does that, he must take responsibility for the defeat of the deficiency appropriation bill, for a denial of a vote on the veto message of the President respecting the postal employees salary bill, and all other measures that are pending before the Congress. I want the Senator from Missouri to understand that if he filibusters against a vote on the report offered by the Senator from Montana, the majority report of the committee, he will by his doing so defeat all measures that are now pending before the Congress.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. ROBINSON. Permit me to finish my statement, with the Senator's indulgence.

The Senator has been occupying the floor and taking unanimous consent to resume the floor so as to prevent the Senate from transacting any business except such business as he desires to be transacted. If he wants to take responsibility for defeating the general deficiency appropriation bill and for preventing any vote on the veto message of the President and for defeating all conference reports that may be outstanding, he can do so by pursuing the course he is now pursuing, but he must take that responsibility.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. SPENCER. I yield for a question.

Mr. LODGE. I merely desire to say this, in answer to what the Senator from Arkansas has just said, that the Senator from Missouri is not the only one who is concerned in this report. This is a voluminous report, with more or less testimony. I am one of many who have had no opportunity to read it or examine it.

Mr. ROBINSON. Will the Senator from Massachusetts yield?

The PRESIDING OFFICER. The Senator from Missouri has the floor.

Mr. ROBINSON. Will the Senator from Missouri yield?

Mr. LODGE. I have not finished.

Mr. SPENCER. After the Senator from Massachusetts has finished.

Mr. LODGE. I will be very brief. I do not propose, for one, to have that report choked down my throat this afternoon before I have had an opportunity even to examine it, and I do not think any of us ought to be subjected to that. This is not a report to be adopted by the Senator from Missouri or by the Senator from Montana. It is a report for which the Senate is to be responsible, and we ought to have reasonable opportunity to read it and express our views, if we desire to do so. I did not bring up this report. I do not know who did; but it can not be finished up in two hours this afternoon.

Mr. ROBINSON. Mr. President, will the Senator from Missouri kindly yield to me?

Mr. SPENCER. I yield for a further question.

Mr. ROBINSON. It appears, from the statement of the Senator from Massachusetts, the leader of the majority, that he indorses the filibuster indulged in by the Senator from Missouri to prevent the Senate from voting on the motion for the adoption of this report respecting the oil-lease investigation. The Senator from Massachusetts has said no opportunity has been afforded Senators to consider the report. The report was printed two or three days ago, and ample opportunity has been afforded Senators to read the report and to familiarize themselves with its contents. The country can not be deceived. Neither the Senator from Missouri nor the Senator from Massachusetts can deceive the Senate or the country. This is a deliberate filibuster and an effort to prevent the Senate from passing upon the report made by the Senator from Montana, and in order to do that the leader of the majority and the Senator from Missouri are both willing, according to their statements just made, to defeat the general deficiency appropriation bill, to prevent a vote on the veto message of the President, to defeat outstanding conference reports, including that on the naval bill—anything to prevent the Senate from voting on this report on the oil-lease investigation.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield?

Mr. SPENCER. There shall be no misunderstanding.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield; and if so, to whom?

Mr. SPENCER. I do not yield.

Mr. WALSH of Montana. A point of order, Mr. President.

The PRESIDING OFFICER. The Senator will state his point of order.

Mr. WALSH of Montana. I make the point of order that the Senator from Missouri has yielded the floor.

The PRESIDING OFFICER. Under the liberality which generally characterizes the proceedings of the Senate, the Chair can not sustain that point of order.

Mr. SPENCER. Mr. President——

Mr. WALSH of Montana. I give notice that if the Senator from Missouri again yields to anyone, I shall insist that he yield the floor.

Mr. SPENCER. Mr. President——

Mr. HEFLIN. Mr. President——

The PRESIDING OFFICER. Does the Senator yield?

Mr. SPENCER. After the notice given by the Senator from Montana, I must decline to yield.

Mr. HEFLIN. Mr. President, the Senator from Tennessee——

The PRESIDING OFFICER. The Senator from Missouri declines to yield.

Mr. HEFLIN. A point of order.

The PRESIDING OFFICER. The Senator will state the point of order.

Mr. HEFLIN. The Senator from Tennessee [Mr. McKELLAR] notified the Senator from Missouri that if he yielded again the

point of order would be made against him. He has yielded twice since that time.

The PRESIDING OFFICER. By unanimous consent.

Mr. HEFLIN. He yielded twice to interruptions.

The PRESIDING OFFICER. Those were unanimous-consent yieldings, to which the point of order is directed, as the Chair recollects it. At any rate, the Senator from Missouri has the floor.

Mr. SPENCER. There shall be no misunderstanding about the parliamentary situation in which we find ourselves if I can help it. If the argument and the facts back of the Senator from Arkansas were equal to the eloquence and power of his statement, they would be unanswerable. But what are the facts? If there had been any desire to filibuster, would the Senator from Missouri have yielded again and again on request with the mere condition that he could resume when Senators had finished? If there had been any such desire to cut off other business from the Senate, would that have happened?

Mr. ROBINSON rose.

Mr. SPENCER. Will the Senator please let me finish? More than that, I said when I started and I repeat now that if the Senator from Montana will defer not only to my request but that which has just been advised by the Senator from Massachusetts, which was indicated by the five members of the Committee on Public Lands and Surveys who signed the report—if he will not insist upon the Senate adopting at this time a report which they can not in the nature of the case have read or considered and which does not carry——

Mr. ROBINSON. Mr. President, will the Senator yield for a question?

Mr. SPENCER. Just a moment—and which does not carry a single recommendation that requires immediate action, but is on the table and the Senate has ordered 10,000 copies of it printed for distribution and information—if the mere point of asking the Senate to adopt as its own a report about which in the nature of the case they know nothing, I will yield instantly, and I certainly would not do that if any filibuster was in my mind. More than that, I will say to the Senator from Arkansas that while I regret that the pointing out of some of what seemed to me the mistakes and misstatements and unwarranted inferences of the report I say frankly that they result only from a casual examination. They are not nearly as complete as they doubtless could be, but they are sufficient in number to require some time to state them before the Senate.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. SPENCER. Mr. President, a parliamentary inquiry. In view of the friendly notice which has been served from the other side——

The PRESIDING OFFICER. The Chair will anticipate the Senator and inform the Senator from Missouri that if he yields for any purpose whatever he will lose the floor.

Mr. SPENCER. I am sure that was not the purpose of the Senator from Arkansas.

Mr. ROBINSON. No, indeed. I just wanted to ask the Senator two or three questions.

The PRESIDING OFFICER. The Senator from Missouri will proceed.

Mr. SPENCER resumed his speech. After having spoken for some time,

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. SPENCER. I can not yield under the order.

Mr. WALSH of Massachusetts. Mr. President, a point of order.

The PRESIDENT pro tempore. The Senator will state the point of order.

Mr. WALSH of Massachusetts. Earlier in the session the President of the Senate declared that no action on the President's veto message could be taken under the Constitution until the veto message had first been entered on the Journal. I inquire of the Chair if a reading of the veto message is not an entry on the Journal of the Senate?

The PRESIDENT pro tempore. The Chair hardly understands the Senator's point of order.

Mr. WALSH of Massachusetts. I inquire of the Chair if the reading of the President's veto message to the Senate is not an entering of that message upon the Journal of the Senate?

Mr. KING. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state the inquiry.

Mr. KING. May a parliamentary inquiry be introduced into proceedings not relating to the subject matter or cognate matters which are being discussed by the Senator who has the floor?

The PRESIDENT pro tempore. The Chair has no control over the address of the Senator or what he is to say or what he is talking about.

Mr. KING. I beg the Chair's pardon. The Chair does not understand what I was stating.

The PRESIDENT pro tempore. Yes, the Chair does.

Mr. KING. The parliamentary inquiry is whether a parliamentary inquiry may be made relative to a matter which is not cognate to the subject under discussion and does not relate to the right of the occupant of the floor to continue.

The PRESIDENT pro tempore. The Chair is of the opinion that a parliamentary inquiry can be made at any time. The Chair is of the opinion, further, without any opportunity to examine the matter, that the mere reading of the President's message is not spreading it upon the Journal in accordance with the Constitution.

Mr. WALSH of Massachusetts. Then, I inquire if the Chair will not make an effort to ascertain whether it has been entered on the Journal.

The PRESIDENT pro tempore. The Senator from Missouri will proceed.

Mr. SPENCER. Commencing on page 27 of the report is a very interesting discussion of two cases against the Southern Pacific Railroad Co. in each of which the Government was a party, having to do with section 36, to cancel a patent for lands adjacent to that section and within the exterior reserves. There were two cases. The question involved in each case was as to whether the land was known to be mineral when its survey was approved. In the one case the decision was for the Government; that is, that the land in question in the United States district case was mineral at the time of the approval of the survey, and therefore the title did not pass to the patentee but remained in the Government. The court of appeals reversed the case and the Supreme Court reversed that decision, as I recollect, and sustained the contention of the Government as decided by the United States district court. The second case was directed to land inside of the reserve and was decided by the district judge, pending the appeal in the first case to the United States Supreme Court, and relying upon the decision of the Circuit Court of Appeals in the first case, which was unfavorable to the Government, the right of the Government was disallowed, and the report goes on to say—and here is where I can not subscribe to the statement of the report, because it is neither a fair nor an accurate statement. The report reads:

> No appeal was taken from that decision—

That is true.

> though the time for appeal had not expired when the decision of the Supreme Court was rendered in suit No. 1.

It was in suit No. 1 that the Government secured final judgment.

> The facts as to the tracts within the reserve involved in suit No. 2 were substantially identical with the facts upon which the Supreme Court ruled that the land involved in suit No. 1 belonged to the United States.

The inference and the argument is, first, that the Department of Justice was clearly derelict in not prosecuting an appeal in case No. 2; and, second, that the facts in the second case were as stated substantially identical with the facts in the first case. The truth of the matter is that in the second case there was fraud and in the other case there was not fraud, which fact differentiates entirely the two cases. In the first case, which was the Elk Hills case, it was found that the railroad company had committed fraud and the case decided favorably to the United States because the railroad company had committed fraud, whereas in the second case the decision was in favor of the railroad company because it had not committed fraud. Senator DILL asked this question when Mr. Palmer was before the committee:

> In the Elk Hills case there was fraud?
> Mr. PALMER. Yes, sir.
> Senator DILL. In the Southern Pacific case there was fraud?

That is case No. 2. The witness replied:

> It was purely a question of fact as to whether the Government had established fraud on the part of the railroad company

> When it came to the wisdom of taking the appeal in the second case the Attorney General, Mr. Palmer, stated that he could not consistently take an appeal to the Supreme Court in that case. (P. 2400.)

I ask what object is there, what purpose can be served in asking the Senate of the United States to adopt the report and

say in effect: "The Senate of the United States hereby decides that the Attorney General of the United States, Mitchell Palmer, ought to have taken an appeal, and if he had taken an appeal the questions in the two cases, the one in which he did not take an appeal and the one in which an appeal was taken, being identical, the Government would have won both cases." The statement is not borne out by the facts. It is beyond our function. There is no need for it. It is going outside of anything that has to do with the legitimate purposes of the committee. I do not like it.

On page 30 the question of the employment of the marines in evicting certain trespassers on Teapot Dome is severely criticized. I do not doubt but what the criticism is somewhat warranted, and yet I call the Senate's attention to this fact. The custom in the oil fields and mining region since the inception of the mining law has been for the man in possession to retain his physical possession by physical action against the trespassers.

There are those in the Senate like the Senator from Arizona [Mr. ASHURST] and others who are familiar with mining law who well understand the practice, since the mining law was first established that the man in possession by physical means prevented dispossession by trespassers. This places the burden of proof upon the trespasser. This view of the law is consistently supported everywhere in the mining region. Had the Mammoth Oil Co., which was then actually in possession, held wholly under placer mining title, they would have immediately proceeded to have thrown the Mutual Co. off when they sought to trespass; if the Mammoth Oil Co. had had an undisputed right there, a title to the land, or a placer mining right, they would have acted against the trespassers themselves; but because the Mammoth Oil Co. was holding under a lease from the Government they were afraid to do this for fear of getting into difficulty with the Government itself. They immediately brought the matter to the attention of the Government, when the trespassers thus invaded the right of the Government lessee, and they said to the Government, "Here we are; we are your lessee; we are on the land; we are fulfilling our contract; we are paying our royalty; and here are trespassers who are coming on this land which we have leased from you." It was then up to the Government either to throw the trespassers off by physical means or to authorize the Mammoth Oil Co. to do it. This was the situation which seemed to warrant the use of the marines. I do not defend it, but the statement in the report is a conclusion with which I do not entirely agree.

I call the attention of the Senate to one or two more things in connection with the lease, and I shall hasten to a conclusion as quickly as I can, for, Mr. President, I should like again to say, as I said when I began, that I regret as much as any man in the Senate the time that I have taken up on a subject which is not interesting to a majority of Senators. I can not, however, let the majority report come before the Senate for possible adoption without calling the Senate's attention to what I believe are some of the many mistakes and misstatements, which doubtless can be corrected and which ought to be corrected in any report that is finally adopted by the Senate. More than this, if there had been any emergency, if there were any recommendations in the report that needed action, I should not have interposed objection, and I certainly have no intention to filibuster in these closing hours of this session.

On page 32, beginning in the second paragraph, there is this statement, to which I refer very briefly and leave it:

> Your committee can not believe that a lease under which the Government receives 6 per cent of the oil in the ground and the lessee gets 94, including what it receives on account of the construction of tankage, can possibly be in the interest of or just to the former.

That is an unfair statement. That leads any Senator or any other reader to the conclusion that out of these leases the Government gets 6 per cent and the lessee gets 94 per cent. That is not the fact. The average royalty of oil leases is about 12½ per cent, but in the naval oil reserve No. 3 lease the Government gets about 17 per cent—three times as much as the report indicates to be the Government's share.

### MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House receded from its disagreement to the amendments of the Senate numbered 37 and 39 to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, and concurred therein; that the House insisted upon its disagreement to the amendments of the Senate numbered 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 58, and 59 to the said bill; agreed to the further conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MADDEN, Mr. ANTHONY, and Mr. BYRNS of Tennessee were appointed managers on the part of the House at the further conference.

The message also announced that the House had passed the bill (S. 2797) to authorize the payment of claims under the provisions of the so-called war minerals relief act, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had passed bills and joint resolutions of the following titles:

S. 2265. An act to provide for a rearrangement of the public alley facilities in square 616 in the District of Columbia, and for other purposes;

S. 2694. An act to enable the trustees of Howard University to develop an athletic field and gymnasium project, and for other purposes;

S. 3397. An act to remit the duty on a carillon of bells to be imported for the Church of Our Lady of the Rosary, Providence, R. I.;

S. J. Res. 43. Joint resolution in relation to a monument to commemorate the services and sacrifices of the women of the United States of America, its insular possessions, and the District of Columbia in the World War; and

S. J. Res. 146. Joint resolution to amend section 13 of the act entitled "An act to provide for the classification of civilian positions within the District of Columbia and the field service."

### ENROLLED BILLS SIGNED

The message also announced that the Speaker of the House had signed enrolled bills of the following titles, and they were thereupon signed by the President pro tempore:

S. 2257. An act to consolidate, codify, revise, and reenact the laws affecting the establishment of the United States Veterans' Bureau and the administration of the war risk insurance act, as amended, and the vocational rehabilitation act, as amended;

H. R. 1414. An act to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes; and

H. R. 8578. An act to amend the act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," approved February 17, 1911, as amended.

### LEASES UPON NAVAL OIL RESERVES

The Senate resumed the consideration of the motion of Mr. WALSH of Montana to adopt the report of the Committee on Public Lands and Surveys, submitted pursuant to Senate Resolution 147.

Mr. PHIPPS. Without taking the Senator from Missouri from the floor, I should like to ask unanimous consent for the present consideration of the amendments to the Senate bill which have been made by the House of Representatives.

The PRESIDENT pro tempore. Does the Senator from Missouri yield?

Mr. SPENCER. I do not yield.

The PRESIDENT pro tempore. The Senator declines to yield.

Mr. SPENCER. I say again that if I may have unanimous consent to resume the floor I will yield with pleasure to the Senator from Colorado.

Mr. McKELLAR. I object.

Mr. SPENCER. Mr. President, it is not a fact that the Government receives but 6 per cent royalty and that the lessee receives 94 per cent, which is the natural inference to be drawn from the reading of the report. The fact of the case is that the Government actually receives about 17 per cent of the oil in naval reserve No. 3 and 27 per cent of the oil in naval reserve No. 1. The Government suggested when framing the contract that when it came to the payment of the royalty oil it did not want it all in oil, but that it wanted a part of it used for the purpose of building storage tanks which the Government should own and in which the naval oil should be stored.

So, pursuant to that contract, the lessee when it got the oil out of the ground gave one-third of the royalty oil to the Government in fuel oil, as the Government desired, and used the other two-thirds of the royalty to liquidate the building of tanks for the Government, as the Government requested. Those tanks have now been largely built and are being completed, and in them, as I said a moment ago, 1,500,000 barrels of oil are stored at Pearl Harbor, in the Hawaiian Islands, and 2,400,000 barrels more will be stored there in the near future after the additional tanks shall have been completed. That has doubled

the efficiency of the Navy and has made it a power in world matters which it never could otherwise have been.

How unfair, then, it is even to attempt to indicate that under these leases 6 per cent comes to the Government "and the lessee gets 94 per cent, including what it receives on account of the construction of tankage." It is an unfair statement.

Again, on the same page, the statement is made:

If the Secretary of the Navy consulted with anyone competent from experience in affairs of such magnitude to advise him concerning the terms of the lease, viewed as a business proposition, the fact was not divulged.

That statement is corrected somewhat a little later, but it is grudgingly done, as I shall show. As a matter of fact, the Secretary of the Interior from the beginning was in constant conference with whom? With the Bureau of Mines, which, by reason of its geological and mining skill and equipment, was best qualified to advise him. Yet the report states:

If the Secretary of the Interior consulted with anyone competent from experience in affairs of such magnitude to advise him concerning the terms of the lease, viewed as a business proposition, the fact was not divulged. Evidently he conceived himself quite competent unaided to negotiate with such veterans in the oil business as Sinclair and Doheny. It is true he conferred with officials of the Bureau of Mines, technical men not chosen by reason of their skill or success in business.

The Senate of the United States is asked to indorse and to adopt those conclusions which are thrown into the report. It is intimated that with such experts as Sinclair and Doheny on the one side the Secretary of the Interior, without any advice or cooperation from anybody else, would have a hard time of it; when, as a matter of fact, the leases, according to the best evidence that we could get from unprejudiced sources, are the best leases the Government ever secured and, so far as the character of the leases themselves is concerned, they are of inestimable advantage to the Government of the United States.

Evidently the conscience of whoever wrote the report operated before he finished the paragraph, for at the end of the paragraph, after having stated that—

If the Secretary of the Interior consulted with anyone * * * the fact was not divulged. * * * Evidently he conceived himself quite competent unaided to negotiate with such veterans in the oil business as Sinclair and Doheny—

Grudgingly this is added:

It is true he conferred with officials of the Bureau of Mines, technical men, not chosen by reason of their skill or success in business.

There is no Senator who has had any dealings with the Bureau of Mines who does not know what competent men there are in that bureau and what a competent bureau it is. What is the object of asking the Senate of the United States to slur, insult, to cast a reflection upon the Bureau of Mines, which has had in it such men as W. A. Williams, Chester Naramore, J. O. Lewis, A. W. Ambrose, F. B. Tough, men of high standing, whose opinions were always sought. When the committee wanted experts to go to the Wyoming field and give us an opinion in regard to those Teapot Dome leases upon which we could rely, where did we go? We took Mr. Lewis from the Bureau of Mines, because he and Mr. Clapp were the best men the committee could find in the United States. And now, because the Bureau of Mines on certain matters does not quite agree with the senior Senator from Montana, he wants the Senate to adopt in a report, which no Senator has had the opportunity to read or consider, the statement that while the Secretary of the Interior consulted with the Bureau of Mines, yet they were "not chosen by reason of their skill or success in business." I say it is unfair. I do not hesitate to say before leaving that subject that that paragraph alone would subject this report to ridicule by every competent oil man in the country; that it would stamp upon it the evidence of partisanship and unfairness; and that it would make it the subject of contempt that any man would attempt to cast such ridicule upon the Bureau of Mines and make such statements as are contained in the paragraph which I have just quoted.

Now, Mr. President, I call the attention of the Senate to the first paragraph on page 32.

A disposition is evinced—

Says the report—

in some quarters to dismiss or overlook the very suggestive circumstances shown in the hearings indicating corruption in connection with the Sinclair and Doheny leases, the flagrant disregard of the law and the unwarranted assumption of authority that attended their execution, the abandonment of the settled policy of the Government evidenced by them—

When the whole result of the hearings indicates that there was no established policy of the Government that was abandoned.

Mr. ASHURST. Mr. President, will the Senator yield to me for a moment?

Mr. SPENCER. I can not yield, under the ruling of the Chair. I will yield if I may have unanimous consent to resume when I have yielded. In that event I will do so with pleasure.

The PRESIDENT pro tempore. The Senator declines to yield.

Mr. SPENCER. There was no settled policy of the Government. It was shown in evidence that under the administration of Secretary Daniels, when he executed leases and took oil out of the ground, he did it for the immediate use of the Navy. The present administration has taken oil out of the ground and stored it for use by the Navy as it may become necessary in an emergency, but not for immediate use. The questions of law that are involved in connection with these leases, and in regard to which the report says that they were granted in "flagrant disregard of the law," are now before the courts. I am talking to many men who are lawyers of standing and distinction. This report seeks to have the Senate of the United States declare that the legal propositions involved in those leases were flagrant disregards of law. They are doubtful propositions. Every one of them is submitted before the courts of the law now for decision, and the courts of the law alone are competent to decide them, not the Senate of the United States.

On page 32 there is a paragraph headed—and I comment upon this very briefly—"The leases as good bargains," and then there follows a more or less extensive criticism——

Mr. ASHURST. Mr. President, I rise to a point of order, not with any disposition to take the Senator off the floor.

The PRESIDENT pro tempore. The Senator will state the point of order.

Mr. ASHURST. I understand that under the rule a Senator may speak twice on the same day. Therefore, if the Senator from Missouri should yield, and business should intervene, he would be entitled to be recognized again, because he could speak twice, and a question would not take him off the floor unless he had spoken twice.

The reason why I raise this point is because some conference reports and some bills, especially the motion made by the Senator from Colorado [Mr. PHIPPS], require attention. They are bills that ought to be attended to and disposed of. Therefore I say to the Senator, my view of the rule is that a Senator has a right to speak twice, and a question would not take him off the floor until he had spoken twice.

Mr. SPENCER. Does not the Senator from Arizona think I have spoken quite long enough instead of speaking twice? I would much prefer to quickly conclude, as I hope to do.

Mr. ASHURST. With that illuminating and gratifying hope I will not say anything more.

The PRESIDENT pro tempore. The Chair does not yet exactly understand the point of order.

Mr. SPENCER. I do not know whether it is as illuminating to me as it is to the Senator from Arizona, but it is quite as gratifying, because, I say again, as I draw to a close in connection with this report, that I regret more than I can express what seems to me the duty that has been imposed upon me by the insistence of the senior Senator from Montana that the Senate should at once act upon a report of great importance and with which they are entirely unfamiliar and which, as I have shown, is inaccurate and unfair.

Senators, the question before us is a report that we are asked to adopt. I have indicated some reasons why I think the report is inadequate and inaccurate, and its conclusions of law and fact unwarranted. I want to say again that there is not a single recommendation in that report upon which the Senate is requested to act. There is merely a determination of the senior Senator from Montana that the Senate shall adopt that report, which no Senator has read.

Mr. President, if the Senate will read the report and then sees fit to stamp its approval upon the inferences and conclusions and reflections contained in it, it is the Senate's privilege so to do, but to ask the Senate to adopt it without any opportunity to examine it is most unfair. I regret the time I have taken. I shall yield the floor in a moment. The observations I have made are but a sample of the mistakes and misstatements that can be shown in the report, and which ought to prevent its adoption by a Senate which has had no time to examine it.

REPORT OF THE INDIAN AFFAIRS COMMITTEE

Mr. HARRELD, from the Committee on Indian Affairs, to which was referred the bill (H. R. 8086) to amend the act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1915," approved August 1, 1914, reported it without amendment and submitted a report thereon.

ENROLLED BILL PRESENTED

Mr. WATSON, from the Committee on Enrolled Bills, reported that on June 7, 1924, that committee presented to the President of the United States the enrolled bill (S. 2257) to consolidate, codify, revise, and reenact the laws affecting the establishment of the United States Veterans' Bureau and the administration of the war risk insurance act, as amended, and the vocational rehabilitation act, as amended.

LEASES UPON NAVAL OIL RESERVES

Mr. NORBECK. Mr. President——

The PRESIDENT pro tempore. The Senator from South Dakota.

Mr. NORBECK. I move that the Senate now take up Order of Business No. 733, House bill 7269, to authorize and direct the Secretary of War to transfer certain materials, machinery, and equipment to the Department of Agriculture.

I will state that this is a bill to authorize the disbursement of some surplus war material. The bill passed the House unanimously after a delegation of the House committee had gone to these army camps and looked them over. The Senate committee wanted to be conservative, and they cut down the quantity a great deal. I am sure there is no one in the Chamber who objects to the taking up of this bill. I ask unanimous consent that it be now taken up and considered.

Mr. WALSH of Montana. Mr. President, I am sure we can have a vote on the matter pending before the Senate in a few moments.

Mr. NORBECK. I move that we now take up the bill to which I have referred.

Mr. KING. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state the inquiry.

Mr. KING. As I understand, there is now pending before the Senate the report submitted by the Senator from Montana, and the question before the Senate is the adoption of that report. The parliamentary inquiry is, May that be set aside by a motion of the character just submitted by the Senator from South Dakota?

The PRESIDENT pro tempore. Undoubtedly the Senate can take up any measure that it pleases to take up.

Mr. WALSH of Montana. Mr. President, touching the motion made by the Senator from South Dakota, I desire to say that I do not feel it at all necessary to continue the debate on the pending motion. The observations of the Senator from Missouri [Mr. SPENCER] have not convinced me that there are any essential misstatements of fact in the report. I have no disposition to make any corrections upon the suggestions made by him nor to suggest any corrections to the Senate.

The observations of the Senator from Missouri are in the nature of a defense of these leases. Quite a long while ago the junior Senator from Alabama [Mr. HEFLIN] insisted that sooner or later some one on the other side of the Chamber would get up and defend these leases. The Senator from Missouri has assumed that task.

The general facts are well known to the Senate. I do not care to submit anything further. I ask for a vote; and if the Senator from South Dakota insists upon his motion to proceed to the consideration of the bill to which he refers, I am going to ask those who are desirous of adopting this report to vote that motion down, and then take a vote on the report, and then proceed to the consideration of the bill referred to by the Senator.

Mr. NORBECK. Mr. President, not only do I desire to take up the bill to which I have referred, but I desire to move the Bursum bill as an amendment to it after we get it up.

Mr. KING. Mr. President, that will lead to some debate.

Mr. WALSH of Montana. I desire to say further that I am heartily in favor of the bill referred to by the Senator from South Dakota and desire to see it passed, but I do not think the matter before the Senate ought to be displaced. Why should we not get a vote on it, and then proceed to the consideration of the bill spoken of by the Senator from South Dakota?

Mr. NORBECK. This is the last and only chance to do something in the way of equity toward the wheat farmers who were robbed during the war by Government interference and by the Government taking their profits away from them.

The PRESIDENT pro tempore. The question is upon the motion of the Senator from South Dakota.

Mr. OVERMAN. Mr. President, I have been sitting here for several hours, waiting to discuss the financial condition of this country, which I think Senators ought to know, and I suppose this is the only time we will have, if we are going to have—as is evidently the case—a filibuster against the adoption of the report of the Senator from Montana. That is evident to everybody. Therefore I am going on to discuss this question right now.

Mr. HARRISON. Mr. President, who has the floor? Will the Senator who has the floor allow me to submit a request for unanimous consent?

The PRESIDENT pro tempore. The Senator from South Dakota [Mr. NORBECK] has the floor. Does he yield to the Senator from Mississippi?

Mr. NORBECK. I do.

Mr. HARRISON. I ask unanimous consent that we take a vote now upon this report, and, immediately following that, that we take up the bill in which the Senator from South Dakota is interested.

Mr. LODGE. I object, Mr. President.

The PRESIDENT pro tempore. Objection is made.

Mr. LODGE. If Senators want a vote on the bill of the Senator from South Dakota, do not let them mix it up with this other matter.

Mr. OVERMAN. Mr. President, the motion of the Senator from South Dakota is debatable.

The PRESIDENT pro tempore. Undoubtedly.

Mr. OVERMAN. Therefore, I rise to debate it.

The PRESIDENT pro tempore. The Senator from South Dakota has the floor.

Mr. OVERMAN. Will the Senator yield to me? I am for his bill.

Mr. NORBECK. If the Senator is going to be brief, I will yield with the understanding that I do not yield the floor.

Mr. PITTMAN. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. PITTMAN. If the Senator makes his motion, is he going to address himself to it, or is he going to stand there and keep the floor without speaking?

The PRESIDENT pro tempore. The Senator from South Dakota has moved to take up a certain bill.

Mr. PITTMAN. I say, if he does not desire to discuss it, there are others who do. I am propounding a parliamentary inquiry as to whether the Senator from South Dakota is holding the floor to discuss his motion or not. If he wants to discuss it, of course, that is his right.

Mr. OVERMAN. I do not intend to take the Senator off the floor.

The PRESIDENT pro tempore. The motion is debatable. Every Senator in the Chamber will have an opportunity to debate it if he so desires.

Mr. NORBECK. Mr. President, in reply to the question, I will state that I should like to speak upon this matter a while; but I will yield to the Senator from North Carolina for a moment, with the understanding that I do not yield the floor.

Mr. OVERMAN. Mr. President, I do not intend to be long, because I recognize the fact that Senators have matters here that ought to be brought up, and I recognize the fact that two very important appropriation bills have to be settled this evening, if settled at all; and therefore I am not going to speak at any length. Let the Senator go ahead if he wants to, and I will get the floor next.

The PRESIDENT pro tempore. The Senator from South Dakota is recognized.

TRANSFER OF MACHINERY, ETC., TO AGRICULTURAL DEPARTMENT

Mr. NORBECK. Mr. President, I intend to offer an agriculture relief measure as an amendment. This was drafted by Congressman WILLIAMSON, who has never been too tired and never too busy to assist in agricultural relief. The measure is along the line originally suggested by the Senator from New Mexico [Mr. BURSUM], whose energy and resourcefulness has been a marvel to us all and who has worked tirelessly for the relief of the farmers and the ranchmen of his State. It also embodies one or two important features suggested by Congressman SUMMERS, of Washington.

Mr. President, I propose to offer the following as an amendment to House bill 7269:

TITLE II

TO ENCOURAGE AND PROMOTE THE SALE AND EXPORT OF AGRICULTURAL PRODUCTS GROWN WITHIN THE UNITED STATES

That out of funds heretofore appropriated and now in the custody of the War Finance Corporation the President of the United States is authorized and directed to pay (a) 35 cents per bushel bounty on each

bushel of wheat grown in the United States and exported therefrom and a proportionate bounty on all products manufactured wholly from wheat: *Provided*, That such products are manufactured within the United States from wheat grown therein; (b) 15 cents per bushel bounty on each bushel of corn grown in the United States and exported therefrom and a proportionate bounty on all products manufactured wholly from corn: *Provided*, That such products are manufactured within the United States from corn grown therein.

SEC. 2. It is hereby provided that whenever the President of the United States finds that the importation of wheat or corn, or their derivatives, may interfere with the operation of this act, or enhance the expense of the United States thereunder, he shall so proclaim it. Thereafter it shall be unlawful to import into the United States wheat or corn, or their derivatives, except under such regulations and limitations as the President shall prescribe in his proclamation.

SEC. 3. All powers necessary for the proper administration of this title are hereby conferred on the President of the United States.

SEC. 4. This title shall remain in full force and effect from July 1, 1924, and until December 1, 1925.

Mr. President, I want to again remind the Members of this Senate that during the war every commodity was permitted to seek its natural price level except that of wheat. The Government not only depressed the market by interference but actually fixed the price much below the prevailing market. Not only that, but when the Government Grain Corporation had a monopoly in the handling of grain it took out a profit of more than $50,000,000, which was not returned to the wheat growers.

It is proposed in this measure to redistribute that profit to the wheat producer and do it in a way that will bring up his price as near as possible to that of its pre-war purchasing value for one year.

Mr. President, it is proposed that the Government pay an export bounty of 35 cents per bushel on wheat. The Agricultural Department's head advised me that, based upon the records for last year, the cost of such a bounty would be $48,000,000. It is believed that the domestic price will naturally follow that of the value of wheat exported. Therefore, it will bring an increase of about 35 cents per bushel to the wheat farmer on all the wheat sold, both in foreign and domestic markets.

The objection has been raised that this will increase the cost of flour and the cost of bread. It is admitted that it will increase the cost of flour. But, Mr. President, the cost of bread was just as high when wheat was $2 per bushel as now. Therefore, it need not increase the price of a single loaf of bread in the United States.

This measure also provides for an export bounty of 15 cents per bushel on corn. We export a very small percentage of our corn. To have paid such an export bounty on the exportations for last year would have cost the Government only $4,000,000.

The money to be used in the payment of bounties will not be a burden upon the taxpayer. The Government took the money away from the farmers. This measure proposes to return it to them in the shape of bounties to be paid.

This bill is not permanent agricultural relief. It will not bring the farmer's dollar back to par, but it will be temporary relief for the producers of wheat and corn; and it is generally admitted that if corn sells at a higher price, it will result in better prices for pork and beef.

Since the defeat of the Christopherson stabilization bill I have become a firm believer in the principles of the McNary-Haugen bill, which proposes to bring all staple farm products back to their pre-war purchasing power. But the McNary-Haugen bill has been rejected by this Congress. I admit I am much disappointed over the way it has been handled. When I tried to bring it up I was told that the parliamentary situation was such that it ought to be brought up first in the House, but Democratic Senators joined with Republican Senators, including the Senator from Oregon [Mr. MCNARY], and insisted that it be not a rider to the pet bill of Secretary Mellon, the so-called "tax reduction" bill, that does not reduce the taxes of the farmer.

Many Senators here, including my colleague, Senator STERLING, and Congressman ROYAL C. JOHNSON, had farm relief bills ready to urge, but held back, as they did not want to complicate the situation. They sought, first of all, to get support for the McNary-Haugen bill. When that was defeated we were near the close of the session. This measure I now propose is the last and only chance to secure even partial farm relief at this session, as Congress will now adjourn in a few hours—adjourn before its work is completed. I protested against the adjournment, but the date was fixed as per arrangement between the leaders of the Democratic Party and the leaders of the Republican Party. The South and the East got together, and the Senators from the Northwest, who voted against adjournment, found themselves outnumbered.

I regret that the time is virtually being spent in filibustering and the last few precious hours are being taken up by Democratic Senators, who are speaking on subjects that are not even before the Senate for consideration. If you persist in using up the time, you are preventing farm relief legislation. The responsibility is not upon the Republicans this time, for the majority of them are in favor of this measure, but there is no chance to get a vote on same as long as these filibustering speeches continue.

The question before the Senate is my motion. Mr. President, it is a question whether the farmer shall receive as much for a 14-hour day as others do for an 8-hour day. It is a question whether he shall be able to exchange a day's labor with anybody. Do not talk about the law of supply and demand as though it still operated. The farmer knows nothing about its operation when he buys supplies or pays for service. He only finds that law in operation when he sells his products in competition with the cheap land and the cheap labor of the world.

If this measure reaches the House as a Senate amendment to a House bill, the House will concur. There will be no opposition to it. I want the Senate to realize that fact.

Mr. HEFLIN. Mr. President, what is the amendment the Senator wants put on?

Mr. KING. Does the Senator——

Mr. HEFLIN. What is the amendment?

Mr. NORBECK. It is printed and is on the desks of Senators.

Mr. KING. I want to ask the Senator whether it is his purpose merely to use the resolution which he is now moving to consider as a vehicle to carry through some other measure which may take a large amount of money out of the Federal Treasury?

Mr. NORBECK. I announced to the Senate three hours ago that when any bill was brought up to which this could be offered as an amendment I would offer it. The motion is now to take up a bill distributing some surplus war material, and if that is taken up I will offer this agricultural relief measure as an amendment to that.

SEVERAL SENATORS. Vote!

Mr. KING. Oh, no; no vote.

Mr. ASHURST. Will the Senator yield to me?

The PRESIDENT pro tempore. Does the Senator yield?

Mr. NORBECK. I yield the floor.

## APPROPRIATIONS AND EXPENDITURES

Mr. OVERMAN. Mr. President, I am in favor of the bill the Senator has been advocating, except the rider. I am not going to stand for a vote at this late hour for some rider on a bill that appeals to me because it appeals to the farmers. It is better for us to consider it, and everybody knows that. But the country ought to know what we have been doing here and what the financial condition of the country is. I propose, therefore, to make a very short statement in regard to that matter.

Statements are issued by the Treasury Department every month, but the people can not understand them, they are so mixed up.

On the 22d of April last I wrote to every member of the Cabinet in Washington and asked him to furnish me with a list of persons who were employed by this Government under the Democratic administration in 1915. I selected that year, although the war was being talked about in this country and preparedness was being discussed, and much money spent for that purpose, but I thought 1915, during the Wilson administration, was a good year to compare with 1924, in this administration.

Each Cabinet officer did me the courtesy—and I thank them for it—of sending me an itemized statement showing the number of persons employed by the Government in 1915 and in 1924, and it is a remarkable fact that, not counting those employed in the Shipping Board, not counting the large number of officeholders in the War Finance Corporation, or the Veterans' Bureau, because it is unfair to consider them, and I try to be as fair as possible, and only take those departments which are run very much as they were run in 1915, from the reports of the Cabinet officers, there are employed to-day, in excess of the number employed in 1915, 108,051 officeholders, and averaging each one at $1,800, that represents an expenditure of $194,491,800.

I tried to be fair, not taking any of the war bureaus, but taking only the departments themselves, and appealed to the Cabinet officers to send in this list. It shows that in the Department of Justice there were 2,000 more employed than in 1915; in the Interior Department, 2,300 more. I am reading

only the round figures, and I will ask that this statement go into the RECORD as an appendix to my remarks.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

[See Appendix 1.]

Mr. OVERMAN. In the Post Office Department there are 52,000 more; in the Department of Labor there are 55 more; in the Navy Department there are 10,000 more; in the Treasury Department there are 28,000 more; in the Department of Commerce there are 2,083 more; in the Department of Agriculture there are 4,000 more; in the War Department, in time of peace, there are 8,000 more, and in the State Department there are 1,800 more. I will do justice to the Secretary of State by saying that he has had to have a good many more officeholders because of the new passport regulations, which really grew out of war, and I ask to have his letter printed as an appendix to my remarks.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

[See Appendix 2.]

Mr. OVERMAN. The total amounts to 108,000 more officeholders.

Mr. McKELLAR. Mr. President, what is the total number of officeholders?

Mr. OVERMAN. I have not added up the figures. There are over five or six hundred thousand, perhaps more than that. The increase over 1915 in these officeholders, not in bureaus which were established growing out of the war, but in the legitimate work of the departments, is 108,000. I stated early in the session, as some may remember, that the Congress was spending money like drunken sailors. That is an extravagant statement, of course, but we do not seem to consider the taxpayers in our appropriations. We do not seem to care anything about them. You can get any sort of a bill through this body which calls for the expenditure of money. Not counting the bonus, not counting the Veterans' Bureau, not counting the Shipping Board, we are spending to-day a billion dollars more than we spent in 1915. The Senator from Utah smiles.

Mr. SMOOT. Yes; I do.

Mr. OVERMAN. I have testimony here to show that, aided as I was, by an expert in the Treasury Department, and I ask to have this table put in the RECORD as a part of my remarks.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

[See Appendix 3.]

Mr. OVERMAN. This shows the regular annual appropriation for 1925 for the Departments of Commerce, of Justice, of Labor, of the Navy, of the Post Office, State, and Treasury, taken from the acts as approved by the President, but the figures for 1925 were taken from the bills as passed by the Senate up to June 2, 1924. I want to say, however, that what is known as the second deficiency or the second urgent deficiency bill is not counted in this statement, because the bill has not passed, and I do not know what it will amount to. I know it will amount to over $158,000,000, the bill which is to come over from the House for the consideration of the Senate, for the bill ought to pass. There is a difference now between the two bodies, and I am sorry to see it, but I am heartily in favor of the Senate standing by what it did. We will have another meeting of the conference committee, probably, and I hope we can agree. I do not know, but even as it passed the House it carries $158,000,000, and the bill will be here directly.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. OVERMAN. Certainly.

Mr. McKELLAR. The Senator gives us the startling information that the increases in the ordinary expenses of the departments of the Government amount to a billion dollars?

Mr. OVERMAN. The increase in the number of officeholders is 108,000.

Mr. McKELLAR. What I want to ask is whether these tremendous increases have all occurred under the rule of the Budget?

Mr. OVERMAN. Many of them have. But I am not going to reflect upon the Budget. I do not think I am called upon to cast any reflection on those splendid gentlemen. They are fine men, and do what they believe to be their duty.

Mr. McKELLAR. The men are all fine men, but the system is bad. It just adds that many more officeholders to draw pay from the Government.

Mr. OVERMAN. I agree with that. I am fully in accord with that, and took that position before the bill establishing the Budget was passed.

The tax table does not include the expenses for the Shipping Board or the Veterans' Bureau. Deducting the war expenses, which were:

| | |
|---|---|
| Sinking fund | $310,000,000 |
| Interest on the public debt | 890,000,000 |
| Public-debt redemptions payable from ordinary receipts | 172,000,000 |

The total amount of increase of appropriations for 1925 over 1915, less war expenses, was $2,223,739,886.50.

Deducting from that the war expenses, which it is not fair for me to include in this statement, of $1,372,277,977, we have the grand total of $951,462,909.

Mr. SIMMONS. Mr. President, I ask for order in the Senate. The Senator is making a very valuable statement, and ought to be heard.

The PRESIDENT pro tempore. The Senate will be in order.

Mr. OVERMAN. Senators usually do not care anything about this question, or many of them do not. The time has come, I think, for economy and reform. We do not hear that any more, but Senators just go on making appropriations of all sorts, kinds, and characters. The truth is that Senator Aldrich was right when he said that $300,000,000 could be saved by the discharge of officeholders. I think $500,000,000 at least could be saved now. This table itself shows where $194,000,000 could be saved.

The second deficiency bill, as I said, will amount to about $158,000,000. That is what it will be if it passes, and I hope it will pass. That will make a grand total of $1,109,462,909.

I have had an expert from the Treasury Department aiding me, and I have gone over these items with him, and he has furnished me this list, so I do not think there can be any mistake about it.

In the legislative department the excess is $322,376. In the Executive Office the excess is $389,000; but all these figures I am reading are over and above the figure of 1915, when Wilson was President of the United States.

The increase for the Agricultural Department is $37,153,000; Commerce Department, $12,000,000; Interior Department, $72,000,000; Department of Justice and the judiciary, $10,000,000; Labor Department, $4,000,000; Navy Department, $138,000,000.

Mr. President, I do not understand in time of peace how the War Department and Navy Department can have such great increases both in number of officers and amount of money spent. Since the end of the war and the treaty with Japan, Great Britain, and France, why is it that we have to have so many officers? Why is this great increase over 1915? At that time we were talking about preparing for war and probably added a good many employees on that account. Since peace was declared they are still increasing, although we hear the Senator from Utah [Mr. SMOOT] talk about how many thousands and hundreds of thousands of officeholders have been discharged, and how much money has been saved. That is on account of the war. Of course, we have discharged hundreds of thousands of officeholders. Of course, we have saved millions and millions of dollars. We had to do it. There was no use to spend money, because the war was over. In all of the matters which I am bringing to the attention of the Senate I have deducted the activities of the war. I have deducted the Veterans' Bureau, which has cost millions; I have deducted the Shipping Board, and all those activities growing out of the war; and still we have these vast totals, still we see these wonderfully monstrous extravagances of the administration in the way they are spending and in the number of officeholders being appointed.

## APPENDIX 1

*Comparison of the personnel of the departments for 1915 and 1923*

| Department | 1915 | 1923 | Decrease (−) or increase (+) 1923 compared with 1915 |
|---|---|---|---|
| Department of Justice | 8,095 | 10,423 | +2,328 |
| Interior Department | 19,455 | 17,092 | −2,363 |
| Post Office Department | 298,085 | 350,764 | +52,679 |
| Department of Labor (the 1923 figures do not include 687 persons with the department at a nominal salary of $1 per year) | 2,193 | 2,248 | +55 |
| Navy Department | 30,274 | 40,599 | +10,325 |
| Treasury Department | 30,984 | 59,937 | +28,953 |
| Department of Commerce (the 1915 figures do not include 966 temporary employees) | 9,389 | 11,472 | +2,083 |
| Department of Agriculture | 16,223 | 20,261 | +4,038 |
| War Department | 42,029 | 50,110 | +8,081 |
| State Department | 2,134 | 4,006 | +1,872 |
| Total | 458,861 | 566,912 | +108,051 |

108,051 employees at an average salary of $1,800 per year equals an expenditure of $194,491,800.

## APPENDIX 2

DEPARTMENT OF STATE,
*Washington, May 19, 1924.*

THE HON. LEE S. OVERMAN,
*United States Senate.*

MY DEAR SENATOR OVERMAN: In reply to your letter of April 22, 1924, I am pleased to inclose herewith a memorandum showing the number of employees in the Department of State in Washington and in the field for the years 1915 and 1923. It will be noted that the number of employees in the field for 1915 has been approximated, as under conditions existing at that time it was impossible for the department to ascertain the exact number of employees in every office abroad on any given date. The number given may be considered as sufficiently accurate for all practical purposes.

At the risk of exceeding your request I desire to mention a few important facts which are illustrative of the increasing responsibilities of this department.

In 1915 we maintained abroad a total of 41 embassies and legations, whereas the number is now 53.

As an index to the growth of consular activities the total of consular fees collected for 1915 was $1,498,029.80, whereas for 1923 it was $6,805,470.81, a difference of $5,307,441.01.

In 1915 there was no passport visé control, whereas in 1923 the Consular Service visèed 408,671 alien passports and rendered 90,586 passport services to traveling Americans.

In the Department of State in 1915 there were issued 23,119 passports, whereas in 1923 the number was 125,656.

I am sorry not to have figures covering the number of entries and clearances of American vessels from foreign ports for 1915, but you are aware of the fact that at that time there were very few American vessels on the sea, whereas in 1923 there were 20,638 arrivals at American consular posts.

In the matter of bills of health issued to vessels clearing for the United States in 1915 the fees from this source amounted to $87,956.13, whereas in 1923 they amounted to $116,608, the fee for this service remaining the same.

Even in the matter of consular invoices covering shipments of merchandise to the United States the fees in 1915 were $1,236,810.91, whereas in 1923 they were $1,962,026.80, an increase of $725,215, representing roughly 300,000 additional services.

As of possible interest I inclose a printed card giving details of the activities of the Consular Service for the fiscal year 1923. I also inclose a significant picture showing the increase of work in the Consular Service by a contrast in the volume of bound correspondence for the years 1908 and 1909 as compared with 1918 and 1919 at an average consulate.

It is needless to mention to you that the increase in important international problems to be handled, both as regards their complexity and their number, is more than commensurate with the significant growth of routine duties to which I have referred.

This increase has added greatly to the activities and responsibilities of the Diplomatic Service upon which the Government must rely for the receipt of accurate and prompt information regarding political tendencies and developments abroad. Furthermore, the vast expansion since the war of our commercial interests in foreign countries has greatly increased the demands made upon the Diplomatic Service to afford protection and proper assistance to American commercial interests.

I trust that this information will fully cover the purposes of your request.

Very sincerely yours,

3 inclosures. CHARLES E. HUGHES.

*Number of employees of the Department of State in Washington and in the field during the years 1915 and 1923*

| | |
|---|---|
| October 21, 1915: | |
| Number of employees in the field | [1] 1,821 |
| Number of employees in the District of Columbia | [2] 313 |
| Total | 2,134 |
| December 31, 1923: | |
| Number of employees in the field | 3,428 |
| Number of employees in the District of Columbia | 578 |
| Total | 4,006 |

One way of marking the changing times: A small stack of books—seven volumes—shows the correspondence of the American consulate at Mazatlan, Mexico, during the years 1908 and 1909; another stack of 32 volumes shows the correspondence for the years 1918 and 1919. In this decade the number of visitors increased about 100 per cent.

[1] Estimated and does not include contingent employees.
[2] Included 213 permanent employees and estimated number of temporary employees.

*Partial list of services performed by American consular officers during fiscal year ended June 30, 1923*

| | |
|---|---|
| Protection and welfare cases | 75,309 |
| Deaths of Americans abroad | 1,285 |
| Estates settled | 1,037 |
| Registration of Americans | 6,530 |
| Passport services (Americans) | 90,586 |
| Passport visés (aliens) | 408,671 |
| Section 6 certificates (Chinese) | 1,253 |
| Depositions and commissions | 736 |
| Extradition cases | 56 |
| Marine protests | 5,933 |
| Seamen shipped | 28,764 |
| Seamen discharged | 22,750 |
| Seamen deserted | 2,853 |
| Seaman deceased | 129 |
| Seamen relieved | 3,981 |
| Voluntary trade reports | 16,601 |
| Called-for trade reports | 10,598 |
| Replies to trade inquiries | 55,502 |
| Trade opportunities (about) | 4,000 |
| Disinfection certificates | 8,307 |
| Notarial services | 167,764 |
| Consular invoices | 806,817 |
| Landing certificates | 2,889 |
| Bills of health | 39,459 |
| Sanitary reports | 15,158 |
| American vessels entered | 20,638 |
| American vessels cleared | 20,506 |
| Miscellaneous correspondence: | |
| Letters received | 904,601 |
| Letters sent | 1,097,488 |
| Total fees collected for years 1922–23 | $6,805,470.81 |
| Gross cost of Consular Service, 1922–23 | 4,685,060.88 |
| Net gain to the Government | 2,120,409.93 |

## APPENDIX 3

The regular annual appropriation figures for 1925 for Commerce, Justice, Labor, Navy, Post Office, State, and Treasury were taken from the acts as approved by the President, but all other regular annual appropriation figures for 1925 were taken from bills as passed by the Senate up to June 2, 1924, and prior to action by conferees.

Deficiencies and special acts are included in figures for 1915. In 1925 only the regular annual and permanent and indefinite appropriations passed up to June 2, 1924, are included. Deficiencies and special acts for the service of 1925 to be passed in the future must be added for purposes of exact comparison.

The attached table does not include the expenses for the Shipping Board or the Veterans' Bureau.

Deducting the war expenses, which were:

| | |
|---|---|
| Sinking fund | $310,000,000.00 |
| Interest on public debt | 890,000,000.00 |
| Public-debt redemptions payable from ordinary receipts | 172,277,977.00 |
| Total | 1,372,277,977.00 |
| Total amount of increase of appropriations for 1925 over 1915, minus Post Office appropriation | 2,223,730,886.50 |
| Less war expenses | 1,372,277,977.00 |
| | 951,462,909.50 |
| Plus second deficiency | 158,000,000.00 |
| Grand total increase for 1925 over 1915 | 1,109,462,909.50 |
| Plus adjusted compensation of civilian employees in field | 1,135,780,377.34 |

*Comparison of appropriations, fiscal years 1915 and 1925* [1]

| Title | Appropriations, fiscal year 1915 [2] | Appropriations, fiscal year 1925 [2] | Decrease (−) or increase (+), 1925, compared with 1915 |
|---|---|---|---|
| Legislative: | | | |
| Regular annual | $13,956,639.60 | $14,279,016.00 | +$322,376.40 |
| Permanent and indefinite | 800.00 | 800.00 | |
| Total | 13,957,439.60 | 14,279,816.00 | +322,376.40 |
| Executive Office and independent offices: | | | |
| Regular annual | 9,415,867.22 | 398,870,180.16 | +389,454,312.94 |
| Permanent and indefinite | 57,630.00 | 6,457,301.79 | +6,399,671.79 |
| Total | 9,473,497.22 | 405,327,481.95 | +395,853,984.73 |
| Agricultural Department: | | | |
| Regular annual | 23,994,640.64 | 61,147,993.00 | +37,153,352.36 |
| Permanent and indefinite | 5,999,200.00 | 12,360,750.00 | +6,361,550.00 |
| Total | 29,993,840.64 | 73,508,743.00 | +43,514,902.36 |

[1] The regular annual appropriation figures for 1925 for Commerce, Justice, Labor, Navy, Post Office, State, and Treasury were taken from the acts as approved by the President, but all other regular annual appropriation figures for 1925 were taken from the bills as passed by the Senate up to June 2, 1924, and prior to action by conferees.
[2] Deficiencies and special acts are included in figures for 1915. In 1925 only the regular annual and permanent and indefinite appropriations passed up to June 2, 1924, are included. Deficiencies and special acts for the service of 1925, to be passed in the future, must be added for purposes of exact comparison.

*Comparison of appropriations, fiscal years 1915 and 1925*—Continued

| Title | Appropriations, fiscal year 1915 | Appropriations, fiscal year 1925 | Decrease (−) or increase (+), 1925, compared with 1915 |
|---|---|---|---|
| Commerce Department: | | | |
| Regular annual | $11,539,919.06 | $23,939,905.00 | +$12,399,985.94 |
| Permanent and indefinite | 3,000.00 | 3,000.00 | |
| Total | 11,542,919.06 | 23,942,905.00 | +12,399,985.94 |
| Interior Department: | | | |
| Regular annual | 191,858,601.94 | 264,202,756.00 | +72,344,154.06 |
| Permanent and indefinite | 19,820,500.00 | 27,243,269.06 | +7,422,769.06 |
| Total | 211,679,101.94 | 291,446,025.06 | +79,766,923.12 |
| Department of Justice and the judiciary: | | | |
| Regular annual | 10,615,400.10 | 21,371,430.00 | +10,756,029.90 |
| Permanent and indefinite | 147,500.00 | | −147,500.00 |
| Total | 10,762,900.10 | 21,371,430.00 | +10,608,529.90 |
| Labor Department: | | | |
| Regular annual | 3,790,769.97 | 7,956,516.51 | +4,165,746.54 |
| Permanent and indefinite | | 25,000.00 | +25,000.00 |
| Total | 3,790,769.97 | 7,981,516.51 | +4,190,746.54 |
| Navy Department: | | | |

[1] Includes $1,923,552.11 for Post Office Department proper, payable from ordinary receipts (General Treasury). In 1925 all expenses of the Post Office Department are made payable from postal revenues.

[4] Includes sinking fund, $60,717,000; and interest on the public debt, $22,000,000.

[5] Includes estimates for sinking fund, $310,000,000; for interest on the public debt, $890,000,000; and for public-debt redemptions payable from ordinary receipts, $172,277,977.

[6] Includes appropriations for Panama Canal.

[7] In 1915 Postal Service payable from postal revenues only was excluded, as the expenses for Post Office Department proper were payable from ordinary receipts

A FEW OF THE OUTSTANDING ACCOMPLISHMENTS OF THE REPUBLICAN ADMINISTRATION, 1921–1924

PEACE WITH GERMANY

Mr. SMOOT. Mr. President, when the Republican administration came into control of the Government, in 1921, the country was still in a state of war with the Central Powers, due to the stubborn refusal of a Democratic President to conclude any treaty of peace which did not provide for the entry of the United States into the League of Nations and did not subordinate this country to the domination of foreign influences. The first and most important care of the administration became the conclusion of peace with Germany and her allies. Treaties were quickly arranged; diplomatic and trade relations were resumed with the enemy countries; and the strained relations with European nations which had grown out of the Versailles treaty were adjusted.

THE FISCAL SITUATION

As a result of the war, our people had accumulated a debt of $26,596,701,648.01 as against a pre-war indebtedness of one billion. Of this sum $11,000,000,000 was made up of advances to our allies during the war. No arrangements whatever had been made for the collection or the funding of these advances. No country except England had paid a dollar on account of either principal or interest. At the same time, current expenditures of the Government were proceeding at the rate of more than five and a half billions yearly. Government obligations were below par. In spite of this appalling state of the public finances, due at least in part to the unprecedented extravagances of the former administration, the retiring Democratic President had seen fit to disapprove the Budget and accounting bill, designed to bring system and economy into the Government's business.

REDUCTION IN EXPENDITURES

The Republican administration took steps immediately to improve the public credit and to curtail expenditures.

Mr. GLASS. Mr. President, may I interrupt the Senator?

Mr. SMOOT. I wish the Senator would allow me to get through and then I will gladly answer any questions he may desire to ask.

Included in the totals of appropriations, almost two billions is made up of fixed charges growing out of the war—interest on the public debt, sinking-fund contributions, and the payments to ex-service men. The administration has thus reduced the actual cost of the public service to a little more than $1,000,000,000 yearly, practically the amount expended annually before the war.

THE BUDGET SYSTEM

This retrenchment in expenditures was made possible largely by the inauguration of a Budget system immediately after the beginning of the Republican administration. This was the greatest piece of fiscal legislation in the recent history of the country. Not only has machinery been set up under the President whereby he can with intelligence plan the country's financial program, but the committee arrangements in both Senate and House have so been altered as to consolidate and unify the legislative system for the consideration of appropriations and expenditures. The entire credit for the existence and the wonderful achievements of the Budget system must be given to a Republican Congress and a Republican President.

At this point I wish to place in the RECORD a table showing total appropriations, including Postal Service—payable from postal revenues—and estimated and indefinite appropriations, and a table showing total appropriations, including permanent and indefinite appropriations but excluding Postal Service, as follows:

*Total appropriations including Postal Service (payable from postal revenues) and estimated permanent and indefinite appropriations*

| Fiscal year | Total appropriations | Reductions |
|---|---|---|
| 1921 | $4,780,929,510 | |
| 1922 | 3,909,282,209 | $871,647,301 |
| 1923 | 4,248,140,570 | [1] 338,858,361 |
| 1924 | 4,002,644,312 | 155,596,258 |

[1] Increase.

*Total appropriations including permanent and indefinite appropriations, but excluding Postal Service*

| Fiscal year | Total appropriations | Reductions |
|---|---|---|
| 1921 | $4,257,361,240 | |
| 1922 | 3,207,892,754 | $1,049,468,486 |
| 1923 | 3,675,612,872 | [1] 467,719,618 |
| 1924 | 3,495,634,887 | 179,977,985 |

[1] Increase.

*Total appropriations excluding Postal Service and estimated permanent and indefinite appropriations*

| Fiscal year | Total appropriations | Reductions |
|---|---|---|
| 1921 | $2,796,953,488 | |
| 1922 | 1,872,116,394 | $924,837,094 |
| 1923 | 2,155,745,089 | [1] 283,628,695 |
| 1924 | 1,959,966,459 | 195,778,630 |

[1] Increase.

I want to call attention now to the total gross debt as of June 30, 1921, and the reductions taking place, as follows:

*Statement showing reduction in the total gross debt for the fiscal years 1922, 1923, and 11 months of fiscal year 1924*

| | Total gross debt | Reduction |
|---|---|---|
| June 30, 1921 | $23,977,450,552 | |
| June 30, 1922 | 22,963,381,708 | $1,014,068,844 |
| June 30, 1923 | 22,349,707,365 | 613,674,343 |
| May 31, 1924 (11 months) | 21,544,803,396 | 804,903,969 |
| Total reduction (2 years 11 months) | | 2,432,647,156 |
| Yearly average | | 834,050,454 |

In order that Senators may know just what the sales were of war supplies, the proceeds of which were covered into the Treasury in each of these years, I want to put in the RECORD at this time a statement giving the amount in each year, as follows:

*Receipts from sales of war supplies covered into the Treasury*

| Fiscal year: | |
|---|---|
| 1921 | $183,406,227.01 |
| 1922 | 89,319,746.28 |
| 1923 | 77,931,236.95 |
| 1924 (11 months' basis) | 39,282,571.49 |

I now want to call attention to the question of expenditures, shown in the following table:

*Total expenditures chargeable against ordinary receipts* [1]

[On basis of daily statements adjusted to Budget basis]

| Fiscal year | Total expenditures chargeable against ordinary receipts | Reductions |
|---|---|---|
| 1921 | $5,538,209,189 | |
| 1922 | 3,795,302,480 | $1,742,906,709 |
| 1923 | 3,532,269,266 | 263,033,214 |
| 1924 (11 months) | 3,144,448,574 | [2] 43,290,245 |

[1] Includes public debt retirements chargeable against ordinary receipts.
[2] Eleven months' period ended May 31, 1924, compared with corresponding period for the fiscal year 1923.

REFUNDING THE FOREIGN DEBT

Mr. President, legislation was adopted establishing a commission to take up with the various nations the question of refunding their indebtedness to this country, amounting to about eleven billions of dollars. The commission has met with material success. It secured an arrangement with Great Britain—our largest debtor—to fund the entire British debt into long-term bonds and provide for the immediate and continued payment of the interest and of installments on the principal. This was approved by Congress and by the British Government and is now in effect. A debt settlement has also been reached with Finland and Hungary, while negotiations are in progress with all other debtor nations. As the result of the active prosecution of these matters by the administration, the annual income of the Government has been increased by the sum of $180,000,000, representing principal and interest payments by foreign nations. This has been a material help to the Treasury.

BALANCING THE BUDGET AND REDUCING THE NATIONAL DEBT

The fiscal year 1922 began with a deficit of more than $700,000,000. Due to the economies of the administration this deficit was converted into a surplus of $300,000,000 before the end of the year. The excess of receipts over expenditures during the fiscal year 1923 was again more than $300,000,000. It is estimated at the Treasury that there will be a similar surplus at the end of the current year. At the same time the administration was thus bringing the Government's expenses within its income, or balancing the budget, substantial reductions were being made in the public debt. This stood at $26,000,000,000 in 1919. It has been reduced following the inauguration of a Republican Congress in that year to about $24,000,000,000, where it stood at the time of President Harding's inauguration in March, 1921. Within the three years of the present administration it has been cut down to $21,544,806,396—an average reduction of more than $800,000,000 yearly.

RESTORED PUBLIC CREDIT

With this vigorous handling of the Nation's finances, the interest rate on the Government's short-time borrowings was reduced from 5½ per cent to 4 per cent, a saving of millions to the Treasury. Government bonds, which had been selling at about 85 cents on the dollar, returned to par—which meant two and a half billions of dollars in the pockets of the holders of Liberty bonds.

TAX REDUCTIONS

In the face of the large reductions in the public debt and the annual additions to the Treasury surplus, the internal revenue taxes have been reduced—first by the act adopted in November, 1921, and more recently by the act which has just received the President's signature. The first law repealed the obnoxious excess-profits tax, the most damaging of all taxes to ordinary business, reduced high surtaxes, increased the exemptions applying to heads of families with moderate incomes, and repealed most of the so-called nuisance taxes. The act just adopted decreases taxes generally to the lowest level since 1917; reduces the income taxes payable during the present year by 25 per cent; makes a general reduction in all income taxes, and specially reduces the taxes on earned incomes. These large decreases in the tax burden of the people have been possible solely by the most rigid economy practiced by the administration and by the application of common-sense principles to the conduct of the Government's business.

REORGANIZATION OF THE EXECUTIVE DEPARTMENTS

The establishment of budgetary reforms, which not merely have made possible the curtailment of the public expenditures and the reduction of the national debt but have also permitted a substantial reduction in the tax burden upon the people, will not, however, be brought to completion without the reorganization and rearrangement of the executive departments which have the Government's business in charge. The departments have shown a marked improvement in their efficiency under the Republican administration. They have practiced rigid economy. They have eliminated all unnecessary expenditures. They have reduced the number of Government employees nearly 100,000. But further improvements can be made. Immediately after the present administration came into power, Congress established a Joint Committee on Reorganization, which has since been engaged in an intensive inquiry into the details of Government administration. The committee has just laid its report before Congress, recommending the elimination of a number of superfluous bureaus and offices and a comprehensive rearrangement of the entire departmental system. The legislation necessary to accomplish these reforms is now before Congress, and its enactment will complete the compliance of the administration with its promise to introduce sound business principles into the management of the Government.

REDUCTION IN THE ARMY AND NAVY

The Republican administration has reduced the Army and the Navy to a proper peace-time basis. The Regular Army now numbers 140,000 officers and men, and the Navy, including the Marine Corps, 115,000 officers and men. Temporary posts and camps have been relinquished, surplus property disposed of, operating agencies have been consolidated, and other reforms introduced into the administration of the Military and Naval Establishments. Hundreds of millions of dollars have been saved as the result of these changes, without impairing in the slightest degree the effectiveness of our fighting forces for purposes of the national defense.

PREPAREDNESS

The National Guard and the naval reserves have been reorganized and made into an effective support for the regular Military and Naval Establishments. Summer camps and training schools have been conducted with regularity. The organ-

ized reserves of the two military arms are now in skeleton stage to insure the national defense against any emergency. These arrangements make possible the progress and development of defense plans, and a state of national preparedness, with a maximum of efficiency and at a very moderate public expense.

DISARMAMENT

One of the earliest efforts of the administration, in connection with its plans to aid in the restoration and maintenance of the peace of the world and to prevent the recurrence of such devastating conflicts as the late war, was directed to bringing a reduction in the armaments of the major powers. At the invitation of the President, the Arms Conference was called in November, 1921. It was in session three months, and unanimously adopted the administration's proposals definitely limiting armaments on the sea. It resulted in the recognition of this country's open-door policy in China, the withdrawal of Japanese troops from Siberia, the return of Shantung to China by Japan, the abandonment of the long-standing Anglo-Japanese alliance, and the recognition of the American claims in relation to Yap Island. It retained America's proper position in the Pacific and set up machinery for the adjustment of disputes arising in the Orient. This was the most brilliant and far-reaching diplomatic achievement in history, and beyond any doubt accomplished more in the direction of securing world peace than any step which has ever been taken by this or any other country. It has made possible a tremendous lightening of the tax burden, not only in the United States, but in all the leading nations of the world.

GERMAN REPARATIONS

Throughout, by means of unofficial observers, the administration has maintained close contact with the endeavors of European nations to reach an adjustment of the problems connected with the rehabilitation of France and Belgium, and the payment of reparations by Germany. In recent months, the Government named representatives to sit on the commission of experts created to formulate a plan for the final and complete settlement of these matters, which, without exception, were the most difficult and perplexing of the many questions which grew out of the war, and at the same time fraught with the greatest danger to the peace of the world. The commission, under the leadership of the American representatives, has submitted its report. The plan which it proposes has been accepted, in substance, by the Government of Germany as well as by the Governments of the allied nations. And there is little doubt that, largely as the result of the friendly intervention of this country, the principal disagreements between the associated nations and the German people are in fair way to a speedy settlement. This is but a further illustration of the high position in the family of nations which America has reached under the Harding-Coolidge administration.

MEXICO

The long-standing differences between this country and Mexico has been adjusted satisfactorily to both nations, and the United States has resumed diplomatic relations with that country.

PHILIPPINES

At the close of the Democratic administration in 1921, the prestige and authority of the United States in the Philippines had sunk to its lowest level since the American occupation of the islands in 1898. Due largely to a desire on the part of the Democratic Governor General to encourage and hasten Philippine independence the government of the islands had been largely entrusted to native politicians. Mismanagement, extravagance, and corruption were rife in administrative affairs. Government credit was exhausted, the currency was depreciated, and the public finances were in a state of collapse. Immediately after his inauguration, President Harding dispatched a commission to the islands to make a thorough investigation of these conditions. He later appointed as Governor General one of the strongest American administrators in public life. Under his guidance and direction the fiscal system in the Philippines has been reorganized and rehabilitated. Corrupt public officials have been removed from office and punished. The public credit has been restored. And the prestige of the American Nation and the American people in the Far East never was higher than it is to-day.

DOMESTIC AFFAIRS—CARE OF THE VETERANS

The principle for which President Harding and President Coolidge have consistently contended is that the Government shall treat with liberality and generosity all our former soldiers and sailors who were wholly or partially disabled in the service of their country. The administration has steadfastly striven in every possible way to lighten the burden of those of our soldiers who came out of the war handicapped, as well as to help the dependents of those who lost their lives in their country's service. No other administration in the Nation's history has provided more generously for the ex-service men. In 1921, the Veterans' Bureau was established, all Government agencies dealing with former service men were consolidated, and the work of relieving disabled war veterans and their dependents facilitated and expedited. The rates of compensation for disability were liberalized by a Republican Congress, and the administrative policy was adopted of placing the burden of proof in all compensation cases upon the Government. Millions have been expended for the erection of hospitals. Each year approximately half a billion dollars has been paid out to veterans of the Great War and their dependents and to provide for their rehabilitation and hospitalization. The pensions of the veterans of other wars and their dependents have amounted to about $250,000,000 yearly, making a total of about three-quarters of a billion dollars a year provided for the care of our veterans. No other nation in the history of the world has provided more liberally for its former soldiers.

In the closing days of the present session, Congress adopted the soldiers' bonus, involving a payment to veterans amounting to approximately $132,000,000 during the first year, and a total payment of upwards of two and a half billions spread over a period of 20 years.

IMMIGRATION

The enactment of restrictive immigration legislation was one of the most important tasks of the administration. Under the immigration policy which had long been followed by this country, the arrival of great numbers of immigrants from southern and eastern Europe was operating to change, to a dangerous degree, the character and composition of our people. Our standards of living were becoming depressed, our balance of population upset, our ideals and institutions threatened, and our prisons and asylums filled with the socially unfit, as the result of the advent of inferior racial groups and groups having nothing in common with those peoples which had settled and developed the country. The administration sought, and Congress enacted, legislation which for all time will put an end to this menace. The Johnson-Reed immigration law establishes the census of 1890 as the quota base for immigration, and fixes the annual quota from each country at 2 per cent of its representation in the foreign-born population of the United States as it stood in that year. The law will restrict immigration greatly—in fact, to about 160,000 persons a year. It will permit the restoration of the original balance in our population. It will diminish the numbers of the delinquent and defective classes. It will reduce crime, and prevent unemployment. The immigration law is one of the most notable achievements of the present administration.

THE TARIFF

Hand in hand with the restriction of immigration goes the Fordney-McCumber tariff. The restriction of immigration is almost universally approved by reasonable men. Our railroads, our shops and factories, our mines and our farms, should be operated by our own people. One of the objects of restricting immigration is to keep out low-priced foreign labor, and to insure employment for Americans. But a curtailment of immigration would be of little value for this purpose if we were to permit goods produced in foreign countries to be dumped into our markets. Every shipload of goods produced abroad and brought into America for sale takes just so much employment from American laborers and American producers. The Republican administration has stood, as every Republican administration has stood, for the protection of American workingmen and American industries from unfair competition with the cheap labor of foreign countries. Under the Fordney-McCumber tariff our industries and our labor have prospered. There are now few idle factories, and there is but little unemployment. Wages are high and prices good. Our revenues from customs have shown a marked increase, amounting during the last completed fiscal year (1923) to almost $600,000,000.

In spite of the gloomy forecasts of the Democratic opponents of the Fordney-McCumber law, our export trade has increased, and not diminished, under the new tariff. This is at least in part due to the vigorous efforts of the administration to build

up markets abroad for our surplus production. The organization of the Department of Commerce has been expanded and increased many fold in effectiveness during the last three years. Divisions have been established covering farm products, cotton, agricultural implements, coal, electrical equipment, hides and leather, and all other important commodities.

Mr. REED of Missouri. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Missouri?

Mr. SMOOT. I will say to the Senator I am nearly through, and I should prefer not to yield at this time.

Mr. REED of Missouri. Very well.

Mr. SMOOT. Systematic and complete information in relation to foreign markets is being developed both through the foreign agents of the Department of Commerce and through the consular service. This information is collated in the department and regularly made available to the trades affected, to exporters, to the agricultural interests, and to the general public.

AGRICULTURE

The administration has rendered material and timely aid to agriculture—the country's oldest and most important industry. During 1921 a congressional joint commission on agricultural inquiry conducted intensive research to determine the ways in which the Government could best aid the farmer, and in January, 1922, the Secretary of Agriculture, at the request of the President, called a national agricultural conference, which proved to be the most representative gathering of practical farmers and representatives of farm organizations and allied associations which had ever been brought together in this country. Following the recommendations of its own commission and of this national conference, Congress has passed a number of laws designed to assist the agricultural interests of the Nation. One of the most important was the agricultural credits act of 1923, providing Government agencies to handle agricultural loans and authorizing the establishment of private agencies under Government supervision to loan money on livestock security and on farm products in transit to market.

The War Finance Corporation was revived and empowered to loan money to those engaged in marketing agricultural products for export and to banks or cooperative associations of producers making advances for agricultural purposes. The financial relief to farmers made possible by these measures has meant salvation for the livestock industry in the West and the saving from bankruptcy many other agricultural industries essential to the prosperity of the entire country.

The Federal Reserve act was amended so as to give representation to agriculture in the membership of the Federal Reserve Board, to increase the period of discount for agricultural paper, and to broaden the definition of such paper. The cooperative marketing act was adopted giving to farmers the right to form associations for marketing their products. The packers and stockyards act was passed, for the purpose of preventing unfair practices in the marketing of livestock. Millions of dollars were appropriated for the extension and improvement of rural roads.

This is by no means an exhaustive list of the things which the Government has done in the last three years to aid the agricultural communities of the country. But it shows that legislation in the interests of agriculture has been one of the chief concerns of the administration. Many proposals for farmer relief have been before Congress, but none have had the undivided support of the agricultural interests themselves, and this is the principal reason why further relief legislation has not passed Congress at the present session. The failure of these proposals to secure the indorsement of Congress can not obscure the fact that farmer-relief legislation of a practical kind has been adopted, which will beyond question mark the beginning of the return of prosperity to our farmers.

Now, Mr. President, perhaps it would be well to summarize what I have already stated in a few words. It will only take me a short time to do it.

SUMMARY

Under the Republican administration peace has been concluded with our former enemies and friendly relations established with the entire world. The administration of the Government has been placed upon the soundest basis since we became a Nation. Taxes have been cut. Yet the national debt has been reduced and the national credit restored. Rigid economy has supplanted extravagance in the Government departments and in the Army and Navy, and our yearly expenditures have been cut almost in half.

Sound tariff and immigration policies have been put in force. Our export trade has grown. Unemployment has been eliminated. There are but few idle factories. The situation of the farmers, which under the former administration had become desperate, has been materially improved. The people will judge the administration and the Congress by these results. Except by those who look upon the Government as a dispenser of gratuities, these results will be regarded with satisfaction.

THE ACHIEVEMENTS OF THE SIXTY-SEVENTH CONGRESS UNDER PRESIDENT HARDING

The Sixty-seventh Congress passed the farmers' emergency tariff act, which stopped the importations of wheat, milk, and cheese from Canada; corn and beef from Argentina; wool and mutton from Australia; eggs from China; and butter from Norway, Denmark, and Sweden, which were being shipped into this country under the free-trade provisions of the Underwood Democratic tariff.

It authorized the use of a billion dollars by the War Finance Corporation to finance the orderly marketing and exportation of agricultural products.

It reduced the Army and the Navy to a peace-time basis.

It passed the peace resolutions with Germany and Austria and brought about a limitation of armament through an international conference.

It passed the budget bill, vetoed by President Wilson, and put the budget system into operation.

It reduced Government employees over 100,000.

It curtailed the expenses of the Government through economy and good business management, and was thus enabled to reduce the national debt from $26,594,267,878 on August 31, 1919, to $21,544,806,396 on May 31, 1924.

It repealed the soda and ice cream, clothing, drug store, and freight and express taxes.

It reduced the burden on the taxpayer nearly $1,000,000,000 a year.

It combined the activities in behalf of the disabled and injured soldiers in the Veterans' Bureau, as desired by the ex-service man, and provided $500,000,000 annually for soldier-relief work.

It restricted foreign immigration to a 3 per cent basis.

It established the foreign debt funding commission, which has secured satisfactory settlement of the British debt and is negotiating the settlement of the amounts due us from the other nations.

It passed the maternity bill.

It passed a law regulating the grain exchanges and the packing houses.

It appropriated $38,000,000 to build hospitals for sick and disabled veterans.

It provided for the return of alien property not in excess of $10,000 to each person.

It provided for the organization of agricultural cooperative-marketing associations.

It passed the antinarcotic act.

It passed the bill prohibiting the sale of filled milk.

It provided for the monthly payment of Civil War pensions.

It brought about independent citizenship for women.

It created the United States Coal Commission, and made possible the prosecution of war profiteers and grafters.

It passed a permanent tariff law, protecting agricultural products and reviving the operation of our industries, to the end that 5,000,000 idle men were able to find employment.

It enacted the Capper-Lenroot-Anderson-Strong bill, establishing a system of rural credits.

THE SIXTY-EIGHTH CONGRESS, FIRST SESSION

The Sixty-Eighth Congress passed the tax reduction bill.

It granted the soldiers' bonus.

It passed the bill permanently restricting immigration.

It extended for nine months the power of the War Finance Corporation to advance credit to agriculture.

It authorized the settlement of the indebtedness of Hungary and Finland to United States made by the World War Foreign Debt Commission.

It remitted the remaining payments on the Chinese indemnity.

It authorized the postponement of payments by settlers on reclamation projects.

It expanded the Coast Guard to prevent illegal entry of aliens and of liquors, narcotics, and dutiable goods.

It authorized the participation of the United States in two international conferences for the control of the narcotic traffic.

It relieved drought-stricken farmers in New Mexico and made appropriations to check cattle diseases in the Southwest.

It passed a bill reorganizing the diplomatic and consular service.

These, Mr. President, are but a few of the acts that have been passed under this administration.

STATEMENT OF APPROPRIATIONS

During the delivery of Mr. SMOOT'S speech,

Mr. WARREN. Mr. President, will the Senator yield for just a moment?

The PRESIDENT pro tempore. Does the Senator yield to the Senator from Wyoming?

Mr. SMOOT. For what purpose?

Mr. WARREN. I wish to make an announcement regarding appropriations.

Mr. SMOOT. I yield.

Mr. WARREN. Mr. President, it has been the custom in the Senate, on the last day of each session, for the chairman of the Appropriations Committee, representing the majority, to make a statement of the appropriations made during the session, and for the ranking member of the minority on the Committee on Appropriations also to make such a statement. The Committee on Appropriations has been too busy during the last few days to afford the chairman of that committee an opportunity to prepare any but an imperfect statement of appropriations, for, with so many conference reports being acted upon in the last few hours of the session, involving many thousands and hundreds of thousands of dollars, it is only possible to determine upon the exact amounts appropriated after the session has ended. I therefore ask unanimous consent that the chairman of the Appropriations Committee shall have the privilege of inserting in the RECORD early next week a statement showing the total appropriations made by the present session of Congress.

The PRESIDENT pro tempore. Is there objection?

Mr. OVERMAN. Mr. President, I do not have any objection, but, on the contrary, I hope unanimous consent will be granted. I know that the chairman of the Committee on Appropriations has been very busy.

The PRESIDENT pro tempore. Is there objection?

Mr. NORBECK. Mr. President, I wish to make a parliamentary inquiry. What is the request?

Mr. ROBINSON. Mr. President, I suggest that there be coupled with the request of the Senator from Wyoming the further request that the ranking member of the minority on the Committee on Appropriations, the Senator from North Carolina [Mr. OVERMAN], may be granted the same privilege.

Mr. OVERMAN. I was just going to make that request.

Mr. WARREN. Of course, I have no objection to that being done.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

APPROPRIATIONS, FISCAL YEAR 1925

Mr. WARREN. Mr. President, in accordance with the usual custom at the close of a session, I present herewith three tables: (a) Recapitulation of appropriations by acts and irrespective of fiscal years, Sixty-eighth Congress, first session, December 3, 1923, to June 7, 1924; (b) comparison of appropriations by departments and establishments, fiscal years 1924 and 1925; and (c) comparison of Budget estimates and appropriations, fiscal year 1925.

The appropriations by acts, irrespective of fiscal years, made during the Sixty-eighth Congress, first session, amounted to $3,784,123,324.35, plus $186,833,288.49 in the second deficiency bill and $26,357,767.84 in the field service classification bill, which failed, or a total of $3,997,314,380.68, as compared to $4,097,499,197.04 made during the Sixty-seventh Congress, second, third, and fourth sessions—a substantial reduction of $100,184,816.36.

The total appropriations chargeable to the fiscal year 1925 are $3,622,125,959.19, as compared to $4,013,109,837.81 for the fiscal year 1924—a reduction of $390,983,878.62 for 1925 under 1924. This sum should be further reduced by the 1925 appropriations in the two bills which failed to pass, aggregating approximately $201,000,000, which will leave the reduction of 1925 under 1924 approximately $189,000,000. This is a substantial saving and one which the country has a right to scan with pleasure. Reduction of appropriations is not an easy task in a growing country such as ours.

I have great pleasure at this point in commending the able and harmonious efforts of the House Committee on Appropriations. Its work has been thorough and conscientious. Its leadership has been wise and masterful and at all times on the side of the taxpayer. I thank each and every member of the Committee on Appropriations of the Senate, of which I am the chairman, for his helpful support and cooperation, and I thank the able and experienced chief clerk and his assistants for their ability and never-failing industry and loyalty.

The total Budget estimates—regular and supplemental—amounted to $3,632,173,054.96 for the fiscal year 1925. The appropriations are $3,622,125,959.19—a net reduction of the estimates of $10,047,095.77. Really not a great change. Indeed, this is a compliment to the Bureau of the Budget. It shows the result of the application of scientific principles. It is a cheerful exhibit of what comes from all working together and in harmony.

Prior to the Budget law, Congress was confronted with estimates amounting to millions and millions of dollars which were monuments to waste and extravagance. Now an estimate means something. It has investigation behind it. So long as the Bureau of the Budget continues to function we may not expect to see the former great gap between estimates and appropriations. The Bureau of the Budget is deserving of the highest praise. General Dawes, who inaugurated, and General Lord, who followed, are entitled to congratulation, commendation, and continued confidence.

The following shows the total appropriations for fiscal years and amounts that follow:

| | |
|---|---|
| 1920 | $7,052,387,633.67 |
| 1921 | 4,070,964,534.06 |
| 1922 | 4,177,802,100.90 |
| 1923 | 3,951,062,084.39 |
| 1924 | 4,013,109,837.81 |
| 1925 | [1] 3,823,125,959.19 |

The appropriations for 1925 are less than the same for—

| | |
|---|---|
| 1920 | $3,229,261,674.48 |
| 1921 | 247,838,574.87 |
| 1922 | 354,676,141.71 |
| 1923 | 127,936,125.20 |
| 1924 | 189,983,878.62 |

In conclusion, the following facts are respectfully submitted:

The appropriations for 1925 are approximately $189,000,000 less than for 1924.

The public debt has been reduced from $25,478,592,113.25 on August 31, 1919, to $21,347,965,880.55 on May 31, 1924, a reduction of $4,130,626,232.70.

The excess of receipts over expenditures for the fiscal year ending June 30 1924, will not be less than $500,000,000.

The number of executive civil employees of the Government has been reduced from 917,760 on armistice day, November 11, 1918, to 544,671 on December 31, 1923, a reduction of 373,089. This is practically down to pre-war normal conditions, exclusive of the Postal Service.

The total revenues of the Postal Service have gone from $344,493,211.99 for the fiscal year 1918 to approximately $572,630,000 for the fiscal year 1924, an increase of $228,136,788.01.

Our Government since October 6, 1917, has made appropriations for allowances and benefits on account of disabled soldiers, sailors, and marines who participated in the war with Germany amounting to $2,773,470,866.98. This sum does not include $132,568,272.30 for adjusted compensation of World War veterans in the second deficiency bill for 1924, which failed.

Our Government has rehabilitated and completed the training of 71,500 ex-service men and women, thus overcoming their handicap as a result of physical or mental disability incurred in the military service; and 54,392 ex-service men and women are now receiving vocational training.

Our Government, through the operations of the Federal Board for Vocational Education, in cooperation with the States, has rehabilitated 13,951 persons disabled in industry or incapacitated by industrial accidents, and in addition we now have 18,000 persons in the process of being rehabilitated.

The entry of public lands by homesteaders and others for the fiscal years 1921 to 1923, inclusive, amounted to 32,413,784 acres, and the combined receipts of the General Land Office, for all purposes, for the three fiscal years amounted to $36,993,340.80.

The number of farms on our reclamation projects now number 34,000, and the cumulative gross value of crops grown since water was first available is equivalent to more than $500,000,000.

The number of miles of Federal-aid roads completed under the Federal highway act up to March 1, 1924, was 33,036, and 13,800 miles are now under construction.

[1] This sum includes $201,000,000 carried in the two acts that failed.

(A) *Recapitulation of Appropriations by Acts and Irrespective of Fiscal Years, Sixty-eighth Congress, First Session (Dec. 3, 1923, to June 7, 1924)*

| Title of act | | Amount |
|---|---|---|
| REGULAR ANNUAL ACTS, FISCAL YEAR 1925 | | |
| Agriculture | | $58,575,274.00 |
| District of Columbia | | 26,455,105.00 |
| Executive office and independent offices | | 398,776,740.16 |
| Interior | | 263,250,455.00 |
| Legislative establishment | | 14,229,016.00 |

[1] This sum includes $105,467,000 for refunding internal revenue taxes erroneously collected.

NOTE.—Appropriations herein stated do not include the amounts pertaining to the second deficiency bill and the field service classification bill, both of which failed of enactment. The amount for the fiscal year 1925 in the latter bill was $26,357,767.84 and the amount for the same year in the former bill is approximately $175,000,000.

*(C) Comparison of Budget Estimates and Appropriations, Fiscal Year 1925*—Continued

[The appropriations for 1925 include amounts carried for fiscal year 1925 in regular annual appropriations acts, and amounts estimated under permanent and indefinite appropriations]

| Department or establishment | Budget estimates submitted Dec. 3, 1923 | Supplemental Budget estimates submitted Dec. 3, 1923, to June 7, 1924 | Total Budget estimates fiscal year 1925 | Appropriations, 1925, regular annual and permanent and indefinite | Increase (+) or decrease (−) appropriations compared with estimates |
|---|---|---|---|---|---|
| Legislative branch: | | | | | |

NOTE.—The estimates and appropriations herein stated do not include the amounts pertaining to the second deficiency bill and the field service classification bill, both of which failed of enactment. The amount for the fiscal year 1925 in the latter bill is $26,357,767.84 and the amount for the fiscal year 1925 in the former bill is approximately $175,000,000.

### MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had agreed to the amendment of the Senate to the joint resolution (H. J. Res. 283) to permit to remain within the United States certain aliens in excess of quotas fixed under authority of the immigration act of May 19, 1921.

The message also announced that the House had passed a bill (H. R. 8588) authorizing the Secretary of the Treasury to sell the United States marine hospital reservation and improvements thereon at Detroit, Mich., and to acquire a suitable site in the same locality and to erect thereon a modern hospital for the treatment of the beneficiaries of the United States Public Health Services, and for other purposes, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 107) declaring agriculture to be the basic industry of the country, and for other purposes.

### ENROLLED BILLS SIGNED

The message further announced that the Speaker of the House had signed enrolled bills of the following titles, and they were thereupon signed by the President pro tempore:

H. R. 4088. An act to establish the upper Mississippi River wild life and fish refuge; and

H. R. 9434. An act granting the consent of Congress to the States of Georgia and Florida, through their respective highway departments, to construct a bridge across the St. Marys River.

### MARINE HOSPITAL RESERVATION AT DETROIT

Mr. FERRIS. Now, Mr. President, I wish to ask unanimous consent——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Michigan?

Mr. FERRIS. I merely wish to ask unanimous consent for the immediate consideration of House bill 8588, authorizing the Secretary of the Treasury to sell the United States marine hospital reservation and improvements thereon at Detroit, Mich., and to acquire a suitable site in the same locality and

to erect thereon a modern hospital for the treatment of beneficiaries of the United States Public Health Service, and for other purposes.

Mr. SMOOT. There is a subject matter now before the Senate, and there can not be two questions under consideration at the same time.

Mr. FERRIS. I ask unanimous consent for that purpose. This is the first time that I have ever made such a request.

Mr. SMOOT. I will object, and that will end it. I wish to get through with my remarks.

The PRESIDENT pro tempore. The Senator from Utah declines to yield.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had receded from its disagreement to the amendments of the Senate numbered 58 and 59 to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, and concurred therein, and that the House further insisted upon its disagreement to the amendments of the Senate numbered 29 and 34.

After the conclusion of Mr. SMOOT's speech,

REPLY TO MR. SMOOT

Mr. OWEN. Mr. President, the Senator from Utah [Mr. SMOOT] has with fulsome praise recounted the accomplishments of the Republican leaders during the last four years. There is one thing that the Senator from Utah has omitted. He has omitted to point out that the Republican leaders demanded the deflation of credit and currency in their national platform of 1920, that they put that policy upon the country, and have brought about in America the greatest industrial depression which this Republic has ever known. This ridiculous self-praise of the Republican Party comes with poor grace from the conservative, reactionary, stand-pat Republican leaders who have bankrupted millions of people by the cruel and harsh policy of deflating credit and currency in this country.

That I do not exaggerate the condition is known to all of those Senators who live west of the Mississippi River; to all of those Senators east of the Mississippi River who have in their States farmers, stock raisers, and small producers who have been injured or ruined by this criminally bad policy. That is the real cause of the farmer-labor movement. The farmers and laborers and little people have been so ill-treated by this Government and its agencies under the reactionary leadership of the Republican Party that they have abandoned all parties in some States and are trying to organize a new party in order to find some relief, because they are in despair.

Do I exaggerate what has occurred? I put in the CONGRESSIONAL RECORD on June 4 the vital facts set forth in a letter from the Comptroller of the Currency. It appears on page 10717 of the RECORD. The loans and discounts of the banks as of June 30, 1920, were $34,087,000,000.

On June 30, 1922, they were $28,483,000,000—a contraction of loans and discounts of over five and a half billion dollars. Mr. President, such a contraction of loans and discounts never has been known before in the history of this country. Is it any wonder that the sheepmen of Nevada and of all the western country, that the stockmen of Texas and Oklahoma and Kansas and Nebraska and all of the agricultural areas of America are bankrupt? This self-praise of the conservative Republican leadership by the Senator from Utah [Mr. SMOOT] as their chosen mouthpiece, claiming to have rendered gigantic benefits to the country, will not be heard or believed by those who have been bankrupted by this wicked policy of the stand-pat, money-loving Republican leaders.

Do I exaggerate it? What have they done to the currency itself, the Federal reserve notes?

On June 25, 1920, within a few days after the famous resolution of the Senator from Illinois [Mr. MCCORMICK] favoring deflation of credit and currency passed the Senate there were in actual circulation $3,117,000,000 of Federal reserve notes and $184,000,000 of Federal reserve bank notes, a total of $3,301,000,000. On June 5, 1924, it had shrunk to $1,884,000,000, a contraction of the currency of this country of $1,517,000,000.

Senators, when you reflect upon the fact that the history of the banking system of the United States has demonstrated that $1 of currency in the national banks of the country has uniformly, from the beginning to the end of that system, supported $10 of loans and discounts, $10 of credit, is it any wonder that the shrinkage of fifteen hundred millions has caused a substantial diminution of credit of fifteen thousand millions? Is it any wonder that the people are feeling hurt? Well, they do feel hurt. Believe me, they feel hurt. In my own State I know what has happened.

I put in the RECORD, page 10717, this report from the Comptroller of the Currency showing the bank failures that have taken place. Why, in the year ending June 30, 1919, only one bank failed in the national banking system—one bank! Since last June 121 national banks have failed up to this time and about 300 State banks. When this policy was put over the following year, ending June 30, 1921, 330 State banks and 28 national banks failed. The next year, ending June 30, 1922, 364 additional State banks and 33 national banks failed; and the next year, ending June 30, 1923, 237 State banks and 37 national banks failed. Since last June 121 national banks and over 300 State banks have failed.

Such wholesale financial, industrial, and commercial disaster has had no equal in our banking history.

Why did these banks fail? Because of this sinister, unintelligent, selfish policy trying to make the dollar more difficult to get, a policy against which I protested with all my might in the spring of 1920, and I got no adequate support. I made four speeches against it in the Senate between January and May, 1920, and printed in the CONGRESSIONAL RECORD three letters of protest to the Reserve Board and one letter to the President of the United States. I called the attention of the country then to the fact that this policy of raising the interest rates and without discrimination contracting credit would be ruinous to the country. I pointed out with all the energy at my command that it would produce a great industrial depression and ruin many of our people. After it all happened I did not feel disposed to make the welkin ring with my complaints against the members of the Reserve Board or the officers of the reserve banks whose unspeakable folly I could not prevent. They were acting as the agents of the Republican Party in power. I have been silent; but when I sit here and hear the recounting of these vainglorious deeds of the Republican Party by the Senator from Utah it is too much. I can not resist calling the attention of the Senate and of the country to what is occurring and how it occurred.

Let me read the Republican national platform of 1920 on this point:

> But as the political party that throughout its history has stood for honest money and sound finance, we pledge ourselves to earnest and consistent attack upon the high cost of living—

Wonderful!

> upon the high cost of living by rigorous avoidance of further *inflation* in our Government borrowing, by *courageous and intelligent deflation* of overexpanded *credit and currency*.

It was not intelligent, and it was damned cowardly. It was ruinous to the country and was dictated by a few men determined to increase the power of their dollars and to deflate labor and to deflate the farmers and stock raisers and to deflate the little producer and borrower for the benefit of the creditor class.

You need not fool yourselves and think you are fooling the country. You can not fool the country. You can fool some of the people all the time, but you can not fool all the people all the time, and there is coming upon you a judgment next November which you thoroughly deserve. You organized both Houses of Congress in 1919, and you won a glorious partisan victory in 1920. You used your power to put over the deflation policy, and used as your agency the Federal Reserve Board, a majority of whose members were ultraconservative and fundamentally of conservative opinions, entitled to be classed as stand-pat Republicans on the question of deflation.

Mr. HEFLIN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Alabama?

Mr. HEFLIN. I thought the Senator had finished. I do not want to interrupt him. I agree with the Senator.

Mr. OWEN. I wish to call attention to the conditions of employment in this country.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Massachusetts?

Mr. OWEN. I yield to the Senator from Massachusetts.

Mr. WALSH of Massachusetts. Will the Senator yield to me to present some statistics of unemployment in the country?

Mr. OWEN. I yield.

FINANCIAL DEPRESSION AND UNEMPLOYMENT

Mr. WALSH of Massachusetts. I would not take the time of the Senate to present these statistics from Government reports were it not for the misleading statement of the administration to the effect that the country is prosperous and that there is

little unemployment. Fortunately we have a recent record from the Department of Labor concerning unemployment. The last report is for the month of April, and it shows that since April, 1923, there has been a decrease in employment in 33 of the leading industries of the country and an increase in only 13; that the losses in dollars and cents on the pay roll in various industries in one year has been 22.5 per cent in men's clothing; 20.7 per cent in cotton goods; 19.6 per cent in automobile tires.

Only one of the 12 leading groups of manufacturing industries of the country shows an increase over last year, and that is one that is relatively small. That is the group dealing in the manufacture of glass and clay.

One great textile group of industries as a whole shows a decrease of 11 per cent in the number of workers on the pay roll and 13 per cent in wages since last year.

From the figures of the Department of Labor it is evident beyond a shadow of a doubt that over 400,000 more workers are out of employment in the manufacturing industries now than a year ago, with a total loss in wages of about $5,000,000 monthly.

Comparing unemployment in March and April of this year, we find in one month alone a decrease of 11.4 per cent in the number of employees on the pay rolls in the men's clothing industry and 16.6 per cent in wages.

The report also shows, out of every five persons employed in this country in 1920, there is one in five out of employment today. It must be noted that these statistics only record the unemployment caused by reason of having names taken from the pay roll, and it makes no record of hundreds of thousands of people of this country who are working short hours or reduced time. The records for May not yet available will increase these figures.

I thank the Senator for yielding, and I ask permission to have the statement from which I read printed in the RECORD as a part of my remarks.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

STATEMENT OF UNEMPLOYMENT IN THE UNITED STATES IN 1924

(By Senator DAVID I. WALSH of Massachusetts)

The latest official statistics compiled by the United States Bureau of Labor of employment in the leading manufacturing industries of the country during April, 1924, show that there have been gains in only 13 of the leading industries and losses in 33 of the leading industries since April, 1923. The report states that "the decreases in employment in this 12-month period were exceptionally large in a majority of these 33 industries which lost in employment." It is to be noted that these figures do not relate to partial employment, only the actual decrease in number on pay rolls:

| Employment decreased: | Per cent. |
|---|---|
| Steam railroad shops | 19.7 |
| Agricultural implements | 18.2 |
| Foundry and machine shops | 18.0 |
| Men's clothing | 16.5 |
| Automobile tires | 15.9 |
| Cotton goods | 14.7 |
| Carriages | 13.7 |
| Leather | 13.1 |
| Shipbuilding | 12.4 |
| Shirts and collars | 12.2 |
| Sugar refining | 11.8 |
| Woolen goods | 11.6 |
| Stoves | 11.4 |
| Millinery and lace goods | 10.8 |
| Boots and shoes | 10.3 |

Besides the losses in dollars and cents on the pay rolls were:

| | Per cent. |
|---|---|
| Men's clothing | 22.5 |
| Cotton goods | 20.7 |
| Automobile tires | 19.6 |

Only 1 of the 12 leading groups of manufacturing industries of the country showed an increase over last year, and that is one of the relatively smallest, namely, the stone, clay, and glass group.

Our great textile group of industries as a whole shows a decrease of 11 per cent in number of workers on pay rolls, and 13.4 per cent in wages since last year.

The iron and steel group showed a decrease of 2 per cent, and the leather group a 11 per cent decrease, chemicals a 7 per cent decrease, and tobacco a 6 per cent decrease.

From the figures of the Department of Labor it is evident beyond a shadow of a doubt that over 400,000 more workers are out of employment in the manufacturing industries now than a year ago, with a total loss in wages of about $5,000,000 monthly.

Comparing employment in March and April of this year, we find in one month alone a decrease of 11.4 per cent in number of employees on the pay rolls in the men's clothing industry and 16.6 per cent in wages.

Index numbers of employment of the United States Department of Labor show that since 1920, 22 per cent of the workers then employed are now idle. (See U. S. Department of Labor Statistics: "Employment in Selected Industries, April, 1924," especially pp. 3, 4, and 11.)

The PRESIDENT pro tempore. The Chair recognizes the Senator from Oklahoma for his second address upon this motion.

INJURIOUS EFFECTS OF DEFLATION POLICY

Mr. OWEN. Mr. President, when I was in Oklahoma a few days ago attending a bank directors' meeting, in discussing the agricultural conditions in that section of the country I was advised by men who know, by men who themselves are cultivating large areas of land, that they are paying $1.25 a day for laborers on the farm, and the laborer has to feed himself. Believe me, the man who is laboring on the farm under those conditions, with a woman and two or three children depending upon him for support, is not contented. He should not be contented.

If you want to make Bolsheviki, that is the way to manufacture them. If you want to cause violence and discontent, all you have to do is to contract credit and currency until you bankrupt hundreds of thousands and millions of people in this country.

Mr. FESS. Will the Senator yield for just one question?

Mr. HEFLIN. The Senator would lose the floor.

Mr. OWEN. I can not yield. I will thank the Senator to permit me to finish. I will yield the floor in one moment.

The responsibility for this policy can not be escaped. The majority in control of this Chamber on May 17, 1920, was Republican. A Republican Senator, the Senator from Illinois [Mr. MCCORMICK], offered a resolution purporting to be a resolution merely calling for information. In reality it was a resolution favoring the deflation of credit and currency. It was the answer to my protests against the policy of deflation, the assumption of responsibility by the Republican Party, and the cloak of protection by that party of its agents on the Federal Reserve Board who were being criticized by me for pursuing that evil course. The resolution was agreed to. I was not present, but the following day—May 18, 1920—I registered my vehement protest.

In June, 1920, immediately following, the Republican Party leaders in national convention assembled put a plank in their national platform declaring for the policy of deflating credit and currency.

A chosen representative of that convention, as a candidate for the Presidency of the United States, Senator Warren G. Harding, put it in his speech of acceptance, declaring for a "courageous and intelligent deflation of credit and currency."

The Republicans took the full and complete responsibility of deflating the credit and currency of the country and the terrible consequences ensued. They can not now evade or escape the consequences of deflating and ruining our industry and commerce.

It is in vain for them to say that members of the reserve board were appointed as Democrats. The board was an agency of the Government and subject to the domination of the party in power, and the majority of that Federal Reserve Board entertained the view expressed in the Republican Party platform on deflation, and therefore were Republicans and not Democrats.

The Republican Party, which passed the McCormick resolution favoring deflation of credit and currency, May 17, 1920, which passed the resolution in the national platform favoring deflation of credit and currency, and nominated and elected a President who pledged himself in his speech of acceptance to deflate credit and currency, can not now hide itself behind any subterfuge. Its responsibility and conviction is complete.

Mr. FESS. Mr. President, the Senator from Oklahoma [Mr. OWEN] assaulted the deflation policy and placed the responsibility for it upon the Republican administration. I want to read into the RECORD the personnel of the Federal Reserve Board when the deflation policy was inaugurated. I say, in the outset, that I do not think there is strength in what the Senator has said in his assault on that policy. If it was an error, as I do not now admit, it was error of the Democratic administration.

The Federal Reserve Board, every member of which was appointed by Woodrow Wilson, was composed, at the time of the deflation policy, of David F. Houston, Secretary of the Treasury, chairman; John Skelton Williams, Comptroller of the Currency; ex-officio members: W. P. G. Harding, governor; Adolph C. Miller, Charles S. Hamlin, and Henry A. Moehlenpah, all of whom were appointed by President Wilson, and all

of whom, unless it would be Mr. Miller, notable members of the Democratic Party.

I want to put this fact in the RECORD simply to indicate whether the policy of deflation of 1920 was a Republican policy or whether it was a Democratic policy.

LAUSANNE TREATY AND CHESTER OIL CONCESSION

Mr. LODGE. Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the Secretary of State to the Foreign Relations Committee.

There being no objection, the letter was ordered printed in the RECORD, as follows:

DEPARTMENT OF STATE,
*Washington, June 7, 1924.*

The Hon. HENRY CABOT LODGE,
*United States Senate.*

MY DEAR SENATOR LODGE: My attention has been called to a resolution introduced into the Senate by Senator KING (CONGRESSIONAL RECORD of June 3, p. 10571 ff.) with regard to the Lausanne treaty and the so-called Chester concession. The treaties concluded with Turkey are now before the Foreign Relations Committee of the Senate together with the information which I felt might be useful to the committee in its consideration of these instruments. I do not feel therefore that it would be appropriate for me at this time to enter into any detailed discussion of the various allegations contained in the statement accompanying Senator KING's resolution. At the appropriate time and as desired by the Foreign Relations Committee I shall be glad to give full information with regard to any matters pertinent to the consideration of these treaties.

Certain of the statements of Senator KING are of such a character, however, that I did not feel that I should allow them to pass unnoticed, although their inaccuracy has been indicated in the information which I have already laid before the committee.

1. The charge "that the United States participated in the Lausanne conference apparently for the sole purpose of securing and confirming the Chester oil concession, and that in pursuance of that purpose vested and essential rights of American nationals in Turkey were sacrificed and Armenia forsaken, if not betrayed," is absolutely unfounded. As I stated in January last, "At no stage in the negotiations was the American position determined by the so-called Chester concession. This had been granted before negotiations of our treaty with Turkey had been begun. This Government took no part in securing it; this Government made no barter of any of its rights for this or any other concession."

Senator KING, in referring to the date of our negotiations with Turkey, has apparently confused the negotiations between the allied powers and Turkey with the negotiations of the American plenipotentiary at Lausanne and the Turkish representatives. The latter negotiations were not initiated until subsequent to May 1, 1923. While the United States was represented at Lausanne during the earlier phases of the conference, it had not prior to May, 1923, undertaken the negotiation of a treaty.

2. Senator KING contrasts the action of this Government in 1920 with respect to the Sevres treaty with that of 1923, indicating that there was in 1923 a reversal of the earlier attitude toward Turkey. It is possible that the Senator does not recall that the United States was represented at the San Remo conference in 1920, which had under consideration the treaty of Sevres, in the same capacity as at Lausanne. The United States, however, was neither a party to the treaty of Sevres nor to the Lausanne treaty of peace between the allied powers and Turkey.

3. In view of the fact that the reference in Senator KING's statement to my memorandum of October 30, 1922, with regard to the near eastern settlement is inaccurate I beg to inclose a copy of the full text of this memorandum which was given to the press at that time. At the Lausanne conference this Government stood for the principles outlined in this memorandum and was able to obtain substantial guaranties with respect to the points of interest which this communication outlined.

4. Senator KING states:

"The Allies declined to make concessions to the Turks, both on the subject of the capitulations and upon the Armenian case. The conference was deadlocked largely upon these two points, and it was finally suspended on February 4, 1923.

"Meanwhile, on April 10, 1923, the crafty Turks ratified the Chester concession. The conference was resumed on April 23, 1923, and the American observers who, during the first session of the conference, had supported the Allies, whole-heartedly in some matters, half-heartedly in others, transferred their support in all matters to the Turks, with the result that the Turks were enabled to impose their views and will upon the Allies."

This statement is totally inaccurate. In the draft treaty of peace as communicated to the Turks by the Allies on January 31, 1923, it is provided in article 26:

"The high contracting parties agree to abrogate the capitulations relating to the régime of foreigners in Turkey, both as regards conditions of entry and residence and as regards fiscal and judicial questions."

Thus prior to the adjournment of the conference on February 4 the Allies had agreed to abrogate the capitulations. This was not one of the points which brought about the interruption of the conference. Nor was the issue with respect to the Armenians instrumental in deadlocking the conference in February, 1923, since the Turkish plenipotentiary had agreed to the provisions of the allied treaty as communicated on January 31, which related to the protection of minorities. The statement that the American representatives after the adjournment "transferred their support in all matters to the Turks, with the result that the Turks were enabled to impose their views and will upon the Allies," is utterly false.

5. In answer to the allegation that the treaty surrenders American rights and interests, I would call your attention to the fact that the Americans who have interests in Turkey, whether philanthropic or commercial, have urged its ratification.

6. Senator KING's remarks with regard to the status of American philanthropic and missionary work in Turkey are both inaccurate and misleading. In this connection it is significant that the Americans who are responsible for carrying on this work in Turkey have indicated their view that their work could best be aided by the ratification of the treaty with Turkey, and have submitted encouraging reports of recent progress.

In case there are any further points in Senator KING's statement on which the committee might desire to obtain additional information, I shall be most happy to furnish it.

I am, my dear Senator LODGE,
Very sincerely yours,

CHARLES E. HUGHES.

(Inclosure: Aide-memoire of October 30, 1922.)

---

DEPARTMENT OF STATE

The following communication was transmitted to the British, French, and Italian Governments through the American embassies at London, Paris, and Rome on October 30:

"AIDE-MEMOIRE

"The conference proposed for the purpose of drawing up a treaty of peace with Turkey will have primarily to deal with the problems resulting from the state of belligerency between the allied powers, Turkey, and Greece. The United States was neither at war with Turkey nor a party to the armistice of 1918 and does not desire to participate in the final peace negotiations or to assume responsibility for the political and territorial adjustments which may be effected.

"While maintaining this reserve in regard to certain phases of the Near East settlement the Government of the United States does not desire to leave the impression that it regards its interests as less entitled to consideration than those of any other power, or that it is disposed to relinquish rights enjoyed in common with other powers, or proper commercial opportunity, or that it is unconcerned with the humanitarian interests involved.

"For the purpose of clarity certain subjects of particular American concern may be briefly summarized:

"(1) The maintenance of capitulations which may be essential to the appropriate safeguarding of non-Moslem interests.

"(2) The protection, under proper guaranties, of philanthropic, educational, and religious institutions.

"(3) Appropriate undertakings in regard to the freedom of opportunity, without discrimination or special privilege, for commercial enterprise.

"(4) Indemnity for losses suffered by Americans in Turkey as a result of arbitrary and illegal acts.

"(5) Suitable provisions for the protection of minorities.

"(6) Assurances touching the freedom of the Straits.

"(7) Reasonable opportunity for archeological research and study.

"This brief summary, while not exhaustive, may serve to indicate the general nature of American interests. To safeguard such interests and to facilitate the exchange of views the Government of the United States is prepared to send observers to the proposed conference if this action is agreeable to the powers concerned. Without participating in the negotiations of the treaty of peace, these observers would be able to indicate this Government's position in greater detail than is possible in this aide-memoire, and they could also inform the American Government of the attitude of other powers in matters where there are mutual interests.

"As the object in view in submitting this suggestion is the elimination of any possible cause of misunderstanding, it is considered appropriate to call attention to the attitude of the United States in respect to secret treaties and agreements. It is not felt that arrangements previously made with respect to Turkish territory, which provide for the establishment of zones of special commercial and economic influence, such, for example, as the tripartite agreement of 1920, are con-

sonant with the principle of the equality of economic opportunity. It is assumed that the allied powers will not now desire, and do not now intend, to carry into effect previous arrangements of this nature.

"The United States has no desire to take any action which might embarrass the allied powers in the proper effort to secure peace. It desires nothing which need conflict with the interests of other countries, if the principle of commercial opportunity for all nations is recognized at the outset. The United States has no intention of seeking for itself or its nationals a position of special privilege, but it desires to protect its rights and to assure the open door. Finally, it wishes to afford protection to its citizens who wish to continue the humanitarian work which has been carried on for generations in the Near East and is rendered more essential than ever by the present conditions."

PIMA INDIANS

Mr. McNARY. Mr. President, I ask permission to have printed in the RECORD a letter addressed to me by a former citizen of Sacaton, Ariz., with reference to the Pima Indians.

There being no objection, the letter was ordered to be printed in the RECORD as follows:

611 MARYLAND AVENUE NORTHEAST,
*Washington, D. C., June 6, 1924.*

Hon. CHARLES L. MCNARY,
*Senate Office Building, Washington, D. C.*

MY DEAR SENATOR MCNARY: On September 8, 1910, I was commissioned as missionary by the Board of Home Missions of the Presbyterian Church of the United States of America and assigned to assist the Rev. Charles H. Cook, D. D., missionary in charge of the work among the Pima Indians at Sacaton, Ariz. Doctor Cook carried on the work among the Pimas since December 23, 1870. Doctor Cook being honorably retired in 1914, I succeeded to the work founded by him. When Doctor Cook went among the Pima Indians they were an agrarian people, cultivating and farming their own lands by irrigation, and from the reports of the earliest travelers through that section of the country the Pimas were one of the first original people to irrigate their lands from the Gila River. The country to the east of them was taken up by white settlers and the water appropriated from the river that had plenty of water to irrigate their crops. Gradually, by the appropriation of the water from the river by the whites, the supply of the Indians was reduced until all the land which had been cultivated by them for centuries became a barren waste.

The Pimas have always been a law-abiding peace-loving tribe of Indians, and one of their boasts is that they have never shed the blood of the white man, and by reason of their unbroken friendship to the Federal Government the Pimas aided the Government troops to subdue the Apaches in campaigns costing the Federal Government more than $12,000,000.

Gradually, by reason of the white settlers above them diverting the waters from the river, the cultivated land of the Pimas was reduced to barren and desert lands. Being wards of the Government they could not protect their rights through the courts. Therefore, the future looked dark, for they did not want to become ration Indians.

At this time Doctor Cook, with the help of several high officials of the Presbyterian Church, the Indian Rights Association, and other friends, brought this matter to the attention of the late President McKinley, who gave his word to Doctor Cook that this injustice would be righted and that the Pimas, who are a proud people and who glory in their agricultural supremacy of ancient times, would have a portion of the waters of the Gila restored to them, which would revive their pristine vigor and the fruits of their industry would not perish from the earth. The untimely death of the late President McKinley retarded the work of righting the wrong done the Pimas and Doctor Cook passed to his reward in 1917 without the work being accomplished. And it was at this time that I undertook to complete the work begun by Doctor Cook 25 years prior to his death.

In February, 1923, the Arizona Christian Endeavor Union held its State convention at Sacaton and bestowed the high honor of the office of president of this worthy organization upon me. I was assured by this organization that it would back me in the fight we were making to get justice for the Pimas. I was sent as one of the delegates to the World's Christian Endeavor Union, held in Des Moines in the first part of July, 1923.

On Friday, July 6, 1923, I had the honor to deliver an address before 13,000 delegates at that convention. Those delegates, by rising vote, pledged to work until the battle for the rights of these original Americans, the Pima Indians, should have been won. I spoke before numerous chambers of commerce, Rotary and Kiwanis Clubs throughout the country in behalf of these Indians.

As a result of this long chain of circumstances I was sent to Washington to assist in securing an adequate bill for the proper relief and care of the Pima Indians. This is an accomplished fact. The so-called Cameron San Carlos bill has passed the Senate and House. Therefore, my dear Senator, in writing this I can, through you, express to all the full appreciation of the citizens of Arizona and voice the sentiment of the great church organizations and the various national societies interested in a full measure of Government recognition, righting a wrong of more than half a century to the Pima Indians, as provided in this legislation, better known as the Cameron bill.

No individual can claim the sole honor of this splendid accomplishment of right and justice, nor do I believe any individual expects all the credit. Perhaps I have a better personal knowledge of the work done by individuals and organizations than any other, because I came here and saw the first steps taken and have remained here actively engaged, with full knowledge of every move made by all until the final happy ending. Therefore I feel it befitting to mention some of those most active and important. Full praise and glory are given to the various church organizations, Protestant, Catholic, and Morman; to Kiwanis and Rotary clubs throughout the United States; to women's clubs and their various organizations; Indian Rights and Welfare Association; chambers of commerce and other similar civic organizations; also, to newspapers and other publications. Individually allow me to mention the untiring efforts of Judge O. J. Baugn, president of the San Carlos Association, and its members; Senator HENRY F. ASHURST; Congressman HOMER P. SNYDER, chairman of the Indian Affairs Committee of the House; Congressman HARRIS J. BIXLER, of the Rules Committee of the House; Senator C. L. MCNARY, chairman of the Reclamation Committee of the Senate; Senator JOHN W. HARRELD, chairman of the Indian Affairs Committee of the Senate; Senator WESLEY L. JONES; Speaker GILLETT, of the lower House; Congressman NICHOLAS LONGWORTH, floor leader; Congressman LOUIS C. CRAMTON; Gov. G. W. P. Hunt, of Arizona; Hon. Hubert Work, Secretary of the Interior; Hon. Charles H. Burke, Commissioner of Indian Affairs; Gen. Lord, Director of Federal Budget; and Hon. Bascom Slemp, secretary to the President. More specifically may I point out the splendid work and cooperation of Hon. CARL HAYDEN, who, with his friends of the lower House, was vigorous in passing the bill in that body. He received wonderful support from Congressman SNYDER, chairman of the Committee on Indian Affairs, which will long be remembered by us.

Also I must mention with all emphasis the interest and personal efforts of our great President, Calvin Coolidge, who in the darkest eleventh hour came to the rescue to make sure our hopes were not in vain, and to this great and peerless leader we extend our heartfelt thanks for his noble and humane consideration. With all the tributes thus paid I would be derelict should I not say with all earnestness and candor that to RALPH H. CAMERON, the junior Senator from Arizona, belongs by far the greatest credit of all in passing this legislation. Senator CAMERON was commissioned by the people of Arizona with the pledge to secure the San Carlos Dam. He came to Washington with everything against him to do what had often been said was the impossible. He realized his task and was undaunted. He smiled at defeat and renewed each time his determination to win. He was even buried in effigy in Casa Grande, Ariz., but, true to his promise, nothing seemed to deter him.

When I came to Washington December last to feel out the situation nothing was on the horizon but dark clouds of impossibility. I spent days talking with officials, from the highest to the lowest, and without exception they all said, "It can not be done." One day after much study and thought I entered the office of Senator CAMERON, and there in the outer office received no encouragement, but was admitted courteously into the Senator's private office. After the usual greeting so characteristic of the genial statesman I handed him the rough draft of a San Carlos bill and seated myself opposite him. He read it with silent emotion, and when through he rose and with his usual vigor pounded his fist upon the broad desk between us and said, "If God lets me live until the United States Senate meets again I will introduce this bill and pass it this session." This was my first and only encouragement.

Like a whirlwind the battle was on. CAMERON in rapid succession secured a unanimous report of the Indian Affairs Committee of the Senate, passed the bill by a unanimous vote, even in the face of opposition of those old-time leaders. Well do I remember seeing him in action on the Senate floor one day with all the force in him pound his fist, in a passionate appeal, on the desk of one of the leaders opposing him, which sent shivers to my heart, but evidently it carried the day, for the bill passed.

Senator CAMERON did not stop there. He immediately followed up his victory and helped marshal all forces for the battle in the lower House where Congressmen SNYDER and HAYDEN extended splendid assistance. Time passed. A vote seemed impossible because of the nearing of the adjournment of Congress and the impending legislative jam which always occurs. CAMERON was more determined than ever. Letters, telephone calls, and personal visits were made daily by him to House leaders, Interior Department, Director of the Budget, and especially to the President and the White House. Finally, on Monday, June 2, 1924, the critical hour came. Only four more days remained until Congress was to adjourn. A vote seemed doomed. Senator CAMERON called me into his office and said:

> "Lay, we are at the breaking point; all our ammunition has been used without avail; all except one load. That will be used this very morning."

He called a stenographer and hurriedly dictated a letter to the President, as follows:

"MY DEAR MR. PRESIDENT: You will recall that I have conferred with you several times about legislation providing for the construction of the San Carlos Dam in Arizona, as embodied in my bill, S. 966, which passed the Senate unanimously on April 3, 1924. Since that time it has been considered by the Committee on Indian Affairs of the House and reported favorably to the House by a unanimous vote of that committee.

"The first of the week Chairman SNYDER of the House Committee on Indian Affairs and Congressman THEODORE E. BURTON called upon the Speaker and asked special recognition under suspension of the rules for the consideration of the San Carlos bill. The Speaker gave them no encouragement, and I hope you will pardon the presumption on my part in making the personal request that, if consistent, you express your interest in this matter to the Speaker. I am sure, if this is done, special recognition will be given, and, if so, it would only require a few minutes to pass the bill, as a poll of the House discloses no opposition to it in either party. As this legislation has been favorably indorsed by the Interior Department, and the Commissioner of Indian Affairs has been working diligently for it and is urging its enactment at this session, there is no occasion for debate, so I feel I am not inconsistent in preferring this request.

"My dear Mr. President, if this were merely a political measure affecting me or my State locally, I would not feel justified in trespassing upon your time in this way, but there is a deep moral issue involved, as is attested by the support that has been given to this legislation by the heads of the Protestant, Catholic, and Mormon Churches of this country from coast to coast. I venture there is not a Member of Congress who has not received appeals in behalf of this legislation. As the head of our Nation, I can appreciate your feeling of deep responsibility to the Indians who are the wards of the whole Nation, and it is on this ground that I now appeal to you, as this bill will right a wrong which the Pima Indians have suffered at the hands of the white people for the past half century or more. The Pimas have always been the outstanding friends of the white men among the Indians of the West, and have an unbroken record of never having shed the blood of a white man. But the white settlers have done them an almost irreparable injury. They have absolutely deprived these Indians of their water, and as a consequence the Indians have been for the past few years in destitute circumstances and are now facing starvation.

"Permit me to again call your attention to the fact that President McKinley sponsored in the main this same relief legislation, and had it not been for his untimely death this grave wrong would have been righted during his administration.

"Inasmuch as I have exhausted every means of securing a vote in the House on this measure, I am appealing to you as a last hope, and I know you will not fail us.

"Expressing the very earnest hope that you will find time to give this your personal attention, I am,

Faithfully yours,

"RALPH H. CAMERON.

"To the PRESIDENT, *the White House.*"

A few minutes elapsed, it was signed, and CAMERON went to the White House, saw President Coolidge, handed him the letter above, and stood by his side until he read it, and then explained his mission, the critical condition of the San Carlos bill, and told the President that he alone could secure consideration in the lower House. The President paused and said, "Senator, I will get in touch immediately with the Speaker and see what can be done." The President kept his word and that very afternoon Speaker GILLETT announced the Cameron bill was on his list to be passed, and on June 4 it was approved. Thus did RALPH H. CAMERON keep his word to the people of Arizona who sent him to the Senate. By so doing he did what others said was the impossible, and by so doing he righted a wrong of more than half a century against the Pima Indians. His work will make an Eden out of a desert, where thousands of homes will be erected; he has builded for his name and career a monument which will last forever for the good of all.

My dear Senator MCNARY, I have written this letter to you because you are one of the outstanding statesmen of the West, a friend of reclamation, and for the further reason that this may serve as a testimonial that your work has been fully appreciated.

Sincerely yours,

DICK LAY, *Sacaton, Ariz.*

Mr. CAMERON. Mr. President, in connection with the letter just referred to by the Senator from Oregon, I ask permission to have printed in the RECORD a few verses entitled "Pima Land."

There being no objection, the verses were ordered to be printed in the RECORD as follows:

PIMA LAND

[Tune, "Maryland, my Maryland"]

You ask what land I love the best,
Pima Land, dear Pima Land,
A country in the Golden West,
Pima Land, dear Pima Land.
From where the River Gila flows,
The landscape in the sunlight glows;
The desert blossoms as the rose,
Pima Land, dear Pima Land.

See yonder fields of richest grain,
Sacaton, dear Sacaton;
It grows so well in sun and rain,
Sacaton, dear Sacaton;
The desert has a charm for me,
The mountains all around I see,
I scarce can tell what charm there be,
Sacaton, dear Sacaton.

Adobes scattered here and there,
Pima Land, dear Pima Land;
Coyote howls ring through the air,
Pima Land, dear Pima Land.
The children love the cacti grand
That on the foothill mesa's stand;
And from their youth they understand
Pima Land, dear Pima Land.

The sunny skies and genial clime,
Sacaton, dear Sacaton,
Bring rosy cheeks and health sublime,
Sacaton, dear Sacaton.
In merry games we find delight
Before the evening takes its flight;
Till sweet the bugle blows good night,
Sacaton, dear Sacaton.

MARINE HOSPITAL RESERVATION AT DETROIT

Mr. FERRIS. Mr. President, I ask unanimous consent—and this is the first favor I have asked in this session of Congress—for the immediate consideration of House bill 8588, just sent over from the House.

The PRESIDENT pro tempore laid before the Senate the bill (H. R. 8588) authorizing the Secretary of the Treasury to sell the United States marine hospital reservation and improvements thereon at Detroit, Mich., and to acquire a suitable site in the same locality and to erect thereon a modern hospital for the treatment of the beneficiaries of the United States Public Health Service, and for other purposes, which was read twice by its title.

Mr. FERRIS. Mr. President, I ask for the immediate consideration of the bill. This has been voted on in the House, two votes having been taken, the standing vote resulting in 103 in favor of the bill and 2 against it, and on a roll call, 316 to 5, and the President to-day has indorsed the sale of this property. It does not involve the taking of a dollar out of the Treasury, but it is for sale of the present marine hospital, which is unfit, and for the purchase, with the funds derived from that sale, of grounds for an appropriate marine hospital. The ex-service men of Michigan and all concerned are in favor of the bill.

The PRESIDENT pro tempore. Is there objection to the consideration of the bill?

Mr. NORBECK. Reserving the right to object, I do not care to object unless this would lead to debate. I do not want it to supplant the unfinished business.

The PRESIDENT pro tempore. It will have no effect on the motion of the Senator from South Dakota. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE DOINGS OF THE REPUBLICAN ADMINISTRATION

Mr. HEFLIN. Mr. President, I have listened with keen interest to the speech of the Senator from Utah [Mr. SMOOT]. The Senator has praised what he calls the achievements of the Republican Party. This administration is marked with the wreck and ruin of the legitimate business of the masses of the people, while millionaires multiplied under Republican rule into thousands and tens of thousands. Because these tens of thousands who are rich and prosperous on special privileges are reveling in increased riches, the Republican leaders say we

have prosperity. There is no real prosperity amongst ninety-odd millions of American people. There is a state of uncertainty, a feeling of anxiety and unrest, and general dissatisfaction with economic conditions throughout the country.

The Senator from Oklahoma [Mr. OWEN] in his able and unanswerable speech has told you how the Republican Party literally struck down and destroyed legitimate business in 1920 and 1921. Think of those who control the lifeblood of business, the currency and the credit of the people, withdrawing it in vast quantities from circulation, and leaving an inadequate supply to meet the business needs of the people. We have had that situation under Republican rule. We are suffering from it now. The Senator from Ohio [Mr. FESS] undertakes to say that the Federal Reserve Board during the period of ruinous deflation was a Democratic board. I deny it. Mr. Willis, of Cleveland, Ohio, was on the board. He is a Republican. Mr. Platt, of New York, was a member of the board. He is a Republican, as was Governor Harding, who supported the Republican ticket in the election of 1920. Three out of the five, then, were Republicans and doing the bidding of the Republican Party.

The Republicans were in control of both branches of Congress. The progressive interest rate amendment to the Federal reserve act was introduced in both branches of Congress by Republicans, and that amendment was passed by a Republican Congress. Under that amendment progressive interest rates ranging from 6 to 8¼ per cent were charged to the people of the South and West, while the eastern section of the country got money at about 6 per cent.

Mr. President, I want to print in my speech at this point what the able Senator from Oklahoma [Mr. OWEN] has just said:

REPLY TO MR. SMOOT

Mr. OWEN. Mr. President, the Senator from Utah [Mr. SMOOT] has with fulsome praise recounted the accomplishments of the Republican leaders during the last four years. There is one thing that the Senator from Utah has omitted. He has omitted to point out that the Republican leaders demanded the deflation of credit and currency in their national platform of 1920, that they put that policy upon the country, and have brought about in America the greatest industrial depression which this Republic has ever known. This ridiculous self-praise of the Republican Party comes with poor grace from the conservative, reactionary, stand-pat Republican leaders who have bankrupted millions of people by the cruel and harsh policy of deflating credit and currency in this country.

That I do not exaggerate the condition is known to all of those Senators who live west of the Mississippi River; to all of those Senators east of the Mississippi River who have in their States farmers, stock raisers, and small producers who have been injured or ruined by this criminally bad policy. That is the real cause of the farmer-labor movement. The farmers and laborers and little people have been so ill-treated by this Government and its agencies under the reactionary leadership of the Republican Party that they have abandoned all parties in some States and are trying to organize a new party in order to find some relief, because they are in despair.

Do I exaggerate what has occurred? I put in the CONGRESSIONAL RECORD on June 4 the vital facts set forth in a letter from the Comptroller of the Currency. It appears on page 10717 of the RECORD. The loans and discounts of the banks as of June 30, 1920, were $34,087,000,000.

On June 30, 1922, they were $28,483,000,000—a contraction of loans and discounts of over five and a half billion dollars. Mr. President, such a contraction of loans and discounts never has been known before in the history of this country. Is it any wonder that the sheepmen of Nevada and of all the western country, that the stockmen of Texas and Oklahoma and Kansas and Nebraska and all of the agricultural areas of America are bankrupt? This self-praise of the conservative Republican leadership by the Senator from Utah [Mr. SMOOT], as their chosen mouthpiece, claiming to have rendered gigantic benefits to the country, will not be heard or believed by those who have been bankrupted by this wicked policy of the stand-pat, money-loving Republican leaders.

Do I exaggerate it? What have they done to the currency itself, the Federal reserve notes?

On June 25, 1920, within a few days after the famous resolution of the Senator from Illinois [Mr. MCCORMICK] favoring deflation of credit and currency passed the Senate, there were in actual circulation $3,117,000,000 of Federal reserve notes and $184,000,000 of Federal reserve bank notes, a total of $3,301,000,000. On June 5, 1924, it had shrunk to $1,884,000,000, a contraction of the currency of this country of $1,517,000,000.

Senators, when you reflect upon the fact that the history of the banking system of the United States has demonstrated that $1 of currency in the national banks of the country has uniformly, from the beginning to the end of that system, supported $10 of loans and discounts, $10 of credit, is it any wonder that the shrinkage of fifteen hundred millions has caused a substantial diminution of credit of fifteen thousand millions? Is it any wonder that the people are feeling hurt? Well, they do feel hurt. Believe me, they feel hurt. In my own State I know what has happened.

I put in the RECORD, page 10717, this report from the Comptroller of the Currency showing the bank failures that have taken place. Why, in the year ending June 30, 1919, only one bank failed in the national banking system—one bank! Since last June 121 national banks have failed up to this time and about 300 State banks. When this policy was put over the following year, ending June 30, 1921, 330 State banks and 28 national banks failed. The next year, ending June 30, 1922, 364 additional State banks and 33 national banks failed; and the next year, ending June 30, 1923, 237 State banks and 37 national banks failed. Since last June 121 national banks and over 300 State banks have failed.

Such wholesale financial, industrial, and commercial disaster has had no equal in our banking history.

Why did these banks fail? Because of this sinister, unintelligent, selfish policy trying to make the dollar more difficult to get, a policy against which I protested with all my might in the spring of 1920, and I got no adequate support. I made four speeches against it in the Senate between January and May, 1920, and printed in the CONGRESSIONAL RECORD three letters of protest to the Reserve Board and one letter to the President of the United States. I called the attention of the country then to the fact that this policy of raising the interest rates and discriminatingly contracting credit would be ruinous to the country. I pointed out with all the energy at my command that it would produce a great industrial depression and ruin many of our people. After it all happened I did not feel disposed to make the welkin ring with my complaints against the members of the Reserve Board or the officers of the reserve banks whose unspeakable folly I could not prevent. They were acting as the agents of the Republican Party in power. I have been silent; but when I sit here and hear the recounting of these vainglorious deeds of the Republican Party by the Senator from Utah it is too much. I can not resist calling the attention of the Senate and of the country to what is occurring and how it occurred.

Let me read the Republican national platform of 1920 on this point:

> "But as the political party that throughout its history has stood for honest money and sound finance, we pledge ourselves to earnest and consistent attack upon the high cost of living"—

Wonderful!

> "upon the high cost of living by rigorous avoidance of further *inflation* in our Government borrowing, by *courageous and intelligent deflation* of overexpended *credit and currency*."

It was not intelligent, and it was damned cowardly. It was ruinous to the country and was dictated by a few men determined to increase the power of their dollars and to deflate labor and to deflate the farmers and stock raisers and to deflate the little producer and borrower for the benefit of the creditor class.

You need not fool yourselves and think you are fooling the country. You can not fool the country. You can fool some of the people all the time, but you can not fool all the people all the time, and there is coming upon you a judgment next November which you thoroughly deserve.

And, Mr. President, I will print in my speech following the statement from the speech of the Senator from Oklahoma a very interesting statement entitled "Retrospect and outlook."

RETROSPECT AND OUTLOOK—A COMPARISON OF BANK FAILURES AND BUSINESS FAILURES LAST THREE YEARS UNDER WILSON AND PAST THREE YEARS UNDER HARDING AND COOLIDGE—THE OUTLOOK FOR 1924

The business record of the past year has not been satisfactory for the country as a whole. Certain special interests have prospered and grown fat while many others have languished or been ruined.

The great farming classes have suffered because in vast sections of the country the farmer has received unusually low prices for what he had to sell, and largely as a result of the protective tariff has been forced to pay high prices for the things he had to buy, whether they were necessities or luxuries.

A little study of business and industrial conditions for the past three years under the Republican administration as compared with the last three years under President Wilson will show how badly the voters of the country were flimflammed by Republican promises when they consented to a change of administration in the autumn of 1920 and repudiated for a while the men and policies under whose direction and guidance our country had not only won the greatest war in all history but had established here the greatest prosperity which any country had ever seen.

The official records compiled by the Dun Mercantile Agency are illuminating in this connection. They tell us that in the one year 1923 there were nearly twice as many bank failures in this country as there were during the whole of the last five years of the Wilson administration, or, say, for the calendar years 1916 to 1920, both inclusive.

Furthermore, the total liabilities of the failed banks in the one calendar year 1923 amounted to more than the total liabilities of all failed banks, both national and State, for the entire seven-year period from 1914 to 1920, both inclusive. The following figures are compiled from reports of R. G. Dun & Co.:

| | Total number of bank failures | Liabilities |
|---|---|---|
| Under Wilson administration: | | |
| 1918 | 20 | $5,131,887 |
| 1919 | 50 | 16,520,962 |
| 1920 | 119 | 50,708,300 |
| Total, 3 years | 189 | 72,361,049 |
| Under Harding-Coolidge administration: | | |
| 1921 | 406 | 175,027,776 |
| 1922 | 277 | 77,735,551 |
| 1923 | 540 | 196,790,000 |
| Total, 3 years | 1,221 | 447,553,327 |

Both in number and in the aggregate of liabilities the bank failures in the past three years have been six times as great as for the preceding three years under President Wilson.

The reports also show that in the past calendar year there were failures of 70 national banks. More national banks failed in this country last year than during the entire period of seven years under the Wilson administration from 1914 to 1920, both inclusive, including the period of the World War and the two years of reconstruction which followed.

In the year 1923 alone there were seven times as many failures of national banks as in the three fiscal years 1917, 1918, and 1919 all combined under President Wilson.

Business men who were promised flush times and prosperity with a Republican victory will find the following figures very instructive as to business failures in the three years under Republican rule as compared with the three years immediately preceding:

*Business failures under Wilson and under Harding and Coolidge*

| | Number of business failures | Liabilities of failed firms |
|---|---|---|
| Under Wilson: | | |
| 1918 | 9,982 | $163,019,979 |
| 1919 | 6,451 | 113,291,237 |
| 1920 | 8,881 | 295,121,805 |
| Total | 25,314 | 571,433,021 |
| Under Harding and Coolidge: | | |
| 1921 | 19,652 | 627,401,883 |
| 1922 | 23,676 | 623,896,251 |
| 1923 | 18,720 | 530,532,000 |
| Total | 62,048 | 1,781,830,134 |

| | |
|---|---|
| Total number of business failures last three years under President Wilson | 25,314 |
| Total number of business failures past three years under Harding-Coolidge | 62,048 |
| Increase in number of business failures in past three years under Republican rule as compared with the last three years under the Wilson administration | 86,734 |
| Liabilities of failed firms last three years under President Wilson | $571,433,021 |
| Liabilities of failed firms past three years under Harding-Coolidge | $1,781,830,134 |
| Increase in business failures past three years under Republican rule | $1,210,397,113 |

These ghastly totals from the business casualty list are exclusive of tens of thousands of farmers, cattle growers, and individuals who have been ruined during the past three years and who have been sold out under the sheriff's hammer, but whose failures are not recorded with the mercantile agencies.

The above statement, furnished me by my good friend John Skelton Williams, should command the attention and receive the thoughtful consideration of every intelligent voter in the country.

It tells the story of Republican incompetency and subserviency to predatory interests.

A Republican Congress found the country prosperous and happy March 4, 1919, and in less than two years' time turned it into a land of business lamentation and sorrow.

Mr. President, some people do not seem to realize how important a part money and credits play in the economic life of the masses of the people.

Money is the measure of value and is given in exchange for the things that the people have to buy and sell. Hence the necessity of having enough money in circulation to meet the business needs of the people.

Money is the lifeblood of business, and in order that the body of business may be kept healthy and strong it is necessary that money in sufficient quantity be kept constantly circulating in the body of business.

They who toil and produce and they who use their sense and strength in legitimate activities of any kind are entitled as a matter of right to demand that the circulating medium, or money supply, be sufficient to meet business needs in such a way as to enable them to make their business a success. In other words, if losses or failures should come, they should be from other causes and not because the money supply was insufficient to fully meet the business needs of the community. The Government, and rightly so, reserves to itself the right to print bills and coin metal into money. Then it is clear that it is the duty of the Government to see to it that the circulating medium, or the money supply, is large enough to meet the business needs of all the people all the time. No right-thinking person can deny the soundness of that proposition.

The failure to have in circulation money sufficient to meet the business needs of the people places their business at a disadvantage and leaves them helpless in the hands of those who control the insufficient measure of value that they must accept in exchange for that which represents their toil, skill, and investments.

It is easy to understand that if it requires a million dollars to handle the business of a certain community and you withdraw from that community a half million dollars, you have reduced the measure of value for the goods and products of that community to just half of what it was before, and you have reduced the purchasing power and debt-paying power of the products of that community to just half of what they were before. So it is a serious thing with the business of the masses of the people when the money which measures the value of their products is reduced in quantity and the instrument of exchange made too small to enable them to obtain a profit and make a success of their business.

THE PANIC OF 1920 AND 1921

In the early fall of 1918 certain conscienceless Wall Street financiers, who under Republican rule used to own and manipulate the old panic-breeding banking system in New York, realizing that the end of the war was near, commenced to do everything in their power to elect a Republican Congress. They saw in Republican success, in the election of a Republican Congress, an opportunity to so change and cripple the Federal reserve banking system as to enable them to use it in such a way as to produce a panic. They who used to produce a panic every few years and threaten to bring one on under the old banking system whenever they wanted to beat down the price of cotton, grain, or stocks on the exchange had been deprived of that power for nearly six years under the Federal reserve banking system.

The Democratic Party had been in power during that time and Wall Street was keen and hungry for a financial feast, such as they used to enjoy in the old panic days when the Republicans were in power. To that grewsome gang the field was an inviting one. A panic would enable them to make millions on the falling prices of cotton, grain, and Liberty bonds. The first step to that end was to elect a Republican Congress. They succeeded in doing that. Then they commenced to set the trap for a panic.

The first thing they did after electing a Republican Congress was to throw the Federal farm loan banking system into the Supreme Court and shut off loans from that source.

The farmers of the South and West had borrowed from the farm-loan banks more than $300,000,000. They had lifted old mortgages, hoary with age, from the family roof tree and bought homes and farms for hundreds of thousands of young farmers. But the doors of the farm-loan banks were now closed and we could not get a dollar from that source.

The plot thickens, and the panic-producing machinery is being rapidly arranged for the deadly work that was done later on.

The next move in the deep-laid plan to produce a panic was to fasten on the Federal reserve banking system, by amendment, a progressive interest or rediscount rate, under which usurious interest could be charged, ranging from 10 to 100 per cent. The South and West and the other agricultural sections had a right to demand and a right to expect that a sufficient amount of money be sent into the two sections to enable the cotton and grain producers to market their products so as to obtain a profit and make a suc-

cess of their business. The Republican Congress succeeded in passing that amendment and thus perfecting their plans for bringing on a panic. The stage is now set and the dreadful tragedy is ready to begin. On May 18, 1920, a Republican Senate passed a resolution in favor of deflation. Senator OWEN, of Oklahoma, an able and courageous Senator, one of the authors of the Federal reserve banking system, stated in the Senate at the time the deflation resolution passed that it was a peg on which they intended to hang their plan for a panic, and he was right about it.

The Republican convention met at Chicago in June, 1920, to nominate a candidate for President and write a platform. It will be remembered that Senator BORAH, a Republican Senator from Idaho, stated at Chicago on that occasion that what he saw there on the part of the big financiers, who were trying to control the Republican convention, reminded him of the corrupt and degenerate days when the emperorship of Rome was bought outright—sold on the auction block to the highest bidder.

That Republican convention in its platform declared in favor of a policy of deflation. Hon. Warren G. Harding was nominated by the Republican convention for President. In his acceptance speech he declared in favor of a policy of deflation.

The time had come for action. No longer was it necessary to keep their purpose hid. All of the arrangements for bringing on the panic had been made. The farm-loan banks were closed; the War Finance Corporation was closed; and the Republican Congress had fastened on the Federal reserve banking act that cruel and criminal progressive interest rate amendment, under which the panic of 1920 and 1921 was brought about and under which a bank in Alabama was charged 87½ per cent. They never disclosed to the public their purpose to produce a panic until it was too late for the farmers, merchants, and bankers of the South and West, and honest business men of the country generally, to take the steps necessary to protect their interests. If they had started their deflation panic in January, the farmer would have known how to shape his business so as to make his losses on the year's transactions as light as possible. He would not have involved himself and his property on such a large scale as he did if he had known what was going to happen to reduce his debt-paying power and destroy the value of agricultural products. But they did not start it in January—oh, no! The big eastern manufacturer and wholesale merchant said wait. The Fertilizer Trust said wait. Wait until we unload our goods at top-notch prices on the merchants of the South and West. Wait until we can dispose of our fertilizer on the basis of 40-cent cotton. Wait until we can sell our agricultural implements to the farmers of the South and West. Wait until southern and western bankers commit themselves and back the merchants and farmers in buying our goods at high prices and tie themselves up so they can not get out. Wait until these things have been done and a large crop has been planted and then you can bring on your panic.

A splendid southern gentleman and the distinguished editor of one of the South's greatest newspapers told me that a manufacturer told him that the manufacturers succeeded in having the panic held off until they had disposed of their goods.

Think of the banking system of the Nation—the currency and credit facilities of a hundred millions of people—being manipulated in the interest of a favored few to the embarrassment and hurt and injury of millions of people!

One day I was speaking in the Senate on this phase of the deflation panic, and when I finished a Republican Senator from the West, himself a millionaire, came to me and said: "You are right about them sending word to certain people that the panic was coming. They sent me word several days before it came and suggested that I do the thing necessary to protect myself and prevent losses." He told me that the panic cost him thousands of dollars.

The laboring men and the wage earners were not notified. The doctors, lawyers, preachers, and teachers were never told that business disaster was drawing near, that a financial panic was on its way to destroy prosperity and devour the substance of the people. Why were the big financial high-brows singled out and notified in advance of the panic and the masses of the people left without warning to the furies of a storm that left wreck and ruin and death in its wake?

If the big financiers and manufacturers were entitled to have information in advance that a panic was coming, by what rule of right and law of justice should such vital information be withheld from the other people of the United States? By giving notice to the big financiers and manufacturers they enabled them to shape their business and prevent losses that otherwise would have come before anybody else knew that financial trouble was brewing. Not only that but by telling them in advance that the panic was coming at a certain time they enabled them to speculate on a certainty on the falling prices of cotton, grain, and Liberty bonds, and acting on their advice the big fellows made millions of dollars.

I have never criticized the Federal reserve banking system. I helped to create it. I have simply fought to hold it true to the purpose of its creation. I felt that it was my duty to the people that I represent, and to the whole people, to do my utmost to have that great banking system serve the business needs of the people everywhere, honestly and effectively, just as it was capable of doing and had done.

CRIPPLING DEBT-PAYING POWER

Bankers, merchants, farmers, and others with whom I have talked agree with Democratic leaders that the circulating medium, or volume of money, under which the year's business is commenced in January should not be reduced or curtailed until the business commitments and contracts for that year have been settled. They agree with me that it is unfair and unjust to permit our people to commit or obligate themselves in business transactions at the beginning of the year when the supply of money and credit is sufficient and satisfactory, and then to change both before the year's business is closed so as to injuriously affect the market value of their products and cripple their debt-paying power.

If everyone knew that the adequate currency and credit arrangements in existence at the beginning of the year would not be hampered or impaired during that year, there would be peace of mind in business, business stability, and increased business activity in every avenue of human enterprise and industry.

The refusal to supply us with currency and credit necessary to prevent the loss of our property and the destruction of our business in 1920 and 1921 was a crime against our people and a crime against the country. It has been said truly by Lincoln, "That any change in the circulating medium under which a debt is contracted before the debt can be paid is a crime."

The Federal reserve banking system is the greatest system ever devised by the genius of man. If honestly administered it is positively panic proof. For six years it held at bay the panic-breeding agencies of New York, and there was not the slightest financial trouble anywhere in the United States. As long as it was permitted to function properly our people were busy, prosperous, happy, and contented.

THE HOLY GRAIL

We are told in the beautiful lines of Tennyson that the Holy Grail, or silver cup from which Jesus drank wine at the last supper with the disciples, hung for a long time on the wall of the home of Joseph of Aramathea. So long as it remained there all was well in the home; the inmates were happy and contented; the voice of song and laughter was heard, the birds sang joyously in the trees, and the flowers and roses flourished as they sweetened the air with their perfume.

But one day the hand of the invader came and plucked the silver cup away. So soon as that evil thing was done clouds of gloom and despondency hovered over the home. The voice of song and laughter was hushed, the inmates were sad and sorrowful, birds ceased singing, and the flowers and roses drooped and died. Sir Galahad, a gallant knight, registered a vow that he would go out in search of the Holy Grail and would not return until he could restore it to its time-honored place upon the wall.

Prior to the Republican conspiracy to bring about deflation and produce a panic all was well with the Federal reserve banking system, and all was well with the country. A new day had dawned in the Nation. Everyone who wanted to work found work to do. Everyone who wanted money and credit with which to carry on his business found both responsive to his call. Labor was constantly and profitably employed. Capital was busy in every avenue of human enterprise and industry and we enjoyed an era of national prosperity unparalleled in the history of the country. But in an evil hour the criminal forces of greed swooped down upon the people like some mighty besom of destruction and the Federal reserve banking system was made to strike down and destroy where it was intended to serve and save.

Property values vanished by the billions. Labor was driven from employment, and 7,000,000 men and women roamed the country with nothing to do. Liberty bonds were forced out of the hands of our people, while every avenue of financial aid was shut in our faces. Factories closed and the hum of whirling wheels was hushed. Agriculture fell down and all but perished. Commerce was paralyzed, and the cry of distress was heard in the land, while millions of people in the South and West were literally robbed, many of them stripped of the

accumulations of a lifetime. Hundreds of men and women, driven to desperation, died by their own hands.

These are the fruits of Republican policies and practices, and by their fruits ye shall know them.

The Democratic Party has registered a vow that if successful in the election in November it will take control of the money supply and credits away from Wall Street and restore the great Federal reserve banking system to the purposes for which it was created.

When the currency and credit instrumentalities are permitted to function again as they should, and as they did under Democratic rule, then and not till then will there be genuine prosperity amongst the American people.

The trouble with Republican leadership is it does not know and apparently can not learn the difference between inflation and expansion. When business begins to pick up or improve and more money is required to meet the needs of business expansion Republican leaders have the word sent out to be careful not to bring about inflation. They keep the bankers and business men generally in a state of uneasiness and fear. What the country needs is adequate currency and credit facilities, honestly administered, so as to meet the business needs of all the people all the time.

THE TARIFF BARONS AND WALL STREET FINANCIERS

The tariff barons of the United States in order to tax the people to enrich themselves used to say that the tariff tax was levied in the interest of the laboring man, done to protect him from competition with the cheap labor of Europe. The American laboring man called attention to the fact that while they were shutting out some of the products of cheap labor in Europe they were bringing cheap European labor here to compete with American labor and pull down the wage scale of the American laboring man. Then there arose a demand for a law that would keep out these cheap laborers, and the same tariff barons who said they wanted a tariff tax levied so as to protect the American laboring man bitterly opposed the passage of an immigration law that would keep out the cheap European laborer. The Democrats led the fight and vigorously supported the plan for restricted immigration until we succeeded in passing the best bill ever enacted on the subject. But the tariff barons or big manufacturers are now ignoring the law, and tens of thousands of foreigners are coming in through the corrupt and disgraceful conduct of crooked immigration agents and officials. They are growing rich in their dangerous traffic, which is slipping into our country for so much per head thousands of foreigners who are prohibted from coming in by law.

So the tariff baron, as the big income-tax payer, has his way under Republican rule, law or no law. He wants the cheap European laborer to come in, and he has a crooked immigration official to suspend or set aside the law. Scores of big income-tax payers who are compelled by Congress to pay the tax get it back through the Republican Secretary of the Treasury, Mr. Mellon, who has handed back or refunded to them in the last three years $300,000,000.

Now the leaders of the Republican Party, following the suggestions of their masters, the tariff barons, are taking the ridiculous position that the present obnoxious and oppressive tariff law was necessary to give work to the unemployed. The Washington Post not long ago, in an editorial, said:

> There were nearly 5,000,000 unemployed men in the United States before the present tariff law was enacted.

The question is, Why did we have two years ago an army of unemployed 5,000,000 strong? What party was in power when our economic and industrial conditions were so upset and demoralized?

The country had prospered as never before under the Underwood-Simmons tariff law. Labor was constantly and profitably employed. Even the "tramps," who used to roam the country under Republican rule, had disappeared. Every human being who wanted to work found work to do.

I will tell you what it was that struck business a body blow, silenced the voice of industry, and threw millions of men and women out of employment. It was a financial panic brought about by a drastic and murderous deflation policy deliberately planned and carried out by the leaders of the Republican Party. More than a thousand banks have failed. Thousands of merchants who were at that time prosperous are bankrupt. Manufacturers who were then doing a good business are broke, and hundreds of thousands of farmers who owned their homes and farms and were prosperous have lost them and are now in dire financial distress.

These dreadful conditions drove millions of laborers from employment and the tariff had nothing to do with it. The tariff barons and money lords of Wall Street both contributed large sums to the Republican campaign fund. Both expected to profit financially if the Republicans got control of the Government, and when a Republican Congress had been elected and President Wilson was stricken down and near death's door, the Wall Street forces that used to produce financial panics at will and clean up millions in the operation, came to the Capitol and secured the passage through a Republican Congress of an amendment to the Federal reserve banking law which destroyed the panic-preventing power of the Federal reserve banking system. The banking system that had been used for six years to prevent panics was now, under Republican control, used to produce the worst panic that ever came upon the country. That panic not only increased the colossal fortunes of the millionaires' club by millions and hundreds of millions but it added thousands to its membership.

While it was greatly enriching and increasing the fortunes of those who felt that they had bought the privilege to plunder the American masses, it was working ruin to the livelihood and business of nearly a hundred million Americans.

After the money lords of Wall Street had fed and fattened on the financial feast that their panic had prepared, they looked with ghoulish glee upon business failures, silent industries, and millions of unemployed laboring men, the fruits of the panic that they themselves had produced.

Then came the tariff baron and said, "Here is where I come in. I will take advantage of this situation and tell those in authority that if they will permit me to levy a tariff tax on millions of American consumers I will give employment to labor." But before the tariff bill was written the Democrats, by the aid of a few progressive Republicans, had passed a bill reviving the War Finance Corporation. We put back into circulation from this source more than $700,000,000. This forced for a time a more liberal distribution of currency and credits by the Federal reserve banks, and conditions improved.

Mr. President, that situation showed that what was needed was more money in circulation and better credit facilities. The labor that returned to employment went back in large part before the tariff bill was enacted into law.

The truth is, labor was more fully employed under the Underwood-Simmons tariff law than ever before its enactment or since its repeal. The lack of a high protective tariff did not produce the Republican panic of 1920 and 1921. It was made to order by New York speculators and financiers, who made hundreds of millions out of it. It simply furnished a band of tariff marauders the opportunity to feather their nests while they imposed additional burdens upon an already overburdened people. They simply caught us going and coming.

The big speculators and big financiers of Wall Street caught us with a destructive panic while we were going good on the road of prosperity, and the tariff barons caught us and slugged us as we were "coming to" after we had been sandbagged by the panic bandits. They show their ignorance or their lack of faith in the intelligence of the American people when they claim that the number of unemployed in Great Britain is due to the lack of a protective tariff. Business demoralization and business disaster and unemployment of labor were produced in England just as they were produced in the United States—by unwarranted and indefensible deflation.

Let me read from a statement prepared by Hon. John Skelton Williams, in which he quotes the opinions of some of the world's ablest men:

> The paralyzing and destructive deflation policies which have been so world wide in their effect contrast most vividly with the views of the ablest and best thinkers and leaders of our own and other countries.
>
> The following extracts from the expressed opinions of eminent authorities are merely examples of countless others:
>
> Hon. Reginald McKenna, of England, formerly chancellor of the exchequer, now president of the London Joint City and Midland Bank, the largest bank in the world:
>
> > "I think I have said enough to show that an attempt at monetary deflation of this kind can only end in the strangulation of business and widespread unemployment. * * *
> >
> > "The consequences of a continuous fall in prices entailed by dear money and restriction of credit, and accentuated by heavy taxation, must be complete stagnation of business." * * *
>
> Sir Edward Holden, late president of the London Joint City and Midland Bank:
>
> > "The president of the British Banking Reform League in referring to an address delivered several years ago by Sir Edward Holden on the 'Depreciation of securities in relation to gold,' said:

"'In that illuminating address Sir Edward showed conclusively that the maximum amount of trade which is possible depended upon the volume of bank loans allowed, and that the extent to which loans could be granted depended not upon the demands of trade nor upon the amount of securities offered but upon the amount of legal-tender reserves controlled by the banks.'"

Lord Leverhulme, probably the greatest industrial leader in the British Empire:

"The process of too rapid deflation is undoubtedly the cause of the present unemployment and trade stagnation.

"The prices of commodities rose to the extreme limit during the war, and their reduction was a prime necessity, but the fall has been too sudden for adjustment. This deflation has been accomplished through the banks calling in loans which were used to finance stocks at high prices, and the effect of the forced realization of these stocks has been to drive down prices of commodities below the cost of production."

Of Lord Leverhulme, a distinguished English writer in his well-known book, The Mirrors of Downing Street, says:

"I suppose that nobody will now dispute that Lord Leverhulme is easily the foremost industrialist, not merely in the British Isles but in the world. I can think of no one who approaches him in the creative faculty. Not even America, the country of big men and big business, has produced a man of this truly colossal statue."

The president of the British Banking Reform League, Mr. Arthur Kitson, in acknowledging receipt of one of John Skelton Williams's addresses on the deflation policies of the Federal Reserve Board, which had been sent him by request, said in his letter to Mr. Williams:

"I agree with all that you have written. We have been experiencing the same troubles in this country that you have had in the United States, and from identically the same cause. Our treasury officials, under the influence of the big money lenders, undertook to deflate our currency. * * *

"The public stopped buying, business collapsed, firms closed their doors, and we have at the present time the greatest roll of unemployed that we have ever had since the 'hungry forties.'" * * *

The same well-known authority, in an address published in 1920, said:

"The contraction which followed the Napoleonic wars, when our statesmen destroyed the 'cheap' money which had enabled Great Britain to carry on industries during the long war period from 1797 to 1815, and substituted the costly and inadequate gold basis brought about the great fall in prices and that era of business depression which gave rise to the corn law agitation, resulting in the Chartist riots and the rise of the free-trade movement.

"Neither free traders nor tariff reformers seem to have understood that that period of social misery was directly attributable to the Government's contraction of the money supplies."

Moreton Frewen, eminent English economist and publicist, a year ago, in discussing the world crisis, said:

"What, then, are the common denominators which best account for the universality of that disaster now impending over the new year? I have pointed out one, namely, the deflation of credits and currencies. It is enough to say that if this intentional and malevolent destruction of credit is followed to its logical conclusions men's hearts may well fail them everywhere for the days that are at hand."

The governor of the Bank of France, properly regarded as one of the world's most eminent banking authorities, in his annual report a year ago, declared:

"We have welcomed, whether by means of rediscount or by direct discount, all paper whose creation responded to the legitimate needs of commerce and production. By this liberal policy, to which we have remained and always will remain faithful, we expect to support with all our power the activities of widely varying business enterprises which in France are needed to lessen the violence of the crisis."

Prof. Gustav Cassel, an economist of international reputation, in his recent report submitted to the League of Nations:

"The downward movement of prices has not, as is sometimes assumed, been merely a spontaneous result of forces beyond our control. It is essentially the result of a policy deliberately framed with a view to bringing down prices and giving a higher value to the monetary unit. * * *

"The world's work has been brought to a standstill to a degree that we have never witnessed before, and unemployment has risen to alarming figures, particularly in countries where the policy of deflation has been applied most severely."

Prof. J. Laurence Laughlin, professor emeritus of the School of Political Economy, University of Chicago:

"A crisis comes because credit has been unduly expanded in a period of prolonged prosperity; in an optomistic spirit men have entered into transactions beyond their actual means, as is shown when the test of actual payment is exacted, and in a time of fright collateral as well as goods fall in price. In such a situation liquidation needs time if disaster is to be prevented."

"* * * the great need is some means—whatever it may be—which will enable a bank to make loans to a client, who can thereby be saved from failure and from hasty and ruinous liquidation."

Prof. Irving Fisher, professor of political economy, Yale University:

The newspapers of January 31, 1922, in dispatches from London quote Professor Fisher as pointing out in an address before the London School of Economics, at the London University, that the fundamental cause of the collapse in prices in this country was the abrupt way in which the Federal reserve system raised discount rates under the "false idea that they must get back to the so-called normal of pre-war." Continuing, the press dispatch, quoting Professor Fisher, says:

"The idea of suddenly wrenching back price levels when they had reached the heights of 1920 to 1913 level, whilst it did bring about justice to contract parties who had entered into contracts before 1913, produced a frightful injustice to the much larger number who had contracted at these high-price levels."

"Consequently," says the dispatch quoted, "Professor Fisher held it to have been a very great mistake of policy of the Federal Reserve Board to have raised the rates of discount so high and to have produced this fall of prices."

The late A. Barton Hepburn, a leading financier of New York and former Comptroller of the Currency, upon his return last summer from a visit to the Far East was quoted by the Associated Press as follows:

"Japan is backing up the banks in lending funds at a low rate of interest to struggling farmers, who would otherwise go under, to the detriment of commercial life."

Contrast the intelligent policy of the banks of Japan with the Federal reserve, which, for example, in Colorado, Mississippi, and Alabama charged in some cases 22 per cent and 31 per cent, and in one instance as high as 87½ per cent, to member banks whose loans were mainly to farmers.

A newspaper published in Tokyo, Japan, in April, 1921, discussing trade between the United States and China referred to an instance of machinery purchased by a Chinese firm on a four months' sight draft, and said significantly:

"When the Federal Reserve Board called in credits, the firm was told that they would have to pay cash on delivery. This almost threw them into bankruptcy."

The newspaper pertinently adds:

"The Chinese memory is a long one."

VIEWS OF UNITED STATES SENATORS AND REPRESENTATIVES

The Joint Commission on Agricultural Inquiry, composed of prominent Senators and Representatives of both political parties, says in its report recently submitted to Congress:

"The debacle of prices in 1920 and 1921 reduced the farmer to a condition worse than he has suffered under for 30 years. * * * Farmers are having the greatest difficulty in paying the debts incurred in producing the crops of 1920 and in securing credit necessary for new production. The commission believes that these difficulties are due in a measure to the credit restrictions and limitations of the past 18 months and in part to the fact that the banking machinery of the country is not adequately adapted to the farmers' requirements. * * * The commission is of the opinion that a more liberal policy could have been adopted in the latter part of 1920 and the early part of 1921 and that the adoption of such a policy would have served to arrest in part the tide of deflation and to reduce the hardships and losses incident thereto."

Mr. President, I commend these enlightening and convincing statements to the leaders of the Republican Party.

DEFICIENCY APPROPRIATIONS—CONFERENCE REPORT

Mr. NORBECK. Mr. President——

Mr. WARREN. I ask——

Mr. NORBECK. Reserving the right to object, I desire to say that there is an agricultural matter which has been before the Senate for several hours, and we have been asked to yield for this and to yield for that. Will the Senate not let us take a vote on that question? We can dispose of it in three or four minutes. Senators on the other side of the Chamber have taken all of the time of the Senate and are keeping the farmers from receiving relief.

Mr. WARREN. I ask my friend to let the conference report be considered, because it involves a matter of $194,000,000.

Mr. NORBECK. The farmers are suffering more than $194,000,000 of damage. There are all kinds of subterfuges resorted to here when we try to bring up something for the relief of the farmer.

Mr. WARREN. I trust the Senator will permit us to proceed with the consideration of the conference report.

Mr. NORBECK. I object if we can not proceed with the regular order.

The PRESIDING OFFICER (Mr. LENROOT in the chair). Objection is made. The Senator from Alabama will proceed.

Mr. HEFLIN. Mr. President——

Mr. ASHURST. The conference report has not been received, Mr. President?

Mr. WARREN. Of course, the presentation of the conference report is a privileged matter.

Mr. ASHURST. But objection was made, and the report was not received. Am I correct as to that?

The PRESIDING OFFICER. No; the report was not received.

Mr. HARRISON. Mr. President, will the Senator from Alabama yield to me to submit an inquiry?

Mr. HEFLIN. No; I do not want to be taken off my feet.

Mr. HARRISON. I desire to make an inquiry with the understanding that it will not take the Senator off the floor.

Mr. HEFLIN. I think I had better proceed.

Mr. WALSH of Massachusetts. A parliamentary inquiry, Mr. President.

Mr. HEFLIN. I can not yield now to any other Senator.

Mr. WALSH of Massachusetts. But I desire now to submit a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his parliamentary inquiry.

Mr. WALSH of Massachusetts. I should like to know if the clerks of the Senate, who were instructed several hours ago to enter upon the Journal the President's veto message, have dropped dead or have they finished their work so that the President's veto message has been entered upon the Journal? If so, that is the immediate business before the Senate.

Mr. NORBECK. I withdraw my objection to the request of the Senator from Wyoming [Mr. WARREN].

Mr. WARREN. The Secretary has the conference report at the desk, and I ask that it may be read.

Mr. HEFLIN. I yielded to the Senator from Wyoming for the purpose of presenting the conference report.

Mr. WARREN. I move that the report be adopted.

Mr. PITTMAN. Mr. President, before that question is put I wish to discuss the report.

Mr. MOSES. Mr. President, the question is not debatable.

Mr. WARREN. The matter will be decided simply by a vote as to whether the conference report shall be adopted or not.

Mr. PITTMAN. I object to the submission of the report.

The PRESIDING OFFICER. The submission of a conference report is a matter of privilege. Whether or not it shall be considered is a matter for the Senate to determine. The report will be presented, unanimous consent having been given for that purpose.

Mr. ASHURST. What is the report?

The PRESIDING OFFICER. The Secretary will read the report.

Mr. ASHURST. We want to identify the report.

The PRESIDING OFFICER. The Secretary will read.

The READING CLERK. Conference report on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes.

The report is as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 32, 35, and 36.

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: At the end of the matter inserted by said amendment insert the following: "*Provided*, That no part of the sums herein appropriated shall be used for the commencement of construction work on any reclamation project which has not been recommended by the Commissioner of Reclamation and the Secretary of the Interior and approved by the President as to its agricultural and engineering feasibility and the reasonableness of its estimated construction cost"; and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$375,000"; and the Senate agree to the same.

Amendment numbered 31: That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$315,000"; and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert: "$375,000"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 29, 34, 58, and 59.

F. E. WARREN,
CHARLES CURTIS,
W. L. JONES,
LEE S. OVERMAN,
WM. J. HARRIS,
*Managers on the part of the Senate.*

MARTIN B. MADDEN,
D. R. ANTHONY, JR.,
*Managers on the part of the House.*

Mr. PITTMAN. I object to the consideration of the report.

Mr. WARREN. Mr. President, let us have the report read. Nobody will know what the report is unless it may be read.

Mr. HEFLIN. I am not going to keep the floor very much longer myself. I am not going to try to hold the Senator from Wyoming back. I shall finish in just a moment.

Mr. PITTMAN. I object.

Mr. WARREN. Mr. President, if the Senator from Nevada will allow me just a moment, I desire to say that this is the conference report on the last appropriation bill. It covers every single department of the Government and carries an appropriation of about $194,000,000. If the conference report is not adopted within the next half hour, of course the bill will be lost. The bill carries the appropriation for the Veterans' Bureau; it carries the appropriation for the bonus and for various other governmental activities—indeed, for nearly every interest of the Government. It is one of those bills as to which a joint resolution passed by Congress will not continue during another year the appropriations for which it provides.

In order to supply the necessities of the different agencies of the Government this bill must either pass and go into operation, so that the money which it provides may be used, or it is entirely lost to all, and a number of activities will have to suspend.

Mr. HEFLIN. Mr. President——

Mr. PITTMAN. Will the Senator from Alabama yield to me?

Mr. HEFLIN. Mr. President, there is going to be opposition to the conference report, and I can not yield for its consideration just now.

Mr. PITTMAN. I ask the Senator from Alabama to yield to me in order that I may make a statement.

The PRESIDING OFFICER. The Chair must hold that unanimous consent has been given for the presentation of the conference report. The Senator from Nevada [Mr. PITTMAN] now objects to the consideration of the report. Under the rule the question of consideration must be determined by the Senate immediately without debate, but that does not apply to the question of the adoption of the report. That question will be open to debate if the Senate votes to consider the report.

Mr. KING. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KING. In order to proceed to the consideration of the conference report can a Senator be taken from the floor?

Mr. PITTMAN. I objected to the presentation of the report.

The PRESIDING OFFICER. The presentation of a conference report is always privileged. The report has been presented. The question now is, Shall the Senate proceed to the consideration of the conference report?

Mr. PITTMAN. To that I object. Now, then, with the consent of the Senator from Alabama——

Mr. WARREN. I move that the Senate proceed to the consideration of the conference report.

Mr. PITTMAN. I should like to explain the reason why I object to the consideration of the conference report.

The PRESIDING OFFICER. The question of proceeding with the consideration of the conference report is not debatable.

Mr. HEFLIN. I understand that I have the floor.

The PRESIDING OFFICER. No. The Senator from Alabama yielded the floor for the presentation of the conference report. The present occupant of the chair will say to the Senator from Alabama that he will immediately recognize him if there is any question about it when the pending motion is disposed of.

Mr. PITTMAN. I wish to say this: If an amendment which the conferees have knocked out of this bill—and I say wrongfully knocked out while they have left other amendments in—is not put back into the bill the bill will not pass at this session. That is all I have to say.

The PRESIDING OFFICER. The question is, Will the Senate proceed to the consideration of the conference report? [Putting the question.] The "ayes" have it. The motion prevails. The question now is upon agreeing to the conference report.

Mr. ASHURST. I wish to be heard on that question.

The PRESIDING OFFICER. The question is open to debate.

Mr. ASHURST. That is debatable.

Mr. HEFLIN. Mr. President——

Mr. ASHURST. I want to discuss the conference report.

Mr. McKELLAR. Mr. President——

Mr. ASHURST. I want to know who has the floor.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. ASHURST. I thank the Chair.

Mr. HEFLIN. Mr. President——

Mr. ASHURST. I do not yield to anybody for any purpose. The Chair only may properly take me off the floor.

The PRESIDING OFFICER. The Chair will read the rule in reference to conference reports:

1. The presentation of reports of committees of conference shall always be in order, except when the Journal is being read or a question of order or a motion to adjourn is pending, or while the Senate is dividing; and when received the question of proceeding to the consideration of the report, if raised, shall be immediately put and shall be determined without debate.

The Senator from Alabama yielded for the presentation of the conference report, and the report is now before the Senate.

Mr. HEFLIN. Mr. President, the Chair was going to recognize me immediately after that was done.

The PRESIDING OFFICER. The Chair promised to recognize the Senator from Alabama after this question was disposed of.

Mr. HEFLIN. That was not my understanding. Had I so understood I would not have yielded for a discussion of the subject at all.

The PRESIDING OFFICER. The Senator from Arizona has the floor.

Mr. ASHURST. Mr. President, it is useless to cavil over the question as to who was recognized by the Chair. The Presiding Officer recognized me, and the question as to who should be recognized is not appealable, for that question is wholly for the Chair and is for the Chair only.

Much as I desire to see my own amendment and the amendment of my colleague retained in this conference report, I decline to assume the responsibility of killing this deficiency bill, as such action would starve many of the great energies of the Government. I have conferred with my colleague [Mr. CAMERON], but neither he nor I will assume the heavy responsibility of killing this vital bill, as such action would paralyze too many agencies of the Government, although the conferees have abandoned and thus defeated the legislation that we seek.

Let me now remind the Senate that these amendments, which the conferees have abandoned, were of vast importance to the water users and landowners on the Yuma Mesa auxiliary irrigation project and to the main Yuma project.

On that Mesa project 48 settlers who have made three-fourths of their payments to the Government and 55 other settlers who have made one-half of their payments and many other landowners who have made one-fourth of their payments will be now subjected to great distress, and I doubt not that some of them will be ruined, by the abandonment of this amendment.

Our Government should not drive hard bargains with farmers. Agriculture is the noblest of all occupations, the most dignified of all occupations, for it nourishes our race. The multitudes of the earth must subsist upon what agriculture produces. In Yuma County, Ariz., the citizens, with a valor neither showy nor vociferous, have fought as good a fight to reclaim a desert as is recorded in all history; how well they have succeeded let the farms, ranches, and greenery there testify. Consider a valley where the soil is of the richest and where the sun in summer comes down like a merciless flail; a valley that is one of earth's wonders, asking for justice, and denied justice by wanton pettishness of conferees.

As to the amendment I offered to this bill, and which the Senate adopted, I told the Senate on Thursday evening in simple, plain language that the Government of the United States built the Yuma project about a hundred miles above where the flashy and temperamental Colorado River debouches into the Gulf of California; that the Government built on the Mexican bank or side of that river a levee at Government expense costing $800,000, and that the construction of this levee threw these swirling waters, with a cutting edge like the claws of a steel giant, against the farms on the project, and those waters are destroying, as they have been destroying for 10 years, the farms of these industrious and worthy people who are landowners on the east side of this river.

Any man worthy to be a Senator, any man fit to represent his people, could not be otherwise than indignant at the treatment these landowners have received. Senator Root, of New York, said 10 years ago in the United States Senate, when the proposition had no more than been stated to him, that he would use every endeavor to correct this injustice. The Secretary of the Interior, who has taken a broad view of this question, told me no longer ago than this morning at the White House that he fully believed in the overwhelming equities of the landowners of the Yuma project, and in effect and spirit but not in exact text save voicing his view.

To say that these poor farmers of the Yuma project should be required to hold within a fixed channel these mighty floods of the Colorado River is a statement that would make a chancellor vomit. My amendment was as follows:

*Be it enacted, etc.*, That there is hereby appropriated, out of any moneys in the Treasury of the United States not otherwise appropriated, the sum of $597,088, or so much thereof as may be necessary to reimburse landowners residing on Yuma project, Arizona-California, for all moneys they have heretofore been charged with or have paid into the United States Bureau of Reclamation for the operation and maintenance of the Colorado River front work and levee system of said project.

SEC. 2. That there is also hereby appropriated, out of any moneys in the Treasury of the United States not otherwise appropriated, the sum of $100,000, or so much thereof as may be necessary, to be placed to the credit of the United States Bureau of Reclamation and to be expended under the direction of the Secretary of the Interior for the purpose of paying the operation and maintenance costs of said Colorado River front work and levee system on said Yuma project, Arizona-California, for the fiscal year ending June 30, 1925, and thereafter there is hereby authorized to be expended not to exceed $35,000 annually, or so much thereof as may be necessary, as the share of the Government of the United States of the costs of operating and maintaining said Colorado River front work and levee system: *Provided*, That the said sum of $35,000, or so much thereof as may be necessary, shall only be available if and when double such said amount of $35,000 shall have been provided by the States of Arizona and California, the county of Yuma, Ariz., and the Yuma project, or any of them, it being hereby declared to be the policy of the United States to assume one-third the obligation of caring for said river-front work and levee system on said Yuma project, Arizona-California.

Mr. BORAH and Mr. HEFLIN addressed the Chair.

Mr. ASHURST. I yield to the Senator from Idaho for a question.

Mr. BORAH. Well——

Mr. ASHURST. I do not wish to lose the floor, but I am going to conclude in one minute.

Mr. BORAH. I will not interrupt the Senator.

The PRESIDING OFFICER. The Chair will state the Senator would yield the floor if he yielded other than for a question.

Mr. ASHURST. Mr. President, I have concluded. If these facts for which the Secretary of the Interior vouches, for which the Bureau of Reclamation vouches, for which the fact finding commission vouches, and for which every man who has the impulse of integrity and fairness vouches, do not move the conferees to do justice, peace be with them.

## THE CONSPIRACY INVOLVING THE POST OFFICE DEPARTMENT IN LAND FRAUDS AND THE BARTER OF THE NAVAL OIL RESERVES

Mr. HEFLIN. Mr. President, in the fall of 1920 when we had a Democratic Postmaster General complaint was made to the Post Office Department that certain land companies doing business in the Lower Rio Grande Valley of Texas were,

through deception, misrepresentation, and the fraudulent use of the mails, defrauding hundreds of American citizens in the sale of lands in the valley. A Democratic Postmaster General ordered that an immediate and thorough investigation be made. J. M. Donaldson, of Kansas City, one of the most reliable and most effective inspectors in the service, was placed in charge of the investigation. He went whole-heartedly into the work and was proceeding to make a real investigation, but as soon as a Republican Postmaster General came into office in 1921, R. B. Creager, Republican national committeeman for the State of Texas, and a partner in the land company of C. H. Swallow & Co., and also a partner in the Alamo Land & Sugar Co., together with C. H. Swallow and W. F. Zumbrunn, who was general counsel of the Lower Rio Grande Valley Land Men's Association, and C. F. Ladd, general sales manager of the W. E. Stewart companies, and C. H. Jessup, representing the Lower Rio Grande Valley Water Users' Association, came to Washington and called on the Postmaster General, Mr. Hays, and on the Attorney General, Mr. Daugherty, for the purpose, I am convinced, of having the investigation stopped, and they succeeded in doing what they came to do. Several very suspicious and reprehensible things happened soon after their visit to Mr. Hays and Mr. Daugherty.

This Republican National Committeeman Creager wanted Donaldson removed and a more pliable and accommodating inspector put in charge of the investigation. It was up to Creager to show why Donaldson should be removed, and he told the chief inspector, Mr. Simmons, here in Washington, that Donaldson, who had started the investigation, had said that he, "Creager, ought to be in jail."

Donaldson denied having made such a statement, but he was removed just the same after Creager and the others mentioned called on Hays and Daugherty. Then an inspector by the name of Williamson from Pittsburgh, Pa., a man in every way agreeable to Creager and his associates, was placed in charge of the investigation.

Here the investigation ended, for what Williamson did was not in any honorable sense an investigation. After the understanding had with the Post Office Department by Creager and others, strange to say, those charged with violating the law took charge of Inspector Williamson and directed his investigation. They had him go through their books and letter files and when that was completed he returned to Washington, wrote his report, sent it into the Post Office Department and he acknowledged under oath before the Post Office and Post Roads Committee of the Senate investigating the land frauds and the failure of the Post Office Department to complete the investigation, that he never called upon a single victim of the land frauds—that not one of them had been seen or questioned in regard to the matter. So the inspector that Creager had named in place of Mr. Donaldson did just as Creager and the others wanted him to do. His investigation was a miserable farce and was the culmination of a conspiracy to prevent an honest and thorough investigation of Creager and the others who had had satisfactory conferences with Hays and Daugherty in Washington.

Think of an inspector quitting an investigation before he had questioned a single one of the hundreds of citizens who had complained of being defrauded out of hundreds of thousands of dollars. Think of him going to the homes of the accused and letting them direct his activities in the land fraud investigation. And think of him closing the investigation and leaving for Washington without permitting any one of the hundreds and thousands who had been defrauded to tell what they knew about the crimes that had been committed against them by the use of the United States mails.

These victims of the land frauds had been lured into the valley from Indiana, Ohio, Iowa, and ten or twelve other Northern States. They were carried into the valley on excursion trains provided by the land companies. They were kept together and not allowed to talk to any one except the agents of the land companies. They were escorted to show farms that were used as "decoy ducks." They were properly irrigated and were producing in abundance. The prospective buyers were told that all the land pointed out to them was under the same irrigation system and that all the water needed could be had in a few hours by phoning in to the irrigation plant. They were told that the lands were not overflow lands. Buyers were required to pay at least half in cash and in many instances they were induced by the representations made by them to pay cash every dollar they had and could borrow. Many of the victims of the frauds practiced upon them in the sale of these lands in the lower Rio Grande Valley found after they had paid to the land companies every dollar they had that the land was overflow land or that no water could be had to irrigate it so as to enable the farmers who had been deceived into buying it to make a crop. In addition to paying in cash all the money they had, they had given to the land companies vendors' lien notes for the other payments.

The failure of hundreds of farmers to get water to irrigate the land purchased caused them to fail to make a crop and their failure to make a crop meant failure to pay the first vendors' lien notes that came due and the land companies kept the farmers' money and got the land back and left these Indiana, Ohio, Iowa, and other northern and western farmers and their wives and children stranded in the valley. Hundreds of them lost the accumulations of a lifetime through the fraudulent and corrupt use of a governmental instrumentality by the crooked and corrupt land companies in the lower Rio Grande Valley. Hundreds of them were unable to pay their railroad fare back to the States from which they came.

The lands taken back from them have been sold and taken back and sold and taken back many times as the crooked land companies increase their riches and the names of their miserable victims increase by leaps and bounds.

Mr. President, after Creager, Republican National Committeeman from Texas and the other land men that I have mentioned came to Washington to get a Republican Postmaster General to call off the investigation which involved their land companies, nearly a thousand American citizens who stated that they had each been defrauded by land companies doing business in the valley petitioned the Postmaster General to continue the investigation. They mentioned the fact that Creager and others had been to Washington in an effort to stop the investigation and they begged the Postmaster General to permit those who had been defrauded to have an opportunity to give to their Government the truth regarding the matter. Did the Postmaster General continue the investigation? No. He stopped it.

The man that the Postmaster General sent down there to relieve Donaldson, who was making a real investigation, did nothing but confer with those who were charged with crime against citizens and crime against the Government. Williamson, Postmaster General Hays's Handy Andy and Creager's man Friday, closed the case in November, 1921, in less than six weeks after it was turned over to him without letting a single man defrauded by the crooked land companies give testimony as to how he had been treated by the landmen who had violated the laws of the Government that Williamson was supposed to represent and protect.

Nearly three years have come and gone since Creager and Hays and Daugherty conferred together about the investigation of the land frauds in the lower Rio Grande Valley. For nearly three years no attention has been paid by the Republican Postmaster General to the pitiful appeals of the distressed victims of the land frauds in the lower Rio Grande Valley.

I repeat, Williamson stated on the witness stand before the Senate investigating committee of which I am a member that he had not been to see a single one of the victims of the land frauds—that he had not given a one of them the opportunity to tell his story to a representative of the Government.

Mr. President, the petition of the unfortunate land victims was thrown into the waste basket and the investigation abandoned nearly three years ago. This investigation was abandoned and the fraud crooks permitted to continue their fraudulent practices to the shame of the Postmaster General and the Republican administration, and to the hurt and injury of hundreds and thousands of once prosperous American farmers. It was stifled and abandoned in the face of the fact that Donaldson when removed to make way for Williamson stated in his report to the Post Office Department that—

> From the evidence obtained through circularization of persons dealing with the companies in question, conditions have come to light, which the inspector describes as "most outrageous, outlandish, and reprehensible methods that can be conceived, which were used by these land companies in disposing of this land and swindling the public."
>
> Specific instances are cited showing that almost every claim made by these companies for the land sold by them is a fraudulent one. New victims are constantly being brought in. Banks, mercantile institutions, and police authorities are apparently controlled by the interests operating from Kansas City, and in the event that any of the victims attempt to warn newcomers, in order to prevent them from being swindled, an assassin is employed to harass or murder such informant.

Mr. President, think of a great department of our Government being maladministered so as to suppress the truth, shield crooks and criminals and brazenly used to defraud the citizen. Such reprehensible and despicable conduct on the part of those in control of our Government breaks down and destroys respect, not only for those in authority but for the Government itself.

The effect of the failure to proceed with the investigation is mentioned in Donaldson's report, when he said that the farmers in the Rio Grande Valley who have been swindled believe that the influence of these land companies is too great to fight and that the Government would not go through with the investigation.

Senators, have we reached the time when the American people are willing to remain silent and permit the Government to be put in the attitude of being indifferent and unresponsive to the cry of distress and injustice on the part of the humblest citizen in the country? Are we ready to accept the dangerous doctrine that Republican influences, corrupt and powerful, have set up to the effect that citizens in the common walks of life shall be subject to investigation and punishment for violating the law, but that the mendacious, rich in ill-gotten gain, may violate the law at will and escape its pains and penalties? Think of law-abiding, patriotic American citizens being robbed of the earnings of a lifetime through the use of a governmental instrumentality and when they petition their Government for relief and offer to furnish the evidence to convict the criminals responsible for the frauds practiced upon them they find the Republican Postmaster General not devising plans to apprehend and punish the guilty, but in conference with Creager, the Republican National Committeeman from Texas, and others accused of the crime complained of.

That is not all. They find that the conference in Washington has accomplished the result desired by those who have grown rich through frauds practiced upon American citizens and in their disgust and despair they tell Donaldson that they fear that the Government will not go through with the investigation. That presents a dreadful situation for our serious consideration. Senators, we owe it to ourselves and to those who sent us here to see to it that such conditions shall not continue. Such contemptible conduct on the part of Government officials ought to be denounced by every patriotic man and woman in the country.

Farmers who had been defrauded held mass meetings at several places in the valley for the purpose of bringing about unity of purpose and concerted action in obtaining an investigation and prosecution of land crooks by the Government. James R. Page, an attorney of Kansas City, was invited to address them, and he vigorously denounced those who had deceived and defrauded American citizens in the sales of lands in the valley. Immediately steps were taken by men in the employ of the defrauding land companies to intimidate and drive Page out of the valley. He was discussed at meetings of the Land Men's Association. It was strongly intimated that if the mass meetings and Page's speaking should continue and those accused convicted "everyone would be headed for the penitentiary."

At one of those meetings Mr. Zumbrunn stated that the telegrams he had received from Creager indicated that he was alarmed. Then one of the men present at the meeting said: "If you, as an association, send me down there as your representative with Mr. Creager, I will muzzle him (Page) or put myself out of business in the effort." They did everything in their power to frighten Page. They filed disbarment proceedings against him. They had him indicted in a lower Rio Grande Valley court, and he was told if he didn't leave the valley he would be killed.

Page advised the victims of the land frauds to mail their petition asking the Post Office Department to continue the investigation. And then what do you suppose happened? Why, the Creager crowd got the local judge of a district State court to issue an injuction against American citizens mailing a petition to Federal officials in Washington. Was there ever before anything like that brazen conduct in our country?

Here is a telegram which shows that there was an understanding between Creager and his companies and the Post Office Department that he was to escape investigation and prosecution. The Stewart mentioned in this telegram was indicted and convicted on Donaldson's report and I believe that Creager and others would have been convicted if Donaldson had not been displaced to accommodate Creager and his crowd. Here is the telegram that tells the story of a nasty conspiracy and a heinous crime in high Republican circles at Washington. It was sent from the Post Office Department here to the post-office inspector in charge at Kansas City, and reads:

> Take no steps to present any evidence to grand jury in case of Alamo Land and Sugar Company, C. H. Swallow & Company, or in any company in which R. B. Creager is interested, or involving R. B. Creager in any way pending completion of investigation by Inspector Williamson, who is covering all these companies including Creager, and we want no action taken at this time. So far as Stewart Land Company is concerned, you are at liberty to act provided it does not involve Creager or Creager's companies; and if it does, do not act, because no action in these matters must be taken until after Inspector Williamson completes his investigation and has submitted his report. Show this wire to Inspector Donaldson and answer by wire at once if presentation of evidence in Stewart Land Company case will in any way involve Creager or Creager's company.
>
> SHOOK, *Acting.*

Let me read a line or two from the testimony recently taken at the hearings.

> Mr. PAGE. Now, you did not send that telegram, did you?
> Mr. SHOOK. No, sir.
> Mr. PAGE. Who did?
> Mr. SHOOK. Williamson sent that, dictated it to Robinson, the chief inspector's private secretary.

Mr. President, the Williamson who sent that telegram preparing the way for Creager's escape from a real investigation and prosecution, and who signed Shook's name to it, is the same Williamson who was sent down to take Donaldson's place and who by his suspicious and reprehensible conduct in the matter has branded himself as one of the conspirators in this terrible thing.

The conspiracy to prevent an honest investigation by the Post Office Department of those who used the United States mail to defraud American citizens, has been established by testimony obtained from officials in the Post Office Department. The fact that the inspector did not question a single one of the citizens who complained of having been defrauded, and the fact that he stopped the investigation after consulting with those accused of the crime, show conclusively that the Post Office Department of the Government of the United States under Republican rule has knowingly and intentionally shielded and protected crooks and criminals in their robbery of hundreds and thousands of American citizens. God speed the day of deliverance from the shameful, disgusting, and disgraceful rule of those who misuse, abuse, and barter the instrumentalities of Government which in an evil hour were committed to their care.

Mr. President, we have not been permitted to proceed as we should have with the investigation of the fraud practiced upon American citizens in the sale of lands in the lower Rio Grande Valley. The chairman of the subcommittee, Senator MOSES, can not be said to be very sympathetic or in any way enthusiastic over the investigation. He has not impressed me that he possessed any considerable amount of zeal for a prompt and real investigation. Just the other day he arbitrarily ruled that no testimony touching transactions that took place in the valley could be taken here in Washington. We placed a witness from Kansas City, Mo., on the stand who had been an agent of one of the land companies accused of defrauding citizens in the sale of lands in the valley. He was permitted to testify how the mails were used to send out literature to prospective buyers and for sending letters back to the companies by the agents telling of the number of citizens who would be brought in on excursion trains at stated times. This witness, a Mr. Collins, had just related how he had gone into a northern State and had gotten a number of citizens to accompany his party into the valley. He told how they were kept in cars to themselves where nobody but the agents of the land companies could talk to them. They were now on the train going into the valley. Just then Mr. PAGE asked him what he and the other agents did to get the prospective buyer in the proper frame of mind to buy land when he arrived. Before he could answer the question Chairman MOSES told the witness not to answer the question because he said you are going to testify about what took place in the valley. I protested against his ruling and requested that this witness, who was here at Government expense, should be permitted to finish his testimony—that it seemed foolish to call him in again as a witness and put the Government to the extra expense that such a procedure would incur. But he insisted that all testimony regarding occurrences in the valley should be taken down there. We informed him that scores of the land fraud victims did not live in the valley and that it would be inconvenient for them to go to the valley and also that it might be months before we could get to the valley, but in spite of the protests of the Democratic minority of the committee he, with the use of the proxies of two other Republican members of the committee, Senator EDGE, of New Jersey, and Senator ODDIE, of Nevada, who had never attended any of the hearings, prevented the witness from proceeding, and stopped the hearings.

I appealed from that ruling and finally succeeded in getting Chairman Sterling of the Post Office and Post Roads Committee to call the full committee to meet and hear the appeal. The committee sustained my appeal and set aside the ruling made by Senator Moses with his proxies and authorized us

to proceed with the investigation here. I have been trying since that time to get Senator Moses to call a meeting of the committee to formulate plans for the continuance of the investigation in Washington. So far I have not succeeded. All of those who have attended the hearings know that we are seriously handicapped in conducting this investigation. I do not want to charge that anyone responsible for delay is trying to cripple or stifle the investigation, but I will say that this investigation is going through.

If we can not proceed with it now we will proceed with it when Congress reconvenes.

Mr. President, strange to say, the officials of the Post Office Department who have appeared before the committee have shown hostility to those pushing the investigation and sympathy for those who came to the Post Office Department in Washington and succeeded three years ago in calling off the investigation. Nothing short of a new order of things in Washington will restore to commanding respect with high Federal officials here the old-time American standards of common fairness, common justice, and common honesty that are still loved and emphasized by the rank and file of the Democratic Party and hundreds and thousands of men and women in the ranks of the Republican Party. There ought not to be any difference between the two dominant political parties on anything that involves wrongdoing against the Government, graft and corruption in office. There ought to be a common understanding between them through which both would serve notice on all crooks and criminals that strict adherence to the principles of fair play and common honesty would be upheld at any cost. There are many in high office here who do not feel as I and many others do about this matter. The people in the States must wake up to the increasing dangers that threaten free institutions in America. Corrupt men in office must be driven out. If they are permitted to continue and to multiply they become more and more a greater menace and danger.

The only safe and wholesome remedy is to smite them hip and thigh and get rid of them. Washington realized that. He knew about some of them in his day. In 1799 he said in a letter to James Warren regarding the conduct of a few currupt officials:

> Is the paltry consideration of a little dirty pelf to individuals to be placed in competition with the essential rights and liberties of the present generation, and of millions yet unborn? Shall a few designing men, for their own aggrandizement and to gratify their own avarice, overset the goodly fabric we have been rearing at the expense of so much time, blood, and treasure? And shall we at last become the victims of our own abominable lust of gain?

What a battle cry of the Father of his Country against corruption in office. The New York Times, commenting upon Washington's statement said, February 22, 1924:

> His plan of action was to retain the confidence of the people by driving every exposed scoundrel out of public life with whips of scorn, and then to call upon his countrymen by precept and example to illustrate the austere virtue which should clothe men in official positions. This aspect of Washington's spirit and public service might well be meditated upon to-day by those who are now in power in the city that bears his name.

Now, Mr. President, I desire to speak briefly on another matter. I want to talk about Republican politics for a few minutes.

Mr. President, Penrose was a high priest in the councils of the old stand-pat Republican Party, and Mr. Coolidge is as much a disciple of that system as was Penrose. Matthew Quay trained Penrose and Murray Crane trained Coolidge.

Penrose and Coolidge moving in the same direction and having the same ends in view employed different methods to bring about the results desired. Penrose believed that the big interests back of him should control the Government and he did not hesitate to say so, while Mr. Coolidge, not so bold and outspoken but much more politic and diplomatic, is just as satisfactory now to those who backed Penrose as was the big Pennsylvania boss in the heydey of his political power. Penrose conferred with the "money lords," the "tariff barons," and "trust magnates," the three big groups that feed and fatten on governmental favoritism under Republican rule, and whenever they agreed upon a candidate for President he got squarely behind him and his man always got the Republican nomination. He, with others representing the same interests, O. K.'d the Harding and Coolidge ticket in 1920. Coolidge soon after he became President, true to his Murray Crane training, proceeded in the quiet Coolidge way to let the three big groups mentioned know in no uncertain way that he was their friend and that they would never have occasion to regret supporting him. The cry of the West for relief for millions of farmers in distress fell dead on his ears, and President Coolidge emphatically announced that no extra session of Congress would be called to consider any measure looking to their relief. The three big groups were much pleased with his action in this matter, and after they had seen him give many other assurances of friendship and service they had the newspapers that they own, or control, to start a concerted move for Coolidge for President.

Several modest Republicans and some of the leaders knowing Mr. Coolidge's limitations and his leanings, and some prominent Republican Senators, also leaders, who had had the opportunity to observe him very closely when he presided over the Senate for more than two years, and who did not in any way regard him as a strong man, commenced to cast about for some strong outstanding Republican to put forward for the Republican nomination for President. But while they were quietly discussing the situation and laying their plans, the man in the White House, who was thoroughly familiar with the Murray Crane way of doing things in politics, commenced to ingratiate himself so strongly in the confidence and esteem of the "special privilege crowd" that before these other gentlemen knew what had happened certain big Republican newspapers were declaring editorially that Coolidge should be nominated without opposition. Some of the Republican leaders commenced to murmur their dissent and protest; some of them said that "Mr. Coolidge is not big enough for the place—he can't be elected," but the big bosses had agreed on Coolidge and these Republicans were told to be quiet and talk no more along that line. The big bosses said, we will employ some of the best newspaper writers in the country to boost Coolidge and praise him, and in a few months we will have the people believing that he is really a big strong man. But that didn't satisfy some of them who had intimate knowledge of Mr. Coolidge's ability and qualifications. They said that the people would find out before the election that a job had been put up on them and that he would be overwhelmingly defeated. Two or three strong Republicans who were spoken of as probable candidates were really getting ready to throw their hats into the ring, but the big interests that controlled the big bosses of that party silenced all of them but one—HIRAM JOHNSON. They let it be known that Coolidge was entirely satisfactory to them and that they were all behind him. So the decree of the big bosses removed all of the candidates except HIRAM JOHNSON and immediately they commenced to upset his plans and purposes. They made it impossible for his friends to get the finances necessary to carry on his campaign and one by one they induced influential Republicans who were supporting Senator JOHNSON to come out in newspaper statements saying they had decided to support Coolidge. And now with all of the candidates eliminated but one, the big bosses, using the big steam roller, proceeded to flatten HIRAM JOHNSON out wherever he crossed the Coolidge path. Angry because he continued to be a candidate after they had made known their desire that Coolidge be nominated without opposition, they decided to make an example of him and to humiliate him by beating him with Coolidge in his own State of California. California is strongly in favor of the Japanese exclusion provision in the immigration law and HIRAM JOHNSON was the champion of that doctrine in the Senate. So in order to obtain votes in California, Mr. Coolidge the day before the primary informed the people of California that he, too, favored the Japanese exclusion provision. That statement was published throughout the State and used to the very best advantage by the Coolidge supporters. Mr. Coolidge carried the State and two days thereafter his representatives were at the Capitol trying to get the Senate and House conferees to strike from the bill the Japanese exclusion provision.

Mr. President, the Washington Post, June 8, had pictures giving different views of Congressman BURTON, of Ohio, temporary chairman and keynoter of the Republican National Convention, as he was preparing his speech. One shows him with his head thrown back, looking up, with these words underneath the picture: "He searches the clouds for inspiration." How appropriate! There is nothing that so resembles the record of this Republican administration as a dark cloud. The keynote speaker for the Republican convention does well to look up to dark clouds for inspiration rather than to look into the dark record of this Republican administration.

If Lincoln could come back and find the forces of greed and avarice and corruption encamped in the Capitol, as they are to-day under Republican rule, he would denounce and repudiate them. He would rebuke them for daring to call this modern aggregation of marauders "The party of Lincoln."

Mr. President, I regret to say it but the big criminal with a pocket full of money has no fear of this administration. In-

stead of fleeing from it terror stricken he comes to it confident that he can arrange things, and after a conference or two he goes his way undisturbed and unafraid. If this Republic is to live these things must cease. The sense of civic duty and moral obligation and patriotic responsibility was never so low in a majority of high public officials at the Capitol as it seems to be to-day. No man in the administration from the President down has shown any real interest or manifested any serious concern in the matter of exposing crooked and corrupt officials and driving them from office. With the charges of corruption and scandal on the part of Republican Cabinet officers printed in newspapers in Washington and all over the country, no word of encouragement or cooperation came from the President to the Senators who were uncovering crime in high places and demanding that Denby and Daugherty be put out of the Cabinet. Both were driven out by the earnest and noble work of Democrats. By the facts brought to light they created the public opinion that forced Denby and Daugherty both out of the Cabinet.

After the Senate by a vote that was almost unanimous found Denby guilty of doing an act that "was born in fraud and corruption and in violation of the laws of Congress," President Coolidge announced that he would not let Denby resign. And it will be remembered that Daugherty complained at the President for not letting him resign sooner. Think of what happened! Did Denby and Daugherty, these two pets and bellwethers of the predatory interests, get mad and sulk in their tents? Oh, no. They were robed in purple and fine linen and sent as Coolidge delegates to the Republican Convention at Cleveland. Birds of a feather "flock" together. The same gang that nominated Harding at Chicago in 1920, nominated Coolidge at Cleveland in 1924. Verily the trail of the serpent is over it all.

Mr. President, nothing short of a complete change in the conduct of this Government at Washington will suffice. Four years more of what we have had and of what we are certain to have if the present régime is continued in office will go a long way toward disgusting patriotic men and women the country over and destroying respect for constituted authority and endangering our free institutions. Predatory interests feel and act toward the Government under Republican rule like the old miser did who had bought a mule and was criticized by his neighbors for what they said was cruelty to the animal. He replied in haughty fashion—"I bought him, I paid my money for him, and I'll use him as I please to."

The agents of predatory wealth, after supplying campaign funds for the Republican bosses and that ticket is elected, feel like the old miser did, that they paid their money for the election of Republican officials and will use them as they choose to.

The corrupt use of money in elections and the disgraceful barter of governmental instrumentalities to those who contribute money to the Republican campaign fund present a situation fraught with great danger to our country.

The time has come to pull together and vote together—all those who believe that the Government should be honestly administered in the interest of all the people.

Mr. President, the party of privilege is up to its old tricks. Another election is approaching and Republican leaders will promise anything and everything to get control for four years more of the taxing power and the money supply and credits of the country.

They promise to do something for the relief of millions of oppressed and distressed farmers. They promised the same thing in 1920. They promise to do something in the interest of world peace. They promised the same thing in 1920. The Republican Party dominated, yes, literally controlled as it is to-day by predatory interests can not do anything except what predatory interests want it to do.

They have made the dollar the dominating thing in Republican politics. They have made barter of the ballot and bought seats in the House and Senate as you would buy a commodity in the market place. They confirmed the sale of a seat in the Senate to Newberry, and they have squandered the timber lands, the coal lands, and the oil reserves of the Nation to those who contributed large sums to the campaign funds of the Republican party. They have juggled figures and agricultural statistics in the Department of Commerce to the benefit of the speculators and to the hurt and injury of the farmers of the United States. They have made of the Department of Justice a rendezvous for crooks and a city of refuge for criminals.

They turned the Veterans' Bureau into a resort for crooks and grafters, and they have ignored or set aside the immigration laws of the land and corrupt officials are growing rich smuggling thousands and tens of thousands of foreigners into our country.

Mr. President, the situation is appalling and alarming. I heard the Senator from Missouri, Mr. SPENCER, speak three hours here to-day trying to prevent a vote on the committee's report on the Teapot Dome scandal. He does not want the Senate to vote on it.

Republican leaders do not want the people to see how certain Republican Senators voted on this question and that is why you want to postpone the vote until after the election.

Doheny and Sinclair are for Mr. Coolidge; Denby, Daugherty, Fall, and Forbes are all for Mr. Coolidge.

It's the same old song, in the same old place, sung by the same old gang.

Secretary Hoover's heart turns back to London, where he was a citizen or subject for 14 years, and George Harvey, formerly ambassador to London, gives up his post temporarily and comes home to direct the publicity work of the Coolidge campaign as he did the Harding campaign in 1920. General Dawes, who has been hobnobbing with international bankers in Europe, is in fine favor with those who are sucking money out of the channels of trade at home to feed their international schemes in foreign countries. It is already being whispered about the Capitol that the "money lords of Wall Street" have agreed to permit legitimate business to breathe freely again and to make money matters easy again just before the election for the purpose of temporarily improving conditions in the hope of lulling the people to sleep until they can get control of the Government for four years more.

Mr. President, if they can fool the people again and win in the fall election, they will tie us on to a scheme of international banking that will suck into it the life blood of the circulating medium of America and breed financial panics and business troubles innumerable for us. They will take the tax off the big income-tax payers and in its place impose a burdensome sales tax of hundreds of millions upon the consuming masses of America.

They will foist upon the country compulsory military training. They will revive the so-called gentlemen's agreement with Japan. The concentration of wealth in the hands of a few and the centralization of power in one man in Washington will go on with a rapidity never known before.

Those who have been unfaithful in the conduct of public office; those who have been corrupt in the use of powers entrusted to them would take Republican victory to mean an indorsement of their criminal greed, their disgraceful graft, and their shameful corruption in office. The verdict of the American people in the next election must ring clear and true. There must be no mistake about its meaning. There must be nothing in it that will give comfort and ease to crooks and criminals in official position. It must be a verdict that means: "Down with graft and the grafter! Down with corruption and the corruptionist, and down with crime and the criminal in the public offices of our country."

Let that verdict say in thunder tones to all political parties that the people of the United States will hold the party in power strictly responsible for the corrupt conduct of those placed in positions of trust by that party.

### SENATOR JOHN K. SHIELDS

Mr. McKELLAR. Mr. President, I ask unanimous consent to have printed in the RECORD a statement of the record of my colleague [Mr. SHIELDS].

The PRESIDING OFFICER. The Senator from Tennessee asks unanimous consent to print in the RECORD the statement referred to by him. Is there objection? The Chair hears no objection, and it so ordered.

Mr. McKELLAR. Mr. President, I ask unanimous consent to have printed in the RECORD a statement of the services of my colleague, the senior Senator from Tennessee, Hon. JOHN K. SHIELDS, covering the entire time he has been a Member of the Senate. This statement was carefully prepared and checked up by a gentleman who has been an official of the Senate for many years and who has great familiarity with the services of the Senator, as he is constantly in attendance upon the sessions of the Senate and has an accurate knowledge of the records. I may say that this gentleman is a life-long Democrat and takes special interest in the services of all the Democratic Senators in this body.

### RECORD OF SENATOR JOHN K. SHIELDS

Senator SHIELDS was elected to the United States Senate January 23, 1913, for the term beginning March 4, 1913. He was reelected in 1918, and his second term will expire March 4, 1925. He served eight years during the administration of President Wilson and nearly four years under the administrations of President Harding and President Coolidge.

The Democratic Party controlled the Senate and the House of Representatives during the first six years of President Wilson's administration, and the Republicans have controlled both Houses since that time.

When the Senate was reorganized by the Democratic Party in 1913 Senator SHIELDS was assigned to the Committee on the Judiciary, the Commerce Committee, Committee on Education and Labor, Committee on Interoceanic Canals, and later upon the Committee on Foreign Relations and the Immigration Committee and some smaller committees. Subsequently he resigned from all of them except the Committee on the Judiciary, Committee on Foreign Relations, and Committee on Immigration in order that he might devote his time to the consideration of the bills within the jurisdiction of these committees, which have always been of great importance and far-reaching in their bearing upon the domestic and foreign relations of the Government.

Senator SHIELDS is also a member of the Democratic steering committee, a political committee having control of the assignment of Democratic Senators upon the various committees and directing the policy of the party in the Senate.

Senator SHIELDS has always attended the conferences of the Democratic Senators and abided their action. While not attempting to make a record of formal quorum calls, preferring to remain in his committee and office at work, he regularly attended the sessions of the Senate when important bills were considered and voted upon.

There were more than 2,000 laws, public and private, important and otherwise, enacted during President Wilson's administration, and only those of outstanding importance can be here referred to. Senator SHIELDS supported and assisted in passing all of the great constructive legislation which was enacted during the first six years of President Wilson's administration carrying out the platform pledges and policies of the Democratic Party.

Among those of outstanding importance which the record discloses he supported are the following:

Simmons-Underwood Tariff Act: This was the most equitable and just tariff law ever passed by the American Congress. It curbed monopolies and special interests in their control of production, distribution, and prices; produced ample revenue, and brought about the greatest period of prosperity the people have ever enjoyed.

Income tax: This just revenue law distributes the burden of taxation and places it upon the wealth of the country, those most able to pay and receiving the greatest protection from the Government.

Federal reserve bank law: This provided the greatest financial system ever known. The Government was given control of finances and disastrous money panics made impossible.

Clayton Antitrust Act: This supplemented and provided for the more efficient enforcement of the Sherman antitrust law for the suppression of monopolies and conspiracies to prevent and destroy competition in commerce. This bill also permits the organization of farmers and labor for the purpose of cooperation to better their conditions, exempting such organizations from the provisions of the antitrust act and limiting the power of the courts to enjoin peaceful strikes.

Farmers' loan bank—rural credits: This act furnishes facilities for farmers to procure loans at reasonable rates of interest upon long time, and has been of great benefit to them.

Federal Trade Commission: A commission created with power to investigate and prohibit unfair methods of competition and trade, and advising what business arrangements and agreements can be legally made.

The Tariff Commission: This commission has rendered great service to the manufacturers of the country in procuring and furnishing information in regard to all commodities of export and import.

Agricultural extension law—Smith-Lever bill: This law provides for cooperation of agricultural extension work between agricultural colleges in the several States, the appointment of county agents, educational and experimental work in agriculture, and other important matters for the benefit of the farmers of the country.

United States grain standards law: This act provides for Federal inspection and publication of standards for grain, which greatly facilitates profitable marketing.

United States warehouse law: This act provides for warehouses and warehouse receipts which may be used as collateral for loans on agricultural products.

United States cotton futures law: This act regulates the purchase and sale of cotton for future delivery, and prevents abuses prejudicial to the planters.

Market service news: Provides for collecting and disseminating daily information concerning supply and demand, quality and conditions and prices of agricultural products to the producers, aiding them to determine when to market and the prices to be obtained for their products. Senator SHIELDS has pending a bill to extend this service to Tennessee and adjoining States.

The nitrate plants: Provided for the construction of plants for the manufacture of alronitrogen for the national defense and to be used in the composition of fertilizers for farmers and under which the plants at the Muscle Shoals in the Tennessee River were constructed and the construction of the Wilson Dam begun.

Conservation of natural resources: Laws to preserve the great natural resources of our country for the benefit of the people and to prevent their exploitation by special private interests.

Merchant marine and ship purchase law: Providing for the development of the merchant marine and favoring our shipping interests.

Good roads legislation: These laws provided for the construction of good roads throughout the United States by division of the cost of same between the States and the Federal Government and under which thousands of miles of splendid roads have been constructed and other thousands are in contemplation in the near future.

Labor bill of rights: Preventing the abuse of the writ of injunction in labor disputes and declaring the principle that labor of human beings is not a commodity of barter and sale as inanimate things.

Workmen's compensation laws: For the protection and benefit of the employees of the Federal Government.

Industrial employees' arbitration law: This act established a Board of Mediation and Conciliation and afforded the Government better facilities for preventing or settling railway and industrial strikes.

Protection of women and children workers in the District of Columbia: This act provided for the protection of the health, morals, and wages of women and minor workers in the District of Columbia.

Child labor law: An act to prevent interstate commerce in the products of child labor and affording protection to the youth of the land.

Eight-hour law—Adamson bill: An act to establish eight-hour day for employees of the carriers engaged in interstate and foreign commerce.

Hours of labor for female employees: This law regulates hours of employment and provides safeguards of the health of female employees in the District of Columbia.

Safety of railway employees: This law provides for the installation of improved safety appliances and affords better protection for railway employees.

Vocational Education Commission act: This law created a commission to study plans for promoting vocational education of youths of the country.

Vocational education act: This law provides for the creation of a board to study and investigate the promotion of vocational education and to provide for the training of teachers in vocational subjects.

Immigration restriction acts: These are laws to regulate the entry of aliens into the United States and to provide certain restrictions relative to their entry.

Parcel post act: This law carried appropriation for experiments in extending the parcel post for marketing farm products.

Armor plate act: This provided for the improvement of the Navy of the United States for the fiscal year 1917.

Seamen's act: This provided for the improvement of conditions of American seamen, adequate life-saving equipment, and crews to meet emergencies.

Improvements of rivers and harbors: There were several of these bills, all of which included provisions for the Mississippi, Tennessee, and Cumberland Rivers and their tributaries. Senator SHIELDS took a deep interest and actively supported all of them.

Mississippi River flood control bill: This was a great measure, carrying appropriation of $45,000,000 for the improvement of the Mississippi River and protection against floods. Senator SHIELDS in the Commerce Committee in the Senate advocated this bill and was largely responsible for its passage and becoming a law.

War risk insurance act: This act created a bureau of marine insurance to provide insurance at reasonable rates, to encourage the resumption of shipping, and to provide markets for American products.

Revenue for preparedness: These were acts to provide increased revenue to defray the expenses of the increased appro-

priations for the Army and Navy and the extensions of the fortifications, and for other purposes, one law passed in the first session and the other in the second session of the Sixty-fourth Congress, and were very important measures of preparedness.

German war resolution: Resolution declaring that Germany was waging war against the United States, and authorizing the President to use the resources of the Nation in defense of our people and our country.

Austrian war resolution: Resolution declaring that the imperial empire of Austria-Hungary had made war against the United States and authorizing the President to use the resources of the Nation in the national defense.

The selective draft or conscript laws: These were laws providing for the drafting of the young men of the country and the organization of an army for national defense in the war with Germany and her allies, under which more than 4,000,000 men were enrolled in the military service of the United States and the greatest army of the world organized.

National security and defense: Acts making appropriations and authorizing an issue of bonds to meet expenditures for the national security and defense and the prosecution of the war, to extend credits to foreign governments, and for other purposes.

Food and fuel laws: Acts to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

War expenses: An act to provide further revenue to defray war expenses, and for other purposes.

The espionage laws: Acts to punish interference with foreign relations, the neutrality, and the foreign commerce of the United States; to punish espionage and better enforce the criminal laws of the United States, and for other purposes.

Military and naval family allowance compensation: To provide a military and naval family allowance, compensation, and insurance fund for the benefit of soldiers and sailors and their families, and make an appropriation therefor of $176,250,000.

War Finance Corporation: For the national security and defense; for the purpose of assisting in the prosecution of the war; creating the War Finance Corporation; providing machinery for extending financial assistance; providing credits; encouraging industries engaged in the manufacture of war materials.

Civil rights of members of Military and Naval Establishments: An act to protect civil rights of the members of the Military and Naval Establishments of the United States engaged in the war.

Government control of railroads: An act providing for the operation of the transportation systems while under Federal control, for the just compensation of their owners, and for other purposes.

Government control of telegraphs and telephones: An act to authorize the President in time of war to assume control of telegraphs and telephones, marine cable, or radio systems, etc.

Signal Corps: An act to temporarily increase the Signal Corps of the Army and to purchase, manufacture, maintain, repair, and operate airships, and appropriating $640,000,000 for the purpose of carrying out the provisions of the act.

National security and defense, to stimulate agriculture: An act providing an appropriation for national security and defense by stimulating agriculture and facilitating distribution of agricultural products.

War expenses—urgent deficiency appropriation bill: Appropriating $5,356,666,016.93 to supply deficiencies in appropriations for the fiscal year 1918 and prior years on account of war expenses, and for other purposes, etc. Largest appropriation act passed by this or any other country.

Trading with the enemy act: An act to define, regulate, and punish trading with the enemy, and for other purposes, etc.

Third and fourth Liberty loan acts: Acts providing for the third and fourth Liberty loans. No financial legislation of any country ever approached the magnitude of the Liberty loan acts. The third and fourth Liberty loan acts increased the amount of bonds authorized to be issued from $7,538,945,460, as originally fixed, to $20,000,000,000; increased the appropriation to meet loans to our allies from $4,000,000,000, as originally fixed, to $7,000,000,000, and increased the amount of certificates of indebtedness that can be outstanding at any one time from $4,000,000,000, as originally fixed, to $8,000,000,000.

Prohibition law for the District of Columbia: This law prohibited the manufacture, transportation, and sale of alcoholic liquors for beverage purposes in the District of Columbia.

The eighteenth amendment, or prohibition amendment: Prohibiting the manufacture, importation, exportation, transportation, and sale of alcoholic liquors for beverage purposes in the United States.

Conservation of food products: An act providing for the conservation of wheat, corn, and other food products during the war by prohibiting the use of them in manufacturing alcoholic liquors for beverage purposes.

Laws passed under the war powers of Congress: Prohibiting the manufacture, sale, and transportation of intoxicating beverages in and near cantonments, shipyards, and other places where sailors and soldiers were quartered and war activities were progressing.

The Volstead law: The Volstead bill for the enforcement of the eighteenth amendment was passed before the amendment took effect by its own provisions—one year after its enactment—under the pretense that it was a war measure, although the war had been over for several months, and President Wilson vetoed it. Senator SHIELDS agreed with the President that Congress had no right to pass such a law until the amendment was effective and voted to sustain the President's veto. The law was passed over the President's veto. Senator SHIELDS announced in a speech in the Senate in February, 1923, that it is the law of the land and that he favors its vigorous enforcement and is opposed to its repeal or amendment.

Immigration laws: Senator SHIELDS has consistently supported all measures coming before the Senate for the restriction of immigration. He took an active part in the recent law for that purpose in the Committee on Immigration and upon the floor of the Senate, making one of the leading arguments in favor of the bill.

Pensions for Spanish-American War veterans: The Senator has supported measures for the relief of the Spanish-American War veterans, believing that they have been more neglected than any of the country's soldiers.

Laws for the benefit of soldiers and sailors in the World War: The laws for these purposes are too numerous to be set out, but it appears from the record that Senator SHIELDS supported practically all of them necessary to arm, equip, clothe, properly house, and pay our soldiers and sailors during the war and for taking care of them after the war.

Provisions for disabled veterans: The numerous laws which have been enacted creating the Veterans' Bureau and otherwise providing for the disabled ex-service men have all had the support of Senator SHIELDS. He supported the Reed bill, passed at the present session to codify the laws for the benefit of disabled veterans, offering an amendment thereto for the benefit of those afflicted with tuberculosis, which was modified by the conference committee, but furnishes a basis for further legislation in behalf of these veterans.

The Muscle Shoals and nitrate plant: Senator SHIELDS has advocated on frequent occasions improvement of the Tennessee River for navigation and the development of the water power at Muscle Shoals for the production of hydroelectricity to be used in the manufacture of aironitrogen for explosives in the national defense and for furnishing farmers with cheap fertilizers. He was active in urging the chairman of the Agricultural Committee to report the bill proposing to accept the proposition of Mr. Henry Ford, and is supporting that proposition and opposing Government operation as proposed in the bill of Senator NORRIS, the chairman of the committee.

The interchangeable mileage book and the Pullman surcharge exactions: Senator SHIELDS favored the bill providing for interchangeable mileage books and that for abolishing the Pullman surcharge exactions, and actively supported the passage of both bills in the Senate.

The reduction of taxes: Senator SHIELDS has favored economy in the administration of the Government and the reduction of taxation and voted for measures for these purposes.

THE IMPORTANT LAWS WHICH SENATOR SHIELDS OPPOSED

The Panama Canal tolls bill: The Congress passed a bill exempting ships trading between the Atlantic and Pacific coast from canal tolls for the purpose of furnishing competition in transportation with transcontinental railroads. The Democratic platform of 1912 declared for maintenance of this law. President Wilson advocated a repeal of the law as a probable violation of the treaty with Great Britain. Senator SHIELDS was of the opinion that Great Britain under the treaty or otherwise had no right to interfere with the control of our canal and favored competition with the railroads as provided in the platform, and for that reason voted against the bill.

The woman's suffrage amendment: The general subject of suffrage was one of the reserved powers of the States and over which the Federal Government had no jurisdiction. The Democratic platform of 1916 so declared and left the question of woman's suffrage to the several States. Senator SHIELDS fol-

lowed the platform and voted against the suffrage amendment, agreeing with the platform of the party that the people of the several States had a right to determine the question for themselves without the interference of the Federal Government. Amendments to the Constitution are under the jurisdiction of the Congress and the President has no voice in or control of them.

Censorship of the press: Senator SHIELDS voted against the bill to give the President the right to practically control the newspaper press of the country by determining what should appear in the papers upon the ground that it violated the constitutional provisions of free speech and free press. The bill was defeated.

The covenant of the League of Nations: This was a treaty of practically all of the nations of the world providing for the protection of the independence and territorial integrity of those nations, by force if necessary. Senator SHIELDS, standing for the traditional policy of the United States against intervention in foreign affairs and entangling alliances likely to embroil this country in war, opposed and voted against the United States becoming a member of the league. His position was that it was not a political or partisan measure and, there being no pronouncement of the Democratic Party and no campaign pledges upon his part, it was his duty as a Senator under the Constitution to determine the questions involved according to his best judgment in the interest of the people of the United States, as set forth in his speeches upon the subject. The Senator in his speeches when the covenant was before the Senate, November, 1919, declared in favor of a World Court and conferences of the nations of the world, with proper safeguards, for the promotion of peace and the prevention of war, and now favors the United States adhering to the Permanent Court of International Justice.

The Armenian mandate: President Wilson recommended that the United States take a mandate for Armenia which involved the sending of an army of 75,000 men, at a cost of $250,000,000 per annum, into the heart of the Turkish Empire to aid the Armenians in their struggle for independence. Senator SHIELDS, with 22 other Democratic Senators, voted against it, as it was then probable, and subsequent events have shown certain, that the army would have to be increased to 250,000 men, at the cost of more than a billion dollars, with a doubtful result.

The four-power pact: This is a treaty negotiated by President Harding with Great Britain, France, and Japan, practically obligating these powers and the United States to protect the possessions and interests of each other in the Pacific Ocean. Senator SHIELDS opposed it, although the Senate adopted a reservation in favor of the United States, believing it to be an entangling alliance likely to embroil the United States in a foreign war for the interest of other nations, and voted against it.

The McCumber-Fordney protective tariff law: This is a political measure passed by the Republican administration and the direct cause for the low prices for products and high cost of all supplies now oppressing the farmers of the country. Senator SHIELDS opposed and voted against it.

He voted against all other political legislation brought before the Congresses by the Republican Party under the administrations of President Harding and President Coolidge.

The adjusted compensation legislation: Senator SHIELDS opposed this legislation upon the ground that it would increase the public indebtedness four to five billion dollars, and thus greatly increase the war taxes under which the American people are now staggering, producing suffering and embarrassment to the business and agricultural interests of the country.

The case of Senator Newberry: Senator Newberry's right to a seat in the Senate was challenged because of excessive expenditure of money in obtaining the nomination in the Republican primary. The expenditures amounted to about $200,000, chiefly used in purchasing and subsidizing newspapers, which tended to defeat free elections and the untrammeled choice of the people. Senator SHIELDS favored unseating and expelling Newberry from the Senate, and so voted on the resolution concerning his right to a seat in the Senate.

The Dyer antilynching bill: This was a bill extending the jurisdiction of the Federal courts in certain criminal cases, which would have aroused racial prejudice, and was unconstitutional because invading the reserved powers of the States. It was chiefly intended and by its terms operated in favor of criminals and prejudicial to the white people of the South. Senator SHIELDS opposed it in the Committee on the Judiciary and in the Senate, and it was defeated.

The judges' bill: This was a bill, as originally drafted, creating 18 United States district judges unassigned to any special district, but to be sent in his discretion by the Chief Justice to any district in the United States. Senator SHIELDS opposed the bill in the Committee on the Judiciary and as amended in the Senate, charging that it was a political measure creating unnecessary offices upon the eve of an election, and was subservient and destructive of an independent and untrammelled judiciary. His speech upon the bill was exhaustive and outstanding in the defense of the independence and integrity of the judges and courts of the country.

The above statement embraces most of the great laws which have been passed by the Congress since Senator SHIELDS has been a Member of the United States Senate, and which he supported or opposed as above stated. It would be impossible in the compass of this statement to set forth all of the laws that were enacted during those years.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker of the House had signed enrolled bills and joint resolutions of the following titles, and they were thereupon signed by the President pro tempore:

S. 113. An act changing the name of Keokuk Street, in the county of Washington, D. C., to Military Road;

S. 588. An act for the relief of Daniel A. Spaight and others;

S. 668. An act to establish the Utah National Park, in the State of Utah;

S. 697. An act providing for the disposal of certain lands on Crooked and Pickerel Lakes, Mich., and for other purposes;

S. 699. An act authorizing the addition of certain lands to the Medicine Bow National Forest, Wyo., and for other purposes;

S. 790. An act for the establishment of a Federal industrial institution for women, and for other purposes;

S. 1192. An act to confer jurisdiction upon the United States District Court, Northern District of California, to adjudicate the claims of American citizens;

S. 1203. An act to amend an act entitled "An act authorizing an appropriation to meet proportionate expenses of providing a drainage system for Piute Indian lands in the State of Nevada within the Newlands reclamation project of the Reclamation Service," approved February 14, 1923;

S. 1308. An act authorizing an appropriation to enable the Secretary of the Interior to purchase a tract of land, with sufficient water right attached, for the use and occupancy of the Temoak Band of homeless Indians, located at Ruby Valley, Nev.;

S. 1309. An act for the relief of settlers and town-site occupants of certain lands in the Pyramid Lake Indian Reservation, Nev.;

S. 1376. An act to provide for the equitable distribution of captured war devices and trophies to the States and Territories of the United States and to the District of Columbia;

S. 1614. An act to repeal an act authorizing the construction of bridges across the Great Kanawha River;

S. 1785. An act to amend an act entitled "An act for the regulation of the practice of dentistry in the District of Columbia, and for the protection of the people from empiricism in relation thereto," approved June 6, 1892, and acts amendatory thereof;

S. 1942. An act to protect navigation from obstruction and injury by preventing the discharge of oil into the coastal navigable waters of the United States;

S. 1987. An act accepting certain tracts of land in the city of Medford, Jackson County, Oreg.;

S. 2159. An act authorizing annual appropriations for the maintenance of that portion of Gallup-Durango highway across the Navajo Indian Reservation, and providing reimbursement therefor;

S. 2236. An act to designate the time and place of holding terms of the United States district court in the first division of the district at Kansas City;

S. 2572. An act to purchase grounds, erect and repair buildings for customhouses, offices, and warehouses in Porto Rico;

S. 2573. An act to amend and reenact sections 20, 22, and 50 of the act of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes";

S. 2694. An act to enable the trustees of Howard University to develop an athletic field and gymnasium project, and for other purposes;

S. 2699. An act to amend an act creating the Custer State Park game sanctuary in the State of South Dakota;

S. 2704. An act to amend paragraph (3), section 16, of the interstate commerce act;

S. 2761. An act to authorize the withdrawal of lands for the protection of antelope and other game animals and birds;

S. 2797. An act to authorize the payment of claims under the provisions of the so-called war minerals relief act;

S. 2799. An act to provide for quarters, fuel, and light for employees of the Indian field service;

S. 2834. An act relating to the American Academy in Rome;

S. 2887. An act authorizing transfer of certain abandoned or unused lighthouse reservation lands by the United States to the State of New York for park purposes;

S. 2932. An act to quiet the title to lands within Pueblo Indian land grants, and for other purposes;

S. 3023. An act designating the State of New Mexico as a judicial district, fixing the time and place for holding terms of court therein, and for other purposes;

S. 3024. An act providing for the acquirement by the United States of privately owned lands within Rio Arriba and Taos Counties, N. Mex., known as the Las Trampas grant, by exchanging therefor timber within the exterior boundaries of any national forest situated within the State of New Mexico;

S. 3093. An act granting certain public lands to the city of Phoenix, Ariz., for municipal, park, and other purposes;

S. 3111. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Stockbridge Indians may have against the United States, and for other purposes;

S. 3116. An act to authorize the Choctaw, Oklahoma & Gulf Railway Co. and the Chicago, Rock Island & Pacific Railway Co. to construct a bridge across the White River, near the city of De Valls Bluff, Ark.;

S. 3188. An act for the abandonment of a portion of the present channel of the south branch of the Chicago River;

S. 3220. An act authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late George Mauger Burklin and the remains of the late Anton Lerch Burklin from Glenwood Cemetery, District of Columbia, to Fort Lincoln, Prince Georges County, Md.;

S. 3244. An act granting the consent of Congress to the Board of Supervisors of Hinds County, Miss., to construct a bridge across the Pearl River in the State of Mississippi;

S. 3263. An act to provide for the inspection of the battle fields in and around Fredericksburg and Spotsylvania Court House, Va.;

S. 3269. An act to amend an act regulating the height of buildings in the District of Columbia, approved June 1, 1910;

S. 3324. An act to amend section 5 of the trade-mark act of 1905, as amended, relative to the unauthorized use of portraits;

S. 3355. An act granting the consent of Congress to the counties of Marion and Florence, in the State of South Carolina, to construct a bridge across the Peedee River at or near Savage Landing, S. C.;

S. 3380. An act to grant the consent of Congress to the Cincinnati, New Orleans & Texas Pacific Railway Co. to construct, maintain, and operate a bridge across the Cumberland River, in the county of Pulaski, State of Kentucky, near the town of Burnside;

S. 3420. An act granting the consent of Congress to the construction, maintenance, and operation by the Denver & Rio Grande Western Railroad Co., its successors and assigns, of a line of railroad across the southwesterly portion of the Fort Logan Military Reservation in the State of Colorado;

S. 3434. An act for the protection of the northern Pacific halibut fishery;

H. R. 7079. An act prohibiting the importation of crude opium for the purpose of manufacturing heroin;

H. R. 7731. An act authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation;

S. J. Res. 43. Joint resolution in relation to a monument to commemorate the services and sacrifices of the women of the United States of America, its insular possessions, and the District of Columbia in the World War;

S. J. Res. 73. Joint resolution providing for the appointment of a commission for the purpose of erecting in Potomac Park, in the District of Columbia, a memorial to those members of the armed forces of the United States from the District of Columbia who served in the Great War;

S. J. Res. 90. Joint resolution providing an extension of time for payment by entrymen of lands on the Fort Assiniboine abandoned military reservation, in the State of Montana;

S. J. Res. 103. Joint resolution authorizing expenditure of the Fort Peck 4 per cent fund now standing to the credit of the Fort Peck Indians, of Montana, in the Treasury of the United States;

S. J. Res. 106. Joint resolution authorizing the erection on public grounds in the city of Washington, D. C., of an equestrian statue of General San Martin, which the people of Argentina have presented to the United States;

S. J. Res. 114. Joint resolution authorizing an investigation of the proposed Casper-Alcova irrigation project, Natrona County, Wyo.; the Deschutes project in the State of Oregon; and the Southern Lassen Irrigation project, in Lassen County, Calif.;

S. J. Res. 115. Joint resolution to provide for the free transmission through the mails of certain publications for the blind;

S. J. Res. 127. Joint resolution to provide that the powers and duties conferred upon the Governor of Alaska under existing law for the protection of wild game animals and wild birds in Alaska be transferred to and be exercised by the Secretary of Agriculture;

S. J. Res. 137. Joint resolution in respect of salaries of original appointees to the Board of Tax Appeals;

S. J. Res. 146. Joint resolution to amend section 13 of the act entitled "An act to provide for the classification of civilian positions within the District of Columbia and the field service"; and

H. J. Res. 283. Joint resolution to permit to remain within the United States certain aliens in excess of quotas fixed under authority of the immigration act of May 19, 1921.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

Mr. WATSON, from the Committee on Enrolled Bills, reported that on June 7, 1924, that committee presented to the President of the United States enrolled bills and joint resolutions of the following titles:

S. 113. An act changing the name of Keokuk Street, in the county of Washington, D. C., to Military Road;

S. 588. An act for the relief of Daniel A. Spaight and others;

S. 668. An act to establish the Utah National Park in the State of Utah;

S. 697. An act providing for the disposal of certain lands on Crooked and Pickerel Lakes, Mich., and for other purposes;

S. 699. An act authorizing the addition of certain lands to the Medicine Bow National Forest, Wyo., and for other purposes;

S. 790. An act for the establishment of a Federal industrial institution for women, and for other purposes;

S. 1192. An act to confer jurisdiction upon the United States district court, northern district of California, to adjudicate the claims of American citizens;

S. 1203. An act to amend an act entitled "An act authorizing an appropriation to meet proportionate expenses of providing a drainage system for Piute Indian lands in the State of Nevada, within the Newlands reclamation project of the Reclamation Service," approved February 14, 1923;

S. 1308. An act authorizing an appropriation to enable the Secretary of the Interior to purchase a tract of land, with sufficient water right attached, for the use and occupancy of the Temoak Band of homeless Indians, located at Ruby Valley, Nev.;

S. 1309. An act for the relief of settlers and town-site occupants of certain lands in the Pyramid Lake Indian Reservation, Nev.;

S. 1376. An act to provide for the equitable distribution of captured war devices and trophies to the States and Territories of the United States and to the District of Columbia;

S. 1614. An act to repeal an act authorizing the construction of bridges across the Great Kanawha River;

S. 1785. An act to amend an act entitled "An act for the regulation of the practice of dentistry in the District of Columbia, and for the protection of the people from empiricism in relation thereto," approved June 6, 1892, and acts amendatory thereof;

S. 1942. An act to protect navigation from obstruction and injury by preventing the discharge of oil into the coastal navigable waters of the United States;

S. 1987. An act accepting certain tracts of land in the city of Medford, Jackson County, Oreg.;

S. 2159. An act authorizing annual appropriations for the maintenance of that portion of Gallup-Durango Highway across the Navajo Indian Reservation and providing reimbursement therefor;

S. 2236. An act to designate the time and place of holding terms of the United States district court in the first division of the district at Kansas City;

S. 2572. An act to purchase grounds, erect, and repair buildings for customhouses, offices, and warehouses in Porto Rico;

S. 2573. An act to amend and reenact sections 20, 22, and 50 of the act of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes";

S. 2694. An act to enable the trustees of Howard University to develop an athletic field and gymnasium project, and for other purposes;

S. 2699. An act to amend an act creating the Custer State Park game sanctuary in the State of South Dakota;

S. 2704. An act to amend paragraph (3), section 16, of the interstate commerce act;

S. 2761. An act to authorize the withdrawal of lands for the protection of antelope and other game animals and birds;

S. 2797. An act to authorize the payment of claims under the provisions of the so-called war minerals relief act;

S. 2799. An act to provide for quarters, fuel, and light for employees of the Indian field service;

S. 2834. An act relating to the American Academy in Rome;

S. 2887. An act authorizing transfer of certain abandoned or unused lighthouse reservation lands by the United States to the State of New York for park purposes;

S. 2932. An act to quiet the title to lands within Pueblo Indian land grants, and for other purposes;

S. 3023. An act designating the State of New Mexico as a judicial district, fixing the time and place for holding terms of court therein, and for other purposes;

S. 3024. An act providing for the acquirement by the United States of privately owned lands within Rio Arriba and Taos Counties, N. Mex., known as the Las Trampas grant, by exchanging therefor timber, within the exterior boundaries of any national forest situated within the State of New Mexico;

S. 3093. An act granting certain public lands to the city of Phoenix, Ariz., for municipal, park, and other purposes;

S. 3111. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Stockbridge Indians may have against the United States, and for other purposes;

S. 3116. An act to authorize the Choctaw, Oklahoma & Gulf Railway Co. and the Chicago, Rock Island & Pacific Railway Co. to construct a bridge across the White River near the city of De Valls Bluff, Ark.;

S. 3188. An act for the abandonment of a portion of the present channel of the south branch of the Chicago River;

S. 3220. An act authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late George Mauger Burklin and the remains of the late Anton Lerch Burklin from Glenwood Cemetery, District of Columbia, to Fort Lincoln, Prince Georges County, Md.;

S. 3244. An act granting the consent of Congress to the Board of Supervisors of Hinds County, Miss., to construct a bridge across the Pearl River in the State of Mississippi;

S. 3263. An act to provide for the inspection of the battle fields in and around Fredericksburg and Spotsylvania Court House, Va.;

S. 3269. An act to amend an act regulating the height of buildings in the District of Columbia, approved June 1, 1910;

S. 3324. An act to amend section 5 of the trade-mark act of 1905, as amended, relative to the unauthorized use of portraits;

S. 3355. An act granting the consent of Congress to the counties of Marion and Florence, in the State of South Carolina, to construct a bridge across the Peedee River at or near Savage Landing, S. C.;

S. 3380. An act to grant the consent of Congress to the Cincinnati, New Orleans & Texas Pacific Railway Co. to construct, maintain, and operate a bridge across the Cumberland River, in the county of Pulaski, State of Kentucky, near the town of Burnside;

S. 3420. An act granting the consent of Congress to the construction, maintenance, and operation by the Denver & Rio Grande Western Railroad Co., its successors and assigns, of a line of railroad across the southwesterly portion of the Fort Logan Military Reservation in the State of Colorado;

S. 3434. An act for the protection of the northern Pacific halibut fishery;

S. J. Res. 43. Joint resolution in relation to a monument to commemorate the services and sacrifices of the women of the United States of America, its insular possessions, and the District of Columbia in the World War;

S. J. Res. 73. Joint resolution providing for the appointment of a commission for the purpose of erecting in Potomac Park, in the District of Columbia, a memorial to those members of the armed forces of the United States from the District of Columbia who served in the Great War;

S. J. Res. 90. Joint resolution providing an extension of time for payment by entrymen of lands on the Fort Assiniboine abandoned military reservation in the State of Montana;

S. J. Res. 103. Joint resolution authorizing expenditure of the Fort Peck 4 per cent fund now standing to the credit of the Fort Peck Indians of Montana in the Treasury of the United States;

S. J. Res. 106. Joint resolution authorizing the erection on public grounds in the city of Washington, D. C., of an equestrian statue of General San Martin which the people of Argentina have presented to the United States;

S. J. Res. 114. Joint resolution authorizing an investigation of the proposed Casper-Alcova irrigation project, Natrona County, Wyo.; the Deschutes project in the State of Oregon; and the Southern Lassen irrigation project in Lassen County, Calif.;

S. J. Res. 115. Joint resolution to provide for the free transmission through the mails of certain publications for the blind;

S. J. Res. 127. Joint resolution to provide that the powers and duties conferred upon the Governor of Alaska under existing law for the protection of wild game animals and wild birds in Alaska be transferred to and be exercised by the Secretary of Agriculture;

S. J. Res. 137. Joint resolution in respect of salaries of original appointees to the Board of Tax Appeals; and

S. J. Res. 146. Joint resolution to amend section 13 of the act entitled "An act to provide for the classification of civilian positions within the District of Columbia and the field service."

SPANISH SPRINGS IRRIGATION PROJECT, NEVADA

Mr. PITTMAN. Mr. President, I realize the seriousness of discussing a matter of this kind while there is pending a motion to adopt a conference report, and I would not do it on any ground of loss of legislation for my State. The only thing that urges me to do it is because, in my opinion, a great wrong has been done by legislators.

When this matter of reclamation first came up, it came up in the Interior Department matters several months ago. At that time there were these items for which we were seeking to obtain appropriations—the Spanish Springs project, part of the Newlands project, the Strawberry Valley project, now called Salt Basin; the Owyhee project, the Warm Springs project, the Yakima irrigation district project, and so on; but they were postponed, mind you, until the fact finding commission which had been appointed by the Secretary of the Interior could make their recommendations on the matter.

They made their recommendations, and what were their recommendations? Their recommendations were that the department should go on with the Newlands project, and that they should investigate the other projects before they went on with them.

What happened? The Budget makes an estimate for the Newlands project, and it does not make an estimate for the other projects; and then what happens in Congress? What a strange situation! The Newlands project is wiped out, and yet it is the only project in the group recommended by the fact finding commission and the only one estimated for by the Budget; and what happens in Utah?

Mr. WARREN. Mr. President, the Senator is mistaken about that. There were other items that the Budget recommended.

Mr. PITTMAN. Oh, well, I am talking about these things. What happened in Utah? Here is the Salt Lake Basin irrigation project. They changed the name of it. It used to be called the Strawberry Valley project. That is marked out in the bill. I think they ought to change the name of it.

For continued investigations, continuation of construction, and incidental operations, $1,500,000.

And yet the fact finding commission refused to recommend it, and the Budget would not estimate for it. Oh, that is in there—why, of course.

How about Oregon?

Owyhee irrigation project, Oregon: For continued investigations, commencement of construction, and incidental operations, $1,250,000.

The fact finding commission appointed by a Republican Secretary of the Interior would not recommend continuation of that project, and yet it is in there. The Budget did not estimate for it.

Further, how about Oregon?

Warm Springs (Vale) irrigation project, Oregon: For continued investigations and for first payment toward purchase of an interest in the Warm Springs reservoir, $250,000.

Mr. WARREN. Mr. President, will the Senator allow me to say just a word? All of those amounts are cut down to a quarter, and Warm Springs, just spoken of, was cut out altogether.

Mr. PITTMAN. If they were cut down to the estimate, there would not be anything there.

Mr. WARREN. I say, that one was cut out entirely.

Mr. PITTMAN. I understand; but why did you cut out Spanish Springs?

Washington State:

Yakima irrigation project, Washington: For continued investigations, commencement of construction of the Kittitas unit, and incidental operations, $1,500,000.

The fact finding commission would not recommend it, and the Budget never estimated for it, and yet it is in this bill.

Oh, they know; the managers on the part of the Senate understand. This is no surprise to them. The Members of the Senate understood it. Now they come in here, at the last hour, and threaten me by saying, "There is important legislation in this bill, and you will have to swallow it." I told you I would not swallow it, and I will not. Call your extra session if you want to. I will vote for it at any time. I will vote to keep you here if you want to stay. Suppose you put in a concurrent resolution to stay another week and fight this thing out, and see how it goes.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Idaho?

Mr. PITTMAN. I do.

Mr. BORAH. I do not want to take the Senator off the floor.

Mr. PITTMAN. I yield for a question. May I yield for a question and not lose the floor?

The PRESIDING OFFICER. The Senator may yield for a question and not lose the floor. If he yields otherwise, and the point is made, he will lose the floor.

Mr. PITTMAN. I yield only for a question.

Mr. BORAH. I am afraid I can not put it.

Mr. PITTMAN. I am very sorry.

Now, let us read what the fact finding commission has to say about these things. I remember when I went before the Committee on Appropriations in January in regard to the Newlands project. We had an estimate for the Newlands project in January, and they did not have any for theirs in January, and they have not got it yet; so they said to us: "Wait; let us see if the fact finding commission do not help us out. It is composed of able men, experts, the present commissioner of irrigation, and others." Then the commission came back, and they turned down these projects. What happened over in the House? You get everything you ask, in spite of not having an estimate, in spite of not having a recommendation, and turn down the only thing that was recommended and the only thing that was estimated for. Then they come over here at the last minute and talk to me about how I am going to defeat a big bill. Well, I tell you I am going to defeat it unless you put back the Spanish Springs appropriation, and while I am getting ready to defeat it I want you to get all the information that is here that you did not have before.

Mr. WARREN. Mr. President, I am sure the Senator does not want——

Mr. PITTMAN. I can not yield to the Senator for a speech. I will yield to the Senator for a question.

Mr. WARREN. But the Senator's statement is not true.

Mr. PITTMAN. Well, the record sustains me. The Senator can answer it later on. I will read something to him, and see how correct that is.

I am going to read from the statement of H. M. Lord, Director of the Bureau of the Budget, and see what he has to say about these projects. He quotes from the fact finding commission, as follows:

"As to the proposed new projects, Owyhee, Vale, Salt Lake Basin, and Kittitas, the committee has not sufficient information upon which to make specific recommendations. Attention is called to the fact that the estimated costs of construction are nearly all in excess of $120 an acre. The committee is of the opinion, based upon the reports of annual production from lands now under irrigation, that projects requiring such acre cost as above suggested should be constructed only after it is clearly shown that the lands, when irrigated, can produce annual crop values sufficient to enable the settlers to repay costs from production, and within a reasonable time.

"It is understood that the above projects are those which offer the most favorable conditions for present investigation, and hence the committee is of the opinion that the appropriations therefor should be authorized, but with the provision that further investigation should be made of their feasibility, and that, if finally selected, they should be constructed and developed in accordance with the general resolutions of this committee."

The above estimate specifically provides for the investigation of these projects, together with the Casper-Alcova project in Wyoming. Under the provisions of the estimates the cost of the investigation will be reimbursed from the reclamation fund in the case of any project being adopted for construction by the United States.

And then what do they do? The Budget recommends $125,000 to investigate these several projects, and the House appropriates two or three million dollars for them. That is what happens.

Mr. PHIPPS. Mr. President, will the Senator yield for a question?

Mr. PITTMAN. No; I can not yield for a question.

The PRESIDENT pro tempore. The Senator declines to yield.

Mr. PHIPPS. My question is, will there be opportunity before 7 o'clock to present a request for unanimous consent?

Mr. PITTMAN. I do not know; it all depends upon the action of the Senate as to whether there will be any opportunity. I do not desire to lose the floor; that is the only thing.

As a matter of fact, the whole proposition is surrounded with justifiable suspicion. I do not wish to point my finger at any particular Senator or Congressman or individual, nor do I like to look at them even; but it is a strange situation here that a party that brags of enacting a budget system for the purpose of economy should find the Budget recommending $125,000 to investigate projects that the fact finding commission says are doubtful as to whether they will pay, and yet appropriate three or four million dollars for them outright and cut out a project that they recommended should be developed, and estimated $200,000 with which to commence it.

That kind of thing will not go. You can not legislate in that way. You had better find out that you can not have legislation by committees in this body. I have said that once before. I had to kill a naval bill at the last session, and it becomes my unfortunate lot now, for the purpose of making committees do their duty, to kill this bill. I hate to kill it. It has in it a great many things of great merit for my State and for the whole West—in fact, for the whole country. It is not my fault. You can not lay it to my door. For the purpose of cutting out an appropriation of $200,000 that was recommended by your fact finding commission, for the purpose of cutting out $200,000 for one of the oldest projects in this country, estimated for and recommended by the Budget Bureau, you are willing to take a chance on sacrificing this bill. You knew well enough when you did it that you would sacrifice this bill. It is simply a question of whether you desire to kill this bill or not.

Mr. WARREN. Mr. President, this matter is still in disagreement, and the Senator is using the time to prevent us from coming to any further agreement.

Mr. PITTMAN. What do you want to do with it? Do you want to take it back?

I ask unanimous consent that this conference report be referred back to the committee with instructions that they insist upon the item on page 31 for the Spanish Springs Reservoir.

Mr. WARREN. The Senator knows very well that that can not be done in the time we have now. He has not even allowed it to be read.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Nevada?

Mr. WARREN. I simply say that it is entirely useless, but I am willing that that should be done if that is the way in which the Senator desires to kill the bill.

Mr. PITTMAN. It is unanimous consent that I ask.

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Is there objection?

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. The Senator from Utah.

Mr. SMOOT. The Senator from Nevada evidently referred to me as one of the conferees on this bill. I judge that not by the direct use of names but by inference, and from the statement he made I have not any doubt about it.

Mr. PITTMAN. I did not mean the Senator at all as a conferee. I may have included him with other persons.

Mr. SWANSON. Mr. President, is it impossible to get this bill through?

The PRESIDENT pro tempore. This question is not debatable.

Mr. SWANSON. I am making an inquiry in connection with the unanimous-consent agreement that is proposed. Is it impossible to get this bill through? Is it impossible to get it through if it goes back?

Mr. WARREN. We will undertake it, but——

Mr. SWANSON. If it is impossible, I am going to object to any unanimous-consent agreement.

Mr. WARREN. Not if it goes back, but we will have to move here to get an agreement.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent request of the Senator from Nevada? The Chair hears no objection, and the conference report is recommitted to the conference committee.

Mr. STANFIELD. Mr. President——

The PRESIDENT pro tempore. The Senator from Oregon.

Mr. STANFIELD. I ask unanimous consent that on the calendar day of December 11, 1924, at 2 o'clock p. m., the civil service retirement bill be made the unfinished business.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent request of the Senator from Oregon?

Mr. PITTMAN. What is the request? I make the point of order that I can not hear what is going on.

Mr. STANFIELD. To make the civil service retirement bill the unfinished business.

Mr. PHIPPS rose.

Mr. PITTMAN. Has the Senator from Colorado made a request?

Mr. PHIPPS. I am trying to get recognition for the purpose of presenting the war minerals relief bill, to get an agreement to an amendment made by the House.

Mr. PITTMAN. I yield to the Senator for that purpose; but I still have the floor.

The PRESIDENT pro tempore. The Senator from Nevada, the Chair understands, yielded the floor.

Mr. PITTMAN. I yield to the Senator from Colorado.

Mr. PHIPPS. This is the third time I have asked for this unanimous consent, and now I have the permission of the Senator from Nevada.

The PRESIDENT pro tempore. The Chair understands that the Senator from Nevada yielded the floor.

Mr. CURTIS. Let us have order.

The PRESIDENT pro tempore. Nothing will be done until Senators come to order.

Mr. PITTMAN. Is it the ruling of the Chair that a request for unanimous consent takes a Senator from the floor?

The PRESIDENT pro tempore. The Chair observed the Senator from Nevada, and after the unanimous consent had been granted, determined that he had yielded the floor.

Mr. PITTMAN. That is perfectly agreeable to me, if the Chair has so ruled.

Mr. PHIPPS. The Chair then recognized the Senator from Oregon.

The PRESIDENT pro tempore. The Senator from Oregon has made a request for unanimous consent. Is there objection to his request?

Mr. KING. I object.

The PRESIDENT pro tempore. Objection is made. Now the Senator from Colorado is recognized.

## PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his Secretaries, announced that the President had approved and signed acts and joint resolutions of the following titles:

On June 6, 1924:

S. 381. An act to amend section 2 of the act entitled "An act to provide for stock-raising homesteads, and for other purposes," approved December 29, 1916 (39 Stat. L. p. 862);

S. 709. An act for the relief of the Commercial Pacific Cable Co.;

S. 2169. An act to amend in certain particulars the national defense act of June 3, 1916, as amended, and for other purposes;

S. 2929. An act granting the consent of Congress to the States of Georgia and Florida, through their respective highway departments, to construct a bridge across the St. Marys River at or near Wilds Landing, Fla.; and

S. J. Res. 142. Joint resolution providing for the United States Government to have representation at the celebration of the centennial of the first meeting of the Legislative Council of the Territory of Florida.

On June 7, 1924:

S. 790. An act for the establishment of a Federal Industrial Institution for Women, and for other purposes;

S. 966. An act for the continuance of construction work on the San Carlos Federal irrigation project in Arizona, and for other purposes; and

S. 1174. An act authorizing the Secretary of the Interior to investigate and report to Congress the facts in regard to the claims of certain members of the Sioux Nation of Indians for damages occasioned by the destruction of their horses.

On June 7, 1924 (at the Capitol):

S. J. Res. 43. Joint resolution in relation to a monument to commemorate the services and sacrifices of the women of the United States of America, its insular possessions, and the District of Columbia in the World War;

S. J. Res. 73. Joint resolution providing for the appointment of a commission for the purpose of erecting in Potomac Park, in the District of Columbia, a memorial to those members of the armed forces of the United States from the District of Columbia who served in the Great War;

S. J. Res. 90. Joint resolution providing an extension of time for payment by entrymen of lands on the Fort Assiniboine abandoned military reservation, in the State of Montana;

S. J. Res. 103. Joint resolution authorizing expenditure of the Fort Peck 4 per cent fund now standing to the credit of the Fort Peck Indians of Montana in the Treasury of the United States;

S. J. Res. 106. Joint resolution authorizing the erection on public grounds in the city of Washington, D. C., of an equestrian statue of General San Martin, which the people of Argentina have presented to the United States;

S. J. Res. 114. Joint resolution authorizing an investigation of the proposed Casper-Alcova irrigation project, Natrona County, Wyo.; the Deschutes project in the State of Oregon; and the Southern Lassen irrigation project in Lassen County, Calif.;

S. J. Res. 115. Joint resolution to provide for the free transmission through the mails of certain publications for the blind;

S. J. Res. 127. Joint resolution to provide that the powers and duties conferred upon the Governor of Alaska under existing law for the protection of wild game animals and wild birds in Alaska be transferred to and be exercised by the Secretary of Agriculture;

S. J. Res. 137. Joint resolution in respect of salaries of original appointees to the Board of Tax Appeals;

S. J. Res. 146. Joint resolution to amend section 13 of the act entitled "An act to provide for the classification of civilian positions within the District of Columbia and the field service."

S. 113. An act changing the name of Keokuk Street, in the county of Washington, D. C., to Military Road;

S. 588. An act for the relief of Daniel A. Spaight and others;

S. 668. An act to establish the Utah National Park in the State of Utah;

S. 697. An act providing for the disposal of certain lands on Crooked and Pickerel Lakes, Mich., and for other purposes;

S. 699. An act authorizing the addition of certain lands to the Medicine Row National Forest, Wyo., and for other purposes;

S. 1192. An act to confer jurisdiction upon the United States District Court, Northern District of California, to adjudicate the claims of American citizens;

S. 1203. An act to amend an act entitled "An act authorizing an appropriation to meet proportionate expenses of providing a drainage system for Piute Indian lands in the State of Nevada within the Newlands reclamation project of the Reclamation Service," approved February 14, 1923;

S. 1308. An act authorizing an appropriation to enable the Secretary of the Interior to purchase a tract of land, with sufficient water right attached, for the use and occupancy of the Temoak Band of homeless Indians, located at Ruby Valley, Nev.;

S. 1309. An act for the relief of settlers and town-site occupants of certain lands in the Pyramid Lake Indian Reservation, Nev.;

S. 1376. An act to provide for the equitable distribution of captured war devices and trophies to the States and Territories of the United States and to the District of Columbia;

S. 1614. An act to repeal an act authorizing the construction of bridges across the Great Kanawha River;

S. 1785. An act to amend an act entitled "An act for the regulation of the practice of dentistry in the District of Columbia, and for the protection of the people from empiricism in relation thereto," approved June 6, 1892, and acts amendatory thereof;

S. 1942. An act to protect navigation from obstruction and injury by preventing the discharge of oil into the coastal navigable waters of the United States;

S. 1987. An act accepting certain tracts of land in the city of Medford, Jackson County, Oreg.;

S. 2159. An act authorizing annual appropriations for the maintenance of that portion of Gallup-Durango Highway across the Navajo Indian Reservation and providing reimbursement therefor;

S. 2236. An act to designate the time and place of holding terms of the United States district court in the first division of the district at Kansas City;

S. 2257. An act to consolidate, codify, revise, and reenact the laws affecting the establishment of the United States Veterans' Bureau and the administration of the war risk insurance act as amended, and the vocational rehabilitation act as amended;

S. 2572. An act to purchase grounds, erect and repair buildings for customhouses, offices, and warehouses in Porto Rico;

S. 2573. An act to amend and reenact sections 20, 22, and 50 of the act of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes";

S. 2694. An act to enable the trustees of Howard University to develop an athletic field and gymnasium project, and for other purposes;

S. 2699. An act to amend an act creating the Custer State Park game sanctuary in the State of South Dakota;

S. 2704. An act to amend paragraph (3), section 16, of the interstate commerce act;

S. 2761. An act to authorize the withdrawal of lands for the protection of antelope and other game animals and birds;

S. 2797. An act to authorize the payment of claims under the provisions of the so-called war minerals relief act;

S. 2799. An act to provide for quarters, fuel, and light for employees of the Indian field service;

S. 2834. An act relating to the American Academy in Rome;

S. 2887. An act authorizing transfer of certain abandoned or unused lighthouse reservation lands by the United States to the State of New York for park purposes;

S. 2932. An act to quiet the title to lands within Pueblo Indian land grants, and for other purposes;

S. 3023. An act designating the State of New Mexico as a judicial district, fixing the time and place for holding terms of court therein, and for other purposes;

S. 3024. An act providing for the acquirement by the United States of privately owned lands within Rio Arriba and Taos Counties, N. Mex., known as the Las Trampas grant, by exchanging therefor timber within the exterior boundaries of any national forest situated within the State of New Mexico;

S. 3093. An act granting certain public lands to the city of Phoenix, Ariz., for municipal, park, and other purposes;

S. 3111. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Stockbridge Indians may have against the United States, and for other purposes;

S. 3116. An act to authorize the Choctaw, Oklahoma & Gulf Railway Co. and the Chicago, Rock Island & Pacific Railway Co. to construct a bridge across the White River near the city of De Valls Bluff, Ark.;

S. 3188. An act for the abandonment of a portion of the present channel of the south branch of the Chicago River;

S. 3220. An act authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late George Mauger Burklin and the remains of the late Anton Lerch Burklin from Glenwood Cemetery, District of Columbia, to Fort Lincoln, Prince Georges County, Md.;

S. 3244. An act granting the consent of Congress to the Board of Supervisors of Hinds County, Miss., to construct a bridge across the Pearl River in the State of Mississippi;

S. 3263. An act to provide for the inspection of the battle fields in and around Fredericksburg and Spotsylvania Court House, Va.;

S. 3269. An act to amend an act regulating the height of buildings in the District of Columbia, approved June 1, 1910;

S. 3324. An act to amend section 5 of the trade-mark act of 1905, as amended, relative to the unauthorized use of portraits;

S. 3355. An act granting the consent of Congress to the counties of Marion and Florence, in the State of South Carolina, to construct a bridge across the Peedee River at or near Savage Landing, S. C.;

S. 3380. An act to grant the consent of Congress to the Cincinnati, New Orleans & Texas Pacific Railway Co. to construct, maintain, and operate a bridge across the Cumberland River in the county of Pulaski, State of Kentucky, near the town of Burnside;

S. 3420. An act granting the consent of Congress to the construction, maintenance, and operation by the Denver & Rio Grande Western Railroad Co., its successors and assigns, of a line of railroad across the southwesterly portion of the Fort Logan Military Reservation in the State of Colorado; and

S. 3434. An act for the protection of the northern Pacific halibut fishery.

WAR MINERALS RELIEF ACT

Mr. PHIPPS. I ask the Chair to lay before the Senate a message from the House.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives on the bill (S. 2797) to authorize payments of claims under the so-called war minerals relief act.

Mr. PHIPPS. I move that the Senate concur in the House amendments.

Mr. ASHURST. I hope that will be done, Mr. President.

The amendments were concurred in.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Page, its Clerk, announced that the House had passed a joint resolution (H. J. Res. 295) making appropriations for the administration of the World War adjusted compensation act, fiscal year ending June 30, 1925, in which it requested the concurrence of the Senate.

DEFICIENCY APPROPRIATIONS—CONFERENCE REPORT

Mr. WARREN. Mr. President, I move the adoption of the conference report on the second deficiency bill.

Mr. PITTMAN. On what bill? I desire to be heard.

Mr. WARREN. Wait a moment. It is an effort to carry out the Senator's idea.

Mr. CURTIS. Let us have order.

The PRESIDENT pro tempore. If Senators will take their seats, we can have order.

Mr. ROBINSON. I suggest to the Chair that the Chair direct the Sergeant at Arms to restore order in the Chamber and to preserve order. These scenes certainly are not pleasing either to the public or to Senators.

The PRESIDENT pro tempore. The Senator from Nevada asked unanimous consent that this conference report be recommitted to the conferees, and there was no objection, and it was so ordered.

Mr. WARREN. It can not be done until the motion is made, so that the report may be liberated and I can take it back. In order to bring it to a question I move that on the two amendments in disagreement the Senate shall recede. Those amendments are No. 29 and No. 34. That brings the matter before the Senate.

Mr. PITTMAN. Mr. President, there is a unanimous consent which has been agreed to.

The PRESIDENT pro tempore. The Chair is of the opinion that the unanimous-consent agreement involved a reference to the committee in the present condition of the bill.

Mr. PITTMAN. What is the motion of the Senator?

Mr. WARREN. My motion was that we recede on the two amendments still in disagreement, one of which is as to Spanish Springs and the other of which is as to the employment of a director of reclamation.

Mr. PITTMAN. That is, to recede or insist?

Mr. WARREN. I was moving to recede.

Mr. PITTMAN. I desire to be heard on that.

The PRESIDENT pro tempore. The Senator from Nevada is recognized.

Mr. PITTMAN. This is a violation, apparently——

Mr. WARREN. The Senator has the right now to move the other thing.

Mr. PITTMAN. I am not moving anything. I have asked for a unanimous-consent agreement, and I do not consider it has been carried out in the spirit in which it was given.

Mr. WARREN. I have not the papers in my hands, and I am trying to get them.

Mr. PITTMAN. I want to say this, that I tried to treat this matter in all fairness, and at 15 minutes of 7 o'clock I was informed on the floor by the chairman of the committee that they would have time to go back with it, so I asked unanimous consent that the conference report be referred back to the conference committee with instructions that they insist upon this amendment to which I have referred. That was agreed to. Now, the chairman comes back and desires to put it in another phase, and he moves that it be referred back with instructions that the Senate recede from the two Senate amendments, which means that they would do just what they have done, give them up. That is what it means.

Mr. BORAH. Mr. President——

Mr. PITTMAN. I still have the floor, and I can not yield except for a question.

The PRESIDENT pro tempore. The Senator from Nevada has the floor.

Mr. PITTMAN. I do not intend to allow this matter to come to a vote by any subterfuge whatever. This motion that

is offered by the Senator is nothing more nor less than a subterfuge to carry a vote here instructing the conferees to do just what they have already done. That is what it is, to instruct them to recede when they have already receded. It is just another method of getting at the same thing, and it is a subterfuge and a violation of the unanimous-consent agreement we entered into just awhile ago. You could not set that unanimous-consent agreement aside by any motion whatever, if the Senate stands by its rules. You could not set it aside except by another unanimous-consent agreement. The Chair has declared that the agreement is in effect; and if it is in effect, then the conference report is not before the Senate, but is in the possession of the conference committee with instructions of the Senate as to what to do with it. If they are willing to go and do that with it, let them go. If they are not, let them stay. I will proceed to read some of the fact finding commission's report, which I think Senators should hear in this matter.

Mr. BURSUM. Mr. President——

Mr. PITTMAN. I do not yield to the Senator.

Mr. BURSUM. Will the Senator yield to me——

Mr. PITTMAN. I will not yield.

Mr. BURSUM. To make a unanimous-consent request?

Mr. PITTMAN. I will not yield to the Senator for any purpose. That might settle that.

Let me see just exactly how violent is the effort of these legislators to get three or four million dollars for their pet projects which are disapproved by the fact finding commission, and not authorized by the Budget.

I read from the recommendations of the fact finding commission:

> The Newlands project was among those first selected and authorized after the passage of the reclamation law.
>
> The engineering features were carefully considered, the water supply based upon the use of storage in Lake Tahoe, and the agricultural study of soils made in accordance with then known scientific methods. It seemed to offer, climatically, agriculturally, and physically, an opportunity for a successful project.
>
> The original possible area was thought to be about 450,000 acres; that was early reduced to 397,000 acres and later to 206,000 and finally to 73,000, when it was found, as a result of years of legal controversy, that the expected use of the water of Lake Tahoe was not available.

There is still some misunderstanding about the unanimous-consent agreement. The unanimous-consent agreement binds but one amendment, and that is the amendment providing an appropriation for the Spanish Springs project, a division of the Yuma project. The committee is at liberty to do anything they want to do with regard to any other project under the unanimous-consent agreement.

Mr. WARREN. We have seven items there in disagreement. I am perfectly willing to move, if the Senator will permit, that the report shall be adopted with instructions on the two amendments in disagreement that it shall be taken back——

Mr. PITTMAN. No; I will not stand for any substitute like that. This report shall not be acted on in any way until that amendment is included.

Mr. ASHURST. Mr. President, does the Senator yield? I sympathize with the Senator——

Mr. PITTMAN. I refuse to yield at this time.

Mr. ASHURST. I appeal to the Senator to let the bill pass. I am hurt more than he is.

Mr. PITTMAN. I can not yield. Mr. President, it is believed that the——

The PRESIDENT pro tempore (rapping for order). There must be order in the Chamber. The Sergeant at Arms is directed to request persons in the rear of the Chamber to be seated. The business of the Senate will be suspended until that order is enforced. [After a pause.] The Senator from Nevada will proceed.

Mr. PITTMAN. I can say to the conference committee that they have full power under the unanimous-consent agreement and have had for the last 10 minutes. It allows them to go back and do what they please with the conference report except with regard to the one amendment. If they did not have their minds made up to kill the amendment, they would do that. I say that as long as they have got their minds made up to kill that amendment the whole thing will go with it.

Mr. ROBINSON. Mr. President, will the Senator yield to enable me to present a unanimous-consent request?

Mr. PITTMAN. Yes; if I do not lose the floor by doing so.

Mr. ROBINSON. I ask unanimous consent for the present consideration of the joint resolution which just came over from the House of Representatives, providing an appropriation for the payment of the adjusted compensation. It is one of the features, as I take it, in the urgent deficiency appropriation bill, and I am sure no Senator would want to defeat that appropriation.

Mr. SMOOT. It simply provides——

Mr. PITTMAN. If it is unanimously agreed that I do not lose the floor or the right to discuss this motion, I will be happy to yield, and I suppose no one will object to that.

Mr. KING. I should like to hear the resolution read.

Mr. ROBINSON. It would be 7 o'clock before it could be read.

Mr. KING. What is it about?

Mr. REED of Missouri. It provides for the payment of the adjusted compensation. It is one item in this bill.

Mr. ROBINSON. The joint resolution appropriates for the Veterans' Bureau the funds necessary for the immediate use of the Government under the adjusted compensation act.

Mr. BORAH. That, as I understand it, is included in this bill already.

Mr. ROBINSON. It is.

Mr. BORAH. I object to the consideration of it. If it goes through, it will have to go through on this bill. This bill protects the home builders of the West; and if the home builders of the West are not going to have the protection of the Congress, we are not going to vote any more taxes until they have an opportunity to produce so they can pay them. For six months Congress has devoted its time to appropriating money and creating heavier obligations for the taxpayer. Not another dollar, if I can prevent it, until some consideration is given to the producer, the man who must pay these taxes.

The PRESIDENT pro tempore. The Chair lays before the Senate a joint resolution from the House of Representatives.

The joint resolution (H. J. Res. 295) making appropriations for the administration of the World War adjusted compensation act, fiscal year ending June 30, 1925, was read twice by its title.

Mr. PITTMAN. A parliamentary inquiry. What is this?

The PRESIDENT pro tempore. Unanimous consent is asked for the present consideration of the joint resolution.

Mr. BORAH. I object. We will all go down together.

The PRESIDENT pro tempore. The Senator from Idaho objects.

Mr. PITTMAN. Now, Mr. President, I want to say this: I have not had an opportunity to go entirely into this subject, but, nevertheless, I have stated enough of it to show the character of the legislation.

Mr. REED of Missouri. Mr. President, I move that the Senate agree to the House resolution just presented.

Mr. BORAH. Upon that I want to be heard. I do not propose that the man who is struggling to save his home shall be discriminated against any longer.

FINAL ADJOURNMENT

The PRESIDENT pro tempore (Mr. CUMMINS). It is now 7 o'clock, and under the concurrent resolution adopted by the House and the Senate of the United States, the Senate of the first session of the Sixty-eighth Congress stands adjourned without day.

## HOUSE OF REPRESENTATIVES

SATURDAY, *June 7, 1924*

The House met at 11 o'clock a. m.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our blessed Heavenly Father, only through the continuance of Thy mercy are we able to stand in Thy presence. We praise Thee, O God, for Thy marvelous goodness that pours from Thy infinite heart. All the days of our lives Thou hast been with us; we therefore thank Thee. Truly Thou art our God, and we are the people of His pasture. We bless Thee, O Lord, that we are living under such broad skies and in a land so abundant in resources that make a people great. Through love of virtue, zeal for knowledge, by policy and legislation may we pursue the things that make for national righteousness and that edify mankind. Be gracious and merciful unto our President and the Speaker of this Congress. Bless and direct all Members, all officers, all employees, and pages of this House while the intervening months pass by. May no peril befall our dwellings; stay the hand of affliction and keep us in the shadow of Thy presence. With hearts of gladness and with wills to serve help us to lighten life's burden, lift life's load, and brighten life's way, through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

COMPENSATION OF CIVILIAN EMPLOYEES IN THE FIELD SERVICES

Mr. MADDEN. Mr. Speaker, I call up from the Speaker's desk the bill (H. R. 9561) making additional appropriations for the fiscal year ending June 30, 1925, to enable the heads of the several departments and independent establishments to adjust the rates of compensation of civilian employees in certain of the field services, with Senate amendments, and move to concur in the Senate amendments.

The SPEAKER. The gentleman from Illinois calls up the bill (H. R. 9561) to provide for the compensation of certain civilian employees in the field services, with Senate amendments thereto, and moves to concur in the Senate amendments. The Clerk will report the Senate amendments.

The Clerk read the Senate amendments.

Mr. MADDEN. Mr. Speaker, there are two small amendments to correct some mistakes that were made in the compilation of the figures in this bill, and one amendment which provides for an appropriation of $55,000 to protect the fishery activities in Alaska, under an act just passed, but it was too late coming from the Director of the Budget to get into the deficiency bill. I move to concur in the Senate amendments.

The SPEAKER. The question is on agreeing to the Senate amendments.

The Senate amendments were agreed to.

WAR-GRAFT CASES

Mr. HOWARD of Nebraska. Mr. Speaker, on page 8099 of the RECORD it will be observed that I secured unanimous consent that upon the return to the House of the chairman of the Committee on Appropriations, the gentleman from Illinois [Mr. MADDEN], he be given five minutes in which to give me the name of that one person who, as the result of the expenditure of a million dollars of appropriations, had been committed to any Federal penitentiary on the charge of war graft. The chairman of the Committee on Appropriations is now present. I have not bothered him while he was so busy, but he is here now and I ask unanimous consent that he use five minutes at this time to give me the name of any one person in the penitentiary as a result of war-graft prosecution.

Mr. CRAMTON. Mr. Speaker, I observe that the gentleman from Illinois is not present at this moment.

Mr. HOWARD of Nebraska. He was just a moment ago.

Mr. CRAMTON. He is very much occupied with the deficiency appropriation bill.

The SPEAKER. The gentleman from Illinois will have opportunity to accede to the request of the gentleman from Nebraska.

Mr. HOWARD of Nebraska. Do I understand that unanimous consent having been given, I may call upon him for this information upon his return to the Chamber?

The SPEAKER. The gentleman may ask him for it whenever he pleases.

THE REVENUE BILL OF 1924

Mr. TREADWAY. Mr. Speaker, I ask unanimous consent that the remarks of the gentleman from Oregon [Mr. HAWLEY] giving statistical information about the new revenue bill be printed as a public document.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that the remarks of the gentleman from Oregon [Mr. HAWLEY] be printed as a public document. Is there objection?

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed bills of the following title, in which the concurrence of the House of Representatives was requested:

S. 3018. An act to authorize the designation of deputy fiscal or disbursing agents in the Department of Agriculture, stationed outside of Washington; and

S. 3221. An act for the relief of employees of the Bureau of Printing and Engraving who were removed by Executive order of the President dated March 31, 1922.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the amendment of the Senate No. 18 to the bill (H. R. 9429) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1925, and for other purposes.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8839) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes, had agreed to the amendments of the House to the amendments of the Senate Nos. 28, 84, 116, 124, and 166.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 1306. An act for the relief of Henry McGuire;

H. R. 1830. An act for the relief of Charles T. Norman;

H. R. 4088. An act to establish the upper Mississippi River wild life and fish refuge;

H. R. 4830. An act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote the continuous production of timber on lands chiefly suitable therefor;

H. R. 5318. An act to authorize an exchange of lands with the State of Washington;

H. R. 9434. An act granting the consent of Congress to the States of Georgia and Florida, through their respective highway departments, to construct a bridge across the St. Marys River;

H. R. 9457. An act granting the consent of Congress to the States of Alabama and Georgia, through their respective highway departments, to construct and maintain a bridge across the Chattahoochee River at or near Alaga, Ala., connecting Houston County, Ala., and Early County, Ga.;

H. R. 9515. An act granting the consent of Congress to the Delaware State Highway Department to construct a bridge across the canal near Rehoboth, Del.;

H. R. 9477. An act granting the consent of Congress to the counties of Kittitas and Grant, in the State of Washington, to construct a bridge across the Columbia River at or near Vantage Ferry, Wash.;

H. R. 9314. An act to amend section 98 of the Judicial Code;

H. R. 9345. An act granting the consent of Congress for the construction of a bridge across the Ohio River between Vanderburgh County, Ind., and Henderson County, Ky.;

H. R. 9361. An act granting the consent of Congress to the construction of a bridge across the Rio Grande;

H. R. 9402. An act granting the consent of Congress to the Fullerton & Portsmouth Bridge Co. to construct a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky.;

H. R. 9612. An act granting the consent of Congress to the State of Georgia, through its highway department, to construct a bridge across the Oconee River;

H. R. 7731. An act authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation;

H. R. 7998. An act granting public lands to the city of Golden, Colo., to secure a supply of water for municipal and domestic purposes;

House Concurrent Resolution 28

*Resolved by the House of Representatives (the Senate concurring)*, That there be printed and bound the proceedings in Congress, together with the proceedings at the unveiling in Statuary Hall, upon the acceptance of the statue of Sequoyah, presented by the State of Oklahoma, 5,000 copies, of which 1,000 shall be for the use of the Senate and 2,500 for the use of the House of Representatives, and the remaining 1,500 shall be for the use and distribution of the Senators and Representatives in Congress from the State of Oklahoma.

The Joint Committee on Printing is hereby authorized to have the copy prepared for the Public Printer, who shall provide suitable illustrations to be bound with the proceedings.

H. R. 9517. An act granting the consent of Congress to the North Texas Co., of Saint Jo, Tex., a corporation organized under the laws of the State of Texas, to construct a toll bridge across the Red River in the vicinity of Illinois Bend, Tex.;

H. R. 9610. An act granting the consent of Congress to the Board of Supervisors of Lowndes County, Miss., to construct a bridge across Tombigbee River;

H. R. 6972. An act for the relief of William H. Nelson;

H. R. 6950. An act to authorize the incorporated town of Cordova, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in said town of Cordova, Alaska;

H. R. 6255. An act to amend an act entitled "An act to authorize the incorporated town of Ketchikan, Alaska, to issue its bonds in any sum not to exceed $100,000 for the purpose of constructing a schoolhouse in said town and equipping the same," approved February 7, 1920; and

H. R. 6652. An act to authorize the city of Los Angeles, in the State of California, to construct and operate a line of railroad across the Fort MacArthur Military Reservation in the State of California.

PHILIPPINE INDEPENDENCE

Mr. HUDSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the Fairfield bill for independence of the Philippine Islands.

The SPEAKER. Is there objection?

There was no objection.

Mr. HUDSON. Mr. Speaker, it is my desire to address the House on the subject of Philippine independence. I have been much distressed by the inference from some of the discussion on this subject, viz, that the Filipinos have not independence at the present time, that they are more or less in a state of bondage. Nothing is further from the truth, and I am sure it is not the desire of the official representatives to give such an impression. In fact, the only real independence the islands have experienced has been in the last 25 years since they came into the possession of the United States. Certainly in the previous 400 years during which they were under the domination of Spain they enjoyed little freedom of any kind. There is a great difference between independence and national autonomy. It is the latter which the advocates of Philippine independence desire, and which without question should be granted, when it can be done without sacrificing the real independence of the Filipinos. Let me quote from the address of the Hon. J. Sloat Fassett, a former Member of this body, and the president of the Insular Lumber Co., given before the American Chamber of Commerce of the Philippine Islands.

The Filipino people are the most independent in the world to-day. They have a better government for less money than any people in the world. They have the great good luck to have the advantage of the United States Consular and Diplomatic Service, which does not cost them a penny, and which works to their advantage every minute. They have the advantage of free, open, and cheerful access to the best market in the world and to one most friendly to them, which was worth last year a surplus in trade of 63,000,000 of pesos. They have the advantage of our Army and Navy, and up to the present time they have the inestimable privilege of having Governor General Wood keep them from their own destruction. Independence is really established among men for the benefit of individual men, so that individual men may without let or hindrance aspire to the utmost growth of which they are individually capable.

In fidelity to the intention of the United States declared early in the history of the relationship between the two peoples, a policy of increasing self-government has been followed until the place has been reached prophesied by Theodore Roosevelt when he said that "the government of the Philippine Islands would cease to be a government of Americans aided by Filipinos and, instead, would become a government of Filipinos aided by Americans." This is in truth what it is to-day. Both Filipinos and Americans can rejoice in the unparalleled progress of the islands during the last 25 years. It is therefore more imperative that any action taken shall be taken advisedly and shall preserve the beneficial effects of the past cooperation.

Under the majority report of the committee providing for separation at the end of a 20-year period such provision can and should be made. It should not be declared mercenary for the United States to consider the economic effects. Even with the commendable generosity of being willing to forego the indebtedness to the Government or of sacrificing private American capital it is not fair to bring bankruptcy on any group of people when careful foresight can avoid it. Furthermore, economic conditions are so involved that economic loss to one group inevitably affects all groups.

It is noteworthy that not one of the proponents of Philippine independence presents a method by which it may be accomplished. There is no precedent for such a step. Not since the United States became a nation has it sold, given away, or in any way released any portion of its territory. That the islands are part of the domain of the United States can not be denied, having come into the possession of the United States by three means, any one of which are recognized as valid by international law, namely by conquest, by treaty, and by purchase. Therefore any action taken must be in consideration of the establishing of a precedent for action should the peoples, or any group of the peoples, of other portions of the public domain, Alaska, Louisiana, or California—all of which were obtained by purchase—desire complete separation. Neither Congress nor the President has the power to alienate the territory or the sovereignty of any portion of the public domain. Among the powers granted by the Constitution to either the legislative or the executive branches of the Government this is not mentioned. The powers not specifically enumerated are reserved to the several States and to the people of the United States. To surrender the sovereignty of the Philippine Islands would require the action of the whole people of the United States, either by a popular vote—which has never yet been deemed wise—or by a constitutional amendment ratified by the requisite number of States. That a modus vivendi can be agreed upon I do not doubt. But an action involving the welfare of 12,000,000 American citizens and making a precedent for future generations should neither be taken hastily nor be made a football of partisan politics.

BICENTENNIAL OF BIRTHDAY OF GEORGE WASHINGTON

Mr. REED of New York. Mr. Speaker, I move to suspend the rules and pass Senate Joint Resolution 85, authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensible observance of that greatest of all historic events, the bicentennial of the birthday of George Washington, as amended, which I send to the desk.

The SPEAKER. The gentleman from New York moves to suspend the rules and pass Senate Joint Resolution 85, as amended, which the Clerk will report.

The Clerk read as follows:

S. J. Res. 85, authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensive observance of that greatest of all historic events, the bicentennial of the birthday of George Washington

*Resolved*, That there is hereby established a commission to be known as the United States Commission for the Celebration of the Two Hundredth Anniversary of the Birth of George Washington (hereinafter referred to as the commission) and to be composed of 19 commissioners, as follows:

The President of the United States; the Presiding Officer of the Senate and the Speaker of the House of Representatives, ex officio; eight persons to be appointed by the President of the United States; four Senators by the President pro tempore of the Senate; and four Representatives by the Speaker of the House of Representatives. The commissioners shall serve without compensation and shall select a chairman from among their number.

SEC. 2. That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $10,000, to be expended by the commission in accordance with the provisions of this resolution.

SEC. 3. That it shall be the duty of the commissioners, after promulgating to the American people an address relative to the reason of its creation and of its purpose, to prepare a plan or plans and a program for the signalizing of the event to commemorate which they are brought into being and to give due and proper consideration to any plan or plans which may be submitted to them; and to take such steps as may be necessary in the coordination and correlation of plans prepared by State commissions or by bodies created under appointment by the governors of the respective States and by representative civic bodies; and if the participation of other nations in the commemoration be deemed advisable, to communicate with governments of such nations.

SEC. 4. That when the commission shall have approved of a plan of celebration, then it shall submit for their consideration and approval such plan or plans, in so far as it or they may relate to the fine arts, to the Commission of Fine Arts, in Washington, for their approval and in accordance with statutory requirements.

SEC. 5. That the commission, after selecting a chairman and a vice chairman from among their members, may employ a secretary and such other assistants as may be needed for clerical work connected with the duties of the commission, and may also engage the services of expert advisers; and may fix their respective compensations within the amount appropriated for such purposes.

SEC. 6. The commissioners shall receive no compensation for their services, but shall be paid their actual and necessary traveling, hotel, and other expenses incurred in the discharge of their duties out of the amount appropriated.

SEC. 7. The commission shall on or before the 4th of March, 1925, make a report to the Congress in order that enabling legislation may be enacted.

SEC. 8. That the commission hereby created shall expire within two years after the expiration of the celebration, December 31, 1932.

SEC. 9. This joint resolution shall take effect immediately.

The SPEAKER. Is a second demanded?

Mr. BLANTON. Mr. Speaker, I demand a second.

Mr. REED of New York. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The gentleman from New York.

Mr. REED of New York. Mr. Speaker, the celebration of the two-hundredth anniversary of the birth of George Wash-

ington has aroused such widespread and universal interest that I shall not take the time of the House in explaining the provisions of this bill, which has for its purpose the proper observance of this great event.

It has the support of President Coolidge, Chief Justice Taft, Hon. Curtis D. Wilbur, Hon. Harry S. New, Hon. Henry C. Wallace, and Hon. James J. Davis. Among those urging it are the following governors and mayors:

Governor Neff, Texas.
Governor Brandon, Alabama.
Gov. Scott Bone, Alaska.
Governor Nestos, North Dakota.
Governor Preus, Minnesota.
Governor Davis, Kansas.
Governor Trinkle, Virginia.
Governor Moore, Idaho.
Governor Mabey, Utah.
Governor Pinchot, Pennsylvania.
Gov. Alfred E. Smith, New York.
Governor Templeton, Connecticut.
Governor Parker, Louisiana.
Governor Fields, Kentucky.
Governor Bryan, Nebraska.
Governor Hinkle, New Mexico.
Mayor McLaurin, Laurel, Miss.
Mayor Wiesendenger, Yonkers, N. Y.
Mayor Maher, Santa Cruz, Calif.
Mayor Hargett, Salina, Kans.
Mayor Hettrick, Asbury Park, N. J.
Mayor Stringham, Berkeley, Calif.
Mayor Burgheim, Little Falls, Minn.
Mayor Agar, Valparaiso, Ind.
Mayor Remington, New Bedford, Mass.
Mayor Quinn, Louisville, Ky.
Mayor Edward W. Quinn, Cambridge, Mass.
Mayor Topping, Summit, N. J.
Mayor Block, Kingston, N. Y.
Mayor Anderson, Hannibal, Mo.
Mayor Freeman, Springfield, Mo.
Mayor Phillips, Stamford, Conn.
Mayor Rosenfield, Rock Island, Ill.
Mayor Neslin, Salt Lake City, Utah.
Mayor Campbell, Mishawaka, Ind.
Mayor McCavitt, Anaconda, Mont.
Mayor Williams, Macon, Ga.
Mayor Moore, Englewood, N. J.
Mayor Davis, Leavenworth, Kans.
Mayor Howland, Long Branch, N. J.
Mayor Jackson, Baltimore, Md.
Mayor Bates, Salem, Mass.
Mayor Nelson, St. Paul, Minn.
Mayor Bullivant, Brockton, Mass.
City Director Moore, Jersey City, N. J.
Chief Burgess Doctor Shissler, Shamokin, Pa.

Among the commissioners of education who have already approved the proposal are:

Superintendent Callahan, Wisconsin.
Lester D. Henderson, Alaska.
T. E. Johnson, Michigan.
Clarence H. Dempsey, Vermont.
Superintendent Bond, Mississippi.
Commissioner Thomas, Maine.
Commissioner Tigert, Bureau of Education, Washington, D. C.
Doctor Graves, New York.
Mrs. Gravely, Idaho.
Superintendent Wood, California.
Superintendent Riegel, Ohio.
Superintendent Ford, West Virginia.
Superintendent Burris, Indiana.
Superintendent Hunting, Nevada.

The following letter of ex-President Charles W. Eliot, of Harvard, University, is only one of many valuable suggestions:

The two hundredth anniversary of the birth of Washington should be celebrated not only all over this country, but wherever in Europe there exists a group of persons who know the value of his writings and his deeds for the promotion of liberty and justice among mankind. This celebration, however, should be solemn, not gay, and spiritual, not materialistic. It should be directed in large measure to the rising generation, not to the passing or the past. It should appeal to thinking people, not to the careless or indifferent. Its aim should be to increase the number of Washington's disciples and followers in and for the struggles of the future.

The committee has conducted hearings and among those who appeared in favor of this measure urging prompt and favorable action were: Mr. Andrew B. Humphrey, secretary of the Sulgrave Institution, New York City; Mr. John A. Stewart, representing the American Society; Bishop Darlington, Harrisburg, Pa.; Hon. Alton B. Parker, chancellor of the Sulgrave Institution; Gen. William Crozier, United States Army (retired); Mr. A. B. Chandler, jr., president of the Chamber of Commerce of Fredericksburg, Va.; Mrs. L. H. Rust, of Wakefield, Va.

Numerous other indorsements have come from prominent organizations such as the chambers of commerce and the American Federation of Labor.

I shall not take the time of the House to discuss the details of this bill.

Mr. BLANTON. Mr. Speaker, this bill illustrates the necessity of a rule that would prohibit the Congress, both Houses if possible, from passing any bill during the last three days of the session and to require both Houses during the last three days of the session to confine their energies and actions to conference reports alone. I have seen bills pass here in the last 48 hours with the enactment and third reading waived involving over a million dollars each, some of them, pass in half a minute, without any consideration whatever, without chance of amendment, and without opportunity for discussion; and if it had been any other time except the closing hours of Congress they could not have passed the House at all, and with proper debate they would not have gotten 50 votes, some of them; but in the closing hours of Congress you can pass anything.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. BLANTON. No. I do not yield to the gentleman from New York [Mr. REED] or to any other man in my high regard, respect, and love for the memory of the Father of his Country, but what is all this hurry about? Why, this bicentennial birthday of George Washington is eight years hence—in 1932, if you please—and here is Congress on the last day of this session, with the taxpayers all over the Nation burdened in many respects and seeking relief in proper legislation, here we are on the last day of the session taking up a bill that is applicable to the celebration of a birthday eight years hence.

I know that this little $10,000 to some of you is a bagatelle. I know that much, but I want to ask you, Who is going to spend this money? How are they going to spend it? What is the necessity of spending it this year? Nobody has told us. Why, the chairman of this committee when 20 minutes of debate is allowed him he takes his seat and says, "I submit the bill to the House without argument; I offer no explanation of it. I tell the membership nothing at all about where this money is going or who expends it." I made some investigation here in the last eight years about various bureau chiefs and heads of departments who want money to expend in vacation time, and they think of every kind of excuse on God's earth to get Congress to give them spending money.

I know something about how this $10,000 is going to be expended this year—eight years before the bicentennial celebration is to occur. The people in my district, 314,000 of them, are depending on me as one of the 435 Representatives here to know what I am doing when I vote on a bill to take their money out of the Treasury. I will tell you what is going to happen. This is merely the nose of the camel getting under the tent. Why do they have to spend $10,000 this year to celebrate properly the bicentennial birthday of George Washington that will not occur until 1932? Why, the spirit of regard for Washington's memory is inherent in the hearts of all the individuals of our country. They need no money eight years before the celebration to spur them on. Why, this birthday is to be celebrated in every nook of the United States in 1932, and they will do it without money. [Applause.] I will tell you what is going to happen. We will give this $10,000 to some committee, some commission, some bureau this year, and they will waste it, and when the fiscal year is ended you can not tell one single benefit that has been derived from this expenditure, and next year, when the Congress meets, you will find this distinguished committee with its distinguished chairman, whom we all highly respect and for whom we have high regard—you will find him coming in again next year with another resolution reciting that only seven years then stand between us and 1932, and then, instead of asking for $10,000 next year, he will ask for $50,000. Two years from now it will be $100,000, and the closer we get to 1932 every year during those eight years you are going to have the appropriation grow like a rolling snowball, and you will find men here who will get up and say, "Oh, we are not short on these things! Why, this is the Father of his Country! What do we care about money when we celebrate his bicentennial birthday?"

Why, if it were necessary to appropriate to celebrate this occasion, I would vote with you to the limit when 1932 comes, but there is no necessity now for spending this money eight years before the celebration.

I want to say to my colleagues this: When you go home this summer, you keep this in mind. You are going to find this thought uppermost in the minds of your constituents—the thought of economy in Government expenditures. You are going to find when you go home that your constituents are for stopping these extravagances. They are for stopping these needless expenditures. They want the expenditures of the Government decreased instead of increased all the time.

When those boys out in your district write you letters here you sit in your office and say, "Dear John, your letter is received. I will give careful and immediate attention to it. Very sincerely yours." But when you go home and John meets you on the street and he asks you a question you can not then say, "I will give it careful consideration." You have got to answer that question, and you have got to give him a specific answer, and one for each question he asks you, and I am trying to conduct myself here and my votes here so that when I go home and meet the boys on the street I can answer all their questions without equivocation or evasion.

Mr. CULLEN. Will the gentleman yield?

Mr. BLANTON. I will yield, but I have about concluded.

Mr. CULLEN. I do not want to interrupt the gentleman, but I have been poring over this bill, and I have not been able to find what sum is to be appropriated.

Mr. BLANTON. Ten thousand dollars this year.

Mr. CULLEN. It is not in the bill.

Mr. BLANTON. The gentleman has a different bill. The Clerk read the committee bill, which the chairman moved to suspend the rules and pass.

Mr. CULLEN. The bill I have is the Senate bill.

Mr. BLANTON. I will say this, when the time comes in 1932 I will join with you in going the limit on any proper way to observe this worthy celebration.

But it is too early now to begin spending money. We are starting too soon. I hope you will not pass this bill.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER. The question is on the motion of the gentleman from New York [Mr. REED] to suspend the rules and pass the resolution.

The question was taken.

Mr. BLANTON. Mr. Speaker, I object to the vote, and I make the point of order that there is no quorum present.

The SPEAKER. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in the absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 306, nays 19, not voting 108, as follows:

| Connolly, Pa. | Jost | Parker | Vare |
| Cooper, Ohio | Kahn | Patterson | Vinson, Ky. |
| Crowther | Kent | Peavey | Ward, N. Y. |
| Curry | Kerr | Phillips | Ward, N. C. |
| Davis, Minn. | Ketcham | Quayle | Watres |
| Deal | Kiess | Reed, Ark. | Weaver |
| Dickstein | Knutson | Reed, W. Va. | Wefald |
| Dominick | Kunz | Rogers, N. H. | Welsh |
| Doughton | Langley | Rosenbloom | White, Me. |
| Doyle | Larson, Minn. | Rouse | Wilson, Miss. |
| Drane | Lilly | Sanders, Tex. | Winslow |
| Drewry | Little | Schall | Woodruff |

So, two-thirds having voted in the affirmative, the rules were suspended and the resolution was passed.

The Clerk announced the following pairs:

Until further notice:

Mr. Cole of Ohio with Mr. Rogers of New Hampshire.
Mr. Kiess with Mr. Byrnes of South Carolina.
Mr. Little with Mr. Doyle.
Mr. White of Maine with Mr. Hudspeth.
Mr. Ward of New York with Mr. Jost.
Mr. Kahn with Mr. Clark of Florida.
Mr. Taylor of Tennessee with Mr. Howard of Oklahoma.
Mr. Sears of Nebraska with Mr. Kent.
Mr. Mudd with Mr. Doughton.
Mr. Boise with Mr. Hull of Tennessee.
Mr. Connolly of Pennsylvania with Mr. Kunz.
Mr. Scott with Mr. Celler.
Mr. Curry with Mr. Lilly.
Mr. Griest with Mr. Quayle.
Mr. Patterson with Mr. Drane.
Mr. Michaelson with Mr. Logan.
Mr. Bacharach with Mr. Wilson of Mississippi.
Mr. Cooper of Ohio with Mr. Tucker.
Mr. Phillips with Mr. Hammer.
Mr. Shreve with Mr. Lyon.
Mr. Fredericks with Mr. Sullivan.
Mr. Sweet with Mr. Stengle
Mr. Vare with Mr. Rouse.
Mr. Woodruff with Mr. Deal.
Mr. Funk with Mr. Tydings.
Mr. Parker with Mr. Garner of Texas.
Mr. Graham of Pennsylvania with Mr. Dominick.
Mr. Morin with Mr. Milligan.
Mr. Andrew with Mr. Lozier.
Mr. Burton with Mr. Kerr.
Mr. Davis of Minnesota with Mr. Johnson of West Virginia.
Mr. Fitzgerald with Mr. Geran.
Mr. Paige with Mr. Drewry.
Mr. Butler with Mr. Bulwinkle.
Mr. Crowther with Mr. Ayres.
Mr. Hull, William E., with Mr. Sears of Florida.
Mr. Ketcham with Mr. Reed of Arkansas.

Mr. Longworth with Mr. Brown of New Jersey.
Mr. Manlove with Mr. McKeown.
Mr. Winslow with Mr. Vinson of Kentucky.
Mr. Madden with Mr. Sanders of Texas.
Mr. Welsh with Mr. Weaver.
Mr. Stalker with Mr. McNulty.
Mr. Watres with Mr. Sherwood.
Mr. Reed of West Virginia with Mr. Dickstein.
Mr. Anderson with Mr. Sites.
Mr. Knutson with Mr. Wefald.

The result of the vote was announced as above recorded.
The doors were opened.

PERMISSION TO ADDRESS THE HOUSE

Mr. JOHNSON of South Dakota. Mr. Speaker, I ask unanimous consent to address the House for one minute, in order to correct an error in the printing of the bill affecting the Veterans' Bureau.

The SPEAKER pro tempore. The gentleman from South Dakota asks unanimous consent to address the House for one minute on veterans' legislation. Is there objection? [After a pause.] The Chair hears none.

Mr. JOHNSON of South Dakota. Mr. Speaker, on page 10964 of the RECORD of June 5 last, section 201, paragraph 1, the following is stated:

If death occur, or shall have occurred subsequent to April 6, 1917, and before discharge or resignation from the service, the United States shall pay for burial expenses and the return of body to his home a sum not to exceed $150, as may be fixed by regulation.

Mr. Speaker, this is a misprint, as the conferees agreed that this amount should be $100. Owing to the fact, however, that there is included the statement that it shall be "not to exceed" $150 and the amount may be fixed by regulation, by the Director of the Veterans' Bureau, the Veterans' Committee will not try to secure the passage of a curative resolution through the House, and I am making this statement only that the Director of the Veterans' Bureau will have official notice that the conferees agreed on $100 and that he, therefore, will not exceed that sum and will so fix the regulation.

THE BONUS, TRADE ACTIVITY, AND TAX REDUCTION

Mr. WINGO. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a short statement entitled "The effect of the bonus on trade activities, the revenues, and tax reduction."

The SPEAKER pro tempore. The gentleman from Arkansas asks unanimous consent to extend his remarks in the RECORD by printing a short statement entitled "The effect of the bonus on trade activities, the revenues, and tax reduction." Is there objection?

Mr. SCHAFER. Reserving the right to object, Mr. Speaker, may I ask the gentleman from Arkansas whether these remarks will contain a solution of the farmer's trials and tribulations and provide a means of relieving him of his present distress?

Mr. WINGO. I am sorry they will not, because the statement I desire to insert comes from a leading financial publication, so you could not expect that.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. WINGO. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

[From the Business Conditions Weekly, Alexander Hamilton Institute]

THE BONUS AND TRADE ACTIVITY

The American Telephone & Telegraph Co. has just offered $150,000,000 of stock to investors. The spending of this money will have some effect upon business, but even though this is a large amount of money for any corporation to spend it represents only one-fourth of 1 per cent of the total spendings of the American people every year.

This percentage applies also to the bonus bill. The amount of money which will be disbursed under the bonus bill during the first year will be practically the same as the money which the American Telephone & Telegraph Co. will receive from selling its common stock. The effect upon trade activity will be negligible. About $150,000,000 will be collected in taxes from Mr. Jones and Mr. Brown and paid to Sergeant Smith and Private O'Brien. Some of the wealthier taxpayers will have a few dollars less to spend, but there will be no decrease in the total amount spent for merchandise. There will just be a difference in the places where the money is spent. It will be spent where Sergeant Smith and Private O'Brien do their shopping instead of in the places where Taxpayers Jones and Brown spend their money. However, there will be no withdrawal of funds from production and employment, because it is merely a taking from Peter to pay Paul, and Paul will spend the money for much the same sort of merchandise as Peter is accustomed to buy. About the only economic loss to the country on account of the bonus during the next 12 months will be in connection with the extra clerks and accountants employed in handling the complicated Army and Navy records. It will be necessary to spend $5,000,000 or $10,000,000 a year extra on account of clerical help and other expenses of administration, and if it were not for the bonus these clerks and this money would go into some form of productive industry. However, the amount of money diverted to these extra clerks from productive industry is too small to discuss in analyzing general business conditions.

As a business factor the bonus will be more important several years hence. The bill provides that if annual disbursements do not absorb all of the sinking fund provided, amounting to over $100,000,000 a year, the Treasury shall invest any idle bonus funds in Government bonds. Perhaps six or eight years from now the annual investment of bonus funds in Government bonds will influence the bond market. Then at the end of 20 years, when all of the insurance certificates expire, the Government will have to sell the bonds purchased meantime in order to effect the final payment to the veterans then living.

It is also possible that within eight or ten years the total money which the veterans will borrow from the banks by pledging insurance certificates will become a factor in the money market. However, there is a popular misunderstanding about the borrowing provision of the law. The authority to borrow 90 per cent of the value of the insurance certificate after two years does not mean that the holder of a $1,000 certificate can borrow $900 after two years. If that were possible, the veterans could borrow the huge sum of $2,600,000,000 after two years. That would be equal to 6 per cent of the total bank loans of the country. In the borrowing provision of the bonus law, however, there is a difference between face value and loan value of the insurance certificate. For instance, the certificate with a face value of $1,000 will not have any loan value at all during the first two years. In the third year the loan value will be nearly $90. Assuming that 3,000,000 veterans will have certificates with a face value of nearly $3,000,000,000, the maximum borrowing permitted in the third year will be about 9 per cent of the total, or $270,000,000. In the fourth year the maximum borrowings will be increased to $350,000,000. After 10 years the veterans will be able to borrow around $1,000,000,000. However, we do not believe the veterans will exercise this borrowing privilege in full, and doubt whether much more than one-half or two-thirds of the maximum borrowing limit will be reached in any year. Moreover, the increase in such borrowings will be very gradual and will not have a disturbing effect upon trade activity in any year.

In brief, merchants and manufacturers may ignore the bonus in making up their budgets for the next two years. The passage of the bill over the President's veto has added to the confusion in the political outlook, but the political consequences are more important than the trade consequences so far as 1924 is concerned.

TAX REDUCTION

It is to be hoped that Congress will proceed to adopt some form of tax reduction bill. In saying this we are not irresponsible. We do not overlook the fact that the bonus act will require some extra expenditure of money. However, the recent opponents of the bonus are attempting to make a mountain out of a molehill in arguing that taxes can not be reduced on account of the passage of the bonus act. They have temporarily lost their sense of proportion. By proportion, in this case, we mean the actual ratio of Treasury surplus or deficit to the total Federal revenues. If a deficit of 25 per cent in Treasury revenues were impending we should be alarmed. We can not take seriously, however, any deficit which is less than 5 per cent of the total revenues. One reason is that a 5 per cent deficit in the United States revenues will not lead to any panic or financial embarrassment. Another reason is that we can not always rely on the preliminary forecasts of the Treasury. We have seen the expert guesses of the Treasury go wrong by as much as 5 per cent or more. In 1922 the Treasury did not accurately forecast the increased prosperity of 1923, and therefore underestimated income taxes and tariff duties. A deficit was expected, but a surplus was realized. In the following table, showing estimates for the fiscal years ending June, 1924, and June, 1925, it is seen that the Treasury expects a surplus of over $300,000,000 this year and next. The passage of the bonus bill will cause the Treasury estimate of a $400,000,000 surplus during the next 12 months to be reduced to $250,000,000. If the proposed tax reduction bill goes through this surplus will be entirely wiped out. Let us assume that there will be a deficit of $100,000,000. The important thing to consider is the relation of this deficit to the tax revenues. If the total revenues decline to $3,300,000,000 next year instead of the $3,700,000,000 anticipated under the present tax schedules, the deficit of $100,000,000 would be 3 per cent of the total revenues. A deficit of $200,000,000 would be 6 per cent of the total revenues. This is not sufficient to cause any financial embarrassment, and it is even possible that with economy in expenses and large revenues on account of generally good trade in 1925 no deficit would materialize during the next two years.

*United States Treasury budget*

| Year ending June 30 | Ordinary expenses | Ordinary revenues | Surplus |
|---|---|---|---|
| 1921 actual | $5,538,000,000 | $5,625,000,000 | +$87,000,000 |
| 1922 actual | 3,795,000,000 | 4,109,000,000 | +314,000,000 |
| 1923 actual | 3,697,000,000 | 4,007,000,000 | +310,000,000 |
| 1924 estimated | 3,565,000,000 | 3,895,000,000 | +330,000,000 |
| 1925 estimated | 3,300,000,000 | 3,700,000,000 | +400,000,000 |

EXTENSION OF REMARKS

Mr. MADDEN. Mr. Speaker, some days ago the gentleman from Wisconsin [Mr. FREAR] in a speech on the floor of the House referred to Junius Wood, a correspondent of the Chicago Daily News. Mr. Wood is one of my constituents and he has just written me a letter denying some of the statements made by the gentleman from Wisconsin. I ask unanimous consent to publish Mr. Wood's letter in the RECORD.

Mr. KING. Mr. Speaker, I object.

Mr. FREAR. Mr. Speaker, I wish to state that this is the same man who under his own name declared that Senators and Representatives in Congress were receiving money from the Philippine Independence Commission for supporting Philippine independence; he sent that statement from Manila to 23 American newspapers and has never denied it or made any amends. I object.

CHAUNCEY M. DEPEW

Mr. WAINWRIGHT. Mr. Speaker, I ask unanimous consent to extend my remarks by printing in the RECORD the remarks of the gentleman from Indiana [Mr. SANDERS] on the occasion of the ninetieth birthday of Chauncey M. Depew, at Briarcliff, in my district.

The SPEAKER pro tempore. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD by printing the remarks of his colleague from Indiana [Mr. SANDERS] on the occasion of the ninetieth birthday of Chauncey M. Depew. Is there objection? [After a pause.] The Chair hears none.

Mr. WAINWRIGHT. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include a speech made by Representative EVERETT SANDERS on May 31, 1924, on the occasion of the dinner given in honor of Chauncey M. Depew:

SPEECH MADE BY REPRESENTATIVE EVERETT SANDERS ON MAY 31, 1924, ON THE OCCASION OF THE DINNER GIVEN IN HONOR OF CHAUNCEY M. DEPEW, AT BRIARCLIFF MANOR, N. Y.

It is an honor indeed to sit at the dinner given for Chauncey M. Depew, whose rare humor and charming discourse have delighted the guests of hundreds of banquets for two generations.

Indiana feels particularly kindly toward our noted friend, for it was his great influence in 1888 which led the Republican National Convention to nominate for the presidency, Indiana's son, Gen. Benjamin Harrison. In 1892 it was his eloquent voice that placed before the convention the name of President Harrison for renomination.

President Harrison urgently invited Senator Depew to enter his Cabinet soon after his inauguration, and later during his administration urged him to become his Secretary of State. The Hoosiers share in the regret throughout the country that Mr. Depew found it impossible to accept.

A few years ago I saw Senator Depew at the Republican National Convention. He spoke at the crowded Colosseum in Chicago, and the warm reception given him, showed how secure he was in the hearts of the people. Since I shall be at the convention at Cleveland, I desire to express what I know will be the hope of all in attendance—that he will grace the convention with his presence. No convention would be a complete success without him.

We bring to him to-night our congratulations in this his ninetieth year. The Nation had just finished its first half century when he became one of its citizens by birth. In its second half century, at the time when the country most needed his strength, he was in the forefront in the development of its great commercial and industrial potentialities. In the third half century not yet ended he added his great intellect toward the solution of its governmental problems. For all this America is grateful to him.

When he is in a reminiscent mood he must look back and marvel at the changes that have occurred within his lifetime in means of communication and methods of transportation and at a thousand other phenominal and beneficial changes. One outstanding thing that has not changed, however, according to contemporary periodicals, is the tendency of the people to conclude that each particular Congress is the worst ever.

I wish that some time from his rich experience he would remind the people that, good or bad, it has been under the guidance of the laws written year after year by each succeeding much "cussed" Congress that America has reached the foremost place among all the nations of the earth. This reminder coming from one so great and so beloved may temper their critical attitude and inspire them with a new confidence in the legislative branch of their Government, whose Members, after all, are selected by the people.

BICENTENNIAL OF BIRTHDAY OF GEORGE WASHINGTON

The SPEAKER pro tempore. Without objection House Joint Resolution 199, a joint resolution in connection with the celebration of the bicentennial of the birthday of George Washington, will be laid on the table, a similar Senate bill having just been passed by the House.

There was no objection.

PERSONAL PRIVILEGE

Mr. GRAHAM of Illinois rose.

The SPEAKER pro tempore. For what purpose does the gentleman from Illinois rise?

Mr. GRAHAM of Illinois. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent to proceed for three minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. GRAHAM of Illinois. Mr. Speaker and Members of the House, for the last four Congresses I have participated in the deliberations of this body. To say that I am leaving now with unmixed feelings of happiness would be to state what is not true. I have enjoyed my associations with this body very much. I hope when I go to another activity that the Members of this House, with whom I have had such pleasant associations, will understand that I do not want to be entirely excluded from their thoughts, and that I certainly shall retain the liveliest interest in the activities of this House. [Applause.]

I want to say something more before I leave as to the character of this body. I have found here what I believe is fairly representative of the best thought of the country at all times. [Applause.] Whatever may be the criticisms of this body, I have learned from my experiences in the last eight years that here are men above the average of intelligence and, I believe, far above the average in patriotic thought, and that many of the criticisms which are aimed at this body are unjust, untimely, and ought not to be made. [Applause.]

If I might make one observation in closing, it is this: I have come to view with some sort of apprehension and alarm a tendency that is prevalent throughout this country, and that is the tendency of the people of the country to think along class lines and to seek in this forum class legislation of all kinds and on all subjects. If there is anything the country ought to beware of, and if there is anything this House in its future deliberations ought to beware of, it is that tendency, which is not the fault of the Members of this House or of the body at the other end of the Capitol but is the fault of the people themselves in thinking along class lines. It is a menace to the country, and I hope it is one that will in time be obliterated by reason of the general consciousness of the people that, after all, the function of this body is to act for the people generally and to have mass consciousness instead of class consciousness, which many of those who send us here would have us assume.

In closing my congressional life to-night, I want to again ask that occasionally you have me in your minds. I want to come back once in a while and sit on this floor, where I have had such pleasant labors with you, and in closing say I appreciate to the fullest extent the many kindnesses which you men of this House on both sides have extended to me in the past and to express my appreciation. [Prolonged applause.]

Mr. CRISP. Mr. Speaker, I ask unanimous consent to address the House for one minute.

The SPEAKER pro tempore. The gentleman from Georgia asks unanimous consent to address the House for one minute. Is there objection? [After a pause.] The Chair hears none.

Mr. CRISP. Gentlemen of the House, I am sure I voice the sentiment of every man in the House when I say it is with sincere regret that we lose from our membership the distinguished gentleman who has just addressed you. [Applause.]

We are rejoiced, of course, at his preferment, but his place in this House will be missed. The Speaker has called upon him frequently to discharge the onerous duties of Presiding Officer of this House, and at all times he has discharged the duties with ability, with fairness and impartiality, and to the satisfaction of the House.

Speaking for you all, we wish him, I am sure, health and happiness and success in his new undertaking, the duties of

which we know he will discharge in a manner to reflect credit upon himself and the appointing power. [Applause.]

BATTLE OF LEXINGTON AND CONCORD

Mr. LUCE. Mr. Speaker, I move to suspend the rules and pass House Joint Resolution No. 259, establishing a commission for the participation of the United States in the observance of the one hundred and fiftieth anniversary of the Battle of Lexington and Concord, authorizing an appropriation to be utilized in connection with such observance, and for other purposes.

The Clerk read the resolution, as follows:

*Resolved, etc.*, That there is hereby established a commission to be known as the United States Lexington-Concord Sesquicentennial Commission (hereinafter referred to as the commission) and to be composed of 11 commissioners, as follows: 3 persons to be appointed by the President of the United States, 4 Senators by the President of the Senate, and 4 Members of the House of Representatives by the Speaker of the House of Representatives. The commission shall serve without compensation and shall select a chairman from among their number.

SEC. 2. That there is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated the sum of $5,000 to be expended by the commission for actual and necessary traveling expenses and subsistence while discharging its official duties outside the District of Columbia.

SEC. 3. That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $10,000 to be utilized in the discretion of the commission for the appropriate participation on the part of the United States in the celebration and observance of the one hundred and fiftieth anniversary of the Battle of Lexington and Concord to be commemorated on or about April 19 and 20, 1925.

SEC. 4. That the Postmaster General is hereby authorized and directed to issue a special series of postage stamps, in such denominations and of such designs as he may determine, commemorative of the one hundred and fiftieth anniversary of the Battle of Lexington and Concord and of the one hundred and fiftieth anniversary of such other major events of the Revolutionary War as he may deem appropriate.

SEC. 5. That in commemoration of the one hundred and fiftieth anniversary of the Battle of Lexington and Concord there shall be coined at the mints of the United States 50-cent pieces to the number of 300,000, such 50-cent pieces to be of the standard troy weight, composition, diameter, device, and design as shall be fixed by the Director of the Mint, with the approval of the Secretary of the Treasury, which said 50-cent pieces shall be legal tender in any payment to the amount of their face value.

SEC. 6. That all laws now in force relating to the subsidiary silver coins of the United States and the coining or striking of the same, regulating and guarding the process of coinage, providing for the purchase of material, and for the transportation, distribution, and redemption of the coins, for the prevention of debasement or counterfeiting, for security of the coin, or for any other purposes, whether said laws are penal or otherwise, shall, so far as applicable, apply to the coinage herein authorized: *Provided*, That the United States shall not be subject to the expense of making the necessary dies and other preparations for this coinage.

Mr. WINGO. Mr. Speaker, I demand a second.

Mr. LUCE. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. LUCE. The importance of the minutes to-day is so great that I am going to explain the purpose of this resolution in the fewest words possible. It contemplates the same sort of thing contemplated by the resolution just passed, that the National Government shall take some part in the celebration of a notable episode in the history of the country. In this case, however, the celebration—being of the Battles of Lexington and Concord—will take place next April, hence the greater need of immediate decision.

It is proposed that the National Government shall have representation at this celebration, perhaps of the same sort as that at the celebration 50 years ago when President Grant, members of his Cabinet, and other distinguished citizens were in Lexington and Concord. Also, the Marine Band was present, and at the same time some contribution was made in the way of bunting and other adjuncts of the celebration.

This resolution has been drawn in precisely the same language—I think with no important change, at any rate—as that used in the matter of the appropriation for the celebration of the landing of the Pilgrims at Plymouth.

The appropriation authorized is modest, $5,000 for the traveling expenses of the commission and its incidentals and $10,000 which is likely to be used for taking the Marine Band there and for such other share in the celebration as the commissioners may see fit to arrange.

With this explanation, I trust we may get a speedy vote on the matter and so reach other questions of greater magnitude in point of money, but which will not be of greater magnitude in point of historic importance

Mr. WINGO. Mr. Speaker, I, of course, have that pride that all Americans have in the valor and the achievements that are sought to be commemorated by this resolution.

I should not have said anything upon this occasion except for two reasons. The first is I noticed in the report a phrase which I read:

Whether or not we may go so far as to say that Lexington Common or the bridge at Concord, where the embattled farmers stood, saw the birth of American liberty, there can be no question that the sacrifices of the day cemented the American Colonies in the unity of action that led to independence.

The phrase that caught my attention was "where the embattled farmers stood." [Laughter and applause.]

I say that the phrase that attracted my attention is "where the embattled farmer stood." I ask my Republican friends to-day the question you are asking about them in November, Where do the "embattled farmers" stand? Yesterday the gentleman from Iowa [Mr. GREEN], the chairman of the Ways and Means Committee in this House and a leader of the Republican Party—he does not always agree with the President, or, rather, the President does not always agree with him—had something to say about the condition of the farmer. He, like other western Republicans, is deeply concerned right now about farmer votes. I want to notice briefly what he told this House and told his constituents. On page 11121 of the CONGRESSIONAL RECORD of June 6, 1924, you will find two simple statements by the gentleman from Iowa [Mr. GREEN], the great chairman of the Republican Ways and Means Committee.

In the year 1921 the farmer got $9,221,000,000 for his products. As a result of the farmers' emergency tariff, which the Republicans put through and which raised the value of his product and as a result of the Republican tariff law which gave him a market in the eastern part of the country, which he had lost under the Democratic régime, in the year 1922 he got $11,244,000,000 for his product, and in the year 1923 he got $12,204,000,000 for his product.

In other words, the gentleman from Iowa tells this House—and if he thinks he can get away with such sophistry in the House we may certainly expect him to attempt it before "the embattled farmers" of the West—that the farmers were benefited by the emergency tariff and by the general tariff law. He tells the farmers—just as Frank Mondell and Eugene Meyer told them—that the only thing wrong with them is their psychological viewpoint; that they are prosperous and do not know it; and that as a result of the tariff policy of the Republican Party the wheat farmers and all other farmers are rolling in wealth, and that their claim of adversity is pure "bunk."

If the tariff was such a boon to the farmer then why is he here knocking at the doors of Congress demanding some remedial legislation? Is it possible that the sponsors of the late-lamented McNary-Haugen bill were deceived and had never heard of the beneficient results of the tariff upon agriculture? Oh, Mr. Speaker, the statements quoted by me from the remarks of the gentleman from Iowa were uttered out of force of habit. The gentleman from Iowa knows, as every intelligent man knows and as the farmers of the West have learned to their sorrow, that from the moment the Republicans gained control of Congress by the election of 1918 and commenced to tinker with the tariff the price of farm products has gone down and that the condition of agriculture has gone from bad to worse.

What else does the gentleman from Iowa [Mr. GREEN], chairman of the Ways and Means Committee and the recognized leader of the Old Guard Republicans on that committee, say in the same speech? On page 11121 of the CONGRESSIONAL RECORD of June 6, when the gentleman was talking about the wonderful prosperity that had come to the farmer by reason of the tariff, he was asked why it was the farmer is broke. What was the gentleman's answer? He said, "He is broke by reason of the Democratic laws and Democratic deflation." Mr. Speaker, the gentleman from Iowa and other Republicans have told that story so often to the farmers of the West and the country bankers of the I ation that they really believe it is true. They repeat that story and charge the Democratic Party with the deflation policy which the farmers believe destroyed their

values, broke their banks, and left agriculture in a helpless condition. The truth is—and every Member of this House knows it—that the policy of deflation was adopted and forced by the Republicans themselves.

The gentleman from Iowa knows that when the Republicans gained control of both branches of Congress by the election of 1918 his party leaders immediately commenced charging the Democratic administration with having overextended credit and insisting on a deflation. President Wilson called the Republican Congress in extra session in 1919 for the major purpose of reducing taxes. The Republican leaders refused to reduce the burden of taxation, their chief spokesman and leader, Senator Penrose, bluntly stating, as quoted at the time and not denied, that there would be no tax reduction. In announcing this decision he said:

> Let the people sweat. They will see a Democrat in the White House and overlook the fact that the Republicans are in control of both branches of Congress.

Instead of trying to reduce the burden of taxation they started on an elaborate system of investigations of the Democratic administration, investigations which General Dawes, of hell and Maria fame, denounced, stating, in the faces of Republican leaders in a hearing before one of their smelling committees, that they were a bunch of pinhead politicians who were trying to find out how we won the war.

In addition to this policy the Republican leaders started a drive in both Houses of Congress for a systematic policy of deflation of the credits of the country and of the currency. We all remember how in January, 1920, the Republican leaders in opening the drive for their policy of deflation put forward on the floor of the House the gentleman who just preceded me, Mr. LUCE, of Massachusetts, a cautious, conservative New Englander, typical of all the conservative, standpat tendencies of the New England group that absolutely dominates the Republican Party, and which regards the farmers of the West as a pestiferous nuisance to be endured because of the dire necessity of having their votes in the Electoral College. The gentleman from Massachusetts and I had a colloquy on the floor upon that occasion, and the older Members will recall that he at that time made a set speech denouncing the Democratic Party for giving the country too much credit and too much currency, and insisting that a policy of deflation should be put into effect immediately.

As a part of their well-defined and well-organized plan to deflate the credit and the currency of the Nation the Republican organization had a resolution introduced in the Senate by the late lamented Senator MEDILL MCCORMICK, of Illinois, which resolution called on the Federal Reserve Board to tell the Republican Congress what they proposed to do toward deflating the farmer and reducing the volume of the currency and credit. The Republican Senate adopted this resolution over the protest of leading Democrats. The Republican leaders, backed by all the financial power of New England and the East, brought every possible pressure to bear on the Federal Reserve Board, and finally it adopted the policy of deflation.

In carrying out their plans, when the Republican Party met in convention four years ago they wrote into the platform of 1920 a denunciation of the Democratic Party on the ground that it had overexpanded our currency and our credit, and pledged the Republican Party, if placed in power, to carry out a policy of "courageous and intelligent deflation of overexpanded credit and currency." In other words, the gentleman from Iowa and the entire Republican Party started an organized drive for deflation in 1919, wrote the policy of deflation in the platform of 1920, and its power and influence was such that the statistics of the Federal reserve banks show that within 50 days after the Republican administration came into power in 1921 a drive was made upon the farm-paper credits in the Federal reserve system, and with ruthless persistency the policy of deflation was carried to its bitter end.

The only promise made to the people of this Nation which this administration has kept is that policy of deflation. They promised the wheat growers of the West to deflate them and the Republican administration kept that promise, and the result is that more banks have failed in the Wheat Belt under this administration than during the entire Democratic administrations that preceded it. [Applause.]

I also wish to direct the attention of the House to another significant and frank statement made by the gentleman from Iowa [Mr. GREEN] on yesterday, and which you will find on page 11121 of the RECORD of June 6, 1924. I quote:

> Mr. GREEN of Iowa. In talking to the farmers in my district at the time of the last campaign I told them the first thing they needed was a home market; that one consumer in the home market was worth a dozen abroad, and that they needed to put the business interests of the East and the factories of the East on a sound, substantial, working basis, and then a demand would be created for their products, and they all know it to-day in the results that have followed.

In other words, the gentleman frankly admits that in the last campaign in talking to the wheat growers of his State he frankly told them that it was the policy of the Republican Party to build up the factories of the East, and that whatever relief or prosperity the wheat growers could expect must come as a reflection of the prosperity of the manufacturers. In announcing that policy to his constituents the gentleman from Iowa was frank. He frankly admitted the cardinal theory upon which the Republican Party stands. They frankly say to the farmers and the toilers of this Nation, "We propose to build up the great manufacturing enterprises of New England and of the East by a monopolistic—not a protective—tariff, so that these manufacturers may rob and plunder at their sweet will the price-burdened consumers of this Nation, and that the only hope for the farmer and the toiler is from the charitable doles and the altruistic expenditures of the manufacturing interests."

The gentleman from Iowa, in his remarks just quoted, states that the farmers all know to-day the result of this policy. Well, I hope, Mr. Speaker, that they do know the result of it, and that they further realize that they have no hope for any policy that is beneficial to agriculture from the group of New England manufacturers that now dominates the Republican administration.

Mr. Speaker, the position of our Republican friends is amusing. They meet themselves coming back. In one breath the Republican spellbinders say, "Behold Republican prosperity," and in the next breath they come in and vie with each other in their zeal for some legislative panacea to relieve the admitted distress of the farmers of the land. Our Republican friends, in the face of the distress of agriculture, with bursting banks and farm homes being sold under the hammer each day, have the temerity to go to the country on the issue "Stand by Cal and Republican prosperity."

What are the gentlemen from the great agricultural districts going to say to these farmers this fall? Are you gentlemen going back to them and say "Yes; we did what we promised in our platform of 1920. We promised to deflate you and we have deflated you. We promised you that we would build up the great manufacturing industries of the East and we have done that. So why should you farmers be growling and complaining to-day? Do not you know the country is prosperous under this Republican administration? Behold the factories of the East!" Is that what you are going to say to these farmer voters of the West whom you have buncoed and deceived so often? If you are frank with them that is what you will say, but if they have the intelligence which I believe they have they will no longer permit their flimflamming Republican leaders to herd them like cattle and vote them for the Republican ticket.

In this same speech of the gentleman from Iowa on yesterday, he said that 4,000,000 men were out of employment in the industrial centers of the Nation in 1921 when the Republicans came into power, and that to-day they are fully employed. Therefore, I assume, Mr. Speaker, that the gentleman from Iowa will say to the farmer of the West in the campaign this fall "I know you are busted; I know your banks have failed; I know you can not get the cost of production for your wheat, but you must not complain, because the great factories of the East are humming and there is no unemployment there; in the East wealth is flowing in plenty and in the glow of the burning factory fires of the East you farmers must find the solution for your deplorable condition."

Oh, Mr. Speaker, the tragedy of the Republican farmer voters of this Nation is a grim one. They permitted the Republican Party to hog tie them with the specious promises of the emergency tariff, with the deliberate intent to forestall any protest against the inequities of the conditions which the Republican leaders knew would flow from the enactment of the Fordney-McCumber tariff bill. Under that bill the great consuming masses of this Nation, including the farmers, are staggering under a tax load of billions in order that the great manufacturing ndustries of the North and East, which dominate the Republican Party, may thrive.

God pity the American farmers, "the embattled farmers of the Nation," if they permit the hard-boiled New England manufacturing-controlled Republican administration to bunco them another time. [Applause on the Democratic side.]

The SPEAKER pro tempore (Mr. ROGERS of Massachusetts). The question is on suspending the rules and passing the bill.

The question was taken; and in the opinion of the Chair two-thirds having voted in the affirmative, the rules were suspended, and the bill was passed.

THE VETO OF THE BONUS BILL

Mr. MURPHY. Mr. Speaker, I ask unanimous consent to print in the RECORD a short editorial that appeared in the soldiers' paper, the Stars and Stripes, in the current issue.

The SPEAKER pro tempore. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

Mr. UNDERHILL. Mr. Speaker, reserving the right to object, we have established a policy here of refusing to print in the RECORD editorials from any paper, and I object.

The SPEAKER resumed the chair.

Mr. MURPHY. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

The SPEAKER. Would the gentleman be willing to wait until later in the afternoon? There will be time after these bills are gotten out of the way, when the House can much better spare the time. Would the gentleman just as soon do that as address the House now?

Mr. MURPHY. Mr. Speaker, I have always been agreeable. I have not taken a minute's time of this House this session. I want this right now, and I am only asking what I think is fair at this particular time.

The SPEAKER. The gentleman from Ohio asks unanimous consent to address the House for five minutes. Is there objection?

There was no objection.

Mr. MURPHY. Mr. Speaker, I now pass up to the Clerk's desk, to have read in my time, the following editorial.

The Clerk read as follows:

[The Stars and Stripes, Saturday, May 31, 1924]

THE LEGION SHOULD HELP

No sooner had the bonus bill been passed over President Coolidge's veto than opponents of the legislation all over the country opened war on the legislators who voted in favor of the measure.

In every section of the country a determined effort is being made to defeat the Congressmen and Senators who voted to override the veto. Practically all of the large newspapers are opposed to the legislation and will aid in the fight. Their cry is that these legislators deserted the President in time of need and voted to increase the tax burden of the people. From now until the election is over in November this cry will be kept up, and the men who stood by the bonus bill to the end will find considerable of a scrap on their hands.

In this fight will they have the support of the men for whom they passed the bonus? Will the American Legion, sponsor of the legislation, come to the front and aid its friends, or will it stand back, hiding behind the cloak of "policies not politics"?

This is a big question, and on its answer rests the influence the Legion is to wield in Congress in the future. If the Legion deserts its friends this time, it can hardly look for support in the future.

Many Congressmen and Senators voted for the bonus and to override the President's veto in the face of no little opposition. In almost every congressional district there is an organized minority opposed to this legislation, and that minority is working now to see that the Congressmen who went against its dictates do not return to Congress. Voting to override the veto of a President is no laughing matter to a Congressman or Senator belonging to the same party. On the contrary, such action requires considerable courage, and the legislator who takes that action is almost certain to find rough sledding when election time comes around.

It is likely that many of the Congressmen who voted against the veto will be beaten this fall if the ex-service men do not get out and work for their reelection. The American Legion particularly has a job on its hands to do all in its power to see that its friends are returned. Otherwise the Legion need not look for support in the future. Any Congressman who is opposed because of his vote on the bonus—and there will be many of them—should expect and should receive the assistance of the Legion in his district. It's all very well and good for the Legion to say that it's not in politics. Such phrases sound well when voiced by Fourth of July orators, but it's another thing to desert one's friends.

This the Legion should not do. Regardless of party affiliations, it should step out in the primaries and in the election and see that its friends are returned to Congress. To do less would display a marked lack of appreciation. It would be almost as bad as going over to the enemy.

[Applause.]

Mr. MURPHY. Mr. Speaker and gentlemen, I thank you.

DISCONTINUANCE OF REGAUGING OF DISTILLED SPIRITS

Mr. GREEN of Iowa. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 9138) to authorize the discontinuance of the seven-year regauge of distilled spirits in bonded warehouses, and for other purposes, which I send to the desk.

The Clerk read as follows:

*Be it enacted, etc.*, That upon withdrawal of distilled spirits from any internal-revenue bonded warehouse, in lieu of the allowance provided in subdivision (b) of section 600 of the revenue act of 1918, an allowance for loss by leakage or evaporation not exceeding 1 proof gallon as to casks or packages of a capacity of not less than 40 wine gallons and one-half proof gallon as to casks or packages of a capacity of less than 40 wine gallons and not less than 20 wine gallons, for each period of six months, or fraction thereof, after the expiration of seven years from the date of original entry or gauge, may be made in addition to, and under the conditions imposed by, section 50 of the act entitled "An act to reduce taxation, to provide revenue for the Government, and for other purposes," approved August 27, 1894, as amended.

SEC. 2. The allowance for loss by leakage or evaporation under this act and under section 50 of said act of August 27, 1894, shall be made without regard to any regauge made prior to the enactment of this act, and a regauge within seven years from the date of the original gauge shall not be necessary.

SEC. 3. This act shall not apply to distilled spirits withdrawn prior to the date of its enactment.

Mr. GARRETT of Tennessee. Mr. Speaker, in order that there may be an explanation, I demand a second.

Mr. GREEN of Iowa. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

There was no objection.

Mr. GREEN of Iowa. Mr. Speaker, just by way of explanation, this bill is unanimously reported by the Committee on Ways and Means. The law at present requires all distilled spirits in bonded warehouses to be regauged every seven years, but since the passage of the prohibitory law this has become entirely unnecessary. Consequently the Treasury Department and the Prohibition Department are asking that this provision be done away with. It makes an unnecessary expense upon the Treasury, and works a hardship and injustice at times to innocent parties. The bill contains one other provision that the Ways and Means Committee inserted. We thought the present allowance for evaporation was too much, and consequently reduced it somewhat. This is all the change that is made in the present law.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. SCHAFER. Does the gentleman know how the Anti-Saloon League stands on this legislation, or how our distinguished colleague, Mr. CRAMTON, the recognized dry leader, feels about it?

Mr. GREEN of Iowa. There is no objection that I know of from any quarter.

Mr. CONNALLY of Texas. Mr. Speaker, the gentleman says the committee is decreasing the allowance for evaporation.

Mr. GREEN of Iowa. Yes; there is a slight decrease.

Mr. CONNALLY of Texas. If it is not to be regauged once in a while, had we not better increase the allowance?

Mr. CLARKE of New York. May I ask the gentleman who it was that qualified as experts?

Mr. GREEN of Iowa. It depends upon what the gentleman means by "experts." Perhaps no one, in the sense that he intends.

Mr. OLDFIELD. Mr. Speaker, if the gentleman from Iowa will yield, I will say in reply to my colleague from Texas [Mr. CONNALLY] that the representative of the liquor interests and the representative of the Prohibition Department were both present at the time, and both agreed that this bill should be passed; that it is in the interest of fairness and justice to the department, and also to the people who own the liquor.

Mr. DYER. What liquor interests are there now?

Mr. OLDFIELD. The distillers, the owners of the liquor.

Mr. SCHAFER. Is it not somewhat of an unusual occurrence that they should agree?

Mr. GREEN of Iowa. Certainly, but having agreed we ought to pass the bill, which is what the Treasury wants done.

Mr. OLDFIELD. It is rather unusual, but in this case they did agree.

Mr. BOYLAN. Mr. Speaker, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. BOYLAN. I have read of many instances in the public press where, upon examination and regauging of whisky and other alcoholic liquors in public warehouses, splended Scotch

and mellow rye were found to have turned into water. In those cases what is done under the provisions of this bill?

Mr. GREEN of Iowa. They will have to pay the tax just the same, as the regauging is always made when it is withdrawn.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. BLANTON. I am wondering if there is any connection between this provision for evaporation and leakage and the coming conventions during the next two or three weeks?

Mr. GREEN of Iowa. None at all, I will say to my friend.

Mr. CHINDBLOM. As a matter of fact, when this liquor is gauged there sometimes occurs leakage, and if you prevent the gauging of liquor that is still in bond there is likely to be less loss.

Mr. DAVIS of Tennessee. Will the gentleman yield?

Mr. GREEN of Iowa. I will.

Mr. DAVIS of Tennessee. I understood the gentleman from Iowa to say that they would be limited to paying the tax when it was regauged, and that would be when the whisky was withdrawn?

Mr. GREEN of Iowa. Yes; I said the liquor would be regauged when it was withdrawn.

Mr. DAVIS of Tennessee. Suppose it has been converted into water, there is not much likelihood of the owner paying taxes to withdraw it, is there?

Mr. GREEN of Iowa. The owner would be liable for the tax, of course, and if it was withdrawn I suppose they could not enforce it against the liquor. There is a standard allowance for leakage and evaporation, and the owner has to pay the taxes on the balance, just the same.

Mr. DAVIS of Tennessee. I understand that is a matter of law, but how do you enforce it?

Mr. GREEN of Iowa. Enforce it against the owner if he is good for it.

Mr. GARRETT of Tennessee. I understand the gentleman from Illinois [Mr. WILLIAM E. HULL] desires to ask some questions, and I will yield to him or the gentleman from Iowa can yield to him.

Mr. WILLIAM E. HULL. I simply want to ask a question in reference to these allowances. I have been in that business for 28 years and I know the hardships of the distiller. If you have not made the proper allowance under the Carlisle law, the distiller may be taxed anywhere from 2 to 10 gallons of evaporation or leakage on which he should not be taxed. The committee does not state in the bill what these allowances are, but the gentleman says they are decreased——

Mr. GREEN of Iowa. There has been a slight change. I will say it will take considerable time to explain it, and if the people who own this liquor do not want this bill passed I do not care.

Mr. WILLIAM E. HULL. As far as I am concerned I only want to see that the distiller is properly protected. If he is, I am in favor of the bill, because I know the importance of it.

Mr. GREEN of Iowa. The owners of intoxicating liquor as well as those representing the prohibition unit are both in favor of the bill.

The SPEAKER. The question is on the motion to suspend the rules and pass the bill.

The question was taken, and, two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

### ROADS TO NATIONAL CEMETERIES AND MILITARY PARKS

Mr. HULL of Iowa. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 2745 and pass it. This bill has passed the Senate and has been reported unanimously by the Committee on Military Affairs, and the report was written by the gentleman from Alabama [Mr. HILL]. It is a bill to permit the War Department——

Mr. GARRETT of Tennessee. Let the bill be reported before the gentleman undertakes to discuss it.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

An act (S. 2745) to authorize the Secretary of War to convey to the States in which located Government owned or controlled approach roads to national cemeteries and national military parks, and for other purposes.

*Be it enacted, etc.*, That the Secretary of War be, and he hereby is, authorized in his discretion, subject to such conditions as may seem to him proper, to convey by proper quitclaim deed to any State, county, municipality, or proper agency thereof, in which the same is located, all the right, title, and interest of the United States in and to any Government owned or controlled approach road to any national cemetery or national military park: *Provided*, That prior to the delivery of any conveyance under this act the State, county, or municipality to which the conveyance herein authorized is to be made shall notify the Secretary of War in writing of its willingness to accept and maintain the roads included in such conveyance: *Provided further*, That upon the execution and delivery of any conveyance herein authorized, the jurisdiction of the United States of America, which has been heretofore ceded to the United States by a State over the roads conveyed, shall thereby cease and determine and shall thereafter vest and be in the particular State in which such roads are located.

Mr. BLANTON. Mr. Speaker, reserving the right to object, this is an important blanket bill. I do not think this bill ought to come up under the circumstances.

Mr. HULL of Iowa. Certainly there can be no objection to the bill, that I can see.

Mr. BLANTON. Lots of property could be conveyed all over the United States.

Mr. HULL of Iowa. No; just a very few roads that enter national military cemeteries and national parks.

Mr. BLANTON. But it is a blanket bill that covers all such——

Mr. HULL of Iowa. It permits the Government to cede these roads and thereby save the National Government the expense of maintaining them, provided the States will accept them.

Mr. BLANTON. This bill ought to have some debate, and I hope the gentleman will not insist on it because I am going to have to object.

### MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9559) making appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, had further insisted upon its amendments to said bill numbered 27, 28, 30, 31, 32, 33, 34, 35, 36, 37, 39, 58, and 59 had asked a further conference with the House of Representatives on the disagreeing votes thereon and had appointed Mr. WARREN, Mr. CURTIS, Mr. JONES of Washington, Mr. OVERMAN, and Mr. HARRIS as the conferees on the part of the Senate.

### SENATE BILLS REFERRED

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 3018. An act to authorize the designation of deputy fiscal or disbursing agents in the Department of Agriculture stationed outside of Washington; to the Committee on Agriculture.

S. 3221. An act for the relief of employees of the Bureau of Printing and Engraving who were removed by Executive order of the President, dated March 31, 1922; to the Committee on Banking and Currency.

S. 3416. An act to authorize the appointment of Thomas James Camp as a major of Infantry, Regular Army; to the Committee on Military Affairs.

S. 2949. An act authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation; to the Committee on Military Affairs.

S. 2448. An act to amend the organic act of Porto Rico, approved March 2, 1917; to the Committee on Indian Affairs.

### TRANSFERRING CERTAIN LIGHTHOUSE RESERVATION LANDS TO THE STATE OF NEW YORK FOR PARK PURPOSES

Mr. PARKER. Mr. Speaker, I wish to call up the bill S. 2887 and move to suspend the rules and pass the bill.

The SPEAKER. The gentleman from New York moves to suspend the rules and pass the bill which the Clerk will report.

The Clerk read as follows:

An act (S. 2887) authorizing transfer of certain abandoned or unused lighthouse reservation lands by the United States to the State of New York for park purposes

*Be it enacted, etc.*, That the Secretary of Commerce be, and hereby is, authorized to transfer and convey to the State of New York all right and title now vested in the United States in land and buildings known as the Lloyds Harbor Lighthouse Reservation, located in Suffolk County, at Lloyds Harbor, Long Island, N. Y., consisting of about 2.5 acres, located and described as follows:

Beginning at a rock or bowlder near low-water mark on the east beach in Huntington Bay and running thence due west to a stake on the highest part of the neck, and thence on the same line (due west) to the water on the west side of the point in Lloyds Harbor,

containing 2½ acres, more or less, and the right of way to and from it.

And to transfer and convey to the State of New York all right and title now vested in the United States in certain lands forming a part of the Fire Island Lighthouse Reservation, Fire Island, Suffolk County, Long Island, N. Y., consisting of about 600 acres, located and described as follows:

Beginning at a line drawn from north to south through a United States Coast and Geodetic Survey monument, located 2,225 feet, 225° 16′, from the Fire Island Lighthouse tower, and extending to the western end of Fire Island, with the exception of such land as is occupied or needed by the United States Coast Guard: *Provided*, That any leases with private parties which the Lighthouse Service may have at the time of passing of this act will not be affected until the expiration of such leases: *Provided*, That the said lands transferred from the United States shall be forever reserved by the State of New York as public parks: *Provided further*, That if the said lands are not used as public parks, they shall revert to the United States.

SEC. 2. The land transferred from the United States shall be subject to the right of the United States to at any and all times, in any manner, assume control of, hold, use, and occupy, without license, consent, or lease from the State of New York or the city of New York, any or all of the said lands for any and all military, naval, or other governmental purposes, free from any conveyances, charges, encumbrances, or any license made, created, permitted, or sanctioned therein by the State of New York. The rights reserved to the United States shall apply to all additional lands that may be formed by accretions of the sea at Fire Island. The United States further reserves the right of access to the land and water adjacent to Lloyds Neck for the purpose of taking gravel for the use of the Lighthouse Service.

The SPEAKER. The question is on the suspension of the rules and the passage of the bill.

Mr. HUDDLESTON. Mr. Speaker, I think the gentleman ought to make an explanation.

Mr. PARKER. Mr. Speaker, the State of New York has a State park at Fire Island. Between the land which was originally acquired by the State of New York for a park at Fire Island and the Fire Island Lighthouse the action of the tide has washed in and made about 600 acres of sand beach. That is the property that is to be transferred to the State of New York to be used exclusively for park purposes. The land reverts to the Federal Government at any time when this land is not used for park purposes. The State of New York has already, and available now, $200,000 to expend on the development of this park, which is to be used almost exclusively for the disabled veterans that are in the various hospitals in New York, who are to be sent there for a certain number of weeks for recreation. If there is any question anyone desires to ask, I will be glad to answer; but if not, I ask that the bill be passed.

The SPEAKER. The question is on the motion of the gentleman from New York to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in the affirmative, the rules were suspended and the bill was passed.

### MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had disagreed to the amendment of the House of Representatives to the joint resolution (S. J. Res. 107) declaring agriculture to be the basic industry of the country, and for other purposes, had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SMITH, Mr. PITTMAN, and Mr. CUMMINS as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment the bill (H. R. 8578) to amend the act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," approved February 17, 1911, as amended.

The message also announced that the Senate had passed without amendment the bill (H. R. 9111) directing the remission of customs duties on certain property of the United States imported by the War Department.

### SECOND DEFICIENCY BILL, 1924

Mr. MADDEN. Mr. Speaker, I present a conference report on the bill H. R. 9559, the second deficiency bill, 1924, and ask for its immediate consideration.

The SPEAKER. The Clerk will read the conference report.

Mr. LEATHERWOOD. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Utah makes the point of order that there is no quorum present. The Chair will count.

Mr. LEATHERWOOD. Mr. Speaker, I will withdraw the point of order temporarily.

The SPEAKER. The gentleman from Utah withdraws the point of order. The Clerk will read.

The conference report was read, as follows:

### CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 4, 5, 8, 9, 12, 13, 14, 20, 24, 41, 42, 49, and 57.

That the House recede from its disagreement to the amendments of the Senate numbered 7, 11, 16, 17, 19, 22, 25, 26, 38, 40, 43, 44, 45, 46, 47, 48, 50, 51, 52, 53, 54, 55, and 56, and agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following:

"SENATE

"For miscellaneous items, exclusive of labor, fiscal year 1924, $50,000.

"For payment for services rendered the Senate or committees thereof, as follows: John G. Holland, jr., $250; Ernest K. Hill, $250; Fred A. Eckstein, $860; Albert Reid, $125; Alexander K. Meek, $1,200; Louis Bose, $40; U. G. Gordon, $40; and James F. Sellers, $200; in all, $2,965."

And the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: On page 2 of the bill, line 22, strike out "five" and insert in lieu thereof "six"; and the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In the matter inserted by said amendment strike out the following: ", to be paid wholly out of the revenues of the District of Columbia"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For carrying out the provisions of the act entitled: 'An act to provide for the promotion of vocational rehabilitation of persons disabled in industry or otherwise and their return to civil employment,' approved June 2, 1920, as amended by the act of June 5, 1924, for the fiscal year 1925, $834,000: *Provided*, That the apportionment to the States shall be computed on the basis of not to exceed $1,034,000, as authorized by the act approved June 2, 1920, as amended by the act approved June 5, 1920."

And the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following:

"For additional hospital and out-patient dispensary facilities for patients of the United States Veterans' Bureau, and facilities for a permanent national training school for the blind, at a cost not exceeding $350,000, who are beneficiaries of the United States Veterans' Bureau, by purchase and remodeling or extension of existing plants, and by construction on sites now owned by the Government or on sites to be acquired by purchase, condemnation, gift, or otherwise, such hospitals and out-patient dispensary facilities to include the necessary buildings and auxiliary structures, mechanical equipment, approach work, roads, and trackage facilities leading thereto; and also to provide accommodation for officers, nurses, and attending personnel; and also to provide proper and suitable recreational centers, $3,850,000, to remain available until June 30, 1925, and in addition to this amount obligations may be incurred for the

purposes set forth in this paragraph not to exceed in the aggregate $3,000,000. That not to exceed 3 per centum of the total of $6,850,000 shall be available for the employment in the District of Columbia and in the field of necessary technical and clerical assistants at the customary rates of compensation, exclusively to aid in the preparation of the plans and specifications for the projects authorized herein and for the supervision of the execution thereof, and for traveling expenses and field-office equipment and supplies in connection therewith."

And the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: Before the sum named in said amendment, insert: "fiscal year 1925," and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 39, 58, and 59.

MARTIN B. MADDEN,
D. R. ANTHONY, Jr.,
JOSEPH W. BYRNS,
*Managers on the part of the House.*

F. E. WARREN,
CHARLES CURTIS,
W. L. JONES,
LEE S. OVERMAN,
WM. J. HARRIS,
*Managers on the part of the Senate.*

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report, namely:

On Nos. 1 to 6, inclusive, relating to the Senate: Appropriates collectively for extra compensation for services rendered to various committees of the Senate or to employees of the Senate instead of individually, as proposed by the Senate, and appropriates $50,000 for miscellaneous items, as proposed by the Senate.

On No. 7: Appropriates $50,000 for expenses of the joint committee to investigate Northern Pacific land grants, as proposed by the Senate.

On No. 8: Transfers the appropriation of $200, proposed by the Senate, for additional compensation to messenger at card door of the Senate to a paragraph similarly providing for other employees of the Senate.

On No. 9: Strikes out the appropriation of $250, proposed by the Senate, for additional salary of J. Mark Trice, an employee of the Senate.

On No. 10: Appropriates $2,000 for payment to John Gorman for expenses incurred as contestant in contested-election case of Gorman against Buckley, as proposed by the Senate, such payment to be made by the Clerk of the House.

On No. 11: Appropriates $5,000, as proposed by the Senate, in connection with the completion of the frieze in the rotunda of the Capitol.

On Nos. 12, 13, and 14, relating to the American Battle Monuments Commission: Provides for one motor-propelled passenger-carrying vehicle that may be furnished by the Secretary of War, as proposed by the House, instead of for an unlimited number of such vehicles that may be furnished by the Secretary of War or other departments of the Government, as proposed by the Senate.

On No. 15: Appropriates and provides for the payment of compensation to school officers and employees, to persons engaged in Americanization work, and to employees of the Community Center Department, in conformity with the act providing for the salaries of school-teachers, etc., as proposed by the Senate, amended to provide for the division of such expenditures as between the United States and the District of Columbia in the manner provided by law.

On No. 16: Appropriates $18,409.05 on account of medical charities, District of Columbia, as proposed by the Senate.

On Nos. 17, 18, and 19, relating to the Federal Board for Vocational Education: Appropriates $834,000 for vocational rehabilitation of persons disabled in industry, in accordance with the law enacted at the present session of Congress instead of in the language proposed by the State; and appropriates $75,000, as proposed by the Senate, for making studies, etc., regarding the vocational rehabilitation of disabled persons; and appropriates $5,000 to extend the provisions of such laws to the Territory of Hawaii, as proposed by the Senate.

On Nos. 20 and 21, relating to the United States Veterans' Bureau: Appropriates $1,188,500 for administration expenses, World War adjusted compensation act, as proposed by the House, instead of $750,000, as proposed by the Senate; and appropriates $3,850,000 for additional hospital and out-patient dispensary facilities for patients of the United States Veterans' Bureau, and in addition authorizes contract obligations on account of such facilities for $3,000,000, instead of appropriating $6,850,000 for such facilities, as proposed by the Senate.

On No. 22: Appropriates $10,000 for enforcement of the naval stores act under the Department of Agriculture, as proposed by the Senate.

On No. 23: Appropriates $10,000 under the Department of Agriculture in connection with the "nail-head rust," as proposed by the Senate, amended to make such appropriation available for the fiscal year 1925.

On No. 24: Strikes out the provision proposed by the Senate with respect to certain financial transactions of James W. Boyer, jr., formerly connected with the Bureau of Foreign and Domestic Commerce.

On No. 25: Appropriates $50,000, as proposed by the Senate, to reimburse the State of Utah for moneys advanced to secure the survey of lands granted to said State.

On No. 26: Appropriates $7,500 for rebuilding barns at Carson City Indian School, Carson City, Nev., as proposed by the Senate.

On No. 38: Makes the appropriation for books for judicial officers, fiscal year 1924, available for a set of Federal Reporter and digest thereon, as proposed by the Senate.

On Nos. 40 and 41, relating to the Department of Labor: Increases the amount which may be spent of the appropriation "Expenses of regulating immigration, 1925," for personal services in the District of Columbia from $75,000, as proposed by the House, to $100,000, as proposed by the Senate; and strikes out the proposal of the Senate to amend section 24 of the act to regulate the immigration of aliens, etc., enacted February 5, 1917.

On Nos. 42 and 43, relating to the Navy Department: Strikes out the appropriation of $11,379.10 proposed by the Senate for the settlement of damage claims; and appropriates $5,000, as proposed by the Senate, in connection with certain fishery rights in and about Pearl Harbor, Hawaii.

On Nos. 44 and 45, relating to the State Department: Corrects the number of the conference of the Interparliamentary Union to be held in Washington in 1925, as proposed by the Senate.

On Nos. 46, 47, and 48, relating to the Treasury Department: Appropriates $281.95 and $2,300 for the fiscal years 1924 and 1925, respectively, to pay the increase in salary of the Government actuary in accordance with the revenue act of 1924, as proposed by the Senate; appropriates $16,140,000 for refunding income taxes under title 12 of the revenue act of 1924, as proposed by the Senate; and appropriates $756.62 for suppressing counterfeiting and other crimes, fiscal year 1923, as proposed by the Senate.

On Nos. 49 and 50, relating to the War Department: Strikes out the provision proposed by the Senate in connection with certain financial transactions of a former military attaché at Santiago, Chile; and appropriates $38,000, as proposed by the Senate, for flood-control surveys.

On Nos. 51 to 54, inclusive, relating to judgments, United States courts: Appropriates $17,937.67, as proposed by the Senate, instead of $6,224.12, as proposed by the House.

On No. 55: Appropriates $1,497,303.69, as proposed by the Senate, for the payment of judgments rendered by the Court of Claims.

On No. 56: Appropriates $267,040.25 for audited claims, as proposed by the Senate.

On No. 57: Strikes out the legislation proposed by the Senate with respect to allowances for official travel.

The committee of conference has been unable to agree upon the following amendments of the Senate:

On Nos. 27 to 36, inclusive, relating to the Reclamation Service.

On No. 37, relating to advances to the United States marshals.

On No. 39, relating to Government-owned bridge at Fort Leavenworth, Kans.

On No. 58, relating to the Reclamation Service.

On No. 59, numbering the final section in the bill.

MARTIN B. MADDEN,
D. R. ANTHONY, Jr.,
JOSEPH W. BYRNS,
*Managers on the part of the House.*

Mr. MADDEN. Mr. Speaker, the amount of the second deficiency, 1924, as passed by the Senate, was $194,778,505.59. The amount of the bill as passed by the House was $160,884,048.38. There was added by the Senate $33,894,457.21. The amount of the Senate recessions is $2,573,129.10. The amount of House recessions is $24,084,240.11. The amount in disagreement is $7,237,088.

The important House recessions are as follows:

| | |
|---|---|
| Miscellaneous items, Senate | $50,000 |
| Joint Committee to Investigate Northern Pacific Land Grants | 50,000 |
| Pay of school-teachers, officers, and others, due to new teachers' pay bill | 1,151,970 |
| Vocational rehabilitation of persons disabled in industry, new law | 909,000 |
| Veterans' Bureau, hospital construction under new law | 3,850,000 |

Mr. HASTINGS. Mr. Speaker, will the gentleman yield there?

Mr. MADDEN. Yes.

Mr. HASTINGS. On that item was there an authorization of $3,000,000 additional?

Mr. MADDEN. Yes. We give them a contract authorization, just what they wanted.

Mr. HASTINGS. The appropriation and authorization together amount to $6,850,000?

Mr. MADDEN. Yes.

Mr. HASTINGS. And the $3,850,000 is immediately available?

Mr. MADDEN. Yes; immediately available; and the right to contract for the other $3,000,000.

Then the other important House recessions are as follows:

| | |
|---|---|
| Naval stores act, enforcement | $10,000.00 |
| Nail head rust, eradication | 10,000.00 |
| Reimbursement to State of Utah for advances made for survey of lands | 50,000.00 |
| Refund of taxes under the revenue act of 1924, 25 per cent reduction title | 16,140,000.00 |
| Flood-control surveys, Susquehanna, Monongahela, and Allegheny Rivers, and Puyallup River, Wash | 38,000.00 |
| Judgments, United States courts, certified since the bill left the House | 11,713.55 |
| Judgments, Court of Claims, certified since the bill left the House | 1,497,303.69 |
| Audited claims, certified since the bill left the House | 267,040.25 |

The Senate items of recession are as follows:

| | |
|---|---|
| Veterans' Bureau hospitals (Provided as a contract authorization.) | $3,000,000.00 |
| Navy claims for loss or damage to private property | 11,379.10 |

The Senate items in disagreement are as follows:

Legislation creating a bureau of reclamation in the Interior Department, making the salary of the director $10,000 a year and providing for his appointment by the President with confirmation by the Senate instead of under the present method of appointment by the Secretary of the Interior.

Legislation of a comprehensive character and permanent in form affecting the reclamation policy of the Government.

Additional appropriations for the fiscal year 1925 for reclamation projects totaling $7,147,088, which would be in addition to the total of $10,856,000 carried in the Interior Department appropriation bill for the next fiscal year.

Mr. BANKHEAD. Mr. Speaker, will the gentleman yield in that connection?

Mr. MADDEN. Yes.

Mr. BANKHEAD. That is not out of the Treasury, of course?

Mr. MADDEN. That is out of the reclamation fund which is in the Treasury. That would be in addition to the $10,856,000 already carried.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. Just let me finish this statement, and then I shall be glad to yield.

The items involved in the $7,147,088 are as follows:

| | |
|---|---|
| North Platte project, Nebraska-Wyoming, Guernsey Reservoir | $800,000 |
| Spanish Springs division of Newlands project, Nevada | 800,000 |
| Salt Lake Basin project, Utah | 1,500,000 |
| Owyhee project, Oregon | 1,250,000 |
| Warm Springs (Vale) project, Oregon | 250,000 |
| Kittitas unit, Yakima project, Washington | 1,500,000 |
| Yuma project, Arizona | 997,088 |
| Carlsbad project, Arizona-New Mexico | 50,000 |

The only items for which estimates were submitted were $800,000 for the Guernsey Reservoir and $200,000 for the Spanish Springs project, for which $800,000 was added by the Senate.

The Senate also added an amendment changing the allowances for per diem in lieu of subsistence of employees traveling on official business from $4 to $5, and from that amendment the Senate has receded.

The Senate reduced the appropriation for administrative expenses of the Veterans' Bureau for carrying into effect the World War adjusted compensation act from $1,188,500 to $750,000, and on that item the Senate has receded and restored the House figures.

The Senate has added $90,000 for the development of oil shale under the Bureau of Mines. This amendment the House conferees have refused to yield on and the Senate has insisted. The amendment therefore is brought back to the House in dispute. The Bureau of Mines has an appropriation for the next fiscal year of $500,000 for investigations in connection with petroleum and natural gas, which is $100,000 more than the appropriations for the current year. They did not ask any money for oil-shale work in the regular annual bill. At that time the director said:

The present bill contemplates that we shall continue for the present the laboratory research at Boulder and Salt Lake City on a small scale and leave for the future the development of a semicommercial plant, either in connection with the Navy or independently. We are conducting the work on a small scale only, and in our judgment it will be wise to carry it out on a larger scale before it goes into commercial production. But we are not asking at this time that you should give us money for that.

A very serious problem confronts the House in connection with the legislation and appropriations in the Senate amendments affecting the Reclamation Service. The Senate, without estimates from the President, except in the case of two projects involving $1,000,000, has added $7,147,000 for reclamation purposes on eight different projects. These sums have been added to the bill in the closing hours of the session. If they should be granted, they would bring the total for reclamation purposes for the next year to $18,000,000. The Committee on Appropriations and the House allowed $146,500 for investigations in connection with these projects for which the Senate has appropriated to start construction. We believe that further investigation should take place and full ascertainment of cost estimates obtained before construction appropriations are made. The Director of Reclamation was closely examined upon this point, and I want to take the time to quote what he replied to inquiries propounded to him.

The CHAIRMAN.—

Speaking now to the Director of Reclamation, Doctor Mead—

I understood you to say that the Owyhee and Vale projects in Oregon, the projects in the Salt Lake Basin of Utah, the Kittitas division of the Yakima project in Washington, and the Casper-Alcova project in Wyoming would cost in the aggregate about $60,000,000.

Doctor MEAD. The total of these, leaving out the Casper-Alcova project and including the other four—that is, taking the North Platte, the Newlands, and the other four, or, rather, five, if you count the Utah projects as one project—will cost $60,000,000.

The CHAIRMAN. What have you to say as to the practicability of those projects, or either of them; or do you know?

Doctor MEAD. No, sir; I am not in a position to say. What I feel is that when you get an acre-cost for water as high as these are you must know all of the other things that enter into the value of the farm. You must know what those other things will be before giving any opinion as to their feasibility.

The CHAIRMAN. Are you in a position to say that if the money were provided now for these projects, or for either of them, outside of the two that you have asked money for, you would be able to proceed with the construction of the work with any degree of certainty as to what the outcome would be?

Doctor MEAD. No, sir; I do not know whether I would approve them or disapprove them.

The CHAIRMAN. You are not in a position, however, to say that there is no present possibility of entering successfully upon the construction of either of the projects I have indicated?

Doctor MEAD. No, sir; I am not able to say one way or the other as to that.

Mr. BUCHANAN. In other words, you do not know whether or not it would be advisable to construct them?

Doctor MEAD. No, sir. When I say to you gentlemen that you ought to go ahead with the construction, you have a right first to know every fact that enters into the question of the feasibility of the project, and I do know them now.

The CHAIRMAN. And I assume that that is the reason why you are asking for the $125,000; that is, you want to investigate?

Doctor MEAD. That is why we are asking for the $125,000.

The CHAIRMAN. One hundred and twenty-five thousand dollars is what you are asking for the investigation of these projects?

Doctor MEAD. Yes, sir.

Then, later on, I said:

The CHAIRMAN. And that is also the reason why you are not asking for money to begin construction work on these projects?

Doctor MEAD. That, I take it, is the reason why the President did not ask for it.

The CHAIRMAN. Of course, you did not ask for it, or the department did not. Let us find out whether, from your present knowledge of the facts in the case, you would be in a position to decide the question for yourself. Would you at this time deem it advisable to begin construction on either of these projects?

Doctor MEAD. No, sir; I would begin investigations, and what I did would be determined entirely by that.

The CHAIRMAN. Suppose these lands within the range of these projects were your own lands, and you had a lot of money that you wanted to invest in reclamation, would you invest your money in either or any or all of these projects without definite knowledge as to what could be done and as to what would be the ultimate outcome?

Doctor MEAD. I would want to have more information than I have at present.

The CHAIRMAN. You think that the wisdom of the situation would not justify an appropriation if construction work were urged at the present time in connection with any of them?

Doctor MEAD. It would not justify it unless it was tied up with that proviso.

The CHAIRMAN. If it were tied up, the appropriation would not do any good. Is that so?

Doctor MEAD. It would be an appropriation that would be left with the Interior Department to either approve or veto afterwards. That would be the condition of it.

The CHAIRMAN. You think that the approval of the project by Congress would lead to false hopes on the part of those who might expect results?

Doctor MEAD. It might.

There is the story. In face of that information the Committee on Appropriations of the House refused to appropriate for these projects, but in the face of that information and notwithstanding the action of the House the Senate did insert these items in this bill, and we are back here now, Mr. Speaker and gentlemen of the House, in disagreement on the action of the Senate.

Now, I wish to say that the legislation changing the reclamation law has no place upon an appropriation bill, no matter how meritorious the legislation may be, and I contend it is not right to attach a comprehensive reclamation law to an appropriation bill. Such a law, if it were enacted, might have great merit in it. I do not know. I have not had time to study it. It has been dumped into the hopper, and we have been called upon to look at it. We have had no chance to study it. As chairman of the Committee on Appropriations I have striven in good faith to keep the bills free from legislation as they came from the committee and have tried to prevent the amendment of the bills in order to protect the legislative jurisdiction of other committees. I have had no ulterior purpose. I may be for or against the legislation, whatever it may be, but whether I was for or against the legislation I would be opposed to having it attached as a rider to an appropriation bill, and, therefore, we bring this back in disagreement.

The legislation presented here is far-reaching in character, and I can not undertake now to say to the House whether it is wise or unwise, because it has not been presented in a manner that gives sufficient time for study. I do not know about all this proposed legislation, and I do not think I ought to be called upon to pass judgment on legislation as far-reaching as this is without having an opportunity to study it. Therefore, I am bringing it back to the House for whatever action it may desire to take, and whatever action the House sees fit to take I will abide by. I am not here saying what action it should take, and it is for the House to tell me what to do, because I am the servant of the House, and as one of the conferees speaking for the House I propose to carry out the mandate of the House.

Now, I want to say further that if this legislation came up in the House in the ordinary course it would take a day or two for its consideration. We are asked here in the closing minutes of the session to place it upon the statute books as a rider upon an appropriation bill. To that proposal I can not give my assent. Under the rules of the House, very wisely changed to provide ample opportunity to let the House judge whether it wants to legislate on appropriation bills, the House managers have brought this matter back. Those Members who are interested in the legislation have their rights under the rules when the amendment is called up. As chairman of the Committee on Appropriations and without reference to the merits of the legislation itself I am compelled to oppose its insertion in this bill in this manner. I have not had time to study the proposal as I should before I would recommend it to the House. I will not take that responsibility. If the House votes to place the amendment in the bill, it will do so on the recommendation of other gentlemen and upon statements they may make as to the effect of the legislation. The responsibility for such action will rest primarily with the House.

I protest against the practice of putting legislation on appropriation bills, and I want to be understood as having fought this from the day the Budget act was passed and the rules of the House so changed as to prohibit legislation going on appropriation bills. [Applause.] I want to help the House keep the legislative jurisdiction in the committees which are charged with legislative responsibility. I do not want them to impose that responsibility on the Committee on Appropriations, because we do not want to assume it; we have enough to do without it.

If I were fully acquainted with the merits or need for the legislation and thought it desirable, I would still protest against the manner of its presentation in the House, and I shall move to insist on the disagreement of the House to these amendments.

Mr. Speaker, I move the adoption of the conference report. These matters are outside the conference report.

Mr. SINNOTT. The gentleman's present motion does not include them?

Mr. MADDEN. No.

Mr. BLANTON. Will the gentleman yield for a question?

Mr. MADDEN. Yes.

Mr. BLANTON. I notice the gentleman has receded from the amendment which provides $50,000 for the Northern Pacific land grants investigation.

Mr. MADDEN. We were directed to do it by law.

Mr. BLANTON. Has such a bill passed this House?

Mr. MADDEN. Yes.

Mr. BLANTON. There have been so many passed in the last 48 hours that I did not know whether it had been passed or not.

Mr. MADDEN. This is done in conformity with the law. We did not do it until we had a law authorizing it.

The SPEAKER. The question is on agreeing to the conference report.

Mr. SINNOTT. Mr. Speaker, a parliamentary inquiry. I understand this motion does not include Senate amendments 27 to 34 or amendment No. 58.

Mr. MADDEN. No; it does not.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to take up all of these reclamation project amendments—amendments Nos. 27, 28, 29, 30, 31, 32, 33, 34, and 36—and consider them en bloc.

Mr. SMITH. That does not include amendment No. 58?

Mr. MADDEN. No.

Mr. BLANTON. Mr. Speaker, I reserve the right to object to ask a question. We know the attitude of the gentleman from Illinois, and if he were able to carry out his wishes there could be no objection; but we have our friends from Idaho and Oregon and other places interested in this $100,000,000 proposition——

Mr. MADDEN. This is to expedite consideration.

Mr. BLANTON. What I want to know is whether the gentlemen is going to see that the time is equally divided on this proposition or is he going to give all the time to the gentlemen who want to put over this proposition?

Mr. MADDEN. I will have control of the time, and I will see that nobody loses any rights.

Mr. BLANTON. I want a little time to discuss this matter they are trying to put over here.

The SPEAKER pro tempore (Mr. SANDERS of Indiana). Without objection, the amendments will be considered en bloc and the Clerk will report the first amendment in disagreement.

There was no objection.

Mr. SINNOTT. Mr. Speaker, a parliamentary inquiry. When is the proper time to offer a preferential motion?

The SPEAKER pro tempore. As soon as the amendments are reported.

The Clerk read as follows:

Amendment No. 27, page 32, after line 8, insert:

"For all expenditures authorized by the act of June 17, 1902 (32 Stats., p. 388), and acts amendatory thereof or supplementary thereto, known as the reclamation law and all other acts under which expenditures from said fund are authorized, including salaries in the District of Columbia and elsewhere; examination of estimates for appropria-

tions in the field; refunds for overcollections hereafter received on account of water-right charges, rentals, and deposits for other purposes; printing and binding, not exceeding $15,000; purchase, maintenance, and operation of horse-drawn or motor-propelled passenger-carrying vehicles; payment of damages caused to the owners of lands or private property of any kind by reason of the operations of the United States, its officers or employees, in the survey, construction, operation, or maintenance of irrigation works, and which may be compromised by agreement between the claimant and the Secretary of the Interior; and payment for official telephone service in the field hereafter incurred in case of official telephones installed in private houses when authorized under regulations established by the Secretary of the Interior.

"North Platte irrigation project, Nebraska and Wyoming: For continued investigations, commencement of construction of the Guernsey Reservoir, and incidental operations, $800,000.

"Spanish Springs irrigation project, Nevada: For continued investigations, commencement of construction, and incidental operations, $800,000.

"Salt Lake Basin irrigation project, Utah: For continued investigations, continuation of construction, and incidental operations, $1,500,000.

"Owyhee irrigation project, Oregon: For continued investigations, commencement of construction, and incidental operations, $1,250,000.

"Warm Springs (Vale) irrigation project, Oregon: For continued investigations and for first payment toward purchase of an interest in the Warm Springs Reservoir, $250,000.

"Yakima irrigation project, Washington: For continued investigations, commencement of construction of the Kittitas unit, and incidental operations, $1,500,000.

"There is hereby established in the Department of the Interior a Bureau of Reclamation, and there shall be a director of the said bureau, who shall be thoroughly equipped for the duties of said office by technical education and experience, and who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall receive a salary of $10,000 per annum, and there shall also be in the said bureau such experts and other employees, to be appointed subject to civil service laws and regulations, as may be required to carry out the purposes of the reclamation act of June 17, 1902 (32 Stats., p. 388), and acts amendatory thereof or supplementary thereto, in accordance with the appropriations made from time to time by Congress for such purposes."

Mr. MADDEN. Mr. Speaker, amendment No. 36 perhaps should not be included in this list, and I ask unanimous consent that it be left out as it deals with a different proposition.

The SPEAKER pro tempore. The gentleman did not name amendment No. 35 in his motion.

Mr. MADDEN. No, sir; and No. 36, I think, should also be left out.

The SPEAKER pro tempore. Without objection, amendment No. 36 will be left out of the amendment to be considered en bloc.

Mr. MADDEN. Mr. Speaker, I move to further insist upon the disagreement of the House to the Senate amendment.

Mr. SINNOTT. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman from Oregon rise?

Mr. SINNOTT. To offer a preferential motion. I move that the House recede, and concur in the Senate amendments.

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from Idaho.

Mr. SMITH. Mr. Speaker and gentlemen of the House——

Mr. BLANTON. Mr. Speaker, this matter we are going to discuss involves $60,000,000, and I think that is a big enough proposition to have the membership here, and I make the point of order that there is no quorum present.

The SPEAKER pro tempore. The gentleman from Texas makes a point of order that there is no quorum present. The Chair will count.

Mr. BLANTON. Mr. Speaker, I withdraw it for the present.

Mr. SIMMONS. Mr. Speaker, I make the point of order there is no quorum present.

The SPEAKER pro tempore. The Chair will count. [After counting.] Ninety-eight Members are present, not a quorum.

Mr. LONGWORTH. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, when the following Members failed to answer to their names:

| | | | |
|---|---|---|---|
| Anderson | Burton | Doughton | Fisher |
| Andrew | Butler | Doyle | Garner |
| Bacharach | Byrnes, S. C. | Drane | Geran |
| Barkley | Celler | Drewry | Gifford |
| Beck | Clark, Fla. | Driver | Graham, R. |
| Boies | Cooper, Ohio | Fairchild | Griffin |
| Britten | Curry | Fairfield | Hammer |
| Browne, N. J. | Davis, Minn. | Faust | Hersey |
| Bulwinkle | Dickstein | Fenn | Howard, Okla. |
| Burdick | Dominick | Fish | Hudspeth |
| Jost | Lyon | Reed, W. Va. | Thatcher |
| Kahn | McFadden | Rogers, N. H. | Tucker |
| Kelly | McKeown | Romjue | Vare |
| Kent | McLeod | Rosenbloom | Ward, N. Y. |
| Kerr | McSwain | Rouse | Ward, N. C. |
| Kiess | Michaelson | Scott | Weaver |
| Knutson | Miller, Ill. | Sherwood | Welsh |
| Kunz | Moore, Ill. | Spearing | White, Me. |
| Langley | Morin | Steagall | Wilson, Miss. |
| Larson, Minn. | Mudd | Stengle | Wright |
| Lilly | Paige | Sullivan | Young |
| Little | Phillips | Sweet | Zihlman |
| Logan | Quayle | Taylor, Tenn. | |

The SPEAKER pro tempore. Three hundred and forty-two Members have answered to their names. A quorum is present.

Mr. MADDEN. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

Mr. SMITH. Mr. Speaker, I yield the time allotted to me to the gentleman from Oregon [Mr. SINNOTT].

Mr. SINNOTT. A parliamentary inquiry, Mr. Speaker.

The SPEAKER pro tempore. The gentleman will state it.

Mr. SINNOTT. How much time have I in my control under the rule, having made a preferential motion?

Mr. MADDEN. The gentleman can not take me off the floor on a conference report.

The SPEAKER pro tempore. The conference report has been agreed to. The Chair thinks it is a proper inquiry raised by the gentleman from Oregon. The gentleman from Illinois offered a motion to further insist on the disagreement to the Senate amendments. Upon that he would be entitled to time, as he is in charge of the bill. The gentleman from Oregon offers a preferential motion, but the Chair is under the impression that the gentleman from Illinois is not thereby deprived of the control of the time. That seems to be the precedents, although the logic of the situation would seem to be the other way.

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from Ohio [Mr. BEGG].

Mr. BEGG. Mr. Speaker and Members of the House, in five minutes a man can not go into the details to prove his statements at very great length. I am going to ask you to examine this matter carefully. To me you might as well sign a blank check and send it over to these men, unless I am entirely mistaken in the language, and the proponents of the bill who come after me will have an opportunity to tell you whether I am right or not.

Turn to page 82, subsection (f), and read the lines 7, 8, and 9:

The installment of the construction charge per irrigable acre payable each year shall be 5 per cent of the average gross annual acre income for the 10 calendar years first preceding—

And so forth. Now, that is for the 10 preceding years. If this land was nonproductive for 10 preceding years before the irrigation project was put over, the charge against the acreage is nothing.

Now read lines 17, 18, 19, 20, 21, and 22, and under those lines the Secretary is authorized to rewrite every contract of irrigation that is now in effect on the basis of the above lines on the 5 cents per acre of the productivity for the 10 years prior to the irrigation project. Why, there is not a man in the House who can even form an estimate to-day as to what the cost to the Government will be if such a project becomes a law. If I am not in error, I would rather defeat the deficiency bill than sign this measure under the hold-up method of tying it up to an appropriation bill.

Mr. SMITH. Will the gentleman yield?

Mr. BEGG. I can not yield unless the gentleman can give me more time.

Mr. SMITH. The gentleman is in error.

Mr. BEGG. The gentleman can speak in his own time. If I am in error, he can show it then. On page 83, in the first paragraph, it turns back to the irrigating landowner to-day every property scheme that we have in existence by the creation of irrigation associations. Now, we have some irrigation and reclamation projects that are making money, and every one in this bill under the creation of the association of irrigation landowners will have the project turned back to them.

Worse than that, turn to the subsection at the bottom of the page. If there are any profits in the proposition to-day, those profits go to these landowners, and on page 84 it can be distributed the same as dividends of a corporation. Read lines 3 to 6 on page 84:

No distribution to individual water users shall be made out of any such profits before all obligations to the Government shall have been fully paid.

Why, men, in these reclamation schemes and irrigation projects when made at the charge of the Federal Government a man buys the land and pays the water rates. He does not have

any benefit. It is not for the benefit of the owners. The scheme is a governmental scheme, and we are charged to pay the losses, and if we are charged to pay the losses we ought to be entitled to the profits. It ought not to be turned over under any kind of a hasty proceeding like this.

Now, turn to page 85, where it says that the cost and expense of each such survey shall be charged to the appropriation for the project on account of which the same is made, but not to the cost of construction.

We are going to turn back to this association of irrigation projects all profitable ventures and continue to hold and rewrite contracts on the losing ventures and pay the losses.

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. BEGG. Mr. Speaker, I ask the gentleman to yield me one minute more.

Mr. MADDEN. Mr. Speaker, I yield one minute more to the gentleman from Ohio.

Mr. BEGG. Read on page 86, subsection O, and see what you have. There it is provided that the cost and expense after June 30, 1925, of the main office at Washington, D. C., of the Bureau of Reclamation in the Department of the Interior, and the cost and expense of general investigation, and so forth, shall be charged to the Government, and there is no avenue under this law for the United States to reclaim a single nickel of its losses; and in the face of it all there are more farm products being produced to-day in the United States than we can consume, else we are in error in all of the demands that have been made for farm-relief legislation, one of them to appropriate $200,000,000 to care for the surplus. Let us not be fooled; let us be a little bit consistent on business matters and vote as business men should vote, after we have had a chance to consider and go into the merits of the situation. [Applause.]

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from Utah [Mr. LEATHERWOOD].

Mr. LEATHERWOOD. Mr. Speaker, I shall not at this time attempt to discuss the salient features of the proposed new legislation, but if gentlemen will follow the bill they will find that the gentleman from Ohio [Mr. BEGG] has not sensed the purpose of the proposed legislation. This legislation does not come here without thought or consideration. It comes here after thought upon the part of some of the best minds in this country upon the subject of reclamation and after a long period of consideration. I shall not attempt to discuss the legislation at this time, and in the few moments that I have I will discuss amendment No. 30, which refers to the Salt Lake Basin project.

Utah since the beginning of reclamation has had one little project, and she will pay back to the Government every dollar of that money according to contract. She has put into the reclamation fund much more than she has ever taken out of it. These moneys that we are asking now to have appropriated are trust funds derived from the sale of our public lands and oil leases. The Salt Lake Basin project lies between the city of Ogden and the city of Provo.

It is tapped by two great transcontinental railways. It has an interurban electric line running throughout the land to be reclaimed. It has paved roads putting it in touch with markets. In addition to that, there is a market for the surplus agricultural products in that very locality. There is being opened within the very heart of this proposed region a great steel mill. Within 25 miles of it is one of the largest open-mining copper mines in the world, producing 50,000 tons of ore per day, employing 7,000 men. Within 20 miles of this project there is to-day the greatest precious metal smelting industry in the United States. There we have the markets and this project is already organized into irrigation districts and prepared to tax the property to pay every dollar of the proposed appropriation for this project back to the Federal Government. You will have $5 of security for every dollar that it is proposed to put into this project and up to the present time my State shows not a dollar of loss to the Federal Government. It is nothing but just, it is nothing but fair, that after 20 years my State, with only one little project, and which has put hundreds of thousands of dollars into this trust fund from the sale of its lands and its oil leases, should get at least some equity in the matter. I come to you not with any apology for reclamation in my State. It is solvent. It will pay back to the Government and to the reclamation fund every dollar. My good friend from Ohio [Mr. BEGG] knows all about agriculture in the State of Ohio, I have no doubt, but he has demonstrated in the five minutes that he has talked that he knows as little about reclamation as any gentleman that I have ever heard discuss the question. This charge that he complains about is not against the funds of the Government, it is against the reclamation fund. It is our money, so to speak, and I remind some of you gentlemen who are so concerned about the disposition of the reclamation money of the fact that if you will go back a little bit in history you will find out how much your States have had from the sale of public lands in the past, not a dollar of which you have ever returned to the Treasury of the Federal Government.

The SPEAKER pro tempore. The time of the gentleman from Utah has expired.

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from Tennessee [Mr. BYRNS].

Mr. BYRNS of Tennessee. Mr. Speaker, I am opposed to the motion to concur in this amendment. I do not come from a State where reclamation is in progress. I am aware, as the gentleman from Utah [Mr. LEATHERWOOD] says, that the funds which are expended come from the reclamation fund, but I believe that in opposing this proposition I am acting as the friend of the reclamation fund, and I most respectfully suggest to my friends who come from these reclamation States that the very worst thing they can do to their reclamation projects and the future of reclamation is to sustain efforts to make appropriations at the eleventh hour of the session of Congress, on the eve of adjournment, amendments carrying $7,000,000, involving possibly $60,000,000 of future expenditures without any investigation, without any report from the Budget or from the Executive. [Applause.] That is just what this means. You have a proposition here to appropriate $7,000,000, proposed at this late hour by the Senate, for the next year upon five or six new projects and which I am told will involve sixty million or more dollars before they are completed. Yet the gentleman from Illinois read you a while ago a statement from Doctor Mead, the present reclamation director, and who impresses me not only as a man of high ability but of very earnest interest in this kind of work, in which he said that he could not justify any one of these projects, because he had not had an opportunity to investigate them and would not therefore recommend them at this time. The bill which passed the House carries an appropriation of $125,000 to enable the director of the reclamation fund to make his investigation, and he says that with that money he will be able to come back to Congress this fall and tell Congress just which of these projects should be started. Why are we in such haste to do this? Who is going to be hurt by a six months' delay? In December the Congress will be back here, and if these projects are justified, Doctor Mead will be here with a report to Congress recommending them and asking for the necessary appropriation to support them. Is some one afraid that his project will not be approved and therefore wishes to commit the Government before an investigation is made? We have an example of what this means. There is an amendment pending on this appropriation bill that seeks to defer payments to be made by water users on projects which have proven to be unprofitable.

We are asked now to defer these payments for a period of three years. Why? Because the projects themselves are not profitable and ought not to have been undertaken; because they spent too much upon them; because it has cost the water users too much money, and they find themselves in a position where they can not make enough on the land to pay the cost of those projects; and yet here we are asked blindly, without investigation by the proper authorities, to start new projects, some of which may prove profitable and others, as far as we know, may prove unprofitable. Gentlemen, it is not good legislation in the last hour of the session without a report from the Budget, without a recommendation from the President, without a recommendation from the man who has direct charge of this matter, but who on the contrary has asked for time to investigate the feasibility and value of these projects before the Government is committed to such a tremendous expense. It is not right, simply on the request of some gentleman over in another body who is interested in these projects, who has some one project in his State in which he is interested, to ask us under our obligations to concur in the amendments offered. [Applause.]

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. MADDEN. I yield to the gentleman from Kansas [Mr. HOCH] to prefer a request.

Mr. HOCH. Mr. Speaker, I ask unanimous consent to call up Senate Joint Resolution 107, to insist on the House amendment and agree to the conference asked by the Senate, and that the Speaker pro tempore appoint conferees without intervening motion.

The SPEAKER pro tempore. The gentleman from Kansas asks unanimous consent to call from the Speaker's table Senate Joint Resolution 107, which the Clerk will report.

The Clerk read as follows:

Senate Joint Resolution 107, declaring agriculture to be the basic industry of the country, and for other purposes.

The SPEAKER pro tempore. And insist upon the House amendment and agree to the conference asked by the Senate, and the conferees be appointed without intervening motion. Is there objection?

Mr. HUDDLESTON. Will the gentleman withhold that for a moment so I can see what it is?

Mr. HOCH. Well, it simply sends it to conference.

Mr. HUDDLESTON. I want to see what amendments were adopted.

Mr. HOCH. The Senate has not adopted any. The Senate disagreed to the House amendments and adopted nothing.

Mr. HUDDLESTON. I would like to see if the gentleman will withhold it.

Mr. HOCH. I will withhold the request for the moment.

The SPEAKER pro tempore. The gentleman from Kansas withholds the request.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its chief clerk, announced that the Senate had passed with an amendment House Joint Resolution 283, to permit to remain within the United States certain aliens in excess of quotas fixed under authority of the immigration act of May 19, 1921, in which the concurrence of the House was requested.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the joint resolution (S. J. Res. 85) authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensive observance of that greatest of all historic events, the bicentennial of the birthday of George Washington.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 1414. An act to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington.

The message also announced that the Senate had passed with amendment the bill (H. R. 71) authorizing the Cowlitz Tribe of Indians residing in the State of Washington to submit claims to the Court of Claims.

SECOND DEFICIENCY BILL

Mr. MADDEN. Mr. Speaker, I yield two minutes to the gentleman from Utah [Mr. COLTON]. [Applause.]

Mr. COLTON. Mr. Speaker, whenever anything concerning the farmers is brought up on the floor of this House many so-called farmers' friends are here offering some kind of remedy, some kind of medicine other than what the farmer wants. The savant from Arkansas [Mr. WINGO] had a complete remedy for all the ills of the farmer yesterday, and yet when the only bill that would give real relief was up for consideration—a bill which farmers everywhere asked for—he did not even vote upon the measure at all.

During the debate yesterday, according to the RECORD, this great statesman, with the weight of empires resting upon his mighty brain, took occasion to question the intelligence of a people who would send a Representative here who did not know what the Democratic Party had done for the farmer. Gentlemen, while I realize this was said in joke, let me say that America has no better nor more enlightened, no better educated people than those I have the honor to represent. Let me say further no class of people are more intelligent, more informed than the farmers of this country. You will have hard work making them believe the Democrats have done much for them. Even the sage from Arkansas will not be able to show them.

The farm loan act and the reserve act were all right for the purpose intended, but they only enabled the farmer to get further in debt. What he wants is a chance to get a fair market for his products. The tariff furnished him a good home market and insured prosperity here at home. He now wants a market for his surplus products; give him this and he will work out his own salvation. The bill that would have done that was killed by just such friends of the farmers as are opposing this legislation. The farmers of this country are not going to be deceived. They know the genuine from the sham.

So here to-day objection is made that reclamation will cause overproduction by the farmer. Why, the Reclamation Service is the greatest blessing to the farmers in the world. Farmers on reclamation projects can diversify their crops. They are not compelled under reclamation projects to raise one particular crop. They may raise sugar beets, alfalfa, and other crops where there is no surplus, and it is the very best thing that can happen to the western farmer and for the country. Men who profess to be the friend of the farmer now come here and say, "You do not know what you want out in the West." Why, the country in one project has already invested $5,000,000, and that will lie idle, absolutely useless to the Government or anybody else, unless some amendment to this bill carries. I earnestly hope you will vote for this amendment. [Applause.]

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. COLTON. I ask leave to revise and extend my remarks.

The SPEAKER pro tempore. The gentleman has that privilege.

Mr. MADDEN. Mr. Speaker, I yield two minutes to the gentleman from Washington [Mr. SUMMERS].

Mr. SUMMERS of Washington. Mr. Speaker and gentlemen, in the two minutes allotted me I want to call your attention to the fact that the reclamation projects of the West are making markets for eastern products of from twenty-five to forty million dollars annually.

As to the merits of the items now under consideration, let me give you the facts in regard to one. The Secretary of the Interior, having had this under investigation for several years, reported favorably and asked for an appropriation last December. A few weeks ago, after the fact finders had made their report, he again made a request for these appropriations. One of the projects happens to be in the State of Washington, and here are the facts: The Kittitas High Line unit of the Yakima project immediately surrounds a fertile tract of 50,000 acres that has been in a high state of production for 30 or 40 years.

Mr. CARTER. What project?

Mr. SUMMERS of Washington. The Kittitas unit of the Yakima. Two transcontinental railroads, two hard-surface roads traverse the tract. A State normal school in a beautiful county seat town is in the middle of the tract. The Government has erected a $5,000,000 dam, and no place to use the water except in very limited amount until this unit is completed. Now, are you going to delay it? It is going to take 6 or 8 or 10 years in any event, and every year you delay it means that much longer the country must carry the overhead. A $5,000,000 dam absolutely useless. Is it any wonder that the country gets out of patience with Congress for doing things that way? If you did not intend to appropriate for this, then you ought never to have appropriated for that dam. Let us do this in a businesslike way—make the appropriation and dig the ditch.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Speaker, I am in favor of reclaiming all of the arid lands of the entire Northwest, but I am not in favor on the last day of a session to put a $60,000,000 legislative project as a rider on an appropriation bill, such as is attempted at this time. I will tell the gentleman from Idaho and the gentleman from Washington and the gentleman from Montana and the gentleman from Wyoming what they are fixing to do. They are fixing to get this important deficiency bill vetoed. They are fixing to get it killed. It is too late to pass it after we adjourn. They are fixing to kill this important deficiency bill by putting this $60,000,000 item on it. And it will not do to take any chances on killing the deficiency bill, as it embraces the appropriation for the bonus of our ex-service men.

Why, we passed the postal salary increase bill the other day to give the faithful, honest, hard-working postal employees a proper increase in salaries and to give a proper increase in salary to the hard-working, underpaid third and fourth class postmasters of the country. These underpaid postmasters and hard-working postal employees have waited years and years for this deserved increase. And we have promised them that we would pass their bill before this Congress adjourned. And we did pass it in the House. And the House has exhausted every means of putting it into law.

I was heartily in favor of that bill and helped to pass it. Now, since the bill has been vetoed by the President we find the Presiding Officer of another body this minute holding that that veto can not be called up and acted upon by that body until to-morrow morning, which is after the Congress adjourns, because, forsooth, it has not yet been entered on the Journal, and that it takes unanimous consent there for another body to even pass upon a President's veto. And this House here is sitting with its hands tied and its feet hobbled and can not do anything about it at all, and that postal salary bill is going

to die. Yet at the same time the very body that holds up that just compensation bill for the benefit of postal employees of this country has put as a rider on a deficiency bill this legislative item, which our distinguished chairman of the Committee on Appropriations, Mr. MADDEN, and Mr. Mead, the Director of the Reclamation Service, have said will ultimately cost the people $60,000,000.

Are you going to stand for it? I want to say this to our friends from the Northwest: If you force reclamation projects on appropriation bills like this, you are going to lose friends for reclamation here in the House, friends that we ought to have. I am with you for reclamation. There are semiarid lands even in the district which I have the honor to represent, and in States all around me. I have been for their development. We do not expect the Government to help us in Texas, because we have there no Government land, but we do expect to help around in the States next adjoining. You want to make friends instead of enemies on this reclamation proposition. The Congress will be back here in December. Do not urge this unreasonable $60,000,000 proposition on this appropriation bill. Wait until December, and after standing up like men before all our colleagues and presenting the matter to them and winning their support on the merits of the proposition, let us take up the matter in December, and not press it here now in the closing hour of this session.

Mr. CARTER. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. CARTER. The gentleman from Texas knows, of course, that there is considerable criticism against irrigation, and it comes about by ill-advised projects having been passed by Congress.

Mr. BLANTON. Our friend from Idaho [Mr. SMITH] knows that he has had one project there in his State—delightful a State as he has, and delightful a colleague as he is of ours—he knows that he has a project there that stinks to heaven, and here is a rider proposition for projects involving $60,000,000 without any consideration having been given them by the House at all.

Mr. CARTER. Does not the gentleman know that every one of these questionable projects has been brought in here just in this manner?

Mr. BLANTON. Exactly. They can not pass in any other way. [Applause.]

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from Montana [Mr. LEAVITT].

The SPEAKER. The gentleman from Montana is recognized for five minutes.

Mr. LEAVITT. Mr. Speaker and gentlemen of the House, one of the burdens of the western country having great irrigation projects is the lack of understanding—I might say the ignorance—of those who proceed on pure theory, and as a result make it difficult for us to continue our development.

In the few minutes I have at my disposal I will speak particularly of the new provisions for payment contained in this bill. That is the heart of this matter, and I want to say that it is not hasty legislation. For several weeks the Irrigation and Reclamation Committee of this House has been holding hearings and investigations and preparing a bill. The committee of this House did not write this rider into the appropriation bill now under consideration. It was put there by the Senate, but it should be passed.

Regardless of the business that any man goes into, he will succeed if he is able to make enough to pay his debts and has the privilege of paying them in such a way that he can meet them out of his business. That is all there is in this proposed new principle of payment on these reclamation projects. It is that, instead of a fixed period of years being set for payment, regardless of the cost of the project or the earnings—and it costs just as much to construct in a State where a single crop is all that can be expected as it does where two or three crops are grown—payment shall be required on a basis of what can actually be raised. It proposes to charge 5 per cent of the gross return, year after year, estimated over a period of 10 years, if there is 10 years of experience; and if not, over a lesser period of time.

That is the only way we will be able to get back the money that has been invested on some of these irrigation projects, simply on the basis of what they can earn instead of the fixed plan that has forced failures in some instances.

Mr. EVANS of Montana. Mr. Speaker, will my colleague yield there?

Mr. LEAVITT. Yes; I yield.

Mr. EVANS of Montana. If this legislation is not passed thousands of people will be dispossessed of their lands, will they not?

Mr. LEAVITT. Yes.

Mr. Speaker, I notice that on the ceiling of this Chamber of the House of Representatives the seal of my State of Montana is not represented with the rest, although we have been a State for 35 years. Nobody seems ever to have called attention to it before. I have taken steps so that this fall, when we meet again, it shall appear there among the seals of other States. [Applause.] It is in the same way, in urging this legislation for reclamation, that I am asking you, in the interest of development and our farming industry, to recognize my State among the States of the Union on an equal footing. Reclamation is required in a State like mine and in other similar States of the West, so that they will be enabled not only to produce things that can be sold in a market-gardening market but in order that we can produce sure forage crops, making possible the use of other lands for stock raising. We must be able out in that country to go on with this development, and, as has been said by my colleague, Mr. EVANS, unless this relief in the method of payment is afforded, which is not a quickly thought of thing which we are trying to ride through here, but the result of weeks of hearings and investigations by our committee—unless we can have that relief there will be many of my people dispossessed, who, under this fair method of payment, would be able to repay their obligations and put back into the Treasury the money that has been expended in the development of reclamation projects. [Applause.]

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. SNELL. Did we not recently extend the time on them all for three years?

Mr. LEAVITT. Yes; but that does not in any way satisfy the loan companies that are demanding that these payments be made, but who will be satisfied if we put them upon a business basis so that they can pay out in time.

The SPEAKER pro tempore. The time of the gentleman has expired.

### REVISION OF RAILROAD RATE STRUCTURE

Mr. HOCH. Mr. Speaker, I wish to announce that the gentleman from Alabama [Mr. HUDDLESTON] has withdrawn his objection to my unanimous-consent request and I desire to renew that request.

The SPEAKER pro tempore. The gentleman from Kansas asks unanimous consent to call up Senate Joint Resolution 107, insist on the House amendment and agree to the conference asked by the Senate, and that the Speaker pro tempore be authorized to appoint conferees without an intervening motion. Is there objection? [After a pause.] The Chair hears none.

The Chair appointed the following conferees: Messrs. WINSLOW, HOCH, and RAYBURN.

### SECOND DEFICIENCY BILL, 1924

Mr. MADDEN. Mr. Speaker, I yield four minutes to the gentleman from Michigan [Mr. CRAMTON].

Mr. CRAMTON. Mr. Speaker, the President sent us a message in April calling attention to the reclamation situation and the fact that there was nearly $28,000,000 on existing projects that he said would, perhaps, have to be charged off, representing expenditures in construction work on reservoirs, and so forth, on projects that had proven unproductive.

The gentleman from Utah would have us understand that it does not affect the General Treasury. The reclamation fund is in the Treasury for the service of the country just the same, and whenever that is exhausted they will want more money out of the general fund to put into the reclamation fund. In fact, the Smith-McNary bill, recently urged, contains a provision for a very large new appropriation from the general funds for similar work.

The character of the amendments put on in the Senate is to be judged in part by the Yuma amendment. As I understand, no amendment which was offered in the Senate was rejected; the lid was off. It was proposed for the Yuma project—which has been excluded from this group, but it illustrates the carelessness and the recklessness of this method of legislating—to take $100,000 not out of the reclamation fund but out of the general fund permanently, $100,000 each year out of the general fund for the benefit of a reclamation project.

Mr. Speaker, the evil of the plan before us, in overriding the Budget, has been stressed by the gentleman from Illinois [Mr. MADDEN]. The plan involves the approval of some six or eight projects, only two of which have been approved by the Budget, and one has, in effect, been ruled against. By this you will destroy the Budget system. If on the last day of the session the Senate can load down a deficiency bill with

everything they want and banding together, as they have in this case, refuse to have items considered on their merits, insisting it is all or none—rule or ruin—you destroy your Budget system absolutely.

Further, it abandons the control which Congress ought to exercise over the selection of the good projects and turns it over to the Interior Department, because these appropriations are in this form: They are subject to further investigation by the department, and if that investigation suits the Secretary of the Interior he builds the project; and if it does not suit him, he does not. We give him the right of selection, and everybody knows how terrific the political, geographical, and local pressure will be upon him. It is that kind of pressure that has caused $28,000,000 of admitted mistakes heretofore. Let us go no further in that.

Further, this amendment involves the building of undesirable projects, one of which, the Spanish Springs project, was declared by the service itself in the hearings before our committee last December as "not being regarded as feasible at this time," yet it is now presented to us, and we have no further time to consider it.

This program on the part of the Senate is condemned by the Senate itself when they put in the legislation, which will come up later—subsection (b)—which provides that no new project shall be approved, or even estimates submitted, until information in detail shall be secured as to the water supply, the engineering features, and everything else. Yet, they load this bill, in a sandbagging method, with items not so investigated. Having loaded themselves with all this loot, in their legislative program they put in the section which says that hereafter you must be good, "We will not approve anything hereafter until we know what we are doing." But in this bill they turn everything loose and wide open. [Applause.]

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. MADDEN. Mr. Speaker, I yield 10 minutes to the gentleman from Oregon [Mr. SINNOTT].

Mr. SINNOTT. Mr. Speaker, 10 minutes to represent the hopes, the aspirations, and the longings of people who have been waiting many years for appropriations for these projects, and also for the relief legislation expressed in amendment 58, seems to me like a travesty, like a burlesque on representative, deliberative government.

I have heard comments upon this bill which made me think of last Tuesday, when this House rebuffed the petition of the dry farmer from the West and the Middle West in behalf of the McNary-Haugen bill, and now we are asked to rebuff and deny the appeal of the wet farmer; at least that would seem to be the situation judging from the comments which have been made by several gentlemen, especially the comments made by the great irrigationist from Ohio [Mr. BEGG], who only demonstrates the fact that—

> A little learning is a dangerous thing;
> Drink deep or taste not the irrigation spring.

[Applause.]

He ridicules these six projects and says they have not been investigated, while the fact is, gentlemen of the House, that every one of these six projects has been thoroughly investigated for 10 or 20 years. The two projects in my State, the Owyhee and Warm Springs projects, have been investigated, and $100,000 has been expended in investigating those projects. Those projects have been approved conditionally by the Secretary of the Interior and by his engineer. They were sent down to the Budget Bureau and there held up. It is also true that every one of these six projects has been approved by the Secretary of the Interior, subject to further investigation, but they have all been held up by General Lord, of the Budget Bureau. They have been investigated for years.

The chairman of the committee read what Doctor Mead had to say, and here is the substance of Doctor Mead's advice to him: That he would not justify these appropriations unless they were tied up with certain provisos.

Mr. HOWARD of Nebraska. Will the gentleman yield?

Mr. SINNOTT. Excuse me; I can not yield now.

When Mr. Mead was before the chairman of the Committee on Appropriations he was talking about appropriations under the old reclamation law. If you adopt amendment 58 in this bill, the new reclamation relief bill, then every one of these appropriations will be safeguarded and not a cent can be expended upon any one of these projects until the Secretary of the Interior and his engineers find, in conformity with subsection (b), and make a finding in writing that it is feasible. Not until then can the money be expended.

The gentleman from Ohio [Mr. BEGG] speaks as though this money were coming out of the Treasury. It does not come out of the Treasury. It comes out of the reclamation fund, a special fund set apart for irrigation purposes in the West, a fund that is designed in some way to recompense the West for the enormous areas of land that you have withheld from taxation in the Western States.

In my own State you have set aside as a wood lot for the Nation from 13,000,000 to 17,000,000 acres of forest land. This little dole we get out of these appropriations will in some part recompense us for the withholding of that land from taxation.

Why do we want this to-day? "Hope deferred maketh the heart sick." My State has put $12,000,000 in the reclamation fund which comes from the sale of lands in my State, and we have only received from that fund between $5,000,000 and $6,000,000, and yet the people in my State look across State lines and we look over into another State that has put but $5,000,000 into the reclamation fund and we see that State enjoying $25,000,000, and we believe that we are entitled to this fund now.

The expenditure is well protected if you adopt amendment 58, the relief bill. The gentleman from Ohio [Mr. BEGG] ridicules that bill, and yet that bill has been the subject of the thought and the care and the counsel of the fact finding commission sitting upon it for six months, the Secretary of the Interior and Dr. Elwood Mead, the most noted irrigationist in the world, who was paid nearly $50,000 a year by the Government of Australia to go over there and superintend their irrigation propositions, and yet the irrigationist from Ohio [Mr. BEGG], with that air of finality in his voice that almost makes assurance doubly sure, tells us that this bill is poorly drafted; that we are going to reach into the Treasury of the United States and deplete that Treasury; and the gentleman from Texas [Mr. BLANTON], whose State was wise enough to keep its own public lands, ridicules the bill.

Would that the people of the Northwest Territory, when they came into this Union, when they wrung from England at the Champoeg meeting in Oregon in 1852 the States of Oregon, Washington, Idaho, and parts of Wyoming and Montana—would that they had had the sagacity of the pioneers of Texas and had retained their public lands. Then we would not be here asking you for the proceeds from this land to develop the land that those proceeds were intended by the God of Nature to be expended upon.

I wish I could take you out into my country and show you that the Almighty Himself meant the snows upon the mountains should be wedded to those broad areas of fertile volcanic dust. I wish you could see how amphitheaterlike the hills rise and radiate from the Colorado and the Columbia to the cardinal points. How hills pile on hills, how they rise in the purple haze of twilight like billows suddenly stilled on the crest; how the rim of the amphitheater and the horizon is pillared with a dozen lofty, eternally snow-capped peaks, once blazing beacons, now only reflecting above the dust of the valleys the soft glow of the setting sun as the day drops into the western waters of the Pacific. These snowcaps eternal are our reservoirs, the Almighty invites us to wed the snow on those mountains with our vast areas of fertile, volcanic dust, and this bill, if it is passed, will allow us to do that in a very small measure without taking a dollar from the Treasury of the United States, and I hope the Members of this House will not to-day rebuke the wet farmer of the West as you rebuked the dry farmer last Tuesday. [Applause.]

Mr. MADDEN. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Oregon [Mr. SINNOTT] to recede and concur.

The question was taken; and on a division (demanded by Mr. SINNOTT) there were—ayes 70, noes 80.

Mr. WILLIAMSON. Mr. Speaker, I object to the vote and ask for the yeas and nays.

The SPEAKER pro tempore. The gentleman has made two inconsistent motions.

Mr. VAILE. Mr. Speaker, I object to the vote on the ground that there is no quorum present.

Mr. BLANTON. Mr. Speaker, I make the point of order that where a point of order is made that there is no quorum present that stops everything.

The SPEAKER pro tempore. The gentleman from South Dakota made the same point, but the gentleman asked for the yeas and nays at the same time, and the two are inconsistent.

Mr. WILLIAMSON. Mr. Speaker, I object to the vote on the ground that there is not a quorum present.

The SPEAKER pro tempore. The Chair will count. [After counting.] Two hundred and twenty-six Members are present, a quorum.

Mr. SINNOTT. Mr. Speaker, I demand the yeas and nays.

The SPEAKER pro tempore. The gentleman from Oregon demands the yeas and nays. All those in favor of taking this vote by the yeas and nays will rise and stand until counted. [After counting.] Forty-six Members have risen, in the opinion of the Chair not a sufficient number, and the yeas and nays are refused.

Mr. EVANS of Montana. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. EVANS of Montana. Is one entitled to call for the other side?

The SPEAKER pro tempore. There must be one-fifth of those present. If the gentleman makes that demand, the Chair will count.

Mr. LONGWORTH. Mr. Speaker, I could not hear what the count was.

The SPEAKER pro tempore. There were 46 Members who rose.

Mr. LONGWORTH. I submit, Mr. Speaker, there is no other side. The Chair has just ascertained the number present.

The SPEAKER pro tempore. The Chair is of the opinion that there are more than five times 46 Members present. The Chair will court again. [After counting.] Two hundred and thirty-eight Members present. Not a sufficient number have arisen, and the yeas and nays are refused. The question recurs on the motion of the gentleman from Illinois to further insist on the disagreement to the Senate amendment.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 148, noes 58.

So the motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment.

The Clerk read as follows:

For the development of oil shale, including construction of necessary plant, purchase, lease, or condemnation of necessary land for erection of plant; purchase or mining of shale, operation of plant, and for all necessary expenses incident thereto, including clerical and technical assistance in the District of Columbia and elsewhere, to remain available until June 30, 1925, $90,000.

Mr. MADDEN. Mr. Speaker, I move to further insist on the disagreement to the Senate amendment.

The SPEAKER pro tempore. The gentleman from Illinois moves to further insist on the disagreement to the Senate amendment.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent that amendment 36, which is an irrigation project of some length—I ask unanimous consent that the reading of the amendment be dispensed with, and I move to further insist on the disagreement.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent that the reading be dispensed with. Is there objection?

The gentleman from Illinois moves to further insist on the disagreement to the Senate amendment.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Appropriations for salaries, fees, and expenses of marshals for the fiscal year 1924 and thereafter shall be available for advances to be made by United States marshals when authorized or approved by the Attorney General, the provisions of section 3648 of the Revised Statutes to the contrary notwithstanding.

Mr. MADDEN. Mr. Speaker, I move to recede and concur in the Senate amendment. This is an amendment to correct the statute on account of the decision of the Comptroller General.

The SPEAKER pro tempore. The gentleman from Illinois moves to recede and concur in the Senate amendment.

The motion was agreed to.

The Clerk read the next amendment in disagreement, as follows:

*Provided*, That said bridge shall be open to use by the public under such rules and regulations as prescribed by the Attorney General.

Mr. MADDEN. Mr. Speaker, I move to recede and concur.

The motion was agreed to.

Mr. MADDEN. Mr. Speaker, the next amendment is 58, and I ask unanimous consent that Senate amendments 58 and 59 be considered together, as 59 depends entirely on what is done with 58.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MADDEN. Mr. Speaker, there are four or five pages of this amendment. It is for a proposed irrigation or reclamation service in the West. I ask unanimous consent that the reading of the amendment be dispensed with.

The SPEAKER pro tempore. Is there objection?

Mr. RAKER. Reserving the right to object, will the gentleman allow me 10 minutes?

Mr. MADDEN. I can not do that, but I will give the gentleman five minutes. I want to get this bill back to conference.

Mr. RAKER. But the House ought to know what is in these amendments.

Mr. LONGWORTH. It is now 3 o'clock, and in four hours the two Houses will adjourn.

Mr. RAKER. I did not intend to object.

Mr. HOWARD of Nebraska. Reserving the right to object, and I will not object if the chairman will tell me what this is.

Mr. MADDEN. This is a proposal for a general law regulating reclamation projects.

Mr. HOWARD of Nebraska. The gentleman thinks it is not good?

Mr. MADDEN. It has never been presented for consideration in the House. It is a separate bill that they have attached to this appropriation bill.

Mr. HOWARD of Nebraska. And the gentleman wants to kill it?

Mr. MADDEN. I propose to move to further insist.

Mr. SUMNERS of Texas. Reserving the right to object, does the chairman mean to move to further insist on the disagreement?

Mr. MADDEN. Yes. Mr. Speaker, I move to further insist on the disagreement of the House to the Senate amendment.

Mr. SMITH. Mr. Speaker, I offer a preferential motion, to recede and concur.

The SPEAKER pro tempore. The gentleman from Idaho moves to recede and concur.

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from Idaho.

Mr. SMITH. Mr. Speaker and gentlemen of the House, the amendments which have been considered during the last hour and voted down were to provide for new projects. This amendment is to take care of the unfortunate settlers on established projects who are unable to meet their payments as provided under the reclamation law.

Mr. MOORE of Virginia. Mr. Speaker, will the gentleman tell me whether, in substance, this amendment No. 58 is the bill that was reported from the committee of which he is a member?

Mr. SMITH. Yes.

Mr. MOORE of Virginia. Was it a unanimous report?

Mr. SMITH. The amendment attached to this bill is copied from the Senate bill, as amended, and is similar to the one that I introduced in the House. The Senate bill was unanimously reported to the Senate. The House bill was reported favorably with but one dissenting vote. I may state that this legislation is based upon the report of the fact finding commission, composed of five of the most distinguished economists in the country, who have spent five months in examining these reclamation projects. They made their report to the Secretary of the Interior, which was transmitted to Congress by the President of the United States, with a message urging this legislation. As I stated, this legislation is intended to relieve the delinquent settlers on these projects and adjust the payments so that they may meet their obligations in the future.

The original reclamation law provided for 10 years within which to repay the charges for constructing these great dams and reservoirs. It was soon found out that because of the expenses incident to reclaiming the desert land, which amounts to $25 to $30, sometimes $40 and $50, an acre, it would be impossible to meet their payments under that law. Later Congress came to the relief of the settlers and extended the time to 20 years, and up until four years ago the settlers were able to meet their payments, but on account of the depression of agriculture throughout the country, they have found great difficulty in meeting their payments during the last four years.

The settlers on irrigation projects have an annual overhead expense amounting to from $10 to $20 per acre, which includes

the repayment cost of construction, expense of operation and maintenance necessary to keep up these projects, and also the interest charges which they are forced to pay on money which they had to borrow to meet this overhead expense at a time when they could not sell their agricultural products at a price which would enable them to discharge their obligations.

This bill was considered very carefully in the Committee on Irrigation and Reclamation covering a period of three weeks. We had before the committee two members of the fact finding commission who had been working for five months investigating reclamation projects. We brought out a bill which we believe is fair and equitable and which will protect these settlers in their homes. Without the enactment of this legislation it is quite probable that three or four thousand settlers on these projects who have been struggling to maintain their homes will be closed out by the mortgage holders who have advanced money to enable them to buy machinery and to take care of their farms.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. SMITH. Yes.

Mr. BLANTON. The gentleman wants to be fair; but when he states that this Senate bill, which has been put on this deficiency appropriation bill as a rider, is identical with the House bill he is mistaken.

Mr. SMITH. I did not say that it was identical.

Mr. BLANTON. I would vote for the House bill, because I think it is a good bill, but in the Senate bill there are some things that even the gentleman himself would not vote for.

Mr. SMITH. I said identical bills were introduced originally in each House of Congress. The bill was amended in the Senate and also in the House, and a new bill containing the amendments was introduced.

Mr. BLANTON. But the gentleman knows that the House bill which is attached to this deficiency bill as a rider is a much better bill.

Mr. SMITH. I think the Senate bill will bring relief to the settlers and will protect the Government in the investments which it has made. The gentleman from Ohio [Mr. Begg] attempted to criticize the bill, but anyone who is familiar with the reclamation laws and their administration can soon discover that he is not well posted on the points that he raised against this legislation.

The SPEAKER pro tempore. The time of the gentleman from Idaho has expired.

Mr. SMITH. May I have five minutes more?

Mr. MADDEN. Mr. Speaker, I yield the gentleman one minute more.

Mr. SMITH. Mr. Speaker, I appeal to this House to adopt this amendment in order to take care of the settlers who are delinquent in their payments, not only to the Government but who are so involved in debt that the bankers and the bondholders who have mortgages on their lands will most certainly close them out if the legislation is not enacted. These money lenders say that if this legislation is enacted, so as to put the settlers on the basis where they can pay, which gives them more time where the land is unproductive, they will not foreclose their mortgages. I appeal to you to not bring disappointment and discouragement to these worthy people on these projects located in the desert lands of the West, who are not only making homes and building up communities but who are creating markets for the manufacturers in the eastern sections of the country. It is something that we owe to the farmers on these projects, who are struggling to save their homes, especially when the Government will not lose anything but will be a great deal more likely to get its money back if you put the settlers in a position where they can make something on the land and meet these payments.

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from Michigan [Mr. Cramton].

Mr. CRAMTON. Mr. Speaker, five minutes does not give much time in which to discuss a bill that is eight pages long. We ought not to legislate in this way comprehensive legislation on an appropriation bill, and no time even to read it. I want to give you the high lights from my examination of the legislation, which I have been studying in different forms for some time. The gentleman from Idaho [Mr. Smith] has in part repudiated the Senate bill, because he could not agree to all the provisions of it when he reported out a bill from his committee five days ago. He rejected a number of the provisions in the Senate bill, and his own committee changed their minds three times in three days as to some important provisions, so that gentlemen can see that this is a complicated subject about which those who are informed can easily disagree.

Mr. LEAVITT. How did the gentleman find out what happened in executive session of the committee?

Mr. CRAMTON. If I am wrong, I would like to know it.

Mr. LEAVITT. The committee would like to know.

Mr. CRAMTON. I can not yield. What does this bill do? At the present time, under the reclamation fund, these projects get their money from the Treasury for 20 years without interest, and there is quite an agitation, now that the experimental period is passed, to make it a business proposition and charge interest, and they would expect them to pay the money back some time. That is what ought to be done. This legislation is headed in the wrong direction. It extends the time to pay their money for an indefinite period, it may be 40 or 50 years, without interest, based on the return of a percentage of the productive power of the land. We have to have some supervision over the books on this project to know what is the gross return and to know whether we are getting our money or not. It cuts the penalty for nonpayment from 1 per cent to one-half of 1 per cent a month.

That is not in the direction of insisting on their paying up. It is all in the direction of making reclamation a gift enterprise. The bill turns the profit that comes from power plants, the money furnished out of the Treasury without interest, over to the irrigation district. Suppose your Boulder project was constructed, a tremendous power plant. Here is the possibility of a distribution of an estimated unending profit from power to those who are on irrigation projects connected with it. Subdivision (j) gives the old existing project the profit on furnishing water to an extension. Why give the old a lien on the new? Subdivision (e) gives authority for extending the payment of charges to the Secretary with no limitation on it, and whenever he wants to he can extend the charges over the balance of the contract period. Now, those are some of the things in the bill so far as I can find from a very hasty examination. My judgment is instead of enacting this kind of law we ought to insist on a business policy. I have introduced a bill proposing that these construction charges should carry interest at 4 per cent and an amortization plan, similar to the way our farmers get money from the Farm Loan Board interest. That would be easy for them and it would be a business proposition. A project that can not stand that ought not to be built. I do not know why the farmers of one State are different from the farmers of another State, or are to be treated differently. Furthermore, we ought to protect them against the speculator. The big trouble with the proposition is that the more favorable the Government makes terms the better is the play into the hands of the speculators because they put the price of the land up as high as they can induce them to pay, and there ought to be some stringent regulation. There is nothing in this bill in reference to that. There is one reference to 160 acres, but that land may quickly again get into the hands of the speculators and then the lid is off.

Furthermore, we have passed this session relief legislation ample for the present time. We have passed this session a law providing every dollar owed on an existing project for maintenance or construction on the 1st of March last can be extended three years, and a further extension is provided if the Secretary desires to do it. Why, this Congress having denied relief to the farmers of the country, as has been said by the gentleman from Oregon, and having given relief by the extension of these charges for three years to the irrigation farmer, why do we yield to the lash of the Senate in reference to a rider on an appropriation bill? Why should we permit ourselves to be sandbagged and permit more money to be taken out of the Treasury or paid out of the Treasury for the relief of a particular pet class of farmers? This bill carries an authorization that all investigations hereafter are to be at the expense of the General Treasury and not at the expense of the reclamation fund. Gentlemen, we are a coordinate body with the Senate. They have no right on the last day of the session to come across here and say we have got to do this thing or the bill will fail. This legislation has no place on an appropriation bill. This House should assert its rights and reject such legislation. [Applause.]

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. MADDEN. Mr. Speaker, I yield three minutes to the gentleman from Nebraska [Mr. Simmons].

Mr. SIMMONS. Mr. Speaker, I wonder if the men from the rainless sections will listen to me just a minute. Some have been maintaining this bill will give an increased acreage. This bill does not increase the acreage of tillable land in the United States one acre. It does not cost the Federal Government one cent. It does not do anything except let the farmers on these reclamation projects, who can not meet their charges now, get in shape to pay their debts to the Federal Government. That is what we are asking you to do. The gentleman

who spoke just now spoke of the temporary relief act. Everybody who knew anything about that bill knew that act would only apply until this act could be brought out and passed by the Congress, a permanent act based on the findings of the commission that has studied this matter all winter, a permanent act based on hearings held by the Senate and hearings held by the House, hearings which have been approved and bills which have been brought out by committees of both bodies.

Mr. WINTER. Will the gentleman yield?

Mr. SIMMONS. I will.

Mr. WINTER. Is this the legislation which was the result of six months of work of the fact finding commission, recommended to the Secretary of the Interior, and supported by a special message from the President? [Applause.]

Mr. SIMMONS. It is. This is legislation which President Coolidge asked this Congress to pass in order that the western reclamation farmers might have a chance to pay their debts to the Government and maintain and retain their homes. It is a wise measure. Nobody says it is not necessary; nobody says there is no need; all the argument is against some little pet scheme, and it is not fair——

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. SIMMONS. I will.

Mr. SUMMERS of Washington. What advantage is it for the Federal Government to force these men off their land and put new men on and let them try to get a start?

Mr. SIMMONS. They can not. It is the experience of these reclamation States that the Federal Government will not get this money back as fast under the present law as they will if this law goes into effect and the farmers have a chance to pay their debts.

That is all the interest there is in this thing. That is all there is to it. It does not cost the Government a dollar. It does no take a dollar out of the Federal Treasury. It does not increase the number of irrigable acres of land. It just says this to the farmers who are trying to make the desert produce, "We are going to let you repay, and at the same time we are going to protect the Government."

You gentlemen who are in favor of the man who wants to keep his home and pay his debts to the Government ought to support this kind of a measure, and I am confident you will do it. [Applause.]

The SPEAKER. The time of the gentleman from Nebraska has expired.

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from California [Mr. RAKER].

The SPEAKER. The gentleman from California is recognized for five minutes.

Mr. RAKER. Mr. Speaker, no one can present this matter adequately in five minutes or within less than an hour. The committee spent some three weeks, and heard only from two of the men who were members of the fact finding commission, and one other, the attorney of the department, Mr. Hamele.

I say this, and I say it advisedly, we were denied the right to bring witnesses and present the facts before the Committee on Irrigation and Reclamation, having charge of this proposed legislation. On important amendments, the very vital parts of the bill, the proponents of the legislation had the votes, and we were given five minutes in which to examine those experts that appeared before the committee. Time limit fixed on sections of five minutes to each member. (See hearings.)

Mr. LEATHERWOOD. Mr. Speaker, will the gentleman yield?

Mr. RAKER. No; I am sorry I can not yield.

Gentlemen, I can only hit the high places. But I say that what the gentleman from Ohio [Mr. BEGG] said regarding the effect and purposes of this amendment is true. This legislation will retard the payments on these projects from 35 to 99 years. Here is a statement made by the experts and presented to the committee. Here is one project where the payments will run 99 years. Here is another where the payments will run 61 years; another one which will run 42 years; still another one which will run 77 years; another one which will run 49 years; and another one 80 years, in which they expect to repay in the gross produce of the farm per acre. No one knows what it is, and the intention is not plain.

I want to say, sirs, that for the last 25 years I have given as much consideration to irrigation as any other man in this House. Irrigation of our arid and semiarid lands in the West is one of the things I advocate and stand sponsor for. I am a friend of irrigation. I am in sympathy with the men who have pioneered in this work. The men on these Government irrigation projects are entitled to a just and fair deal. They are entitled to proper treatment. These irrigation projects should and can be operated so that the men on the projects can make a good living and at the same time the money expended by the Government should be repaid. As a member of the committee that framed the extension law, I want to assure you that they said it would work.

As to this amendment now before the Congress, I want to say to you who are friends of the bill that this will be a sad day for irrigation and our reclamation projects if you succeed in putting this upon the statute books.

I have here a letter from Secretary Work which shows that this fact finding commission spent over $20,000, and when they came before the committee they were unable to say that they had a definite and well-rounded proposition upon which they could rely to present to the committee so that the committee could come to a final determination as to what should be done on any one particular project. Here are two letters from the Secretary of Agriculture in reference to the investigations referred to in this proposed irrigation bill, placed here as a rider in the last days of the session on an appropriation bill. No chance to amend or even consider it on its merits. The Secretary of Agriculture shows that over $4,000,000 has been spent for the farmers on these various irrigation projects in various ways; over $2,000,000 has been spent on these reclamation projects outside of what has been appropriated by the reclamation law in the way of experts, in the way of investigations, in the way of soil surveys, in the way of county advisers, and in the way of the appointment of scientific men. Everything in the way of aid and advice to the farmers on the several irrigation projects has been readily and willingly given. Every interest has been shown by acts and financial aid and help.

Mr. SIMMONS. Mr. Speaker, will the gentleman yield?

Mr. RAKER. I must beg the gentleman's pardon. Under the circumstances I can not yield.

The history of the fact finding commission will appear in the following letter from the Secretary of the Interior, addressed to me as a member of the Committee on Irrigation and Reclamation, of date May 26, 1924, in response to my letter to the Secretary of date May 21, 1924, as follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
*Washington, D. C., May 21, 1924.*

Hon. HUBERT WORK,
*Secretary of the Interior, Washington, D. C.*

In re Fact Finding Commission.

MY DEAR MR. SECRETARY: As a member of the Committee on Irrigation and Reclamation now having under consideration the bill (H. R. 8836) which involves the report of the fact finding commission embodied in Senate bill 92, Sixty-eighth Congress, first session, will you kindly furnish me the following information:

1. That the committee most respectfully requests a copy of the order appointing committee of special advisers on reclamation known as "The fact finding commission."

2. The authority under which such fact finding commission was appointed.

3. The amount paid, if any, to each of said six commissioners; (a) the amount paid each; and (b) the amount of traveling and personal expenses.

4. The amount of money expended in taking of testimony and transcribing same.

5. The number of clerks that are regularly employed in the department and amount of time consumed in working for the fact finding commission.

6. The number of clerks and the amount paid each and total of any special employees.

7. The number of members of the fact finding commission still engaged in the work, if any, and the probable length of time such employment will continue and the cost thereof.

Respectfully submitting the same, I am

Yours most truly, JOHN E. RAKER, M. C.

---

DEPARTMENT OF THE INTERIOR,
*Washington, May 26, 1924.*

Hon. JOHN E. RAKER,
*Chairman Committee on Irrigation of Arid Lands,*
*House of Representatives.*

MY DEAR MR. RAKER: I have your letter of May 21 making inquiry concerning my appointment of the special advisers on reclamation, whose report was transmitted to the Congress by the President on April 21, 1924.

Answering your specific questions as nearly as possible, I may say that the appointments were duly authorized by the Civil Service Commission. I inclose my letter of October 15, 1923, to the commission requesting authority to make the appointment, as well as subsequent correspondence in relation thereto, including the necessary authorization of the commission, dated October 15, 1923.

The amount paid the special advisers, as is indicated in the letters of appointment herewith, was $25 per day when actually employed. The only travel expense allowed was railroad and Pullman fare, the usual per diem for subsistence or actual expenses being omitted.

Two of the special advisers devoted the major portion of their time to the investigation, viz, Hon. Thomas E. Campbell and Dr. John A. Widtsoe, the services of the others being only occasional. A statement of the total payments is a part of the inclosed financial statement.

Your inquiry as to "the number of clerks that are regularly employed in the department and amount of time consumed in working for the fact finding commission" is not entirely understood. The clerks in the department as a whole perform no services for this committee. I placed at the disposal of the special advisers three stenographers, by detail, as follows:

One clerk, who acted as secretary to the special advisers; annual compensation $2,340, on the rolls of the Reclamation Service; period of service with special advisers, October 15, 1923, to April 24, 1924; total compensation for period, $1,227.50.

One clerk at rate of $1,440 per annum, detailed from the General Land Office; period of service, October 19, 1923, to April 24, 1924; total compensation, $744.

One clerk at rate of $1,140 per annum, on the rolls of the General Land Office; period of service, November 26, 1923, to April 21, 1924; total compensation, $462.33.

One clerk at rate of $1,240 per annum, on the rolls of the Indian Office; period of service, November 10, 1923, to January 19, 1924, and from February 12 to March 1, 1924; total compensation, $310.

Various employees in the Bureau of Reclamation were called upon by the special advisers to furnish information, both orally and in writing, during the progress of the investigation. This service did not entail additional expense to the reclamation fund, since no extra employees were required, and their routine work was performed as usual.

Aside from the necessity of collecting the data required in the conduct of the investigation by the special advisers, the information thus furnished was such as the Secretary of the Interior should have before him in the regular conduct of business as the responsible head of the Reclamation Service. Therefore the cost of compiling would not seem to be a proper charge against the work of the special advisers but rather to the cost of administering the Reclamation Bureau.

Efforts have been made to estimate the amount of time given to compiling this information by the employees in the Bureau of Reclamation, but because of the very nature of the service rendered and the broken periods of time they devoted to it while performing their regular work render these estimates so inaccurate as to be completely unreliable.

The report of the special advisers was completed on April 10. The services of Doctor Mead terminated on April 2, 1924, those of Messrs. Garfield, Bradfute, and Dawson on April 9, of Doctor Widtsoe on April 23, and Governor Campbell on April 25. Governor Campbell, however, was recalled from Arizona at the request of the chairman of the House Committee on Irrigation to attend the hearings in connection with H. R. 8836. It was necessary, therefore, to employ him on the same basis as previously, beginning with May 12, and he is now in Washington at the service of your committee.

Very respectfully,

HUBERT WORK.

Inclosure.

MAY 24, 1924.

*Memorandum showing expenses in connection with the work of the committee of special advisers on reclamation appointed by the Secretary of the Interior on October 10, 1923*

| | Days | Per diem in lieu of expenses | Railroad and Pullman fares | Total |
|---|---|---|---|---|
| Thomas E. Campbell | 179 | $4,475.00 | $388.59 | |
| John A. Widtsoe | 157 | 3,925.00 | 254.19 | |

DEPARTMENT OF THE INTERIOR,
*Washington, October 15, 1923.*

The CIVIL SERVICE COMMISSION,
*Washington, D. C.*

COMMISSIONERS: I desire to secure the temporary services of several prominent and specially qualified men to consider and advise concerning reclamation problems. I have been in correspondence with and have secured expression of willingness to serve from:

James R. Garfield, of Cleveland, Ohio, Secretary of the Interior in the Cabinet of President Roosevelt, who is thoroughly familiar with reclamation problems;

Thomas E. Campbell, of Phoenix, Ariz., former Governor of Arizona and chairman of the Colorado River Basin project, 1921;

Elwood Mead, of Berkeley, Calif., engineer; member of American Society of Civil Engineers and British Institute of Civil Engineers; engineer of Wyoming, 1888–1899; chief of irrigation and drainage investigations, United States Department of Agriculture, 1897–1907; chairman State Rivers and Water Supply Commission, Victoria, Australia, 1907–1915; consulting engineer for various irrigation works; and author of articles on irrigation and engineering subjects;

Oscar E. Bradfute, of Xenia, Ohio, vice president American Farm Bureau Federation, 1920–21, and president of Ohio Farm Bureau Federation; member of the board of control of Ohio Agricultural Experiment Station;

Julius H. Barnes, of Duluth, Minn., president United States Chamber of Commerce;

Dr. John A. Widtsoe, of Salt Lake City, Utah, director Utah Experiment Station, 1900–1905; president Agricultural College of Utah, 1907–1916; president of International Dry Farming Congress, 1912; and author of articles on dry farming and irrigation subjects;

Clyde C. Dawson, of Denver, Colo., lawyer, who has given much attention to irrigation law and irrigation subjects;

Henry L. Myers, lawyer; former United States Senator, of Montana; while Senator was a member of the Senate Committee on Public Lands and Surveys and is familiar with reclamation and its problems—

all of whom, by reason of their experience, qualifications, and ability, are peculiarly fitted to perform the service desired as special advisers on reclamation.

The service is of a temporary character and falls within the purview of section 4 of rule 8, civil-service rules. The work is emergent, and it is desired to make some of these appointments to-day.

I therefore ask your prior consent to make these temporary appointments of special advisers on reclamation for a period not to exceed three months from the dates of their appointments, and ask that authority be given to-day.

HUBERT WORK,
*Secretary of the Interior.*

---

UNITED STATES CIVIL SERVICE COMMISSION,
*Washington, D. C., October 15, 1923.*

The SECRETARY OF THE INTERIOR.

SIR: In reply to your letter of this date, the commission has the honor to grant authority under the provisions of section 4, civil service rule 8, for the temporary appointments of the following-named persons as special advisers on reclamation for periods of not to exceed three months from the date they enter on duty: James R. Garfield, Thomas E. Campbell, Elwood Mead, Oscar E. Bradfute, Julius H. Barnes, Dr. John A. Widtsoe, Clyde C. Dawson, and Henry L. Myers.

In reporting their entrance upon duty it is desired that the salary paid be indicated in each case.

By direction of the commission.

Very respectfully, JOHN T. DOYLE, *Secretary.*

---

UNITED STATES CIVIL SERVICE COMMISSION,
*Washington, D. C., January 5, 1924.*

The SECRETARY OF THE INTERIOR.

SIR: In reply to your request of January 4, 1924, authority is granted under section 4 of civil service rule 8 for an extension of the temporary job appointment of James R. Garfield, Thomas E. Campbell, John A. Widtsoe, Oscar E. Bradfute, and Clyde C. Dawson as special advisers on reclamation at $25 per diem when actually employed for such part of three months as may be required from date of expiration of present appointment.

Remarks: The effective dates of original appointments of the first four may be considered as October 10, 1923.

By direction of the commission.

Very respectfully, JOHN T. DOYLE, *Secretary.*

---

DEPARTMENT OF THE INTERIOR,
*Washington, October 10, 1923.*

Mr. JAMES R. GARFIELD, of Ohio.

SIR: You are hereby appointed a special adviser on reclamation, at a salary of $25 per diem, when actually employed, and traveling expenses from Cleveland, Ohio, to Washington, D. C. Salary and

travel expenses payable from the appropriation of the Bureau of Reclamation. Authorized by the Civil Service Commission under section 4 of Rule VIII.

HUBERT WORK, *Secretary.*

Order No. 128.

---

DEPARTMENT OF THE INTERIOR,
*Washington, October 10, 1923.*

Mr. THOMAS E. CAMPBELL, of Arizona.

SIR: You are hereby appointed a special adviser on reclamation, at a salary of $25 per diem, when actually employed, and traveling expenses from Phoenix, Ariz., to Washington, D. C. Salary and travel expenses payable from the appropriation of the Bureau of Reclamation. Authorized by the Civil Service Commission under section 4 of Rule VIII.

HUBERT WORK, *Secretary.*

Order No. 128.

---

DEPARTMENT OF THE INTERIOR,
*Washington, October 15, 1923.*

Mr. ELWOOD MEAD, of California.

SIR: You are hereby appointed a special adviser on reclamation, at a salary of $25 per diem, when actually employed, and traveling expenses, effective on the date of entrance on duty. Salary and travel expenses payable from the appropriation of the Bureau of Reclamation. Authorized by the Civil Service Commission, under section 4 of Rule VIII.

HUBERT WORK, *Secretary.*

*Washington, October 15, 1923.*

Mr. CLYDE C. DAWSON, of Colorado.

SIR: You are hereby appointed a special adviser on reclamation, at a salary of $25 per diem when actually employed and traveling expenses, effective October 15, 1923. Salary and travel expenses payable from the appropriation of the Bureau of Reclamation. Authorized by the Civil Service Commission under section 4 of Rule VIII.

HUBERT WORK, *Secretary.*

Order No. 128.

It will be noted that up to the date of transmittal of the Secretary's letter this commission had cost the reclamation fund over $20,000.

On April 20, 1924, the fact finding commission made report to the Secretary of the Interior.

This report in turn was submitted by the Secretary of the Interior to the President, and on April 21, 1924, was by the President transmitted to the Congress. In due course the same was referred to the Committees on Irrigation and Reclamation of the Senate and House.

The fact finding commission's report, the letter to the Secretary of the Interior, and the President's letter of transmittal to the Congress were ordered printed by the Senate on April 24—calendar day, May 2—1924, and printed as Senate Document No. 92, Sixty-eighth Congress, first session. This Senate document, No. 92, was used by the Senate and House Committees on Irrigation and Reclamation. I ask special consideration of this document.

The recommendations of this fact finding commission are embodied in a proposed bill—see Senate Document No. 92, pages 204–207—and among other things would:

1. Authorize the Secretary of the Interior to charge off something like $27,391,146 to start with, and it might run to over $50,000,000 before the job was ended.

2. It permits and authorizes great duplication in the work of the various departments, which will appear from letters from Secretary Wallace, of the Department of Agriculture. (See letters.)

3. Inaugurates a new system of payment of construction charges contrary to any known method of payment now in vogue in the United States, and in many ways quite unfair to prosperous and industrious and frugal farmers—encourages negligence in farming.

Relief was given the farmers on the Federal irrigation projects by the act of May 9, 1924, which act is as follows:

[PUBLIC—No. 115—SIXTY-EIGHTH CONGRESS]

[S. 1631]

An act to authorize the deferring of payments of reclamation charges

*Be it enacted, etc.*, That the Secretary of the Interior is hereby authorized and empowered, in his discretion, to defer the dates of payments of any charges, rentals, and penalties which have accrued prior to the 2d day of March, 1924, under the act of June 17, 1902 (32 Stat. L. p. 388), and amendatory and supplemental acts or prior to that that date, as against water users on any irrigation project being constructed or operated and maintained under the direction of the Commissioner of Indian Affairs, as may, in his judgment, be necessary in or concerning any irrigation project now existing under said act: *Provided*, That no payment shall be deferred under this section in any particular case beyond March 1, 1927: *Provided*, That upon such adjustment being made, any penalties or interest which may have accrued in connection with such unpaid construction and operation and maintenance charges shall be canceled, and in lieu thereof the amount so due, and the payment of which is hereby extended, shall draw interest at the rate of 5 per cent per annum, paid annually from the time said amount became due to date of payment: *And provided further*, That in case the principal and interest herein provided for are not paid in the manner and at the time provided by this section, any penalty now provided by law shall thereupon attach from the date of such default.

SEC. 2. That where an individual water user, or individual applicant for a water right under a Federal irrigation project constructed or being constructed under the act of June 17, 1902 (32 Stat. L. p. 388), or any act amendatory thereof or supplementary thereto, makes application prior to January 1, 1925, alleging that he will be unable to make the payments as required in section 1 hereof, the Secretary of the Interior is hereby authorized in his discretion, prior to March 1, 1925, to add such accrued and unpaid charges to the construction charge of the land of such water user or applicant, and to distribute such accumulated charges equally over each of the subsequent years, beginning with the year 1925, or, in the discretion of the Secretary, distribute a total of one-fourth over the first half of the remaining years of the 20-year period beginning with the year 1925, and three-fourths over the second half of such period, so as to complete the payment during the remaining years of the 20-year period of payment of the original construction charge: *Provided*, That upon such adjustment being made, any penalties or interest which may have accrued in connection with such unpaid construction and operation and maintenance charges shall be canceled, and in lieu thereof the amount so due, and the payment of which is hereby extended, shall draw interest at the rate of 5 per cent per annum, paid annually from the time said amount became due to date of payment: *Provided further*, That the applicant for the extension shall first show to the satisfaction of the Secretary of the Interior detailed statement of his assets and liabilities and probable inability to make payment at the time required in section 1: *And provided further*, That in case the principal and interest herein provided for are not paid in the manner and at the time provided by this act, any penalty now provided by law shall thereupon attach from the date of such default: *And provided further*, That similar relief,

in whole or in part, may be extended by the Secretary of the Interior to a legally organized group of water users of a project upon presentation of a sufficient number of individual showings made in accordance with the foregoing proviso to satisfy the Secretary of the Interior that such extension is necessary.

Approved, May 9, 1924.

The Congress and the committees should have time in which to prepare the proper legislation on this important question, and the same could then be passed when the Congress convenes in December session, 1924.

We should study out some permanent legislation that will give these people a chance to pay and at the same time protect the Government's investment, to the end that it is all repaid. This has been promised at all times, and it should be faithfully carried out in all particulars. I am quite convinced that the method suggested in H. R. 8836 would not do it.

On April 22, 1924, the chairman of the Committee on Irrigation and Reclamation introduced H. R. 8836, to carry out the suggested legislation by the Fact Finding Commission. (The Fact Finding Commission proposed bill is found on pp. 204–207, S. Doc. No. 92.) H. R. 8836 is in the same language and is in words and figures, as follows:

[H. R. 8836, Sixty-eighth Congress, first session]

A bill (H. R. 8836) to provide safeguards for future Federal irrigation development and an equitable adjustment of existing accounts on Federal irrigation projects, and for other purposes

*Be it enacted, etc.*, That when used in this act—

(a) The word "Secretary" means the Secretary of the Interior.

(b) The words "reclamation law" mean the act of June 17, 1902 (32 Stats. p. 388), and all acts amendatory thereof or supplementary thereto.

(c) The words "reclamation fund" mean the fund provided by the reclamation law.

(d) The word "project" means a Federal irrigation project authorized by the reclamation law.

(e) The words "division of a project" mean a substantial irrigable area of a project designated as a division by order of the Secretary.

SEC. 2. That hereafter no new project, or new division of a project, shall be approved for construction until information in detail shall have been secured concerning its feasibility, its adaptability for actual settlement and farm homes, and the probable return of the cost thereof to the United States. To this end it is directed that before approval by the Secretary of any such project or division he shall secure a report in detail concerning the water supply, engineering features, cost of construction, land prices, and probable acre cost of development. The Secretary shall also secure through the Secretary of Agriculture a report in detail relative to the climate, soil, kind of crops for which the proposed development is adapted, and probable production; also, through the Secretary of Commerce, a report in detail with respect to transportation facilities, markets, and other economic factors upon or affecting the proposed project or division.

SEC. 3. That hereafter no moneys shall be expended for construction on account of any new project or any new division of a project until an appropriate repayment contract, in form approved by the Secretary, shall have been properly executed by a district or districts organized under State law, embracing the lands irrigable thereunder, and the execution thereof shall have been confirmed by decree of a court of competent jurisdiction, which contract, among other things, shall contain an appraisal approved by the Secretary, showing the actual bona fide value of all such irrigable lands fixed without reference to the proposed Government development, and shall provide that until the Government construction charges against such lands shall have been fully paid, upon any and every sale of the land or any interest therein, 50 per cent of all moneys, credits, and property received therefor above the value thereof as shown by said appraisal, shall belong to the United States to be credited in reduction of the construction charge against the lands so sold, and the Secretary may convert into money any such credits or property so belonging to the United States; and all public lands irrigable under any such project or division shall be entered subject to the conditions of this proviso which shall be applied thereto: *Provided further*, That hereafter no moneys shall be expended for construction on account of any such project or division until all areas of land irrigable thereunder and owned by any individual in excess of 160 irrigable acres shall have been conveyed in fee to the United States free of encumbrance to again become a part of the public domain, under a contract between the United States and the individual owner providing that the value as shown by said appraisal of the land so conveyed to the United States shall be credited in reduction of the construction charge thereafter to be assessed against the land retained by such owner; and lands so conveyed to the United States shall be subject to disposition under the reclamation law when so ordered by the Secretary: *And provided further*, That hereafter no moneys shall be expended for construction on account of any such project or division until an appropriate contract in form approved by the Secretary shall have been properly executed by all holders of Federal land grants of more than 160 acres irrigable thereunder, which shall provide for the sale of such lands to actual bona fide settlers at not more than the value thereof as shown by appraisal: *And provided further*, That the provisions of this section shall not apply to Indian lands or to lands to be served with water under the Warren Act of February 21, 1911 (36 Stat. p. 925).

SEC. 4. That the Secretary is hereby authorized, under regulations to be promulgated by him, to require of each applicant for entry to public lands on a project such qualifications as to industry, experience, character, and capital, as in his opinion are necessary to give reasonable assurance of success by the prospective settler. Any person not having the qualifications so prescribed by the Secretary shall not be entitled to make such an entry or an application therefor.

SEC. 5. That hereafter the irrigable lands of each new project and new division of a project shall be classified by the Secretary with respect to their power, under a proper agricultural program, to support a family and pay water charges, and the Secretary is authorized to fix different construction charges against different classes of land under the same project for the purpose of equitably apportioning the total construction cost so that all lands may, as far as practicable, bear the burden of such cost according to their productive value. Reclassification surveys may be made by the Secretary periodically, as experience may suggest, for the purpose of determining any changes that may accompany a continued cultivation and irrigation of the lands.

SEC. 6. That hereafter the Secretary shall as to each irrigable acre of land in a project, issue two public notices relating to construction charges. The first public notice shall be issued when the land is ready for settlement and will announce the construction charge per irrigable acre. The second public notice shall be issued when in the opinion of the Secretary the agricultural development of the project shall have advanced sufficiently to warrant the commencement of payment of installments of such construction charge. The second public notice shall fix the date when payments will begin on the construction charge announced by the first public notice, which date shall be not less than five years from the date of the first public notice.

SEC. 7. That hereafter all project construction charges shall be made payable in annual installments based on the productive power of the land as provided in this section. The installment of the construction charge per irrigable acre payable each year shall be 5 per cent of the average gross annual acre income for the 10 calendar years first preceding, or for all years of record if fewer than 10 years are available, of the area in cultivation in the division of the project in which the land is located, as found by the Secretary annually. The decision of the Secretary as to the amount of any such installment shall be conclusive. These annual payments shall continue until the total construction charge is fully paid. The Secretary is authorized upon request to amend any existing contract for a project water right so that it will provide for payment of the construction charge thereunder in accordance with the provisions of this section.

SEC. 8. That the penalty of 1 per cent per month against delinquent accounts, provided in section 3 and section 6 of the act of August 13, 1914 (38 Stat. p. 686), is hereby reduced to one-half of 1 per cent per month, as to all installments hereafter coming due. The Secretary is authorized to amend all existing contracts accordingly.

SEC. 9. That whenever the water users take over the care, operation, and maintenance of a project the total accumulated net profits derived from the operation of project power plants, leasing of project grazing and farm lands, and the sale or use of town sites shall be credited to the construction of the project, and thereafter the net profits from such sources may be used by the water users to be credited, first, on account of project construction cost, second, on account of project operation and maintenance cost, and, third, as the water users may direct. No distribution to individual water users shall be made out of any such profits before all obligations to the Government shall have been fully paid.

SEC. 10. That all profits which may be derived from the sale or rental of surplus water under the Warren Act of February 21, 1911 (36 Stat. p. 925), shall be credited to the project or division of the project to which the construction cost has been charged. Contractors for the use of water under said Warren Act shall participate in the assets of the project with the contractors for the use of water within the project in proportion to the amounts paid for the water right. The Secretary is authorized upon request to amend any existing contract made under said Warren Act so that it will provide for payment of the construction charge thereunder in accordance with the provisions of section 7 of this act.

SEC. 11. That the Secretary is hereby authorized to undertake a comprehensive and detailed survey of the physical and economic features of each existing project, and to classify the irrigable lands thereunder in accordance with the provisions of section 5 of this act.

SEC. 12. That when a classification of lands under this act shows, in the opinion of the Secretary, that any such land is unsuited for immediate cultivation and unable to support a family and pay water charges at the present time, the Secretary may suspend the payment

of such charges in whole or in part until such time as the land in his opinion is found suitable for cultivation and able to support a family and pay water charges.

SEC. 13. That when it shall have been definitely determined by the Secretary that any project land classed as irrigable and subject to the payment of water charges, is in fact unsuitable for cultivation by irrigation and can not by cultivation produce a return sufficient to support a family and pay water charges, such land may be eliminated from the project as nonirrigable, and the amount of the charges assessed against the same shall then be definitely charged off as a loss to the reclamation fund.

SEC. 14. That the Secretary is hereby authorized, after making a proper survey of all existing projects and a classification of lands as provided in this act, to make, in each case where it is ascertainable from such survey and classification that the present water charges per acre are more than the land can bear, such fair and equitable adjustment of construction charges as in his opinion will fix a charge per acre which the land can reasonably bear. Any difference between the construction charge as adjusted and the original charge shall be charged off as a loss to the reclamation fund.

SEC. 15. That in any adjustment of water charges as provided in this act, all due and unpaid charges, both on account of construction and on account of operation and maintenance, including interest and penalties, may, in the discretion of the Secretary, be added in each case to the total obligation of the water user, and the new total thus established shall then be the construction charge against the land in question.

SEC. 16. That every entryman on a project farm unit not yet patented, which unit has been classified by the Secretary as being insufficient to support a family and pay water charges, shall have the right upon request to exchange his entry for another farm unit of unentered public land on the same or another project, in which event all installments of construction charges theretofore paid on account of the relinquished farm unit shall be credited on account of the new farm unit taken in exchange: *Provided*, That where two entrymen apply for the same farm unit under the exchange provision of this section, only one of whom is an ex-service man, as defined by the joint resolution of January 21, 1922 (42 Stat. p. 358), the ex-service man shall have a preference in making such exchange.

SEC. 17. That the Secretary is hereby authorized to employ trained farm and economic advisers who will give farming and business advice to enable water users on the projects to increase their farm incomes and organize for cooperation in business and social affairs.

SEC. 18. That all contracts providing for new projects and new divisions of projects shall require that all operation and maintenance charges shall be payable in advance. In each case where the care, operation, and maintenance of a project or division of a project, are transferred to the water users, the contract shall require the payment of operation and maintenance charges in advance. That whenever an adjustment of water charges is made under this act the adjustment contract shall provide that thereafter all operation and maintenance charges shall be payable in advance.

SEC. 19. That the cost and expense hereafter of the main office at Washington, D. C., of the Bureau of Reclamation in the Department of the Interior, and the cost and expense of general investigations heretofore and hereafter authorized by the Secretary, shall be charged to the general reclamation fund and shall not be charged as a part of the construction or operation and maintenance cost payable by the water users under the projects.

SEC. 20. That where, in the opinion of the Secretary, a right of way or easement of any kind over public land is required in connection with a project, the Secretary may reserve the same to the United States by filing in the General Land Office and in the appropriate local land office, copies of an instrument giving a description of the right of way or easement and notice that the same is reserved to the United States for Federal irrigation purposes under this act, in which event entry for such land and the patent issued therefor shall be subject to the right of way or easement so described in such instrument; and reference to each such instrument shall be made in the appropriate tract books and also in the patent.

SEC. 21. That where real property or any interest therein heretofore has been, or hereafter shall be, donated and conveyed to the United States for use in connection with a project, and the Secretary decides not to utilize the donation he is authorized without charge to reconvey such property or any part thereof to the donating grantor, or to the heirs, successors, or assigns of such grantor.

SEC. 22. That there is hereby authorized to be appropriated from the General Treasury the sum of $100,000 annually for five years for investigations to be made by the Secretary through the Bureau of Reclamation to obtain necessary information to determine how arid, swamp, and cut-over timberlands may best be developed in the future to meet the growing agricultural needs of the Nation.

SEC. 23. That the Secretary is hereby authorized, under regulations to be promulgated by him, to make short-time loans from the reclamation fund to entrymen upon projects, not to exceed $600 at any one time to any person, for the purchase of necessary livestock and equipment, and provision shall be made for the repayment of such loans in amortized installments during a period of not to exceed five years with interest on deferred payments at 5 per cent per annum, computed from the date of the contract: *Provided*, That no such loan shall in any case exceed 60 per cent of the cost of the livestock and equipment purchased. Such loans shall be secured by chattel mortgage upon such livestock and equipment.

The House Committee on Irrigation and Reclamation, after some days of consideration, reported out H. R. 9611, on June 3, 1924 (having been introduced June 2, 1924), to take the place of H. R. 8836. The committee made many valuable amendments. Still they did not make the bill in proper shape to protect the settlers and farmers, likewise the Government. H. R. 9611 is in words and figures as follows:

[H. R. 9611, Sixty-eighth Congress, first session]

A bill to provide safeguards for future Federal irrigation development, and an equitable adjustment of existing accounts on Federal irrigation projects, and for other purposes

*Be it enacted, etc.*, That when used in this act—

(a) The word "Secretary" means the Secretary of the Interior;

(b) The words "reclamation law" means the act of June 17, 1902 (32 Stats. p. 388), and all acts amendatory thereof or supplementary thereto;

(c) The words "reclamation fund" mean the fund provided by the reclamation law;

(d) The word "project" means a Federal irrigation project authorized by the reclamation law;

(e) The words "division of a project" mean a substantial irrigable area of a project designated as a division by order of the Secretary.

SEC. 2. That there is hereby established in the Department of the Interior a bureau of reclamation, and there shall be a director of the said bureau, who shall be thoroughly equipped for the duties of said office by technical education and experience, and who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall receive a salary of $10,000 per annum, and there shall also be in the said bureau such experts and other employees, to be appointed subject to the civil service laws and regulations, as may be required to carry out the purposes of the reclamation act of June 17, 1902 (32 Stat. p. 388), and acts amendatory thereof, or supplementary thereto, in accordance with the appropriations made from time to time by Congress for such purposes.

SEC. 3. That hereafter the Secretary shall not submit estimates for a new project, or new division of a project, until information in detail shall have been secured concerning its feasibility, its adaptability for actual settlement and farm homes, and the probable return of the cost thereof to the United States. Before the approval by the Secretary of estimates for any such project or division he shall secure a report in detail concerning the water supply, engineering features, cost of construction, land prices, and probable acre cost of development. The Secretary shall also secure, through the Secretary of Agriculture, a report in detail relative to the climate, soil, kind of crops for which the proposed development is adapted, probable production markets, and transportation facilities.

SEC. 4. That no moneys shall be expended for construction on account of any new project, or any new division of a project, hereafter authorized, until an appropriate repayment contract, in form approved by the Secretary, shall have been properly executed by a district or districts organized under State law, embracing the lands irrigable thereunder, and the execution thereof shall have been confirmed by decree of a court of competent jurisdiction, which contract, among other things, shall contain an appraisal approved by the Secretary, showing the actual bona fide value of all such irrigable lands fixed without reference to the proposed Government development, and all public lands irrigable under any such project or division shall be entered subject to the conditions of this section which shall be applied thereto: *Provided*, That no moneys shall be expended for construction on account of any such project or division hereafter authorized until an appropriate contract in form approved by the Secretary shall have been properly executed by all owners of land of more than 160 acres irrigable thereunder, which shall provide for the sale of such excess lands at not more than the value thereof as shown by said appraisal: *And provided further*, That the provisions of this section shall not apply to State lands or Indian lands.

SEC. 5. That the Secretary is hereby authorized, under regulations to be promulgated by him, to require of each applicant including preference-right ex-service men for entry to public lands on a project, such qualifications as to industry, experience, character, and capital as in his judgment are necessary to give reasonable assurance of success by the prospective settler.

SEC. 6. That the irrigable lands of each new project or new division of a project hereafter authorized shall be classified by the Secretary

with respect to their power, under a proper agricultural program, to support a family and pay water charges, and the Secretary is authorized to fix different construction charges against different classes of land under the same project or division of a project for the purpose of equitably apportioning the total construction cost so that all lands may as far as practicable bear the burden of such cost according to their productive value.

SEC. 7. That hereafter the Secretary shall as to each irrigable acre of land in each new project or a new division of a project issue two public notices relating to construction charges. The first public notice shall be issued when the land is ready for settlement and will announce the construction charge per irrigable acre. The second public notice shall be issued when in the opinion of the Secretary the agricultural development of the project shall have advanced sufficiently to warrant the commencement of payment of installments of such construction charge. The second public notice shall fix the date when payments will begin on the construction charge announced by the first public notice, which date shall be not more than five years from the date of the first public notice.

That construction charges on all projects hereafter authorized shall be payable in annual installments, the first of which shall be 5 per cent of the total charge and be due and payable on the 31st day of December following the second public notice: *Provided, however*, That the remainder of the construction charges shall be repaid in 30 annual payments.

SEC. 8. That hereafter all construction charges on existing reclamation projects upon application of the water users shall be made payable in annual installments based on the productive power of the land as provided in this section. The installment of the construction charge per irrigable acre payable each year shall be 5 per cent of the average gross annual acre income for the 10 calendar years first preceding, or for all years of record if fewer than 10 years are available, of the area in cultivation in the division or subdivision thereof of the project in which the land is located, as found by the Secretary annually. The decision of the Secretary as to the amount of any such installment shall be conclusive. The annual payments shall continue until the construction charge against each farm unit is paid. The Secretary is authorized, upon application of the water user, to amend any existing contract for a project water right so that it will provide for payment of the construction charge thereunder in accordance with the provisions of this section: *Provided*, That whenever two-thirds of the irrigable area of any project, or division of a project, shall be covered by water-right contracts between the water users and the United States, said project shall be required, as a condition precedent to receiving the benefits of this act, to take over, through a legally organized water users' association or irrigation district, the care, operation, and maintenance of all or any part of the project works, subject to such rules and regulations as the Secretary may prescribe, and thereafter the United States, in its relations to said project, shall deal with a water users' association or irrigation district, and when the water users assume control of a project the operation and maintenance charges for the year then current shall be covered into the construction account to be repaid as part of the construction repayments: *Provided further*, That the provisions of this section shall apply to existing reclamation projects or divisions thereof, on Indian reservations, at the request of the water users and with the approval of the Secretary.

SEC. 9. That the penalty of 1 per cent per month against delinquent accounts, provided in section 3 and section 6 of the act of August 13, 1914 (38 Stat. p. 686), is hereby reduced to one-half of 1 per cent per month as to all installments which may hereafter become due. The Secretary is authorized to amend all existing contracts accordingly.

SEC. 10. That whenever the water users take over the care, operation, and maintenance of a project or a division of a project the total accumulated net profits as determined by the Secretary, derived from the operation of project power plants, leasing of project grazing and farm lands, and the sale or use of town sites, shall be credited to the construction charge of the project, or division thereof, and thereafter the net profits from such sources may be used by the water users, to be credited annually, first, on account of project construction charge; second, on account of project operation and maintenance charge; and, third, as the water users may direct. No distribution to individual water users shall be made out of any such profits before all obligations to the Government shall have been paid.

SEC. 11. That all moneys or profits heretofore or hereafter derived from the sale or rental of surplus water under the Warren Act of February 21, 1911 (36 Stat. p. 925), or from the connection of a new project with an existing project shall be credited to the project or division of the project to which the construction cost has been charged.

SEC. 12. That in any adjustment of water charges as provided in this act all due and unpaid charges to the United States, both on account of construction and on account of operation and maintenance, including interest and penalties, may, in the discretion of the Secretary, on the application of the water user, be added in each case to the total obligation of the water user, and the new total thus established shall then be the construction charge against the land in question.

SEC. 13. That every entryman or assignee on a project farm unit not yet patented, which unit shall be found by the Secretary to be insufficient to support a family and pay water charges, shall have the right upon application to exchange his entry for another farm unit of unentered public land on the same project; in which event all installments of construction charges theretofore paid on account of the relinquished farm unit, and time of residence thereon, shall be credited on account of the new farm unit taken in exchange: *Provided*, That where two entrymen apply for the same farm unit under the exchange provision of this section only one of whom is an ex-service man as defined by the joint resolution of January 21, 1922 (42 Stat. p. 358), the ex-service man shall have a preference in making such exchange.

SEC. 14. That the Secretary is hereby authorized to employ trained farm and economic advisers who will give farming and business advice to enable water users given at an election held for that purpose on the projects to increase the farm incomes and organize for cooperation in business affairs, the cost of the same to be paid as operation and maintenance.

SEC. 15. That all contracts providing for new projects and new divisions of projects shall require that all operation and maintenance charges shall be payable annually, in advance, not later than the 1st day of March. In each case where the care, operation, and maintenance of a project or division of a project are transferred to the water users the contract shall require the payment of operation and maintenance charges in advance. That whenever an adjustment of water charges is made under this act the adjustment contract shall provide that thereafter all operation and maintenance charges shall be payable in advance.

SEC. 16. That after June 30, 1925, the cost and expense hereafter of the main office at Washington, D. C., of the Bureau of Reclamation in the Department of the Interior, and the cost and expense of general investigations heretofore and hereafter authorized by the Secretary, shall be charged to the general reclamation fund and shall not be charged as a part of the construction or operation and maintenance cost payable by the water users under the projects.

SEC. 17. That where, in the judgment of the Secretary, a right of way or easement of any kind over public land is required in connection with a project, the Secretary may reserve the same to the United States by filing in the General Land Office and in the appropriate local land office, copies of an instrument giving a description of the right of way or easement and notice that the same is reserved to the United States for Federal irrigation purposes, in which event entry for such land and the patent issued therefor shall be subject to the right of way or easement so described in such instrument; and reference to each such instrument shall be made in the appropriate tract books and also in the patent.

SEC. 18. That the Secretary of the Interior be, and he is hereby, authorized to lease for grazing or agricultural uses any lands withdrawn for any purpose under section 3 of the act of June 17, 1902 (ch. 1093, 32 Stats., p. 388), for such periods of time, upon such terms and conditions, and under such regulations as he may prescribe: *Provided*, That this act shall not apply to any of such lands while they are subject to entry under said act and acts supplemental to and amendatory thereof: *And provided further*, That the proceeds from such leases shall be turned into the reclamation fund as a credit on account of the project in connection with which the lands were withdrawn.

SEC. 19. That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $100,000 annually for five years for investigations to be made by the Secretary, through the Bureau of Reclamation, in cooperation with the Department of Agriculture, to obtain necessary information to determine how arid, swamp, or cut-over timberlands in any State may best be reclaimed.

The Senate Committee on Irrigation and Reclamation reported S. 3372 on May 31 (calendar day, June 2), 1924, with amendments, which, as amended, is as follows:

[S. 3372, Sixty-eighth Congress, first session]

A bill to provide safeguards for future Federal irrigation development, and an equitable adjustment of existing accounts on Federal irrigation projects, and for other purposes

*Be it enacted, etc.*, That when used in this act—

(a) The word "Secretary" means the Secretary of the Interior.

(b) The words "reclamation law" mean the act of June 17, 1902 (32 Stat. p. 388), and all acts amendatory thereof or supplementary thereto.

(c) The words "reclamation fund" mean the fund provided by the reclamation law.

(d) The word "project" means a Federal irrigation project authorized by the reclamation law.

(e) The words "division of a project" means a substantial irrigable area of a project designated as a division by order of the Secretary.

SEC. 2. That no new project or new division of a project shall be approved for construction or estimates submitted therefor by the Secretary until information in detail shall be secured by him concerning the water supply, the engineering features, the cost of construction, land prices, and the probable cost of development, and he shall have made a finding in writing that it is feasible, that it is adaptable for actual settlement and farm homes, and that it will probably return the cost thereof to the United States.

SEC. 3. That the Secretary is hereby authorized, under regulations to be promulgated by him, to require of each applicant, including preference right ex-service men, for entry to public lands on a project, such qualifications as to industry, experience, character, and capital as in his opinion are necessary to give reasonable assurance of success by the prospective settler. The Secretary is authorized to appoint boards, in part composed of private citizens, to assist in determining such qualifications.

SEC. 4. That hereafter the irrigable lands of each new project and new division of a project shall be classified by the Secretary with respect to their power, under a proper agricultural program, to support a family and pay water charges, and the Secretary is authorized to fix different construction charges against different classes of land under the same project for the purpose of equitably apportioning the total construction cost so that all lands may, as far as practicable, bear the burden of such cost according to their productive value.

SEC. 5. That hereafter the Secretary shall as to each irrigable acre of land in each new project, or a new division of a project issue two public notices relating to construction charges. The first public notice shall be issued when the land is ready for settlement and will announce the construction charge per irrigable acre. The second public notice shall be issued when in the opinion of the Secretary the agricultural development of the project shall have advanced sufficiently to warrant the commencement of payment of installments of such construction charge. The second public notice shall fix the date when payments will begin on the construction charge announced by the first public notice, which date shall be not more than five years from the date of the first public notice.

SEC. 6. That hereafter all project construction charges shall be made payable in annual installments based on the productive power of the land as provided in this section. The installment of the construction charge per irrigable acre payable each year shall be 5 per cent of the average gross annual acre income for the 10 calendar years first preceding, or for all years of record if fewer than 10 years are available, of the area in cultivation in the division or subdivision thereof of the project in which the land is located, as found by the Secretary annually. The decision of the Secretary as to the amount of any such installment shall be conclusive. These annual payments shall continue until the total construction charge against each unit is paid. The Secretary is authorized upon request to amend any existing contract for a project water right so that it will provide for payment of the construction charge thereunder in accordance with the provisions of this section or for the deferment of such construction charges for a period of three years from the approval of this act, or both.

SEC. 7. That whenever two-thirds of the irrigable area of any project, or division of a project, shall be covered by water-right contracts between the water users and the United States, said project shall be required, as a condition precedent to receiving the benefits of this act, to take over, through a legally organized water users' association or irrigation district, the care, operation, and maintenance of all or any part of the project works, subject to such rules and regulations as the Secretary may prescribe, and thereafter the United States, in its relations to said project, shall deal with a water users' association or irrigation district, and when the water users assume control of a project the operation and maintenance charges for the year then current shall be covered into the construction account to be repaid as part of the construction repayments.

SEC. 8. That the penalty of 1 per cent per month against delinquent accounts, provided in section 3 and section 6 of the act of August 13, 1914 (38 Stats., p. 686), is hereby reduced to one-half of 1 per cent per month, as to all installments which may hereafter become due.

SEC. 9. That whenever the water users take over the care, operation, and maintenance of a project or a division of a project the total accumulated net profits, as determined by the Secretary, derived from the operation of project power plants, leasing of project grazing and farm lands, and the sale or use of town sites shall be credited to the construction charge of the project, or a division thereof, and thereafter the net profits from such sources may be used by the water users to be credited annually, first, on account of project construction charge; second, on account of project operation and maintenance charge; and, third, as the water users may direct. No distribution to individual water users shall be made out of any such profits before all obligations to the Government shall have been fully paid.

SEC. 10. That all moneys or profits as determined by the Secretary heretofore or hereafter derived from the sale or rental of surplus water under the Warren Act of February 21, 1911 (36 Stats., p. 925), or from the connection of a new project with an existing project shall be credited to the project or division of the project to which the construction cost has been charged.

SEC. 11. That on each existing project where, in the opinion of the Secretary, it appears that on account of lack of fertility in the soil, an inadequate water supply, or other physical causes, settlers are unable to pay construction costs, or whenever it appears that the cost of any reclamation project by reason of error or mistake or for any cause has been apportioned or charged upon a smaller area of land than the total area of land under said project, the Secretary is authorized to undertake a comprehensive and detailed survey to ascertain all pertinent facts, and report in each case the result of such survey to the Congress, with his recommendations: *Provided*, That the cost and expense of each such survey shall be charged to the appropriation for the project on account of which the same is made, but shall not be charged as a part of the construction or operation and maintenance cost payable by the water users under the project.

SEC. 12. That in any adjustment of water charges as provided in this act all due and unpaid charges to the United States, both on account of construction and on account of operation and maintenance, including interest and penalties, shall be added in each case to the total obligation of the water user, and the new total thus established shall then be the construction charge against the land in question.

SEC. 13. That every entryman or assignee on a project farm unit not yet patented, which unit shall be found by the Secretary to be insufficient to support a family and pay water charges, shall have the right upon application to exchange his entry for another farm unit of unentered public land on the same or another project located in the same State, in which event all installments of construction charges therefore paid on account of the relinquished farm unit shall be credited on account of the new farm unit taken in exchange: *Provided*, That where two entrymen apply for the same farm unit under the exchange provision of this section, only one of whom is an ex-service man, as defined by the joint resolution of January 21, 1922 (42 Stat. p. 358), the ex-service man shall have a preference in making such exchange.

SEC. 14. That all contracts providing for new projects and new divisions of projects shall require that all operation and maintenance charges shall be payable in advance. In each case where the care, operation, and maintenance of a project or division of a project are transferred to the water users the contract shall require the payment of operation and maintenance charges in advance. That whenever an adjustment of water charges is made under this act the adjustment contract shall provide that thereafter all operation and maintenance charges shall be payable in advance.

SEC. 15. That the cost and expense after June 30, 1925, of the main office at Washington, D. C., of the Bureau of Reclamation in the Department of the Interior, and the cost and expense of general investigations heretofore and hereafter authorized by the Secretary, shall be charged to the general reclamation fund and shall not be charged as a part of the construction or operation and maintenance cost payable by the water users under the projects.

SEC. 16. That where, in the opinion of the Secretary, a right of way or easement of any kind over public land is required in connection with a project the Secretary may reserve the same to the United States by filing in the General Land Office and in the appropriate local land office copies of an instrument giving a description of the right of way or easement and notice that the same is reserved to the United States for Federal irrigation purposes under this act, in which event entry for such land and the patent issued therefor shall be subject to the right of way or easement so described in such instrument; and reference to each such instrument shall be made in the appropriate tract books and also in the patent.

SEC. 17. That where real property or any interest therein heretofore has been, or hereafter shall be, donated and conveyed to the United States for use in connection with a project, and the Secretary decides not to utilize the donation, he is authorized without charge to reconvey such property or any part thereof to the donating grantor, or to the heirs, successors, or assigns of such grantor.

SEC. 18. That there is hereby authorized to be appropriated from the General Treasury the sum of $100,000 for investigations to be made by the Secretary through the Bureau of Reclamation to obtain necessary information to determine how arid, swamp, and cut-over timber lands may best be developed.

Amendment 58 of the bill H. R. 9559, known as the "second deficiency act, fiscal year 1924," now under consideration, is

the irrigation legislation proposed as a rider. This amendment (amendment 58, H. R. 9359) follows:

SEC. 5. SUBSECTION A. That when used in this section—

(a) The word "Secretary" means the Secretary of the Interior.

(b) The words "reclamation law" means the act of June 17, 1902 (32 Stat. p. 388), and all acts amendatory thereof or supplementary thereto.

(c) The words "reclamation fund" mean the fund provided by the reclamation law.

(d) The word "project" means a Federal irrigation project authorized by the reclamation law.

(e) The words "division of a project" means a substantial irrigable area of a project designated as a division by order of the Secretary.

SUBSEC. B. That no new project or new division of a project shall be approved for construction or estimates submitted therefor by the Secretary until information in detail shall be secured by him concerning the water supply, the engineering features, the cost of construction, land prices, and the probable cost of development, and he shall have made a finding in writing that it is feasible, that it is adaptable for actual settlement and farm homes, and that it will probably return the cost thereof to the United States.

SUBSEC. C. That the Secretary is hereby authorized, under regulations to be promulgated by him, to require of each applicant including preference right ex-service men for entry to public lands on a project, such qualifications as to industry, experience, character, and capital, as in his opinion are necessary to give reasonable assurance of success by the prospective settler. The Secretary is authorized to appoint boards in part composed of private citizens, to assist in determining such qualifications.

SUBSEC. D. That the irrigable lands of each new project and new division of a project hereinafter approved shall be classified by the Secretary with respect to their power, under a proper agricultural program, to support a family and pay water charges, and the Secretary is authorized to fix different construction charges against different classes of land under the same project for the purpose of equitably apportioning the total construction cost so that all lands may as far as practicable bear the burden of such cost according to their productive value.

SUBSEC. E. That hereafter the Secretary shall as to each irrigable acre of land in each new project, or a new division of a project, issue two public notices relating to construction charges. The first public notice shall be issued when the land is ready for settlement and will announce the construction charge per irrigable acre. The second public notice shall be issued when in the opinion of the Secretary the agricultural development of the project shall have advanced sufficiently to warrant the commencement of payment of installments of such construction charge. The second public notice shall fix the date when payments will begin on the construction charge announced by the first public notice, which date shall be not more than five years from the date of the first public notice.

SUBSEC. F. That hereafter all project construction charges shall be made payable in annual installments based on the productive power of the land as provided in this subsection. The installment of the construction charge per irrigable acre payable each year shall be 5 per cent of the average gross annual acre income for the 10 calendar years first preceding, or for all years of record if fewer than 10 years are available, of the area in cultivation in the division or subdivision thereof of the project in which the land is located, as found by the Secretary annually. The decision of the Secretary as to the amount of any such installment shall be conclusive. These annual payments shall continue until the total construction charge against each unit is paid. The Secretary is authorized upon request to amend any existing contract for a project water right so that it will provide for payment of the construction charge thereunder in accordance with the provisions of this subsection or for the deferment of such construction charges for a period of three years from the approval of this section, or both.

SUBSEC. G. That whenever two-thirds of the irrigable area of any project, or division of a project, shall be covered by water right contracts between the water users and the United States, said project shall be required as a condition precedent to receiving the benefits of this section to take over, through a legally organized water users' association or irrigation district, the care, operation, and maintenance of all or any part of the project works, subject to such rules and regulations as the Secretary may prescribe, and thereafter the United States, in its relation to said project, shall deal with a water users' association or irrigation district, and when the water users assume control of a project the operation and maintenance charges for the year then current shall be covered into the construction account, to be repaid as part of the construction repayments.

SUBSEC. H. That the penalty of 1 per cent per month against delinquent accounts provided in section 3 and section 6 of the act of August 13, 1914 (38 Stats. p. 686), is hereby reduced to one-half of 1 per cent per month, as to all installments which may hereafter become due.

SUBSEC. I. That whenever the water users take over the care, operation, and maintenance of a project or a division of a project the total accumulated net profits, as determined by the Secretary, derived from the operation of project power plants, leasing of project grazing and farm lands, and the sale or use of town sites shall be credited to the construction charge of the project, or a division thereof, and thereafter the net profits from such sources may be used by the water users to be credited annually, first, on account of project construction charge; second, on account of project operation and maintenance charge; and, third, as the water users may direct. No distribution to individual water users shall be made out of any such profits before all obligations to the Government shall have been fully paid.

SUBSEC. J. That all moneys or profits as determined by the Secretary heretofore or hereafter derived from the sale or rental of surplus water under the Warren Act of February 21, 1911 (36 Stat., p. 925), or from the connection of a new project with an existing project shall be credited to the project or division of the project to which the construction cost has been charged.

SUBSEC. K. That on each existing project where, in the opinion of the Secretary, it appears that on account of lack of fertility in the soil, an inadequate water supply, or other physical causes, settlers are unable to pay construction costs, or whenever it appears that the cost of any reclamation project by reason of error or mistake or for any cause has been apportioned or charged upon a smaller area of land than the total area of land under said project, the Secretary is authorized to undertake a comprehensive and detailed survey to ascertain all pertinent facts and report in each case the result of such survey to the Congress with his recommendations: *Provided*, That the cost and expense of each such survey shall be charged to the appropriation for the project on account of which the same is made, but shall not be charged as a part of the construction or operation and maintenance cost payable by the water users under the project.

SUBSEC. L. That in any adjustment of water charges as provided in this section all due and unpaid charges to the United States, both on account of construction and on account of operation and maintenance, including interest and penalties, shall be added in each case to the total obligation of the water user, and the new total thus established shall then be the construction charge against the land in question.

SUBSEC. M. That every entryman or assignee on a project farm unit not yet patented which unit shall be found by the Secretary to be insufficient to support a family and pay water charges shall have the right upon application to exchange his entry for another farm unit of unentered public land on the same or another project located in the same State, in which event all installments of construction charges theretofore paid on account of the relinquished farm unit shall be credited on account of the new farm unit taken in exchange: *Provided*, That where two entrymen apply for the same farm unit under the exchange provision of this subsection, only one of whom is an ex-service man, as defined by the joint resolution of January 21, 1922 (42 Stat. p. 358), the ex-service man shall have a preference in making such exchange.

SUBSEC. N. That all contracts providing for new projects and new divisions of projects shall require that all operation and maintenance charge shall be payable in advance. In each case where the care, operation, and maintenance of a project or division of a project are transferred to the water users the contract shall require the payment of operation and maintenance charge in advance. That whenever an adjustment of water charges is made under this section the adjustment contract shall provide that thereafter all operation and maintenance charges shall be payable in advance.

SUBSEC. O. That the cost and expense after June 30, 1925, of the main office at Washington, D. C., of the Bureau of Reclamation in the Department of the Interior, and the cost and expense of general investigation heretofore and hereafter authorized by the Secretary, shall be charged to the general reclamation fund and shall not be charged as a part of the construction or operation and maintenance cost payable by the water users under the projects.

SUBSEC. P. That where, in the opinion of the Secretary, a right of way or easement of any kind over public land is required in connection with a project the Secretary may reserve the same to the United States by filing in the General Land Office and in the appropriate local land office copies of an instrument giving a description of the right of way or easement and notice that the same is reserved to the United States for Federal irrigation purposes under this section, in which event entry for such land and the patent issued therefor shall be subject to the right of way or easement so described in such instrument; and reference to each such instrument shall be made in the appropriate tract books and also in the patent.

SUBSEC. Q. That where real property or any interest therein heretofore has been, or hereafter shall be, donated and conveyed to the

United States for use in connection with a project, and the Secretary decides not to utilize the donation, he is authorized without charge to reconvey such property or any part thereof to the donating grantor, or to the heirs, successors, or assigns of such grantor.

SUBSEC. R. That there is hereby authorized to be appropriated from the General Treasury the sum of $100,000 for investigations to be made by the Secretary through the Bureau of Reclamation to obtain the necessary information to determine how arid and semiarid, swamp, and cut-over timberlands may best be developed.

It will be noted that this rider—amendment 58—carries some new provisions not carried in any of the bills above set out and leaves out many that the originally proposed bills carried.

This record should be so placed in compact form that it may be used for future action.

To show the present condition of the various Federal irrigation projects I am printing herewith two tables, Exhibits A and B, which are as follows:

*Federal irrigation projects, Bureau of Reclamation*

EXHIBIT A

| State | Project | Average acre cost | Construction to June 30, 1923 | | | | Construction | | Loss | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | Net cost [1 2 3] | Per cent | Paid [3] | Due [4] | Contracted | Uncontracted | Probable | Definite |
| Arizona | Salt River | $60.00 | $10,548,119.28 | 8.4 | $891,815.82 | [5] $9,656,303.46 | $10,548,119.28 | | | $382,097.00 |
| Arizona-California | Yuma | 71.00 | 9,026,546.52 | 12.1 | 1,093,052.01 | 7,933,494.51 | 5,743,556.85 | $3,282,989.67 | $2,700,000.00 | 1,361,000.00 |
| California | Orland | 44.00 | 1,091,795.87 | 22.0 | 240,614.58 | 851,181.29 | 1,091,795.87 | [6] 27,776.88 | | |
| Colorado | Grand Valley | | 4,017,921.98 | | [7] | 4,017,921.98 | 1,000,000.00 | 3,017,921.98 | 1,000,000.00 | |
| Do | Uncompahgre | 70.00 | 6,715,074.41 | 1.5 | 102,706.34 | 6,612,368.07 | 6,715,074.41 | [6] 45,880.90 | 1,500,000.00 | 47,370.00 |
| Idaho | King Hill | | 1,881,391.45 | | [8] | 1,881,391.45 | 1,881,391.55 | [6] 118,608.55 | | 1,000,000.00 |
| Do | Minidoka: | | | | | | | | | |

[16] Abandoned.
[17] Williston: Operation and maintenance loss prior to April 1, 1919, $178,667.20; Buford-Trenton, abandoned, operation and maintenance loss $71,149.39.
[18] Under construction. No lands irrigated.
[19] This amount includes $1,059,864.34, representing costs from Jan. 1 to June 30, 1923, for which no assessments have been made against the water users, leaving a net arrearage of $4,628,623.45 on operation and maintenance.
[20] Includes advance payments; operation and maintenance, $19,251.60.

To show the extra expense to the Government and added burden to the already overtaxed farmers on these Federal irrigation projects, as well as the duplication of work in the various Government departments that this proposed legislation will entail, which alone would justify the elimination and defeat of this amendment 58, I am submitting a letter sent to Secretary Wallace, of the Department of Agriculture, and his reply thereto:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
*Washington, D. C., May 27, 1924.*

Hon. HENRY C. WALLACE,
*Secretary of Agriculture,*
*Washington, D. C.*

In re reclamation projects.

MY DEAR MR. SECRETARY: The bill H. R. 7220, a bill making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1925, on page 61 contains the item—

"Miscellaneous items. Demonstrations on reclamation projects. To enable the Secretary of Agriculture to encourage and aid in the agricultural development of the Government reclamation projects; to assist, through demonstration, advice, and in other ways, settlers on the projects; and for the employment of persons and means necessary in the city of Washington and elsewhere, $36,460."

First. (a) Would you kindly advise me how long a similar item has been carried in the Agricultural appropriation bills for such work?

(b) The total amount up to date thus expended for such work?

(c) Where, how, and upon what Government reclamation projects has such work been done as provided in the above authorization and appropriations made thereunder?

Second. Investigation as to arid, swamp, and cut-over lands: What amount has been appropriated and used for the last 10 years for the use of your department for investigations relative to determining information regarding how arid, swamp, and cut-over lands could best be used?

Third. Soil surveys: Has there been any soil survey under your department within the last 10 years under provisions authorizing appropriations for the Bureau of Soils on any of the Government reclamation projects? If so, what ones?

If a soil survey has not been made on each Government reclamation project, would you kindly advise me why the same has not been done and the reason therefor?

Fourth. In re H. R. 8836.

Section 22 of the above-named bill, which is now pending before Congress, provides as follows:

"SEC. 22. That there is hereby authorized to be appropriated from the General Treasury the sum of $100,000 annually for five years for investigations to be made by the Secretary, through the Bureau of Reclamation, to obtain necessary information to determine how arid, swamp, and cut-over timberlands may best be developed in the future to meet the growing agricultural needs of the Nation."

Would you kindly advise me if it is not a fact that this work authorized would be a duplication of the work now authorized under existing law for the Department of Agriculture under the Bureau of Soils, Bureau of Entomology, Bureau of Chemistry, Forest Service, and other bureaus and branches of the Department of Agriculture?

I would greatly appreciate an early reply, as I desire to use it before the committee now having charge of the legislation above named, which, as I now view it, is a transfer from the Department of Agriculture to the Department of the Interior and a duplication.

Respectfully submitting the same, I am,

Yours most truly,

JOHN E. RAKER, M. C.

---

DEPARTMENT OF AGRICULTURE,
*Washington, May 29, 1924.*

Hon. JOHN E. RAKER,
*House of Representatives.*

DEAR MR. RAKER: Immediately yesterday upon receipt of your letter asking certain questions concerning the work of this department, people were set at work compiling the information desired. A short time will be required to assemble it, but I hope to be able to write you later to-day, or at least to-morrow, and answer your various questions.

In the meantime, inasmuch as the purpose of your inquiry seems to be to ascertain whether the activities proposed in H. R. 8836, dealing with irrigation developments, will be a duplication of work already being carried on in the Department of Agriculture, it will be proper for me to make some general observations concerning this bill.

Section 2 provides that before approving a new reclamation project the Secretary of the Interior shall secure information concerning its feasibility and adaptability, and that he shall secure through the Secretary of Agriculture a report in detail relative to the climate, kind of soil, kind of crops, and probable production, and through the Secretary of Commerce a report in detail with respect to transportation facilities, markets, and other economic factors. If this latter provision should stand, it would result in large duplication by the Department of Commerce work being carried on by the Department of Agriculture with respect to transportation facilities, markets, and other economic factors. The Government has spent millions of dollars in the way of appropriations to this department, in building up the sort of organization necessary to acquire and furnish this information. Information of this character needed by farmers on reclamation projects is also needed by farmers who are not on reclamation projects, and the creation of machinery in another department necessary to secure such information would certainly duplicate the facilities already existing in this department for handling such work.

While section 2 directs the Secretary of the Interior to secure through the Secretary of Agriculture information of an agricultural character preliminary to establishing a new reclamation project or a new division of an old project, section 11 seems to contemplate that the Secretary of the Interior shall set up within his own department the force necessary to obtain exactly the same sort of information with regard to each existing project. To do this effectively it will be necessary for the Secretary of the Interior to build up within that department activities of a strictly agricultural character, which will duplicate a great deal of the organization of the Department of Agriculture. For example, to make a reliable determination of the "physicial and economic features of each existing project" it will be necessary—

1. To make a soil survey as is done in the Bureau of Soils of the Department of Agriculture.

2. To make a study of the crops which may be grown successfully, which will involve a duplication of the work of our Bureau of Plant Industry, comprehending, as it does, the crops adapted to the soil and climatic conditions and the varieties of those crops best adapted to the particular locality, and a consideration of the plant diseases to which such crops are subject and their control.

3. To make an investigation of the insect pests which must be controlled, thus duplicating the work of our Bureau of Entomology.

4. In order to assure, if possible, the profitable sale of the crops grown, to make a study of the transportation facilities and rates, market points at which such crops can be sold, the competition which such crops will meet from other sections of the country, which in turn involves an understanding of the seasons at which various crops of different regions flow to market, etc., all of which will involve almost complete duplication of the work of our Bureau of Agricultural Economics.

5. To develop the elements of farm management involved. Back of it all is the question of farm management, a matter to which the Department of Agriculture has been giving extensive and detailed study for many years.

6. To consider the question of animal husbandry intimately related with crops to be grown. On some reclamation projects the character of the most profitable agriculture is such as not to require large numbers of animals, while on others many of the crops grown can be marketed best through animals. This involves a study of the animals best suited to the conditions on the particular project being considered—breeds, methods of feeding, etc.—all of which would involve the duplication of the work being carried on by the Bureau of Animal Industry of this department.

What I have said in the foregoing with reference to section 11 applies in part to sections 12, 13, and 14.

Section 17 authorizes the Secretary of the Interior to employ trained farm and economic advisers who will give farming and business advice. It is not clear whether it is proposed that these farm and economic advisers shall be employed at the expense of the farmers on the various projects or whether they shall constitute an extension service duplicating the established extension service of this department. Apparently the latter is contemplated. Since 1915 an item has been carried in the Agricultural appropriation act for "demonstrations on reclamation projects." Under this appropriation the Department of Agriculture, so far as the funds appropriated have permitted, has employed trained farm advisers to assist farmers on reclamation projects in planning their farm operations. The appropriation has never been sufficient to place advisers on all of the projects. At the present time there are such advisers employed for the entire year on six projects and for part of the year on two additional projects. In addition to this specific appropriation for demonstration on reclamation projects, the Smith-Lever Act of 1914 provides for a system of extension work in agriculture and home economics to be conducted cooperatively by the Department of Agriculture and the State colleges of agriculture. Each of the States has a staff of extension workers, including county agricultural agents, home demonstration agents, and specialists in the various lines of agriculture and home economics. The joint extension services of the Federal Government and the States maintain county agricultural agents in a large proportion of the counties in which reclamation projects are located. Obviously there should be the closest relations between the farm advisers employed on reclamation projects and the extension services of the various States, particularly the county agents. As this extension service is carried on under the general supervision of the Department of Agriculture, the setting up of a similar service by another department would not only be much more expensive to the Government but would be far less efficient because of lacking that close relationship necessary with similar agencies.

With regard to section 22, the letter which I shall send you shortly will discuss it at more length, and it is necessary to say here only that this section contemplates a complete and costly duplication of work which has been going on in this department for several years, and to which almost every bureau of this department is contributing and must contribute in a very direct way if the work is to be of any value.

You will see from the foregoing that, in my opinion, if H. R. 8836 should become a law as it now reads, it will result in very large and unnecessary duplication of work of this department and add very considerable expense to the Federal Government. There is no question but that the difficulties on many of our reclamation projects are due to the ignoring of the agricultural requirements and practices to make such projects a success. This is brought out very clearly by the report of the special advisory committee on reclamation printed as Senate Document No. 92. Before a reclamation project is undertaken there should first be a study of the soil, of what it will produce, of the possible markets for the crops produced, and a reasonable assurance that water can be put on the land at a cost which will enable intelligent and industrious farmers to establish a prosperous farm community. That is an agricultural inquiry pure and simple, and it can be answered satisfactorily only by calling upon the entire resources of such a department as the Department of Agriculture. If such inquiry results in a satisfactory answer to the major question, the next step is the construction of the irrigation works. This is an engineering problem. When the engineers have finished and the work is complete the problem again becomes agricultural. Most of the trouble the Federal Government has experienced in its reclamation enterprises has been due to the fact that they have been promoted too largely from the viewpoint of the engineers who lack agricultural knowledge.

It is my opinion, and I so testified before the reorganization committee, that in the interest of good Federal administration the entire Reclamation Service, except perhaps that part which deals with engineering construction, should be transferred from Interior to Agriculture. Until that is done there will be unnecessary duplication of work and expenditures. You will note from the foregoing that I am in full accord with the theory of the bill which you are considering. It proposes to do what ought to be done, namely, to consider the agricultural aspects of a proposed project before beginning upon the engineering work, and to consider what needs to be done to promote good farming after the projects have been constructed.

My point is that this work, both before and after construction, can be done best and most economically by the Department of Agriculture, and if undertaken by any other department must inevitably result in a vast amount of duplication and millions of dollars of additional expense.

Very truly, HENRY C. WALLACE, *Secretary.*

---

DEPARTMENT OF AGRICULTURE,
*Washington, May 30, 1924.*

Hon. JOHN E. RAKER,
*House of Representatives.*

DEAR MR. RAKER: With further reference to your letter of May 27 asking for information concerning the relation of House bill 8836 to the work of the Department of Agriculture, I am glad to supply you with the facts requested. As I indicated in my previous communication, some of the provisions of the bill cut squarely across the work of this department and seem to me to involve a wholly unnecessary duplication of machinery and function.

In reply to your specific inquiries—

(1) You ask me to advise you how long the item for enabling the Secretary of Agriculture to encourage and aid in the agricultural development of the Government reclamation projects, to assist through demonstrations, advice, and in other ways settlers on the projects, etc., has been carried in the annual agricultural appropriation bill, the total amount provided to date, and the projects and conditions under which work has been done in accordance with this authorization.

The item referred to has been carried in the act making appropriations in the Department of Agriculture since the fiscal year 1915. For the current year it is as follows:

DEMONSTRATIONS ON RECLAMATION PROJECTS

"To enable the Secretary of Agriculture to encourage and aid in the agricultural development of the Government reclamation projects; to assist, through demonstrations, advise, and in other ways, settlers on the projects; and for the employment of persons and means necessary in the city of Washington and elsewhere, $39,000."

The total amounts appropriated and expended to date under this provision from the fiscal years 1915 to 1924, and including the item carried in the bill for 1925, is as follows:

| Fiscal year | Appropriated | Expended |
|---|---|---|
| 1915 | $40,000.00 | $23,079.33 |
| 1916 | 40,000.00 | 37,747.09 |
| 1917 | 40,000.00 | 38,555.66 |
| 1918 | 50,000.00 | 39,145.91 |
| 1919 | 48,600.00 | 39,988.47 |
| 1920 | 48,600.00 | 44,498.51 |
| 1921 | 30,000.00 | 28,543.10 |
| 1922 | 30,000.00 | 27,671.67 |
| 1923 | 39,000.00 | 33,797.49 |
| 1924 | 39,000.00 | [1] 31,883.55 |
| 1925 (pending bill) | 36,460.00 | |
| Total | 441,660.00 | 344,312.18 |

[1] May 29, 1924.

The work conducted under this item has been under the supervision of the Chief of the Bureau of Plant Industry. It has consisted of the employment of competent field men who have been stationed on each of certain reclamation projects and who have devoted their entire time to aiding the farmers, both individually and through local organizations. The aid given has been in the way of advice in dealing with local problems, such as preparing land for irrigation, planning better systems of farming, improving livestock, controlling diseases of live-

stock, improving methods of marketing livestock products, forage production and pasturing, including the cooperative utilization of pastures in the national forests. This work has been conducted on the following projects: Uncompahgre, Colo.; Boise and Minidoka, Idaho; Huntley, Milk River, Sun River, and Flathead, Mont.; North Platte, Nebr., and Wyo.; Newlands, Nev.; Umatilla, Oreg.; Bellefourche, S. Dak.; Yakima, Wash.; and Shoshone, Wyo. There have been temporary assignments of field men to deal with special problems on certain other projects. At the present time field men are employed on the following projects: Uncompahgre, Minidoka, Flathead, North Platte, Newlands, Bellefourche, and Shoshone.

A statement is attached (Exhibit A) showing, as requested, the various reclamation projects and periods during which work has been conducted thereon in connection with the activity described above.

In addition to the foregoing the annual appropriation act of the department for some time has included the following appropriation:

EXPERIMENTS IN DAIRYING AND LIVESTOCK PRODUCTION IN SEMIARID AND IRRIGATED DISTRICTS OF THE WESTERN UNITED STATES

To enable the Secretary of Agriculture to conduct investigations and experiments in problems connected with the establishment of dairying and meat-production enterprises on the semiarid and irrigated lands of the western United States, including the purchase of livestock and the employment of necessary persons and means in the city of Washington and elsewhere, $40,000.

This item carries an appropriation of $40,000, available during the current fiscal year.

(2) You ask concerning investigations as to arid, swamp, and cut-over lands, and inquire concerning the appropriations for such investigations for the past 10 years, for use by the Department of Agriculture for investigations relative to determining information regarding how arid, swamp, and cut-over lands can best be used.

Specific work in the study of irrigation and drainage in this department was begun in 1914. Annual appropriations ranging from $116,200 to $205,600 have been made available by Congress for this work. The total amount appropriated since the beginning of this work, including the appropriation for the coming year, is $1,868,160.

The scope and character of this work is indicated in the pending appropriation act for the year ending June 30, 1925, under the Bureau of Public Roads, which includes our rural engineering work, as follows:

> "For investigating and reporting upon the utilization of water in farm irrigation, including the best methods to apply in practice; the different kinds of power and appliances; the flow of water in ditches, pipes, and other conduits; the duty, apportionment, and measurement of irrigation water; the customs, regulations, and laws affecting irrigation; for investigating and reporting upon farm drainage and upon the drainage of swamp and other wet lands which may be made available for agricultural purposes; for preparing plans for the removal of surplus water by drainage; for the development of equipment for farm irrigation and drainage and for giving expert advice and assistance; for field experiments and investigations and the purchase and installation of equipment for experimental purposes; for the preparation and illustration of reports and bulletins; for the employment of assistants and labor in the city of Washington and elsewhere; for rent outside the District of Columbia; and for supplies and all necessary expenses, $145,650."

Under the general authority of the appropriation to the Bureau of Agricultural Economics to investigate and encourage the adoption of improved methods of farm management and farm practice the Department of Agriculture has carried on various studies on reclamation projects concerning cost of production and economic aspects of farm organization and practice. No specific appropriation has been made by Congress for this work applicable solely to reclamation projects, but existing projects have come in for considerable attention under these studies. At the present time a continuous economic survey is being made in the Twin Falls project. This has been made annually for the past four years and has involved an expenditure of approximately $30,000. Another survey in the Yakima Valley has been made for two years in succession at a cost of about $10,000. In the neighborhood of Fort Collins, Colo., a study of the cost of producing beef cattle is being made. This involves both irrigation and dry-farming methods. For the fiscal years 1915–1917 a special appropriation of $15,000 was made to the old office of farm management for the study of methods and costs of cleaning lands in cut-over regions. Altogether this office has spent upward of $90,000 in special studies on reclamation projects. Under the same appropriation the bureau, through its division of land economics, has for the last four years carried on studies in methods of land settlement, both private and public, including consideration of both private and public reclamation projects. At the present time a survey is being made in the Southwest, which has covered the Federal projects of Carlsbad, Los Cruces, and El Paso, as well as various private irrigation projects. Arrangements have been made to extend this work into other parts of the West during the coming fiscal year. The object of these studies is to determine the economic conditions affecting the success or failure of settlers, and particularly the annual amount in the way of construction charges, water charges, and interest on land value and equipment that is justified by the net-value product of agriculture under various types of farming. Such studies should be conducted on a more extensive scale than has been possible under the funds available.

(3) You ask whether there have been any soil surveys made by the Department of Agriculture within the past 10 years under provisions authorizing appropriations for the Bureau of Soils on any of the Government reclamation projects, and if so, which projects have been so surveyed? The Bureau of Soils has for at least 10 years been conducting soil surveys generally throughout the United States which incidentally cover reclamation projects, this work having been carried on under the following provision, which has been included annually in the Agricultural appropriation act:

> "For the investigation of soils, in cooperation with other branches of the Department of Agriculture, other departments of the Government, State agricultural experiment stations, and other State institutions, and for indicating upon maps and plats, by coloring or otherwise, the results of such investigations. * * *"

For at least 10 years the Bureau of Soils has been specifically cooperating with the Reclamation Service in special examinations of soils to aid in the classification of agricultural lands under another provision carried in our annual appropriation act, as follows:

> "For examination of soils to aid in the classification of agricultural lands, in cooperation with other bureaus of the department and other departments of the Government. * * *"

Lists showing the reclamation projects that have been covered by the Bureau of Soils under each of these items are attached (Exhibits B and C) as requested.

The Bureau of Soils is working in cooperation with the Reclamation Service under an agreement between the Secretary of the Interior and the Secretary of Agriculture, and where necessary is supported in part by transfer of funds from the Reclamation Service to the Bureau of Soils. The funds at the disposal of the Bureau of Soils have not always been adequate to pay the expenses of the work requested by the Reclamation Service.

In response to the part of your inquiry which requests that if a soil survey has not been made on each Government reclamation project I advise you why this has not been done and the reason therefor, I may state that it has been recognized that the Reclamation Service was responsible for these enterprises, but that the Bureau of Soils has complied with every request made by the Reclamation Service for soil surveys and soil investigations.

With reference to section 22 of H. R. 8836, which proposes to appropriate $100,000 annually for five years for investigations through the Bureau of Reclamation to determine how arid, swamp, and cut-over timberlands may best be developed in the future to meet the growing agricultural needs of the Nation, I can only reiterate that this proposed work would comprise a clear-cut duplication of similar work mentioned above as now carried on by the Division of Agricultural Engineering (irrigation and drainage studies) and the Division of Land Economics of the Bureaus of Roads and Agricultural Economics of this department. A special committee on land utilization, appointed by the by the Secretary of Agriculture, consisting of representatives of the various bureaus of this department, has been studying this whole question for the past two years. The committee has considered present and future needs for crop land, forests, and pastures; the extent and location of areas that can be made available for these various uses; and the governmental policies that should be adopted to adjust use to needs. The matter is referred to in more detail in the last annual report of the Secretary of Agriculture (1923 report, p. 78), a copy of which is attached (Exhibit D).

The most serious duplication, however, consists in the fact that the determination of the proper utilization of land is only incidentally an engineering problem. It necessarily involves the concentration on the single problem the knowledge and methods of research peculiar to many different types of agricultural specialists, such as soil physicists and chemists, agricultural engineers, agronomists, horticulturists, livestock and dairy specialists, entomologists, forestry experts, and agricultural economists trained in the special problems of farm organization and management, land valuation, etc.

Furthermore, the determination of the scope and direction of agricultural expansion is a matter of peculiar concern to the Department of Agriculture, for such expansion has a direct influence on the prosperity of the existing industry of agriculture, and when the development of new agricultural areas is ill advised the burden of restoration of the unfortunate farmers falls largely on this department.

Again, it should be noted that the determination of the most efficient utilization of land, particularly of cut-over land, is a matter of vital concern to the Forest Service, for the question is largely one of determining whether the land is best adapted to farming or to forests. The Forest Service has accumulated a vast amount of experience along this line through its work in classifying the 150,000,000 acres of land

in the national forests, and it is incidentally concerned in land classification through the necessity of selecting forest lands for purchase under the forest acquisition law.

If I have not given exactly the information you desire, I shall be glad to have you call upon me further. I feel very strongly that the committee should have before it all available facts before passing on this important legislation.

Sincerely yours,

HENRY C. WALLACE, *Secretary.*

EXHIBIT A

OFFICE OF DEMONSTRATIONS ON RECLAMATION PROJECTS,
BUREAU OF PLANT INDUSTRY,
DEPARTMENT OF AGRICULTURE,
*March 29, 1924.*

Statement showing reclamation projects and periods during which work has been conducted thereon by the Office of Demonstrations on reclamation projects:

Bellefourche project (South Dakota), from May, 1918, to March, 1920; from December, 1922, to date.

Boise project (Idaho), from March, 1915, to March, 1919.

Grand Junction project (Colorado), spring, 1921.

Huntley project (Montana), from February, 1915, to July, 1917; from February, 1919, to July, 1921.

Lower Yellowstone project, from April, 1920, to September, 1920.

Flathead project (Montana), from July, 1923, to date.

Milk River project (Montana), each summer, 1920 to 1923.

Minidoka project (Idaho), from October, 1914, to June, 1918; from February, 1919, to September, 1920; from November, 1920, to March, 1922; from August, 1922, to date.

Newlands project (Nevada), from 1914 to date.

North Platte project (Nebraska-Wyoming), from July, 1914, to November, 1917; from February, 1918, to March, 1920; from May, 1922, to date.

Shoshone project (Wyoming), from March, 1915, to September, 1920; from July, 1921, to date.

Sun River project (Montana), each summer, 1920 to 1923.

Tieton project (Washington), from 1915 to 1920.

Umatilla project (Oregon), from January, 1918, to October, 1919.

Uncompahgre project (Colorado), from October, 1915, to September, 1919; from December, 1919, to date.

Yakima project (Washington), from 1914 to 1920.

EXHIBIT B

List of United States reclamation projects covered by soil surveys under the general appropriation for soil investigations:

Arizona—
- Yuma, Yuma area, 1905.
- Salt River, Salt River Valley area, 1900.

California—Orland, Colusa area, 1907.

Colorado—
- Grande Valley, Grand Junction area, 1905.
- Uncompaghre, Uncompaghre area, 1910.

Idaho—
- Boise, Boise area, 1901.
- Minidoka, Minidoka area, 1907.
- Shoshone, no surveys.
- King Hill, no survey.

Montana—
- Sun River, no survey.
- Fort Peck, no survey.
- Huntley, Billings area, 1902.
- Lower Yellowstone Valley, no survey.
- Milk River, no survey.
- Flathead, no survey.
- Blackfoot, no survey.

Nebraska—North Platte, Morrill County, 1917; Scotts Bluff County, 1913; Banner County, 1919; Sioux County, 1919; Fort Laramie (Wyo.) area, 1917; Western Kansas reconn., 1911.

Nevada—Newlands, Fallon area, 1909.

New Mexico—
- Rio Grande, Mesilla Valley area, 1912.
- Carlsbad, Pecos Valley area, 1899.
- Hondo, Pecos Valley area, 1899.

North Dakota—North Dakota pumping, Williston area, 1906.

Oregon—
- Klamath, Klamath reclamation project area, 1908.
- Umatilla, no survey.

South Dakota—Belle Fourche, Belle Fourche area, 1907.

Utah—Strawberry Valley, Provo area, 1903.

Washington—
- Yakima, Yakima area, 1901.
- Okanogan, no survey.

Wyoming—
- Shoshone, no survey.
- Riverton, no survey.

The years indicated above refer to the particular volume of the field operations of the Bureau of Soils in which the report and map of an area may be found.

EXHIBIT C

*Soil investigations made in cooperation with the Reclamation Service indicating the projects for which special reports and maps were furnished under the special appropriation made the Bureau of Soils for this work.*

| State | Project | Date received | By— |
|---|---|---|---|
| Arizona | Salt River | Aug. 28, 1913 | Macy H. Lapham. |
| | Sentibel | Oct. 16, 1919 | A. T. Strahorn. |
| | Yuma | Nov. 23, 1914 | Do. |
| California | Imperial Valley | June 20, 1921 | Do. |
| Colorado | Grand Valley | July, 1915 | Do. |
| | Montezuma | Jan. 19, 1919 | Do. |
| | Uncompahgre | June 20, 1915 | Do. |
| New Mexico | Carlsbad | Apr. 13, 1923 | Do. |
| New Mexico and Texas. | Rio Grande | Dec., 1914 | Do. |
| Oklahoma | Lawton | Oct., 1914 | Do. |
| Oregon | Warm Springs | Oct. 9, 1923 | H. H. Krusekopf. |
| | Umatilla | June 4, 1914 | A. T. Strahorn. |
| Oregon-California | Klamath (Tule Lake Division). | Aug. 30, 1922 | A. E. Kocher. |
| | Klamath (Tule Lake Division.) | Oct 9, 1923 | Scott Ewing. |
| Texas | Rio Grande | Dec, 1921 | A. T. Strahorn. |
| Utah | Green River | Oct. 24, 1921 | Do. |
| | Salt Lake Basin (Tooele Valley). | Aug. 26, 1922 | Do. |
| Wyoming | Alcova-Casper | Apr. 13, 1923 | Do. |
| | Green River (viz: Bonneville, Big Piney La Barge and Church Buttes). | Oct. 7, 1918 | Do. |
| | Wind River | Sept. 8, 1917 | Do. |
| | Shoshone (Sp.) | Nov. 27, 1922 | Do. |
| | Shoshone (Willwood and Frannie Extensions). | Sept. 27, 1922 | Do. |
| | Shoshone (Willwood and Frannie Divisions). | Aug. 18, 1914 | Do. |

In addition to the above we find that special examination and report was made on the Minidoka project, Idaho, in July, 1915, by Mr. Strahorn, for which no maps were supplied. This also applies to investigations on the Huntley project, Montana, Weber-Provo project, Utah, and Uncompahgre project, Colorado.

On August 14, 1922, Mr. Strahorn wrote a memorandum to the board of engineers of the Milk River project, Montana, but no other report was made.

In August, 1922, analyses of four soil samples from the Tieton Dam, Washington, was made for the Reclamation Service, and last year we made analyses of 146 soil samples for the Reclamation Service in connection with the Klamath marshes on the Klamath projects.

In 1923 the Baker, Oreg., and Columbia River basin, Wash., projects were completed and reports and maps have been submitted.

*County agents in counties in which irrigation projects are located*

THE FOREST PROBLEM ONLY ONE PART OF A GENERAL NATIONAL PROBLEM OF LAND UTILIZATION

In reality the problems of forestry and the better regulation of the grazing resources on the public domain are merely phases, though very important phases, of the broad problem of land utilization. As the timber is cut millions of acres are thrown out of use. Some of this land is now suitable for use as farming land, some of it will be needed for that purpose in the course of time, but most of it is permanently unsuited to use for farming purposes. Of the arid or semiarid open public grazing lands relatively little is physically capable of growing crops except where irrigation may be possible, no matter how pressing the national need for crop land may become, and under present conditions it is steadily declining in capacity for use for the only form of use to which it can be put, while being held open for entry under the homestead laws. It is clear that a proper distribution of our reserve areas between the three uses—forests, grazing, and crops—implies some kind of policy of giving direction to the utilization of our land resources.

LAND UTILIZATION POLICY

While many of the agricultural difficulties of the past three years have been due in part to surplus production resulting from overstimulation during the war, it is evident that before many years our population will have grown to a point which will enable it to consume not only all we produce at the present time but considerably more. Where this increased production is to come from and how our national land resources may be best used is therefore a matter of major importance. Some two years since I appointed a departmental committee, consisting of representatives of various bureaus, to consider present and future needs for crop land, forests, and pastures; the extent and location of areas that can be made available for these various uses; and the governmental policies that should be adopted to adjust use to needs.

The more immediate problems of the adjustment of type of use to climate, soil, and economic conditions in the semiarid regions of the West have received the major part of the attention of the section working on land utilization problems. Particular attention has been given to the Great Plains as a whole and the spring-wheat section as a part of the larger field. Frequently recurring seed loans are not a solution of the problem; this lies rather in a change in the type of agriculture and farm organization.

War prices, propaganda urging increased food production, and local desire for the development of unused resources have brought about the reclamation by irrigation and drainage of large areas of land on some of which it is being found difficult to repay the cost of reclamation. Effort has been made during the past year to coordinate the policy of the Reclamation Service with the studies of this department in directing land utilization and settlement. The Secretary of the Interior has recognized the desirability of obtaining the judgment of the Department of Agriculture concerning the agronomic and economic feasibility of proposed reclamation projects and has referred such projects to this department for consideration.

Tenancy on farm lands has been increasing. Studies of the extent of tenancy and of the various forms of contract under which tenants operate have been made with a view of promoting farm ownership and the use of equitable forms of rental agreements.

Farm credits are based primarily on land values. The proper appraisal of farm lands is of great importance in order that the farmer may obtain the credit to which he is entitled and at the same time that credit agencies may have adequate security. During the year much attention has been given to a determination of the influence of the various factors affecting land values as a basis for developing scientific methods of appraisal.

It is hoped that the report of this departmental land committee will be ready for inclusion in the Yearbook of the department for 1923, and it is expected that this Yearbook will be available for distribution early in the spring of 1924. (Report of the Secretary of Agriculture, 1923, pp. 78 and 79.)

It is most deplorable that legislation of such vital and wide-reaching importance should be jammed through the committees during the last days of the Congress, but what ought to be said about the present attempt to rush it through as a rider on an appropriation bill on the last day of the session.

This is how and the method by which the people get stung.

Prior legislation by riders on appropriation bills has demonstrated how unwise and dangerous such legislation has turned out to be to the interests of the people. This should not be tolerated. It ought to be stopped.

The SPEAKER. The time of the gentleman from California has expired.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, its Chief Clerk, announced that the Senate had passed the following resolution:

*Resolved*, That a committee of two Senators be appointed by the Presiding Officer of the Senate to join a similar committee appointed by the Speaker of the House of Representatives to wait upon the President of the United States and inform him that the two Houses having completed the business of the present session are ready to adjourn unless the President has some other communication to make to them.

SECOND DEFICIENCY BILL, 1924

Mr. MADDEN. Mr. Speaker, I yield to the gentleman from Colorado [Mr. TAYLOR] five minutes.

The SPEAKER. The gentleman from Colorado is recognized for five minutes.

Mr. TAYLOR of Colorado. Mr. Speaker, the reclamation law was enacted 22 years ago this month. Almost immediately thereafter every one of the Western States wanted several projects. The Reclamation Service rushed out engineers, and within a comparatively short time they approved some 28 projects. They approved some of them without thorough or proper investigation.

Many of those projects were based and approved upon the proposition that they could irrigate from two to three times as much practically irrigable land as there is under them today. They based the cost of construction upon that estimated acreage. One project in my State was estimated at 55,000 acres. They never yet have been able to irrigate half of that amount.

The result is that instead of it being about $50 an acre, as the settlers expected it to be, if the land now actually under practical irrigation was compelled to pay the entire cost it would be $324.80 an acre. Of course, they never on earth can or will pay it.

Another project was estimated at 140,000 acres. After 15 years' operation they have not much over half of that acreage in irrigated crops. They can not and should not pay this extra cost. The cost of construction has been, in some instances, nearly three times what it was originally estimated to be by the reclamation engineers. We are not asking any relief for any of the mistakes or hardships of its settlers. But we have a right to and are asking relief from the impossible burdens that have been heaped upon the public-land settlers by the incompetency of the Government officials.

Now, the poor people who settled on these lands with their families are not responsible for the mistakes of the Government, and they can not be compelled or expected to do impossibilities. All that this bill provides is that it gives the Secretary of the Interior discretionary power to figure out how much money per acre per year they can pay, and then require them to pay that amount only. And no human being can honestly or fairly ask any more.

This is a humane as well as a business proposition. If you are going to insist upon not giving those people any relief—and many hundreds of them have gone away from some of the projects already, and many more of them will be compelled to move off—as a sensible business proposition I ask this House

to grant to the Secretary of the Interior the power to do the very thing that President Coolidge and Secretary Work have asked you to do, to grant this relief to the settlers on such of the projects in the West that need it. I say it is a humane and necessary measure. It will not cost the Federal Treasury a dollar. Not one of the older States from which most of you gentlemen come produces one dollar toward this reclamation fund. The money all comes from the reclamation fund.

We are simply asking you to allow us to make this absolutely necessary adjustment, so that the original settlers upon those projects may be able to hold their homes—save part of the work of many hard and trying years. The policy of trying to fix a flat, horizontal rate of charges upon all kinds of lands, upon all kinds of projects, is so frightfully stupid and harsh that it is a crime.

As I said in my speech before the House on the 12th of last January, every project is different from all the others. The lands under each one are widely different in character. The Reclamation Service must ascertain what is the real, practical, ordinary, and fair actual annual net cash return per acre of the actually irrigated land—that is, what does the farmer get out of it? What is the ordinary and actual cash productivity per acre per year to the farmer? And the only sane or businesslike or successful or fair way is to classify the lands under each of the projects with respect to their actual power to support a family and pay water charges, and those charges must be apportioned equitably, so that no land will be charged with a greater cost than its actual cash productivity will bear.

In other words, the Reclamation Bureau must be put upon and conducted upon a common-sense, reasonable, and businesslike basis, and until that is done some of these projects never will be a success. That is all we of the West are asking Congress to do by this bill. [Applause.]

Mr. LONGWORTH. Mr. Speaker, I want to appeal to gentlemen, no matter what side of this question they are on, not to ask for more time. I do this merely to get time in which the necessary conference can be conducted. The Senate has sent over a message stating that their business has been completed and that they are ready to adjourn. We have only three hours in which to act before the time set for adjournment. It makes no difference in the matter of sending this bill to conference. After all, the conferees must be guided by their own judgment.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. GARRETT of Tennessee. It is very undesirable that a condition should be brought about by which it might seem necessary to turn the clock back.

Mr. LONGWORTH. I sincerely hope nothing like that may happen, and if gentlemen will content themselves now with permitting this bill to go to conference and allowing the conferees to use their judgment it will be the best thing for everybody concerned.

The SPEAKER. The question is on the motion of the gentleman from Idaho that the House recede and concur.

The question was taken; and on a division (demanded by Mr. SMITH) there were—ayes 62, noes 93.

So the motion was rejected.

Mr. SMITH. Mr. Speaker, I object to the vote on the ground that there is no quorum present.

The SPEAKER. The gentleman from Idaho makes the point of order that there is no quorum present. The Chair will count.

Mr. SMITH. Mr. Speaker, I withdraw the point of order of no quorum.

Mr. MADDEN. Mr. Speaker, I move that the House further insist on its disagreement.

Mr. BLANTON. The gentleman from Illinois ought to understand that if the conferees should put this proposition in there will be a point of order——

The SPEAKER. The gentleman is out of order. The gentleman from Illinois moves that the House further insist on its disagreement.

The motion was agreed to.

Mr. MADDEN. Mr. Speaker, I move that the House agree to the conference requested by the Senate.

The motion was agreed to.

The SPEAKER appointed the following conferees: Messrs. MADDEN, ANTHONY, and BYRNS of Tennessee.

PERMITTING CERTAIN ALIENS TO REMAIN IN THE UNITED STATES

Mr. JOHNSON of Washington. Mr. Speaker, I move to take from the Speaker's table House Joint Resolution 283, and agree to the Senate amendment.

The SPEAKER. The gentleman from Washington calls up House Joint Resolution 283, with a Senate amendment. The Clerk will report the Senate amendment.

The Senate amendment was read.

Mr. RAKER. Will the gentleman from Washington yield?

Mr. JOHNSON of Washington. Yes; certainly.

Mr. RAKER. Will the gentleman yield a little time to the gentleman from Texas [Mr. BOX] and myself?

Mr. JOHNSON of Washington. Yes; and I trust the gentlemen will get along with as little time as possible.

Mr. RAKER. The gentleman realizes that we have given considerable consideration to all these matters together with the gentleman himself, and he brings up this matter without even showing it to the Members on the other side.

Mr. JOHNSON of Washington. I beg the gentleman's pardon. It has been shown, and the text of the amendment adopted by the Senate is printed almost literally in this morning's RECORD as a part of the remarks which I made at the time the resolution was passing the House.

Now, then, the resolution adopted yesterday to admit certain aliens—most of whom came in under court decisions—was conceived by some to be the least bit broad and uncertain—that is, not sufficiently tying. It was the intention of your Committee on Immigration to tie it to the four classes described in yesterday's debate and it was the intention of the Secretary of Labor to have that done. The Committee on Immigration in the other body has so tied it and used the words decided upon after this resolution had been reported from the House committee. All that is in the Senate resolution is a positive tying of the purpose of the reserve to the four classes which we wanted to relieve. This has been done as a matter of safety, even though it may not have been necessary.

Mr. RAKER. Will the gentleman yield me five minutes?

Mr. JOHNSON of Washington. I will yield the gentleman three minutes.

Mr. WATKINS. Will the gentleman answer a question?

Mr. JOHNSON of Washington. Yes.

Mr. WATKINS. Does this resolution prevent seamen who left prior to May 26, 1924, from changing their occupation and coming in?

Mr. JOHNSON of Washington. No sailor can get in, and I doubt whether any could have gotten in under the other proposition, because seamen are not immigrants. But this amendment ties it down to the four classes exactly. I now yield three minutes to the gentleman from California [Mr. RAKER].

Mr. RAKER. Mr. Speaker and gentlemen, we tried to defeat the original resolutions, but in this we failed, and the House saw fit to pass it. I want to say this to show how you can easily make mistakes. The resolution (H. J. Res. 283) which passed yesterday would have admitted from 100,000 to 500,000 aliens not admissible under the present law and in contravention of the new immigration law of 1924. It would have admitted every seaman on the high seas; it would have admitted every man who left his home before the 26th of May, 1924, and who had embarked—started—on his way to the United States. The stream would have been endless from every corner of the globe. I fully presented this to the Members of the Senate last night and this morning.

Mr. VAILE. And who are lawfully here?

Mr. RAKER. No; not at all; that is not in it at all. I took it up with at least 8 or 10 lawyers, and took it up with the Senators yesterday and last night. I went over to the Library and found that the word "embarked" means having started for the United States at any time before that date. They embarked for the United States from the interior of Russia when they started on their journey for this country. Thousands have been on the road for years. No limit as to time when they started except it be before May 26, 1924. There are literally thousands of women and men in the ports of foreign countries and there are thousands there now having "embarked"—started—on their way to the United States. These could have all entered the United States under the resolution as it passed the House. The Senate has cut this vast number down to those admitted under the court decision. That is bad enough. Those men could come in, as well as every man on the high seas.

The Senators admitted that and amended this resolution so that could not be done. The legal definition of the word "embark" means to start to a place; it does not necessarily mean to enter upon a ship; and a reading of the resolution shows that if an alien embarked—started—for the United States on or before that date—May 26, 1924—he could enter.

No such resolution as this has ever been presented to Congress after an exclusion bill whereby the entire floodgates of

the United States were thrown open for admission. I am pleased to know the Senate has placed these restrictions on this resolution, and in this work I am glad. It was my fortune to assist, however little that may have been.

The immigration act of 1924 closed the front door, as it were, and this Resolution 283 as it passed the House threw the back door wide open; but as the resolution is now amended it lets those remain who entered the back door by the Gottlieb and kindred decisions—though illegally and without authority of law—and now having thus entered we finally close the door and say, "Though you entered illegally we will be generous and let you remain." We are promised by the officials that this will not occur again. Let us hope this is true. It should be. Hereafter peoples will enter, if at all, under the new act.

The SPEAKER. The time of the gentleman has expired.

Mr. JOHNSON of Washington. Mr. Speaker, I yield three minutes to the gentleman from Texas [Mr. BOX].

Mr. BOX. Mr. Speaker, of course, every Member of this House who wants to restrict immigration and wants to go as far as he can toward enforcing the law ought to vote for these amendments because they lessen the bad effect of the bad resolution which passed the House yesterday. It improves it in particulars that were very necessary. Nobody knows how many thousands it would have admitted, but they were many. It was wide open, as my colleague, the gentleman from California [Mr. RAKER] has told you. We did not have the time to present it to you yesterday, but it included an unknown and great number, and that illustrates, my colleagues, the extreme folly of dealing with important questions like this in the hasty manner in which we dealt with this yesterday.

The chairman of the committee, unfortunately, is not exactly accurate when he says the Secretary of Labor intended the resolution operate as they interpreted it here yesterday. The Secretary of Labor asked us to include all people at foreign ports who are admissible under the old law. That is what the resolution you passed yesterday did, if they started for the United States prior to May 26.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. BOX. Yes.

Mr. JOHNSON of Washington. But the committee did not grant that. Yes; they did, in substance, but these amendments were added by the Senate, which lessened the serious evil this resolution does.

Mr. BOX. I understand that the committee did not tell the House that they granted the Secretary's request, but I understand that the bill did grant it as to all who started to America before May 26, 1924. We did not have time to develop the facts. We ought to be frank with this body. If I serve with you a long time or a short time, on this or any other committee, when I make a statement to you I want you to know that the facts are as presented to you. Had the House known what was involved in the resolution, I am persuaded it would not have passed it. [Applause.]

The Senate, through the efforts of Members of the House Committee, and through their own diligence, have partially protected the country against its act of extreme folly on the part of this House in passing this resolution presented under circumstances which were unjustified. [Applause.]

Mr. JOHNSON of Washington. For the RECORD, I want to say that sailors are not regarded as immigrants. Sailors would not have been admitted under the resolution adopted yesterday, but we have thought it best to play safe. I am not alarmed as to the great numbers of the other classes. As I said yesterday they are mostly here in the United States now.

Before I conclude I would like to say to all Members that after you have gone to your homes you will receive the quota-allotment figures under the new law and you will find in those quota allotments 100 for Japan, 100 for China, and 100 for each little mandated place in the barred zone and mandated countries elsewhere, but you need not be alarmed about that because that quota is, of course, for those eligible for citizenship. I am trying to find time to place in the RECORD some explanation of the new law which I think you will all need when you get back to your districts in order to answer the questions of interested persons.

I ask for a vote, Mr. Speaker.

The SPEAKER. The question is on agreeing to the Senate amendments.

The Senate amendments were agreed to.

Mr. SABATH. Mr. Speaker, I ask unanimous consent that I may extend my remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

## WAR MINERALS RELIEF ACT

Mr. ROBSION of Kentucky. Mr. Speaker, I move to suspend the rules and pass the bill (S. 2797) to authorize the payment of claims under the provisions of the so-called war minerals relief act, with an amendment, which the Clerk has at the desk.

The SPEAKER. The Chair would suggest it is very doubtful if it can be enacted at this hour with an amendment.

Mr. BLANTON. It was understood that that was to be put in.

Mr. ROBSION of Kentucky. Mr. Speaker, there was no agreement that I ever heard of that we had to offer this amendment.

The SPEAKER. The Chair does not know what the amendment is.

Mr. BLANTON. Mr. Speaker, right at this point we ought to have a quorum here. This is a $2,500,000 bill.

Mr. ROBSION of Kentucky. No; it is not $2,500,000 at all.

The SPEAKER. The Chair will count.

Mr. BLANTON. Mr. Speaker, I withdraw the point of no quorum.

The SPEAKER. The gentleman from Kentucky moves to suspend the rules and pass the bill S. 2797.

Mr. BLANTON. What is the request?

The SPEAKER. A motion to suspend the rules and pass the bill.

Mr. ROBSION of Kentucky. With an amendment which the Clerk has.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That to enable the Secretary of the Interior to lawfully pay adjudicated claims arising under the provisions of the so-called war minerals relief act, entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919, as amended, the limitation in said act on the aggregate amount to be disbursed thereunder in the payment of said claims is hereby repealed.

Mr. WINGO. Mr. Speaker, I demand a second.

Mr. BLANTON. Mr. Speaker, I make the point of order that the gentleman from Arkansas is in favor of this bill and some one should be recognized to demand a second who is against it. If there is any member of the committee against it, I yield to him, but if not, I claim recognition.

The SPEAKER. Is the gentleman from Arkansas in favor of the bill?

Mr. WINGO. I am in favor of the bill.

The SPEAKER. Is there any other gentleman against the bill who desires recognition? If not, the Chair recognizes the gentleman from Texas.

Mr. BLANTON. I yield half of my time to the gentleman from Arkansas.

Mr. ROBSION of Kentucky. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. ROBSION of Kentucky. Mr. Speaker, I yield three minutes to the gentleman from Colorado [Mr. VAILE].

Mr. VAILE. Mr. Speaker and gentlemen of the House, this amendment makes this bill comply exactly with the recommendations of the Secretary of the Interior. The other night in the discussion of this matter the gentleman from Ohio [Mr. BEGG] made what was not entirely an accurate statement through a too rapid reading of this bill. I am sure the gentleman now realizes that he did not quite correctly state it.

The Secretary of the Interior calls attention to the fact that the necessity for removing this limitation imposed by the present law is because of decisions of the Supreme Court and the Court of Appeals of the District of Columbia holding that certain items, namely, losses in purchase of property and interest on borrowed money, are recoverable by the claimants. This contention has been carried to the Supreme Court of the United States, where it is now pending. If the contention of the Government is sustained in these cases, the present amount of about $1,750,000 which is left in the fund will be sufficient to pay all of these claims or within a very small margin. If the contention of the Government is not sustained, of course, we would have to come to Congress and ask a further appropriation; but the point is that on account of the limitation in the law, to the effect that the appropriation of $8,500,000 in no event could be exceeded, the Secretary has been obliged to hold up the payment of claims which have already been adjudicated and upon which the claimants have been waiting for their money in some cases as long as five years.

Let me call the attention of the House to this fact that the claims which have been proved and paid are the claims of the large miners. They are the claims of the people with whom the

Government made individual contracts by personal individual solicitation. These claims, which were later adjudicated, have not yet been paid. [Applause.]

This results in a very pathetic situation. About 60 per cent of the claims have been adjudicated and paid in full. Those were the large claims, the cases in which the Government by individual personal solicitation induced the large producers to undertake the work, and where in consequence the proof of the claims was easy.

The claims which were adjudicated late and which are not yet paid are those of the small producers who found it more difficult to prove their claims because instead of entering into an individual written contract they began work as a result of appeals made at mass meetings and appeals published by the Government in the western newspapers—appeals to their patriotism to produce the necessary minerals which we could not then get from abroad and which were as necessary to the winning of the war as was the valor of our soldiers.

It required an act of Congress to permit these people to prove their claims, and, their proof being late through no fault of their own, these little fellows have not been paid. They can not be paid in full unless we remove this limitation.

I know one widow who, fired by patriotic fervor, as the result of a public appeal made by a Government agent at Leadville, personally did most of the manual labor necessary to reopen her little mine, herself pulling rock out of the shaft by the original "armstrong hoist."

She has not been paid. Without this relief she never can be paid in full, while claims as large as half a million dollars, claims no more deserving perhaps but not nearly so urgent, have been completely settled.

I hope this Congress will perform a plain obligation of the Government, an obligation to a most patriotic and deserving class of citizens, by passing this bill. [Applause.]

The SPEAKER. The time of the gentleman from Colorado has expired.

Mr. BLANTON. I yield two minutes to the gentleman from Ohio.

Mr. ROBSION of Kentucky. I yield two minutes to the gentleman from Ohio.

Mr. BEGG. Mr. Speaker and gentlemen of the committee, the night before last it was I who stopped this bill from going through, and at that time I offered to permit its passage if they would insert such an amendment as we have now before us; that is, an amendment that would not carry any appropriation but would remove the restrictions on the one million seven hundred thousand and odd dollars that are now available for the payment of these claims. If the Supreme Court reverses the decision next November, this action to-day will not have been futile. Last October, after the suits were entered and courts found that they could gain in compensation in their claims for original investments plus interest, it immediately became apparent that $8,500,000 would not be enough to pay all of the claims. Then the Secretary of the Interior, in order to protect himself against spending more than the appropriation, said that he would stop paying any of the claims, and as a result a number of claimants whose claims had been allowed have been compelled to go without their money since last October, at great injury to themselves. All this amendment does is to permit the Secretary of the Interior to pay the claims that have been found to be justifiable down to date. This does not carry one cent of appropriation. Next November, if the Supreme Court itself finds that the lower courts have been accurate in their findings and that we are obligated to pay for the original investment plus the interest, then the claimants will all come back to Congress and ask for a new appropriation, for enough to cover the amount of the original investment plus the interest for all the claimants. That is the whole thing in a nutshell. There is no charge in this, it removes the restriction and that alone on money already appropriated, claims already found to be just, and there can not be any damage in passing this legislation.

Mr. BLANTON. Mr. Speaker, I have fought this mineral bonus bill since four or five years ago when it was first passed. With the amendment that we have forced to be offered it is not so bad as it was last night, when it embraced an authorization for $2,500,000 appropriation. There is just one argument for the passage of this bill, and only one, and that is a good one. The big fellows, as our colleague from Arkansas [Mr. WINGO] has said, have already gotten their money. It is the little fellows who have been left out in the cold, it is the little fellows who are still unpaid, and my sympathies are with the little fellows on the proposition.

Mr. SMITH. Where were the gentleman's sympathies in respect to the poor farmers on the reclamation projects?

Mr. BLANTON. I want to quote the RECORD right here on those northwestern reclamation farmers. I want to tell the gentleman from Idaho [Mr. SMITH] something about these poor people of his who live in the Northwest, who have been coming in here and asking hand-outs from Congress because they are so poor they can not pay their debts.

Mr. SMITH. We are not asking for any hand-outs, but we are asking for a little time in which to pay.

Mr. BLANTON. The last census of 1920 shows that the approximate average per capita wealth in all of the 48 States is $2,918. Yet these poor people out in Idaho who can not pay their debts, however, have an average per capita wealth of $3,301, which is $383 per person more than the average per capita wealth of the 48 States. And I notice that the great State of Nevada heads the list as the richest State in per capita wealth of all the 48.

Mr. RICHARDS. I wish the gentleman would put the figures in the RECORD.

Mr. BLANTON. I notice that Wyoming, that is seeking so much of this jack pot to be taken out of the Treasury—this common joint northwestern jack pot to be divided up there—Wyoming is the second richest State in the Union in per capita wealth. Wyoming has $4,663 per person, as compared with the average of $2,918 for the 48 States. Then I notice South Dakota is third and Iowa is fourth and Oregon is fifth, California is sixth, and Nebraska is seventh in per capita wealth. [Applause.] Let us see about a comparison of increase of per capita wealth from 1912 to 1922, given by the census, as to these "poor people seeking hand-outs to pay their debts." I notice Arizona heads the list, and I notice Wyoming comes next, and I notice that Idaho is the fourth State on the list. And they talk to me about "the poor people of the Northwest"!

I am not going to take up any more time. I think with this amendment probably the rights of the people are safeguarded, and I am not going to take up any more time against it.

The SPEAKER. The question is on the motion to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended, and the bill was passed.

### HOWARD UNIVERSITY ATHLETIC FIELD AND GYMNASIUM

Mr. ZIHLMAN. Mr. Speaker, I move to suspend the rules and pass the bill S. 2694, a bill to enable the trustees of Howard University to develop an athletic field and gymnasium project, and for other purposes.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

**An act (S. 2694) to enable the trustees of Howard University to develop an athletic field and gymnasium project, and for other purposes**

*Be it enacted, etc.*, That for the purpose of developing an athletic field and gymnasium project, the trustees of Howard University are hereby authorized to acquire, by gift, purchase, condemnation, or otherwise, so much of square 3059, formerly block 6, Howard University Subdivision, as the university does not already own, also 45,000 square feet of land, being that portion of square 3057, formerly block 7, Howard University Subdivision, which lies south of the 15-foot alley running east and west in said square, also known as the east 300-feet front on Euclid Street: *Provided*, That no special appropriation of funds of the United States shall be made for this purpose, and that no liability on the part of the United States shall be involved in said acquisition.

SEC. 2. That those portions of Fairmont and Girard Streets lying within the area to be acquired and between the said area and the present grounds of Howard University, together with all alley space not subject to the terms of the Code of Laws for the District of Columbia, shall and are hereby declared to be closed and abandoned as public ways and shall be subject to acquisition under section 1 hereof.

SEC. 3. That the Secretary of War is hereby authorized and directed to reconvey to the trustees of the Howard University a triangular plot of land now included in McMillan Park and situated between Fairmont Street, Fifth Street, and the McMillan Park Reservoir, at the price per foot formerly paid to the said university by the United States for the said property, subject to such terms and conditions as may be prescribed by the Secretary of War.

SEC. 4. That no street shall be closed until all of the property abutting on the portion to be closed shall have been acquired by the trustees of Howard University: *Provided*, That no street shall be closed until the trustees of Howard University shall have secured the necessary title to and shall have dedicated to the District of Columbia the land necessary to provide the following streets, to wit:

An extension of Sixth Street, with a width of 50, north for 194 feet from its present terminus at Girard Street; also a street, with a width of 44 feet, from the terminus of Sixth Street as above extended

eastwardly to Fifth Street: *Provided further*, That an easement in the areas of the streets hereby closed shall remain in the District of Columbia for all except highway purposes, and that no structures shall be erected thereon except with the permission of the Commissioners of the District of Columbia.

Mr. ZIHLMAN. Mr. Speaker, I would like to explain this proposition.

Mr. STEVENSON. Mr. Speaker, I ask for a second on this.

The SPEAKER. The gentleman demands a second.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

There was no objection.

Mr. ZIHLMAN. Mr. Speaker and gentlemen of the House, this bill provides for the closing of Fairmont Street to Girard Street through the northern end of the land north of Howard University, two short spurs of streets, and running from Sixth Street down to the reservoir. One street, Fairmont Street, is now closed having a dwelling and parking space across the street. This bill also provides the Secretary of War shall sell this piece of land which was purchased back to the university, and that the university could condemn and open up Sixth Street to a point on the present line of Girard Street and then carry down to the road running around the reservoir. It has the approval of the District Commissioners who reserve the right of easement over the property to be used, and it has the approval of the Secretary of the Interior. Congress has appropriated $197,500 for this improvement, and unless this bill passes it will be impossible for this improvement to be made.

Mr. TILSON. Will the gentleman yield?

Mr. ZIHLMAN. I will yield.

Mr. TILSON. How far beyond the ball park is this street?

Mr. ZIHLMAN. I would say two squares.

Mr. TILSON. It seems to me that district is rather congested at times and there seems to be a lack of streets running off from Georgia Avenue.

Mr. ZIHLMAN. I will say these streets run from Sixth Street down to the reservoir, and there is no congestion there because there is only one piece of property in all the land to be acquired except the property necessary for the extension and opening up of Sixth Street.

Mr. TILSON. The gentleman's plan has nothing to do with the extension between Vermont Avenue and Georgia Avenue?

Mr. ZIHLMAN. Nothing whatever. This is vacant land directly north of Howard University and between Sixth Street and the reservoir.

Mr. TILSON. And it is entirely east of Georgia Avenue?

Mr. ZIHLMAN. Yes; and entirely east of Georgia Avenue.

Mr. CRISP. Mr. Speaker, it is impossible to hear what is being said; but I desire to ask the gentleman, does this directly or indirectly lead to a charge on the United States Treasury?

Mr. STEVENSON. Does it not lead to an expenditure by the Government of the United States?

Mr. ZIHLMAN. There is an appropriation for this in the current law.

Mr. CRAMTON. The appropriation has been made for the athletic field.

Mr. ZIHLMAN. In the appropriation act of 1923.

Mr. CRISP. But this bill does not involve an expenditure——

Mr. BLANTON. If the bill called for an expenditure, I would have raised an objection to it. I will say to the gentleman, because it comes from a committee of which I am a member. They are going to spend this $190,000 that has already been appropriated in some way, and they might just as well expend it on this as any other purpose.

Mr. STEVENSON. I agree with the gentleman from Connecticut that those are rather congested streets up in that particular part; and if this closes two streets running from Georgia Avenue, it seems to me it will lead to more congestion.

Mr. ZIHLMAN. If the gentleman will read the bill, he will see that they are to open up Sixth Street running from Girard Street down to the road running around the edge of the reservoir.

Mr. HOWARD of Nebraska. Mr. Speaker, will the gentleman yield for a question?

Mr. ZIHLMAN. I yield.

Mr. HOWARD of Nebraska. Does this bill close streets in the city of Washington?

Mr. ZIHLMAN. It closes the ends of two streets running from Sixth Street down to the reservoir, and gives the District the right of easement over those streets.

Mr. HOWARD of Nebraska. Have the property owners adjacent consented to the closing?

Mr. ZIHLMAN. The major part of the property belongs to Howard University. One side of it, from Sixth Street to the reservoir, is entirely controlled by the university. There is a small piece of land owned by the Government which the Government will deed to the university upon the payment of the purchase price.

Mr. HOWARD of Nebraska. Are there people on the other side? Are there any white folk?

Mr. ZIHLMAN. None whatever.

Mr. STEVENSON. I see it says, "The easement hereby reserved shall remain in the District of Columbia except for highway purposes." Why do you contemplate keeping an easement when it can not be used?

Mr. ZIHLMAN. That language was suggested by the District commissioners.

Mr. UNDERHILL. It may be needed for sewerage purposes or water mains.

Mr. STEVENSON. If it is for city purposes, all right. That is what I wanted to know.

The SPEAKER. The question is on the motion of the gentleman from Maryland [Mr. ZIHLMAN] to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in the affirmative, the rules were suspended, and the bill was passed.

MONUMENT COMMEMORATING THE SACRIFICES OF AMERICAN WOMEN IN THE WORLD WAR

Mr. LUCE. Mr. Speaker, I move to suspend the rules and pass Senate Joint Resolution 43.

The SPEAKER. The gentleman from Massachusetts moves to suspend the rules and pass Senate Joint Resolution 43. The Clerk will report it.

The Clerk read as follows:

*Resolved*, That there is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated the sum of $150,000 as a part contribution to the erection of a memorial building with equipment in the District of Columbia to commemorate the services and sacrifices of the patriotic women of the United States of America, of its insular possessions, and of the District of Columbia during the World War. Said memorial to be erected on the land now occupied in part by the Memorial to the Women of the Civil War, the permanent headquarters of the American Red Cross.

SEC. 2. That said memorial shall be a building monumental in design and character and shall be used by the American National Red Cross and shall cost not less than $300,000: *Provided*, That this expenditure shall include complete equipment.

SEC. 3. That the sum hereby authorized to be appropriated shall not be payable until there shall be raised by private subscription an additional sum of $150,000.

SEC. 4. That the money hereby authorized to be appropriated shall not be paid until the plan of the proposed building shall have been approved by a commission consisting of the president of the American Red Cross, the Secretary of War, the chairman of the Senate Committee on the Library, the chairman of the House Committee on the Library, and a representative of the central committee of the American Red Cross. The plans of the said memorial shall likewise be approved by the Commission of Fine Arts.

The expenditures for said memorial building shall be made under the direction of a commission consisting of the chairman of the Senate Committee on the Library and the chairman of the House Committee on the Library. That said memorial building shall remain the property of the United States Government but under the supervision of the Superintendent of Public Buildings and Grounds, and the American Red Cross shall at all times be charged with the responsibility, the care, keeping, and maintenance of the said memorial building without expense to the United States.

The SPEAKER. The question is on agreeing to the motion of the gentleman from Massachusetts, to suspend the rules and pass the resolution.

The question was taken; and two-thirds having voted in the affirmative, the rules were suspended and the resolution was passed.

PUBLIC ALLEY FACILITIES IN SQUARE 616, DISTRICT OF COLUMBIA

Mr. CRAMTON. Mr. Speaker, I move to suspend the rules and pass Senate bill 2265.

The SPEAKER. The gentleman from Michigan moves to suspend the rules and pass Senate bill 2265, which the Clerk will report.

The Clerk read as follows:

*Be it enacted, etc.*, That the Commissioners of the District of Columbia be, and they hereby are, authorized and directed to rearrange the public alley facilities in square 616 in the District of Columbia by the opening of a new public alley along and over the west 10 feet

in width by 135 feet in length of the lot designated for assessment and taxation purposes as lot 801 in said square, now occupied as the site for the O Street vocational school, and likewise by the opening of a new public alley along and over the east 10 feet in width by 135 feet in length of said lot 801; and upon the opening and paving without cost to the abutting private property owners of said new public alleys the Commissioners of the District of Columbia are further authorized and directed to close the portion of the public alley 30 feet in width by 117.36 feet in length now existing and abutting upon the north boundary of said lot 801, and to use said closed portion of said alley for school purposes.

The SPEAKER. The question is on agreeing to the motion of the gentleman from Michigan [Mr. CRAMTON] to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in the affirmative, the rules were suspended and the bill was passed.

Mr. HOWARD of Nebraska. Mr. Speaker, will the gentleman yield?

Mr. CRAMTON. The gentleman can get time on the next bill.

Mr. HOWARD of Nebraska. Oh; let it go this time.

Mr. LEHLBACH rose.

The SPEAKER. The gentleman from New Jersey is recognized.

AMENDMENT TO CLASSIFICATION ACT

Mr. LEHLBACH. Mr. Speaker, I move to suspend the rules and pass Senate Joint Resolution 146.

The SPEAKER. The gentleman from New Jersey moves to suspend the rules and pass Senate Joint Resolution 146. The Clerk will report it.

Mr. BLANTON. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. LEHLBACH. I will say to the gentleman from Texas that this is not the bill which has come under discussion heretofore. This is merely to correct a clerical error.

Mr. BLANTON. What bill is this?

Mr. LEHLBACH. I will make it plain.

Mr. DYER. Mr. Speaker, I ask that the resolution be reported first.

Mr. BLANTON. Mr. Speaker, I withdraw the reservation until it is reported.

The Clerk read as follows:

*Resolved, etc.*, That paragraph 5, under the heading "Custodial Service," of section 13 of the act entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services" be amended by striking out the sums "$780" and "$840" from the rates of compensation fixed for grade 2 in said section, and that paragraph 7 under said heading in said section 13 be amended by striking out the sums "$900" and "$960" as rates of compensation fixed for grade 3 in said service; said amendments being made necessary for the purpose of correcting a clerical error in preparing the bill for the signature of the President, the bill as it passed both Houses and agreed to in conference not having included the sums proposed to be stricken out.

Mr. LEHLBACH. Mr. Speaker, this is merely to correct a clerical error in the copy of the reclassification bill enrolled for the signature of the President.

Mr. BLANTON. Mr. Speaker, I demand a second, to protect that feature of it.

Mr. SANDERS of Indiana. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from Indiana asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

Mr. LEHLBACH. Mr. Speaker, a number of copies of the reclassification bill were from time to time introduced and referred to the committee, and changes were made, and the bill was reintroduced. That happened in the House and it happened in the Senate. The bill was passed in the House and the bill, with amendments, was passed in the Senate. The bill went to conference and was further amended in conference, and the conference report was agreed to by both Houses. Now, the four sums which are mentioned in the bill, $780, $840, $900, and $960, in one of the earlier bills appeared in the compensation schedules in the custodial service. They were eliminated from the bill before it passed the House, they were not in the bill when it passed the Senate, and they were not in the conference report, but when the bill was enrolled for the signature of the President the enrolling clerk inadvertently got hold of a copy of one of the earlier bills, which had passed neither the House nor the Senate, and erroneously inserted in the copy signed by the President these four items, which were not contained in the bill as passed by both Houses of Congress at all.

Now, these salaries being effective on the 1st day of July, if this correction is not made, in view of the mandatory provision of the statute, it will be necessary for new employees to enter at a rate of compensation not contemplated by the Congress. This is merely to correct a clerical error and is in no sense new legislation.

Mr. BLANTON. Will the gentleman yield?

Mr. LEHLBACH. I will.

Mr. BLANTON. Has the President signed this bill?

Mr. LEHLBACH. It became a law on the 4th of March, 1923.

Mr. BLANTON. I thought this bill was seeking to affect the gentleman's bill, the one he had here the other day.

Mr. LEHLBACH. No; this is to affect a statute which is now in existence and make it conform with the statute that was actually adopted by the Congress and to eliminate the error which the enrolling clerk put in the bill.

Mr. BLANTON. This does not seek in any way to increase any of the salaries that were specified in the gentleman's bill?

Mr. LEHLBACH. Absolutely not. This is merely a resolution to correct a clerical error.

Mr. BLANTON. Mr. Speaker, I do not care to use any time.

The SPEAKER. The question is on the motion of the gentleman from New Jersey to suspend the rules and pass the bill.

The question was taken, and two-thirds having voted in favor thereof, the rules were suspended, and the bill passed.

REMITTANCE OF DUTY ON A CARILLON OF BELLS

Mr. O'CONNELL of Rhode Island. Mr. Speaker, I move to suspend the rules and pass the bill S. 3397.

The SPEAKER. The gentleman from Rhode Island moves to suspend the rules and pass a bill, which the Clerk will report.

The Clerk read the bill, as follows:

An act (S. 3397) to remit the duty on a carillon of bells to be imported for the Church of Our Lady of the Rosary, Providence, R. I.

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to admit free of duty a certain carillon of 16 bells to be imported for the Church of Our Lady of the Rosary, Providence, R. I.

The SPEAKER. The question is on the motion of the gentleman from Rhode Island to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended, and the bill was passed.

MARINE HOSPITAL RESERVATION, DETROIT MICH.

Mr. McLEOD. Mr. Speaker, I move to suspend the rules and pass H. R. 8588.

The SPEAKER. The gentleman from Michigan moves to suspend the rules and pass a bill, which the Clerk will report.

The Clerk read the bill, as follows:

A bill (H. R. 8588) authorizing the Secretary of the Treasury to sell the United States marine hospital reservation and improvements thereon at Detroit, Mich., and to acquire a suitable site in the same locality and to erect thereon a modern hospital for the treatment of the beneficiaries of the United States Public Health Service, and for other purposes

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized, in his discretion, to sell at such time and upon such terms as he may deem for the best interests of the United States, the marine hospital reservation and improvements thereon at Detroit, Mich., and to convey said property to the purchaser thereof by the usual quitclaim deed.

SEC. 2. That the proceeds derived from the sale of said marine hospital and the site thereof are hereby made available for the acquisition of a new site within the county of Wayne, State of Michigan, and for the construction thereon of suitable hospital facilities.

SEC. 3. That the Secretary of the Treasury be, and he is hereby, further authorized and empowered to acquire by purchase, condemnation, or otherwise, in the county of Wayne, State of Michigan, a suitable site, and to enter into contracts for the construction thereon of the necessary hospital facilities for the beneficiaries of the United States Public Health Service and such other beneficiaries of the United States Government, its departments, bureaus, and establishments as may be eligible for care and treatment in hospitals operated by the United States Public Health Service. The limit of cost for such site and buildings shall not exceed the amount realized from the sale of the present hospital and site.

SEC. 4. That not exceeding 3 per cent of the amount received for said marine hospital shall be available for the payment of the necessary technical services, preparation of designs, plans, estimates, and specifications for such new hospital facilities, supervision of work, etc.

Mr. WOLFF. Mr. Speaker, I demand a second.

Mr. BLANTON. Is the gentleman from Missouri opposed to the bill?

Mr. WOLFF. I want an explanation.

Mr. BLANTON. Mr. Speaker, I am opposed to the bill, and unless the gentleman from Missouri is opposed to it I claim that right.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. WOLFF. I can not say I am, but I want to find out about it.

Mr. BLANTON. Mr. Speaker, I am opposed to the bill, and I demand a second.

Mr. McLEOD. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. The gentleman from Michigan asks unanimous consent that a second may be considered as ordered. Is there objection? [After a pause.] The Chair hears none.

Mr. McLEOD. Mr. Speaker and gentlemen, this authorization is merely for the Secretary of the Treasury to sell an old marine hospital in Detroit, which is over 40 years old, and use the money derived from the sale thereof for a new hospital. There is not one nickel of additional appropriation asked for in this bill.

The hospital in Detroit is now situated next door to a large varnish factory, one of the largest in the world; a large glue factory, with railroad tracks in the rear; and the property is a very valuable business site. With the money which can be obtained by the sale of this hospital a very up-to-date building, with all modern facilities, can be obtained for Detroit, and Michigan has no Government hospital at the present time. And the disabled service men of Michigan are entitled to it.

Mr. CRAMTON. Will the gentleman yield?

Mr. McLEOD. Yes.

Mr. CRAMTON. I understand my colleague's statement to be that there will be enough money from the sale of this very valuable site to completely construct a new one and not involve an additional appropriation?

Mr. McLEOD. Yes.

Mr. CRAMTON. I am somewhat familiar with the site. I know it is very valuable as a business proposition and very unsuitable for a hospital.

Mr. McLEOD. That is correct.

Mr. TILSON. Will the gentleman yield further?

Mr. McLEOD. Yes.

Mr. TILSON. The gentleman has made it clear that the present site is very unsuitable for a hospital site and very valuable for other kinds of business. Has a new site, more suitable, been selected?

Mr. McLEOD. It has not been selected as yet, but there are several sites that are available. There are many available sites.

Mr. BLANTON. Will the gentleman yield?

Mr. McLEOD. I yield.

Mr. BLANTON. I have a report now in my office of the hundreds of vacant beds that exist in Government-owned and Government-controlled hospitals, and in the face of that report we passed a comprehensive hospital bill the other day involving millions of dollars to build new ones. Why was not the gentleman's proposition included in that bill?

Mr. McLEOD. I will answer the gentleman by saying there was no appropriation asked for. We already have a hospital in Detroit which has a small number of beds.

Mr. BLANTON. If my colleague will yield further, what is in my mind is this: Is not this a case of the camel getting his nose under the tent? Are we not going to sell this block of land out there and then begin the construction of another hospital with the money that is taken in, and then will not the gentleman from Michigan and his colleagues—I started to say conspirators—come back to Congress next year asking for some more money?

Mr. CRAMTON. If the gentleman will yield, I will say to the gentleman that my colleague is not especially a follower of the camel, politically.

Mr. BLANTON. After November he will hardly be a follower of the elephant any longer.

Mr. McLEOD. In answer to the gentleman I will say that the money obtained from the sale of this property will absolutely warrant the building of a hospital that will accommodate a sufficient number of beds, with no additonal appropriation.

Mr. BLANTON. And the gentleman will state absolutely here that there will be no more requests for additional money?

Mr. McLEOD. I do not think so.

I yield five minutes to the gentleman from Michigan [Mr. CLANCY].

Mr. CLANCY. Mr. Speaker, I would like to exlain this bill a little further. The gentleman from Michigan [Mr. McLEOD] and myself saw the President of the United States a few hours ago, and he is willing that this bill should be passed. Every American Legion post in Michigan is in favor of the bill. It takes care of a number of ex-soldiers. This hospital lies in the factory district next to a large glue factory, and next to the largest varnish factory in the world. As my colleague from Michigan has explained, it does not mean the expenditure of an additional dollar out of the Treasury. Every Treasury official is in favor of it, and the chief of the Hospital Service and the Surgeon General are very much in favor of it.

This hospital has been such a scandal in the city of Detroit that the newspapers have devoted columns to it. I have in my hand a number of those newspaper items now. I do not see how any gentleman can sincerely object to this humanitarian measure.

Mr. BLANTON. Mr. Speaker, I yield to the gentleman from Missouri [Mr. WOLFF] such time as he may desire.

Mr. WOLFF. Mr. Speaker and gentlemen, if this bill had come up in the regular way I possibly would not have had any objection to it. As a member of the Committee on Public Buildings and Grounds of this House I believe that bills of this kind should come before that committee. I have attended every meeting of that committee, and this bill has not been before the committee.

Mr. ZIHLMAN. If the gentleman will yield, this bill is reported from the gentleman's committee.

Mr. WOLFF. I do not remember it, if it was reported. I may be mistaken.

Mr. CLANCY. The gentleman from Indiana [Mr. ELLIOTT], the ranking member of that committee, is here, and he will tell the gentleman that the bill was reported unanimously from that committee.

Mr. WOLFF. Well, I will say to the gentleman that, even at that, I am opposed to taking Government property which the Government owns in the down-town district or any commercial district, which becomes valuable property, and then turning it over to a commission or then selling it and making a graft on that sale and then grafting on the new purchase. I am opposed to deals of that kind. We have a hospital bill that we reported out from the committee carrying over $6,000,000 this year to help build hospitals for these veterans. I would not oppose any proposition that is for the good of the veterans, but I will say to the gentleman that I am opposed to selling this property and possibly getting nothing for it.

Mr. CLANCY. Will the gentleman yield?

Mr. WOLFF. Yes.

Mr. CLANCY. We have no Federal hospital in Michigan to take care of cases of this kind. It does not necessarily follow that there will be any graft in the sale of this property. This same thing was done in Cleveland two years ago, where they sold an old, antiquated hospital in the down-town section and built one in the outskirts of the city and made $300,000 on the deal.

Mr. WOLFF. There is not any such hospital in my town, either, so far as that goes.

Mr. SCHAFER. Will the gentleman yield?

Mr. WOLFF. I yield.

Mr. SCHAFER. I see no provision in this bill to provide for an appraisal, which means that it leaves everything in the hands of the Secretary of the Treasury.

Mr. WOLFF. Absolutely.

Mr. CLANCY. I will say in answer to that statement that we have two appraisals, one from the Detroit Real Estate Board, of Detroit——

Mr. SCHAFER. Who are interested in the sale.

Mr. WOLFF. Sure.

Mr. CLANCY. Oh, no; not at all; and the other appraisal is from the city appraisers.

Mr. WOLFF. This property has now become commercially valuable, and I say you are making a mistake if you sell the property in this way.

Mr. BLANTON. Mr. Speaker, I yield my judgment on this proposition to the judgment of the minority leader, who asked me to withdraw objection, and under the circumstances I shall not oppose the bill any longer.

Mr. GARRETT of Tennessee. Mr. Speaker, this matter has been represented to me as being property of much value for business purposes; that it can be sold at this time and another site purchased in a more desirable location and a hospital erected that will accommodate an equal number to those accommodated by this hospital; that a new hospital can be erected for the sum of money that will be realized by this hospital and that there will be no expense to the Treasury. That is my

understanding, and for that reason I said I thought it was a proper bill to be passed.

Mr. SCHAFER. Will the gentleman yield?

Mr. GARRETT of Tennessee. I do not know that I have the floor, but if I do, I yield.

Mr. SCHAFER. There is no provision in this bill for appraisal. The fact that the gentleman says that the real estate board has appraised it and the city appraisers have appraised it means nothing. There is nothing in the bill that compels the Secretary of the Treasury to keep within the amount of that appraisal.

Mr. McLEOD. The appraisal has been made, $630,000.

Mr. HUDDLESTON. Will the gentleman yield? What is there in the bill to insure that a fair price will be realized on the sale of this property?

Mr. McLEOD. It will be sold by competitive bids.

Mr. HUDDLESTON. Is it so provided in the bill?

Mr. McLEOD. That is the general law.

Mr. HUDDLESTON. It will be sold by competitive bids without an upset price.

Mr. McLEOD. Does the gentleman think that will protect the Treasury? That is the regular business method.

Mr. HUDDLESTON. Does not the gentleman think there ought to be some provision for public bids and some upset price?

Mr. CLANCY. If my colleague will yield, is it not true that every American Legion post is in favor of this bill, and that several officers and American Legion posts said that they desired this legislation? It does not mean the expenditure of an additional dollar, and that they desire this more than they did the bonus.

Mr. HUDDLESTON. What does the American Legion know about this as a business transaction? What has the American Legion to do with it? It is our responsibility and it is high time that we got away from hiding behind the soldiers to put over things that ought not be put over. If this is right, do it; and if it is wrong, stop it. Let us stop trying to hide behind the American Legion.

Mr. McLEOD. Let me say that this morning the President of the United States recommended this bill.

Mr. JOHNSON of South Dakota. Mr. Speaker, this bill was originally sent to the committee on Veterans' Legislation. We gave it as careful consideration as we could, but we came to the conclusion that under the rule creating the Veterans' Committee it properly belonged to the Committee on Public Buildings and Grounds. At the request of my committee, and myself as chairman, it was referred to the Committee on Public Buildings and Grounds. The bill has had careful consideration in that committee and has been considered informally but nevertheless considered by the members of the Veterans' Legislation Committee. I see no objection to the measure. This hospital that we have in Detroit is located in the business part of the town and is no place for a hospital. This land would be appraised and sold by the Government under the same regulations, the same restrictions, that any Government property is sold, and the money would be used to purchase some other ground outside the city. It ought to be done, so that we can have an up-to-date modern hospital.

Mr. FULBRIGHT. How long has this hospital been located there?

Mr. JOHNSON of South Dakota. I think over 50 years, and the city has grown up around it.

Mr. SCHAFER. The gentleman from Michigan says that this will be sold under competitive bids. What about this language, "upon such terms as he may deem for the best interest"?

Mr. JOHNSON of South Dakota. That is whether it is cash or part payment, and so forth.

Mr. McLEOD. Mr. Speaker and gentlemen of the House, a six-year fight is nearing its close. A six-year battle in the interest of humanity, one to provide the proper medical and surgical treatment for the many Michigan boys who so gallantly responded to the Nation's call to colors in 1917 when America entered the World War, and who came back from France maimed and in dire need of proper care and attention.

Six years seems an exceedingly long time to wage a fight for right, and there is no one here—there is no one in the United States—who will deny that providing adequate hospitalization facilities for these heroes is right and just. These same mothers' sons helped conquer for the cause of right in a little over one year; these same men made untold sacrifices in the interest of right, and it is no more than justice that the United States Government should care for them in the proper manner in recognition of their great service to the Nation and to mankind.

In the year 1855 there was erected in the city of Detroit, Mich., the marine hospital with facilities enabling it to handle 80 patients. During the years that followed there sprang up a large glue factory and one of the largest, if not the largest, varnish establishment in the entire universe adjacent to the hospital. The site on which this hospital building was erected has increased steadily in value and to-day it is appraised at $630,000, and is one of the most desirable commercial locations in Detroit. The building has deteriorated to such an extent that it is now a disgrace to my fair city. It is to-day a delapidated affair, infested with rats, bugs, and vermin of all species; it is a fire trap, and to ask veterans of the great conflict, maimed men, men who are entitled to the best there is, to stay there and receive such treatment as the hospital authorities are in a position to give, which is not what it should be—to ask these men to inhale the foul odors emanating from the near-by factories, endure the nerve-racking noise, and put up with the pests that have practically seized the hospital is entirely too much.

During the last four months 140 men have been hospitalized in hospitals in Illinois and Wisconsin. Men from my city and State were sent to Chicago to have their tonsils removed, each case costing the United States Government $30. And, mind you, this is a year of Government economy.

To remedy this unusual condition, which is wholly unfair to the disabled men of Michigan, and to enable our men to receive the proper treatment at home, I introduced this bill to permit the Secretary of the Treasury to sell the old marine hospital and grounds, and with the money acquired from the sale of the land on which it stands he is authorized to purchase a new site in a more desirable neighborhood and erect thereon a modern building with a capacity of 300 beds.

Mr. Speaker and gentlemen, we are not asking for one cent's appropriation from the Federal Government. We have been assured that the money derived from the sale of the old marine hospital and the land on which it stands will enable us to meet this most urgent demand for proper hospitalization facilities in the State of Michigan. The majority of us here in Congress are in hearty accord with the administration's economy policy, and when large sums of money are sought for this and that project we ponder and give serious thought to the advisability of the appropriation. But, as I have said before, this old site will bring approximately $700,000, and with that amount we could build our new hospital without any fiscal aid from the United States Treasury.

The end of this session is growing near, Mr. Speaker, and it would be a shame indeed for Congress to deny my disabled comrades what they rightfully deserve in recognition of their heroic services for their country, their glorious fight that our great land might be saved from the hand of the militarist and the soviet.

Pass this bill giving our disabled men something that they badly need, a Government hospital in Detroit with the proper facilities to relieve their intense suffering, and those distasteful memories of days and nights on the battle fields and in the vermin-infested trenches of France, those terrible horrors that our boys viewed, will be made less vivid by an attempt on the part of their Government to help them and give them the best there is.

This is indeed a humanitarian measure, and I am sure that my colleagues will rally to this cause of right and justice. Give our boys, my comrades, a decent place where their pains can be relieved, and I trust be discharged as well men. Give them what the disabled men in other States are receiving, and these boys of Michigan will be just as grateful to Congress as Congress should be to them—men who were willing to give their all for humanity's sake.

Mr. Speaker, I am ready to yield the floor with the firm conviction that my colleagues and friends will vote for this measure to a man.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and on a division (demanded by Mr. WOLFF) there were 103 ayes and 2 noes.

Mr. WOLFF. Mr. Speaker, I make the point of order that no quorum is present.

The SPEAKER. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in the absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 314, nays 5, not voting 114, as follows:

Mr. Freeman with Mr. Gilbert.
Mr. Kendall with Mr. Rogers of New Hampshire.
Mr. Morin with Mr. Kent.
Mr. Reed of West Virginia with Mr. Collins.
Mr. Timberlake with Mr. Lea of California.
Mr. Knutson with Mr. Berger.

The result of the vote was announced as above recorded.

DECLARING AGRICULTURE TO BE THE BASIC INDUSTRY

Mr. HOCH. Mr. Speaker, I call up a conference report upon Senate Joint Resolution 107, declaring agriculture to be the basic industry of the country, and for other purposes, and ask its immediate consideration.

The SPEAKER. The gentleman from Kansas calls up a conference report, which the Clerk will report.

The Clerk read as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 107) declaring agriculture to be the basic industry of the country, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the House insert the following:

"That it is hereby declared to be the true policy in rate making to be pursued by the Interstate Commerce Commission in adjusting freight rates, that the conditions which at any given time prevail in our several industries should be considered in so far as it is legally possible to do so, to the end that commodities may freely move.

"That the Interstate Commerce Commission is authorized and directed to make a thorough investigation of the rate structure of common carriers subject to the interstate commerce act, in order to determine to what extent and in what manner existing rates and charges may be unjust, unreasonable, unjustly discriminatory, or unduly preferential, thereby imposing undue burdens, or giving undue advantage as between the various localities and parts of the country, the various classes of traffic, and the various classes and kinds of commodities, and to make, in accordance with law, such changes, adjustments, and redistribution of rates and charges as may be found necessary to correct any defects so found to exist. In making any such change, adjustment, or redistribution the commission shall give due regard, among other factors, to the general and comparative levels in market value of the various classes and kinds of commodities as indicated over a reasonable period of years, to a natural and proper development of the country as a whole, and to the maintenance of an adequate system of transportation. In the progress of such investigation the commission shall, from time to time, and as expeditiously as possible, make such decisions and orders as it may find to be necessary or appropriate upon the record then made in order to place the rates upon designated classes of traffic upon a just and reasonable basis with relation to other rates. Such investigation shall be conducted with due regard to other investigations or proceedings affecting rate adjustments which may be pending before the commission.

"In view of the existing depression in agriculture, the commission is hereby directed to effect with the least practicable delay such lawful changes in the rate structure of the country

as will promote the freedom of movement by common carriers of the products of agriculture affected by that depression, including livestock, at the lowest possible lawful rates compatible with the maintenance of adequate transportation service: *Provided*, That no investigation or proceeding resulting from the adoption of this resolution shall be permitted to delay the decision of cases now pending before the commission involving rates on products of agriculture, and that such cases shall be decided in accordance with this resolution."

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the title, and agree to the same.

SAMUEL E. WINSLOW,
HOMER HOCH,
SAM RAYBURN,
*Managers on the part of the House.*

E. D. SMITH,
A. B. CUMMINS,
KEY PITTMAN,
*Managers on the part of the Senate.*

Mr. HOCH. Mr. Speaker and gentlemen of the House, I shall take only one minute on this conference report, and then yield five minutes to the gentleman from Alabama [Mr. HUDDLESTON], after which I shall ask for a vote on the conference report. This is a complete report, and in the judgment of the House conferees does not substantially change the resolution as it passed the House. There are only one or two words changed, and there is added one sentence from the Senate resolution which is in line with the policy declared in the resolution as it passed the House.

Mr. BROWNE of Wisconsin. Mr. Speaker, does the gentleman feel that this will fully satisfy the farmers of Kansas and of the West?

Mr. HOCH. I think that this will be very helpful to the farmers of Kansas and the country.

Mr. HUDDLESTON. Will not the gentleman explain what changes have been made in the paragraph over which there was controversy?

Mr. HOCH. The only change from the House resolution is in the latter part of the resolution, where the commission is directed to make such "reasonable and lawful changes" in the rates on agricultural products as are consistent with the maintenance of an adequate transportation system. The word "reasonable" is stricken out, leaving the commission to fix such "lawful" rates, and in the judgment of the conferees this makes no substantial change, as they believe that no rates can be fixed that are "lawful" which are not reasonable, "reasonable" taking into consideration all of the elements that should be taken into consideration. We have given very careful thought to it, and our judgment is that it does not substantially change the law.

Mr. STEVENSON. Mr. Speaker, will the gentleman yield?

Mr. HOCH. I can not yield further. I now yield five minutes to the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. Mr. Speaker, the objectionable second paragraph of this resolution is reported by the conferees in the following form:

> In view of the existing depression in agriculture the commission is hereby directed to effect with the least practicable delay such lawful changes in the rate structure of the country as will promote the freedom of movement by common carriers of the products of agriculture affected by that depression, including livestock, at the lowest possible lawful rates compatible with the maintenance of adequate transportation service.

By the change in conference it is directed that rates on agricultural products shall be reduced to "the lowest possible lawful rates." The word "reasonable" has been eliminated.

The descriptive term for rates carried by the transportation act and generally used is "just and reasonable." This term has been defined by the courts and its meaning is fairly well understood. I know of no construction of the word "lawful" as applied to rates, but think it must mean such a rate as is nonconfiscatory; in other words, which is not violative of the fifth amendment. The case of Smythe *v.* Ames, construing the fifth amendment, holds that a regulatory body can not make rates so low as not to yield the carrier a "just return," and that rates below that limit are a confiscation of the carrier's property and violative of the fifth amendment. I can not be certain as to the meaning of "lawful," as used in the resolution, but believe that it will be held to justify any rate which will leave the carriers such a return from all rates as will not amount to a confiscation of their property. That is the best interpretation that I can put on the word "lawful" without time for further investigation.

A reduction of rates on agricultural products may never prove not to be "lawful" where it is accompanied by rates on other commodities which will in the aggregate altogether yield the carrier a "just return." If the Interstate Commerce Commission, in reducing rates on grain and hay, should raise them correspondingly on coal, iron, and lumber, there seems to be no low limit to which they may not prefer agriculture.

The point I want to present in these few moments is, are Members of the House willing that any industry or any group shall be preferred at the expense of the general public? In the concrete, are you willing that the agricultural interests shall receive a reduction in rates, to what is below what is reasonable, and that the rates upon the balance of the country shall be held at figures which are above what is reasonable and just? If you are prepared to do that kind of thing, then accept this resolution in the form in which it is reported by the conferees. But if you feel that it is bad public policy that any interest in this country shall profit at the expense of other interests, if you feel that every interest should pay a just return for the value of service that it receives from a carrier and not impose the expense of that serivce upon some other interest, then you can not afford to vote for this resolution.

There is no time to do more than merely to give you my hasty interpretation. For my part I want to do everything possible and that is reasonable and honest for the farmers, but I would not consider it honest to the balance of the people of this country, nor would I consider it good public policy to prefer the agricultural interests at the expense of the other legitimate business interests.

Mr. JACOBSTEIN. Is it intended that this is merely an emergency measure?

Mr. HUDDLESTON. Oh, no; this is a matter of permanent policy. The resolution establishes a permanent rule of rate making, which will work incalculable injustice and harm to the general public of the United States.

The SPEAKER. The time of the gentleman from Alabama has expired. The question is on agreeing to the conference report.

The question was taken, and on a division (demanded by Mr. HUDDLESTON) there were—ayes, 170, noes 13.

So the conference report was agreed to.

## EXTENSION OF AIRPLANE MAIL SERVICE TO BOSTON, MASS.

Mr. DALLINGER. Mr. Speaker, I move to suspend the rules and pass the bill S. 3319, authorizing the extension and operation of the transcontinental airplane mail service to Boston, Mass., which I send to the desk.

The Clerk read as follows:

> *Be it enacted, etc.*, That the Postmaster General is hereby authorized to extend and operate the transcontinental airplane mail service to Boston, Mass.: *Provided*, That the appropriations heretofore or hereafter made for the operation and maintenance of the transcontinental airplane mail service shall be sufficient for such purpose.

The SPEAKER. Is a second demanded?

Mr. CRAMTON. Mr. Speaker, I demand a second.

Mr. BLANTON. Mr. Speaker, I want to know whether the gentleman from Michigan is against this bill?

Mr. CRAMTON. One hundred per cent.

Mr. BLANTON. I make the point of order that there is no quorum present.

The SPEAKER. The Chair overrules the point of order. He has just counted a quorum.

Mr. DALLINGER. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Massachusetts is entitled to 20 minutes and the gentleman from Michigan to 20 minutes.

Mr. DALLINGER. Mr. Speaker, the Post Office Department would like to have this authority. The bill as originally introduced provided that the Postmaster General was "authorized and directed." The Post Office Department objected to the words "and directed," and those words were eliminated at the time the bill passed the Senate. Now, this bill is carefully guarded as to the question of appropriations. It involves not an additional dollar of expense to the Government. There is a proviso in it which says:

> *Provided*, That the appropriations heretofore or hereafter made for the operation and maintenance of the transcontinental airplane service shall be sufficient for such purpose.

If this appropriation, already passed by Congress, for the transcontinental air mail route is sufficient, then they might experiment between New York and Boston. I want to call the attention of the House to the fact that Boston is on this transcontinental line, simply 150 or 200 miles east, and the Post Office Department would like to have this authority, and I trust the House will vote to suspend the rules and pass the bill.

Mr. Speaker, I reserve the remainder of my time.

Mr. CRAMTON. Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Speaker, I am using up this five minutes against this bill, knowing that it will be an uphill job to defeat it, because in this confusion it is likely that the bill will pass; but I am going to use the five minutes nevertheless, because by using it maybe the bill will not get through after all in time to be signed by 7 o'clock, when the Congress will adjourn.

A MEMBER. It will be signed then.

Mr. BLANTON. I hope and pray that it will not. It is a special class bill for air mail service through Massachusetts, and when a Member gets up and, exercising his constitutional privileges, makes a point of order to insist on a constitutional quorum being present such point of order is arbitrarily overruled.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. No; I regret I can not yield. My time is entirely too limited. When a man gets up under the Constitution and makes a proper point of order against a Massachusetts bill our splendid presiding officer gets out of humor and becomes very abrupt in arbitrarily overruling it. [Laughter and applause.]

I remember when the then very distinguished gentleman from Kansas, Mr. Phil Campbell, was presiding over the last hours of the final session of the Sixty-seventh Congress he, too, became abrupt in denying this Member his constitutional rights, and he became so abrupt that his abruptness ended in his ceasing to remain a Member of Congress. It does not pay for even Speakers to get abrupt. He ought to keep in a good humor in the closing hours of the Congress, and when a man makes a constitutional point of order if there is a quorum present he should say so in parliamentary words and not act abruptly.

This bill ought not to be passed. It is not a meritorious measure. The gentleman from Massachusetts [Mr. DALLINGER], I know, wants this bill as a political help this summer. [Laughter.] He thinks if he can pass this bill in the closing hours of Congress, giving air mail service to Boston, it will help him across the hall to another body. [Laughter and applause.] But I am not going to let him take advantage of the Speaker in any such manner. [Laughter.] I am going to see that his opponent, the distinguished Speaker of this House, gets a square deal [laughter and applause], because everyone is entitled to that.

Mr. WATKINS. Will the gentleman yield?

Mr. BLANTON. I regret that I have not time to yield, for it is very important that some one should denounce this unmeritorious measure.

Mr. SCHAFER. Will the gentleman please give us a little information as to why this bill should not be passed? [Laughter.]

Mr. BLANTON. I will tell the gentleman. This special air mail service to Boston will cost just about 15 times as much as to send it by the United States mail.

Mr. DALLINGER. As a matter of fact it will not cost anything.

Mr. BLANTON. How does the gentleman know?

Mr. GALLIVAN. Because Paul Henderson, the Second Assistant Postmaster General, says so.

Mr. BLANTON. We have had such reports from time to time, but I am willing to take the word of the distinguished gentleman from Illinois [Mr. MADDEN], our efficient chairman of the Committee on Appropriations, who has assured us that it costs 15 times as much to send the mail by air as it does by rail, and Chairman MADDEN knows what he is talking about, and I am for saving the money of the people. The gentleman from Massachusetts [Mr. DALLINGER] ought to use some other means to help himself up the ladder politically and not waste the people's money on air mail service to Boston.

Mr. MACLAFFERTY. Will the gentleman yield?

Mr. BLANTON. Yes. I could not refuse my worthy friend from California.

Mr. MACLAFFERTY. I want to say to the gentleman I want this bill passed and I am not trying to get over on the other side of the Capitol Building.

Mr. BLANTON. Mr. Speaker, the distinguished four-minute man from California has already gotten his air mail service from New York to California and now he wants to give it to Boston.

The SPEAKER. The time of the gentleman has expired.

Mr. CRAMTON. I yield three additional minutes to the gentleman.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. I do.

Mr. SCHAFER. The gentleman for political purposes would rather use his taxpayers and spend thousands of dollars of the people's money to print a lot of ads in newspapegs in the RECORD each day. [Laughter and applause.]

Mr. BLANTON. Printing those newspaper advertisements in the RECORD showing that hundreds of residences and apartments were being advertised for rent in Washington at the very time Congress was declaring an emergency and extending the Rent Commission for another year, was used by the courts in declaring the law unconstitutional and saving the people's money.

Possibly, too, the gentleman has in mind the fact that I spent a few dollars last night to put some pertinent, material facts in the RECORD about the so-called surplus bill and thereby saved the people of the country about $4,500,000, which was sought to be taken out of the Treasury, as such facts stopped the passage of that bill to-day.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield further?

Mr. BLANTON. No; I regret exceedingly that I can not yield further, as my time is limited.

The gentleman from California [Mr. MACLAFFERTY]—and, by the way, he is one of the most affable colleagues that we have—already has his mail service by air from New York to San Francisco and Los Angeles. Now he wants to have air mail service connection from Boston to San Francisco.

Mr. MACLAFFERTY. We do. We want to be connected with the Hub by air. [Applause.]

Mr. BLANTON. Of course. He should worry! The people are to pay for it. I want to say this to the gentleman from California, that this special air mail service should pay its own way, and when you fix it so that it pays its own way I will vote for it. But when you let a letter go from Boston by air mail for 2 cents——

Mr. GALLIVAN. It is to be 24 cents.

Mr. BLANTON. I am talking about what was once proposed by the department.

Mr. SNELL. It is 18 cents now.

Mr. BLANTON. Well, if you fix it so that it pays its own way I will vote for it.

Mr. DALLINGER. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. DALLINGER. The business men of Boston will be willing to pay the whole expense.

Mr. BLANTON. Very well. Put it in the bill that way as an amendment and I will vote for it. But it is not now so written in the bill. [Applause.]

Mr. DALLINGER. Mr. Speaker, I yield three minutes to my colleague from Massachusetts [Mr. CONNERY].

The SPEAKER. The gentleman from Massachusetts is recognized for three minutes.

Mr. CONNERY. Mr. Speaker and gentlemen, I dislike very much to disagree with my amiable friend from Texas [Mr. BLANTON], who says the Speaker does not always display good humor when he, the gentleman from Texas, rises to a point of order, especially on a Massachusetts point of order. I want to say to the gentleman from Texas that he himself has kept me in good humor all during this session. Neither is this bill a question of senatorial aspirations between the gentleman from Massachusetts over here, referring to Mr. DALLINGER, and the gentleman from Massachusetts up there, referring to the Speaker. [Applause.] As a Democrat from Massachusetts, I wish to say that the people of my great State are intensely interested in this matter of the Air Mail Service not only because it will affect Boston but because it affects the whole United States.

I was speaking here on one occasion when the gentleman from Illinois [Mr. MADDEN] interrupted me to raise a point of order to the effect that I was not then speaking on the matter that was pending. I wished at that time to speak upon a proposed air mail service item, and I emphatically favored raising that item from $1,500,000 to $8,000,000. I did not know at that time that Boston was to be included, and I was not so much interested in it as a local affair as in its being a means of national defense. I with others have stood here and

asked Congress to appropriate money for the Air Mail Service. I believe in a great air force for defense in time of war and for commerce in time of peace. Future wars will be in the air. I am in favor of this bill and I want to see it pass not because of any senatorial considerations but because it is for the benefit of the people of Massachusetts, and not only them but the people of the whole country.

Mr. DALLINGER. Mr. Speaker, I yield two minutes to my colleague from Massachusetts [Mr. FROTHINGHAM].

The SPEAKER. The gentleman from Massachusetts is recognized for two minutes.

Mr. FROTHINGHAM. Mr. Speaker, this is a matter of importance not alone to the city of Boston, but even to the Jumbo district of Texas, because it will carry letters from there across this route to Boston and all over the country. Now I have reported a bill from the Committee on Military Affairs, the purpose of which is to provide that helium gas shall be used in rigid airships, and practically all of that helium gas is found now in the State of Texas. It is noninflammable, and that is why it is so useful in airships, and if it had only been used on the *Dixmude*, which blew up, and if it had been used on the *Roma*, instead of hydrogen, those airships would not have been blown up. This is a noninflammable gas, and sooner or later I hope the bill I have referred to will go through. That bill, like this one, will provide for a service which is useful not only in time of peace for commercial purposes, but as a great asset in the way of national defense, whether it is helium gas coming from Texas to be used in the rigid airplane or whether it is these airplanes to carry mail in time of peace. It is a proposition that interests the whole country. I hope the bill will pass. [Applause.]

Mr. CRAMTON. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. Mr. Speaker, to extend the Air Mail Service to Boston is nonsense [applause], nothing more or less. In the first place, air mail service is impracticable on any distance less than 1,000 miles. If you can not run the Air Mail Service for 1,000 miles or more you had better not run it at all, because the trains will get the mail to points covering a distance of 500, 600, or 700 miles quicker than the airplanes will, because the trains run at night while the airplanes run only in the daytime, except on the specified route that is lighted between New York and San Francisco.

The plan has been to run the Air Mail Service between New York and San Francisco simply for experimental purposes, and anything more than that is pork barrel, ought not to be done, and ought not to be tolerated. You can not carry mail at $5.35 a ton-mile as a commercial proposition, and that is what it has been costing. It is true they have reduced the cost to $2.40 a ton-mile, and it may be true that some time in the distant future they will reduce that cost to 60 cents a ton-mile; but to say that we will send mail by air instead of by train over a route where the train can arrive sooner than the airplane can is not only expensive but unwise and nonsense. It ought not to be done, and this bill ought not to pass. [Applause.]

Mr. CRAMTON. Mr. Speaker, how much time did the gentleman yield back?

The SPEAKER pro tempore (Mr. SNYDER). The gentleman from Illinois used three minutes.

Mr. DALLINGER. Mr. Speaker, I yield three minutes to the gentleman from Massachusetts [Mr. GALLIVAN].

Mr. GALLIVAN. Mr. Speaker, despite the lecture delivered by my colleague from Abilene, Tex., I am going to be abrupt; abrupt in speech.

This bill does not call for one cent of appropriation. Far be it from me to cause a rift in any family in Congress, but I was on the subcommittee of the Committee on Appropriations, before which appeared the distinguished son-in-law of the gentleman who has just spoken, Col. Paul Henderson, Second Assistant Postmaster General, and one of the ablest men in the Government service. He is the man whom I now quote, and he said they would reduce the cost to 60 cents, and, therefore, I disagree with the chairman of the Committee on Appropriations when he stands here and tells Congress it would be absurd to carry this Air Mail Service to Boston. Col. Paul Henderson, as I said before, one of the ablest men in the Government service, and son-in-law of MARTIN MADDEN, was an enthusiastic sponsor of this piece of legislation, and he converted me, whole soul and heartedly, for the passage of the bill.

Mr. MADDEN. He may have converted the gentleman to the Air Mail Service, but not to this proposition.

Mr. GALLIVAN. Therefore I appeal to the House to stand for this simple request from Massachusetts, and, my Democratic friends, this is not a contest between the candidate from Cambridge, Mass., for the United States Senate, and the distinguished Speaker of this House.

Mr. MACLAFFERTY. Will the gentleman yield?

Mr. GALLIVAN. Yes.

Mr. MACLAFFERTY. Did not the gentleman think, in listening to the distinguished gentleman from Illinois, of the argument made against the steamboat when Fulton first suggested it?

Mr. GALLIVAN. I was rather amazed to hear the speech of my leader, whom I am always proud to follow.

Reference has been made that the reason for this bill is because the gentleman from Cambridge, Mass. [Mr. DALLINGER], the sponsor of the bill, is a candidate for the Senate against the distinguished Speaker, who comes from Springfield, Mass. Such a contest has nothing whatever to do with the present bill. I can assure my Democratic friends that when they get through fighting, we, in Massachusetts, will triumphantly reelect the junior Senator from our State in the person of Hon. DAVID I. WALSH. [Loud applause.]

The SPEAKER pro tempore. The time of the gentleman has expired.

## MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 966) for the continuance of construction work of the San Carlos irrigation project in Arizona, and for other purposes.

The message also announced that the President pro tempore had appointed Mr. WADSWORTH and Mr. FLETCHER members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1888, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments," for the disposition of useless papers in the War Department.

## SECOND DEFICIENCY APPROPRIATION BILL, 1924

Mr. MADDEN. Mr. Speaker, I present a conference report on H. R. 9559, the second deficiency appropriation bill for 1924.

The SPEAKER. The gentleman from Illinois presents a conference report, which the Clerk will report.

The Clerk read the conference report, as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 32, 35, and 36.

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: At the end of the matter inserted by said amendment insert the following: "*Provided*, That no part of the sums herein appropriated shall be used for the commencement of construction work on any reclamation project which has not been recommended by the Commissioner of Reclamation and the Secretary of the Interior and approved by the President as to its agricultural and engineering feasibility and the reasonableness of its estimated construction cost"; and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$375,000"; and the Senate agree to the same.

Amendment numbered 31: That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$315,000"; and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33,

and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert: "$375,000"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 29, 34, 58, and 59.

F. E. WARREN,
CHARLES CURTIS,
W. L. JONES,
LEE S. OVERMAN,
WM. J. HARRIS,
*Managers on the part of the Senate.*

MARTIN B. MADDEN,
D. R. ANTHONY, Jr.,
*Managers on the part of the House.*

Mr. MADDEN. Mr. Speaker, the conferees, after further meeting, have reached the following agreement: We put in the general clause which is involved in amendment No. 27, with a limitation that no part of the sums appropriated shall be used for the commencement of construction work on any reclamation project which has not been recommended by the Commissioner of Reclamation and the Secretary of the Interior and approved by the President as to its agricultural and engineering feasibility and the reasonableness of its estimated construction cost.

Then the Senate, in amendment No. 28, had $800,000 for the Guernsey Reservoir, to which the House conferees have agreed, and this was estimated by the Budget. On amendment No. 30, Salt Lake Basin, the Senate had an amendment for $1,500,000 and the House conferees reduced that to $375,000. On amendment No. 31, the Owyhee irrigation project, Oregon, the Senate had $1,250,000, and the House conferees reduced that to $315,000. On amendment 32, Warm Springs, Oreg., the Senate had $250,000, and they receded from that. On No. 33, the Kittitas unit of Yakima project, Washington, the Senate had $1,500,000, and they receded down to $375,000. On amendment No. 35, for the development of oil shale, $90,000, the Senate receded. On No. 36, the Yuma and Carlsbad project, $1,047,000, the Senate receded.

So that while the Senate had in all $7,147,088 on reclamation projects appropriations, in this last conference the Senate receded from $1,482,088 and the House conferees agreed to $1,865,000.

There is still in disagreement one item of $800,000, which the House conferees brought back in disagreement. This item of $800,000 is for the Spanish Springs irrigation project, Nevada.

We also brought back the legislation on amendment No. 34, which provides that there shall be a bureau of reclamation within the Department of the Interior, with a bureau chief, at a salary of $10,000 per annum. We brought back that amendment in disagreement.

Amendment No. 58, the reclamation legislation, to which we called attention this afternoon, has been brought back in disagreement.

Mr. LONGWORTH. Will the gentleman yield to me?

Mr. MADDEN. Yes.

Mr. LONGWORTH. On the whole, I gather from what the gentleman has said, that the Senate has made a very substantial recession.

Mr. MADDEN. There have been $4,482,088 reduced from the Senate amendments.

Mr. LONGWORTH. And the vital thing remaining is the law known generally as the reclamation relief law?

Mr. MADDEN. Yes; of course, it may be said, as I stated a moment ago, that what we did appropriate we surrounded with safeguards to prevent the expenditure of the money until the Secretary of the Interior and the Director of the Reclamation Service and the President of the United States certified and approved it.

Mr. LONGWORTH. The gentleman from Illinois will ask the House to agree to the amendments on which he has receded?

Mr. MADDEN. Yes.

Mr. LONGWORTH. And will submit to the House the question of the adoption of the law?

Mr. MADDEN. Yes; for such action as the House may think proper to take. Mr. Speaker, I move the previous question on the conference report.

Mr. SNELL. Will the gentleman yield to me for one question before doing that?

Mr. MADDEN. Yes.

Mr. SNELL. Does not the gentleman think they have receded as far as you could expect them to under the circumstances?

Mr. MADDEN. I would not say as far as we could expect, but as far as we were able to get them.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Amendment No. 29, page 34, after line 4, insert:

"Spanish Springs irrigation project, Nevada: For continued investigations, commencement of construction, and incidental operations, $800,000."

Mr. MADDEN. Mr. Speaker, I move the House further insist on its disagreement to that amendment.

Mr. SMITH. Mr. Speaker, I submit a preferential motion that the House recede and concur in the Senate amendment.

The SPEAKER. The gentleman from Idaho makes the preferential motion that the House recede and concur.

The question was taken, and the motion was rejected.

The SPEAKER. The question now is on the motion of the gentleman from Illinois that the House further insist on its disagreement.

The question was taken, and the motion was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

There is hereby established in the Department of the Interior a bureau of reclamation, and there shall be a director of the said bureau, who shall be thoroughly equipped for the duties of said office by technical education and experience, and who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall receive a salary of $10,000 per annum, and there shall also be in the said bureau such experts and other employees, to be appointed subject to civil service laws and regulations, as may be required to carry out the purposes of the reclamation act of June 17, 1902 (32 Stat., p. 388), and acts amendatory thereof or supplementary thereto, in accordance with the appropriations made from time to time by Congress for such purposes.

Mr. MADDEN. Mr. Speaker, I move that the House further insist on its disagreement.

The question was taken, and the motion was agreed to.

Mr. MADDEN. The next amendments are Senate amendments 58 and 59. They are long amendments covering several pages. I ask that they be considered together and voted on as one amendment, and without reading.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MADDEN. Mr. Speaker, I move that the House further insist on its disagreement to Senate amendments 58 and 59.

Mr. FRENCH. Mr. Speaker, I offer a preferential motion that the House recede and concur in the Senate amendments 58 and 59.

Mr. MADDEN. I yield five minutes to the gentleman from Idaho [Mr. FRENCH.]

Mr. FRENCH. Mr. Speaker and gentlemen, a minute will clear up this situation. So far as the several items of appropriation for the various projects are concerned that were put on by the Senate and to which the House has just agreed, they have been tied down so carefully by requiring that the projects, before the expenditure of any money, shall be approved by the Secretary of the Interior, the Reclamation Service, and the President of the United States, that greater safeguards have been thrown around them than have attached to any other project that has been authorized by Congress in 20 years.

More than that, if the House shall support my motion to concur in the legislative amendment, there will be provided a more adequate means of determining the value and worthwhile character of any project than has heretofore obtained.

But what is this legislative amendment? In substance, it is the Smith reclamation relief bill that has been reported from the House Committee on Irrigation of Arid Lands and which is now upon the House Calendar.

It provides for a reorganization of the Bureau of Reclamation. It provides for a more adequate manner of ascertaining facts prior to the undertaking of future reclamation work. It provides for relief to the settlers upon the reclamation projects throughout the West. It provides that hereafter all construction charges shall be based upon the productive power of the land. It provides that all delinquent construction and maintenance charges, including interest and penalties, shall be covered into one amount, and that a moratorium or deferment

of payment for three years shall be granted. It provides that penalties for delinquent accounts shall be reduced from 1 per cent per month to one-half of 1 per cent. The amendment carries no appropriation but it carries an authorization for future investigation work that will rest in the hands of future Congresses.

Why should this amendment be approved?

National reclamation was undertaken between 20 and 22 years ago, and since that time more than 2,000,000 acres of land have been reclaimed and homes provided for more than 32,000 settlers. Towns and cities within projects or near them furnish homes for thousands more.

Until last March 31 the Government had expended more than $152,502,000 in reclamation work, and had received in return from settlers nearly $18,000,000—most of the balances falling due in periods ranging up to 20 years.

The settlers are in arrears nearly $6,000,000 at this time, and conditions upon the projects are such that unless relief shall be furnished thousands of settlers will be forced to lose their homes and to lose in addition to the lands themselves investments and accumulations that represent years of struggle and sacrifice.

When the reclamation law was passed 22 years ago it was generally supposed that the cost of reclamation would be approximately $25 to $60 per acre.

With this understanding it was provided that payments for reclamation would be made to the Government by the settlers over a period of 10 years.

On account of unforeseen conditions that entailed additional expenses, and on account of increased prices of materials and more extensive work than was planned in the beginning, the costs of reclamation per acre mounted to such an extent that within 10 years of the time the first law was passed it was found that the costs per acre had mounted to twice the original estimates.

It was apparent that if 10 years was a reasonable time within which the first estimated costs should be repaid, on the basis of the new costs the time of payment should be extended to 20 or 30 years, and in 1914 we extended the time of payment to 20 years.

The World War came on, and one of the immediate results of the World War was to double the prices of building materials, of labor, of agricultural implements, of commodities generally required by the settlers or by the Government in reclamation work. Freight rates were increased 60 to 70 per cent, and they are now between 50 and 60 per cent above what they were before the war.

The cost of construction upon projects has increased still further, until to-day the estimate for reclamation work runs from $60 to $150 per acre.

Prices of farm commodities have increased but slightly beyond what they were 10 years ago.

From the foregoing it must be apparent that if 10 years was a reasonable time within which the first payment should have been made and 20 years was a reasonable time within which, upon the basis of new conditions, payments were required following 1914, present conditions imperatively demand that a moratorium be granted and that the time of payment be spread over a longer period.

If this shall not be done, thousands of settlers will lose their homes; their places will need to be taken by new settlers. In this process the Government will not gain. On the other hand, the Goverument will lose, and why? Reclamation projects will lose, and why?

Both questions can be answered by the simple statement that the present settlers upon the projects better than any new settlers will know the problem with which they are face to face and can come more nearly to making a success of it than can any new settlers who will be placed upon the lands.

The proposition of the pending bill is not only a relief proposition for settlers but it is a business proposition for the Government and for the Reclamation Service.

Mr. SINNOTT. Will the gentleman yield?

Mr. FRENCH. Yes.

Mr. SINNOTT. This has been worked out by the House committee and the fact finding committee.

Mr. FRENCH. Yes; it has been reported by the legislative committee and represents the work of the fact finding committee appointed by the Secretary of the Interior. In substance it is backed by the Secretary of the Interior, the Reclamation Service, and the President of the United States. If you want to do the right thing by these settlers, the right thing by the Government, let me beg the Members of the House to agree to the Senate provision amending the bill. [Applause.]

Mr. MADDEN. I yield two minutes to the gentleman from Michigan [Mr. CRAMTON].

Mr. CRAMTON. Mr. Speaker, this bill appropriates outright $100,000 for certain investigations. In addition, it provides that all money for investigations will hereafter come out of the general funds in the Treasury instead of out of the reclamation fund as heretofore, chargeable to each project benefited. That will mean several hundred thousand dollars a year. In addition, they have a provision that will permit them to have the money for 35 to 50 years without interest, instead of 20 years, going much further than the House committee has recommended. We have accepted the Senate provision beginning the projects. We have receded on that, and it ought to be up to the Senate to recede and strike out this matter of legislation that ought never to have been placed in this bill. [Applause.]

Mr. MADDEN. Mr. Speaker, I yield two minutes to the gentleman from Ohio [Mr. LONGWORTH].

Mr. LONGWORTH. Mr. Speaker, I make no pretensions to being an authority on matters of reclamation. I can see the justice of the position taken by the gentleman from Michigan and others that we ought not to act hastily on matters of such moment as these, but it is a very practical condition that confronts us. We must adjourn at 7 o'clock to-night. I am persuaded that if this matter was sent back to conference great delay might occur. The Senate has yielded on most of the propositions they have advanced.

Mr. CRAMTON. Does not the gentleman know that the only yielding is in amount, but they get the beginning of their projects, which means that millions of dollars will be necessary to follow in each case?

Mr. LONGWORTH. Mr. Speaker, as I say, I do not pretend to be an expert, but I submit that the Senate has yielded in a very substantial degree on a preponderating proportion of the matters in disagreement. I think under all of the circumstances that the wise thing for this House to do is to concur in this amendment so that we may adjourn. [Applause.]

Mr. MADDEN. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the motion of the gentleman from Idaho that the House recede from its disagreement to the Senate amendment and concur in the same.

The question was taken; and on a division (demanded by Mr. FRENCH) there were—ayes 122, noes 65.

So the motion to recede and concur was agreed to.

Mr. MADDEN. That is all, Mr. Speaker.

The SPEAKER. The Chair understands that there are two amendments still in disagreement.

Mr. MADDEN. Yes; Mr. Speaker. We will let the Senate ask for a conference, if they want it.

### COMMITTEE TO NOTIFY THE PRESIDENT

Mr. LONGWORTH. Mr. Speaker, I present the following resolution, which I send to the desk.

The Clerk read as follows:

House Resolution 355

*Resolved*, That a committee of two Members be appointed by the House, to join a similar committee appointed by the Senate, to wait upon the President of the United States to inform him that the two Houses have completed the business of the present session and are ready to adjourn, unless the President has some other communication to make to them.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

The SPEAKER. The Chair appoints the gentleman from Ohio [Mr. LONGWORTH] and the gentleman from Tennessee [Mr. GARRETT].

### EXTENSION OF AIRPLANE MAIL SERVICE TO BOSTON, MASS.

The SPEAKER. When the business of the House was interrupted to take up the conference report, the matter before the House was the motion of the gentleman from Massachusetts [Mr. DALLINGER] to suspend the rules and pass the bill S. 3319, authorizing the extension and operation of the transcontinental airplane mail service to Boston, Mass.

Mr. DALLINGER. Mr. Speaker, I call the attention of the House before we vote on the matter to the fact that I introduced the bill at the suggestion of the Second Assistant Postmaster General, who is anxious to have authority, and I say that the business men of Boston do not expect to have this service unless the charge to them is sufficient to pay the expense. This simply authorizes them to do this. I hope the House will act favorably upon the motion to suspend the rules and pass the bill.

Mr. CRAMTON. Mr. Speaker, I yield three minutes to the gentleman from Kansas [Mr. TINCHER].

Mr. TINCHER. Mr. Speaker, I am in thorough sympathy with Massachusetts in their program for economy. [Applause and laughter.] This bill does not mean what the two last speakers have said it means with reference to economy. The proviso in the bill reads as follows:

That the appropriations heretofore or hereafter made for the operation and maintenance of the transcontinental airplane mail service shall be sufficient for such purpose.

That means that after we authorize the carrying of the mail off the line down to Boston, it will be an obligation on the part of the American Congress to appropriate for that purpose, and I say to you, Mr. Speaker, being in sympathy with the program for economy, that if Boston is entitled to this, then every other important city off that line is entitled to it, and the description of the gentleman from Illinois that this is a pork barrel, and a pork barrel pure and simple, is accurate to the minutest detail.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield?

Mr. TINCHER. No; I think I can talk as well against this as the gentleman can, and he is surely against this. [Laughter.] I want to say, Mr. Speaker, that I hope that the Sixty-eighth Congress in its first session will not pass a bill of this kind without any proposal for consideration. There is absolute misrepresentation as to the expense on the part of the Government before the House, and I hope that we can rouse up enough votes to defeat this bill.

Mr. DALLINGER. Mr. Speaker, I yield two minutes to the gentleman from New York [Mr. GRIFFIN].

Mr. GRIFFIN. Mr. Speaker and gentlemen of the House, this bill is simply permissive. If the Postmaster General can not furnish the mail service economically, he does not need to do it. The gentleman from Kansas [Mr. TINCHER] says that this measure smacks of the pork barrel. Let me tell him that the shoe is on the other foot. On the Consent Calendar of this House to-day there are two bills under which the post office is to be authorized to make contracts with private parties for the operation of the Air Mail Service. They are H. R. 6942 and H. R. 7064. Gentlemen, the same fight is being made against this new industry as was made by the stage coaches against the railroads when they were in their infancy. There are contractors who are now speculating on the juicy prospects of the air mail business. They are to a great extent the same men, or identified with the men, who have robbed this Government out of millions of dollars with their war-time air experimentation. Beware of cormorants flying low watching for the opportunity to grab this infant industry.

Gentlemen, the Postal Service is administering the Air Mail Service honestly, economically, and satisfactorily. They should be encouraged to enlarge and develop it. As to the statement of the gentleman from Illinois [Mr. MADDEN] that it costs $6 to operate this air mail per mile, I have here the testimony of Colonel Shaughnessy, who admitted, on page 294 of the hearings, that it is only costing the Air Mail Service 75 cents per mile.

What, then, will be the cost of carrying this mail 225 miles from New York to Boston or vice versa? It will cost $168.75 to carry 800 pounds of mail, containing 3,200 letters, which will represent to the Government, at 20 cents a letter, $640. There is a profit to the Government, if you please, of $471.25—sufficient to tempt the avarice of these gentlemanly contractors, the friends of my friend from Kansas [Mr. TINCHER], who are waiting for an opportunity to inaugurate another star-route scandal in the mail service, and reap the profits that ought to go to the Government and people of the United States. [Applause.]

I herewith append to my remarks the report of the Committee on the Post Office and Post Roads on H. R. 7064, and ask my good friends to note that my apprehensions are more than confirmed.

First, it says that "the hearings were attended by representatives and individuals, firms and corporations interested in commercial aviation."

Why did they not invite some one to testify who was disinterested and who had no ax to grind?

Second, look at Postmaster New's letter, quoted in the report, in which he urges that the "contractor carrying mail should be paid a certain proportion of the postage."

Gentlemen, there is no more reason to employ contractors to carry the air mail than there is to give them the contract to run the motor trucks that carry the mail on the surface.

Well, here is the report. Digest it and deliberate on it. The Air Mail Service is a success. It can not be stopped. It is going to develop and grow until it will carry more mail than the railroads.

Perhaps this is one of the reasons why the Government development of the Air Mail Service is opposed. I do not know. Judge for yourselves:

[Sixty-eighth Congress, first session]

(Report No. 730, to accompany H. R. 7064)

The Committee on the Post Office and Post Roads, having had under consideration the bill (H. R. 7064) to encourage commercial aviation and to authorize the Postmaster General to contract for air mail service, reports the same back to the House with the recommendation that the bill do pass.

This bill was referred to a subcommittee for a hearing.

These hearings were attended by representatives and individuals, firms and corporations interested in commercial aviation, all of whom expressed the opinion that the measure is a big step forward tending to the establishment of transportation by air on a sound basis.

The objection to all previous proposals for the establishment of contract air mail service has been the demand for a subsidy in the form of a guaranteed load at a fixed price. The present bill provides for the payment of the contractor upon a basis of four-fifths of the revenue derived from the mail carried by air, which is in no way a charge upon the postal revenues.

The report of the Postmaster General on this bill follows:

OFFICE OF THE POSTMASTER GENERAL,
*Washington, D. C., February 25, 1924.*

Hon. W. W. GRIEST,
*House of Representatives.*

MY DEAR MR. GRIEST: Replying to your letter of February 19, with which you inclosed a copy of a bill (H. R. 7064) to encourage commercial aviation and to authorize the Postmaster General to contract for air mail service, which was referred for my consideration and recommendation.

Your attention is invited to my letter of February 18 replying to your communication of the 14th relative to a similar bill, H. R. 503.

In that letter I stated that in my opinion any bill naming a flat rate per ton-mile, per ship-mile, or per pound-mile will not be a satisfactory way to approach the problem. I believe that the contractor carrying mail should be paid a certain proportion of the postage, and it appears that in H. R. 7064 the objectionable features have been eliminated.

Very truly yours,

HARRY S. NEW, *Postmaster General.*

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, including some suggestions as to this legislation, which I think would be effective now if the House cares to hear them, which I fear it does not.

The SPEAKER. Is there objection?

Mr. HILL of Maryland. Reserving the right to object, are they the gentleman's own remarks?

Mr. CRAMTON. Yes; and I will give them now, if the House desires to hear them.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. Mr. Speaker, under leave granted me, I simply want to say that this proposal should be defeated as the entering wedge for a pork-barrel aviation mail service.

This year, when the post-office appropriation bill was pending in the House, I made a point of order against the $1,500,000 proposed for the Air Mail Service. I knew a radical increase was proposed in that item, and by the point of order stopped the matter at that time. I said then I was moved by a desire to forestall any pork-barrel increases. The Senate restored and increased the item, and it became law at $2,750,000, a quarter of a million less than was proposed by the advocates in the House. That sum fully provides for complete experimentation on a through route from coast to coast, from New York to San Francisco. It provides for night flying and a 30-hour schedule across our whole country. It provides for increase of the carrying capacity of the planes to a ton instead of 500 pounds, and the department is to charge a special rate for this service instead of the ordinary rates as heretofore.

This route and program give full opportunity for mechanical testing and all aerial and service experimentation.

The cost for carrying mail by train is about 11 cents per ton-mile. They have brought the cost down to $2.00 per ton-mile in the air, taking all matter offered without regard to special rates of postage.

It is claimed if the planes carry the full capacity of 1 ton that will reduce the cost per ton-mile to a little over 60 cents, six times the rail rate. The increased rate for this special service to be put in effect, it is alleged, will make the service self-sustaining, but that will depend upon there being enough of the special-rate mail to fill the planes to capacity.

The proposed New York to San Francisco program gives ample opportunity for this sort of experiment.

Any extensions now to Boston or elsewhere have no importance, except to gratify local pride. That pride runs about as strong in one place as another, and many other Members here are as keen to please as is my very valued colleague from Massachusetts [Mr. DALLINGER].

This extension to Boston I oppose as the entering wedge. If allowed, next will come demand from Detroit, Washington, Philadelphia, New Orleans, Minneapolis, Denver, San Diego, Seattle, and many other cities for such service, and if enough join together, there being strength in union, you have a new and very modern pork barrel on tap.

The Treasury will not afford such sops to local pride while the service is as big a loser financially as at present.

Think of the inconsistency of our passing this bill to-day, the day the most distinguished son of Massachusetts vetoes the postal salary raise bill, correcting so many serious inequalities and inadequacies in pay, vetoed because of a need to avoid extravagance. Think of our passing a bill this same day to extend the air service to the metropolis of the President's home State.

Whatever may be the financial aid to be expected in this service from the people of Boston, there is nothing in the bill to prevent using a portion of that $2,750,000 appropriation. It is extravagance, not great in the beginning, but the forerunner of millions of waste if not stopped. Stop these extensions before they begin.

The SPEAKER. The question is on the motion of the gentleman from Massachusetts to suspend the rules and pass the bill.

The question was taken; and the Speaker announced, in the opinion of the Chair, two-thirds did not vote in the affirmative.

Mr. DALLINGER. Division, Mr. Speaker.

The House divided; and there were—ayes 75, noes 128.

So the motion to suspend the rules was rejected.

PERSONAL PRIVILEGE

Mr. YOUNG. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. YOUNG. I ask permission to address the House for seven minutes.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. YOUNG. Mr. Speaker and colleagues, this is my last day of service in the House of Representatives. I want to say that I am just as fond of the Members of this House and just as reluctant about severing my relations with them as was the gentleman from Illinois [Mr. GRAHAM] who spoke so beautifully this morning. I want to say frankly that I was not a candidate for reelection, and I am leaving this House because I can not afford to serve here longer on the salary paid to a Congressman. [Applause.] Our family is small, and as you all know, we live modestly. Notwithstanding this our expenditures have gone decidedly over my salary. If we had not saved up some money while I was practicing law before coming here I would have quit Congress long ago. That is the experience of many others.

There are some things that people throughout the United States either overlook or are not familiar with in connection with what a Congressman must pay to live and his necessary outlays. In the first place, some of them forget that he must maintain two homes, one in his district and one in the city of Washington. They perhaps do not know that the living costs at the Capital are very much higher than they are in practically all the districts represented in the House. A Congressman must entertain more in Washington than in his home district. This is expected on account of the position he holds and it is really necessary. The daily sessions of the House are much longer than they are generally thought to be, averaging over five hours a day, and the departments of the Government are very much further separated from our offices than is generally thought. The nearest department is over a mile from my office, others are 2 and 3 miles away. Now those two things coupled together make it necessary either for a Congressman to keep an automobile and stand the expense of the upkeep of it or pay a very substantial amount for taxi hire. There are a number of small items I might give you that in themselves do not look large but taken together really run into quite a large amount. I only mention two or three of them. The subscriptions for church and charity and for other things of that kind that a man makes in his home district must be very largely duplicated when he comes to the city of Washington. It is necessary for one to subscribe for a large number of home papers if he wants to keep up with what is going on there and understand the conditions of his district.

He must also pay a very substantial income tax on a salary that is not big enough to pay his expenses here. I might give a number of other illustrations of that kind.

I think it is very proper to put in election costs as a proper part of a Congressman's expenses. If they are not, it means that a poor man can not aspire to serve in this House; only men of means can aspire to serve in this House if you say election expenses are not a proper part of a Congressman's outlay.

Again, a man without money saved up for a rainy day ought to carry a very substantial amount of life insurance. Congressmen who are either only breaking even or going behind are the very ones who ought to carry enough life insurance to protect their families, and that costs considerable money. A former Member from Georgia, William Schley Howard, said that the average Congressman was only three minutes ahead of the sheriff. [Laughter.] I think that is largely true. I venture this assertion, that a Congressman must either run behind or take the hazard of leaving his family penniless at the time of his death and also subject to other hardships not experienced before they came down to Washington.

As a general principle of sound government the salary of a Congressman should be sufficient so that any man of character and ability, without regard to his means, can aspire to become a candidate for Congress or to remain in Congress. Of course, I feel quite sure that you are not likely to vote to raise your own salaries, preferring to submit to hardships. Still, I believe that if you do not do this, you are going to do an injustice to your families and you are going to prevent many men of real worth from coming here who might otherwise aspire to come here for service n this House. [Applause.]

Now, I want to make this suggestion to you: I do not want any of you gentlemen to pay any hotel bills in New York after this. [Laughter and applause.] For that purpose I want you to write down my address, which is "641 Washington Street, New York." [Applause.]

Mr. BARKLEY. What was it? I did not catch it. [Laughter.]

Mr. YOUNG. "641 Washington Street, New York."

Mr. BANKHEAD. Does that apply during the Democratic Convention? [Laughter.]

Mr. YOUNG. It surely does.

After having served in Congress for almost 12 years, I want to say that I have only two ambitions left. First, I want to make a good judge [applause], and second, I want to put all the big hotels in New York out of business. [Laughter and applause.] Gentlemen, I thank you very much for the many courtesies you have extended to me. I shall be your friend for all time. You will always have a warm place in my heart. God bless you all. [Applause, the Members rising.]

Mr. OLDFIELD. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER. The gentleman from Arkansas asks unanimous consent to proceed for three minutes. Is there objection?

There was no objection.

Mr. OLDFIELD. Mr. Speaker, after several years' service on the Committee on Ways and Means with the distinguished gentleman from North Dakota [Mr. YOUNG], I want to say that I bespeak the feeling of every member of that committee, and especially those on the Democratic side, when I say that we hate very much to lose him from that committee. [Applause.]

Mr. YOUNG was a faithful member, one of the most hard-working men on the committee. He worked in season and out of season for the things he believed in. He was conscientious in that work, and I, for one, want to say that I shall miss him a very great deal indeed. I know that he has the good wishes of every member of the committee, and I feel sure he has the good wishes of every Member of this House. [Applause.] We shall always give him the glad hand when he sees fit to visit the House and to visit us personally. We regret that he is to go. [Applause.]

EXPENSES OF A SELECT COMMITTEE

Mr. MacGREGOR. Mr. Speaker, I present a privileged report from the Committee on Accounts.

The SPEAKER. The gentleman from New York presents a privileged report from the Committee on Accounts, which the Clerk will report.

The Clerk read as follows:

House resolution (H. Res. 336) authorizing the select committee appointed under House Resolution 325 to employ stenographic and other assistance, and for other purposes

*Resolved*, That the Judiciary Committee, authorized under the provisions of H. Res. 325, adopted May 23, 1924, to make inquiry into the official conduct of William E. Baker, United States district judge

for the northern district of West Virginia, is hereby authorized to employ such stenographic, legal, and clerical assistance as it may deem necessary.

*Resolved further*, That all expenses incurred by said committee under the provisions of H. Res. 325, including the expenses of such committee or any subcommittee thereof when sitting outside of the District of Columbia, shall be paid out of the contingent fund of the House of Representatives on vouchers; ordered by said committee, signed by the chairman of said committee, and approved by the Committee on Accounts, evidenced by the signature of the chairman thereof: *Provided, however*, That the total of expenditures authorized by this resolution shall not exceed the sum of $5,000.

With committee amendments as follows:

Amend the title by striking out the words "select committee appointed under H. Res. 325" and insert the words "Judiciary Committee."

Page 1, line 2, strike out the figures "23" and insert the figures "22."

Page 1, line 6, strike out both the commas and the word "legal."

Page 1, line 13, strike out the first comma and the word "ordered" and insert the word "submitted."

Page 2, line 5, strike out the figures "$5,000" and insert "$2,500."

Mr. MACGREGOR. Mr. Speaker, I move the adoption of the committee amendments.

The SPEAKER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER. The question is on agreeing to the resolution as amended.

The resolution as amended was agreed to.

ADDITIONAL CLERK FOR COMMITTEE ON ALCOHOLIC LIQUOR TRAFFIC

Mr. MACGREGOR. Mr. Speaker, I present another privileged resolution from the Committee on Accounts.

The SPEAKER. The gentleman from New York presents a privileged resolution from the Committee on Accounts, which the Clerk will report.

The Clerk read as follows:

House Resolution 345

*Resolved*, That the Committee on Alcoholic Liquor Traffic be authorized to employ a clerk for this session of the Sixty-eighth Congress, appointment to be made by the chairman of the committee. Compensation is to be at the rate of $100 per month from date of employment, and is further authorized to have such printing done as it may require.

*Resolved further*, That the committee or such subcommittees it may designate shall have leave to sit during sessions of the House during the Sixty-eighth Congress and during the recess of that Congress, and may hold its sessions at such places as the committee may determine.

With the following committee amendment:

On page 1, line 1, strike out all of the resolution after the word "*Resolved*" and insert the following:

"That the Committee on Alcoholic Liquor Traffic is hereby authorized to employ clerical assistance at compensation not exceeding $100 per month until January 1, 1925, to be paid out of the contingent fund of the House. Said committee, or any subcommittee thereof, is hereby granted leave to sit during any recess of Congress and to hold its sessions outside of the District of Columbia."

Mr. BLANTON. Will the gentleman yield?

Mr. MACGREGOR. Yes.

Mr. BLANTON. The House is going to adjourn in 45 minutes. This is June 7, 1924, and the Congress will not meet again until December, 1924. This committee during this entire Congress has been without a clerk, it has been without an assistant clerk, and yet now, when we are adjourning and going home, the committee is trying to pass a resolution to grant this committee during the recess both a clerk at $100 and an assistant clerk at $100.

Mr. MACGREGOR. Oh, no; there is no clerk.

Mr. BLANTON. Well, it says "clerical assistance" which means a clerk and an assistant clerk.

Mr. MACGREGOR. No; it does not.

Mr. BLANTON. What does it say?

Mr. MACGREGOR. A temporary clerk.

Mr. BLANTON. What is the difference between a temporary clerk and a clerk? They are going to draw the money. If the gentleman will yield further, I do not see how in the world the gentleman can go to the country on economy when he is going to give two swivel-chair jobs here until the Congress meets again. This temporary clerk and this temporary assistant clerk will have nothing in the world to do, and I dare say there will not be a member of this committee meet here for hearings until December; and there is no use for them to meet.

I want to say this: That the gentleman from Chicago [Mr. RATHBONE], aided by his subcommittee of four members, has held exhaustive hearings on this very subject. They have been meeting for the last six weeks.

Mr. CABLE. Will the gentleman from Texas yield?

Mr. MACGREGOR. I have the floor.

Mr. BLANTON. I am speaking by sufferance, and I am simply trying to take up some of the time of the House, because otherwise it would cost the people of the country some money, as other bills would be passed.

I hope the House will not pass this resolution, and I hope I shall get a chance to meet some Republican spellbinder on the hustings this summer and call attention to a lot of these fool propositions that this House has been voting on here. This is a fool proposition, and I hope it will not pass.

Mr. HILL of Maryland. Will the gentleman from New York yield?

Mr. MACGREGOR. Yes.

Mr. HILL of Maryland. Just how many times has this committee met during this session of Congress?

Mr. MACGREGOR. I have no official information, and I will call on the chairman to answer that.

Mr. CABLE. Will the gentleman yield to me?

Mr. MACGREGOR. I yield five minutes to the gentleman from Ohio. [Cries of "Vote!" "Vote!"]

Mr. CABLE. The Committee on Alcoholic Liquor Traffic has come to life; and I am in favor of the passage of this resolution, and I hope you will put it through.

Mr. HILL of Maryland. Will the gentleman yield?

Mr. CABLE. No; I will not yield.

Mr. HILL of Maryland. How many times has this committee met? It has not met once during the whole session, and it has not met once for five years.

Mr. SHALLENBERGER. I was a member of that committee 24 years ago, and it has not met since.

The SPEAKER. The question is on agreeing to the committee amendment.

The question was taken; and on a division (demanded by Mr. CABLE) there were—ayes 91, noes 96.

So the committee amendment was rejected.

Mr. CRAMTON. Mr. Speaker, I ask for recognition to offer an amendment.

I offer an amendment, Mr. Speaker, to the resolution, on page 1, line 2, strike out all after the word "traffic" and insert the amendment which I send to the desk.

Mr. SABATH. A point of order, Mr. Speaker. The resolution was defeated, was it not.

Mr. CABLE. No; the vote was on the amendment.

The SPEAKER. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Strike out, on page 1, line 2, all after the word "traffic" and insert the following: "Is hereby authorized to employ clerical assistance at compensation not exceeding $100 per month until January 1, 1925, to be paid out of the contingent fund of the House. Said committee or any subcommittee thereof is hereby granted leave to sit during any recess of Congress and to hold its sessions outside of the District of Columbia.

Mr. BLANTON. Mr. Speaker, I make the point of order against the amendment that the amendment is just exactly the language that the House has just voted down. It provides for the same things, and the House has already passed on that by a decisive vote.

Mr. CRAMTON. No; I left out several words that were in the other amendment.

Mr. KVALE. Will the gentleman yield?

Mr. BLANTON. I have not the floor.

The SPEAKER. It seems to the Chair the point of order is well taken.

Mr. LARSEN of Georgia. Mr. Speaker, I move to amend the amendment.

Mr. CRAMTON. Mr. Speaker, I still have the floor. I do not want to take time to argue the point of order. I offer a further amendment which I will not take the time of the House to write out, but I want to provide in this amendment——

Mr. BLANTON. Mr. Speaker, I have a preferential motion.

The SPEAKER. The Chair has recognized the gentleman from Michigan.

Mr. CRAMTON. I have the floor.

Mr. BLANTON. I have a preferential motion.

The SPEAKER. The gentleman from Texas is out of order. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 1, line 1, strike out all the resolution after the word "*Resolved*" and insert the following:

"That the Committee on Alcoholic Liquor Traffic is hereby authorized to employ clerical assistance at compensation not exceeding $110 per month until February 1, 1925, to be paid out of the contingent fund of the House. Said committee or any subcommittee thereof is hereby granted leave to sit during any recess of Congress and to hold its sessions outside of the District of Columbia."

Mr. BLANTON. Mr. Speaker, I make a point of order against the amendment that it in substance provides just exactly what the House has already voted down.

The SPEAKER. The Chair overrules the point of order.

Mr. BLANTON. Mr. Speaker, I offer a substitute.

The SPEAKER. The gentleman said he had a preferential motion.

Mr. BLANTON. Well, I have a preferential motion. Mr. Speaker, I move to strike out the resolving clause of the resolution.

Mr. CRAMTON. Mr. Speaker, I do not yield the floor for that purpose.

Mr. BLANTON. This is a House resolution and has a resolving clause, and I move to strike out the resolving clause.

Mr. CRAMTON. Mr. Speaker, I have not yielded the floor for that purpose.

The SPEAKER. The Chair thinks that is a preferential motion.

Mr. CRAMTON. It would be preferential in consideration, but would not take me off the floor.

The SPEAKER. Does the gentleman from Michigan wish to debate the amendment?

Mr. CRAMTON. Yes, Mr. Speaker.

Mr. Speaker and gentlemen of the House, this is a matter of some serious importance. The Committee on Alcoholic Liquor Traffic, whatever it may or may not have done in the past, has appointed a very capable subcommittee, which proposes between this and the reconvening of Congress to make a very careful survey of the effects of prohibition. The subcommittee has been appointed by the authority of the full committee. It is a capable committee, headed by my colleague from Michigan [Mr. HUDSON], and associated with him are gentlemen of equal standing in the House.

Mr. SNELL. Will the gentleman give us the names of the members of the committee?

Mr. CABLE. Will the gentleman yield?

Mr. CRAMTON. Mr. UPSHAW, Mr. KVALE, Mr. BOX, Mr. ADDISON SMITH, and Mr. HUDSON, five Members.

This committee has authorized a subcommittee, and the subcommittee has not asked a large amount of money. They are asking nothing for traveling expenses, nothing for any other purpose except the hiring of one clerk; and, whatever my word is good for, I am glad to give it to the House that it is the intention that this committee will really work during these six months, and this clerk is all that the resolution asks for.

Mr. BEGG. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BEGG. Is it not a fact that the Senate has a committee which has been investigating this for a month, and if we pass this resolution it will be a duplication of work?

Mr. CRAMTON. Not at all. The committee in the Senate is seeking to investigate the enforcement operations in the Treasury Department—some kind of personnel and efficiency service. This committee proposes to make a real survey of the result of the past four years of national prohibition. It is an important matter, and I hope every friend of prohibition will give his support to this resolution.

Mr. BLANTON. Mr. Speaker, this is nothing in the world but duplication. The Committee on Alcoholic Liquor Traffic until recently has not held a meeting for five years. Just recently when it decided to look into this question, just when adjournment is in front of us, it comes in with a resolution wanting a clerk and an assistant clerk. The gentleman from Illinois [Mr. RATHBONE], aided by the gentleman from Vermont [Mr. GIBSON], and the gentleman from Pennsylvania [Mr. BEERS], and myself, have just held an exhaustive investigation on this subject for the last six weeks. We made recommendations to Congress, and the work of this committee would be nothing but duplication. I understand the same work is being done in the Senate. I do not think you can go to the country with any such proposition as this when the gentleman from Georgia [Mr. UPSHAW] will be in New York attending the convention, when the gentleman from Michigan will be in Michigan on the hustings, and when other members of the committee will be scattered over the United States; you do not want them spending the money of the people on junketing trips with a clerk and an assistant clerk.

Mr. MACGREGOR. Mr. Speaker, I move the previous question on the resolution and all amendments thereto.

Mr. LARSEN of Georgia. Mr. Speaker, I want to offer an amendment.

The SPEAKER. But the gentleman from New York has moved the previous question. The question is on the amendment offered by the gentleman from Michigan.

Mr. BLANTON. Mr. Speaker, I made a motion to strike out the resolving clause.

The SPEAKER. The gentleman from Texas said he was going to make the motion but he did not make it. The Chair refused him recognition.

Mr. BLANTON. The Chair recognized me and I made the motion.

The SPEAKER. The Chair will ascertain the fact from the Reporter's notes.

Mr. BLANTON. I am sure that the Speaker wants to be fair.

The SPEAKER. The Chair just said he would ascertain the fact from the Reporter's notes.

Mr. SNELL. The gentleman from Michigan had the floor and did not yield to the gentleman from Texas.

The SPEAKER. As the Chair remembers it, the gentleman from Texas said he wished to make a preferential motion. He had no right to be recognized at that moment. Later when the gentleman was recognized the Chair does not remember that he made the motion again.

Mr. HAUGEN. Mr. Speaker, I ask unanimous consent to print in the RECORD a letter from the Department of Agriculture.

The SPEAKER. The gentleman from Iowa asks unanimous consent to print in the RECORD a letter from the Department of Agriculture. Is there objection?

Mr. JONES. Reserving the right to object, who is the letter from?

Mr. HAUGEN. Charles J. Brand, who served in the department.

Mr. BANKHEAD. I object.

The SPEAKER. The Chair is informed by the Reporter that the gentleman from Texas did make the motion to strike out the enacting clause. So the question is on the motion of the gentleman from Texas to strike out the resolving clause.

The question was taken; and on a division (demanded by Mr. CRAMTON) there were 153 ayes and 88 noes.

Mr. CRAMTON. I demand the yeas and nays.

The SPEAKER. The gentleman from Michigan demands the yeas and nays. As many as are in favor of taking the question by yeas and nays will rise. [After counting.] Nine Members have arisen, not a sufficient number, and the yeas and nays are refused.

### REPORT OF COMMITTEE TO WAIT UPON THE PRESIDENT

Mr. LONGWORTH. Mr. Speaker, the committee appointed on the part of the House to wait upon the President of the United States and inquire whether he has any further communication to make to Congress, have performed that duty, and have the honor to report that the President has informed us that he has no further communication to make.

### SOLDIERS' BONUS

Mr. CROSSER. Mr. Speaker, I ask unanimous consent to extend my own remarks on the revenue question and adjusted compensation.

The SPEAKER. Is there objection?

There was no objection.

Mr. CROSSER. Mr. Speaker, the nature and source of the opposition to the soldiers' compensation bill, sometimes called the bonus bill, does not surprise me. When the young men of the country were being drafted to be sent across the sea to fight on the fields of France and Flanders there were none who talked so much about the reward these boys should have as the class of men who now oppose giving them a trifling sum as compensation for their loss of wages, for the discomforts they suffered, and for the danger they incurred. I remember well the report of speeches made by the representatives of great commercial and industrial institutions at the departure of the boys from almost every town in the land. I recall, too, that in Congress the Representatives of the great financial centers of the country waxed eloquent in a like manner. All these speeches, after eulogizing the soldiers who were going to fight on foreign fields for America, generally closed by saying, "Go; God bless you; and when you come back you

will receive your reward from a grateful people. The fat of the land will be yours. Your jobs will be waiting for you, aye, better jobs and better pay, for you go to fight for our cause." But now what do we find? These same people are the ones who speak sneeringly of capitalizing patriotism. These men, most of whom never were in any danger themselves, now tell the boys who risked their lives that they must be content with the reward of glory. I am not greatly surprised, for I understand the mind of the patrioteer, who is always willing to talk big when some one else does the fighting.

What, I ask, is unfair in the proposal to pay the boys in part the loss they suffered in wages or their disturbed business career while they risked their lives, their health, and their comfort for the Nation as a whole? We are told that it is "class legislation." "Class legislation," when the Government during the war guaranteed to the wheat producers of America $2.20 a bushel for wheat. Did we hear this same crowd prating about class legislation when the Government poured millions into the coffers of the railroads as an adjustment of their compensation? Did we hear these gentlemen yowl about class legislation when, several years ago, the Government in effect guaranteed the railroads a fixed income on their stocks? No; we heard nothing of "class legislation" in those cases; but when we propose to pay the soldiers just a little toward making up the loss suffered on account of the war, then we hear the wail that it is "class legislation."

Hugh K. Martin, State adjutant of the American Legion of Ohio, stated the case well in the letter commenting on the President's veto when he said:

Because the Government saw fit to draft a minority of the people it thereby created a class which served the whole people, and now because of the service that class, created by the Government itself, is to be penalized because it is not a majority of the whole people.

Mr. Coolidge refers to the proposed bonus as a gratuity. This, of course, means that nothing was done by the ex-service men to merit this little insurance policy. How soon are services forgotten? The service men had nothing to do with fixing their compensation while in the service. But because a man renders a service which is needed in an emergency at a wage far below that of the lowest-paid laborer is no reason for regarding a subsequent partial adjustment as a gratuity or gift which is doled out as charity. If this is a gratuity, then the service of these men was a gratuity exacted by the Government from a class rather than from the whole people.

The time was, in the Middle Ages, when a vassal owed his life to his overlord and was to receive no compensation for it. This was not only an injustice but it created many wars between barons, because fighting material was available and was so cheap.

The President, in his message vetoing the measure, says:

Patriotism which is bought and paid for is not patriotism.

Was that the kind of argument, was that the kind of speech, which was delivered to the young men boarding the trains to leave for France and Flanders? We all know that it was not the kind of talk they heard. Apparently the President himself did not always think so, for on July 3, 1919, he sent a letter to a Mr. Macdonald, apparently believing at the time that he was greatly honoring Mr. Macdonald by giving him as a memento the instrument by which the then Gov. Calvin Coolidge, of Massachusetts, had signed a so-called Massachusetts bonus law. The following is a copy of that letter:

THE COMMONWEALTH OF MASSACHUSETTS,
EXECUTIVE DEPARTMENT, STATEHOUSE,
*Boston, July 3, 1919.*

Mr. KENNETH MACDONALD, Jr.,
*17 Capen Street, Dorchester, Mass.*

DEAR MR. MACDONALD: I take great pleasure in handing you herewith a quill with which I have to-day signed an act "to provide suitable recognition of those residents of Massachusetts who served in the Army and Navy of the United States during the war with Germany."

Very truly yours,

CALVIN COOLIDGE.

Mr. Speaker, it is a real pleasure, a genuine satisfaction to me, to support the bill giving to the young men who served their country something to make up for the loss they suffered during the war, little as it is, compared with their total loss.

## FEDERAL TAX REDUCTION

Mr. COOK. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD on tax reduction.

The SPEAKER. Is there objection?

There was no objection.

Mr. COOK. Mr. Speaker, I desire to discuss the question of tax reduction. I realize that there has been so much criticism of the efforts of this Congress to enact such legislation and so much prejudice created in the minds of the people against the new law that it will be no easy task to present its merits. However, I have confidence in the sober second thought of the American people and feel comident that when the truth is known they will find that this law will materially lighten the heavy burden of Federal taxation of the greatest number and is otherwise a good law.

It was found before the present Congress assembled that under the operations of the existing revenue laws there would be a surplus in the Treasury amounting to something over $300,000,000 per year for the next four or five years. This made a reduction of Federal taxes necessary, as there should never be collected more money from the people than is necessary to pay the expenses of a government economically administered. Before going to the merits of the new tax law I desire to mention several preliminary matters which will pave the way to a clearer understanding of its provisions.

The money required for this purpose is derived from duties collected at the customhouses on goods brought into this country. The revenue from that source for the fiscal year of 1923 amounted to $562,000,000, in round numbers. The other source is from income and excise taxes. The largest item in this class is the tax collected from incomes. In 1922 the Government received over $2,000,000,000 from incomes and profits, but it fell to $1,691,000,000 for the year 1923. So it will be seen that practically two-thirds of the money required to support the General Government is derived from income and profit taxes.

The income and excise taxes were levied and increased to meet the expenses of the war. Some of them had been reduced in 1921 and 1923. The excise taxes are very simple, but the income tax is more complicated. It covers the incomes of individuals, partnerships, and corporations. I shall refer to some of the provisions as to individuals.

There are two kinds of taxes on the income of the individual combined into one. The one is called a normal tax and the other a surtax. The normal tax is a certain rate levied on all of the income of an individual above his credits or exemption and deductions. The surtax is a tax in addition to the normal tax. In the present new law it does not begin until the income exceeds $10,000 and is graduated up step by step to 40 per cent on incomes in excess of $500,000. It is important to keep the point in mind that there are no surtaxes on any sum under $10,000. It is also important to remember that the returns of 1921 showed there were over 6,000,000 persons with incomes under $10,000 in the United States. In 1922 this number was 3,417,626.

Under the amendment of 1923 the normal tax was 4 per cent on the first $4,000 above the credits and 8 per cent on incomes in excess of that sum. Under the law of 1921 for the years 1922 and thereafter the surtax started with 1 per cent at $6,000 and was graduated up to 50 per cent on incomes in excess of $200,000.

For the purpose of making comparisons I shall take the provisions which relate to the head of a family or a married person living with husband or wife. Of course, there are many other payers. A married person under the new law is allowed an exemption of $2,500, and if the income is less than that no income taxes would have to be paid. In case there are children under 18 years of age there is also allowed an exemption of $400 for each child.

In addition to this an individual is also allowed to deduct from his income expenses in carrying on any trade or business, including salaries and traveling expenses, rents paid, interest paid, ordinary State and local taxes, losses in trade or business not covered by insurance, worthless debts, reasonable allowance for wear and tear of property used in business, gifts for religious, charitable, literary, and educational purposes, and amounts paid to posts of war veterans, lodges, and so forth.

The statement that it would be necessary to reduce Federal taxes to the approximate amount of $300,000,000 naturally excited a great deal of interest among the people who were groaning under the heavy load of local and State taxation. Everybody was in favor of reduction and many overlooked the point of how the reduction should be made. Besides this, many of the large income-tax payers who desired most of the reduction to apply to the higher surtaxes took advantage of this general desire to reduce taxes and started a flood of propaganda in favor of their plan. When the true facts are learned as to the merits of the new law people will see what an attempt was made to mislead them by certain selfish interests of the country.

It will be well for the people to remember what a long fight they had to make in order to bring about an income tax law, so that those having large incomes should pay their just share of the expense of the Government which protects them. The

first law was passed in 1894. It was held void by the Supreme Court of the United States.

The matter was agitated and strongly opposed until 1912, when an amendment was finally proposed to the legislatures of the several States. It was ratified and declared a part of the Constitution in February, 1913. This gave Congress power to levy a tax on incomes. Under the authority of the amendment Congress enacted an income tax law, which went into effect in October, 1913. It has been changed at different times since then. The large financial interests did not like the law and that explains much of their activity in the recent contest. They wanted to reduce their surtaxes 50 per cent and only reduce those having incomes under ten thousand 25 per cent. It is my opinion that it is the ultimate purpose of these interests to finally overthrow the surtax tax and substitute a sales tax in its place. This would shift most of the burden of Federal taxation to the shoulders of the common people. For it would be a tax on what a person uses or consumes instead of on his income.

The Constitution wisely provides that such bills as the one to reduce taxes must originate in the House of Representatives. That seemed to be overlooked in this instance. Our fathers no doubt thought that the Members of the House, being the most numerous body and elected every two years, could be better intrusted with the power of originating laws for reducing their taxes than any other department of the Government. Of course, the President, the Secretary of the Treasury, and every other person in the country has the right to make suggestions to Congress, but in the end its Members must use their own judgment. They are answerable to the people who sent them here, and to no one else, and they can not shift that responsibility to any department of the Government.

I desire to refer to the facts in relation to the new tax law. It is always well for the people to withhold final opinion on any given public question until both sides can be heard and until it can be considered what interest the proponents of any given plan may have in it. Because certain leaders and great newspapers say a thing is so does not make it so if it is wrong. Mr. Lincoln illustrated this point by this homely illustration: He asked, "If you call a sheep's tail a leg, how many legs will it have?" The listener answered, "Five." "No," said he, "it has only four. Calling a sheep's tail a leg does not make it so." The voter must get the facts and follow his own judgment and conscience on public questions. If he has all of the facts he can come to his own conclusion. I am sometimes amused at some public men in giving their conclusions instead of giving the public the facts. The writings of Jefferson and Lincoln demonstrate that they were very careful to give all of the facts before they asked the people to accept their conclusions. They had confidence in the people and believed if they were given the facts they would reach the right conclusion.

Before the Ways and Means Committee of the House had time to prepare a bill for tax reduction the Secretary of the Treasury sent one to it. It embodied what was afterwards known as the "Mellon plan." The committee began to consider this plan, and finally reported a bill to the House containing substantially the same provisions as the "Mellon plan." The propaganda entirely overlooked the unfair provisions of this bill and the interests of the over 6,000,000 taxpayers who paid in 1921 on sums under $10,000. A majority of the Members of the House thought they should at least be allowed to examine the bill before acting on it.

These Members recalled how a previous Congress had repealed the excess-profits tax on corporations; that during the four years of the war these corporations so relieved made over $30,000,000,000 over and above the excess-profits taxes. About $19,000,000,000 of this was made by 1,000 corporations, among the largest being the Steel Trust, Powder Trust, Standard Oil Trust, and Bethlehem Steel Trust. These Members thought it was about time to reduce the taxes on the over 6,000,000 having incomes in 1921 of less than $10,000. This is why they have been criticized so severely. After all of the argument in the House the simple question which remained and which overshadowed all others was whose taxes should be reduced.

It seemed to me that a majority of the House was in favor of reducing taxes to the lowest possible limit consistent with the needs of the Treasury, but the reduction should not be limited to any class, but benefit the greatest number.

The "Mellon plan" as reported to the House contains some very good provisions. The principal objection to it was that it proposed to reduce the surtaxes of the some 172,359 from 50 per cent to 25 per cent, or one-half, while it reduced the normal tax of the class of over 6,000,000 taxpayers in 1921 only 25 per cent, or one-fourth. It proposed to retain many of the nuisance taxes and failed to provide for a reduction on the taxes of 1923, payable in 1924.

The advocates of the "Mellon plan" while contending that it would release capital for investment in industries seemed to overlook the fact that a reduction on the millions having incomes under $10,000 would also release capital for the same purpose and be a direct benefit to a greater number by a general diffusion of the benefits of reduction. The new law should release something like $183,200,000 of normal taxes on the taxpayers with incomes less than ten thousand for the first year. That ought to do some good. No good reason was given why Congress should ignore the large body of taxpayers and make such a discrimination against them in the reduction.

Soon after the Mellon plan was reported to the House the gentleman from Texas [Mr. GARNER] offered what was afterwards termed the "Garner plan." It cut the normal taxes on individuals as follows: Two per cent above the credits on the first $5,000; 4 per cent on the next $3,000; and 6 per cent by which the net income exceeded $8,000. He proposed the surtaxes should be as follows: One per cent from $12,000 to $14,000, and then the rate is graduated up until it reached 44 per cent on net incomes exceeding $92,000. His plan raised the exemption of a single person from $1,000 to $2,000 and a married person or head of a family from $2,500 to $3,000.

The gentleman from Illinois [Mr. MADDEN] offered an amendment which was like the Mellon plan with the exception of 1 per cent difference on incomes exceeding $100,000. This was rejected in the House in the Committee of the Whole by a vote of 152 for and 244 against. This was a test vote on the Mellon plan in the Committee of the Whole, and was rejected by a majority of 92 votes. The gentleman from Wisconsin [Mr. FREAR] offered a substitute for the Garner plan, but it was rejected. It started the surtaxes at 1 per cent at over $6,000 and graduated up to 50 per cent on exceeding $200,000. Finally the Garner plan was substituted for the Mellon rates in the Committee of the Whole by a vote of 221 for and 196 against. When the bill was reported back to the full House the gentleman from Oregon [Mr. HAWLEY] offered the Mellon plan as an amendment to the "Garner plan," and it was rejected by a vote of 153 for to 261 against. This was a yea-and-nay or record vote. On this vote 66 Republicans when their names were called voted against the Mellon rates.

Then the gentleman from Ohio [Mr. LONGWORTH] offered a substitute for the Garner plan. The rates for the normal tax were 2 per cent on the first $4,000, 5 per cent on the next $4,000, and 6 per cent above that. It provided a surtax of three-fourths of the following: Two per cent beginning at $10,000 and graduated up to 37½ per cent on incomes exceeding $200,000. This substitute carried on a record vote with 216 for and 199 against. It will be noted that the highest rate in the "Garner plan" was 44 per cent above $92,000 and the highest rate in the "Longworth plan" was 37½ per cent above $200,000. The Longworth rate at $92,000 was 33 per cent. This shows that the highest Longworth surtax rate was 11 per cent below the Garner rate. The bill with the Longworth amendment finally passed in the House by a record vote of 408 for and only 8 against. The bill was sent to the Senate, and after some changes was finally agreed to in conference, and finally the Senate passed it by a vote of 60 for to 6 against, and it passed in the House by a vote of 376 for to 9 against. The action of the Senate and conferees reduced the normal tax on the second $4,000 1 per cent to the benefit of the great number having incomes under $10,000 and otherwise improved the bill. It then went to the President, who signed it.

What are some of the important provisions of this new law? It fixes the normal tax at 2 per cent on the first $4,000, 4 per cent on the next $4,000, and 6 per cent above that. It fixes the surtaxes as follows: One per cent beginning at $10,000 and graduated up to 40 per cent in excess of $500,000. These rates reduce the surtaxes on every taxpayer up to those having incomes under $65,000 more than the Mellon plan. To illustrate, the surtax under the Mellon rates on incomes of $64,000 is $6,340, and under the new law it will be the same. It is true that as to the some 6,100 persons having incomes above $65,000 per year, they will have to pay more surtaxes under the new law than under the Mellon plan. The scale really turns between incomes of $67,000 and $68,000. However, they will have to pay much less surtax than under the old law. To illustrate: A person having an income of $100,000 paid surtaxes under the old law in the sum of $22,460, but under the new law he will pay $17,020; and under the old law his normal tax was $7,680, and under the new law he will pay $5,597.50. Suppose we combine the normal and surtax under the old law on small incomes

and compare them with the Mellon plan and the new law and see the result to the taxpayer. On an income of $10,000 under the old law he would pay $480, under the Mellon plan $337.50, and under the new law $207.50. On an income of $25,000, under the old law he would pay $2,560, under the Mellon plan $1,877.50, and under the new law $1,607.50. On an income of $50,000, under the old law he would pay $8,640, under the Mellon plan $6,657.50, and under the new law $6,137.50. Let me repeat again that the total taxes on every taxpayer having an income of any sum below $65,000 will be less under the new law than it would have been if the Mellon rates had been adopted. To put it in another form: If the Mellon rates had been adopted every taxpayer in the United States with an income of any sum under $65,000 would have had to pay more taxes than he will under the new law. In the face of that fact there are those who are still denouncing the new tax law and calling the Mellon plan a "scientific plan." The following table gives the normal and surtax under the old law, the "Mellon plan," and under the new law. A number of such tables have been used in the argument of this question and I have not heard anyone dispute any of the figures in it:

*Comparison of the Mellon plan and new law (act of 1924) tax plans with the act of 1921 (married person without dependents), the first $5,000 of all income to be deemed to be earned, balance unearned*

| Number of persons making returns in each class for 1921 | Income | Amount of normal tax under— | | | Amount of surtax under— | | |
|---|---|---|---|---|---|---|---|
| | | Old act of 1921 | Mellon plan | New act of 1924 | Old act of 1921 | Mellon plan | New act of 1924 |
| 401,849 under | $1,000.00 | | | | | | |
| | 2,000.00 | | | | | | |
| | 3,000.00 | $20.00 | $11.25 | $7.50 | | | |
| | 4,000.00 | 60.00 | 33.75 | 22.50 | | | |
| | 5,000.00 | 100.00 | 56.25 | 37.50 | | | |
| 6,087,968 | 6,000.00 | 160.00 | 97.50 | 57.50 | | | |
| | 7,000.00 | 240.00 | 157.50 | 87.50 | $10.00 | | |
| | 8,000.00 | 320.00 | 217.50 | 127.50 | 20.00 | | |
| | 9,000.00 | 400.00 | 277.50 | 167.50 | 30.00 | | |
| | 10,000.00 | 480.00 | 337.50 | 207.50 | 40.00 | | |
| | 11,000.00 | 560.00 | 397.50 | 257.50 | 60.00 | $10.00 | $10.00 |
| | 12,000.00 | 640.00 | 457.50 | 317.50 | 80.00 | 20.00 | 20.00 |
| | 13,000.00 | 720.00 | 517.00 | 377.50 | 110.00 | 40.00 | 30.00 |
| | 14,000.00 | 800.00 | 577.50 | 437.50 | 140.00 | 60.00 | 40.00 |
| 114,244 | 15,000.00 | 880.00 | 637.50 | 497.50 | 180.00 | 90.00 | 60.00 |
| | 16,000.00 | 960.00 | 697.50 | 557.50 | 220.00 | 120.00 | 80.00 |
| | 17,000.00 | 1,040.00 | 757.50 | 617.50 | 270.00 | 160.00 | 110.00 |
| | 18,000.00 | 1,120.00 | 817.50 | 677.50 | 320.00 | 200.00 | 140.00 |

| | 100,000.00 | 7,680.00 | 5,737.50 | 5,597.50 | 22,460.00 | 14,080.00 | 17,020.00 |
| 1,817 | 150,000.00 | 11,680.00 | 8,737.50 | 8,597.50 | 46,460.00 | 26,080.00 | 35,020.00 |
| | 200,000.00 | 15,680.00 | 11,737.50 | 11,597.50 | 70,960.00 | 39,080.00 | 54,020.00 |
| 451 | 250,000.00 | 19,680.00 | 14,737.50 | 14,597.50 | 95,960.00 | 51,580.00 | 73,020.00 |
| | 300,000.00 | 23,680.00 | 17,737.50 | 17,597.50 | 120,960.00 | 64,080.00 | 92,020.00 |
| 93 | 500,000.00 | 39,680.00 | 29,737.50 | 29,597.50 | 220,960.00 | 114,080.00 | 170,020.00 |
| | 1,000,000.00 | 79,680.00 | 59,737.50 | 59,597.50 | 470,960.00 | 239,080.00 | 370,020.00 |

There is no question but that it will be found that the new law is better than the "Mellon plan." In short, that plan proposed practically a 50 per cent cut for the large taxpayers, on their surtaxes, while the millions having incomes under ten thousand would have been given only 25 per cent reduction on the basis of unearned incomes. The great injustice of the "Mellon plan" can not be rightly understood without considering that in 1921 there were over 6,000,000 having incomes under ten thousand. Inasmuch as the surtaxes begin at over ten thousand, all of those under that would be vitally affected and interested in the normal rates. If the Mellon rates had been adopted, this great class would have only received a 25 per cent reduction on unearned incomes, while under the new law all incomes under the ten thousand are reduced more than one-half as compared with the old rates. This point is made plain by the following comparison:

| Net income | Amount of normal tax under— | |
|---|---|---|
| | Act of 1921 | Act of 1924 |
| $1,000 | | |
| $2,000 | | |
| $3,000 | $20.00 | $7.50 |
| $4,000 | 60.00 | 22.50 |
| $5,000 | 100.00 | 37.50 |
| $6,000 | 160.00 | 57.50 |
| $7,000 | 240.00 | 87.50 |
| $8,000 | 320.00 | 127.50 |
| $9,000 | 400.00 | 167.50 |
| $10,000 | 480.00 | 207.50 |

In Indiana there were 150,300 who made income-tax returns in 1921. All of this number will receive greater reductions under the new law than under the "Mellon plan," except 52 of the largest taxpayers, who would have profited more under the "Mellon plan."

The following table, which is correct, as it is compiled from the official figures of the Treasury Department and contained in statistics of income for the year 1921, shows the total number of persons making income-tax returns in each State and how they are benefited more by the present law than they would have been by the Mellon plan:

| State | Total number making income-tax returns, 1921 | Number benefited more by Mellon plan | Number benefited more by act of 1924 |
|---|---|---|---|
| Alabama | 43,009 | 25 | 42,984 |
| Arizona | 18,477 | 1 | 18,476 |
| Arkansas | 33,830 | 8 | 33,822 |
| California | 386,082 | 237 | 385,845 |
| Colorado | 69,676 | 25 | 69,651 |
| Connecticut | 123,269 | 96 | 123,173 |
| Delaware | 15,889 | 12 | 15,877 |

A glance at this table tells the whole story as to the relative merits of the Mellon plan as compared with the new tax plan.

This is not all. Under the Mellon plan the personal exemption of a married person or head of a family was $2,500 if the income did not exceed $5,000, but if it exceeded the latter the exemption was only $2,000. Under the new law an exemption of $2,500 is given in all cases regardless of the amount of the income. This will be a great benefit to the millions of taxpayers having incomes under $10,000. They constitute the great body of those making returns. Besides this, the original Mellon plan as submitted to the committee did not contain any provision for the relief to taxpayers for the year 1923, payable in 1924. The Ways and Means Committee in the House added such a provision allowing a horizontal reduction of 25 per cent on the returns for 1923 made in 1924. This provision is a part of the new law, and it reaches back and gives the taxpayer a reduction on his income of last year. The taxpayer who has been told that the new law was not a good law will not be much impressed with that statement when he gets this reduction on paying his taxes this year.

Another improvement of the new law is that the first $5,000 of income is considered as "earned income," and the taxpayer is given a 25 per cent reduction of the tax thereon.

The new law is an improvement in making greater reductions in certain excise or nuisance taxes. Here are some of the more important changes: The tax on telephone and telegraph messages is repealed. The admission tax of 10 per cent will now apply only to admissions above 50 cents. On cereal beverages and soft drinks the tax was repealed. The tax on candy, hunting garments, and knives, and on yachts is re-

pealed. Taxes on jewelry under $30 and watches under $60 are removed. Taxes on theaters, circuses, and other public amusements are repealed. The tax on sales of produce is reduced one-half. The stamp tax on drafts, checks payable otherwise than at sight or on demand, and on promissory notes is repealed. The tax on brokers of produce or merchandise is repealed. The tax on automobiles, trucks, and wagons with chassis selling for $1,000 or less or body selling for less than $200 is removed. The 5 per cent tax on automobile tires, inner-tube parts, and accessories is reduced one-half. Mahjong sets are taxed 10 per cent. The tax on bowling alleys, billiard rooms, and paintings is retained. Slot machines are taxed at 5 per cent. The tax on gifts runs from 1 per cent on gifts of the value of $50,000 to 40 per cent on gifts valued at $10,000,000 or more. This is to prevent gifts being made to evade the estate and other taxes. The taxes on estates of decedents run from 1 per cent on estates valued at $50,000 to 40 per cent on those of $10,000,000 or more. The taxes on playing cards are increased from 8 to 10 cents per pack. There are many other features of improvement over the old law, but I will not undertake to discuss them here.

It must not be overlooked that there were Members of the House and Senate who favored the adoption of the Mellon plan, but they were at all times in the minority.

It was inevitable that Congress could not make this great tax reduction without some disappointments and without criticism and efforts being made to influence its action and misrepresent its purposes. A proposition to reduce taxes appeals to everyone. The large income taxpayers were sorely disappointed that they only got a reduction of about 20 per cent instead of 50 per cent. They are a great power in this country, and the people must not overlook how this power can be quickly concentrated and used to control great newspapers and thereby mold public opinion. Mr. Lincoln saw the danger of this power in his day when it was comparatively weak as compared with to-day when he said:

I see in the near future a crisis arising that unnerves me and causes me to tremble for the safety of my country. As a result of the war corporations have been enthroned, an era of corruption in high places will follow, and the money power of the country will endeavor to prolong its reign by working upon the prejudices of the people until all wealth is aggregated in a few hands and the Republic is destroyed. I feel more anxiety for my country than ever before, even in the midst of the war.

It is no wonder that those who were disappointed will not admit that there is anything good in the new law. It is hard for some people to give up, even when everybody around them knows they are wrong. That is why these selfish interests continue to misrepresent the new law and criticize Congress. The people should not be deceived, these interests will never give up until they can elect a Congress which will enact the kind of an income and sales tax law which at heart they want. This would shift the burden to the shoulders of the producing masses. That is what they mean when they talk about a "scientific law." Beware of such a law. It is a deception.

The argument which they advance that by reducing their taxes the Government will get more taxes from them is inconsistent. It will hardly be believed that they want a law to increase the amount which they will pay to the Government. The other argument that by reducing their taxes others will be benefited is the old argument always advanced by those asking for special favors at the hands of the Government. In this instance the cry was: Reduce the taxes of the few 50 per cent and of the many only 25 per cent. Whatever may be thought of such an argument I am inclined to believe that the average man will conclude that it will do him much more good to actually reduce his taxes rather than leave the burden on him, with the promise that some of the benefits enjoyed by others on account of reduction will in some way trickle down and reach him.

The progressive elements in this Congress have given to the country a law which will reduce taxes on individual and corporation incomes in the sum of $232,000,000, and excise taxes of $56,000,000 this year. The effort to make a political issue against Congress on account of this law is unfair and will react on those who attempt it, because the people will resent such an effort when they learn the truth about its provisions.

### WAR GRAFT PROSECUTIONS

Mr. HOWARD of Nebraska. Mr. Speaker, I take it for granted that every Member of this House wants to make good the pledges of the House. In the RECORD at page 8999 it will be discovered that the House granted special permission for the chairman of the Committee on Appropriations to address the House for five minutes for the purpose of giving to me the name of any one person now in the Federal penitentiary as a result of the $6,000,000 appropriated for the prosecution of war grafters.

Mr. SNELL. Mr. Speaker, I demand the regular order.

Mr. HOWARD of Nebraska. Mr. Speaker, I do not like to be interrupted in that way. [Laughter.]

### WILLIAM S. M'GINNISS

Mr. MACGREGOR. Mr. Speaker, I present the following privileged resolution, which I send to the desk.

The Clerk read as follows:

House Resolution 265

*Resolved*, That the Clerk of the House of Representatives be directed to pay, out of the contingent fund of the House, to the daughter of William S. McGinniss, late bookkeeper of the House of Representatives, a sum equal to six months' salary as bookkeeper, and that the Clerk be further directed to pay out of the contingent fund the expenses of the last illness and funeral of said William S. McGinniss, such expenses not to exceed $250.

Mr. MACGREGOR. Mr. Speaker, I move the adoption of the resolution.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

### SURVEY OF SOLDIERS' HOMES

Mr. JOHNSON of South Dakota. Mr. Speaker, I present a privileged report from the Committee on Rules which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 351

*Resolved*, That the Committee on World War Veterans' Legislation or any subcommittee thereof which its chairman may appoint be, and they are hereby, empowered to make a comprehensive survey and investigation of soldiers' homes, hospitals, and hospital facilities, including any hospital with which the Government has a contract for ex-service men of any war in which the United States was engaged. This shall include the national military homes for disabled volunteer soldiers. The management, administration, personnel of such institutions and treatment of the veterans therein shall be included in such survey and investigation.

Said committee shall make a report of its findings to the House not later than December 31, 1924, accompanied by such recommendations in the form of a bill or otherwise as it may deem necessary.

Said committee or subcommittees are empowered to sit during the sessions of Congress or during the recess between sessions of Congress, and to incur necessary expenses for transportation and subsistence and for clerical and stenographic services, which shall be paid out of the contingent fund of the House upon vouchers signed by the chairman thereof and approved by the Committee on Accounts.

Mr. JOHNSON of South Dakota. Mr. Speaker, the service men of all of the wars are now being placed in different hospitals under different branches of the Government jurisdiction. All that the Veterans' Committee and the Rules Committee desire to do is to make a survey of the hospitals so that we can eventually draft a law and provide for every hospital being conducted under the Veterans' Bureau. This will save money, and it will be of benefit to the men. I wish I had more time to discuss the resolution, but I have not, and to save time I move the previous question.

The SPEAKER. The question is on ordering the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

### CHARGES AGAINST A UNITED STATES JUDGE

Mr. DYER. Mr. Speaker, a parliamentary inquiry?

The SPEAKER. The gentleman will state it.

Mr. DYER. The Judiciary Committee of the House has been authorized by a resolution of the House to make an investigation of certain charges touching the conduct of a judge of the United States court in West Virginia. I desire to know if the committee needs special authority——

The SPEAKER. That is not a parliamentary inquiry.

### WILLIAM H. OVERHUE

Mr. CHINDBLOM. Mr. Speaker, I ask unanimous consent to proceed for one minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. CHINDBLOM. Mr. Speaker and gentlemen of the House, I have asked for this one minute in order to pay a

short tribute to a gentleman who was a servant of this House for many years. He came here in the year 1909 and was introduced to service here by the Hon. Joseph G. Cannon, one of the most distinguished Members who ever served in this House. During the last few years this gentleman was the enrolling clerk of the House. I refer to Mr. William H. Overhue, who passed away on the 11th day of April last during the present session. I ask unanimous consent to extend my remarks in the RECORD briefly by making a few observations upon his life and character.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the manner indicated. Is there objection?

There was no objection.

Mr. CHINDBLOM. Mr. Speaker, I have asked for this moment of the time of the House for the purpose of paying a brief tribute to a faithful servant of the House and a valued personal friend, whose memory, I know, is cherished by many other Members with myself. I refer to our late enrolling clerk, Mr. William H. Overhue, who passed away at the National Capital on April 11 last. He first came here and entered the service of the House 15 years ago through the intervention of one of the most distinguished Members who ever sat in this House, the Hon. Joseph G. Cannon, of Illinois. Mr. Overhue's home was at Sheldon, Ill., but he was also well known in Chicago and many other places in our State. After serving in the House in various capacities from 1909 to 1911, he retired to private business, but with the return of Republican control he was appointed assistant enrolling clerk in 1919, and soon thereafter succeeded to the position of enrolling clerk, which he held at the time of his death.

Mr. Overhue was of an exceptionally genial and kindly nature and was notably high-minded and high-purposed in every contact with his fellow men. In his public service he stood out as efficient and attentive to duty, always ready and anxious not only to perform the things actually required of him, but as well to be accommodating and helpful beyond the letter of his commission. The House, in his death, lost an exemplary employee and his friends a loyal and delightful companion. We grieve at his passing and extend our sympathy to his sorrowing widow and other members of his family.

MUSCLE SHOALS

Mr. ALMON. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. ALMON. Mr. Speaker, friends, and colleagues, I have asked for this three minutes' time just before the House adjourns to extend to each and every one of you a most cordial invitation to visit Muscle Shoals during the vacation. [Applause.] Come down and see the biggest dam and the largest munitions and fertilizer plant in the world. Come regardless of how you voted on the Ford offer. All that some of you know about southern hospitality and the beauty and charm of our southern women is what you have heard. Come down and get first-hand information; partake of our hospitality and see our beautiful women. Come and enjoy a real southern barbecue, watermelons, and such good things. [Applause.]

Some of you may be asked when you go back home about the Ford offer. Tell them that all other offers have been rejected. That two reports have been made by the Agricultural Committee of the Senate. One by Senator NORRIS, providing for Government operation of Muscle Shoals, and the other by Senator LADD, favoring the acceptance of the Ford offer. A definite time, namely, December 3, has been set to take up, discuss, and dispose of this question. A clean-cut issue has now been made. That is, whether we shall have Government operation as provided by the Norris amendment, or private operation by the acceptance of the Ford offer as provided in the McKenzie bill which passed the House by an overwhelming majority on the 10th day of March. Get the reports and study them during vacation.

I not only want you to come to Muscle Shoals, but I want you to be a guest in my home when you come. The latchstring of the Almon home hangs on the outside. I want you all to come, but not at the same time. [Applause and laughter.]

Mr. OLIVER of Alabama. Mr. Speaker, I ask permission to address the House for one minute.

The SPEAKER. The gentleman from Alabama asks permission to address the House for one minute. Is there objection? [After a pause.] The Chair hears none.

Mr. OLIVER of Alabama. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on Muscle Shoals and to insert the minority report of the Senate Agricultural Committee relating thereto.

The SPEAKER. Is there objection. [After a pause.] The Chair hears none.

Mr. OLIVER of Alabama. Mr. Speaker, under permission to extend my remarks on Muscle Shoals, I desire to present some record facts relating to the sale of the Gorgas steam plant which will, I fell certain, refute the vitrolic and unjustified attack made on the President in the majority report of the Senate Committee on Agriculture and Forestry in reporting out H. R. 518, which is now on the calendar of the Senate and to be taken up under unanimous-consent order on December 3, 1924.

I am intimately acquainted with all of the facts relating to the sale of the Gorgas steam plant, and my purpose, Mr. Speaker, in setting forth these facts is not so much to exonerate the President from the attacks made in the majority report of the Senate Agricultural Committee as it is to point out to the Members of the House what sound business common sense and dependable good judgment was exhibited by the chairman of the Committee on Appropriations of the House in proposing a substitute steam plant after the sale of Gorgas to the Alabama Power Co. by the Secretary of War without authorization by Congress.

ATTACK ON PRESIDENT CONDEMNED BY THE PRESS

Touching the aspersions and unfair attack upon the President found in the majority report of the Senate Committee on Agriculture and Forestry I freely concede that the President needs no defense by me. It is true that we find in the newspaper press such statements as the following, quoted from the Boston Morning Globe of June 15:

Then there is Senator NORRIS's report on Muscle Shoals made to the Senate within a few days of adjournment, in which he savagely assails the Ford offer and President Coolidge for advocating it and is warmly commended in LA FOLLETTE'S platform for doing so. Mr. NORRIS thinks it suspicious that so harsh a critic of the administration as Mr. Ford was last fall, especially after the sale of the Gorgas power plant, should change to one of its warmest admirers after it had been intimated that another power plant might be built by the Government and that the administration approved Mr. Ford's offer.

It is also true, Mr. Speaker, that we find that all editorial comments in the daily papers of the country condemn the shockingly unwarranted intimation that either the President suggested the building of the steam plant as a substitute for Gorgas or that Mr. Ford ever requested such a plant to be built. The decision that such a substitute steam plant should be built by the Government did not originate with the President or with Henry Ford, but found its original conception in the mind of the able chairman of the Appropriations Committee of this House, Mr. MADDEN, of Illinois.

FORD'S POSITION ON GORGAS

In order to understand the effect of the sale of Gorgas on the Ford offer we must not forget Mr. Ford's letter to Hon. JULIUS KAHN, chairman of the Committee on Military Affairs of the House, written May 31, 1922, and as Mr. Ford in this letter definitely stated that he could not consent to eliminate the Gorgas steam plant from his offer, because he said "it is necessary to the economical operation of the Muscle Shoals properties," I include the letter in full, as follows:

MAY 31, 1922.

Hon. JULIUS KAHN,

*Chairman Committee on Military Affairs,*

*House of Representatives, Washington, D. C.*

MY DEAR CONGRESSMAN: I have carefully examined the amendments made by your committee to my proposal dated January 25, 1922, for the lease and purchase of the Government's Muscle Shoals properties, and observe with surprise and regret that you have rejected that part of the modified proposal relating to the Government's Gorgas steam plant.

The greater portion of the other changes suggested by your committee have been approved and are incorporated in the accompanying corrected proposal. More than a month ago Mr. Mayo presented to me certain clarifications in the proposal of January 25 to which your committee desired my agreement, which was promptly given. Mr. Mayo explained that while some of your committee were unwilling to accept that part of my offer which included the Government steam power plant at Gorgas, certain other members of the committee had requested him to ascertain if I would agree to accept an assignment and transfer by the United States of everything now owned by the Government at Gorgas under its contract of December 1, 1917, with the Alabama Power Co., to which I assented, and Mr. Mayo was instructed to advise your committee that the offer would be revised

accordingly. I have been informed that this revision was accepted by your committee, but later, upon reconsideration, you decided to eliminate the Gorgas plant.

I can not consent to eliminate the Gorgas plant, because it is necessary to the economical operation of the Muscle Shoals properties. If my revised offer for Gorgas is rejected, then I must understand that the acceptance of my offer for Muscle Shoals "as a whole and not in part" is refused.

I am sending a final proposal containing all the amendments suggested by the committee to which I can consistently agree. In doing so, and in view of the fact that my first proposal was signed July 8, 1921, nearly a year ago, and in order to bring these negotiations to a close, I ask that your committee consider this proposal as final, and that no further changes should be expected. I further request that your committee send this final offer to the House so that its Members may vote for acceptance or rejection. This request is made with the understanding that power to dispose of the plants at Muscle Shoals is vested in the Congress. If the Secretary of War after his negotiations relative to the first offer did not have the power to accept or reject it, you will probably agree that your committee has not the power to accept or reject. Moreover, I do not believe that your committee or any member of it wishes to assume the responsibility of accepting or rejecting this final proposal, involving as it does a matter of such great national importance.

If Congress votes acceptance of my offer, we will get on the job at Muscle Shoals at once; but if Congress rejects it, that will be but the beginning of a more determined effort on my part to save Muscle Shoals for the benefit of the public.

I wish to thank you and each member of the committee for the courtesies shown my representatives during the negotiations of the past three months.

Very truly yours,

HENRY FORD.

Mr. Speaker, no Member of the House who was even superficially informed with reference to the important and extended hearings by the Committee on Military Affairs on the Ford offer felt any further doubt of any sort about Mr. Ford's position touching Gorgas, and no Member of the House with any information upon the subject of the hearings before the Military Committee after reading Mr. Ford's letter believed that if Mr. Ford's offer was to be accepted that Gorgas could be eliminated. Mr. Ford's letter to Chairman KAHN settled that matter.

NEED FOR SUBSTITUTE STEAM PLANT FIRST RECOGNIZED BY MR. MADDEN

Also, Mr. Speaker, no Member of the House recognizing and admiring, as every Member of the House does, the ability, integrity, and devotion of the chairman of the Appropriations Committee in protecting the taxpayers of the country against wasteful expenditures of Treasury funds, felt any surprise whatever that Mr. MADDEN immediately after the sale of the Gorgas plant addressed himself to the question of the substitution of a steam plant to replace the sale of Gorgas to the Alabama Power Co. Mr. MADDEN, always consistent, sound, reasonable, and clear-headed, realized as every other thinking Member of the House did that when Gorgas was sold then Mr. Ford's statement in his letter to Chairman KAHN of May 31, 1922, had to be met.

The absolute need for an auxiliary steam plant such as Gorgas in the operation of the Muscle Shoals plants is well stated in an editorial appearing in the St. Paul News September 13, 1923, as follows:

STILL JUGGLING THE SHOALS

Washington dispatches still agree that Secretary Weeks will probably continue to oppose the Ford offer for Muscle Shoals, even though the latter should eliminate the Gorgas plant from the properties bid for. It is evidently the Secretary's purpose to turn the power development over to the Alabama Power Co., if he can possibly do so, for he is reported as saying that the Government would receive more benefit from the distribution of current through the medium of a transmission company. It all depends on what one regards as a benefit to the Government. There are many equally able thinkers who believe that it would be more to the public advantage to have a nitrate plant in constant readiness to produce explosives when needed than to sacrifice this important feature of the war-time development at Muscle Shoals. Unlike the power company's bid, Ford's plan contemplates the production of fertilizer and the keeping of the plant in condition to turn out explosives on short notice and in quantity. Naturally, if the plant is kept in operation, its formulæ, methods, and equipment will keep pace with the general progress in this line of manufacture. As Secretary of War this factor should appeal to Mr. Weeks. That it does not appear to is no compliment to his sagacity.

The Washington dispatches err in saying that on the completion of the Wilson dam the Gorgas plant would be of no further use to Mr. Ford. On the contrary, the Gorgas plant would be of little use to Mr. Ford until the dam is completed. The Gorgas plant is a small steam plant located near a coal mine 91 miles from the nitrate plant, and was regarded as necessary to supply auxiliary power at Muscle Shoals when the water flow is lower than normal. The Gorgas plant is needed by Mr. Ford for the same reason that the Alabama Power Co. wants it, namely, to take up the slack during periods of diminished flow, for diminished flow means also diminished power development at the hydroelectric stations. The argument that the Government already has a much larger steam plant at Muscle Shoals, which makes the smaller plant unnecessary, is not valid, because it would not pay to operate the large plant to supply just a few thousand horsepower daily. The smaller Gorgas plant, however, would supply this small power efficiently, thence on up to its capacity. Beyond the capacity of the smaller plant the large steam plant would furnish a maximum equivalent of 90,000 horsepower. Let nobody be misled by the statement that the Gorgas plant is merely a subject for academic discussion. The Government itself has removed all argument as to the close association between Gorgas and Muscle Shoals by its earnest efforts during the war to have this plant enlarged and in readiness for service in time of need in conjunction with hydroelectric development in Muscle Shoals.

No one who has ever read the memorable address of Mr. MADDEN to the House on Muscle Shoals February 3, 1923, will be surprised that he was at once moved after the sale of Gorgas to find a remedy for the situation presented to the House and to discover a way that the House could, if it elected to do so, accept the Ford offer, since, in view of Mr. Ford's statement in his letter to Chairman KAHN and Gorgas having been sold, the House could not accept his offer without substituting a steam plant in the place of Gorgas.

SOLUTION OF GORGAS TANGLE A MATTER FOR CONGRESS ALONE

Gorgas having been sold by the Secretary of War and its sale to the Alabama Power Co. approved by the President, the problem and the difficulty brought about by this sale was a difficulty and a problem to be solved by Congress, not by the President, not by the Secretary of War, not by Mr. Ford.

It is understood, and perhaps true, that the President did say that he would be willing to credit Mr. Ford's offer of $5,000,000 for the nitrate plants and Gorgas with the amount the Government was to receive for Gorgas from the Alabama Power Co. That suggestion, however, was no solution of the problem before the House, for Mr. Ford had never intimated that he would accept the amount the Alabama Power Co. was paying for Gorgas as a substitute.

MR. FORD ACCEPTED THE STEAM-PLANT SUBSTITUTE PROPOSED BY MR. MADDEN

The keen business mind of Mr. MADDEN was quick to grasp the situation, and we who know the chairman can readily imagine that he concluded that Mr. Ford could not refuse the proposition that the Government construct a new steam plant of equal capacity as a substitute for Gorgas. Subsequent events disclose how accurate Mr. MADDEN's decision was, because Mr. Ford notified the Committee on Military Affairs on January 18, 1924, during the hearings before that committee, that the substitute steam plant proposed by Mr. MADDEN would be satisfactory to him. It is well to remember in this connection, as shown by the records of the House Committee on Military Affairs, that Henry Ford was not officially consulted with or advised with, nor was any representative of his consulted with or advised with, touching the Madden substitute steam plant until Chairman KAHN, of the House Committee on Military Affairs, telegraphed to Mr. Ford during the hearings by that committee, in answer to which Mr. Ford replied on January 18, 1924, as follows:

Our offer for Muscle Shoals still stands. The McKenzie bill, with the Madden amendment as printed in the Madden bill, is satisfactory with the following suggested amendments of section 19, page 17, beginning at line 5 of the Madden bill: "A suitable site for a steam-power plant, to be located at or near Lock and Dam No. 17, Black Warrior River, Ala., or upon a site to be mutually agreed upon by the Government and Mr. Henry Ford, together with a strip of land 100 feet wide to serve as a right of way for transmission and transportation purposes between Dam No. 17, Black Warrior River, or a site to be agreed upon between the Government and Mr. Henry Ford, and nitrate plant No. 2, Muscle Shoals, Ala., with connection to Waco Quarry, near Russellville, Ala."; remainder of section as appears in bill.

MR. MADDEN VIEWED SITUATION FROM ANGLE OF FUTURE GOVERNMENT APPROPRIATIONS

We can also imagine that the able chairman of the Appropriations Committee of the House did not have so much in mind the $3,472,487.25 which the Government had received for Gorgas as he did the amount of $59,000,000 necessary to be expended at

Muscle Shoals to put the plants into operating condition if operation by the Government should be adopted, as well as the additional amounts to be expended to complete Dam No. 2 and to build Dam No. 3, and so forth; in other words, whether it was going to be necessary, as he had stated in his speech to the House on February 3, 1923, "to sink another $100,000,000 into this Muscle Shoals project."

Let us briefly trace the facts relating to the sale of the Gorgas steam plant:

SALE OF GORGAS WAS UNAUTHORIZED AND UNNECESSARY

The sale of the Gorgas steam plant to the Alabama Power Co. by the Secretary of War was closed on September 24, 1923, for the sum of $3,472,487.25, this sale being without the approval of Congress and not required by the Government's contract with the Alabama Power Co., as is shown by statement attached hereto, marked "Exhibit A," which I prepared and issued on October 8, 1923. I invite special attention to this statement, because in my belief the unauthorized and unnecessary sale of the Gorgas steam plant bears earmarks of having been intended to cripple and perhaps force a withdrawal of the Ford offer in view of Mr. Ford's letter to Chairman KAHN of May 31, 1922, hereinabove quoted. The statement of October 8, 1923, issued by me, also expressly exonerates the President from all knowledge at the time he approved the sale of the fact that the sale was irregular and not required by the Government's contract with the Alabama Power Co.

Those of us who understand and appreciate the orderly and constructive processes of mind usually displayed by Mr. MADDEN were not surprised to find, as published in the Washington Star of November 5, 1923, that he had called on the President and outlined a plan for the Government to build a new steam plant as a substitute for Gorgas, with a new power transmission line from the proposed steam plant on the Warrior River to Muscle Shoals.

THE PRESIDENT INDORSED THE PLAN PROPOSED BY MR. MADDEN

On November 24, 1923, it was published in Washington papers that the President was in accord with the plan of Mr. MADDEN for replacing the Gorgas power unit at Muscle Shoals, and in the Washington Star of November 24 we find the following:

White House officials in presenting this statement of the Chief Executive's view asserted that the President and Representative MADDEN were working in harmony in the matter of this legislation.

Now, bear in mind, Mr. Speaker—and I emphasize this upon the attention of each Member of the House—that Mr. Ford did not have his conference with the President until December 3, and Mr. Ford's announcement in support of President Coolidge did not occur until January 19, 1924, long after these decisions by Chairman MADDEN as to the substitute steam plant. It is also to be noted that the only action taken by the President was in approving the proposal of Mr. MADDEN, as chairman of the Appropriations Committee, for action to be taken by Congress.

THE HOUSE BY SEPARATE VOTE ACCEPTED SUBSTITUTE STEAM-PLANT PROVISION

Nobody acquainted with the constructive legislative methods of Mr. MADDEN will imagine for one moment that he wasted any time in arriving at his conclusions, or that he hesitated in deciding that he would propose to the House that a substitute steam plant for Gorgas be authorized, with the Government's expenditure for same limited to the amount received from the Alabama Power Co. for Gorgas, namely, $3,472,487.25. Mr. MADDEN neither hesitated nor delayed, for on the opening day of Congress, December 5, 1923, he introduced a bill (H. R. 8) authorizing the acceptance of Henry Ford's offer and providing for the authorization of the construction by the Government of the steam plant to replace the sale of the Gorgas steam plant.

As stated above, Chairman MADDEN in his decision to include in his bill for the acceptance of the Ford offer the provision for the substitute steam plant—which bill finally became the McKenzie bill as passed (H. R. 518)—did not consult Mr. Ford nor anybody representing Mr. Ford. He acted on his own judgment, and this House, casting a separate vote on the provision in the McKenzie bill providing for a substitute steam plant, indorsed his action by adopting the provision on March 10, 1924, by a vote of 229 to 138.

THE HOUSE VOTE IGNORED BY MAJORITY REPORT OF SENATE COMMITTEE

Mr. Speaker, it is significant that no reference in the majority report of the Senate Committee on Agriculture and Forestry is made to the important fact that the House of Representatives by a majority vote of 229 to 138 indorsed both the President's and Chairman MADDEN's position with respect to the substitution of a steam plant in the place of Gorgas, and it is not a remote surmise that this omission may have been due to the fact that it was not suitable to the purposes and not helpful to the intentions of the drafter of the majority report. The majority members of the Senate Committee on Agriculture and Forestry in their report possibly overlooked the House vote, so pregnant with meaning, or at least they were strangely silent on the subject, and it possibly escaped the attention of this same majority that the attack in the majority report on the President shot over the President's head and first hit the head of Mr. MADDEN, the chairman of the Appropriations Committee of this House, and the shot then ricocheted and hit the heads of 229 Members of the House who indorsed the substitution of a steam plant for Gorgas, as proposed by Mr. MADDEN and approved by the President.

I know not, Mr. Speaker, what answer others will make to the attack on the President found in the majority report of the Senate Committee on Agriculture and Forestry, but I am willing that the country take the vote of 229 Members of this House as an answer to the majority report of the Senate committee.

MINORITY REPORT BY SENATOR LADD IS CLEAR STATEMENT OF FACTS

The action of the House in accepting the Ford offer, which includes the substitution of a steam plant for Gorgas, is so well stated by Senator LADD, of North Dakota, in his minority report for himself; Senator SMITH, of South Carolina; Senator HARRISON, of Mississippi; Senator HEFLIN, of Alabama; and Senator CARAWAY, of Arkansas, that under leave of the House I set out the minority report from the Senate Committee on Agriculture and Forestry in full as Exhibit B hereto, and I invite its careful reading by every Member of the House.

A careful reading of this minority report will show that to denounce the President of the United States and defame him will not be accepted by the people of the country as either a sound or sane way of dealing with the merits of the Ford offer for Muscle Shoals, and that mere raillery against the Ford offer can not be substituted for reason.

So much erroneous propaganda and so many inaccurate and misleading statements have been circulated through the public press about the Ford offer that it becomes the duty of every Member of the House who voted for the acceptance of the Ford offer to see that the facts so fully and accurately stated in the Ladd report are placed before the public. I have no misgivings whatever as to the verdict of a fair-minded public on the action of the House in accepting the Ford offer if this public will only inform themselves of the facts.

CONCLUSION

In conclusion I challenge anyone to successfully refute from a business standpoint the action of the House in passing the McKenzie bill and its indorsement by the Ladd report (Exhibit B); and I confidently assert that no one will even attempt to deny the correctness of the record facts in my statement issued October 8, 1923, as to the sale of the Gorgas plant (Exhibit A). I therefore urge the fair-minded public to read these two documents.

---

EXHIBIT A

THE FACTS AS TO THE SALE OF THE GORGAS STEAM PLANT

[Issued by Hon. WILLIAM B. OLIVER, October 8, 1923]

Hon. WILLIAM B. OLIVER, Representative from Alabama, states the following as to the facts and his findings in reference to the sale to the Alabama Power Co. by Secretary of War Weeks, on September 24, 1923, of the Gorgas auxiliary steam plant on the Warrior River and the transmission line from Gorgas to Muscle Shoals, which constitutes a part of the property included in Mr. Ford's offer for Muscle Shoals dated July 8, 1921.

POWER TO DISPOSE OF THIS PROPERTY WAS VESTED IN CONGRESS

Secretary Weeks in transmitting the Ford offer to Congress on February 1, 1922, said that when a proposal was made which would assure the Government a reasonable return on at least the additional money required to complete the Muscle Shoals project and an effective use of the development for commercial purposes, "I would send it to Congress, as the power to dispose of these plants is vested in that branch of the Government."

From the time the offer was submitted until Congress adjourned in March last no one questioned the correctness of Mr. Weeks's statement that the power to dispose of this property was vested in Congress. Mr. Weeks, the Judge Advocate General of the Army, and Members of Congress seemed to unite in recognizing that Congress alone had the right to dispose of this property. The Attorney General in a written opinion to the Secretary of War held that the contract between the Government and the Alabama Power Co. in reference to the Gorgas plant and transmission line created no valid obligation on the part of the Government to sell this property to the Alabama Power Co.

LAST CONGRESS STRONG FOR FORD OFFER

The supporters of the Ford offer in the last Congress were not confined to any section or to any party, and had Congress been given an opportunity to vote on the offer, I think the offer would have been accepted by a safe majority; in fact, it was this belief that doubtless kept "the few," clothed with too much authority under the rules of the last House, from allowing the offer to be voted on.

Since the adjournment of the last Congress the Ford offer has continued to be a matter of large public interest, and it was generally understood that it would be among the first matters taken up by the next Congress, not in a partisan way but as an outstanding national question commanding strong support from the leaders of both parties.

THE FACTS OF WHICH MR. FORD "DID NOT KNOW"—THE NOTICE SERVED BY THE ALABAMA POWER CO. ON THE GOVERNMENT TO REMOVE GORGAS PROPERTY

Now we find that, almost on the eve of the assembling of the new Congress, the public, Mr. Ford, and Members of Congress have just learned for the first time of certain action taken by the Alabama Power Co. soon after the adjournment of Congress in March last, to wit: That on April 4, 1923, the Alabama Power Co. served a notice on an official of the War Department, demanding that the Government remove the Gorgas plant and transmission line from the land of the power company within six months from that date, unless the Government sold the property to the power company within three months from the said date, the power company claiming that it had the right to give this notice under a provision of the original contract entered into with the Government for the construction of this plant and transmission line, in which contract it was stipulated that this notice could be given if the Government after 24 months failed to take current from the Alabama Power Co. over the Government transmission line connecting the Gorgas plant with the Muscle Shoals properties of the Government. As evidence that this condition had been broken, the power company cited a notice given by the Secretary of War in 1919 discontinuing the taking of current after June 30, 1919, and the power company claimed that this default to take current continued for two years next following June 30, 1919. (In order that the facts hereinafter recited may be understood, it is important to bear in mind that the provision of the contract authorizing the notice to be given by the power company is predicated on the failure of the Government to "take any energy from the Warrior extension," etc.)

The date fixed for the removal of the Government property, if not sold to the power company, as stipulated in the April notice, seems to have been extended to September 24, 1923, on which date the Secretary of War sold the property to the Alabama Power Co., pursuant to an evident previous understanding, since all papers necessary to the transaction had been prepared prior thereto.

The only facts which the Attorney General, Mr. Ford, the public, and the President, it is believed, had knowledge of in reference to this transaction, prior to the sale of the property on September 24, 1923, were those now found to be set out within the four corners of three papers, all bearing date since the adjournment of the last Congress, namely, the notice of the Alabama Power Co. dated April 4, 1923, the letter from Secretary Weeks to the Attorney General dated July 21, 1923, and the opinion of the Attorney General dated August 24, 1923, given in response to Secretary Weeks's letter and predicated alone on the facts set out in the letter.

THE OPINION OF THE ATTORNEY GENERAL REQUESTED BY SECRETARY WEEKS

The power company, in its April notice, bases its right to give such notice on the Government's default to take current and which default it is claimed was complete on July 1, 1921. The letter from Secretary Weeks to the Attorney General, dated July 21, 1923, not only acquiesces in but affirms the existence of the default as set out in the power company's notice, and further assumes that the Secretary of War had authority to sell the Gorgas steam plant and transmission line without further authorization by Congress, and on these assumptions the Secretary of War merely requests of the Attorney General an opinion (quoting the last paragraph of his letter) on the following question:

> "In view of the notice given I request your opinion whether the Government, having no title to the land upon which either the transmission line or the Warrior extension or the Warrior substation is built, and the option provisions of the contract being invalid, as stated in the former opinion, in event the United States should not determine to sell the property to the Alabama Power Co. under the general authority vested in the Secretary of War within the time fixed by the notice as extended, it will be the duty of the United States to comply with the provision of the contract with reference to removal."

The part of the Attorney General's opinion answering the question above quoted from the Secretary of War's letter is in the following terse and significant language, to wit:

> "If, therefore, you look to the contract alone, your question must be answered in the affirmative."

THE SECRETARY OF WAR COULD HAVE CONDEMNED THE LAND

Immediately following the above strikingly succinct and unique reply to the Secretary's question, the Attorney General goes out of his way to add a concluding paragraph to his opinion, in which he states that he deems it proper to say that this contract (referring to the Government's original contract with the Alabama Power Co.) does not control the relations of the United States to the Alabama Power Co. and the properties with which the contract deals, and he then calls Mr. Weeks's attention to the fact that as Secretary of War he is fully authorized by an act of April 18, 1918, amendatory of an earlier act, to condemn the property of the Alabama Power Co. on which are located the Gorgas plant and transmission line, and that nothing in the contract of the Alabama Power Co. with the Government precludes in the slightest the exercise of this right by the Secretary of War.

In this connection it is interesting to recall a heated Senate discussion in January, 1921, between Senator UNDERWOOD and Senator LENROOT, in which, when Senator LENROOT called attention to the fact that the Gorgas plant and transmission line were located on the lands of the Alabama Power Co., Senator UNDERWOOD sharply replied in the following language:

> "I do not know about the title to the land, but the Government can condemn that land in an hour if it wants and operate its plant, which it should do. I do not know whether the Government acquired the title or not. I have always assumed that it did. But if it did not, it can acquire that title by condemnation under existing law, and it ought to do it."

The Attorney General now goes out of his way to suggest to the Secretary of War in his recent written opinion that he has authority to do what Senator UNDERWOOD in January, 1921, said in the Senate should be done.

The president of the Alabama Power Co., a few days after this discussion, sent a wire to Senator UNDERWOOD thanking him for his speech—a speech, mark you, made in defense of Senator LENROOT's attack on the power company, in which Senator LENROOT had charged that the Alabama Power Co. would be the chief beneficiary of any further expenditures by the Government at Muscle Shoals, and to which Senator UNDERWOOD replied by assuring the Senate that the Alabama Power Co. was not and would not be interested in the power developed at Muscle Shoals. The Senate discussion in January, 1921, and the wire of the president of the Alabama Power Co. to Senator UNDERWOOD are very apropos and interesting in the light of subsequent activities of the power company as to the Muscle Shoals properties—the Gorgas steam plant and transmission line.

THE PRESIDENT AND THE ATTORNEY GENERAL WERE NOT GIVEN ALL THE FACTS

Please pardon this digression as to the Senate discussion, if such it be, and now getting back to the Attorney General's answer to Secretary Weeks's question in the letter of July 21, 1923, it will be noted that the only facts made known to the Attorney General and on which my opinion was asked were those set out in the April notice of the Alabama Power Co. and Secretary Weeks's letter of July 21, 1923. Before the sale was consummated on September 24, it is believed that the President had no knowledge of any facts further than such as are set out in the April notice of the power company, in the July 21 letter from the Secretary of War, and in the August opinion of the Attorney General.

Now, since the Secretary of War in his letter of July 21, 1923, clearly indicated that even though he had authority to sell this Government property located on the land of the power company, and in subsequent conversations with Representative OLIVER and others stated that he would not think of exercising the right to sell this property without the approval of Congress except for this notice given by the Alabama Power Co. in April, 1923, it now becomes very important to inquire whether the notice from the Alabama Power Co. and the letter from Secretary Weeks dated July 21, 1923, transmitting this notice to the Attorney General, set forth all material facts that should have been made known to the Attorney General before calling for an answer to the question whether the notice given by the Alabama Power Co. had any legal effect or imposed any obligation on the Government to take action as to property located on the land of the power company.

Unquestionably there were facts on file in the War Department which were well known to the Secretary when he wrote the letter to the Attorney General on July 21, 1923, and later expressly called by Representative OLIVER to the Secretary's attention on September 24, 1923, before the sale of the Gorgas plant and transmission line was finally consummated—this being Mr. OLIVER'S first opportunity of communicating these facts to the Secretary after learning of them on Saturday evening, September 22. The Secretary of War on September 24, before the sale was concluded, was urged to refer these very material facts to the Attorney General, and was told that, if referred, there could be no question but that the Attorney General would hold that the Alabama Power Co. had no legal right to give the April notice and that the notice so given was without any legal effect whatever.

A simple recital of the facts will convince not only any lawyer but any fair business man that there were withheld from the Attorney General vital facts known to the War Department when Secretary Weeks, by letter dated July 21, 1923, called for the opinion on which he now alone predicates and seeks to justify this recent sale to the Alabama Power Co.

GOVERNMENT HAD CONTRACTS FOR POWER TO BE FURNISHED BY ALABAMA POWER CO. WITH THESE FACILITIES

The Alabama Power Co., after the default occurred, as it alleges, in July, 1921, entered into a written contract with the Government, whereby it was obligated to furnish current to the Government at Muscle Shoals, and by the terms of this contract it was stipulated that the power company should use the Government-owned property located on the power company's land for the purpose of carrying out the contract, it being recognized that only by the use of this Government property could the power company supply the current it was obligated to supply at Muscle Shoals. This contract was first made in 1921, was renewed on June 30, 1922, for 12 months, and was again renewed on June 30, 1923, to June 30, 1924, with the stipulation that the Government should have the right of yearly renewals thereafter. These renewals were in the form of new contracts, setting out in extenso all terms and conditions, and made revocable only at the instance of the Government on 30 days' notice. The contract provided that if the power company failed to supply current the Government could utilize such property of the power company as was located on the Government land for that purpose. Under this contract the amount paid to the power company for some months has been considerable, and the Government is required to take a minimum amount of current and pay a certain minimum sum monthly whether any current is used or not.

Here, then, we find on file in the War Department a direct obligation in writing, based on a valuable consideration, whereby the power company is obligated to use this Government-owned property, located on the power company's land, for the purpose of supplying current to the Government up to and including June 30, 1924, this contract being in full force prior to, during, and since April 4, 1923, and the Government has been regularly taking and paying for current under this contract with the power company since the contract was first made.

Now, in reference to the claim of the power company, as set out in the April, 1923, notice that the Government had taken no current from the power company for the two years next following July 1, 1919, the records of the War Department in the Ordnance Office contradict this statement flatly and show that the Government had been regularly taking current from the power company prior to July, 1921, and for the 12 months next preceding July 1, 1921, had paid to the power company the sum of $73,461.72, representing an average monthly payment of more than $6,000.

ALABAMA POWER CO. HAD LEASES ON STEAM PLANTS OF GOVERNMENT, NECESSITATING USE OF GORGAS TRANSMISSION LINE

As bearing on the good faith of the power company in giving the April notice to the Government to remove the Government's property, unless the said property was sold to the power company, it may be interesting to note two leases of Government steam plants made by the power company and which were in force before, on, and since September 24, 1923.

The power company prior to April, 1923, leased from the Government its steam power plant at Muscle Shoals for the purpose of supplying what, on its application for the lease, were stated as urgent emergency needs in Georgia, North Carolina, and South Carolina, and was given full right to use the Gorgas transmission line and other accessories in connection with the power plant at Muscle Shoals to carry out these purposes. The power company agreed to pay the Government $10,000 a month for the use of this property, and this lease does not expire before December, 1923. The Secretary of War recites in the lease that it was for the public good that the lease be executed in order that emergency business demands in the States of Georgia, North Carolina, and South Carolina could be supplied with current.

The power company had prior to September 24, 1923, and still has under lease, the transformer and Waco transmission line of the Government, with the right to use the Gorgas transmission line and accessories thereto in supplying current to its customers. This last lease was recently made the basis of an application for a permit of convenience and necessity before the Alabama Public Service Commission for authority to expend approximately a million dollars by the power company in preparing to supply current to the Sloss Iron & Steel Co. and other patrons in northern Alabama.

The power company, it will thus be seen, had this property of the Government under lease, with full right to use and operate the same, and was under obligation to use and operate the same not only for the purpose of supplying current to the Government but also for the purpose of supplying current to its general customers. If the Government, pursuant to the notice of the power company given in April, had removed the Gorgas plant and transmission line from the land of the power company, the power company thus would have been violating a solemn obligation which it had with its customers to supply current by means of this very property. These two leases are referred to merely for the purpose of showing lack of good faith on the part of the power company in giving the notice in question.

As bearing on the question of this good faith in giving the notice, it would be interesting to ascertain the amount that the power company has paid the Government for the use of the Government property, thus showing the profitable use that the power company has made of same.

GOVERNMENT WAS TAKING AND PAYING FOR POWER

It is inconceivable for a moment that the Attorney General would have answered the Secretary's question in the affirmative had he been informed that the Alabama Power Co. subsequent to the alleged default on the part of the Government to take current after July, 1919, made with the Government a further contract in writing whereby for a valuable consideration the power company agreed to supply current to the Government at Muscle Shoals by means of the use of Government property located on the power company's land, and under such contract was in fact supplying current to the Government by means of this Government property prior to April, in April, and since April, and was and is still under obligation to continue supplying it by this means until June 30, 1924.

It is further inconceivable that the Attorney General would have answered the Secretary's question in the affirmative had he been informed that the Government prior to July, 1921, had been regularly taking and paying for current from the Alabama Power Co. and that for 12 months next preceding July, 1921, the Government had paid the power company on an average of more than $6,000 a month for current transmitted over the Gorgas transmission line.

Neither the Attorney General nor the President were informed of the above material and vital facts before the sale was consummated.

CONCLUDING QUERY

Do not the facts hereinabove recited well illustrate the devious ways and tricks not infrequently employed by selfish interests to defeat a fair consideration of wholesome legislation in the hope that valuable Government property may ultimately be exploited for selfish gain?

EXHIBIT B

[Senate Report 678, part 2, Sixty-Eighth Congress, first session]

MUSCLE SHOALS

Mr. E. F. LADD (for himself and Messrs. E. D. SMITH, PAT HARRISON, J. THOMAS HEFLIN, T. H. CARAWAY), from the Committee on Agriculture and Forestry, submitted the following views to accompany H. R. 518:

The undersigned members of the Committee on Agriculture and Forestry have long been convinced that the public interest will best be served by the acceptance of the offer of Henry Ford for Muscle Shoals. The extended hearings which have been held by our committee on the various offers have merely added strength to our conviction. The summary of his offer is as follows:

SUMMARY OF FORD OFFER

1. He completes Dam No. 2 and builds Dam No. 3 as rapidly as possible at cost and without profit subject to the approval of the Chief of Engineers.

2. He leases both dams and manufactures commercial fertilizers in accordance with the demand, but he must produce annually at least the equivalent of 250,000 tons of Chilean nitrate, either mixed with other fertilizers (phosphoric acid or potash) or unmixed. This is enough for 2,000,000 tons of 2–8–2 fertilizer.

The present demand is for about three and one-half times as much phosphoric acid as nitrogen, and his obligation requires at least 257,000 horsepower continually throughout the year, or its equivalent, although the power dependable throughout the year at both dams is only 240,000 horsepower, including the steam plants. He must improve some of the irregular and unreliable power that is available for only a part of the year in order to carry out his minimum obligations as to fertilizer. There would be only 326,000 dependable all-year horsepower after storage dams in the upper tributaries of the Tennessee River have been built.

Witnesses all agreed that the price of commercial fertilizers to the farmers can be reduced one-half at Muscle Shoals, so Mr. Ford probably could not supply the entire demand, but he would have to do so at Muscle Shoals to the extent of his reasonable ability. Possibly a ton of fertilizer may be produced with less power than is now required. Then Mr. Ford could supply a greater portion of the demand from Muscle Shoals than otherwise.

3. He agrees to a policy of regulation by the consumer through a board of nine voting members, seven from the three leading national farm organizations, nominated by the President by and with the advice and consent of the Senate, who inspect his books, limit his profits to

not more than 8 per cent of the fair actual annual cost of production, and regulate the price and distribution of the fertilizer. Since it is left to these farmers to say what items are "fair" in the fertilizer operations the entire scheme of manufacture is virtually placed in the hands of the consumers.

4. He maintains nitrate plant No. 2 or a better one ready for use by the Government in time of war for manufacture of explosives.

5. He pays 4 per cent on the entire cost of completing Dam No. 2 and on the entire cost of building Dam No. 3, including dams, power houses, equipment, and locks, except that during the preliminary period his payments are $200,000 per year for the first six years at Dam No. 2 and $160,000 per year for the first three years at Dam No. 3.

6. He provides for a sinking fund, which if invested in Federal farm-loan bonds will return the Government more than $100,000,000 at the end of the 100-year lease. The Government in addition to its interest would receive far more than its entire capital investment in the dams, including $17,000,000 of war-time expenditure on Dam No. 2. Thereafter the water power will be free from interest charges and its cost greatly reduced.

7. He pays $55,000 annually for maintenance and operation of the locks and dams which the Chief of Engineers agrees is sufficient for the purpose. The responsibility for the maintenance of the dams is left to the United States, but the Government is not required to rebuild the dams if they should be destroyed. He furnishes free power to operate all locks.

8. He researches improved methods of fertilizer manufacture at his own expense, employing such as are found successful, thus keeping the nitrate plant up to date.

9. As a cash payment in addition to the foregoing considerations he pays $5,000,000 for nitrate plants No. 1 and No. 2 and their accessories. Plant No. 1 is admittedly unsuccessful and would require a prohibitive expenditure to make it operative, and all agree that nitrate plant No. 2 is obsolete and must be completely rebuilt.

10. In lieu of the Government's interest in the Gorgas steam plant (sold to the Alabama Power Co.) only the amount received from that plant shall be used to construct a similar plant so as to retain the status of the Government properties existing when bids were asked.

OPPOSITION EXAGGERATES OBJECTIONS

We do not claim that the Ford proposal is a perfect instrument. We are quite aware that objections to certain of its provisions have been industriously spread throughout the country. But we realize that no proposal made by any human being, however good or great or wise, can satisfy everybody.

The Ford offer has been made the subject of the most savage attacks which we have ever seen in any legislation. These attacks have not been of a character calculated to lead to a calm and logical decision. There have been exaggerated statements as to the amount of power involved, while the power necessary for the manufacture of fertilizer has been grossly underestimated. The value of the property which Mr. Ford would receive, the title under which he would receive it, the significance of the lease period, the effect of the Federal water power act—in all of these particulars statements which grotesquely distort the picture have been made without fear of contradiction because of the technical difficulties involved in stating the real facts. These impassioned exaggerations have tended to lead us away from the actual facts and to appeal to our prejudices rather to suggest constructively as to how the great benefits admittedly possible at Muscle Shoals can be best made available to this Nation.

FERTILIZERS THE PEACE-TIME PURPOSE

When Congress authorized the development of water power and the construction of nitrate plants in 1916 under section 124 of the national defense act, the legislation made it clear that the peace-time purpose of the enterprise was the production of fertilizers. It was due to the farmers that the original legislation was passed. It was a consideration for their interests that caused this enterprise to be established at Muscle Shoals adjacent to a great water power and close to the Tennessee phosphate fields.

The adoption of this legislation by Congress was a pledge to the farmers that Muscle Shoals should be operated primarily for the production of cheaper and better fertilizers.

Have the farmers hoped in vain? The experts before our committee unanimously declare that they have not, for all agree that under a businesslike management, such as may be reasonably expected with competent private operation at Muscle Shoals such as is to be expected under the Ford plan, the cost of fertilizers to the farmers can be reduced one-half.

The feasibility of such a reduction is evident, for all agree that the nitrogen, which is the most expensive part of the fertilizer that the farmer must buy, can be produced at Muscle Shoals in the form of ammonia for 5 cents per pound as against 15 cents per pound for ammonia in the form of Chilean nitrate at our ports and 20 to 25 cents per pound in the form of mixed fertilizer delivered on the farm.

Among those who have made proposals for Muscle Shoals only one bidder from the beginning has undertaken to carry out the purposes of Congress at his own expense. It was his bid which originally redeemed Muscle Shoals from the program of dismantlement and destruction which had already begun when bids were requested by the Government on April 2, 1921. It was his bid which gave the lie to the representations of the group of power companies dominated by Wall Street who, when asked to bid, declared that the project was without merit and should be abandoned by the Government and that the great Wilson Dam should be left unfinished; that neither private nor Government capital should be invested in its completion.

It was his bid which carried consternation to the group of allied fertilizer companies, who, with one accord, declined to make an offer when earnestly besought by the former nitrate director, Dr. A. G. Glasgow, to undertake the operation of the nitrate plants, rent free, until they should earn 9 per cent on whatever investment was necessary for their operation, thereafter dividing additional profits evenly with the Government. These are the interests which, like the power companies, now heartily indorse the chairman's bill. They see real danger in Ford competition, but in the chairman's poverty-stricken Government corporation they see nothing to fear.

NO LIMIT TO FERTILIZER PRODUCTION IN FORD OFFER

The fact is most significant that while none deny that fertilizers can be made and their cost can be reduced one-half at Muscle Shoals, yet only one bidder agreed to produce fertilizers with the full capacity of nitrate plant No. 2 as a minimum, and, unlike all others, one bidder alone placed no maximum on the amount of power to be devoted to fertilizer production. Other bidders copied the provisions of that proposal as nearly as they dared, but they dared not copy the fertilizer provisions of the offer of Henry Ford for Muscle Shoals. So, aided and encouraged by the chairman of our committee, they sought to belittle and discredit the only proposals that offers the farmer the full measure of the benfits possible for him at Muscle Shoals.

Mr. Ford's minimum obligations to produce fertilizer are limited as to the kind to be produced and the maximum amount to be produced only by the demand. His fertilizer obligations will require more power than the entire supply of the dependable power available at Muscle Shoals with both steam power plants in operation, and they will require the improvement of some of the irregular and unreliable power in order to carry them out.

To produce 40,000 tons of fixed nitrogen by the most approved process (Haber-electrolytic), and to furnish with that the phosphoric acid that must be supplied to market these fertilizers according to demand will require the continuous use of 257,000 horsepower or its equivalent, while the entire dependable supply of power available at Muscle Shoals is only 241,300 horsepower, including the steam-power plants. The frequent statements of the newspapers that the useful power at Muscle Shoals is 850,000 or 1,000,000 horsepower are simply idle exaggerations. We brand all such misleading declarations as false, and we base our statement on the testimony of the United States engineers. Instead of representing one-third or one-fourth of the water-power resources of the Southeastern States, Muscle Shoals in reality constitutes only an insignificant part of these resources, and its entire possibilities amount to a very small fraction of the undeveloped water powers of the United States.

EFFECT OF IMPROVED PROCESSES

It is to be expected that as the processes become improved the amount of power necessary for the manufacture of fertilizers will be reduced; i. e., a ton of high-grade fertilizer probably will be made in the future with less power than is now possible. We can not agree, however, that the time ever will come when no power at all will be required to manufacture fertilizers or anything else. A manufacturing operation of any kind, by its very nature, requires the expenditure of energy and always will.

Since it is agreed that at Muscle Shoals, under competent private management, the cost of fertilizers can be reduced one-half, it is not reasonable to expect that Mr. Ford will be able to supply the entire fertilizer demand of the United States, for witnesses agree that as the cost is reduced the demand will be multiplied, but Mr. Ford will be obliged to meet the demand at Muscle Shoals to the extent of his reasonable ability. In fairness to Mr. Ford we must therefore conclude that as the power requirements diminish the tonnage of fertilizer will be increased and the effect of improved processes will be, not to place at Mr. Ford's private disposal a large amount of power for private purposes, as has been represented, but to enable him to supply a greater part of the demand for these improved fertilizers than he could supply otherwise.

Mr. Ford under his offer agrees to research these improved processes and adopt such as are commercially successful. His obligation to do this is not dependent upon whether or not he has been able to amortize his investment in any particular process or plant. Nitrate plant No. 2 must be rebuilt not once but many times over, no matter whether it has been possible to write off the cost of the plant and pay for its

reconstruction out of the earnings or not. To our minds this constitutes as valid an assurance as this Government could obtain from any source, guaranteeing that for 100 years this Nation will keep pace with the nations of the world in its means of obtaining the nitrogen that is indispensable to our national life, whether in war or in peace.

It has been claimed that Mr. Ford desires Muscle Shoals chiefly to produce aluminum, magnesium, and their alloys, and other metals, and it has been brought to the attention of our committee that on the authority of the United States Fixed Nitrogen Research Laboratory processes do exist whereby aluminum can be produced as a by-product of fertilizer.

Since the determination of the fairness of the items which constitute the cost of the fertilizer under the Ford offer is placed in the hands of the consuming public themselves, it may safely be assumed that the more valuable the by-products which can be produced in connection with the fertilizer manufacture the cheaper the fertilizer itself will become, and we believe that the production of useful by-products in this way, as suggested to our committee by Mr. Ford's chief engineer, Mr. W. B. Mayo, should be encouraged.

PUBLIC INTEREST PROTECTED THROUGH REGULATION BY CONSUMER

Under the Ford proposal a new policy in the utilization of a great natural resource would be adopted; a policy of regulation by the consumer in the manufacture and sale of fertilizers. This is a policy which has been proposed only by Mr. Ford. It is a policy which the special interests are fighting with every resource at their command, and it is accomplished in the Ford offer by limiting the profit on fertilizer to a maximum of 8 per cent upon the fair actual annual cost of production, as determined by a board of farmers' representatives who inspect the books and determine the price and distribution of the product. Since it is left to these farmers to say what items are fair in the operations, the entire scheme of manufacture is placed in the hands of the consumers.

The production of fertilizers under the Ford offer is not made conditional upon the ability of Mr. Ford or his company to make a profit of 8 per cent or any other per cent, but his profit, if any, is limited to this amount.

Since this regulation by the consumer applies to the principal operations at Muscle Shoals, namely, the manufacture of fertilizer, contrary to all the misrepresentations that have been broadcasted throughout the country by a willing press, the truth is that under the Ford offer the Muscle Shoals power will be employed primarily in the public interest and primarily under public control.

FAVORING POWER COMPANIES AT FARMERS' EXPENSE

There is another policy, the adoption of which has been urged at Muscle Shoals, namely, that this power should be devoted primarily not to fertilizers but to public utilities and used for operating cotton mills, street cars, small motors, and electric lights. To adopt such a policy and distribute this power instead of utilizing it first of all for the purpose for which the dam was built, namely, for the production of cheaper and better fertilizers, would be to violate our pledge to the farmers of the country and to decline to bring this effective aid to the farmer at the time of his greatest distress.

Public utilities already control 90 per cent of the water powers of the country, yet they have done nothing to help the farmer reduce his expenses by the sound and feasible method of increased production at less cost through the use of cheaper and better fertilizers. Since only 16 per cent of the water powers of the country have yet been developed, and 8,000,000 horsepower are available in the section of the country in which Muscle Shoals is located, we believe that the least we can do for the farmer is to permit this one development to serve agriculture by the acceptance of the Ford offer.

POWER DISTRIBUTION UNDER FORD BID

As for distribution of power under the Ford proposal, we are convinced that since the production of fertilizers is the purpose of the development in peace time it is not a matter of importance whether power is distributed from this plant or not. It will be interconnected with other plants, of course, as a matter of common business sense, whoever operates it. Mr. Ford has promised the public, in a statement published October 11, 1923, that he will build transmission lines 200 miles each way from Muscle Shoals. This is feasible, since undoubtedly there will be a period of years while the new fertilizers are being introduced, during which time there will be power available for distribution. When, later, the demands of fertilizer manufacture require the use of this power it is reasonable to expect that it can be supplied to the consumers from the storage dams to be built in the upper tributaries of the Tennessee River, or from other sources. In any event, when Mr. Ford distributes power to the public his company becomes a public utility and, like any other public utility, including the chairman's Government corporation, his company automatically becomes subject to regulation by the public utility commission of the State in which he does business.

EXAGGERATED VALUE OF PROPERTY

We repudiate the extravagant statements that have been made by the chairman of the committee and others to the effect that the Government is selling $85,000,000 worth of property for $5,000,000. The property has no such value. Half-price fertilizers can not be furnished to the farmer by utilizing either of the present nitrate plants. Either plant would have to be completely rebuilt to accomplish such a purpose.

Nitrate plant No. 1 is a small, unsuccessful experimental plant having a capacity of 30 tons of ammonia per day, and requires a prohibitive expenditure from the standpoint of cheap fertilizer in order to make it operative at all.

Nitrate plant No. 2 was built to use the cyanamid process, which is admittedly obsolete, and the plant must be rebuilt to use another process and must be supplemented by other plants before it can serve agriculture effectively.

The salvage value of these two nitrate plants has been estimated by the Ordnance Department, first, as scrap only, $7,952,000, and second, as an operating concern for those portions which can be commercially operated and the remainder as scrap, $12,597,000. They have no value at all approximating their original costs.

Neither of these unsuccessful and obsolete plants, however, is to be conveyed in fee simple to Mr. Ford. He does not get a clear title to any real estate, improved or unimproved, for the provisions of his offer are written into his deeds and become a cloud on the title for 100 years.

PROVISIONS OF POWER ACT DO NOT APPLY TO FERTILIZER MANUFACTURE

To ask Mr. Ford to come under the Federal water power act would be unfair to him, for this is an entirely different form of enterprise from those which the Federal water power act is intended to cover. It would be equivalent to asking him to invest $50,000,000 or more in an enterprise to be controlled by three political appointees sitting here in Washington. Furthermore, it is a matter of serious doubt, in view of the testimony as to the decisions of the Supreme Court, whether the "50-year" limit and other so-called regulations of the Federal water power act could be enforced against private operators who own their own dams in navigable streams, while there is no question that such provisions could be enforced against Mr. Ford as conditions attaching to a lease of Government property.

As Mr. MCKENZIE has declared in the House, the length of the lease of a water power has no more to do with the rate at which that power is sold than the length of the lease of a railroad has to do with the price of a railroad ticket. We believe it is absolutely immaterial as to whether the lease is for 50 years or for a hundred years if the terms of the lease are in the interest of the public.

GREATER REGULATION IN FORD OFFER THAN IN POWER ACT

We contend that Mr. Ford and his company are regulated in the public interest under the terms of his proposal to a far greater degree than is any licensee under the Federal water power act.

Under the power act a private operator who develops a water power can use that power for whatever purposes he pleases, and he can sell the products made by its use at whatever price the market will bear. No consumer is entitled to inspect his books. He fixes his prices as he pleases and he distributes his product to suit himself.

Under the Ford offer the chief product must be fertilizer, and in its manufacture the profits are limited to 8 per cent of the fair actual annual cost of production. Mr. Ford's books are subject to inspection by a board of consumers, who determine what items in his costs are fair and what his actual cost has been, and who fix the price of the fertilizer and control its distribution. No more complete case of regulation of a great industry by consumers ever was proposed, and nothing in the history of this or any other country for the past hundred years that has come to our notice justifies the belief that by defeating the Ford proposal we will secure something better for the farmers and other consumers.

FALLACY OF 50-YEAR LEASE

A short lease accomplishes but one purpose—it provides an opportunity whereby the Government can step in at the end of the lease period and demand a greater charge. No objection to this charge is made by the power companies who are licensed under the power act, for such a charge becomes at once a fair part of the cost of the power, which is not paid by the power companies but is merely added to the consumer's bill and becomes in effect a tax, not a uniform tax upon the industry as a whole but a special kind of a tax upon the particular class of consumers who happen to be dependent upon this particular power.

We agree with Mr. MCKENZIE that electric power generated from coal is one of the very few commodities that is cheaper to-day than it was 20 years ago, and since it is well known that more than 80 per cent of the energy in our coal is wasted in the best of our steam power plants, there is a vast room for improvement, and improvements, we believe, will continue to be made. As Mr. MCKENZIE states, the new mercury boilers are an excellent example of the progress that may be expected in this direction.

A mere superficial examination of the case will convince anyone that if the Ford offer is rejected the taxpayers will lose far more in 50

years of Government ownership and operation at Muscle Shoals than then can possibly gain by refusing to consent to the 100-year lease period in Henry Ford's offer.

NO REGULATION OF PROFITS OR RATES UNDER POWER ACT

It has been claimed that under the Federal water power act the profits of a licensee would be limited and the public would secure all profits in excess of a fair return on the licensee's actual net investment. This is denied by the official statement of the executive secretary of the Federal Power Commission himself, who admits in his last annual report that he does not expect to expropriate a dollar of excess profits, for this is a function of the States. The State of Alabama can regulate Mr. Ford's profits, but not the Federal Power Commission.

Another State function in which the Federal Power Commission has little or no voice is the regulation of rates. The Federal Power Commission can not intervene except in the unlikely contingency in which two State utility commissions fail to agree on the rates. In all other cases the rates are in the hands of the State public utility commissions themselves, as are also the terms of service and amounts of security issues.

Under section 8 of his bill the chairman attempts to put his Government corporation into the public utility power business on a different basis from any other power company operating in the State of Alabama. He undertakes to give his board of directors the power to make rates. This provision of his bill is illegal, and the Senator's company will soon discover that they have no such power as is here attempted to give them, either as to rates or service, including the construction of transmission lines, for like any other public utility they will be subject to the rulings of the State utility commission.

The constitutionality of the entire Federal water power act, aside from its provisions for the control of navigation, has been called into question by the States of New York and New Jersey, and the attorney general of New York reports that an adjustment has been reached in their case under which the State is to retain its rights and that a settlement of the case is in sight.

In view of the benefits which have been claimed for the Federal water power act by the advocates of the chairman's bill and their loud protests against the Ford offer for not coming under it, it is surprising to see that no effort is made in this bill to extend the benefits of this act to the chairman's corporation at Muscle Shoals.

It, indeed, would be a flimsy pretext for ignoring the welfare of the farmer to deny to him the benefits of the Ford offer because that offer failed to conform to certain arbitrary conditions wholly inapplicable in the Muscle Shoals case, conditions which even the advocates of the power act are unwilling to meet at Muscle Shoals and which conditions in all probability will be found to be illegal and unenforceable.

NO GOVERNMENT INSURANCE OF DAMS

The fund of $55,000 per annum provided in the Ford offer for the maintenance of the dams and locks has been declared sufficient for all ordinary maintenance costs both by the Chief of Engineers, Gen. Lansing H. Beach, and the Assistant Chief of Engineers, Gen. Harry Taylor.

So far as insuring the dams is concerned, while the United States is responsible for their maintenance, there is nothing in the Ford offer which compels the Government to guarantee their stability during the lease period. The Government is no more in the insurance business under the Ford offer than it is under Government operation itself. While Henry Ford does not agree to rebuild the dams in the very remote contingency of their failure, neither is the Government compelled to do so.

THE FERTILIZER MONOPOLY

Since the chairman's report attempts by indirection to make it appear that the Fertilizer Trust is a mere fiction created in the farmers' minds to deceive them, we offer the following editorial from a leading trade journal:

"CHILEAN NITRATE PRODUCERS TIGHTEN GRIP ON MONOPOLY

"News of exceptional interest in the nitrate industry is reported elsewhere in this issue regarding recent action of the Chilean Nitrate Producers' Association. This body, which controls 98 per cent of the production of Chilean nitrate, voted to continue its organization for the next six years, reduced the price of nitrate for the current year, and passed a resolution not to sell nitrate to purchasers who may also buy from nonmembers of the association. About the same time the Chilean Government published a decree permitting the sale of nitrate lands only to members of the association during the life of that body.

* * * * * * *

"This decision to restrict sales of nitrate, if inclusive, means that American producers and dealers are either blacklisted by the organized producers or limited in their activities by the American law which restrains them from entering price-fixing organizations. It is a clear declaration of war against American interests in the nitrate business. The means to meet this hostile act are not obvious nor will the contest be short or easy. The ultimate result, however, is already clear. The United States will take steps to insure at the earliest possible moment full independence in nitrogen supply. It is intolerable that an act of this sort should permanently place a limitation upon the industrial and fertilizer use of nitrates." (Chemical and Metallurgical Engineering, May 19, 1924.)

If anyone doubts the reality or the effectiveness of this monopoly, let him examine this country's nitrate bill, which totaled $62,972,054 for 1923, and since the beginning of importations has reached the staggering total of $1,103,153,964.41, some 60 per cent of which is paid by the farmer.

The statements about the existence of a fertilizer trust are undeniable, and the farmers' interests will not be served by any attempt to ridicule the facts.

Muscle Shoals under efficient private operation as would follow the acceptance of the Ford offer would have a radical effect upon the prices of the Nitrate Trust, for Mr. MADDEN testified before the House Military Affairs Committee:

"I was told by one of the men heavily interested in Chilean nitrates the other day—I was talking to him about this plant and I told him I thought we would be able to produce nitrates and sell to the farmer much more economically than they have ever purchased them before. He said, 'If that shall prove to be the case, we will cut the price of Chilean nitrates in two—in three, if necessary.'" * * *

TWO COURSES OPEN

We agree with the majority of the committee who have finally come to the conclusion that we, like many others, reached two years ago, namely, that there are but two courses open to the Government, and after hearing the additional testimony of the past six weeks we are the more firmly convinced that Acting Chairman MCKENZIE, of the House Committee on Military Affairs, correctly appraised the situation when he stated in his majority report:

"Two courses are open, one Government ownership and operation, which in view of the character of the project would, in the judgment of the majority of the committee, mean not only failure from the standpoint of income but disaster to the hopes of the farmers and other users of commercial fertilizer. To have the Government undertake to engage in the manufacture of fertilizer ingredients, with political superintendents, foremen, and straw bosses is unthinkable, and to undertake such a scheme would be unspeakable folly.

"The alternative course is to sell the tangible property to private individuals or to a corporation on conditions prescribed by Congress, lease the power at a fair rental, and permit individual American initiative and ingenuity to have an opportunity at this place, where the greatest water power in our country can be developed, requiring the preservation of the element of national defense, and at the same time giving an opportunity for relief, if such there can be, to not only the Southland but our entire country in the way of commercial fertilizer at reasonable prices.

"Is this possible? Does the Ford proposal promise such a consummation? We feel that it does * * *."

We heartily concur in these views.

THE FOLLY OF A GOVERNMENT FERTILIZER BUSINESS AT MUSCLE SHOALS

We speak in the interest of those who favor Government operation as a principle when we declare that they do a grave injustice to the cause which they indorse when they urge that this course be followed at Muscle Shoals. If they were proposing that the Government should go into the shoe manufacturing business, for example, even so radical a course would be open to less objection than that which the majority proposed. The shoemaking business is an old established industry. Its operations and methods are well known; they have been standardized for a generation or more.

The electrochemical fertilizer industry, on the other hand, exists in large commercial form only in Germany where, according to the testimony of Doctor Cottrell, it has been operated entirely by private enterprise. In the United States there is no such industry, and there are no precedents to follow. Mr. E. H. Hooker, one of the most competent electrochemical engineers in the United States, well expressed the situation to our committee when he said, "This art is changing so fast that you can hardly follow it."

The majority of the committee would have the Government engage in an undertaking in which any plant, however well designed, admittedly may become obsolete even before its construction is completed. How can any reasonable man insist upon taking the taxpayer's money by the scores of millions of dollars and sinking it in great fertilizer plants under such conditions when, with the Ford offer accepted, private capital agrees to research these improved processes on a commercial scale and to adopt such processes as prove their worth, insuring that the nitrate plant will be kept up to date without one cent of expense to the United States Government?

OUR EXPERIENCE WITH GOVERNMENT OPERATION AT MUSCLE SHOALS

Our own experience in this nitrate business should be a warning to us. Nitrate plant No. 1, utilizing the so-called Haber-Bosch process, was built on the strength of a report which recommended the expenditure of $3,000,000 for this purpose, but actually cost $13,000,000, and then was unsuccessful as a nitrogen plant. The cost of making that plant a success has been estimated at $4,000,000 to $5,000,000, but its capacity is only 30 tons of nitrogen in the form of ammonia per day. Such an investment for so small a production would be prohibitive from the standpoint of cheapening the cost of fertilizer. It was not until the process was perfected by the Atmospheric Nitrogen Corporation (a subsidiary of the Solvay Process Co., and of the General Chemical Co.) under private initiative at Syracuse, N. Y., that it was made physically possible to operate this process successfully.

Whether this Haber-Bosch process is best for fertilizer is a disputed question; the former advocates of the process now recommend the "Haber-electrolytic" process; but no manufacturer in the United States has undertaken to build a large-scale plant to utilize either of these processes for fertilizers or for any other purpose.

Nitrate plant No. 2, utilizing the cyanamid process, was authorized when it became apparent that we had to have a domestic supply of fixed nitrogen for explosives regardless of cost in order to win the war. It was originally contended by the American Cyanamid Co., who built the plant, that the cyanamid process was the only process suitable for the production of nitrogen fertilizers. The war-time estimate for its cost was $30,300,000, but it actually did cost, not including the Gorgas steam plant and transmission line, $67,800,000. Yet all witnesses agree that for fertilizers, the cyanamid process is obsolete, and it has been declared by Maj. J. H. Burns that to change to the Haber-electrolytic process now in favor, would cost not less than $10,000,000.

Government operation in the construction of the nitrate plants has demonstrated: First, that where a process had not been commercially worked out under private initiative it was not solved under Government management; second, that the cost of construction greatly exceeded the war-time estimates; third, that the processes of both nitrate plants became obsolete before the plants were completed.

If we are to undertake public operation of industry in the United States, then let us give it a fair trial. Let us begin with some well-established industry in which the day of radical changes has long gone by. To begin with such an industry as commercial nitrogen fixation, with the chances all against us, with only one thing certain, and that is that the expenditure will be many times the original estimate, is a course which would do a grave injustice to the general policy of Government operation. It could be justified only if we had no satisfactory offer from private sources. With the offer of Henry Ford before us, it is neither justifiable nor excusable.

WHY GOVERNMENT OPERATION FAILS AT MUSCLE SHOALS

At the very outset the success of the Government enterprise is jeopardized by a three-way division of responsibility: The Secretary of War builds the power dams and the upper storage dams; the Government corporation builds an addition to the steam power plant at nitrate plant No. 2 and transmission lines and operates the dams and this steam power plant, selling power to the Secretary of Agriculture and to the public; the Secretary of Agriculture operates either or both of the nitrate plants (although his power supply is limited to barely half enough to operate nitrate plant No. 2 for nitrogen alone, to say nothing of phosphoric acid) and makes fertilizer and sells it at any "reasonable" profit to the trade in general.

The opportunity for advancing a perfect alibi on the part of any or all concerned in case of misfortune is too evident to require comment. No one is responsible for the conduct of the enterprise as a whole, and no one must take the sole and direct responsibility if it fails. The very first axiom of successful industry is inexcusably violated.

The success of a manufacturing enterprise is very largely dependent upon competent, experienced management. Executives capable of successfully operating an enterprise of such a magnitude are not to be had for $7,500 per year and are not likely to be found in a Government bureau. Such men would be hard to find, particularly in an undeveloped industry, for they are already employed at salaries many times this amount.

The influence of politics presents another easy road to failure under Government operation. The chairman has endeavored to prevent political considerations from affecting the success of the enterprise, but so long as human nature remains as it is the element of politics, directly or indirectly, must be reckoned with in any Government undertaking. If Congress wishes to repeat the scandals of the Veterans' Bureau, the Shipping Board, or the oil leases it needs only to turn this great plant over to a Government bureau to be operated as a commercial undertaking.

GOVERNMENT OPERATION MEANS MANY MILLIONS MORE APPROPRIATIONS

The overwhelming objection to the chairman's bill, however, when Congress is endeavoring to reduce taxes, is the large and unwarranted additional expense, which the taxpayers must shoulder under the chairman's bill, with no assurances of any adequate return on the investment or of ever recovering any part of the principal. Chairman MADDEN, of the House Committee on Appropriations, forcibly brought this feature of the situation to the attention of the House on June 30, 1923, and again on March 6, 1924.

Mr. MADDEN took the official estimates of the cost of remodeling the nitrate plants so as to utilize the process which at present is most in favor and the estimated cost of partially stabilizing the flow of the Tennessee River in a way similar to that proposed by the chairman in his bill, and found that if the Government undertook to engage in the fertilizer business there would be required the following additional appropriations:

| | |
|---|---|
| 1. Auxiliary or reserve water supply to stabilize the flow of the Tennessee River that a more uniform amount of power would be available the year round | $20,000,000 |
| 2. For remodeling nitrate plant No. 1 | 4,000,000 |
| 3. For remodeling nitrate plant No. 2 | 10,000,000 |
| 4. For a phosphoric-acid plant to meet the demand for mixed fertilizers | 15,000,000 |
| 5. Operating fund | 10,000,000 |
| Total | 59,000,000 |

Since Mr. MADDEN prepared these figures, however, experts before our committee have indicated that they are too low. For example, the phosphoric-acid plant necessary to enable the Government to produce nitrogen and other commercial fertilizers according to demand has been estimated to cost $20,000,000 instead of $15,000,000. It also appears that the $20,000,000 estimate for the cost of the upper river storage dams may be entirely inadequate, for the surveys of these dams have not yet been completed.

The Secretary of War is directed in the Norris bill to build as many storage dams as he sees fit to regulate the flow of the Tennessee River. Without denying the desirability of regulating the flow of the river, this is an unlimited authorization to take funds from the Public Treasury for the purpose of building dams when private power companies are already competing for the privilege of constructing these very dams at their own expense. The Federal Power Commission already has conflicting applications for permits to build many of these storage dams.

The chairman's bill also provides for adding 50 per cent to the capacity of the steam-power plant at nitrate plant No. 2. This is an authorization to add 40,000 horsepower to the capacity of the plant, which at the reasonable figure of $100 per horsepower would cost $4,000,000.

In section 3 of his bill Senator NORRIS undertakes to compel present and future owners of dams on the Tennessee River which would benefit by these storage dams to pay for a share in the cost of these dams proportionate to their benefits, but this provision, however fair it may be, is clearly unconstitutional, for the Federal Government has no authority over navigable streams by virtue of which it can compel developments on one stream to pay for their share or proposed storage reservoirs while those on other streams do not.

NO CHEAPER FERTILIZER FOR FARMER UNDER NORRIS BILL

The change in the title of the chairman's Government corporation from the Federal chemical corporation to the Federal power corporation is very appropriate. While it might conceivably have been agreed that the principal aim of the chairman's bill of last year was to preserve the purpose of Muscle Shoals as a source of better and cheaper fertilizers for the farmers of the country, it can not be denied that in this bill as now amended the fertilizer becomes a very minor and secondary consideration.

Muscle Shoals under the chairman's bill is a public utility power proposition in which the interests of the farmers have been utterly lost in a giant superpower scheme in which Muscle Shoals would be but an insignificant part. The national value of Muscle Shoals disappears and the great dam that was built to serve the farmer becomes a mere cog in a machine for operating street cars, cotton mills, and electric lights in a limited section of the country. Let no farmer expect cheaper fertilizer under such a plan—his chance is gone.

It needs no argument to show that this is so, for the chairman's bill provides that no more than 25,000 primary horsepower shall be used for the manufacture of fertilizer, together with 75,000 horsepower of the secondary or irregular power which would exist not more than four or five months of the year and perhaps less.

Among the proposals made to the committee were several in which the bidders sought to throw a fertilizer sop to the farmers in order to secure control of the water power, but none of them offered to provide as little as 25,000 primary horsepower for fertilizer purposes. If we would protect the farmer's interests, then any of the bids which were considered by our committee would be far superior to what the

chairman proposes. The fertilizer monopoly and the Alabama Power Co. and their associates could not have drawn a bill that would have more effectually freed them from any real competition at Muscle Shoals than this Government corporation.

WHY NOT AWARD IT TO THE ALABAMA POWER CO.?

The power companies see in this bill a wide-open gateway to the power that they long have coveted and which they could not get directly by offers of their own.

It is a well-known fact that the Alabama Power Co. and its associates have been endeavoring to secure control of the Muscle Shoals power for years, and if under Government operation we are merely to operate the hydroelectric plants for the benefit of the power companies, turning over the power to them to distribute and sell, then, in our judgment, we would deal more honestly with the country if we accepted the offer of the power companies directly. We do not believe that this Government should try to do by indirection what it is unwilling to do frankly and openly.

$130,000,000 MORE APPROPRIATIONS

Since the chairman has proposed to take away this power from the farmers and to distribute it over independent lines to the principal cities within a radius of 400 miles, and since this is the policy to be voted on under this bill we want the Senate to know what that means:

The present estimate of $51,000,000 for the cost of Dam No. 2 complete does not include the cost of the transformers, transmission lines, and other equipment necessary for long-distance transmission.

Considering only five main lines—Cincinnati via Nashville and Louisville; Little Rock, Ark., via Memphis; New Orleans via Meridian; Atlanta via Birmingham; and Knoxville via Chattanooga—the transmission distance would be at least 1,500 miles, and according to General Taylor a single-tower line would cost on an average at least $20,000,000 per mile, not including the right of way. This would cost $30,000,000 for transmission lines alone, and the additional equipment, not including the local distribution in the various towns and cities, would require at least $5,000,000 more.

If we confine our transmission system only to those cities within 200 miles of Muscle Shoals, we would require at least 550 miles of main trunk lines.

The cost would be:

| | |
|---|---|
| 550 miles of high-tension transmission line, at an average cost of $20,000 per mile | $11,000,000 |
| Right of way, transformers, and other equipment (estimated) | 4,000,000 |
| Total | 15,000,000 |

Correcting the estimate of probable appropriations necessary on which no reasonable return can be assured, we must increase Mr. MADDEN'S figures as follows:

| | | |
|---|---|---|
| Estimated additional cost to Government if United States engages in fertilizer business (MADDEN estimate) | | $59,000,000 |
| For additional cost of phosphate plant | $5,000,000 | |
| For transmission system, to near-by cities | 15,000,000 | |
| Addition to steam-power plant | 4,000,000 | |
| | | 24,000,000 |
| Total | | 83,000,000 |

If, however, the power is to be distributed over a 400-mile radius by means of the five transmission lines referred to above, we must add $21,375,000 to this estimate, bringing the total new appropriations to $104,375,000.

To this we must add $25,000,000 for building Dam No. 3, and our immediate future expenditure then becomes $129,375,000.

| | |
|---|---|
| When we have completed Dam No. 2 our expenditures at Muscle Shoals will total (exclusive of Dam No. 3) | $107,400,000 |
| To carry out the chairman's program we would have to invest another | 125,375,000 |
| Bringing our total investment to | 232,775,000 |

without the slightest assurance that any part of this huge sum could ever be returned to the taxpayers.

The capital of the corporation consists of $3,472,487.25 received by the United States from the sale of the Gorgas steam plant to the Alabama Power Co., together with such surplus materials as are available at Muscle Shoals, and the sum of $1,500,000 for the purpose of rebuilding nitrate plants and carrying on a great commercial fertilizer business. In other words, with less than $5,000,000 of actual cash this company is expected to obtain enough appropriations to do at least $119,000,000 worth of construction work and carry on a business which has been estimated by MR. MADDEN to require at least $10,000,000 for operating capital alone. If, however, the expectations are to be carried out as recited in the chairman's report and this power is to be distributed over modern high-tension lines into even a few principal points within the area from Louisiana to the Ohio River, the immediate future appropriations for which this Government corporation would call upon us will total practically $130,000,000.

CHEMISTS AS MANAGERS

Section 14 of the chairman's bill providing for the turning over of nitrate plants Nos. 1 and 2 to the fixed-nitrogen-research laboratory for operation is an amazing proposal. With no reflection upon the character or ability of the high-grade chemists of the nitrogen-research laboratory, the fact remains that they are not operating executives and do not claim to be. The problems of plant operation in the production of the equivalent of 2,000,000 tons of commercial fertilizer per year (the capacity of nitrate plant No. 2) are not problems with which research chemists can be expected to deal successfully. They are problems of money, men, and management. The man who can take a new industry and operate it from the beginning on a large scale and not make any mistakes has never yet been found. Mistakes, costly ones, will be made. Some one must pay the bill. According to the chairman's plan the taxpayers of the United States will pay it, and under his plan the bill will be a large one. Under the Ford offer Henry Ford will pay it, whether it is small or large.

RISK IN MANUFACTURE OF NEW NITROGEN COMPOUNDS

There is another side to the operation of these nitrate plants which to our minds presents an unanswerable argument as to the folly of our attempting to salvage a war-time expenditure and to utilize an obsolete nitrate plant and a few houses and town lots down in Alabama by going into the manufacture of fertilizer as a Government enterprise. We refer to the serious element of physical risk which accompanies the manufacture of new nitrogen compounds.

On February 8, 1923, Senator LADD called attention to the record of disastrous explosions which have occurred at plants using the Haber process of nitrogen fixation. He particularly made reference to the great explosion at Oppau, which destroyed 1,500 lives and more than $50,000,000 worth of property in a few moments. It is now claimed that this was not an explosion due to the process but that it was an explosion of a stored supply of a new fertilizer compound containing ammonium nitrate (the latter being the same material which it has been proposed to produce under Government operation at nitrate plant No. 2) which was responsible for this terrible calamity. Assuming that the nitrogen-fixation process was in no way responsible for the accident, the fact remains that there is a serious element of risk in the preparation and handling of new nitrogen compounds.

Still more recent is the explosion on March 1, 1924, of a batch of ammonium nitrate at the plant of the Columbia Salvage Corporation at Nixon, N. J. Commenting on this explosion editorially, the Oil, Paint & Drug Reporter of March 10, 1924, says:

> "As was the case with respect to the disaster at Oppau a couple of years ago, the recent explosion at Nixon, N. J., which may reasonably be considered to have much in common with the German catastrophe has given rise to a great variety of opinion as to the cause * * *.
>
> "There are so many factors of hazard connected with the handling of such material as ammonium nitrate that it would be extremely difficult to determine whether the fault was a mechanical one or one of contaminated material or lay in human error. Temporarily faulty control of evaporation might result in overheating. Momentary carelessness on the part of a workman might easily lead to disastrous results. It is, at best, doubtful whether the investigations that have been ordered will reach a solution of the mystery; although, for the sake of progress in the production of nitrogen compounds, it is to be hoped that they will uncover evidence that the explosion was not due to an irremediable hazard in such processes, it will be recalled that the owners of the Oppau plant decided after the disaster there to give up the manufacture of ammonium nitrate.
>
> "Whatever the cause, the explosion at Nixon points clearly to the fact that the production and handling of fixation compounds of nitrogen are not the child's play which some comment in Congress and elsewhere on the disposition of the Muscle Shoals plant might be taken to assume. Even though ammonium nitrate be somewhat more hazardous than the other compounds more generally associated with the economic consideration of nitrogen fixation, the importance of efficient chemical control of fixation plants can not be gainsaid. Such establishments are not to be classed with cider mills among the enterprises adaptable to agricultural cooperative movements."

As the Chemical and Metallurgical Engineering Magazine of March 17, 1924, remarks:

> "It is to be hoped that the different investigations now under way may reveal something of the cause of the explosion—information that will help to fill the admitted void that exists in our knowledge of the behavior of ammonium nitrate, particularly under conditions in which it is associated with other materials."

When we realize that right to-day we have accumulated in the process of manufacture at nitrate plant No. 2 some 1,700 tons of ammonium nitrate, a nitrogen compound which in itself is supposed to be harmless, but which has already cost the lives of thousands and untold millions of property damage by its explosion, and when we realize how little is really known of the behavior of this and other nitrogen compounds, we can not avoid the feeling that if we reject the offer of Henry Ford and undertake Government operation we may

awake some morning to find that our supposed economies have vanished in the untold losses of a great calamity.

Since we have before us a responsible offer to develop this industry at private expense, backed with adequate capital, which is able to command the best technical talent that the world affords, and since by accepting this offer we can assure ourselves that the United States will maintain its advanced place among the nations in this most important industry, we believe that we are indeed fortunate to have such an offer available, and in our judgment common prudence and a regard for the public interest demand that we accept it.

COMPARISON OF THE TWO COURSES

The convenient comparisons we have drawn up a brief parallel statement of the respective provisions of the two bills, as follows:

| FORD OFFER | NORRIS BILL |
|---|---|
| 1. Takes the Government out of the fertilizer and power business. | 1. Sets up the Government in the fertilizer and power business. |
| 2. The only additional expenditure is for the construction of Dam No. 3. | 2. The completion of Dam No. 3 is only one of a number of large new expenditures which may total $130,000,000, and which must be met by new appropriations. |
| 3. The company pays 4 per cent interest throughout the lease period on the actual cost of completing Dam No. 2 and constructing Dam No. 3, with their locks and power-house facilities, except that at Dam No. 2 for the first six years the payment is $200,000 per year, and at Dam No. 3 for the first three years the payment is $150,000 annually. | 3. No guaranteed return of any kind on the Government's investment. |
| 4. The Ford plan is guaranteed by a company having a paid-in capital of $10,000,000 under a contract binding jointly and severally on Mr. Ford, his heirs, representatives, and assigns, and his company, its successors and assigns. Mr. Ford's chief engineer has testified that Mr. Ford expects to invest $50,000,000 in improvements at Muscle Shoals, which investment depends upon the water-power lease for its usefulness, and the lease may be canceled for nonfulfillment of contract. | 4. Under the Norris bill an attempt would be made to operate the nitrate plants and distribute power by a corporation having the absurdly inadequate capital of $4,972,487. Whatever capital is provided must be at the expense of the Government Treasury. The corporation is not required to make guaranties of any kind for faithful performance. |
| 5. Insures that the Muscle Shoals project will be operated primarily under public control and primarily in the public interest, with a minimum annual production equivalent to 2,000,000 tons of 2-8-2 commercial fertilizer as the principal product, with no further expense to the Government. | 5. No assurance of any production of fertilizer at all, for the operations would be dependent upon appropriations by Congress, and in all probability Congress would not long consent to the maintenance of an unprofitable enterprise such as may be expected when an undertaking of this character is attempted by the Government. |
| 6. Limits all profit on manufacture and sale of fertilizers to not more than 8 per cent of the fair actual annual cost of production and agrees that a board of farmers appointed by the President and confirmed by the Senate shall examine the books, pass upon what is fair in his cost of items, and fix the price and control the distribution of the fertilizer. Public interest fully protected through regulation of his chief product which requires all his dependable power, viz, fertilizer. | 6. The corporation is authorized to sell fertilizer direct to farmers or farm organizations as well as to dealers, manufacturers, and to the fertilizer trade generally. There is no limit as to the profit which may be charged so long as the fertilizer is sold at a "reasonable profit." A profit in excess of 8 per cent—say, 10 per cent—could not be held unreasonable. |
| 7. The great fertilizer enterprise at Muscle Shoals would be operated by competent, experienced executives under the efficient manufacturing conditions to be had only under private management. Mr. Ford is not prevented from paying the salaries necessary to secure the highest grade of technical and professional men to conduct the enterprise. | 7. Not only is the efficiency of private management lacking, but it is actually proposed to commit this great manufacturing enterprise into the control and management of the chemists of the Government's nitrogen laboratory. The pay of any employee is limited to $7,500 per year. |
| FORD OFFER—continued | NORRIS BILL—continued |
| 8. No maximum limit upon amount of power to be used for fertilizer manufacture. Minimum power requirements by present methods is 257,000 continuous horsepower or its equivalent. | 8. Power for fertilizer definitely limited to 25,000 horsepower of primary or continuous power and 75,000 horsepower of secondary or irregular power available only four or five months each year. |
| 9. Obligation is to produce in accordance with the demand. This applies both to the kind of fertilizer produced and the amount. The less power required per ton of fertilizer through improved processes the more fertilizer must be produced. | 9. No obligation to produce in accordance with the demand. Fertilizer production can be reduced if power requirements are lessened by improved processes. |
| 10. Obligates Mr. Ford to research improved electric furnace methods, industrial chemistry to develop more economical processes, and requires him to reasonably employ such improved processes as are found to be successful. | 10. Provides for experimentation study and research for cheapening the manufacture and sale of fertilizer or other products either through the fixed-nitrogen-research laboratory (which that laboratory is now doing) or any other way deemed advisable by the Secretary of Agriculture. |
| 11. Maintains nitrate plant No. 2 or a better one of equal capacity free of charge for 100 years, ready for immediate use by the Government in the manufacture of explosives. | 11. Maintains nitrate plant No. 2 nominally at the expense of the Government corporation but actually at the expense of the United States. |
| 12. Provides a guaranteed sinking fund sufficient to return the following amounts within the lease period, according to the statement of the Secretary of War. (H. Doc. No. 167, 67th Cong., 2d sess., p. 7.) Invested at— Amount returned, 4 per cent $49,071,935; 4½ per cent 58,570,003; 4¾ per cent 70,100,049; 5 per cent 100,868,642; 6 per cent 213,134,690 | 12. No sinking fund provided for any return of the Government's investment. |
| 13. Provides a fund of $55,000 annually at the expense of the hydroelectric power for maintenance and operation of locks and dams, exclusive of power house and equipment. The Chief of Engineers has testified that this is ample for that purpose. | 13. No provision requiring the power sold to pay cost of maintenance of locks. Locks continue to be maintained by Government appropriation. |
| 14. While nothing in Mr. Ford's offer compels him to distribute power not needed for fertilizer manufacture, he has promised the public in a statement broadcast to the country on October 11, 1923, that he would extend his power lines 200 miles in each direction from Muscle Shoals. This is a promise to the public which he can not violate with impunity, and it gives every reasonable assurance that, so far as is reasonably practicable, the Muscle Shoals power will be distributed. The distribution will be brought about with no expense whatever to the United States and no appropriations from the Federal Treasury. | 14. Under the Norris bill a conservative estimate of the cost of distribution by only five lines, averaging 375 miles in length, would call for an expenditure of more than $36,000,000, with no assurance whatever of a market at a price that would yield an adequate return on the investment. |

FARM RELIEF

Mr. RANKIN. Mr. Speaker, this Congress is about to adjourn; within a few hours this body, together with the one at the other end of the Capitol, will have disbanded and the various Members will have gone to their respective homes.

Three years have passed away since this administration came into power. The agricultural elements of the country have suffered more during that time than they ever had before. They have been crying out to Congress for help. What has this administration done to relieve their condition? Instead of granting a measure of relief it has piled upon the backs of the American farmers an additional burden in the form of the highest protective tariff ever passed in the history of the civilized world. When the farmer asked for bread you gave him a stone, which you tied about his neck in the form of a tariff

for the benefit of his exploiters, and to-day he is paying more for what he buys according to what he gets for the things he sells than he ever has in the history of this Republic. You have done nothing to advance the price of farm products, which have been gradually declining ever since you came into power; but you have levied a tariff on the necessities of life, collecting a toll on everything he buys "from the swaddling cloths of infancy to the lining of the coffin in which old age is laid away." That toll does not go into the Federal Treasury to help reduce the burden of taxation, but it goes into the pockets of the manufacturers to increase their prosperity at the expense of the American people. Four billions of dollars are thus taken from the masses of the American people annually, of which $3,600,000,000 goes into the pockets of the tariff barons, who have been the chief beneficiaries of this administration. [Applause.]

As a result the farmers are going bankrupt, their credit is being cut off, and their homes are being sold under the hammer. Never in the history of this country have the farmers, especially those in the Western States, suffered as they are suffering now, and everyone else whose prosperity depends on the success of agriculture is suffering in the same way. In addition to the great multitude of farmers who have had their homes swept away by this high tide of misgovernment, hundreds of banks have failed, thousands of merchants have been forced to close their doors, professional men have pulled up and moved to the cities, and schools have closed, while faminelike depression has spread over the land.

What are you going to tell these people when you go home? Are you going to admit that this administration has not tried to relieve them, or do you expect to try to deceive them into indorsing this administration and in their despair underwriting their own destruction? Well, you can not fool hungry, homeless, or bankrupt people into believing that they will ultimately grow prosperous as a result of the same influences which wrought their ruin.

You could relieve the American farmers in 10 days if you really wanted to do so. I have introduced a resolution to exempt from import or tariff duties all articles shipped in from foreign countries and exchanged for American farm products. If you will pass that resolution, you will see farm products begin to move as they have not moved since the close of the war. You will see them advance in price to where the farmers can produce them at a profit. You will see trade and industry stimulated throughout the world. There will come to the American farmers, and incidentally to all the people in the agricultural States, the greatest measure of sound prosperity they have ever enjoyed.

Then you would not have to go down into the Treasury to appropriate money to feed the hungry children of Europe. Large enterprises needing foreign goods would purchase the products of the American farms to exchange for them. Not only would our surplus farm products then be moving toward the hungry people of the Old World, but their industries would be stimulated so that they could have employment at which to earn a livelihood.

We do not have to adjourn this Congress. It is much more important that we pass legislation for the relief of the agricultural sections than it is for Members to get away from here in time to attend political conventions. For my part, I opposed the adjournment resolution; I think we ought to stay here until we give the American people some relief from these unbearable conditions.

But the trouble is that while a great many of you gentlemen on the Republican side of the aisle would be glad to support my resolution—you would be glad to help us relieve these hard conditions—the real powers that control this administration are more in sympathy with the tariff magnates and the other interests that are profiting as a result of these conditions than they are with the masses of the American people.

I expect to renew this fight when we come back here in December. Something must be done. Your three cheers for the farmers will not relieve their distressed conditions. [Laughter.]

We are going to carry this fight to the people this year, and if present indications mean anything the voters in the agricultural States are going to elect men to public office this fall who are in favor of saving the agricultural industry from the implacable destruction which would be the inevitable result of the continuation of the present outrageous tariff policy. [Applause.]

ENROLLED BILLS SIGNED

Mr. ROSENBLOOM, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. J. Res. 283. Joint resolution to permit to remain within the United States certain aliens in excess of quotas fixed under authority of the immigration act of May 19, 1921;

H. R. 4088. An act to establish the upper Mississippi River wild life and fish refuge;

H. R. 7079. An act prohibiting the importation of crude opium for the purpose of manufacturing heroin;

H. R. 7731. An act authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation;

H. R. 9434. An act granting the consent of Congress to the States of Georgia and Florida, through their respective highway departments, to construct a bridge across the St. Marys River;

H. R. 1414. An act to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes;

H. R. 6426. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors;

H. R. 9612. An act granting the consent of Congress to the State of Georgia, through its highway department, to construct a bridge across the Oconee River;

H. R. 9314. An act to amend section 98 of the Judicial Code;

H. R. 9402. An act granting the consent of Congress to the Fullerton & Portsmouth Bridge Co. to construct a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky.;

H. R. 9361. An act granting the consent of Congress to the construction of a bridge across the Rio Grande;

H. R. 9610. An act granting the consent of Congress to the Board of Supervisors of Lowndes County, Miss., to construct a bridge across Tombigbee River;

H. R. 1830. An act for the relief of Charles T. Norman;

H. R. 9515. An act granting the consent of Congress to the Delaware State Highway Department to construct a bridge across the canal near Rehoboth;

H. R. 1306. An act for the relief of Henry McGuire;

H. R. 9111. An act directing the remission of customs duties on certain property of the United States imported by the War Department;

H. R. 6652. An act to authorize the city of Los Angeles, in the State of California, to construct and operate a line of railroad across the Fort MacArthur Military Reservation, in the State of California;

H. R. 6950. An act to authorize the incorporated town of Cordova, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in said town of Cordova, Alaska;

H. R. 9457. An act granting the consent of Congress to the States of Alabama and Georgia, through their respective highway departments, to construct and maintain a bridge across the Chattahoochee River at or near Alaga, Ala., connecting Houston County, Ala., and Early County, Ga.;

H. R. 9517. An act granting the consent of Congress to the North Texas Co., of St. Jo, Tex., a corporation organized under the laws of the State of Texas, to construct a toll bridge across the Red River in the vicinity of Illinois Bend, Tex.;

H. R. 6972. An act for the relief of William H. Nelson;

H. R. 4830. An act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote the continuous production of timber on lands chiefly suitable therefor;

H. R. 6255. An act to amend an act entitled "An act to authorize the incorporated town of Ketchikan, Alaska, to issue its bonds in any sum not to exceed $100,000 for the purpose of constructing a schoolhouse in said town and equipping the same," approved February 7, 1920;

H. R. 8578. An act to amend the act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," approved February 17, 1911, as amended;

H. R. 8839. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 9345. An act granting the consent of Congress for the construction of a bridge across the Ohio River between Vanderburgh County, Ind., and Henderson County, Ky.;

H. R. 9177. An act granting the consent of Congress to the counties of Kittitas and Grant, in the State of Washington, to

construct a bridge across the Columbia River at or near Vantage Ferry, Wash.;

H. R. 5318. An act to authorize an exchange of lands with the State of Washington;

H. R. 7998. An act granting public lands to the city of Golden, Colo., to secure a supply of water for municipal and domestic purposes;

H. R. 9429. An act making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 4835. An act to pay tuition of Indian children in public schools;

H. R. 7996. An act to regulate and fix rates of pay for employees and officers of the Government Printing Office;

H. R. 4816. An act authorizing the Secretary of War to permit the city of Vicksburg, Miss., to construct and maintain water mains on and under the National Cemetery Road at Vicksburg, Miss.;

H. R. 6049. An act for the relief of V. E. Schermerhorn, E. C. Caley, G. W. Campbell, and Philip Hudspeth;

H. R. 3477. An act for the relief of James B. Porter;

H. R. 5325. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes;

S. J. Res. 146. Joint resolution to amend section 13 of the act entitled "An act to provide for the classification of civilian positions within the District of Columbia and the field service";

S. J. Res. 43. Joint resolution in relation to a monument to commemorate the services and sacrifices of the women of the United States of America, its insular possessions, and the District of Columbia in the World War;

S. 2694. An act to enable the trustees of Howard University to develop an athletic field and gymnasium project, and for other purposes;

S. 2257. An act to consolidate, codify, revise, and reenact the laws affecting the establishment of the United States Veterans' Bureau and the administration of the war risk insurance act, as amended, and the vocational rehabilitation act, as amended;

S. 3420. An act granting the consent of Congress to the construction, maintenance, and operation by the Denver & Rio Grande Western Railroad Co., its successors and assigns, of a line of railroad across the southwesterly portion of the Fort Logan Military Reservation in the State of Colorado;

S. 3355. An act granting the consent of Congress to the counties of Marion and Florence, in the State of South Carolina, to construct a bridge across the Peedee River at or near Savage Landing, S. C.;

S. 3263. An act to provide for the inspection of the battle fields in and around Fredericksburg and Spotsylvania Court House, Va.;

S. 3244. An act granting the consent of Congress to the Board of Supervisors of Hinds County, Miss., to construct a bridge across the Pearl River in the State of Mississippi;

S. 3188. An act for the abandonment of a portion of the present channel of the south branch of the Chicago River;

S. 3116. An act to authorize the Choctaw, Oklahoma & Gulf Railway Co. and the Chicago, Rock Island & Pacific Railway Co. to construct a bridge across the White River near the city of De Valls Bluff, Ark.;

S. 3111. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Stockbridge Indians may have against the United States, and for other purposes;

S. 3024. An act providing for the acquirement by the United States of privately owned lands within Rio Arriba and Taos Counties, N. Mex., known as the Las Trampas grant, by exchanging therefor timber within the exterior boundaries of any national forest situated within the State of New Mexico;

S. 3023. An act designating the State of New Mexico as a judicial district, fixing the time and place for holding terms of court therein, and for other purposes;

S. 2834. An act relating to the American Academy in Rome;

S. 2761. An act to authorize the withdrawal of lands for the protection of antelope and other game animals and birds;

S. 2699. An act to amend an act creating the Custer State Park game sanctuary in the State of South Dakota;

S. 2236. An act to designate the time and place of holding terms of the United States district court in the first division of the district at Kansas City;

S. 2159. An act authorizing annual appropriations for the maintenance of that portion of Gallup-Durango highway across the Navajo Indian Reservation and providing reimbursement therefor;

S. 1785. An act to amend an act entitled "An act for the regulation of the practice of dentistry in the District of Columbia, and for the protection of the people from empiricism in relation thereto," approved June 6, 1892, and acts amendatory thereof;

S. 1308. An act authorizing an appropriation to enable the Secretary of the Interior to purchase a tract of land, with sufficient water right attached, for the use and occupancy of the Temoak Band of homeless Indians, located at Ruby Valley, Nev.;

S. 1203. An act to amend an act entitled "An act authorizing an appropriation to meet proportionate expenses of providing a drainage system for Piute Indian lands in the State of Nevada within the Newlands reclamation project of the Reclamation Service," approved February 14, 1923;

S. 1192. An act to confer jurisdiction upon the United States District Court, Northern District of California, to adjudicate the claims of American citizens;

S. 699. An act authorizing the addition of certain lands to the Medicine Bow National Forest, Wyo., and for other purposes;

S. 697. An act providing for the disposal of certain lands on Crooked and Pickerel Lakes, Mich., and for other purposes;

S. J. Res. 115. Joint resolution to provide for the free transmission through the mails of certain publications for the blind;

S. J. Res. 114. Joint resolution authorizing an investigation of the proposed Casper-Alcova irrigation project, Natrona County, Wyo.; the Deschutes project, in the State of Oregon; and the Southern Lassen irrigation project, in Lassen County, Calif.;

S. 113. An act changing the name of Keokuk Street, in the county of Washington, D. C., to Military Road.

S. J. Res. 106. Joint resolution authorizing the erection on public grounds in the city of Washington, D. C., of an equestrian statue of General San Martin, which the people of Argentina have presented to the United States;

S. J. Res. 103. Joint resolution authorizing expenditure of the Fort Peck 4 per cent fund now standing to the credit of the Fort Peck Indians of Montana in the Treasury of the United States;

S. J. Res. 90. Joint resolution providing an extension of time for payment by entrymen of lands on the Fort Assiniboine abandoned military reservation in the State of Montana;

S. J. Res. 73. Joint resolution providing for the appointment of a commission for the purpose of erecting in Potomac Park, in the District of Columbia, a memorial to those members of the armed forces of the United States from the District of Columbia who served in the Great War;

S. 3380. An act to grant the consent of Congress to the Cincinnati, New Orleans & Texas Pacific Railway Co. to construct, maintain, and operate a bridge across the Cumberland River, in the county of Pulaski, State of Kentucky, near the town of Burnside;

S. 3093. An act granting certain public lands to the city of Phœnix, Ariz., for municipal, park, and other purposes;

S. 1309. An act for the relief of settlers and town-site occupants of certain lands in the Pyramid Lake Indian Reservation, Nev.;

S. 2573. An act to amend and reenact sections 20, 22, and 50 of the act of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes";

S. 2704. An act to amend paragraph (3), section 16, of the interstate commerce act;

S. 2932. An act to quiet the title to lands within the Pueblo Indian land grants, and for other purposes;

S. 2572. An act to purchase grounds, erect, and repair buildings for customhouses, offices, and warehouses in Porto Rico;

S. 588. An act for the relief of Daniel A. Spaight and others;

S. J. Res. 137. Joint resolution in respect of salaries of original appointees to the Board of Tax Appeals;

S. 3434. An act for the protection of the northern Pacific halibut fishery;

S. 1942. An act to protect navigation from obstruction and injury by preventing the discharge of oil into the coastal navigable waters of the United States;

S. 668. An act to establish the Utah National Park in the State of Utah;

S. 1376. An act to provide for the equitable distribution of captured war devices and trophies to the States and Territories of the United States and to the District of Columbia;

S. 1614. An act to repeal an act authorizing the construction of bridges across the Great Kanawha River;

S. 3324. An act to amend section 5 of the trade-mark act of 1905, as amended, relative to the unauthorized use of portraits;

S. 3220. An act authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late George Mauger Burklin and the remains of the late Anton Lerch Burklin from Glenwood Cemetery, District of Columbia, to Fort Lincoln, Prince Georges County, Md.;

S. 2799. An act to provide for quarters, fuel, and light for employees of the Indian Field Service;

S. 3269. An act to amend an act regulating the height of buildings in the District of Columbia, approved June 1, 1910;

S. 790. An act for the establishment of a Federal industrial institution for women, and for other purposes;

S. 1987. An act accepting certain tracts of land in the city of Medford, Jackson County, Oreg.; and

S. 2887. An act authorizing transfer of certain abandoned or unused lighthouse reservation lands by the United States to the State of New York for park purposes.

MESSAGE FROM THE PRESIDENT

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had approved and signed bills of the following titles:

On June 6:

H. R. 2607. An act for the relief of Jesse L. Meeks;

H. R. 7122. An act for the relief of the Eagle Pass Lumber Co., of Eagle Pass, Tex.;

H. R. 8961. An act for the relief of Frank Stinchcomb; and

H. R. 905. An act for the relief of Gerard E. Bess.

On June 7:

H. R. 7877. An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 8233. An act making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 3104. An act granting 160 acres of land to the Western State College of Colorado, at Gunnison, Colo., for the use of the Rocky Mountain biological station of said college;

H. R. 2126. An act for the relief of C. C. Carson;

H. R. 9429. An act making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 8839. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 7998. An act granting public lands to the city of Golden, Colo., to secure a supply of water for municipal and domestic purposes;

H. R. 5318. An act to authorize an exchange of lands with the State of Washington;

H. R. 4816. An act authorizing the Secretary of War to permit the city of Vicksburg, Miss., to construct and maintain water mains on and under the National Cemetery Road at Vicksburg, Miss.;

H. R. 526. An act authorizing the Secretary of War to enter into an arrangement on behalf of the United States with the Alexandria Light & Power Co. whereby civilians may obtain electric current from a Government-owned transmission line extending from Alexandria to Fort Humphreys, Va.;

H. R. 4526. An act to incorporate the United States Blind Veterans of the World War;

H. R. 4835. An act to pay tuition of Indian children in public schools;

H. R. 192. An act to provide for a girls' dormitory at the Fort Lapwai Sanatorium, Lapwai, Idaho;

H. R. 5325. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes;

H. R. 2821. An act authorizing the erection of a sanitary, fireproof hospital at the National Home for Disabled Volunteer Soldiers at Santa Monica, Calif.;

H. R. 2123. An act for the relief of the Thompson-Vache Boat Co., of Bonnots Mill, Mo.;

H. R. 2647. An act for the relief of Lena Garagnon Owens;

H. R. 6049. An act for the relief of V. E. Schermerhorn, E. C. Caley, G. W. Campbell, and Philip Hudspeth;

H.R. 8237. An act for the relief of Bruusgaard Kiosteruds Dampskibs Aktieselskab, a Norwegian corporation of Drammen, Norway;

H. R. 1438. An act for the relief of D. H. MacAdam;

H. R. 3477. An act for the relief of James B. Porter;

H. R. 4012. An act to reimburse William H. Flagg and others for property destroyed by mail airplane No. 73, operated by the Post Office Department;

H. R. 4442. An act to extend the insurance and collect-on-delivery service to third-class mail, and for other purposes;

H. R. 5541. An act for the relief of Hubert Reynolds;

H. R. 9177. An act granting the consent of Congress to the counties of Kittitas and Grant, in the State of Washington, to construct a bridge across the Columbia River at or near Vantage Ferry, Wash.;

H. R. 9345. An act granting the consent of Congress for the construction of a bridge across the Ohio River between Vanderburgh County, Ind., and Henderson County, Ky.;

H. R. 6652. An act to authorize the city of Los Angeles, in the State of California, to construct and operate a line of railroad across the Fort MacArthur Military Reservation, in the State of California;

H. R. 9111. An act directing the remission of customs duties on certain property of the United States imported by the War Department;

H. J. Res. 283. Joint resolution to permit to remain within the United States certain aliens in excess of quotas fixed under authority of the immigration act of May 19, 1921;

H. R. 1414. An act to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes;

H. R. 1830. An act for the relief of Charles T. Norman;

H. R. 4088. An act to establish the upper Mississippi River wild life and fish refuge;

H. R. 4830. An act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote the continuous production of timber on lands chiefly suitable therefor;

H. R. 6255. An act to amend an act entitled "An act to authorize the incorporated town of Ketchikan, Alaska, to issue its bonds in any sum not to exceed $100,000 for the purpose of constructing a schoolhouse in said town and equipping the same," approved February 7, 1920;

H. R. 6950. An act to authorize the incorporated town of Cordova, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in said town of Cordova, Alaska;

H. R. 6972. An act for the relief of William H. Nelson;

H. R. 7079. An act prohibiting the importation of crude opium for the purpose of manufacturing heroin;

H. R. 7731. An act authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation;

H. R. 7996. An act to regulate and fix rates of pay for employees and officers of the Government Printing Office;

H. R. 8578. An act to amend the act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," approved February 17, 1911, as amended;

H. R. 8588. An act authorizing the Secretary of the Treasury to sell the United States Marine hospital reservation and improvements thereon at Detroit, Mich., and to acquire a suitable site in the same locality and to erect thereon a modern hospital for the treatment of the beneficiaries of the United States Public Health Service, and for other purposes;

H. R. 9314. An act to amend section 98 of the Judicial Code;

H. R. 9361. An act granting the consent of Congress to the construction of a bridge across the Rio Grande;

H. R. 9402. An act granting the consent of Congress to the Fullerton & Portsmouth Bridge Co. to construct a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky.;

H. R. 9434. An act granting the consent of Congress to the States of Georgia and Florida, through their respective highway departments, to construct a bridge across the St. Marys River;

H. R. 9457. An act granting the consent of Congress to the States of Alabama and Georgia, through their respective highway departments, to construct and maintain a bride across the Chattahootche River, at or near Alaga, Ala., connecting Houston County, Ala., and Early County, Ga.;

H. R. 9515. An act granting the consent of Congress to the Delaware State Highway Department to construct a bridge across the canal near Rehoboth, Del.;

H. R. 9517. An act granting the consent of Congress to the North Texas Co., of St. Jo, Tex., a corporation organized under

the laws of the State of Texas, to construct a toll bridge across the Red River in the vicinity of Illinois Bend, Tex.;

H. R. 9610. An act granting the consent of Congress to the Board of Supervisors of Lowndes County, Miss., to construct a bridge across Tombigbee River;

H. R. 9612. An act granting the consent of Congress to the State of Georgia, through its highway department, to construct a bridge across the Oconee River; and

H. R. 1306. An act for the relief of Henry McGuire.

LEAVE TO PRINT

Mr. SNELL. Mr. Speaker, as I understand the situation, each gentleman has the privilege of extending his own remarks for a period of 10 days.

The SPEAKER. Certainly.

Mr. LARSEN of Georgia. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LARSEN of Georgia. In the event unanimous consent is given, as has been done in several instances individually, does that extend beyond the 10-day period?

Mr. JOHNSON of Washington. I think so.

The SPEAKER. It will depend on when the last issue of the RECORD is printed.

Mr. LARSEN of Georgia. It will be the 24th of June, as I understand it. In that event, Mr. Speaker, I ask unanimous consent to extend my remarks.

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his own remarks in the RECORD. Is there objection?

There was no objection.

ADJUSTED COMPENSATION

Mr. THOMPSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the McGinnis resolution.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. THOMPSON. Mr. Speaker, the best commentary on the adjusted compensation measure, the storm center, or one of the storm centers, of Congress for the last five years, is that this measure is now a law. I sincerely believe that, freed of the distractions of the bitter fight waged when the matter was in controversy, the rank and file of the people of the country will decide that the right action was taken. When it is seen that this great country can justly recognize its veterans and at the same time do justice to its taxpayers by reducing taxes, a large measure of the carefully built resentment against adjusted compensation will melt away.

It has been said that the theory of patriotism interferes with the practice of giving adjusted compensation. This was one of the principal arguments against the measure. It has also been said that the country could not afford it, could not pass such a measure and reduce taxes, and that therefore it was not fair to the large unorganized body of taxpayers.

In answer to the first objection, let me say the giving of adjusted compensation has not been entertained in a spirit of reward for patriotic service, but as a simple matter of economic justice. This Government needed capital, labor, and soldiers to win the war. Capital was used and reaped enormous profits; the wages of labor doubled and trebled—it was necessary, and could ask without refusal; the soldiers, however, were drafted at $1.25 a day, part of which was taken back for Liberty bonds, insurance, and allotments to dependents. To adjust this economic condition, which was manifestly unfair to the soldier, is the purpose of this bill. We have all heard of the growing opinion of the country as a whole, that in the next war labor, capital, and men for military service should all be drafted. This is but an admission of the justice of the adjusted compensation law. The fact that the soldier also performed a patriotic service should not be allowed to confuse the issue, that of economic justice. To say that we are paying the soldier for patriotism is to say, in effect, that capital and labor were not patriotic. If it is admitted, as it must be, that capital and labor were patriotic, then we can not use the argument of "paying for patriotism" against the other class of men who helped win the war—the soldiers. The theory of a class of people fighting at great personal sacrifice to preserve the rights and fortunes of an upper class without recognition should have expired with the middle ages.

With reference to the objection that taxes can not be reduced if adjusted compensation is a law, I refer to the new revenue law just enacted and approved, which reduces taxes for the fiscal year ending June 30, 1925, by $361,000,000, and for the fiscal year ending June 30, 1926, by $400,000,000. It is admitted now that this reduction can be placed in effect and still leave a substantial surplus in the Treasury after paying the current expenses of the bonus or adjusted compensation.

The Republican platform contains a plank favoring adjusted compensation. Many of the States have already taken similar action, including Ohio, and I believe the people of the United States will also approve this action when all the facts are appreciated and when the operation of the law shows that none of the evils so violently predicted as a result of it will come to pass.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL

Mr. ROSENBLOOM, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 4526. An act to incorporate the United States Blind Veterans of the World War;

H. R. 2126. An act for the relief of C. C. Carson;

H. R. 5541. An act for the relief of Hubert Reynolds;

H. R. 192. An act to provide for a girls' dormitory at the Fort Lapwai Sanatorium, Lapwai, Idaho;

H. R. 1438. An act for the relief of D. H. MacAdam;

H. R. 2123. An act for the relief of the Thompson-Vache Boat Co., of Bonnots Mill, Mo.;

H. R. 2647. An act for the relief of Lena Garagnon Owens;

H. R. 4442. An act to extend the insurance and collect-on-delivery service to third-class mail, and for other purposes;

H. R. 8237. An act for the relief of Bruusgaard Kiosteruds Dampskibs Aktieselskab, a Norwegian corporation, of Drammen, Norway;

H. R. 2821. An act authorizing the erection of a sanitary, fireproof hospital at the National Home for Disabled Volunteer Soldiers at Santa Monica, Calif.;

H. R. 4012. An act to reimburse William H. Flagg and others for property destroyed by mail airplane *No. 73*, operated by the Post Office Department;

H. R. 3104. An act granting 160 acres of land to the Western State College of Colorado, at Gunnison, Colo., for the use of the Rocky Mountain biological station of said college; and

H. R. 8233. An act making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1925, and for other purposes.

H. R. 7731. An act authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation;

H. R. 7079. An act prohibiting the importation of crude opium for the purpose of manufacturing heroin;

H. R. 5318. An act to authorize an exchange of lands with the State of Washington;

H. R. 9177. An act granting the consent of Congress to the counties of Kittitas and Grant, in the State of Washington, to construct a bridge across the Columbia River at or near Vantage Ferry, Wash.;

H. R. 7998. An act granting public lands to the city of Golden, Colo., to secure a supply of water for municipal and domestic purposes;

H. R. 9345. An act granting the consent of Congress for the construction of a bridge across the Ohio River between Vanderburgh County, Ind., and Henderson County, Ky.;

H. R. 9429. An act making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 8839. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 4835. An act to pay tuition of Indian children in public schools;

H. R. 6049. An act for the relief of V. E. Schemerhorn, E. C. Caley, G. W. Campbell, and Philip Hudspeth;

H. R. 3477. An act for the relief of James B. Porter;

H. R. 4816. An act authorizing the Secretary of War to permit the city of Vicksburg, Miss., to construct and maintain water mains on and under the National Cemetery Road at Vicksburg, Miss.;

H. R. 5325. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes;

H. R. 7996. An act to regulate and fix rates of pay for employees and officers of the Government Printing Office;

H. R. 4830. An act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote

the continuous production of timber on lands chiefly suitable therefor;

H. R. 6950. An act to authorize the incorporated town of Cordova, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in said town of Cordova, Alaska;

H. R. 9314. An act to amend section 98 of the Judicial Code;

H. R. 6255. An act to amend an act entitled "An act to authorize the incorporated town of Ketchikan, Alaska, to issue its bonds in any sum not to exceed $100,000 for the purpose of constructing a schoolhouse in said town and equipping the same," approved February 7, 1920;

H. R. 6972. An act for the relief of William H. Nelson;

H. R. 9517. An act granting the consent of Congress to the North Texas Co., of St. Jo, Tex., a corporation organized under the laws of the State of Texas, to construct a toll bridge across the Red River in the vicinity of Illinois Bend, Tex.;

H. R. 9457. An act granting the consent of Congress to the States of Alabama and Georgia, through their respective highway departments, to construct and maintain a bridge across the Chattahoochee River, at or near Alaga, Ala., connecting Houston County, Ala., and Early County, Ga.;

H. R. 6652. An act to authorize the city of Los Angeles, in the State of California, to construct and operate a line of railroad across the Fort MacArthur Military Reservation, in the State of California;

H. R. 9111. An act directing the remission of customs duties on certain property of the United States imported by the War Department;

H. R. 9612. An act granting the consent of Congress to the State of Georgia, through its highway department, to construct a bridge across the Oconee River;

H. R. 9402. An act granting the consent of Congress to the Fullerton & Portsmouth Bridge Co. to construct a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky.;

H. R. 9361. An act granting the consent of Congress to the construction of a bridge across the Rio Grande;

H. R. 1306. An act for the relief of Henry McGuire;

H. R. 1830. An act for the relief of Charles T. Norman;

H. R. 9610. An act granting the consent of Congress to the Board of Supervisors of Lowndes County, Miss., to construct a bridge across Tombigbee River;

H. R. 9515. An act granting the consent of Congress to the Delaware State Highway Department to construct a bridge across the canal near Rehoboth, Del.;

H. R. 8578. An act to amend the act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," approved February 17, 1911, as amended;

H. R. 1414. An act to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes;

H. R. 4088. To establish the upper Mississippi River wild-life and fish refuge; and

H. R. 9434. Granting the consent of Congress to the States of Georgia and Florida, through their respective highway departments, to construct a bridge across the Saint Marys River.

EMERGENCY DEFICIENCY

Mr. MADDEN. Mr. Speaker, I move to suspend the rules and pass the following House joint resolution.

The SPEAKER. The gentleman from Illinois moves to suspend the rules and pass the following joint resolution, which the Clerk will report.

The Clerk read as follows:

*Resolved, etc.*, That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the following sums, for the service of the fiscal year ending June 30, 1925, namely:

GENERAL ACCOUNTING OFFICE

For personal services in the District of Columbia in accordance with the classification act of 1923, fiscal year 1925, $75,240.

UNITED STATES VETERANS' BUREAU

Administrative expenses, World War adjusted compensation act: For administrative expenses in carrying out the provisions of the World War adjusted compensation act of May 19, 1924, including salaries of personnel in the District of Columbia and elsewhere in accordance wtih the classification act of 1923; purchase, hire, exchange, and repair of typewriters, adding machines, and other mechanical devices, furniture, office equipment, printing and binding, telegrams, telephones, stationery, traveling expenses and per diem in lieu of subsistence at not exceeding $4 for officers, agents, and other employees, and for other necessary contingent and miscellaneous expenses to enable the Director of the United States Veterans' Bureau to perform such duties as are required by said act, $1,188,500, to remain available until June 30, 1925: *Provided*, That the Secretary of the Treasury is authorized to issue to the Director of the United States Veterans' Bureau, without charge, for temporary use, such surplus office supplies and equipment as may be under the control of the General Supply Committee.

Adjusted service and dependent pay: For payment of adjusted service credits of not more than $50 each, as provided in sections 401 and 601 of the "World War adjusted compensation act" of May 19, 1924, and for payment to dependents of deceased veterans the quarterly installments due on adjusted service credits in excess of $50 each, as provided in sections 601 and 603 of said act, $26,629,398, to remain available until expended.

Adjusted service certificate fund: For the amount authorized in section 505 of the World War adjusted compensation act of May 19, 1924, to provide for the payment of the face value of each adjusted service certificate in 20 years from its date or on the prior death of the veteran, $100,000,000, to remain available until expended.

NAVY DEPARTMENT

Administrative expenses, World War adjusted compensation act: For temporary personal services in the District of Columbia in accordance with the classification act of 1923, purchase, hire, exchange, and repair of typewriters, adding machines, and other mechanical devices, printing and binding, stationery, office supplies and equipment, transportation of things, and for other necessary contingent and miscellaneous expenses, to enable the Secretary of the Navy to perform such duties as are required by the World War adjusted compensation act of May 19, 1924, $450,000, to remain available until June 30, 1925: *Provided*, That the Secretary of the Treasury is authorized to issue to the Secretary of the Navy, without charge, for temporary use, such surplus office supplies and equipment as may be under the control of the General Supply Committee.

WAR DEPARTMENT

Administrative expenses, World War adjusted compensation act: For temporary personal services in the District of Columbia in accordance with the classication act of 1923, purchase, hire, exchange, and repair of typewriters, adding machines, and other mechanical devices, printing and binding, stationery, office supplies and equipment, telegrams, telephones, maintenance and operation of motor trucks, transportation of things, other necessary contingent and miscellaneous expenses, and rent of buildings and parts of buildings in the District of Columbia, if space is not provided by the Public Buildings Commission in Government-owned buildings, to enable the Secretary of War to perform such duties as are required of him by the World War adjusted compensation act of May 19, 1924, $3,600,000, to remain available until June 30, 1925: *Provided*, That the Secretary of the Treasury is authorized to issue to the Secretary of War, without charge, for temporary use, such surplus office supplies and equipment as may be under the control of the General Supply Committee.

Mr. MADDEN. Mr. Speaker, there is likelihood of the deficiency bill failing, in which event it would prevent the payment of the bonus voted by the Congress as adjusted compensation to the men who served in the World War. The resolution which has just been read, introduced by me, is to provide for the payment of adjusted compensation to the World War veterans regardless of what may happen in the Senate with regard to the deficiency bill.

The SPEAKER. The question is on the motion of the gentleman from Illinois to suspend the rules and pass the resolution.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the resolution was passed.

THE FISCAL RECORD OF THE REPUBLICAN PARTY

Mr. MADDEN. It will be my aim in this statement to present briefly and clearly not only a résumé of the appropriations made during the session of Congress which has just closed, but also to recount in an historical manner the record of the Republican Party in connection with the finances of the Nation commencing with the convening of the Republican Congress in the spring of 1919.

The Republican Party came into power in the Congress on March 4, 1919, as a result of the elections of the fall of 1918. The new Congress was summoned into extra session by President Wilson on May 19, 1919. President Harding took office on March 4, 1921, as a result of the elections of the fall of 1920. The financial record made by the Republican Congress during the two years from 1919 to 1921, while the administration was Democratic, and by the Republican administration in

full control of the executive and legislative branches of the Government since 1921 is not surpassed in any period of the history of the country.

Upon assembling in extra session in 1919, the Republican Congress was confronted with innumerable and difficult fiscal problems. The country had just emerged from a devastating war, Government expenditures were on a scale which no nation could long endure, administrative officials were striving to hold at swollen strength many of the enlarged activities of the Government, the number of Federal employees was not diminishing with the rapidity that cessation of war activities would permit, the public debt and the annual interest charge were a burden upon the resumption of normal financing, taxation was crushing the individual and stifling business, and the American people were demanding a speedy resumption of normal conditions in the finances of the Government as a much-needed relief to them individually and as an example and healthy impetus to industry. The new Congress dedicated itself to the task of initiating the reforms which would accomplish the relief the public was demanding.

The reduction of taxes, the curtailment of the public debt, the elimination of surplus employees, and the shrinkage of Federal activities could not be accomplished without a drastic reduction of expenditures, and that could only be had by a decrease in appropriations.

Upon assembling in extra session in May, 1919, the new Republican Congress was confronted with the duty of passing, before the commencement of the fiscal year on July 1, 1919, eight of the largest of the supply bills which the Democratic Congress had failed to enact into law before it went out of power. Those bills at the time of their failure were all pending in the Senate. The amounts carried in them at the time of their failure aggregated $3,768,000,000. The total of the same eight bills after their repassage was $2,828,000,000. The first legislative action of the new Congress resulted in the passage of these bills before the fiscal year began and in the decrease of the appropriations proposed by the Democratic Congress for the fiscal year 1920 by $940,000,000. The estimates for the fiscal years ending June 30, 1921 and 1922, respectively, and deficiency estimates for prior years, were prepared by the Wilson administration and submitted to the Republican Congress. The reductions made by the Congress in these estimates aggregate slightly more than $2,950,000,000. The total reductions which the Republican Congress effected in the amounts proposed to it by the Democratic administration for the fiscal years 1920, 1921, and 1922, reach $3,890,000,000, a sum which is greater than the appropriations for the next fiscal year even if we include in them the figures on account of the World War adjusted compensation act.

In addition to the reduction effected in the estimates of the Democratic administration and the bills of the Democratic Congress, the new Congress, in connection with the preparation of the appropriation bills for the three fiscal years to which I have just alluded also brought about the repeal of war-time appropriations, which were on the books and subject to expenditure, totaling $1,140,000,000.

The new Congress at once realized that the conduct of the finances of the Government according to safe principles could not be accomplished without the inauguration of a systematic procedure. It accordingly prepared and presented to President Wilson the Budget bill. His veto of that legislation postponed until the advent of the present administration the enactment of that important measure. The new law was signed by President Harding on June 10, 1921. Its operation has covered the period of three full fiscal years of expenditure and the preparation of the Budget for the next fiscal year.

The accomplishments under the new system have exceeded the expectations of those who championed its installation. The outstanding principles are, namely: (1) The placing upon the President of the responsibility for the submission of coordinated expenditure and revenue proposals to Congress; (2) the business control required to be exercised by him over expenditures after the appropriations have been made; (3) the centralization over the making of appropriations in a single committee in each the Senate and House of Representatives; and (4) the creation of a centralized and independent audit of accounts.

To the late President Harding and his first Director of the Budget, General Dawes, are due great credit for the successful inauguration of the executive phase of the system. To President Coolidge and the present director, General Lord, who have followed earnestly and courageously the standards set by their predecessors, merited praise should be accorded. The success of the Budget is in direct proportion to the interest taken by the President of the United States in shaping its proposals and the Republican incumbents have begun and carried on a procedure that has not only placed the finances of the country on a sound basis but has given to the Nation a permanent system that will inure to its benefit in the future.

The change in the procedure in the Senate and House to accord with the changed methods in the executive branch has worked equally well. The wide margin between Executive estimates and congressional appropriations has narrowed. The past year and the year just closed find the appropriations made by Congress not more than $10,000,000, less than the proposals submitted by the President. The cooperation of the executive branch of the Government with the legislative branch under the Budget system has been the chief factor in the success in keeping down the appropriations and expenditures of the Government and making possible the natural sequences of such efforts, namely, tax reduction and diminution of the public debt.

The total amount appropriated at this session of Congress for the fiscal year 1925 and for the discharge of obligations on account of the fiscal year 1924 and prior years in all acts and under the permanent and indefinite appropriations is $3,784,123,324.35. This sum is incomplete, due to the failure of the second deficiency appropriation bill carrying $186,833,288.49 and the bill to provide additional appropriations to enable the heads of departments to place employees in certain of the field services on a comparable basis with employees in the District of Columbia carrying $26,357,767.84. Including the amounts in these two bills the total for the session should be stated at $3,997,314,380.68. The corresponding amount appropriated during the last session of the Sixty-seventh Congress for the fiscal year 1924 and for the discharge of obligations on account of the fiscal year 1923 and prior years in all acts and under the permanent and indefinite appropriations is $4,097,499,197.04. The total for the present session is therefore $100,184,816.36 less than the amount similarly appropriated at the last session of Congress. There is included in the second deficiency bill, which failed, the sum of approximately $132,000,000 on account of the first year's expenses under the World War adjusted compensation act. The total reduction in the appropriations at this session under the appropriations of the previous session, if it had not been for the enactment of the adjusted compensation act, would be in excess of $232,000,000.

The total of the Budget estimates submitted at this session for the fiscal year 1925 and for prior years, excluding the estimates transmitted in connection with the two bills which failed of enactment, aggregate $3,793,131,961.43. This sum, contrasted with the total of appropriations made during the session, $3,784,123,324.35, shows a net reduction in all of the Budget estimates, regular annual and deficiency, of $9,008,637.08. This is the narrowest margin between appropriations and estimates since the establishment of the Budget system and is gratifying evidence of the accord between the Executive and the Congress on the sums of money which are necessary for an economical and efficient functioning of the Government. There have been no substantial increases made by Congress in the Budget estimates nor have there been any marked decreases in such estimates. The difference is so small in percentage of the total that it amounts in practical effect to ratification of the Budget as submitted.

The total of $3,784,123,324.35 is classified according to fiscal years as follows:

| | |
|---|---|
| For the fiscal year 1925 | $3,622,125,959.19 |
| For the fiscal year 1924 | 149,464,629.69 |
| For the fiscal year 1923 and prior years | 12,532,735.47 |

The total for the fiscal year 1925 is incomplete without the inclusion of the amounts for that fiscal year carried in the two bills which failed. The amount in the second deficiency bill for the fiscal year 1925 is approximately $175,000,000, and the amount in the field service classification bill of $26,357,767.84, make a total for 1925 in the two failed bills of $201,357,767.84. This sum added to the $3,622,125,959.19 above gives a grand total for the fiscal year 1925 of $3,823,483,727.03.

The total of appropriations for the fiscal year 1924, including appropriations for that fiscal year carried in the regular annual bills and under permanent and indefinite appropriations and also including appropriations for that fiscal year carried in deficiency appropriation acts at this session, is $4,013,109,837.81. This sum, compared with the total for the fiscal year 1925, just stated, shows a decrease in favor of the fiscal year 1925 of $189,626,110.78.

The reductions which contribute largely to this difference between the two years are composed of the following amounts: The appropriations for the Shipping Board are decreased from $50,411,500 to $30,344,000, or by $20,067,500; the funds for support of the Veterans' Bureau, exclusive of the soldiers' bonus,

have declined from $138,161,390.16 to $349,065,000, a reduction of $84,096,390.16; the appropriation for the payment of contract obligations with the States for cooperative road construction are $13,300,000 less than for 1924; the appropriations for payment of pensions are reduced from $254,774,660 to $224,616,000, or a decrease of $30,158,660; the appropriations for the Navy are $19,913,223 less than for the current year; the appropriations for the Treasury Department proper are approximately $95,000,000 less than for 1924, in which year is included $105,000,000 for refunding taxes erroneously collected in previous years; the interest on the public debt is reduced from $940,000,000 to $890,000,000; public-debt retirement funds show a decrease of $29,690,150; and the civil activities of the War Department are less by $13,627,561 than appropriations for 1924.

The increases in the fiscal year 1925, in addition to the $132,000,000 for the bonus, over the fiscal year 1924, including follows: The Postal Service is increased from $597,000,879.56 in the former year the amounts in the bills which failed, are as to $613,645,195.25, an increase of $16,644,315.69, due to the natural growth of the service; the Department of Commerce is increased in the sum of $4,398,283.66, of which $3,500,000 is for the expense of taking the quinquennial census of agriculture; the classification of employees in the District of Columbia represents an increase of approximately $3,200,000 over the amounts for the current year, and the funds in the bill for field employees, which failed, represent an increase of approximately $6,000,000 over the totals for the same purpose for 1924.

The largest single item in the deficiency bill which failed is the aggregate of the amounts for the administration and payment of expenses in connection with the World War adjusted compensation act. These sums total nearly $132,000,000 and are an entirely new item of appropriation. The failure of the bill which carried this money will not materially delay the administration of the new law. Payments under the act and certificates of insurance to be issued in accordance with its provisions can not be accomplished under the law prior to January 1 next, before which time Congress will have assembled and completed the enactment of the appropriation bill.

Another large item in the same bill is the sum of $16,140,000 for the refund of internal-revenue taxes under the provisions of the new revenue act granting a 25 per cent reduction in taxes for the calendar year 1923. These refunds will be made from the amounts already appropriated for tax refunds, and no delay to the taxpayer should occur because of the failure of this bill.

The failure of the bill providing appropriations to place the employees in certain of the field services on the same basis as employees in the District of Columbia under the classification act, while providing a hardship in a minority of cases, will not preclude the payment of salaries during the next fiscal year at the rates contemplated in the bill which failed. The appropriations regularly made for the services which participate in the provisions of that bill will be used temporarily and later supplemented by the amounts in the bill when it is finally enacted in December. The bill has passed all stages of legislative completion with the exception of the signatures of the Speaker and the President of the Senate.

The appropriations made during the session just closed, aside from the adjusted compensation act, do not provide for any unusual new activities of Government. The sums granted have been confined almost wholly to existing activities and within limits of amounts which do not permit any marked expansion, with the exception of the provision for a large number of additional vessels and the necessary personnel in the Coast Guard to enable that service to cope with the "rum-running" fleets operating in violation of the prohibition laws. The record of the session follows that of the preceding sessions under the control of the Republican Party and shows, as have several of the previous sessions, a marked decline in the appropriations.

The record of the Republican Party in reducing appropriations commenced with the reductions made in the spring of 1919 by the Republican House in the estimates and appropriations of the Democratic administration. The following table shows the appropriations for each fiscal year commencing with the fiscal year 1920 and ending with the fiscal year 1925. In these amounts the appropriations are segregated by fiscal years irrespective of the session of Congress in which they may have occurred, and are exclusive of audited claims and judgments:

| | |
|---|---|
| Appropriations, fiscal year 1920 | $7,046,000,000 |
| Appropriations, fiscal year 1921 | 4,049,000,000 |
| Appropriations, fiscal year 1922 | 4,165,000,000 |
| Appropriations, fiscal year 1923 | 3,945,000,000 |
| Appropriations, fiscal year 1924 | 4,013,000,000 |
| Appropriations, fiscal year 1925 (this sum includes amounts for 1925 in the two bills which failed) | 3,823,000,000 |

The foregoing tabulation shows a gratifying reduction in annual appropriations for support of the Government since the Republican Party began its program of retrenchment and financial reform. The reduction in the annual appropriations, from $7,046,000,000 to $3,823,000,000, is $3,223,000,000. This has been accomplished notwithstanding the increase of approximately $132,000,000 for the next fiscal year on account of the soldiers' bonus.

Reductions in public expenditures are directly dependent upon reductions in appropriations. The former can not be accomplished without the latter. The decrease in appropriations has made possible gratifying reductions in the annual expenditures of the Government. The expenditures for the fiscal years 1920 to 1925, inclusive, excluding the postal expenditures payable from the postal revenues and including the postal deficit payable from the Treasury, and including also public debt retirements paid from ordinary receipts are as follows:

| | |
|---|---|
| Expenditures, fiscal year 1920 | $6,141,000,000 |
| Expenditures, fiscal year 1921 | 5,538,000,000 |
| Expenditures, fiscal year 1922 | 3,795,000,000 |
| Expenditures, fiscal year 1923 | 3,697,000,000 |
| Expenditures, fiscal year 1924 | [1] 3,497,000,000 |
| Expenditures, fiscal year 1925 | [1] 3,554,000,000 |

The reductions in annual expenditures from the fiscal year 1920—$6,141,000,000—to the estimated amount of $3,554,000,000 for the fiscal year 1925 is $2,587,000,000. This is an achievement worthy of the hearty commendation of every citizen. Coming during a period when States and municipalities have been increasing their expenditures, the decrease made by the Federal Government has been a distinct relief.

The reduction in expenditures above outlined has been accompanied by a very favorable condition of the Treasury. Commencing with the fiscal year 1921 and including the estimated condition for the current fiscal year and the fiscal year 1925, the excess of ordinary receipts over ordinary expenditures is as follows:

| | |
|---|---|
| Fiscal year 1921 | $86,892,000 |
| Fiscal year 1922 | 813,801,000 |
| Fiscal year 1923 | 309,657,000 |
| Fiscal year 1924 | [2] 498,000,000 |
| Fiscal year 1925 | [2] 60,000,000 |

These surpluses occur notwithstanding two reductions in taxation. They have made possible an unusual reduction in the public debt in addition to the retirements made from the funds especially set apart for that purpose.

The aim of the Republican Party from its partial assumption of control of the Government in 1919 and throughout its full control has been to grant relief from taxation. As expenditures have been reduced the public has been given the direct benefit. The first tax reduction was made in the revenue act of 1921, which reduced the tax levy by approximately $800,000,000 a year. The second reduction was made in the revenue act of 1924. The annual decrease effected by that act is in excess of $450,000,000. The total reduction effected by these two revenue measures is in excess of $1,250,000,000. The rates established by the new revenue law are the lowest they have been since 1917. While the reductions effected in the latter law will not be reflected until the payment of taxes for the calendar year 1924, the act contains a provision for a 25 per cent reduction in many taxes for the calendar year 1923 and under which the taxpayers will receive direct and immediate benefit. The total at approximately $230,000,000.

The excess of receipts over expenditures has contributed to a very substantial decrease in the principal of the public debt. The gross public debt at its peak in August, 1919, amounted to $26,596,000,000. The amounts of the outstanding gross debt on June 30 of each year since 1919 are as follows:

| | |
|---|---|
| June 30, 1920 | $24,297,000,000 |
| June 30, 1921 | 23,976,000,000 |
| June 30, 1922 | 22,964,000,000 |
| June 30, 1923 | 22,349,000,000 |
| May 31, 1924 | 21,544,000,000 |

The total gross debt on May 31 last was $5,052,000,000 less than the total of the debt at its peak. It is also $2,753,000,000 less than the total of the debt on June 30, 1920. The annual interest charge on the public debt reached its high point in the fiscal year 1920 when there was paid out $1,024,000,000. The estimated interest charge for the next fiscal year is $890,000,000. This shows a reduction in the annual fixed charge for interest from the fiscal year 1920 to the fiscal year 1925 of $134,000,000.

The total number of Government employees in the classified civil service, both in and outside of the District of Columbia, aggregated 601,000 on July 31, 1920, the beginning of the first fiscal year for which the Republican Congress made the appro-

[1] Estimated. The amount for 1925 includes the first year's expenditures for the soldiers' bonus.
[2] Estimated.

priations. That number was reduced to 597,000 on July 31, 1921, to 568,000 on December 31, 1921, and to 544,000 on December 31 last. The total reduction in the number from July 31, 1920, to December 31, 1923, is 147,000. This is the net reduction and has taken place notwithstanding the large number which it has been necessary to add to the rolls on account of the normal growth of the Postal Service, the administration of the United States Veterans' Bureau, and the enforcement of the national prohibition act.

The financial outlook for the fiscal years 1924 and 1925, which close on June 30 next and on June 30, 1925, respectively, is very hopeful. At the time of the assembling of Congress in December last it was estimated that receipts for the fiscal year 1924 would exceed expenditures by $329,639,000, and that the receipts for the fiscal year 1925 would exceed the expenditures for that fiscal year by $395,681,000. Since these estimates were prepared the Congress has passed the tax reduction bill, and has also enacted the soldiers' bonus bill. In the face of the shrinkage in revenue and the added expenditures for next year it appears that 1925 will close with a surplus. The best obtainable figures at the present time, based on somewhat incomplete calculations as to the effect of the tax reduction bill on prospective tax income during this and the ensuing fiscal year show the following relationship between receipts and expenditures, excluding postal revenues and postal expenditures payable from postal revenues.

| | |
|---|---|
| Fiscal year 1924: | |
| Estimated receipts | $3,995,000,000 |
| Estimated expenditures | 3,497,000,000 |
| Excess of receipts | 498,000,000 |
| Fiscal year 1925: | |
| Estimated receipts | 3,614,000,000 |
| Estimated expenditures | 3,554,000,000 |
| Excess of receipts | 60,000,000 |

These figures are very naturally estimates and are subject to change from day to day as better data become available. It is safe, however, to predict that if each of these years is concluded without any unusual and unforeseen circumstances intervening, the condition of the Treasury will not be very remote from the estimates herein presented.

An unusually historic and notable achievement of the administration of President Harding was the Conference on the Limitation of Naval Armament. The results of this conference have had a far-reaching effect in the effort to keep down public expenditures. The agreements reached in that conference resulted in the scrapping by the United States of 11 capital ships, the total cost of construction of which was estimated at $436,800,000. There had been expended on the construction of those vessels before the conclusions of the conference became effective the sum of $ 53,800,000, to which should be added the expenses of scrapping so far made and estimated to be made aggregating $28,450,000, a total of $182,250,000. This sum deducted from the estimated amount required to complete the vessels if their construction had been proceeded with leaves a difference of $254,550,000. This latter sum, except for the intervention of the arms conference, would have been appropriated and expended on the construction of these ships. If these vessels had been completed and placed in commission, their maintenance and operation and that of the auxiliaries necessary to make them effective units of the Navy would have added an annual charge to the Navy of approximately $200,000,000. Aside from its financial benefits, the conference was epochal in that it brought together the naval powers of the world in an effort to relieve their people from the most oppressive of all expenditures—those of armament and preparation for war.

The Republican Party has kept faith in its promises for retrenchment in Government expenditures and financial reform. Its record is complete and unanswerable. From the assembly of the Congress in May, 1919, to the present date, every effort has been made to manage the affairs of the Nation according to efficient, economical, and sound business principles. The results speak for themselves. Appropriations have been reduced, expenditures have correspondingly decreased, taxes have been reduced, the public debt and the interest charge have been lowered, the Budget has been balanced each year and has shown a comfortable margin on the surplus side, the number of employees has been cut, and the country has been given a Budget system. There is ample cause for approval of these accomplishments. The past few years have been critical in the affairs of the nations of the world. The present favorable situation of the United States is due in no small measure to the sound financial policy which has governed the management of its affairs. While other nations are struggling with overwhelming public debts that in some cases are as great or greater than their national wealth and are crying for relief from the taxes caused by deficits in their budgets, the people of the United States are enjoying the economic benefits which arise from sound financing on the part of the Federal Government.

For the information of those who desire to visualize, by large groups, the principal objects of appropriation for the fiscal year 1925, including for that year the amounts in the bills which failed, I shall insert the following tabulation:

GENERAL CLASSIFICATION OF APPROPRIATIONS FOR THE FISCAL YEAR 1925, ARRANGED TO SHOW THE PRINCIPAL OBJECTS OF APPROPRIATION

| | |
|---|---|
| Interest on the public debt | $890,000,000.00 |
| Sinking fund and other public debt retirement funds | 482,277,975.00 |
| Veterans' Bureau, including compensation, insurance, hospitalization, and vocational training | 352,915,000.00 |
| World War adjusted compensation act (soldiers' bonus) | 131,943,138.00 |
| Pensions, all wars prior to the World War | 222,500,000.00 |
| Post Office Department, payable from the postal revenues | 613,645,195.25 |
| Navy | 279,773,327.00 |
| Military activities of the War Department (Army) | 256,515,279.13 |
| Rivers and harbors, maintenance and improvement, flood-control work on the Mississippi and Sacramento Rivers, and work on the dam at Muscle Shoals, Ala | 45,100,000.00 |
| Shipping Board | 30,344,000.00 |
| Classification of employees in certain of the field services | 26,302,767.84 |
| Cooperative construction of roads and for roads in national forests | 19,000,000.00 |
| Refund of taxes under the 25 per cent provision of the revenue act of 1924 | 16,140,000.00 |
| All other activities, including the Executive office, the Congress, the judiciary, the executive departments, and independent establishments | 457,027,044.81 |
| Grand total for 1925 | 3,823,483,727.03 |

I shall also append as a part of my remarks three tabular statements. In each of these the appropriations and estimates are given without the figures for the second deficiency bill and the Field Service classification bill which failed of enactment. The amounts to be added to the grand totals in each of these tabulations on account of the failed bills are shown in footnotes, and taken together with the grand totals as shown in the tables will produce the figures which I have heretofore used in the text of my remarks.

*Recapitulation of appropriations by acts and irrespective of fiscal years, Sixty-eighth Congress, first session (Dec. 3, 1923, to June 7, 1924)*

| Title of act | | Amount |
|---|---|---|
| REGULAR ANNUAL ACTS, FISCAL YEAR 1925 | | |
| Agriculture | | $58,575,274.00 |
| District of Columbia | | 26,455,105.00 |
| Executive office and independent offices | | 398,776,740.16 |
| Interior | | 263,250,455.00 |
| Legislative establishment | | 14,229,016.00 |
| Navy | | 275,105,067.00 |
| State, Justice, Commerce, and Labor: | | |
| Commerce | $23,939,905.00 | |
| Justice | 21,371,430.00 | |
| Labor | 7,956,516.51 | |
| State | 15,001,646.29 | |
| | | 68,269,497.80 |

*Recapitulation of Appropriations by Acts and Irrespective of Fiscal Years, Sixty-eighth Congress, First Session (Dec. 3, 1923, to June 7, 1924)*—Continued

| Title of act | | Amount |
|---|---|---|
| Treasury and Post Office: | | |
| Post Office | $613, 645, 195. 25 | |
| Treasury | 120, 768, 405. 00 | |
| | | $734, 413, 600. 25 |
| War: | | |
| Military activities | 255, 615, 279. 13 | |
| Nonmilitary activities | 72, 355, 186. 00 | |
| | | 327, 970, 465. 13 |
| Total, regular annual acts | | 2, 167, 045, 220. 34 |
| DEFICIENCY APPROPRIATION ACTS, FISCAL YEAR 1924 AND PRIOR YEARS | | |
| First deficiency act, fiscal year 1924 | | 156, 671, 655. 28 |
| Urgent deficiency act, fiscal year 1924 | | 2, 333, 000. 00 |
| Total, deficiency acts | | 159, 004, 655. 28 |
| MISCELLANEOUS ACTS CARRYING APPROPRIATIONS | | |
| Contingent expenses, United States Senate, fiscal year 1924 | | 125, 000. 00 |
| Prosecution of suits to cancel oil leases, fiscal years 1924 and 1925 | | 100, 000. 00 |
| Relief of drought-stricken farm areas of New Mexico, fiscal years 1924 and 1925 | | 1, 000, 000. 00 |
| Eradication of foot-and-mouth disease, fiscal year 1924 | | 1, 500, 000. 00 |
| Miscellaneous relief and other acts | | 267, 709. 88 |
| Total, miscellaneous acts | | 2, 992, 709. 88 |
| Total, regular, deficiency, and miscellaneous acts | | 2, 329, 042, 585. 50 |
| PERMANENTS AND INDEFINITES, FISCAL YEAR 1925 | | |
| Agriculture | | 12, 360, 750. 00 |
| Commerce | | 3, 000. 00 |
| Independent offices | | 6, 457, 301. 79 |
| Interior | | 27, 243, 269. 06 |
| Labor | | 25, 000. 00 |
| Legislative | | 800. 00 |
| Navy | | 2, 103, 260. 00 |
| State | | 26, 000. 00 |
| Treasury: | | |
| Interest on public debt | $890, 000, 000 | |
| Sinking fund and other public debt retirement funds | 482, 277, 975 | |
| Ordinary permanents and indefinites | 26, 773, 100 | |
| | | 1, 399, 051, 075. 00 |
| War: | | |
| Military activities | 900, 000 | |
| Nonmilitary activities | 5, 683, 321 | |
| | | 6, 583, 321. 00 |
| District of Columbia | | 1, 226, 962. 00 |
| Total, permanents and indefinites | | 1, 455, 080, 738. 85 |
| Grand total | | 3, 784, 123, 324. 35 |

*Classification of foregoing appropriations by fiscal years*

| | |
|---|---|
| 1925 | $3, 622, 125, 959. 19 |
| 1924 | 149, 464, 629. 69 |
| 1923 and prior fiscal years | 12, 532, 735. 47 |
| Total | 3, 784, 123, 324. 35 |

NOTE.—In addition to the foregoing sum the following bills failed of passage: Second deficiency, $186,833,288.49; Field Service classification $26,357,767.84. These sums added to the foregoing amount would make the total $3,997,314,380.68

*Comparison of Appropriations by Departments and Establishments, Fiscal Years 1924 and 1925*

[Amounts carried for each of these years in regular annual appropriation acts, deficiency appropriation acts, special acts, and amounts estimated under permanent and indefinite appropriations]

| | Appropriations, fiscal year 1924 | Appropriations, fiscal year 1925 | Decrease (−) or increase (+), 1925 compared with 1924 |
|---|---|---|---|
| Legislative branch: | | | |
| Regular annual | $13, 110, 081. 60 | $14, 229, 016. 00 | +$1, 118, 934. 40 |
| Increased compensation | 1, 705, 140. 00 | | −1, 705, 140. 00 |

[1] This sum includes $105,467,000 for refunding internal revenue taxes erroneously collected.

NOTE.—Appropriations herein stated do not include the amounts pertaining to the second deficiency bill and the field service classification bill, both of which failed of enactment. The amount for the fiscal year 1925 in the latter bill was $26,357,767.84 and the amount for the same year in the former bill is approximately $175,000,000. Including these amounts in the 1925 totals, the aggregate for 1925 becomes $3,823,483,727.03 and the reduction of 1925 under 1924 would decline from $390,983,878.62 to $189,626,110.78.

NOTE.—The estimates and appropriations herein stated do not include the amounts pertaining to the Second Deficiency Bill and the Field Service Classification Bill, both of which failed of enactment. The amount for the fiscal year 1925 in the latter bill is $26,357,767.84 and the amount for the fiscal year 1925 in the former bill is approximately $175,000,000. The Budget estimates for the fiscal near 1924 and prior years were exceeded in the appropriations by $1,038,458.69. This sum deducted from the decrease shown in this table leaves a total net decrease in all estimates of $9,008,637.08.

APPROPRIATIONS AND EXPENDITURES FISCAL YEAR 1925 AND PRIOR YEARS

Mr. BYRNS of Tennessee. Mr. Speaker, under our form of government party control necessarily carries with it party responsibility. The Republican Party has had control of Congress since March 4, 1919, and of the executive branch since March 4, 1921. Congress alone has the power to levy taxes and appropriate money to be expended by the executive departments. The Republican Party must be held responsible for the reckless use of public money and the utter disregard of the taxpayers' interest during this period.

A considerable increase in Government expenditures was to be expected. Greater attention to education, good roads, and other activities which make for the enlightenment and progress of a people have necessarily increased our national expenditures. The war also increased these expenditures. But taking these desirable activities and necessary expenditures into consideration, the present expenditures of the National Government, with the added expenditures made necessary by the action of Congress at its first session, which closed on June 7, shows a reckless extravagance which no Republican platform pronouncements or administration propaganda of alleged economics can possibly explain or overcome.

| | |
|---|---|
| At the beginning of the session the estimated expenditures for the fiscal year 1925, seven years after the close of the war, were | $3,298,080,444.00 |
| This does not include estimated expenditures of $613,093,183.50 for the Postal Service, which is payable out of postal revenue. The regular annual appropriation for all purposes, exclusive of Postal Service, for 1916, the last full fiscal year before the war, under a Democratic administration was | 801,126,037.09 |
| Since the estimates for expenditure for 1925 were submitted Congress has passed laws increasing the expenditures for 1925 by over | 200,000,000.00 |
| It has increased the obligations of the Government covering a period of years at least | 3,500,000,000.00 |

| | |
|---|---|
| In addition to this there are bills on the calendars of either the Senate or the House which have been recommended by the proper committee and are awaiting consideration which, if enacted into law, will further increase the obligations of the Government in an amount exceeding | $500,000,000.00 |

The amount of new obligations created by this Congress at its first session almost equals the entire amount that has been paid on the public debt since the war. During these fiscal years—1920 to 1924, inclusive—more than $23,933,000,000 has been paid into the Treasury by the people in direct, indirect, and miscellaneous taxes. Notwithstanding this huge sum the present total obligations of the Government are only about one-half of a billion dollars less than they were when the first payments on the public debt were made.

A Republican Member recently declared to his Republican majority colleagues that "extravagance runs wild." The platform recently adopted by the Republican National Convention declared that during the past session "Congress has, in the main, confined its work to tax reduction." But these figures indicate that Congress and some of its committees have devoted the major portion of their time to authorizing the appropriation of public money and creating heavier obligations for the taxpayer. The entire public debt, Federal, State, and municipal, at the beginning of the session amounted to more than $32,000,000,000, and with the added expenditures and rapidly increasing obligations it is apparent that unless there is a check upon increasing public expenditures, taxation will soon become confiscatory.

ANALYSIS OF APPROPRIATIONS

An analysis of the figures will show whether or not the Republican administration and Congress are justified in their claims of economy.

| | | |
|---|---|---|
| The appropriations carried in the regular annual appropriation bills for 1925 amount to | | $2,167,045,220.34 |
| But to this sum must be added the sum of | | 172,289,092.96 |
| Carried in the second deficiency bill for 1925, which was passed by both Houses but failed of immediate enactment on account of a filibuster in the Senate during the last hour of the session, but which will be passed and approved by the President in December in order to meet the requirements of laws recently passed by Congress, there must also be added the sum of | | 26,302,767.84 |
| Carried in a special appropriation which passed but was enrolled too late to be signed at this session. This provides for the increased compensation for field employees under an act recently passed by Congress. Thus the regular annual appropriations for 1925 will be | | 2,365,637,081.14 |
| Similar appropriations for 1924 were | | 2,323,019,979.97 |
| This shows an increase for 1925 over 1924 of | | 42,617,101.17 |
| To these sums must be added the permanent and indefinite appropriation for interest on the public debt, public-debt retirements, and other items. For 1925 these sums amount to | | 1,455,080,738.85 |
| For 1924 these sums amounted to | | 1,540,625,228.15 |
| This makes the total appropriations for 1925 | | 3,820,717,819.99 |
| And for 1924 | | 3,863,645,208.12 |
| It will be noted that this decrease in total appropriations for 1925 may be entirely accounted for by the reduction in interest on the public debt, which in itself amounts to | 50,000,000.00 | |
| This is not due to a reduction of expenses of the business operations of the Government, which have actually been increased, as is shown above. | | |
| The reduction in public debt retirements, according to estimates, is | 29,690,150.00 | |
| The reduction in the appropriations for executive and independent offices for the Veterans' Bureau is | 79,095,773.00 | |
| This was made possible by the fact that vocational rehabilitation is being concluded; that compensation will grow less as the disabled ex-service men become physically rehabilitated; and that hospitalization will inevitably become less the farther we get from the war. The reduction in the same appropriation bill for the Shipping Board is | 20,067,500.00 | |
| This is due to the fact that certain claims for which appropriations were made during the current year have been settled. Civil War pensions have been reduced in the appropriation for the Department of the Interior to the amount of | 30,500,000.00 | |
| This results from the fact that the pension roll is being steadily reduced by death. There is a reduction in the appropriation for the War Department for rivers and harbors of | 19,446,760.00 | |
| This appropriation is really based upon the needs of the service for the first nine months of the fiscal year. The next annual appropriation bill will take care of any additional amounts needed after Mar. 4, 1925, the beginning of the next Congress. The same explanation may be made of the reduction in the appropriations for the Department of Agriculture for special road items amounting to | 14,600,000.00 | |
| These sums total | | 243,400,183.00 |

It is evident that the administration can claim no credit for these reductions as economies effected. The appropriations for 1925 would have been less than the appropriations for 1924 by at least this amount if appropriations for other objects had not been increased.

The following table shows the increase of 1925 appropriations over those of 1916, excluding from 1925 the appropriations growing out of the war and which, therefore, should not be taken into consideration in making the comparison:

| | | |
|---|---|---|
| Total appropriations for 1925 | | $3,820,717,819.99 |
| Total appropriations for 1916 | | 1,114,490,704.09 |
| Increase of 1925 over 1916 | | 2,706,227,115.90 |
| Deduct war expenses, which were: | | |
| Interest on public debt | $890,000,000 | |
| Public-debt retirements, including sinking fund | 482,277,975 | |
| Veterans' Bureau | 349,065,000 | |
| Shipping Board | 30,344,000 | |
| | | 1,751,686,975.00 |
| Grand total increase of 1925 over 1916 | | 954,540,140.90 |

The following table shows appropriations for 1924 and 1925:

| | 1924 | 1925 |
|---|---|---|
| ANNUAL APPROPRIATIONS | | |
| Department of State | $15,200,665.50 | $15,001,646.29 |
| Department of Justice | 19,253,506.00 | 21,371,430.00 |
| Department of Commerce | 21,142,957.00 | 23,939,905.00 |
| Department of Labor | 7,451,896.00 | 7,956,516.51 |
| Treasury Department | 126,159,802.37 | 120,768,405.00 |
| Post Office Department | 585,221,759.50 | 613,645,195.00 |
| Department of Agriculture | 72,841,453.00 | 58,575,274.00 |
| Department of the Interior | 297,520,009.00 | 263,250,455.00 |
| Navy Department | 294,967,200.00 | 275,105,067.00 |
| War Department | 342,449,261.00 | 327,970,465.13 |
| Executive and independent offices | 501,821,377.00 | 398,776,740.16 |
| Legislative | 14,416,111.60 | 14,229,016.00 |
| District of Columbia | 24,573,982.00 | 26,455,105.00 |
| Increased compensation, field employees | | 26,302,767.84 |
| Second deficiency | | 172,289,092.96 |
| Total annual appropriations | 2,323,019,979.97 | 2,365,637,081.14 |
| PERMANENT AND INDEFINITE APPROPRIATIONS | | |
| Interest on public debt | 940,000,000.00 | 890,000,000.00 |
| Public-debt retirements | 511,968,125.00 | 482,277,975.00 |
| Other | 88,657,103.15 | 82,802,763.85 |
| Total permanent and indefinite appropriations | 1,540,625,228.15 | 1,455,080,738.85 |
| Total of annual appropriation acts, including permanent and indefinite appropriations | 3,863,645,208.12 | 3,820,717,819.99 |

Deficiencies for 1924 are not included in the above table. These will be balanced off by the deficiencies which will undoubtedly occur in 1925.

COOPERATIVE ROAD CONSTRUCTION

In connection with the above statement, it might be well to call attention to the appropriations for cooperative road construction. Good roads are one of the greatest of assets to the agricultural interests of the country, yet for the fiscal year 1925, $75,000,000 was authorized to be appropriated, and the Republican Congress appropriated but $13,000,000, leaving $62,000,000 to be obligated by the Secretary of Agriculture in approved road-building projects. If the entire authorization had been appropriated, the total of all the moneys appropriated for the year 1925 would be $62,000,000 in excess of the total given in the statement above, or $3,882,717,819.99.

A similar practice of appropriating but a portion of the authorization, having the remainder made available as a contractual obligation on the part of the Government, has prevailed for the two preceding years, so that, although a Republican Congress passed an act authorizing appropriations of $190,000,000 for the cooperative construction of roads, there has actually been appropriated during the last three fiscal years but $67,300,000. Unexpended balances of appropriations, the greater portion of which were made by a Democratic Congress, have enabled the Bureau of Public Roads to continue the road-building program without curtailment, but before the end of the fiscal year 1925 these balances and the meager appropriations provided by the Republican Congress will have been exhausted, and unless deficiency appropriations are made the work on road construction will be greatly delayed if not altogether suspended in some States.

Attention should also be called at this point to the law passed at this session of Congress liberalizing the benefits extended to World War veterans by the United States Veterans' Bureau. The added cost on account of this legislation is approximately $35,000,000 annually, and an additional amount

will have to be appropriated next session. That sum should be added to the total herein stated for 1925.

Most recent estimates of receipts for 1925 under the new revenue law are as follows:

*Receipts and expenditures for 1925 (estimated)*

| | | |
|---|---|---|
| Customs | | $500,000,000 |
| Internal-revenue taxes: | | |
| Individual and corporation income tax | $1,650,000,000 | |
| Miscellaneous taxes | 814,000,000 | |
| | | 2,464,000,000 |
| Miscellaneous receipts | | 473,000,000 |
| Total ordinary receipts | | 3,437,000,000 |
| At the beginning of the session in December, 1923, Treasury estimates of expenditures for the fiscal year 1925 were | | 3,298,080,444 |
| Since that estimate was submitted Congress has appropriated for 1925 to meet requirements of authorizations not then anticipated as follows: | | |
| Second deficiency | $172,289,092 | |
| Added compensation | 26,302,767 | |
| | | 198,591,859 |
| Total | | 3,496,672,303 |

It will be necessary to provide additional sums at the December session to meet other authorizations.

The estimation of receipts and expenditures a year in advance of the close of the fiscal year is necessarily an uncertain task. It is apparent from the present situation with respect to expenditures that unless the receipts exceed considerably those now in sight that there will be a deficit for the fiscal year 1925. Should a favorable increase in receipts occur it would not in any event produce more than a small surplus.

RECEIPTS FROM BACK TAXES AND SURPLUS WAR STORES

The Republican Party since it came into power on March 4, 1921, has been favored with receipts a large part of which accrue from war years and the demobilization period. The Treasury has been exceedingly slow in the audit of taxes for the war period and the years immediately following. As the result of the audit of these war and postwar tax returns, the Republican administration, since March, 1921, has had the benefit of approximately $1,070,000,000 net of payments from back taxes, after deducting the amounts which it has had to refund for overpayments arising from such audits. It has during this period also had the advantage of large receipts from sales of stores, supplies, and plants acquired during the war in an amount approximating $270,000,000. These two sums make unusual revenues of $1,340,000,000, and this sum accounts for the aggregate of excess of receipts over expenditures from March, 1921, to the present date and has left a margin of receipts which has added quite a comfortable sum to the ordinary running expenses of the Government.

NEW COMMITMENTS

| | |
|---|---|
| Congress passed during the first session laws increasing the obligation of the Government and the burden of the taxpayers, and which will ultimately require appropriations, according to the lowest estimate submitted to the extent of at least | $3,423,128,388.82 |
| In most instances these estimates will doubtless prove to be too low. There are now on the calendars, passed by one or the other of the two Houses and awaiting consideration and enactment by the other House, bills making authorizations for different projects which will ultimately require appropriations in the sum of at least | 371,688,500.00 |
| There are now on the calendars of either the Senate or the House bills favorably reported by Republican committees and which are awaiting consideration at the next session carrying authorizations which will require appropriations of at least | 533,027,052.66 |

INCREASE OF SALARIES

Congress has passed laws increasing annual salaries of Government employees, in addition to the bonus which has been paid for several years and which amounted to $35,893,110 annually, beginning July 1, 1924, as follows:

| | |
|---|---|
| District and field employees, exclusive of Postal Service | $9,271,000.00 |
| Consular officials | 495,000.00 |
| Employees of Government Printing Office | 500,000.00 |
| Senate and House employees | 362,789.20 |
| Teachers, firemen, and police of District of Columbia | 2,500,000.00 |
| The pay of officers and enlisted men in the Army and Navy has been increased in the last two years, approximately, each year | 55,000,000.00 |

Many new positions have been created with salaries ranging as high as $10,000 and $12,000 per year.

Congress passed a bill increasing the annual pay of postal employees, estimated by the department to cost $80,000,000. This bill was vetoed by the President on the last day of the session, too late to be acted upon, and will be taken up in December.

Congress passed the Bursum bill increasing the pensions of soldiers of the Civil and other wars, estimated to cost annually $58,000,000. It was vetoed by the President.

PUBLIC DEBT RETIREMENTS

The following table shows retirements on the public debt by fiscal years:

| | Total gross debt | Reduction |
|---|---|---|
| June 30, 1919 | $25,484,506,160 | |
| June 30, 1920 | 24,299,321,467 | $1,185,184,693 |
| June 30, 1921 | 23,977,450,552 | 321,870,915 |
| June 30, 1922 | 22,963,381,708 | 1,014,068,844 |
| June 30, 1923 | 22,349,707,365 | 613,674,343 |
| May 31, 1924 (11 months) | 21,544,803,326 | 804,903,909 |

It will be noted that the year of greatest retirement was in 1920, under a Democratic administration.

Reduction in taxes has been too long delayed. With an excess of receipts over expenditures each year, the Republican administration up to June 30, 1923, had used of this surplus $697,000,000 for retirement of the public debt in addition to the retirements made from the regularly constituted funds for that purpose. These surpluses, instead of being applied to debt retirement, should have been used to make a decrease in taxes which the American people have been demanding. Relief could have been granted several years ago had it not been for the desire of the administration to make a spectacular decrease in the principal of the debt.

GOVERNMENT EMPLOYEES

The following table, according to the report of the Civil Service Commission, shows the number of employees on the rolls:

| | |
|---|---|
| July 1, 1916 | 438,057 |
| Nov. 11, 1918 | 917,760 |
| July 1, 1920 | 891,116 |
| July 1, 1921 | 597,482 |
| July 1, 1922 | 560,863 |
| July 1, 1923 | 548,331 |
| Jan. 1, 1924 | 544,671 |

Thus it appears that on the first of the year the number of employees on the Government rolls was nearly 24½ per cent greater than in 1916. The peak was reached at the close of the war. During the following two and a half years, under a Democratic administration, the number was reduced by 320,278. During the two and one-half years of the Republican administration the number was reduced by 52,811.

ARMY AND NAVY

The following sums were appropriated for the Army and Navy for the fiscal years 1925 and 1916:

| | Army and Navy | 1925 | 1916 |
|---|---|---|---|
| For the Army: | | | |
| Direct appropriations, strictly military activities, War Department | $254,224,865.13 | | |
| Permanent appropriations | 900,000.00 | | |
| Reappropriations | 93,753.81 | | |
| | | $255,218,618.94 | $109,089,226.14 |
| For the Navy: | | | |
| Direct appropriations | 275,105,067.00 | | |
| Indirect appropriations | 22,500,000.00 | | |
| | | 297,605,067.00 | 149,661,864.88 |
| Total | | 552,823,685.94 | 259,751,091.02 |

THE DISARMAMENT CONFERENCE

The disarmament conference, which was concluded February 26, 1922, was heralded as a great accomplishment toward stopping competition among nations in the building of navies and, as an incident thereto, the reduction of expenses. It was an egregious failure. It is significant that the result was the scrapping of the type of ship the United States was then constructing and leaving wide open the door to competition in other types of warships. The failure of that conference is attested by the fact that ever since its adjournment there has been a demand that a new conference be called to do what the former conference failed to do. The naval bill just passed requests the President to call such a conference, but as yet he has taken no steps to do so.

As a result of the conference it became necessary for the United States to scrap seven large battleships and four battle cruisers under construction, and which, if completed, would

have given the United States the most powerful Navy in the world.

| | |
|---|---|
| There has been appropriated up to this time for the scrapping of these ships | $28,450,000 |
| There had already been expended on the construction of these vessels | 153,814,000 |
| Total cost of scrapping up to date | 182,264,000 |
| Congress is now asked to authorize a new shipbuilding program of lighter cruisers and gunboats to make the Navy of the United States the equal of that of Great Britain, as authorized by the treaty. To this end the House has passed a bill authorizing the construction of eight scout cruisers and six gunboats which will ultimately cost | 150,000,000 |
| The naval appropriation bill also carries for construction | 30,000,000 |

Unless another conference is called and is attended with greater success the construction of airplane carriers and other ships costing many millions of dollars must follow if the United States is to maintain its ratio with the Navy of Great Britain.

Republican control has signally failed to meet the hopes and expectations of the people for retrenchment of public expenditures. It has failed to give relief to the farmers, hundreds of thousands of whom have become bankrupt in the last few years because of Republican policies, foreign and domestic. Compelled to sell their products at less than cost, because of the unstable condition of the world's market, they are forced by the high protective tariff, which was levied for the benefit of a few, to pay exorbitant prices for everything which it is necessary for them to buy. Under its control fraud and corruption have found their way into the high places of government, vast public resources have been exploited for private gain, and those who are guilty have not been brought to account for the betrayal of their public trust.

Fortunately the people will have an opportunity to pass upon this record at the election which will be held in November.

RECORD OF REPUBLICAN ACCOMPLISHMENT

Mr. SANDERS of Indiana. Mr. Speaker, under the policies of the Republican Party for a half century we have builded a mighty Nation, whose magnificent history for those years is a record of Republican accomplishment.

The Republican administration took over the affairs of the Government three years ago. During that time we have a record of undertaking huge tasks, of facing great difficulties, of forging straight ahead to bring order out of chaos, a record of progress made and of gratifying results achieved in keeping with the traditions and history of the party.

When Warren Harding was sworn in as Chief Executive we were at low ebb in the aftermath of the greatest war the world has ever known. After the armistice, when everyone knew our happiness and prosperity demanded the prompt negotiation of terms of peace, countless months were wasted weaving a League of Nations covenant into the treaty of peace, and a still greater time was spent in trying to foist such an un-American war pact upon the country. During the last two years of the Democratic régime the Republican Congress undertook to prepare for peace, but were blocked at every move by an unfriendly Executive. The Republican Congress passed a joint resolution to end the war. The Democratic President vetoed it. The Republican Congress passed a comprehensive Budget law as a foundation for economic reduction of Government expenses. The Democratic President vetoed it. The Republican Congress passed an emergency tariff bill to prevent disaster to the American farmer and to protect American workmen and American industries. The Democratic Chief Executive vetoed it. The Republican Senate agreed upon reservations to the peace treaty which would prevent the surrender of our sovereignty and the sending of our soldiers to fight in European broils. The Democratic President used the mighty influence of his office to defeat the treaty with such reservations.

In short, when the Republican administration took over the reins of government we found the country as unprepared for peace as we had been unprepared for war.

What a task we faced! A world torn asunder with the financial and economic structure of Europe collapsed, with our war debt $25,000,000,000—$250 for every man, woman, and child in America—with a billion dollar yearly interest charge, with wounded and disabled soldiers in such numbers as to require the expenditure of a half billion more yearly for their care. With an overhang charge from the Railroad Administration and Shipping Board, losses inherited from the Democratic administration running into hundreds of millions, with a country still in a state of war, with our industries suffering the inevitable collapse when the war orders ended, unemployment stalking abroad. Liberty bonds down $15 on the hundred, and our scale of public expenditures tuned up to war days.

No administration at any time since the Civil War faced such a mass of confusion. And no administration since the framing of the Constitution has worked more steadily in judiciously clearing away the débris and reconstructing a working, peace-time Government.

We had promised the people we would bring about peace. We passed a resolution declaring a state of peace, which was duly signed by President Harding. Our Democratic friends said Germany would never agree to it, and if she did we would lose valuable rights which we might have had under the Versailles treaty. But Secretary Hughes negotiated a treaty with Germany which expressly ratified the peace resolution and which in terms gave to America every right granted by the old treaty and released us from the covenant of the League of Nations.

We repassed the Budget law which the Democratic President had vetoed and, after it was signed by the President, General Dawes, a business man of wide experience, was made director general, and under the leadership of a Republican President and under the direction of General Dawes, and later General Lord, the present Director of the Budget, the business affairs of the Government were so administered as to save literally hundreds of millions of dollars.

Let me explain the nature of that law and just how it effects economies. Prior to the adoption of the Budget law each of the 11 departments made its itemized estimate of needed expenditures to the Secretary of the Treasury. The Secretary had no authority to change these estimates, but merely transmitted them to Congress in a book of estimates.

The Budget law provides for a director general, who has general charge of estimates and who makes a comprehensive study of proposed expenditures. Each department submits the estimates to the Budget Bureau and the director general has authority to cut down estimates. So that for the first time in the country's history the responsibility for expenditures is located in one man. The head of each department and bureau has a more or less exaggerated idea of the needs of the department and wants to expand bureaus out of proportion to their governmental value and out of keeping with Uncle Sam's pocketbook. But now one disinterested head of the Budget Bureau, whose very function is to economize, pares the estimates down according to his complete knowledge of the Government needs.

The Budget system established a principle of exchange of equipment which has meant a saving of immense sums of money. The Lighthouse Service of the Department of Commerce was in need of certain boats, which it was planned to build at a cost of some $1,500,000.

The War Department had on hand boats which it did not need and which could have brought only a small amount if sold. These were ordered transferred to the Lighthouse Service. This was the result of the Budget system.

I could continue with many instances of saving. The Congress received the estimates from the new Budget Bureau, and in making appropriations entered into the full spirit of economy, even cutting below the amount recommended by the Budget Bureau.

By dint of economizing here and lopping off there, cutting the Army to 125,000, cutting the naval appropriations in keeping with the agreement at the arms conference, dropping employees from the pay roll wherever possible by cutting to the bone on every appropriation, we reduced the expenditures during 1922 below 1921 in the amount of over $1,700,000,000. And during 1923, a still greater amount.

After the inauguration of economies we were prepared to reduce the taxes, and the passage of the revenue act of 1921 reduced the taxes for that year in the amount of $80,000,000, and $800,000,000 in 1922.

This was accomplished by a reduction (by means of increased exemption) on every income of heads of families under $5,000 a year. The change affected 2,500,000 heads of families in the United States and reduced their Federal taxes $70,000,000. We repealed many taxes on the necessaries of life, relieving the taxpayer of the payment of almost $900,000,000.

We passed legislation providing for a Debt Funding Commission to deal with the collection of debts owed us by foreign nations. This amount reached the sum of over $11,000,000,000. No criticism is attached to the Democratic Party for most of these loans, although loans were advanced to Russia after she was of no help in carrying on the war, and all the loans were made in the most haphazard way, without requiring such bonds and other evidences of indebtedness as would make all terms definite. But it is easier to loan than to collect money. The Democrats loaned it out bountifully and our less pleasant task is to collect what we can.

Although the armistice was signed in 1918, and the Democratic President served until March, 1921, yet not one single step had been taken by him toward negotiating the payment. We provided in the funding law that the debt should not be canceled. The commission is now functioning.

We have settled with Great Britain. During 62 years, by regular increase, partial payments are to be made, the first payment being fixed at $23,000,000 in 1923, and at $175,000,000 in the last year that the loan has to run, which would be 1984. Interest is to be paid.

We have settled with Finland, and settlement has been made with Cuba and Nicaragua. Negotiations are under way with other countries.

We passed the emergency tariff law, the law authorizing cooperative marketing, the law extending the War Finance Corporation and authorizing the financing of exports of farm products—all for the benefit of the farmer. We are now trying to work out a comprehensive plan for agricultural relief.

We passed the immigration restriction act. Under its provisions the number of aliens who could enter this country at any one time was restricted to 3 per cent of the number of such nationals here as shown by the census reports. We did not want to shut the gates of America from those in foreign lands who want to enter America and build their homes and tune their hearts to the hearts of America, but we realized that restriction in numbers was needed. This was the first law ever enacted limiting the number that could come into the country. We had had various laws prescribing physical and other like tests, but no law restricting the number. Under this law in one year, it is estimated by the chairman of the House Committee on Immigration, we saved the United States from an influx of 1,500,000 aliens which we could not have properly assimilated and Americanized. It was fortunate in this time of stress and disturbed conditions that the country was spared from the ordeal of dealing with that great number of new aliens. This law we further amended, further limiting and restricting immigration.

We passed the Sweet reorganization bill creating the Veterans' Bureau, placing the responsibility upon the director, and creating district offices and suboffices so as to get nearer to the soldier. The effectiveness of administration has been improved remarkably, although there are, of course, some isolated cases which are deserving and have not yet gotten relief. In the overwhelming majority of cases adjudication is made with promptness and expedition. The Republican Congress passed the Reed-Johnson bill liberalizing and extending the provisions of the Veterans' Bureau law.

There was such unity of action during the war while the Democratic administration was in power and such a feeling of gratitude toward the American soldier that I had hoped no partisan would undertake to make political capital out of his attempt to serve the soldier, but some Democratic utterances on soldier-relief legislation leads me to state precisely what the record shows.

As soon as the Republican Congress was called in session—which was two years before the end of the Democratic President's term—we began to investigate the amounts of compensation provided by the Democratic laws for the wounded and disabled soldier. We found the amounts shockingly inadequate and immediately passed the Sweet law to increase the amounts to be paid these wounded heroes.

Under the Democratic law the highest amount paid the disabled soldier without wife or child living was $30. The Republican law provided $80.

With wife living, the Democratic law provided $45; the Republican law $90.

With wife and one child living, the Democratic law provided $55; the Republican law $95.

With wife and two children living, the Democratic law provided $65; the Republican law $100; and for double total disability $200.

The Republican measure also provided for medical and surgical treatment and appliances and greatly liberalized the insurance provisions, giving ample chance to reinstate lapsed policies.

We take no political credit for this; it was only what was justly due the soldier; but the record of the two administrations undoubtedly demonstrates our conscientious devotion to the cause of the American soldiers and that we regard providing for their care as our sacred privilege.

We passed the Fordney Protective Tariff Act. When this act was passed the Democratic fight was waged against it chiefly on two grounds: First, that we were building up a wall which would keep out all imports; second, that since we would import nothing, the nations of the world could not trade with us. But their dire prophecy has proven false. In 1922, nine months of which were under the Underwood Tariff Act, the exports sent out of this country were $3,832,000,000. In 1923, all of which was under the Fordney Act, the exports were $4,168,000,000; we thus sent out $336,000,000 more in value under a protective tariff.

Now let us look at the imports. In 1922 our imports were $3,113,000,000; in 1923 our imports were $3,792,000,000. Thus we brought in $679,000,000 more imports under a protective tariff act.

This has been the uniform history of periods under a protective policy. We encourage our own industry and give such stimulus to trade that the total exports and imports increase.

President Harding won the admiration of the world in his grasp and disposition of world problems. His appointment of Justice Hughes as Secretary of State met with universal approval. Under the President's direction Secretary Hughes has adjusted every dispute of serious import which threatened to disturb our peace relations with any foreign government. Doubts and disputes arose with reference to our status with Mexico and Russia. The terms upon which we would enter upon diplomatic relations with Mexico were stated so clearly and the justice of our position was made so plain that Mexico took definite steps to place her Government in position to be recognized, and recognition has now been granted. The Government's reason for not recognizing the Soviet Government of Russia was so candidly given that everyone believing in the rights of liberty of person and property must be in accord.

The call for the Arms Conference met with prompt and favorable response from all civilized nations. In stating our readiness to limit armament, President Harding and Secretary Hughes struck out boldly on an unbeaten path of open diplomacy, which for an instant startled the civilized world; but the world's reaction was so generous and universally favorable that for once diplomacy was ruled by the sentiment and judgment of the masses of people. The Hughes proposal for scrapping battleships and reduction of fighting machinery was agreed to substantially as proposed. The terms finally agreed upon have been a great factor in removing causes for war. As a measure of economy it is the greatest single stroke in the world's history.

We are now able to determine with reasonable certainty the amount saved to the taxpayers by reason of the Conference on Limitation of Armament. Congressman FRENCH, of Idaho, presented the Navy appropriation bill this year, and his report shows that there has been a direct saving of over $200,000,000, because the treaties put a stop to new structural work under way which would have necessitated an expenditure of that amount. In addition we will save $200,000,000 each year on cost of maintenance and upkeep of the Navy. This does not include the saving effected by not being required to fortify Guam, which would have cost $85,000,000 to fortify and still more to maintain, nor additional Philippine fortifications which would have cost equally as much. The arms conference has wrought a hundredfold more benefit to mankind in effecting economies and bringing about friendly relations than has the League of Nations.

There sits in the White House to-day a calm, hard-thinking, few-worded statesman, who has the confidence of America. Reared amid rural hardships, trained close to nature in early life, schooled in affairs of government by his service as mayor, as State senator, as president of the senate, as lieutenant governor, as governor, and as Vice President, he was eminently equipped for the high office to which Divine Providence called him.

His program for Budget economy, for tax reduction, for restricted immigration, for welfare legislation, for maintenance of protection to American labor and industry, his stalwart devotion to the great fundamentals of government, have placed high in the esteem of the people of the country that matchless outstanding American, Calvin Coolidge.

Our wise economies have brought about a condition permitting further tax reduction. We passed a bill as nearly approaching the Republican plan as was possible with our slim Republican majority. The essential feature of the Republican plan is to reduce taxation on all incomes, including surtax on large incomes, while the essential feature of the Democratic plan was to make the smallest possible reduction in surtaxes. The law as finally passed included the reduction of taxes for the present year 25 per cent.

The first Republican tax reduction law cut the maximum surtax from 65 to 50 per cent. This high surtax during the war, before opportunity was presented to change investment, brought in fairly heavy returns; but those with large investments soon

found that they could change their investments to tax-free Government bonds and municipal securities and get a much larger net yield, and they did so. This is conclusively demonstrated by the records of tax returns. In 1918 the number of incomes over one million was 67; in 1919 it was 65; in 1920 it was 33; in 1921 it was 21. If the surtax were reduced to a maximum of 25 per cent after the first year, it would mean an actual increase in revenue, because the large fortunes would be reinvested in industrial enterprises and a great stimulus for business would be furnished. This heavy surtax is the greatest factor in the high cost of living, because the ultimate consumer finally pays the bill in increased cost of the articles produced. We will work for further economies and additional tax reform.

The primary function of Congress is to legislate. In recent months it might be thought that its chief function is inquisition. The investigation of the Veterans' Bureau inaugurated and carried out by that fine Republican soldier, Senator REED of Pennsylvania, which resulted in the prosecution growing out of the Veterans' Bureau fraud brought good results.

I do not decry the investigation of the Teapot Dome transaction. That was a fortunate investigation, for there was uncovered evidence of corruption which furnished a basis for legislation and court proceedings. No legislative body, however, is warranted in neglecting its legislative duties and running rampant into the field of investigation. There have been some things in connection with the Senate investigations that have been unfortunate. The simple, everyday rules of evidence so absolutely necessary to separate the true from the false have been grossly violated. Attempts have been made to besmirch the character of men living and dead, by hearsay evidence and by expressions of vague opinions unsupported by facts. It seems passing strange that a committee will go through the mockery of swearing a witness so as to have his statement supported by the sanctity of a solemn oath and then permit the witness to spend a whole morning testifying to what somebody else said who was certainly not under oath. This in effect permits statements not only not under oath, but repeated second-handed at that. No blackmailer or lying bandit or self-confessed train robber ought to be permitted to exercise his unbridled imagination in order to gain partisan advantage for any party.

Our Democratic friends have not risen above narrow partisanship but have frequently permitted themselves to pursue a course with a view of partisan advancement. With a blare of trumpets they hailed the oil scandal with delight, but they were doomed to despair. They found Democratic ex-Cabinet members and Democratic campaign contributors the counselors of and close associates with the very men charged with corruption. A Republican Senate, a Republican House, and a Republican President acted promptly to authorize civil suits and start criminal investigations. Far from leaving the matter in partisan hands, they employed as one of the two counsel former Senator Pomerene, of Ohio, prominent Democrat, who has been frequently mentioned for the Presidency. The rights of the Government are being aggressively protected by Calvin Coolidge.

Facing a national campaign against the Republican Party which has a fine record of accomplishment in governmental affairs almost without parallel, our opponents are still seeking to divert attention from the great economic issues and great governmental principles to a side issue. A dishonest public official can not become a national issue. Crime is unconnected with party, and corruption is nonpartisan. The people of the country will not be fooled by this false cry into voting into power a party whose governmental policies are unsound and always spell disaster, and into voting out of power a party whose policies are sound and have brought prosperity and happiness to America.

The Democratic administration left us at war. The Republican administration brought about peace.

They left us endangered by the League of Nations and the loss of our sovereignty. We disentangled the Republic from foreign broils and regained our independence.

They left unemployment on every hand. We provided jobs for everyone.

They left us with an accumulating debt. We have reduced it $2,500,000,000.

They left a Government running with a saturnalia of extravagance and waste. We wrote and administered the Budget system so as to effect unheard-of economy.

They left us with a tariff for revenue act, which did not even produce revenue, and we supplanted it with a real American tariff law, which not only produced the revenue but brought prosperity.

We will go before the country under the leadership of Calvin Coolidge with every confidence of success, and under the continued policies of the Republican Party this mighty Republic with rapid strides of progress will march on to the high destiny within our reach.

### THE M'NARY-HAUGEN BILL

Mr. RUBEY. Mr. Speaker, I avail myself of this opportunity to set forth as briefly as I may the proceedings in the House and elsewhere as they occurred relative to the McNary-Haugen agricultural bill.

The final stages of the proceedings in reference to the McNary-Haugen bill began on Friday, May 30, Decoration Day. The House met at 12 o'clock and shortly thereafter began the consideration of the bill under the five-minute rule. Scarcely had the work begun when the attention of the Members were called to an article which appeared in the Washington Times, noon edition, by Representative ASWELL, of Louisiana, who read the headlines and a part of the article. The headlines in large black letters contained the information that President Coolidge wanted Congress to kill the McNary-Haugen farm bill, and stated that it would be vetoed if passed. The headlines further stated that work had already begun on a compromise measure. In the face of these glaring headlines, and despite these discouraging statements, the consideration of the bill continued during the remainder of the day.

When the House convened on Saturday, May 31, an effort was made by the majority leader, Mr. LONGWORTH, to obtain a unanimous-consent agreement under which the bill could be considered under the five-minute rule and finished on Saturday, but that the final vote on the bill would not be had until the following Tuesday. In connection with this unanimous-consent agreement I called the attention of the House to the situation in the following language:

> Reserving the right to object, let me say this: If this agreement is entered into you can mark my word that this bill will not pass this House on next Tuesday. If the gentlemen on the Republican side of the House want to take the responsibility for the defeat of this legislation, well and good; but I want the country to know where the responsibility is in the proposal of this unanimous-consent agreement to-day. You put off the vote on this bill until next Tuesday morning, and those who make the proposition know that at that time there will be 40 or 50 or 60 gentlemen in this House who are not here now, every one of whom will be against this legislation.

The chairman of the Committee on Agriculture, Mr. HAUGEN, stated that he had nothing to do with the proposition of unanimous consent offered by the gentleman from Ohio, and he asked that the bill be taken up and disposed of, and that it be taken up at once. The gentleman from Washington [Mr. SUMMERS] objected to the unanimous-consent agreement offered by Mr. LONGWORTH, and then Mr. LONGWORTH said:

> I merely desire to say that a motion will be made to adjourn when the previous question has been ordered on this bill in order to have a vote later on.

Consideration of the McNary-Haugen bill continued through the day on Saturday. Many amendments were offered, but all of them except one were rejected, and that one was offered by the gentleman from Texas [Mr. JONES], and was acceptable to the Committee on Agriculture. For that reason it was adopted. Late in the afternoon the bill was completed. The Committee of the Whole arose, Mr. GRAHAM, the Chairman, reported the bill back to the House with the recommendation that the amendment be agreed to and that the bill do pass. At that point in the proceeding Mr. VOIGT, of Wisconsin, moved that the House adjourn.

I state only the facts when I say that at the time Mr. VOIGT made the motion to adjourn the majority leader, Mr. LONGWORTH, was standing by him, and when a division was called he motioned to the men on his side of the House to stand. There is not any doubt in my mind but what he was carrying out his statement previously made that a motion to adjourn would be made in order that the final vote on the bill might go over until Tuesday of the following week. The motion to adjourn was carried, and further consideration of the McNary-Haugen bill was therefore postponed and could not come up again until Tuesday, June 3. The bill was then placed upon final passage, at which time I demanded the yeas and nays, and the roll was called. The bill was defeated—154 to 224.

On Monday, the day preceding, when Mr. LONGWORTH presented his resolution to adjourn on the 7th, and before the vote was taken, I interrogated him, calling his attention to the fact that on the following day we would vote on the McNary-Haugen bill, and asked him if the bill were defeated whether he had

any idea that other legislation could be brought in during the remaining three or four days that would help agriculture. He replied, "I think so."

On Wednesday, June 4, it was stated through the press and among the Members on the floor of the House that a modified farm relief bill was being worked out through the cooperation of the representatives of farm organizations and the Republican leaders, and it was stated, in substance, that this new proposal would authorize the War Finance Corporation to buy wheat and flour and livestock products at approximately ratio prices and export them abroad and sell them at the best obtainable prices, the loss to be paid out of the funds that had been accumulated by the War Finance Corporation. This eleventh-hour emergency legislation was submitted to the President by certain well-known Republican leaders—it is not necessary for me to name them here, but everyone knows who they are.

The President advised these gentlemen that he would consider their proposal and report later in the day. It is stated that he called into consultation some of his advisers and they gave consideration to this proposed measure. Late in the afternoon the President's answer was sent to the leaders of the House of Representatives by former Representative the Hon. Frank Mondell. For some time the steering committee conferred with Mr. Mondell, at the end of which time the Republican leader, Mr. LONGWORTH, issued the following formal statement to the press:

A large majority recorded against the McNary-Haugen bill made it evident that any legislative proposition embodying the basic principles of this bill could not be passed. While realizing fully the condition of agriculture, and with the most earnest desire to bring relief as far as legislatively possible, we have so far been unable to work out a plan which would command the necessary support.

Not a single word is said in this statement as to the views of President Coolidge in regard to the proposed compromise emergency relief measure.

Had the President agreed to any relief measure, it could have been passed. From the very moment the consideration of the McNary-Haugen bill began under the five-minute rule until the end the President's position was well known, and that in itself was sufficient to bring it to defeat. Congress will adjourn to-day, and no relief bill will be passed for the benefit of agriculture. The farmers of America will continue to present their just claims to the Congress of the United States. They are asking that American agriculture be given equal right, equal opportunities, and equal protection with those which Congress has already given to other industries. All that the farmer asks is agricultural justice and equality.

### PEACE BY PROPER PREPAREDNESS

Mr. McSWAIN. Mr. Speaker, under leave to extend my remarks, I respectfully call attention to the following facts in connection with the proposition to take the profits out of war and to equalize the burdens of war and thereby to promote the national defense and the peace of this Nation and the world.

### NOT A NEW OR SUDDEN MOVE

In the Sixty-seventh Congress I introduced a resolution, then designated H. J. Res. 400, and the same was referred to the Judiciary Committee, and one day's hearings had; but the committee made no report on same. On the convening of the Sixty-eighth Congress I introduced a resolution identical in language and purpose, now known as H. J. Res. 128, and the following is a copy of same:

Joint resolution (H. J. Res. 128) to promote peace and to equalize the burdens and to minify the profits of war

Whereas it is the duty of Congress to require that the burdens and benefits of war shall be justly and fairly distributed; and

Whereas it is the duty of all citizens to contribute to our Nation's success in war according to their several capacities and resources; and

Whereas modern warfare rests increasingly upon scientific knowledge and industrial resources and must be carried on by the Nation as a whole and not merely by the young men in arms; and

Whereas to take the profits out of war and to require equal service for all and deny special profits to any will be conducive to peace (which is our traditional policy); and

Whereas we should employ the experience of recent wars to work out and enact into law, while we are yet at peace, such provisions and policies to be pursued when the war shall come as shall empower the President immediately to mobilize all the resources of the country: Now, therefore, be it

*Resolved, etc.*, That a commission is hereby created to draft and report to the President of the United States, who in turn shall transmit the same, with or without his approval, to Congress not later than the first Monday in December, 1924, proposed legislation to accomplish in fact the principles and policies expressed in this resolution.

That said commission shall be bipartisan and nonpolitical and shall be composed of four members of the Military Affairs Committee of the House of Representatives and two members of the Military Affairs Committee of the Senate, the Secretary of War, the Secretary of the Navy, the Secretary of Commerce, and three other persons not holding official or governmental position whatever, and selected with a view to represent in a general sense the views of labor, industry, and capital, respectively.

Within 30 days after the approval of this resolution the President shall appoint and announce the members of said commission and shall direct the same to meet in the city of Washington, D. C., as soon thereafter as may be practicable and shall supply from the War Department all necessary office and clerical assistance.

When said commission shall meet it shall organize by electing one of its number as chairman and another as vice chairman, and shall appoint a secretary and proceed to draft proposed legislation to accomplish the aims and purposes of this resolution; and such proposed legislation, with any comment upon same deemed desirable, shall be transmitted to the President not later than November 1, 1924, and the President shall direct that there shall be printed not exceeding 5,000 copies thereof for the use of Congress.

That the guiding principle to control the labors of said commission is that true preparedness demands our calm and careful adoption in advance of another war of a nation-wide policy of service for all citizens to the end that while young men are laying down for their country the comforts and joys of home and family, their health, their strength and time, their blood, bodies, and life itself, others not required to make these greater sacrifices may be required to lay down equitably and fairly some of their material resources and wealth, to the great end that victory for the Nation's ideals may speedily come, and that after victory there be no need for any adjustment of compensation and no mighty war debt piled up to sap the strength of the producing activities of the people for scores of years.

That no compensation shall be paid any member of said commission, and no expenses shall be incurred by them except the actual cost of maintenance and travel to the three members of the commission not already holding an official position.

### SEVERAL BILLS PENDING IN THE HOUSE

This resolution was referred to the Committee on Military Affairs, to which had also been referred H. R. 194, by Hon. BURTON L. FRENCH, of Idaho, and H. R. 4841, by Hon. ROYAL C. JOHNSON, of South Dakota, and H. R. 811, introduced by myself. Extensive hearings were conducted, and there appeared before the committee to express approval of the result aimed at by the resolution and by H. R. 194, by Representative FRENCH, et al., and H. R. 4841, by Representative JOHNSON of South Dakota, numbers of prominent citizens and public officials, including Hon. Herbert Hoover, Secretary of Commerce; Hon. Curtis D. Wilbur, Secretary of the Navy; Hon. Dwight F. Davis, Assistant Secretary of War; Mr. William B. Colver, formerly chairman of Federal Trade Commission and member of Price Fixing Commission during the World War; Mr. R. S. Brookings, LL. D., chairman of Price Fixing Commission during the World War; Mr. Bernard M. Baruch, chairman of War Industries Board during the World War; Mr. Edward F. McGrady, representative of American Federation of Labor; Col. John D. Marky, national chairman of legislative committee of the American Legion; Hon. JOHN M. EVANS, Representative from Montana; Hon. ROYAL C. JOHNSON, Representative from South Dakota; Hon. CHARLES L. RICHARDS, Representative from Nevada; and Hon. BURTON L. FRENCH, Representative from Idaho.

After most careful consideration the committee unanimously reported, recommending the adoption of House Joint Resolution 128, for the appointment of a commission to study economic and constitutional questions and to report same to the next session of Congress. I earnestly recommend that all Members of Congress obtain a printed copy of the hearings before the Military Affairs Committee and study the same carefully. There is a vast amount of information contained in the 250 pages of printed matter. The report of the committee is as follows:

TO PROMOTE PEACE AND TO EQUALIZE THE BURDENS AND TO MINIFY THE PROFITS OF WAR

Mr. McSWAIN, from the Committee on Military Affairs, submitted the following report, to accompany H. J. Res. 128:

The Committee on Military Affairs, to whom was referred the resolution (H. J. Res. 128) to promote peace and to equalize the burdens and to minify the profits of war, having considered the same, report thereon with a recommendation that it do pass.

This resolution explains its object and purpose. The desirability of accomplishing the end sought is well expressed in the inaugural address of President Warren G. Harding, March 4, 1921, as follows:

> "Our supreme task is the resumption of our onward, normal way. Reconstruction, readjustment, restoration—all these must follow. I would like to hasten them. If it will lighten the spirit and add to the resolution with which we take up the task, let me repeat for our Nation we shall give no people just cause to make war upon us; we hold no national prejudice; we entertain no spirit of revenge; we do not hate; we do not covet; we dream of no conquest nor boast of armed prowess.
>
> "If, despite this attitude, war is again forced upon us, I earnestly hope a way may be found which will unify our individual and collective strength and consecrate all America, materially and spiritually, body and soul, to national defense. I can vision the ideal republic, where every man and women is called under the flag for assignment to duty for whatever service, military or civic, the individual is best fitted; where we may call to universal service every plant, agency, or facility, all in the sublime sacrifice for country, and not one penny of war profit shall inure to the benefit of private individual, corporation, or combination, but all above the normal shall flow into the defense chest of the Nation. There is something inherently wrong, something out of accord with the ideals of representative democracy, when one portion of our citizenship turns its activities to private gain amid defensive war while another is fighting, sacrificing, or dying for national preservation."

This sentiment was several times repeated by President Harding, and notably on December 8, 1922, in his message to Congress:

> "The proposed survey of a plan to draft all the resources of the Republic, human and material, for national defense may well have your approval. I commended such a program in case of future war, in the inaugural address of March 4, 1921, and every experience in the adjustment and liquidation of war claims and settlement of war obligations persuades me we ought to be prepared for such universal call to armed defense."

The same principle has been several times indorsed by national conventions of the American Legion.

There appeared before the committee to express approval of the result aimed at by the resolution and by H. R. 194, by Representative FRENCH, et al., and H. R. 4841, by Representative JOHNSON, South Dakota, numbers of prominent citizens and public officials, including Hon. Herbert Hoover, Secretary of Commerce; Hon. Curtis D. Wilbur, Secretary of the Navy; Hon. Dwight F. Davis, Assistant Secretary of War; Mr. William B. Colver, formerly chairman of Federal Trade Commission and member of Price Fixing Commission during the World War; Mr. R. S. Brookings, LL. D., chairman of Price Fixing Commission during the World War; Mr. Bernard M. Baruch, chairman of War Industries Board during the World War; Mr. Edward F. McGrady, representative of American Federation of Labor; Col. John D. Marky, national chairman of legislative committee of the American Legion; Hon. JOHN M. EVANS, Representative from Montana; Hon. ROYAL C. JOHNSON, Representative from South Dakota; Hon. CHARLES L. RICHARDS, Representative from Nevada; and Hon. BURTON L. FRENCH, Representative from Idaho.

The hearings have been somewhat extensive for the purpose of ascertaining the facts relating to profiteering during previous wars, and especially during the World War, in order to understand the better what laws and legislative agencies are necessary to prevent a recurrence of such inequalities and unfairness while making war. It is highly desirable that remedial and regulatory legislation be adopted during the present Congress while the successes and mistakes of the recent war are fresh in our minds, and especially while there are yet in Congress and in the public service generally many of those who participated in legislation and administration during the recent war period.

There is another strong and convincing reason for enacting into law the result of experiences in conducting war now, far in advance of another war. That reason is manifest. If we wait for the outbreak of another war, those persons then in Congress will have but faint and uncertain recollection of the governmental agencies set up during the World War to coordinate transportation, production by industries, mines, forests, and farms, and buying and consumption by the military and civilian populations. The result may and probably will be that in the rush and excitement of commencing war utterly inadequate legislation will be formulated to prevent the outrage of profiteering in war, whereby some citizens, equally bound in moral and patriotic spirit to sacrifice for the country's defense, will grow rich, many of them immensely rich, while other citizens, perhaps millions of them, are under arms, suffering the hardships of the field and trench, blistering under torrid heat or freezing with arctic coldness, being gassed, wounded, killed. Such inequality or burden in democratic America, where all have enjoyed so many blessings, is an injustice that we must not permit to be repeated.

The exact legal methods and machinery whereby to accomplish the end invariably conceded to be highly desirable are not just yet clear to your committee. Therefore, without reporting any one of the pending bills, with or without amendments, we deem it best to recommend the adoption of House Joint Resolution 128, creating a commission to continue the study we have commenced and to formulate the language necessary to accomplish the desired results. That will involve knowledge, patience, concentration, and full opportunity for conference and counsel; this a commission sitting in the recess can have. The fruit of their labors will be before us in definite and well-thought out form when we reconvene in December. A vote for the creation of this proposed commission is merely an expression of approval of the general principle that "In war, as among the citizens of America, there should be equal service and equal sacrifice for all and special profits to none."

As a well-nigh ideal program of effective preparedness, the proposition will appeal to all seeking to insure national defense. It will mean that on the outbreak of war our skeleton organization for the human, material, and financial resources of the country is ready-made. There will be universal cooperation, and we will be able to strike an instant and concentrated blow with the vast powers of the entire Nation, insuring speedy and complete victory.

But as a war deterrent it is bound to prove efficacious. Undoubtedly certain interests that have profited hugely by previous wars are, to speak mildly, not averse to the recurrence of war. These same interests, or sympathetic interests, own and control most of the great daily newspapers of the country, and these, without specific war intent, are apt to influence the public mind out of a desire to satisfy a popular craving for the sensational. But if these interests understood in advance of war that they would have to make sacrifices and bear burdens and suffer losses, and not make huge profits as heretofore, then such interests would prescribe that these newspapers controlled by them shall not unduly and unnecessarily alarm the public mind. In such case the newspapers would caution prudence and toleration and forbearance to the last.

Since no group of citizens will then have any motive to stir up an aggressive war, and other nations will be very slow to attack or outrage the rights of a nation so prepared to make prompt and cooperative effective defense, war will become very remote and improbable. We do not contend that all wars will be prevented. That is yet impossible in the present state of human development.

Again, in the event of an inevitable, unpreventable war of national defense there will also be harmonious spiritual cooperation among all citizens, because all become defenders, whether in uniform or not, and some will not feel a sense of injustice and unfairness arising from inequality. After the war there will be no heartburnings, recriminations, and demand for adjusted compensation. The Nation will resume its normal labors where it left off. There will be absent during and after the war the usual carnival of corruption and bribery. If Government officials have no contracts to let carrying great profits, there will be no motive to offer a bribe. There will not be a new class of very rich made from war profits. All will equally and sincerely rejoice at the conclusion of war and the coming of peace, because it will mean the end of suffering and sacrifice for all.

OBJECTION TO CONSIDERATION ON CONSENT CALENDAR

This report was placed upon the Union Calendar, but not being able to consider the same under the ordinary rules I had said matter placed upon the Consent Calendar, and the same was reached on the call of the Consent Calendar on June 5, when objection was made to the present consideration by the Hon. MORTON D. HULL, of Illinois, as evidenced from the following extract of the RECORD of that date:

PROMOTION OF PEACE AND EQUALIZATION OF THE BURDENS OF WAR

The next business on the Consent Calendar was House Joint Resolution 128, to promote peace and to equalize the burdens and to minify the profits of war.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. MORTON D. HULL. I object, Mr. Speaker.

In the meantime application had been made by the Hon. C. W. RAMSEYER, of Iowa, and myself to the Committee on Rules for a special resolution and rule, and accordingly on June 5 the chairman of the Committee on Rules, by the authority of the committee, reported favorably House Joint Resolution 285:

Joint resolution (H. J. Res. 285) providing for the creation of a joint commission on national defense

*Resolved, etc.*, That a joint commission is hereby created, to be known as the joint commission on national defense, which shall consist of five Senators to be appointed by the President of the Senate and five Representatives to be appointed by the Speaker.

It shall be the duty of said commission to investigate and study the most practicable and effective plan to prevent profiteering in time of war upon either the Government or the civilian population; to insure the national defense by the mobilization in time of war of all the resources of the Nation, both human and material; to discourage any tendency to aggressive warfare; and to equalize the burdens and sacrifices of defensive warfare by requiring a just and fair contribution to the national defense by all the forces and factors of national life without war profit to any private individual, corporation, or combination.

The said commission shall report its acts, proceedings, findings, and conclusions to Congress on or before the first Monday in December, 1925. The commission shall include in its report recommendations for legislation which, in its opinion, will tend to carry out the purposes of this resolution and shall specifically report upon the limitations of the powers of Congress to enact such legislation.

The commission shall elect its chairman and vice chairman, and vacancies occurring in the membership of the commission shall be filled in the same manner as the original appointments.

The commission or any subcommittee of its members is authorized to sit during the sessions or recesses of Congress, to send for persons and papers, to administer oaths, to summon and compel the attendance of witnesses, and to employ such personal services and incur such expenses as may be necessary to carry out the purposes of this resolution; such expenditures shall be paid from the contingent funds of the Senate and House of Representatives in equal proportions upon vouchers authorized by the commission and signed by the chairman thereof.

It having been made to appear that H. J. Res. 285 is not privileged matter, being a joint resolution and providing for the expenditure of money, the Hon. BERTRAND H. SNELL, of New York, chairman of the Committee on Rules, by instruction of the committee introduced a House concurrent resolution, as will appear by reference to the following extract from the proceedings in the House on June 6, 1924:

JOINT COMMISSION OF NATIONAL DEFENSE

Mr. SNELL. Mr. Speaker, I have another resolution.

The SPEAKER. The gentleman from New York offers a resolution, which the Clerk will report.

The Clerk read as follows:

"Concurrent resolution providing for the creation of a joint commission on national defense

"*Resolved by the House of Representatives of the United States of America in Congress assembled (the Senate concurring)*, That a joint commission on national defense, which shall consist of five Senators to be appointed by the President of the Senate and five Representatives to be appointed by the Speaker.

"It shall be the duty of said commission to investigate and study the most practicable and effective plan to prevent profiteering in time of war upon either the Government or the civilian population; to insure the national defense by the mobilization in time of war of all the resources of the Nation, both human and material; to discourage any tendency to aggressive warfare; and to equalize the burdens and sacrifices of defensive warfare by requiring a just and fair contribution to the natonal defense by all the forces and factors of national life without war profit to any private individual, corporation, or combination.

"The said commission shall report its acts, proceedings, findings, and conclusions to Congress on or before the first Monday in January, 1925. The commission shall include in its report recommendations for legislation which in its opinion will tend to carry out the purposes of this resolution and shall specifically report upon the limitations of the powers of Congress to enact such legislation.

"The commission shall elect its chairman and vice chairman, and vacancies occurring in the membership of the commission shall be filled in the same manner as the original appointments.

"The commission or any subcommittee of its members is authorized to sit during the sessions or recesses of Congress, to send for persons and papers, to administer oaths, to summons and compel the attendance of witnesses."

Mr. SNELL. Mr. Speaker, this resolution provides for a joint commission of both Houses, whose duty it shall be to study and investigate the most practical and effective plan to prevent profiteering in time of war upon either the Government or the civilian population; to insure the national defense by the mobilization in time of war of all the resources of the Nation, both human and material; to discourage any tendency to aggressive warfare, and to equalize the burdens and sacrifices of defensive warfare by requiring a just contribution to the national defense by all the factors of our national life. It also provides that this commission shall report back to the House its various recommendations before January 1, 1925.

The first recommendation along this line was made by President Harding, and this recommendation received a most unanimous response throughout the length and breadth of this country; and on account of the study and investigation of some of our own Members, and the introduction of bills along this line, there has been quite a general demand that Congress take notice of this proposition and give cognizance of our interest in the developments along this line. For that reason the Committee on Rules has thought it proper and just to present this resolution at this time.

Mr. MOORE of Virginia. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. MOORE of Virginia. Is this expected to be a part of the Cleveland platform?

Mr. SNELL. It having come from a Democratic Member, I should not think it would be.

Mr. HUDDLESTON. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. HUDDLESTON. Why was this delayed so late in the session? Why is it necessary to do it now? Is war imminent?

Mr. SNELL. I do not know that it is. A great many people desire to have it presented at this time.

Mr. HUDDLESTON. Why is the national defense more relevant at this time than at other times? The gentleman has delayed until now to lay it before the House for its consideration.

Mr. SNELL. It does not require an appropriation. It just permits these people to investigate the question this summer and make a report next fall.

Mr. HUDDLESTON. Well, this resolution is not as innocent as it might be thought to be. There is a purpose behind it.

Mr. SNELL. If there is, I do not know it.

Mr. HUDDLESTON. I would like to know what the purpose is. I would like to know who really advised that.

Mr. MCSWAIN. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. MCSWAIN. The gentleman from Alabama [Mr. HUDDLESTON] asked if there is any purpose behind it. I want to say that, so far as I know, the purpose is to equalize the burdens of war, so that my children and grandchildren and yours, if they have to meet the issues that we have had to meet, may meet them with some degree of equity, so that just as America stands on the proposition of equality in time of peace, that there shall be equal rights and special privileges to none, so in time of war there shall be equal sacrifices and equal burdens imposed on all. [Applause.]

Mr. HUDDLESTON. Mr. Speaker, will the gentleman yield?

Mr. SNELL. I will yield to the gentleman from Alabama.

Mr. HUDDLESTON. It is quite evident to me that the Committee on Military Affairs has all the jurisdiction needed to investigate the subject and that there exists no real reason along the line indicated by the gentleman from South Carolina [Mr. MCSWAIN] for appointing this commission. The real fact is, as I deduce, that the purpose of appointing this commission is to afford an instrumentality of propaganda and to exercise and advocate it between now and the beginning of the next Congress. The gentleman is providing, as I understand, for the conscription of human labor and all kinds of human material. He may think he is fighting for the conscription of property; but if he expects to get anywhere, I want to say to him that he wants to abandon that portion of the program. And let me say to the gentleman that there is a considerable body of people in the country who are opposed to the conscription of labor and the conscription of human material. Anyhow, there are some of us who are opposed to the conscription of men in time of war, and I for one am altogether opposed to the bringing in here, in the last moment of Congress, of a bill without proper investigation to provide an agency of propaganda such as the gentleman entertains. [Applause.] I think the gentleman ought to give us some time for debate on this question.

Mr. TREADWAY. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. TREADWAY. I understood the gentleman to say, in the course of his brief explanation, that there was a great general demand for this sort of an inquiry. I try to keep up with the times, but I confess that that general demand has overshawdowed my information, and I would be glad to know where it is.

Mr. SNELL. There is a general demand all over the country.

Mr. HUDDLESTON. Mr. Speaker, I am unwilling that this should be done without a quorum. I make the point of order that a quorum is not present in the House.

Mr. LONGWORTH. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The gentleman from Ohio moves——

Mr. LONGWORTH. I understand that there is no possibility of a conference report being reported to-night.

Mr. MOORE of Virginia. I ask the gentleman not to press that. A large number of Members will be here after a while. I do not think there will be any difficulty.

Mr. LONGWORTH. Mr. Speaker, I was not aware that such a controversial subject would be brought up.

Mr. SNELL. I will say I did not know there was any controversy about it. Mr. Speaker, I did not understand this bill was going to cause so much trouble.

The SPEAKER. Does the gentleman from Alabama withdraw his point of no quorum?

Mr. HUDDLESTON. Temporarily I withdraw it.

Mr. SNELL. I think we had better withdraw this resolution. It is nothing in which I am especially interested myself.

The SPEAKER. The gentleman withdraws the resolution, and the gentleman from Maine [Mr. HERSEY] is recognized.

NO COMMISSION TO STUDY QUESTION NOW POSSIBLE

Now, Mr. Speaker, it is manifest that no action can be taken at the present session of Congress to appoint a commission to continue the study of this great question and to report their conclusions and recommendations at the next session of Congress. I was very anxious that this commission of 10 Members of Congress might be designated, so that by correspondence they might exchange ideas and suggestions and have a special interest in the subject stimulated, so that when we reassemble in December these 10 men might assemble and formulate definite and specific suggestions as to the form and substance that legislation should take in order to accomplish the great aim desired by the peace-loving and justice-loving people of America.

PROPER PROCEDURE IS BY COMMISSION—A STUDY CAN HURT NOTHING, AND WILL SURELY HELP MUCH

There are many Members of Congress prepared now to vote in favor of legislation to prescribe in advance the methods and means of mobilizing all the resources of the Nation, human material and financial, at the outbreak of any future war. I heartily favor the general proposition because it is manifestly unjust that some citizens should grow rich during the war while others make the great sacrifice of time, of health, of body, and of life itself. The American Legion has been on record by resolution of its national conventions of several years as in favor of the language of the bill known as H. R. 4841, introduced by the Hon. ROYAL C. JOHNSON, of South Dakota. But I can see that there are many very intricate and important questions that will require careful and concentrated thought. I have been very anxious to have the benefit of the counsel and the usual contrariety of view coming from a conference of 10 men around a table devoting their time and thought to the solution of this great problem. Therefore, while I have introduced H. R. 8111, I have often and frankly stated that I am not quite sure of some of its parts and provisions, and I am sure that all of its parts are not consistent and properly related, but I introduced it in great haste as a sort of working basis and especially to provoke the criticism, both constructive and destructive, from other members of the committee and of Congress. One of the chief reasons why we ought to have a commission is because the Committee on Military Affairs, like all other committees of Congress, has several hundred bills pending before it, and the importunate proponents of these several bills are usually present and earnestly pressing their pet measures upon our attention. We are therefore distracted, and find it impossible to give the necessary quiet and connected study to such a great proposition as the universal mobilization of all the Nation's strength for national defense in time of war.

COMMISSION TO STUDY UNIVERSAL CONSCRIPTION FAVORED BY AMERICAN FEDERATION OF LABOR

After the proceedings in the House of Representatives on June 6 it was called to my attention that there is an article in the June number, 1924, of the American Federationist, written by Samuel Gompers, under the caption, "What about universal conscription for war?" In the article it is stated that the theory of universal conscription in time of war, and that its principle is just and that we must be spared all profiteering in the next war, if there is to be a next war. The seriousness of the question is emphasized, and several very pertinent and serious questions are asked. Answers are not advanced to these questions, and the reader is not sure as to what views the writer now holds on the questions propounded. But there is no doubt that the writer does favor the appointment of a commission to study this great question, as evidenced by the concluding paragraph in the article, which is as follows:

> These are things to think about. I should like to see a commission, composed of men from all walks of life, representing all forms of human effort, give study to this great question. We want no more war, but if we must have war we want to be as effective as possible and we do not want abuses and profiteering at home. What are the measures to be taken? We can not determine that question according to emotional desires, probably not according to abstract principles, and probably not according to any prearranged formula.

I am informed that there is an editorial in the June number, 1924, of the Review of Reviews, in which indorsement is given to the principle of universal mobilization in the interest, first, of proper preparedness for national defense in order to defend against an unavoidable war of aggression; second, to insure greater justice by equalizing and distributing the burdens and sacrifices of war; and, third, to promote peace by removing the temptation to incite to any war of aggression, and by deterring other nations from assaulting a nation so thoroughly prepared to defend itself by the instant cooperation of all its sources of strength.

SOME OBJECTIONS ANSWERED

Some may object to making such a study on the ground that they object to any war and object to making any preparation for war and object to drafting men to be soldiers in time of war, and therefore, to be consistent, they object to devising a plan to draft wealth and material resources to help fight a war. Such objectors are conscientious and unselfish, but I think their counsels are unsafe. Even while our Nation was composed largely of rural and agricultural people, with little commerce to defend, while still so small and weak as to excite only the friendly sympathy of other nations and never their jealousy and envy, yet then we engaged in several wars. Recently we nobly and generously rushed into what we called "the last great war to end war." We must now realize that our noble aims were not achieved in full. We destroyed hereditary autocratic power in the central empires, but autocracy is still raging in the world. The world may be reasonably safe for democracy, but the world is not functioning according to the ideals of democracy, and we are confronted with a condition of reality and not a theory of fancy. Even the League of Nations, if universally adhered to, would not prevent and exclude the recurrence of war. It could only postpone and render less frequent the outbreak of war. For that purpose it was a noble conception and is to-day a powerful reality.

WE LIVE IN A HUMAN WORLD AND NOT IN A FOOL'S PARADISE

When we study history we must comprehend the forces of selfishness and of passion that have prevailed among nations and even within nations. There have been international wars and internecine wars. Perhaps human nature has not changed so very much. Most of the Members of this Congress are sons of those who wore the blue and followed Grant and of those who wore the gray and followed Lee. Lee and Grant were both graduates of the same national military school. They had both held commissions in the United States Army. Both had resigned from the United States Army, hoping never to take up the art of war again. But both were disillusioned. With Grant Civil War broke out in a few short years after his resignation. With Lee a call came to defend his native State of Virginia against the invader. I wish there might be eternal peace, never broken by the clash of arms. I hope that war for our country will be long deferred. I favor the minimum of safe and sane outlay for armament and oppose a large standing army, but believe that our civilians should be encouraged to volunteer their services to become prepared to defend the Nation against a foreign invader or violator of our rights. I therefore think that we must be prepared, to adopt the language of South Carolina's motto, "in mind and resources" for the possible eventuality of war. Such being my views, I feel that we should plan now, while the lessons from the successes and mistakes of the World War are fresh, so to organize by legislation the machinery of government to become operated on a declaration of war by Congress as to equalize the burdens and sacrifices of warfare, so far as possible, among all our citizens.

THOUGH THE IDEAL BE PERHAPS UNATTAINABLE, YET SUBSTANTIAL PROGRESS IS POSSIBLE

Some persons object to appointing a committee to study this question, saying that "You can never take the profits out of war, because profiteering has heretofore prevailed during every war," and therefore they object to making an honest and unselfish effort toward progress. Such arguments could be made against crime and against any proposition to correct evil or to promote human advancement. Some persons object to drafting men to fight in the uniform and to drafting sufficient material resources to carry on the war in cooperation with human beings, because the fear that it is a covert and sinister scheme whereby to force the entire civilian population, especially civilian laborers, into the rigors of military discipline, even though performing nonmilitary services. I admit that a few extreme individuals have hastily contended that we ought to go to such lengths. However, I do not believe that any substantial and appreciable number of persons can be found who will advocate drafting more men and women than those necessary to conduct essentially military services, nor would they propose to draft—

which is merely another word for commandeer—any more material resources, such as railroads, factories, steamships, mines, munitions factories, and so forth, than may be actually and manifestly necessary at the time to be employed in cooperation with the military forces, either actually in the field or in supplying them with munitions, food, and clothing. Practical men, working to accomplish the ends of justice, recognize reasonable limitations. We must have idealism, but we must know its limitations.

WAR IS THE WHOLE NATION'S BUSINESS

Those who advocate the purely voluntary method of raising armies, to be consistent, should advocate the voluntary method of raising supplies to support the Army. That would exclude taxation to pay the expenses of war. That would mean our utter helplessness, and would be an express invitation to our enemies, now unknown, and I hope to remain unknown. But war is the business of the whole Nation and not a part of the Nation. If it is not everybody's business, Congress should never declare war. Being everybody's business, everybody should do his part, according to his respective ability. That is the foundation of the selective service system for human beings. Let all register and let those fit physically and mentally that can be spared from essential civilian pursuits with least dislocation to existing industries be called to the colors and assigned to different branches of service, according to their several capacities. In like manner let material wealth and financial resources be drafted in the same selective and discriminating way. A war of national defense is just as much in defense of wealth as of human beings. No conqueror would now massacre a population, but instead would impose a terrible indemnity upon property. Therefore let accumulated wealth contribute pro rata and equitably to maintain the fighting forces so that after war there may be no great war debt.

TO STOP PROFITEERING IS THE KEY TO THE SITUATION

It has been conservatively estimated by safe and sane men that about two-thirds of the war debts of this Nation represent the inflation due to war-time prices pushed up by the spirit of profiteering. The effort to tax back into the Treasury excess war profits proved largely futile. It produced a dislocation and confusion by reason of which speculators reaped enormous profits. Practical men, such as Bernard Baruch, chairman of the War Industries Board, a man of wide and successful business experience, and William B. Culver, chairman of the Federal Trade Commission and member of the Price Fixing Commission during the war, and many other equally practical and hard-headed business men, express positive conviction that war-time prices may be so stabilized and industries so regulated as to stop profiteering. When we stop profiteering we eliminate any motive to inflame the public mind unduly and unnecessarily. Practical and proven patriots, such as the nearly 1,000,000 members of the American Legion, have several times solemnly expressed their resolution that this Nation must erect now in peace an equitable and fair organization for employing, without profit, every resource of the Nation to defend the Nation's life and rights.

THIS PLAN IS NO PART OF A PACIFIST PROGRAM

Some object that this is an emotional, idealistic scheme of a few pacifists, understanding that "pacifists" are those who would supinely lie down and allow those who envy our blessings, and are jealous of our wealth, and want to occupy our land to do with us according to their own sweet will. That was the thought neither of George Washington nor Thomas Jefferson. I feel that I can safely say that 95 per cent of the practical, cool-headed, red-blooded, and thoughtful soldiers and ex-soldiers of this Nation believe that this plan that I am advocating is primarily and preeminently part of a program of proper preparedness, and, secondarily, is inspired by the ideals of democracy and prompted by the spirit of justice. If, in consequence of our preparation to defend ourselves, others may be deterred from attacking us, and war be thereby prevented, then this measure is in that sense a powerful promoter of peace. If, as a result of eliminating war profits, any of our citizens controlling the instrumentalities of publication and propaganda be influenced to encourage the preservation of peace, and not to incite to aggressive war, even by reason of the selfish motive of not being compelled to make financial sacrifice to carry on the war, and war be thus deferred and even prevented, then this measure would by this reason be a mighty agency for peace. In other words, this is the peace plan of practical men, believing in the principles of American democracy, and willing to suffer and sacrifice to defend American ideals.

THE INTERNATIONAL ASPECTS OF THIS PROPOSITION

It is commonplace to say that as America goes so goes the world; but there is much truth in the statement, as the history of the world shows since we proclaimed the Declaration of Independence. If other nations be deterred from attacking us because of our ability to defend and if self-interest prompts us not to attack others, how will war come about? Furthermore, other nations will adopt the same system of preparedness and the same forces will operate upon the human nature of their citizens. The outcome through the ages must be that the rank and file of the people must come to realize that war is a national calamity, that war means sacrifice to each and every citizen and a benefit to none. It was perhaps the greatest American practical political philosopher, Thomas Jefferson, who gave utterance to that fundamental democratic conception that among our people in peace there should be "equal rights for all and special privileges to none." So let us build on that sure foundation and proclaim a new conception of the ideals of American democracy, operating in time of war upon the principle that there shall be "equal service and equal sacrifice for all and special profits to none."

THE REVENUE ACT OF 1924

Mr. OLDFIELD. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

The following table of the number of persons making income-tax returns in 1921 is compiled from the official figures of the Treasury Department contained in Statistics of Income for 1921.

It shows the total number of persons making income-tax returns in each State, and the number benefited more by the Democratic (act of 1924) plan than by the Mellon plan, and the number benefited more by the Mellon plan than by the Democratic (act of 1924) plan.

*Comparative table showing beneficiaries of the Democratic (act of 1924) tax-reduction plan and of the Mellon plan by States*

| State | Total number making income-tax returns, 1921 | Number benefited more by Mellon plan | Number benefited more by act of 1924 (Democratic plan) |
|---|---|---|---|
| Alabama | 43,009 | 25 | 42,984 |
| Arizona | 18,477 | 1 | 18,476 |
| Arkansas | 33,839 | 8 | 33,822 |
| California | 386,082 | 237 | 385,845 |
| Colorado | 69,676 | 25 | 69,651 |
| Connecticut | 123,269 | 96 | 123,173 |
| Delaware | 15,889 | 12 | 15,877 |
| District of Columbia | 89,956 | 68 | 89,888 |
| Florida | 42,249 | 14 | 42,235 |
| Georgia | 67,719 | 24 | 67,695 |
| Hawaii | 11,481 | 22 | 11,459 |
| Idaho | 22,976 | 1 | 22,975 |
| Illinois | 611,558 | 537 | 611,021 |
| Indiana | 150,300 | 52 | 150,244 |
| Iowa | 111,483 | 24 | 111,459 |
| Kansas | 88,785 | 9 | 88,776 |
| Kentucky | 69,496 | 25 | 69,471 |
| Louisiana | 67,960 | 34 | 67,926 |
| Maine | 44,397 | 25 | 44,372 |
| Maryland | 112,963 | 109 | 112,854 |
| Massachusetts | 388,442 | 505 | 387,937 |
| Michigan | 250,147 | 174 | 249,973 |
| Minnesota | 124,501 | 81 | 124,420 |
| Mississippi | 25,614 | 5 | 25,609 |
| Missouri | 172,519 | 106 | 172,413 |
| Montana | 36,907 | 4 | 36,903 |
| Nebraska | 71,953 | 14 | 71,839 |
| Nevada | 9,710 | 1 | 9,718 |
| New Hampshire | 32,410 | 17 | 32,393 |
| New Jersey | 269,096 | 274 | 268,822 |
| New Mexico | 11,780 | 1 | 11,779 |
| New York | 1,066,637 | 2,050 | 1,064,587 |
| North Carolina | 44,161 | 38 | 44,123 |
| North Dakota | 18,440 | 1 | 18,439 |
| Ohio | 367,096 | 270 | 366,826 |
| Oklahoma | 69,381 | 15 | 69,366 |
| Oregon | 62,804 | 18 | 62,786 |
| Pennsylvania | 621,103 | 833 | 620,270 |

COST OF CONSTRUCTING 30-FOOT DEPTH OF SHIP CANAL, HUDSON RIVER TO LAKE ONTARIO

Mr. SWEET. Mr. Speaker, the resolution which I introduced provides for the bringing down to date the estimates and surveys previously made by the Board of Army Engineers for the construction of a 30-foot waterway from the Hudson River to Lake Ontario. A very thorough survey was made in 1900 by the Board of Army Engineers representing an estimate of cost of about $100,000,000. Computing that prices have almost doubled since that date, it is my opinion that the present figure would be in the neighborhood of $200,000,000.

Water transportation as a means of carrying heavy traffic and thus relieving railroad business is, to-day, a permanent necessity and has been in the past one of the chief factors in the commercial development of the country. The railroads should mostly carry freight which requires speedy delivery. The water traffic on Lake Ontario, the Mississippi and Ohio Rivers, and around our coast has proven the possibilities of this transportation, and New York has been the pioneer in it and should continue to be.

Cheaper freight rates for farm and all other products from the Middle West to the seaboard must be provided. The New York State route provides the shortest and most feasible way for such relief. In view of the benefits to be gained for the commerce of the country by such a route, I do not think it would be too much to expect the national and New York State governments, acting in conjunction, to expend the money. The State has just bonded itself for $50,000,000 for the building of hospitals and for $45,000,000 more for the payment of a bonus to the veterans of the war. I do not see why it should not further bond itself to assist in an improvement which would greatly affect commercial development everywhere within its borders. And I do not see why the Federal Government should not provide an easy water outlet to tidewater and the sea to New York City and Europe for the products of all the Middle and Middle Western States.

The suggestion first made by Gouverneur Morris for the construction of the Erie Canal was regarded as the effusion of an eccentric mind. But men like Morris, DeWitt Clinton, and Robert Livingston had the vision to make the effusion a reality. Grumblers declared that the suggestion was impracticable; but the next generation found the canal inadequate for growing commerce. Finally, a ship canal was urged by those who again seemed visionary and a compromise was made on a barge canal. It is now found that this will not meet the needs of heavy-draft vessels which might easily proceed through a 30-foot channel to and from the Lakes to the port of New York.

Against the St. Lawrence route it seems to me there lie objections which must prevail. For five or six months of the year the channel would be difficult of navigation because of climatic conditions. Ice and fog would discourage mariners. Harbor facilities are wanting. Much time would be consumed by ocean vessels in proceeding 1,500 to 2,000 miles to the north through such a canal. This additional time and the other factors I have mentioned would militate against the success of the undertaking by keeping the great ocean freight carriers away and limiting the size of the vessels used.

Vessels would find it difficult to obtain cargoes in both directions. Nor should they proceed out of the established lanes of travel from the center of the continent through New York City. Insurance rates from New York to Liverpool the year round are 25 cents. From Montreal to Liverpool through the St. Lawrence they are forbiddingly high. Thus they are 27½ cents from the opening of navigation to the middle of October, 32½ cents to the 1st of November, 42½ cents to the 16th of November, and 55 cents from that date to the absolute close of the season. Furthermore, the canal would be built and operated in conjunction with the Canadian Government. I regard the St. Lawrence project as out of the question.

On the other hand, the reasons for a 30-foot channel from the Hudson to Oswego seem unassailable. The Hudson is impassable for a very short period and could be made navigable continually. The Army engineers have already recommended a project for deepening the Hudson to Troy. The Mohawk and barge improvements provide a basis for adequate deepening. Insurance rates would be low. Time would be saved, and great vessels would use the route. Harbor facilities would be of the best. Profit on cargoes would be made both going and coming. American territory and enterprises would be developed. New York City would be enhanced as a port and continue as the financial center of the world. That city and other points in New York would find easier shipment to and from the Middle West, particularly in the reduction of rail rates which would inevitably result. If the United States would continue as the commercial leader of the globe it must develop its commercial routes primarily for the benefit of its own people and not in conjunction with and primarily for another land and people. A ship canal from the Lakes to the Atlantic is inevitable. The Oswego-Hudson route is logical. It ought to be adopted.

AMENDING THE NATIONAL BANK AND FEDERAL RESERVE ACTS

Mr. McFADDEN. Mr. Speaker, the House Banking and Currency Committee, after careful deliberation and the holding of extensive hearings, on April 20, 1924, ordered the chairman of the committee to report the bill H. R. 8887 with a favorable recommendation, and instructions to procure a rule for immediate consideration of the bill. The bill was immediately reported and the chairman immediately presented the request of the committee for a rule, which was refused by the chairman of the Rules Committee, and not until the most persistent efforts were put forth did the Rules Committee finally present a rule for the consideration of this measure on June 3, 1924.

Notwithstanding the fact that we had repeated assurances of the passage of this bill at the present session of Congress by the leaders, the consideration of the bill, because of their attitude, has been postponed until the December session of the present Congress. This action on the part of the leaders in not permitting the action on this bill at this time precipitates a most crucial situation. The national banking system is facing a crisis because of the competition of State banks and trust companies which has grown up recently, and many of the most important national banks are awaiting the decision on this bill as to whether they will remain in the national system.

The branch banking situation is developing so rapidly throughout the several States that the refusal on the part of Congress to consider this restrictive measure at this time is simply an invitation for the extension of branch banking in the United States which will be more troublesome to deal with next December than at the present time. The importance of this measure to the Federal reserve system can not be overestimated. We are facing the development of a banking system in this country operating under the different laws of 48 States, which will be presided over by a Federal board pretending to supervise a banking system operating under State banking laws, which laws are largely administered through political influence and expediency. The practical operation of such a system will be entirely under the control of the departments of the States and the influence of a Federal board over such a system would be practically negative.

This bill has been approved and its passage at the present session of Congress urged by the Federal Reserve Board, the national banking section of the American Bankers' Association, the executive council of the American Bankers' Association, the Federal Advisory Council of the Federal Reserve Board, the Reserve City Bankers' Association, and the State bankers' associations of such States as New York, Illinois, Missouri, Kansas, Texas, and so forth, boards of trade, associations of credit men, the National Association of Credit Men, by the Comptroller of the Currency and the Secretary of the Treasury.

This bill, in my opinion, is the most important banking bill which has come before the House since the passage of the Federal reserve act, and its enactment into law is necessary to preserve and more firmly establish the benefits and advantages of that act. The business of banking is a competitive commercial enterprise like any other business which makes a profit through the rendition of service to the public. Under our financial system where in each State of the Union there are two systems of banking—National and State—each in natural competition with the other for business, it is necessary for their mutual existence that their charter powers be substantially equal. It is especially important that the national banks be not left in a position in the Federal reserve system, being compulsory members of that system, where they are unable to meet the competition from the State member banks.

You will recall that in 1917 the Federal reserve act was amended, largely as a war measure, whereby State banks were permitted to come into the Federal reserve system with the privilege of withdrawing therefrom at will and at the same time were permitted to exercise all of the charter powers given them under the respective State banking laws. Many of these State laws grant more liberal charter powers than is permitted national banks under the national bank act.

The effect of this amendment has been to permit the development within the Federal reserve system of several forms of competition between the State and National banks with the advantage in favor of the State banks. National banks can exercise no powers except those granted by Congress, and the main purpose of this bill is to restore as nearly as possible the equilibrium between the State and National banks within the Federal reserve system. The bill will not place any dis-

advantage upon the State banks, but is in many respects favorable to them, as will be later pointed out.

The unfavorable position in which the national banks have found themselves within the last few years has resulted in a large number of withdrawals from the national system, either through the absorption by State banks or direct conversion of national banks into State banks. Since January 1, 1913, 173 national banks, each with a capital of more than $100,000, gave up their national and took out State charters and carried with them total assets of nearly $2,000,000,000. This is about 10 per cent of the total assets of the entire national banking system. At this rate of defection from the national system it would not be many years before the system itself would be destroyed and the Federal reserve system thereby left with only State member banks, which could withdraw at will.

These national banks entered the State banking systems in order to place themselves upon an equal competitive basis with the State banks in their respective localities. Among those who thus left the national system are some of the great banking institutions of the country. I betray no confidence, since it is a matter of public record, when I mention such names as the Wells-Fargo, of San Francisco, the First National Bank of Cleveland, the Lowry National of Atlanta, the National Bank of Commerce, Kansas City, the Union National of Newark, the Liberty National of New York, the Irving National of New York, and the Bank of North America, of Philadelphia, as being among those now under State charters.

The Bank of North America was the first bank in the United States, and was started by Robert Morris. There is not the least shadow of a doubt that to-day the board of directors of many of our great national banks are seriously considering giving up their national charters in order to enter State systems and thereby returning to the Federal reserve system as State member banks with wider charter powers.

This is not a threat or gesture on the part of these national banks to force legislation from Congress. Many of them would prefer to be State member banks of the Federal reserve system than compulsory national bank members in it. The big banks of the country are not pressing for this legislation. They no doubt feel that they can take care of themselves. The concern should be upon the part of Congress, for the national banking system and the Federal reserve system are the creatures of Congress. Their maintenance in their fullest strength and efficiency are of vital importance to the American people in order to insure the orderly coordination of credit machinery by the National Government. It is not the life of these particular banking institutions which is at stake. It is the life of a great financial system, without which the country will fall back into the chaotic complexities of 48 different banking systems under the supervision of 48 independent and uncoordinated banking officials.

The effect on the national banking system of competition engendered by recent State legislation is not disastrous alone to the large national banks but is gradually squeezing out the national banks in the small towns and agricultural communities. These little national banks are the only arteries through which the Federal reserve system reaches the rural communities, since the small State banks have seen fit not to become members. They are compelled by law to bear the burdens of the Federal reserve system, and they deserve the most watchful care of Congress. Their loss to the national system is a total loss to the Federal reserve system, since when they are absorbed into a State system they do not later, as do the large city banks, become member banks. It is more profitable for them to remain on the outside.

This bill contains many provisions designed to aid these little national banks in the efficient conduct of their banking business.

First, let me touch upon branch banking.

The outstanding feature of banking operations on the part of State banks, which is making the greatest inroads into the national system, is that of branch banking.

State-wide branch banking is permitted in 9 States, county-wide branch banking in 2 States, and city-wide branch banking only in 9 States. (Hearings, p. 46.)

The annual report of the comptroller shows that in California 82 State banks are operating 475 branches, and 184 of these branches are beyond the limits of the city in which the parent bank is located. I understand that there has been an increase in the number of these branches since the report of the comptroller. One of these State banks is operating branches in 50 different cities and towns in California. In the various parts of the city of Detroit 14 down-town banks are operating over 200 branches. Two hundred and fifty-one State banks in the State of New York are operating branches, and in the United States as a whole it is reported that about 500 State banking institutions have in operation 1,700 branches.

This bill proceeds, therefore, upon the principle that branch banking under State laws has already gained a foothold in various parts of the United States; that in so far as it is carried on outside of the city in which the parent bank is located it involves the fact of absentee control over the finances of a community, is an unsound and un-American form of banking, and should be stopped at its present stage of development to the extent that it lies within the power of Congress to do so. The bill does not regard branch banking within the limits of a single city by the banks therein located in the same light as state-wide branch banking. This distinction between intracity and state-wide branch banking was clearly made by the Comptroller of the Currency, Mr. Henry M. Dawes, in his statement before our committee. He said:

> At the outset it should be stated that while the question of extending outside facilities in the form of offices or branches beyond the limits of the parent institution but confined to municipal limits is one that might be properly controversial, it does not, to my mind, involve the fundamental principle of branch banking. So long as such an operation is confined strictly to municipal limits, it remains in its essence a community operation conducted for the benefit of residents by residents.
>
> I will not discuss the necessity or develop the arguments which have induced State legislatures to permit this form of operation. It seems to me it is sufficient to say that these intracity activities do not run parallel at all to the operations which are involved in the extension of banking influence by direct control in the form of branches covering a whole State or limits beyond the municipality. If the principle of local control over banking facilities within city limits is recognized and such an operation is forbidden in one and permitted in another State, it would not be a real concession to any branch banking principle, since intracity banking is, after all, community banking as distinguished from State, district, or national branch banking.
>
> The city is the natural unit under which all concentrated districts of population naturally operate.
>
> Where branch banks become state-wide in their operation the problem assumes an entirely different aspect. They cease then to be institutions operated by residents for the benefit of residents. The principle of absentee control of finance and of the monopolistic aggregation of capital into huge units is involved. The balance of the Federal reserve system is materially affected. I have dilated upon the results of such developments, and nothing would seem to me to be more undesirable than to attempt to protect the national banking system by an unnecessary surrender to an unsound principle. This, in my opinion, would be the effect of granting state-wide branch banking privileges to the national banks. (Hearings, pp. 14, 15, and 16.)

This distinction was confirmed before the committee by both the governor and the vice governor of the Federal Reserve Board.

The bill, however, recognizes the right of State member banks to engage in intracity branch banking in the large cities where the State legislature has as a matter of public policy granted them this right.

The most complete information on branch banking was before the committee not only through hearings which it held but also through extensive hearings and investigations by the Joint Committee of the House and Senate, which visited the various banking centers of the country recently.

I do not feel that it is necessary for me to consume any time here in going into the arguments for and against branch banking. The strongest and clearest presentation of this whole subject may be found in the committee hearings. In reporting out this bill the committee reflected what I believe to be the overwhelming sentiment of the country against branch banking. This is an antibranch banking bill. This is clearly shown by the provisions which I shall now point out.

ANTIBRANCH BANKING FEATURES

In dealing with the consolidation of a State with a national bank, section 1 of the bill prohibits any such consolidated bank from retaining in operation any branch which the State bank might have had beyond city limits. Such a State bank can only be absorbed into the national system upon condition that it first abolish such outside branches.

Section 7, in relation to the conversion of a State bank into a national bank, prohibits such a bank from electing to retain in operation any branch which it may have had before conversion on the outside of city limits.

Section 9 prohibits any State bank having in operation branches outside of city limits to become a member of the Federal reserve system without first divesting itself of such branches. This prevents state-wide branch banking on the part of new member banks in the Federal reserve system. As to

the State banks already members of the Federal reserve system which are engaged in state-wide branch banking, this section prohibits them or any other member bank from establishing any additional branches beyond the city limits. State-wide branch banking, therefore, in the Federal reserve system will be stopped at its present stage of development.

The committee found no feasible plan to force the State member banks to divest themselves of branches which they now have outside of the city limits. This section further prohibits a State member bank from establishing any branches at all in cities with a population less than 25,000; it prohibits the establishment of more than one branch in cities from 25,000 to 50,000 population; and prohibits the establishment of more than two branches in cities of 50,000 to 100,000 population. This section, therefore, regardless of the scope of the State laws, would limit within the Federal reserve system the future establishment of branches by State banks to cities having a population of less than 100,000.

Section 8 of the bill prohibits a national bank from establishing any branches beyond the limits of the city in which the bank is located. It prohibits also the establishment by a national bank of a branch anywhere in any State which does not permit the State banks to establish branches. This provision would prevent the national banks from entering into unfair competition with the State banks. In those States which permit State banks to engage in branch banking this section authorizes the Comptroller of the Currency in his discretion, as a necessary measure of protection to the national banking system and the Federal reserve system, to permit national banks within the limits of the city in which the bank is located to establish branches. The same limitation as to numbers as is imposed with reference to population less than 100,000 by section 9 upon State member banks is also imposed by this section upon national banks.

I may say here that this permission for national banks to meet the competition of State banks engaged in branch banking in certain large cities is absolutely vital to the maintenance of the national banking system. It is an economic fact easily demonstrated by reference to recent banking history that the national banks in those cities where the State banks are engaged in branch banking will gradually die out for want of the power to meet their competitors on equal terms unless this provision of the bill is enacted into law. I need only point to cities like New Orleans and Rochester, each with only one national bank left; Cleveland and Detroit, with only three national banks left; and to San Francisco, Los Angeles, and Cincinnati, where the national banks are gradually diminishing in numbers and prestige.

In each of these cities a little over a decade ago the national banks were flourishing in numbers sufficient to maintain the strength and dignity of the national banking system. It is a well-known fact that in the great city of New York competition from the State branch banking institutions is so severe that many of the long-established national banks there are finding it impossible to function under the national laws.

The end of the national banking system would not be far distant if Congress continued to allow the hands of the national banks to be tied in those cities of the United States where under State laws the State banks are engaged in branch banking. The ultimate logical result would be that the stockholders of the Federal reserve banks in several districts would be predominantly, if not altogether, volunteer members of the Federal reserve system. Such a situation would be no less than a national calamity. It would destroy the only instrumentality through which the Federal Government can authoritatively supervise the credit machinery of the country. Compulsory membership in the Federal reserve system is necessary to its existence as a Federal instrumentality. The national banking system is, therefore, basic and the emergency condition which has now arisen in a number of large cities by reason of branch banking is necessary to be met in a spirit of justice and fairness to the national banks themselves and, what is of equal if not greater importance, to maintain the permanence of national coordination of credit instrumentalities.

It may be said that many of the national banks in New York and in certain other cities are already engaged in branch banking. This is true only where State laws have permitted branch banking. The national bank act for the past 60 years has authorized a State bank upon converting into a national bank to elect to retain its branches. Later on some of these converted State banks consolidated with other national banks, the branches being retained. Wherever national banks are operating branches within city limits we will find that these branches were originally established under State laws as branches of State banks and that these branches have been carried over into the national system under the provisions of section 5155 of the Revised Statutes of the United States. This form of branch banking has not met the need of the national banks for facilities to meet the competition of State banks in branch banking but has only served to continue this competition.

Under a ruling issued by ex-Comptroller of the Currency Crissinger, and supported by an opinion from the then Attorney General, national banks in cities where State banks were engaged in branch banking were permitted to establish what has been called "additional offices" or "tellers' windows" for the receipt of deposits and cashing checks. The theory of this ruling was based upon the doctrine that a national bank possessed the incidental power to perform this character of service because competition from State banks had created a condition which made it necessary. A limited number of these additional offices have been established, but their status is not legally certain in view of the implications in the decision of the Supreme Court in the St. Louis case, and they are otherwise not adequate to meet the situation. They were designed to meet what was regarded as a dangerous emergency in the national banking system. This bill will clear up the uncertainties which may be involved in this situation.

Now a few words in respect of the other provisions of the bill.

I shall not attempt to analyze in detail all of the sections of this bill, since many of them are obvious upon their face. I may say that the committee, first through a subcommittee, gave these sections the most careful consideration, and later the full committee considered each of them in detail. I may say also that the office of the Comptroller of the Currency has gone over the bill section by section, and both the comptroller and your chairman have held numerous conferences with bankers and their counsel from every section of the country and from every character of community. These sections of the bill were also submitted to the chief national-bank examiners in each Federal reserve district, who, in contact and consultation with the leading bankers in their districts, went over them in detail. Let me emphasize that these provisions have the approval of the Comptroller of the Currency, the Federal Reserve Board, the Federal Advisory Council, the Reserve City Bankers' Association, and the national-bank division of the American Bankers' Association.

Three or four of these sections are of great importance in themselves, and the others, taken in connection with the bill as a whole, will go a long way to restoring the equilibrium in the Federal reserve system between the National and the State banks.

CLARIFICATION OF SECTION 5200

Section 10 of the bill is a reenactment and clarification of section 5200 of the Revised Statutes, which imposes a general limitation of 10 per cent of the bank's capital and surplus upon loans to any one person. The general limitation of 10 per cent and the exceptions thereto as written in the bill remain practically the same as under existing law. The difficulty in the interpretation of section 5200 as it is now carried on the statute books is due largely to the complexity of its language, several amendments having been added from time to time to the original provision. It was considered advisable, therefore, to rewrite the whole section in precise legal terminology so that each exception to the 10 per cent limitation would stand as a complete statement capable of being interpreted with reference to any other part of the law. The language of the bill is still necessarily technical, because it is dealing with the intricate processes involved in financing commercial transactions. No section of this bill has had more careful consideration by your committee than has this section. It is the outgrowth of consultations with Government officials and with numerous bankers and their counsel from every part of the country. The language as it now stands will remove many difficulties confronting national-bank examiners and the bankers in the matter of determining the legality of loans.

REDISCOUNT BY FEDERAL RESERVE BANKS

Section 14 has a very important bearing on the rediscount of paper by the Federal reserve banks for member banks, both National and State. Under the existing law the only exception which a Federal reserve bank can make to this 10 per cent limitation is the rediscount of bills of exchange drawn against existing values. In other words, the only paper which a member bank can now present for rediscount in excess of the 10 per cent limitation is a bill of exchange. This section of the bill broadens the exception to include every class of paper exempted from the 10 per cent loan limit under section 5200. That is to say, if the paper is sufficiently sound and so secured as to permit a person to become liable to a national

bank thereon in excess of the 10 per cent limitation of the capital and surplus of the national bank, this bill provides that such paper will also be eligible for rediscount at the Federal reserve banks in excess of the 10 per cent of the capital and surplus of the bank for whom the rediscount is made. If, therefore, a State bank held paper in conformity with the exceptions enumerated in section 5200 of the Revised Statutes, such State bank might rediscount such paper at a Federal reserve bank.

The practical effect of this provision would be that the Federal reserve banks would be empowered to rediscount not only bills of exchange but also commercial paper in the form of notes and in the form of commodity paper secured by readily marketable nonperishable staples or by livestock or Government bonds. Section 14 would thus broaden the scope of eligible paper and would, therefore, have the effect of facilitating the marketing of agricultural and manufacturing products.

REAL-ESTATE LOANS

Section 18 is a reenactment of section 24 of the Federal reserve act under the provisions of which a national bank is permitted to make loans upon improved real estate. The only substantial change made from the existing law is the increase of the period for which a loan may be made upon improved city property from a period of one year to a period of five years. The demand for this change in the law has been made with great insistency and it meets with practically the unanimous approval of the national banks in the small towns and cities. The large city banks are not particularly interested in lending money upon city property, but in the case of the bank in the small communities the situation is different. First mortgages upon improved city property is the best security which the customers of the banks in the small communities can offer. The present time limit of one year is too short to meet the situation. Such real-estate loans are ordinarily made by State banks for periods from three to five years. A five-year mortgage note upon improved city property is more liquid and has a greater marketability than a one-year mortgage note.

Next to branch banking the competition which these smaller national banks feel most from the State banks is in this matter of real-estate loans. If a national bank can not accommodate its customer by lending him money upon the security of his city property for a period longer than one year, such a customer naturally goes across the street to one of the State banks or trust companies where he obtains a loan upon the security of his real estate for the period he desires. The commercial account of such a customer in many cases will gravitate toward the bank which makes him such a loan. In this manner State banks and trust companies in the smaller cities and towns have been able to make steady inroads upon the business of the national banks to such an extent as seriously to impair their progress. This section as redrafted will have the effect of lifting to a considerable extent this handicap upon the smaller national banks.

INDETERMINATE CHARTER

Section 2 changes the term of the succession of national banks from 99 years, which is the present law, to an indeterminate succession. It provides that a national bank shall continue in operation until its shareholders see fit to dissolve it; or until by reason of violation of law its franchise shall become forfeited; or until its affairs are placed in the hands of a receiver; or until Congress shall by a general or special act terminate its existence. This extension of the succession is, therefore, in no sense a perpetual charter. The life of the corporation is subject to dissolution at the will of the shareholders; at the will of the comptroller if the banking laws are violated, or if the bank becomes insolvent; and at any time by an act of Congress directed either toward a particular national bank or by general legislation affecting all national banks. In other words, Congress could at any time after the passage of this bill restore the succession to the 99-year term or to a lesser term. Personally, while I have no objection to this reservation in behalf of Congress being put in the bill, I am of the opinion that it is entirely unnecessary. This was unquestionably the feeling in this House last Congress as it passed unanimously this committee's so-called perpetual charter bill. The charter powers of a national bank are the national bank act and amendments thereto made from time to time by Congress. Congress is free at all times to amend the national banking laws or to repeal them entirely. It may abolish the national banking system by the repeal of the national bank act. When Congress compelled the national banks to become members of the Federal reserve system a very serious change was made in the charter powers of the national banks.

This provision of the bill does not involve a radical departure in banking practice. The State banks and trust companies in the great financial centers of the country have for years been operating under indeterminate charters. The report of the Comptroller of the Currency for 1921 shows this to be the situation in the following 21 States: Arkansas, Connecticut, Florida, Illinois, Kentucky, Maine, Massachusetts, Minnesota, Nebraska, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oregon, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, and West Virginia. These States include the important cities of New York, Buffalo, Boston, Chicago, St. Paul, Minneapolis, Cleveland, Cincinnati, and a number of lesser financial centers.

A few years ago Congress conferred upon national banks the right to exercise trust powers, and the trust business of national banks has developed with great rapidity since that grant. A charter limited to a term of years is, however, a considerable handicap to a bank exercising trust powers. Some legal doubt has been expressed as to its authority to administer a perpetual trust such as is often made for the purpose of establishing foundations for scientific, educational, and charitable purposes. If the national banks are to act as trustees, they should not be discriminated against by law, so as to embarrass them in handling these foundation funds for schools, hospitals, scientific societies, libraries, art galleries, museums, churches, and the like.

In the matter of long-term trusts, not perpetual, it is certainly a considerable handicap to a national bank to lose the administration of such a trust, for the reason that the trust ran for a longer term than the charter powers of the bank. As a matter of fact, a customer desiring to make a long-term trust will naturally select a State bank or trust company with an indeterminate charter. The national banks are losing trust business of this character.

It is recognized that the trust business has become a part of a well-rounded banking service. The administration of trusts is very profitable business for a bank. The trust companies operating under State laws are not only doing a regular commercial banking business but the trust business serves to increase the commercial business of the bank, and vice versa. The conduct of a large trust business by the State banks and trust companies has certainly not proven a detriment to the efficiency or to the soundness of their commercial business. There may have been a time in the history of banking in the United States when a banking service could be rendered by purely commercial banks. That day has passed. The development in the large cities is toward great banking houses doing all forms of banking under a single charter. We will never go back to the time when the receipt of savings deposits, the exercise of trust powers, and the conduct of a commercial banking business were totally divorced and conducted as separate institutions. Congress has already recognized this fact by enlarging the charter powers of the national banks to permit them to do both a savings and a trust business. This section is designed simply to permit them to do this trust business without embarrassment.

MISCELLANEOUS PROVISIONS

I shall not attempt to discuss in detail the remaining sections of the bill but will merely give a brief outline.

Section 1 permits the direct consolidation of a State with a national bank. The purpose is to eliminate the cumbersome step of first requiring a State bank to convert into a national bank before such a consolidation may take place.

Section 4 permits the organization of national banks in outlying sections of a city with a capital of not less than $100,000.

Section 6 legalizes the position of chairman of the board of directors.

Section 12 eliminates the criminal penalty for certifying a check before the deposit has been regularly entered upon the books of the bank. The penalty remains for certifying a check if funds are not in the bank at the time of certification.

Section 13 permits the board of directors of a national bank to designate an assistant cashier or vice president to sign reports to the comptroller in the absence of the president and cashier. This situation sometimes arises in case of sickness or other unavoidable absence.

Section 15 permits national banks to own stock in a safe deposit company located in or adjacent to the bank, and section 5 permits national banks to pay dividends in stock. Stock dividends are now permitted national banks under a ruling of the office of the comptroller.

Section 16 and section 17 provide certain criminal penalties for the protection of both national and State member banks of the Federal reserve system.

I am absolutely convinced that the enactment of this bill into law will put a stop to the desire of national banks to leave the national system in favor of operating under State laws. This bill is conservative and safe. It makes no concessions to unsound principles of banking. Through the cumulative effect of all of its provisions it will give new life to the national banking system and unquestionable permanence to the Federal reserve system.

DUTY OF AMERICAN CITIZENS

Mr. BIXLER. Mr. Speaker, I have listened here day after day to many splendid oratorical discourses, some commending, others assailing, this administration and the "do nothing" Congress, and I rise in self-defense. Since taking my seat I have worked quietly but enthusiastically, energetically, and untiringly in an effort to do my duty as a representative of a part of this great Nation. Much of this work is done in committee in order to get first-hand and detailed information on various subjects. To be brief, if nothing else were accomplished, the small reduction of 25 per cent for 1923 taxes is one item. As everyone knows, as a war necessity taxes higher than ever dreamed of had been placed upon our people, a tax burden so heavy that it was strangling industry and suppressing initiative and enterprise. Coincident with the Republican policy of economy came tax reduction. Under the Harding administration a revenue law was passed making substantial reduction in the high Federal taxes. Due to increased business and industry and to the economies of the administration, a very substantial surplus was created in the Federal Treasury.

This enabled our honorable Secretary of the Treasury, Andrew W. Mellon, to prepare and offer for consideration a systematic and workable plan of tax reduction, which met the approval of all citizens, and so a new revenue measure coming out of this plan has been enacted by a Republican Congress and approved by President Coolidge, who promises broader reductions and reforms in the next session of Congress. This new law relieves those of small incomes of all income taxes, those with an income of less than $10,000 per year secure about a 50 per cent reduction, and those up to $22,000 receive practically a 50 per cent reduction. Those whose income exceeds the latter amount will get a reduction less in percentage but nevertheless a substantial reduction. Practically all the excise taxes have been repealed. The national debt has been reduced in a greater sum under the Republican administration since the close of the war than our debt was reduced for the entire period from the close of the Civil War to the time of our participation in the World War.

Under the wise leadership of the late President Harding a sane program was outlined and followed. His successor, our Chief Executive, Calvin Coolidge, admirably fitted and qualified for the task thrust upon him, took up the work. He has carried on, and under his sane and statesmanlike leadership, his pronounced policy of economy, the Republican Party will continue to "Keep cool with Coolidge" and thereby continue the work so well begun. Economy: Keeping expenditures within our revenues. Result: A sound Treasury, and with it faith and confidence in our Government. Speaking of the Treasury, which contains the people's money, it should be guarded and the doors should not be left ajar for every call made upon it. There should be a reserve for a rainy day. Many times after bills are passed in good faith and after the President consults with his advisers and the Secretary of the Treasury and the Treasurer of these United States, and it is found impracticable to pay out such vast sums as are sometimes involved, and the President, in his good judgment, believes it would be a drain on the Treasury to such extent that he vetoes such measure, it is my opinion he should be sustained by his Congress.

American citizens are responsible for the character of their government—whether it be Federal, State, or local. Our public officials are nominated and elected by the people. It should be kept in mind that the work of getting good public officials is not all done on election day. It begins in the party primaries and conventions. This preliminary work for the coming presidential election is now well under way. In many States the dates of primaries and conventions for selection of candidates are past, in others they are scheduled. It is the duty of every good citizen who wishes good government to belong to a party and to participate in his party elections. It is his duty to see that the candidates nominated are party men who represent the party principles and who are pledged to support its policies and cooperate with its organization. Only in this manner can we have responsible party government, which is the most successful form of representative government yet devised. During the last few years there has been a great deal of propaganda decrying party activity. There has been an attempt to make virtue of so-called nonpartisanship. Instead of nonpartisanship being a virtue, it is a menace. It tends to break down representative government. The need of the hour is not for less partisan activity but for more of it.

The underlying cause of most political evils of to-day is the indifference of our citizens to their right of suffrage. Even the briefest study of nomination and election figures shows that the majority of the legal voters are taking no part in either their party primaries or the general elections. Less than half the citizens of the United States voted in the presidential election of 1920. The percentage taking part in the congressional elections of 1922 was even less. Such conditions make possible a government by the minority.

Representative government is not automatic. It is not self-supporting. It draws not only its authority from the people, but it draws its strength and vitality from them. Unless they participate in public affairs in an active and intelligent manner their government must of necessity cease to be representative.

I implore both men and women to take active interest in public affairs; to study and read and to glean the good from the bad, the truth from the scandal and hearsay; and to go to the polls well equipped to cast their vote on the right side. This is the duty and privilege of every American citizen.

We must educate our children and ourselves to know the laws, both written and unwritten, and to obey them, and not because others break the law be inclined to believe the world is all wrong and there is not need in making or obeying the law.

The Republican Party has always stood for protective tariff, and the result has always been prosperity. Here you have an important difference between Republican and Democratic fiscal policies and results. The Democrats always get less revenue from their legislation than they expect; the Republicans get more. The Democrats get less because their laws discourage business; the Republicans get more because their legislation encourages business. Which do you want?

Among other accomplishments of the Republican Congress, the much-needed immigration law with protection to our native and adopted sons is another move in the right direction.

Although it has not yet received its full measure of prosperity, agriculture has gone forward a long distance from the depression of 1921, and conditions justify the belief that this improvement will continue. I would suggest that a commission be appointed of men well versed in this line to make a complete investigation of agriculture and to determine the best method of relief. Agricultural relief can not be temporary, as prices are fixed by supply and demand. Action is promised in the December session.

Business is optimistic and preparing for a record-breaking year. Government securities are selling at par and better, while interest rates are normal, encouraging legitimate industrial and business expansion. Let us keep looking upward, with our eyes on the stars and our feet on the ground.

FEDERAL RESERVE BANKS

Mr. FULMER. Mr. Speaker and gentlemen of the House, during the last Congress a joint congressional committee was appointed with Mr. MCFADDEN, of Pennsylvania, as its chairman, to hold sessions between the Sixty-seventh and Sixty-eighth Congresses for the specific purpose of ascertaining what could be done to bring about a better feeling on the part of member banks toward the Federal reserve banks and to induce nonmember banks to join the Federal reserve system. Although this committee was to report to the Sixty-eighth Congress six months ago, up to this time we have not yet had this report. I have asked for it repeatedly and have in each instance been informed that it had not yet been printed.

Now, Mr. Speaker, the refusal of this commission to make this report so that some intelligent information could be had in connection with the reason for the passage of this McFadden bill should be, I am sure, a very just reason on the part of the House not to pass this bill at this session of the Congress, in order that Members may have a chance to know the real situation.

I have received around 2,000 letters from national banks from every State in the Union in the interest of my bill, H. R. 3206. Although these letters recite their grievances and suggest what should be done to relieve the situation, not one of them mentions branch banking.

I wish to warn State banks and independent National banks that if they sit idly by now and permit the passage of the McFadden bill during this Congress or the next they will very soon have the displeasure of seeing branch banking all over this country, and that their days of usefulness to agriculture, to individuals, and to small business communities will come to

an end. I also wish to take this opportunity to warn Members here who are interested in equal rights to all and special privileges to none, and those of you who do not want to see the small, independent banks pushed out or forced to sell to these money barons who seem hell bent on controlling the financial system of this country, you had better go slow in lending your aid toward the passage of this bill. No doubt many of you have received letters from your banks at home telling you how they are being sidetracked, penalized, and left by the roadside, helpless because of the burdensome regulations and manner of administration of the Federal reserve system; yet none of them have said we want a bill passed to allow branch banking either in the large cities or anywhere else.

You should read my speech on the Federal reserve system in the CONGRESSIONAL RECORD of June 5, and you will find why national banks are leaving the system—not for branch banking, as some folks would have you believe. I have received fifty-odd letters from national banks or bankers from the State of California relating their trials and tribulations as members of the system, but not one of them states that they want branch banking.

I have 100 letters from Mr. MCFADDEN's State, Pennsylvania, also backing my statements as related in my speech of June 5, but not one of them mentions branch banking. I wish that I could be allowed to print in the RECORD these 2,000 letters from every State in the Union so that Members of Congress might be enlightened on this subject. I hope that you will get in touch with your banker while at home this summer and acquaint yourself with the facts straight from your banker. They tell you about indorsements from bankers' conventions. Who is it that runs these conventions and puts through these indorsements? If you have had anything to do with politics, political conventions, or any other kind of conventions, you know that just a few schemers usually run things. While you are at home this summer drop in and talk these matters over with your bankers and come back next December and let us put through some legislation that will dig down to the root of the matter regardless of what those who represent special interests will have to say about it.

I am going to take the liberty to insert in the RECORD just three letters from Representative MCFADDEN's State that you might be able to know how his bankers feel on the subject discussed by me on the 5th of June.

Now, let us see who appeared before the Banking and Currency Committee asking for the establishment of branch banking because of the necessity to compete with certain State banks now engaged in branch banking. First, Mr. E. H. Cruse, assistant legislative representative, Brotherhood of Locomotive Engineers, Washington, D. C. If you will read his one-page testimony in the hearings, you will readily see that the reason he gives for branch banking plainly shows what he knows about any kind of banking. Next, Arthur J. Lovel, president of the same organization. I want you to read his one-half page statement on page 48 of the hearings and see what he knows about banking and why he is making an appeal for the passage of the McFadden bill. Listen to this statement of his:

I just want to second what Mr. Cruse has said. Our brotherhood has no bank, but we have between twelve and thirteen millions of dollars on deposit with these banks throughout the various States, and we do not see any good reason why there should be any difference between the privileges of the State banks and the National banks. We do not know why there should be flesh of one and fowl of the other.

Why should these two men who live here in Washington and represent certain unions and who say, "We have no banks, but we can't see why," and so forth, be listed? Because when Mr. MCFADDEN appears before you he will be in a position to tell you that those representing labor unions appeared and indorsed the measure.

Next comes Mr. Edward Elliott, vice president Security Trust & Savings Bank, Los Angeles, Calif., who states:

We have 33 branch banks with capital and surplus and undivided profits amounting to $14,000,000 and deposits of $185,000,000. You may go to it with wide-open branch banking, provided you allow us to continue to remain members of the Federal reserve system so that we may enjoy all of the privileges now enjoyed by national banks.

I want you to rend in his testimony a letter from the Federal Reserve Bank of San Francisco, Calif., signed by the chairman of its board, in which it is stated that it will be satisfactory to remain in the system and establish branch banks, provided they do not impair the general strength and safety of the institution. I fail to find anywhere in the Federal reserve act any power granted to the system to encourage branch banking by taking on State banks with branches and saying to them, "You can continue to reach out, buy up, or force out independent banks and come right on in the system, for it will take care of you." Now, to cure this ill it is proposed to extend branch banking to national banks. You will be told that this will apply only to cities of certain population and States where the State laws permit branch banking, and so forth. You know what this means.

If you are going to allow it in cities of 25,000 inhabitants, then in cities of 5,000 or 10,000, why not the State as a whole? Next, we have before the committee Mr. John S. Drum, president Mercantile Trust Co., San Francisco, Calif., who states that 88 State banks in California have 480 branches. He also states that his bank has 46 branches, whose capital, surplus, and undivided profits aggregate $12,500,000 and whose deposits amount to $128,000,000. He still further states that he and Mr. Elliott represent the four largest banks in California, namely, Bank of Italy, with 75 branches; Mercantile Trust Co., with 46 branches; Pacific Southwest, with 75 branches; Security Trust & Savings Bank, with 28 branches. The combined capital of these four banks amounts to $1,000,000,000. Just think of two men representing four banks controlling 264 branches in 264 communities removed from the four mother banks! Yet these communities are under the control of these two men, or perhaps four men, at the mother banks that are far removed from the personal touch of the people comprising them. With the backing of a billion dollars, these two or four men can by a stroke of the pen either take care of any of these communities or special interests represented there or destroy them. This is not right, and you should demand more time on this McFadden bill, so that you may acquaint yourself with the facts and do the right thing in this kind of legislation. Mr. Drum states:

We have about 45 to 47 per cent of the entire deposits of all the banks in California.

Thus the whole scheme, when finally worked out, will place the United States in line with England. In 1842 she had 429 banks; in 1922 only 20 banks. Of these 20 banks, 5 controlled practically all of the banking of the nation. About 7,900 branches are in operation. There are only about 9 banks with 1,400 branches in Scotland. Ireland has about 9 banks with 800 branches. In 1885 there were 41 independent banks in Canada; in 1905 only 35; while to-day 14 banks with 5,000 branches are operating there. In other words, Montreal and Toronto control the finances of Canada. You will find these statements in the Bulletin of American Institute of Banking for July, 1923. Mr. Dawes, Comptroller of the Currency, recognizes that branch banking will ruin the country, yet, I suppose, in carrying out a policy settled upon by some of the members of the Federal reserve system, he joins with them in recommending the passage of the McFadden bill. Listen to Mr. Dawes's statements:

In branch banking character loans are impossible. By character loans is meant loans to people whose collateral is perhaps faulty from a technical standpoint but who are entitled to credit on account of their constructive influence in the community and intiative, enterprise, and character. This applies with particular force to the young, aggressive type of man, who has built up the western and pioneering sections of the country. Jim Hill, for example, at the beginning of his career did not have the kind of collateral which would pass the scrutiny of a branch banker. The development of America is dependent on nothing more than on the independent unit bankers of vision, courage, and independence, whose first interest in the creditor is his character.

The coercive power of a branch banker bent on expansion is very great. He is able to temporarily reduce interest rates until he gets banking control, and the cost of this can easily be reimbursed after he has secured a monopoly. The branch banker can secure the services of the employees of the unit banks by higher salaries. They can have the patrons of their own institutions influence and compel their customers and people who depend upon them for business accommodations to transfer their accounts from unit banks into the branch banks.

The third point, which is frequently of very great importance, is the ability to take care of emergency situations. When an acute emergency arises in a community it is impossible to get prompt and effective assistance where the local representative is compelled to refer back to the head office in another city. Even if the control of the institution were disposed to go to extreme lengths to relieve an emergency, by the time the necessary red tape was unrolled the assistance would be too late.

Mr. Platt, a member of the Federal Reserve Board, originally from New York, let the cat out of the bag when he made the following statement before the committee. Quoting Mr. Platt:

I think I may fairly say that the members of the Federal Reserve Board regret that this liberalizing feature of the bill does not go to the full limit of permitting the establishment of branches in all cities

large enough to have need for outlying banking facilities as a matter of right and without regard to the limitations of State laws. It would seem that the national banks might sometimes be permitted to take the lead in a matter of branch banking, which every competent banker and every economist approves.

Now, gentlemen, what more do you want than this statement coming from the Federal Reserve Board to satisfy your minds as to who wants branch banking and for what purpose. I want to say to Mr. Platt, who seems to represent the feelings of New York in this branch-banking liberalization, that under the original Federal reserve act we had very little kick coming from member banks—national banks—and to-day they are not, as he would have the Banking and Currency Committee believe, wanting liberalization by allowing branch banking, and neither will that keep them from continuing to give up their national charters and go into the State system. Mr. Platt stated that since 1918, 173 national banks have gone into the State system. They did not leave the national system to engage in branch banking, but did so because they have been paralyzed by the regulations and the administration of the Federal Reserve Board.

Listen to this statement of the Comptroller of the Currency, Mr. Dawes, and see if he does not back up my statement to the limit when he states in his 1923 report, pages 17 and 18. I now quote Mr. Dawes:

The national banks of the United States have a record of service and accomplishment without a parallel in the history of finance. No group of institutions operating under a single law has ever marshaled the resources and mobilized the wealth that they have done. In this achievement the operations of all of the component banks have been made to conform as closely as is humanly possible to a single standard. This has been accomplished without developing the rigidity of practice which would interfere with the independent action necessary to meet the requirements of communities which vary in our country all the way from the fully crystallized and finished state of older settlements to the new pioneering and developing sections. It is not possible that an organization with such a proud record of accomplishment should overnight complacently surrender its independence or could without a wrench adjust itself to either a subordinate or coordinate relationship with any new system, however well conceived and wisely administered the new instrumentality might be.

The Federal reserve system, on the other hand, is a new conception, controlled by men of imagination and independence and possessing the virile and aggressive characteristics of youth. The national banking system, which has behind it the traditions of 60 years of successful operation, is required to compromise and conform its policies and operations to those of this new organization. It is a situation which must contain the elements of conflict, and the ultimate adjustments can only be made by experimentation, mutual understanding, and a devotion to a common cause.

The Comptroller of the Currency knows what he is talking about. What stronger statement could have been made that would back up my contentions?

Did you get that statement? The system is controlled by men of imagination and independence. Yet these men have the power of the President of the United States when it comes to the management of the finance of America.

A further statement from Mr. Dawes in the hearings on page 27. In answering questions of Mr. GOLDSBOROUGH, he says:

I do not think any bank can operate a branch bank on an extensive scale to be a real menace and do it outside of the Federal reserve system.

Now, gentlemen, this statement from the comptroller is the milk in the coconut. Listen to this question of Mr. GOLDSBOROUGH:

Would not it be better to restrict the opportunities of the State banks who do branch banking than to increase the opportunity of the national banks to do it?

Now, I contend that this is the sensible thing to do and can be done.

They call this McFadden bill an antibranch banking bill, and this statement has gone out to banks of the country and to banking associations. A great many banks, as well as banking associations, have indorsed the bill, believing that it means the stopping of branch banking. This bill, or section 9 thereof, is purely a proviso to enable national banks to engage in branch banking, and if enacted into law will soon be amended so as to extend the privilege to every nook and corner in this country.

They had a convention some time ago at Boston, Mass., and to show you how these conventions are worked we will take a little time here to relate what happened. A select committee was selected to go down to Washington and wait upon Mr. MCFADDEN'S committee that held hearings last summer, and these are the folks who are interested in country banks and who usually tell the Federal reserve system, as well as Mr. MCFADDEN'S committee, where to get off. The following gentlemen composed the committee:

The Hon. Henry Cushman, Bangor, Me., representing the First National Bank with resources of $7,300,000; Arthur M. Heard, Manchester, N. H., president of a bank with resources of $5,018,000; C. L. Stickney, Brattleboro, Vt., representing resources of $5,400,000; I. W. Cook, New Bedford, Mass., president of a bank with resources of $12,222,000; F. A. Onthank, Fitchburg, Mass., representing a bank with resources of $5,705,000; Thos. A. West, jr., Providence, R. I., coming from a city with seven banks whose resources range from four to sixteen millions; and, lastly, H. T. Holt, Hartford, Conn., representing three banks whose resources amount to eleven, seventeen, and twenty-two millions, respectively.

The reports of the meeting further show that this commission, which, I am sure, is deeply interested in the Northwest, where banks have been going broke almost daily for the last year, made a request as follows—quoting their own statement:

We desire the distinguished Boston banker, Mr. Alford M. Aiken, be added to us as a temporary member to pilot us through the "mazes" of the meeting at Washington.

May the Lord bless and save us.

Who is this distinguished banker from Boston? He is president of the Shawmut National Bank of Boston, with resources of $166,125,000.

Following up this special bankers' convention, a convention was called at the Boston Federal Reserve Bank to be attended by member banks of the Boston district. At this convention the opening address was made by W. P. G. Harding, who also acted as chairman of the convention. Mr. Harding stated in the convention, as shown by the record:

Your committee—

Referring to the above seven bankers—

has done excellent work and evidently has made an impression on the joint congressional committee—

McFadden investigating committee—

and you will be asked to back up your committee, uphold its hands, and adopt the same resolutions that were presented by it to the joint committee of Congress. You may not get what you want, but there is no use in adopting a compromise to start with. Compromise when you have to, but don't compromise in the beginning.

Mr. Harding further stated:

The movement which you gentlemen have started here in the first Federal reserve district (Boston) is being followed with the greatest interest not only by the Federal Reserve Board but by the officials of the other Federal reserve banks. In fact, there are present here to-day representatives of the Federal Reserve Board and of several other reserve banks and therefore it would appear there is strong probability that if the organization in this district proves to be a success, as I feel it will, the stockholders of the reserve banks in other districts will follow the lead that you have set.

Under the leadership of this same W. P. G. Harding, who is still scheming, the system in 1921 extracted from the pockets of member banks the huge net earnings, after all expenses were charged off, of $82,000,000. This very large net increase in profits was brought about because of high rediscount rates put into effect in carrying out that most ruinous deflation policy that was planned and originated behind closed doors on the 18th day of May, 1920, which will go down in history and if not in history in the minds of thousands and thousands of innocent victims as the most outrageous, uncalled for policy that has ever been put on our people. Thousands of banks went down under it, lots of others are so maimed that they will never be able to work out, and others will take five years to be able to charge off bad debts that they got caught with.

After the war the press, the Government agents, and folks generally, called upon everybody to do their bit. The world was naked and hungry. We needed large crops and large supplies of manufactured goods and everybody set about to carry out this program. Country banks with $25,000 capital rediscounted with the system from $50,000 to $100,000. Many of them made as many as three or four loans to individual farmers to buy fertilizers, pay labor, and to carry on their extensive farm work prior to the putting on of this deflation policy.

In the year 1920 the millstones began to grind. It is useless for me to paint the next picture for you know all about it and have felt it too, no doubt.

We are told that the first proof of a murder is the corpse and here are the corpses of murdered values just as they were

struck down by the Federal reserve bludgeon. Let us look them over.

| | Corn, Chicago | New Orleans, middling cotton | No. 2 wheat, Chicago | Ohio wool |
|---|---|---|---|---|
| 1920 | | | | |
| January | $1.47 | $0.40 | $2.63 | $1.23 |
| May | 1.98 | .40 | 2.97 | 1.16 |
| June | 1.83 | .40 | 2.89 | 1.00 |
| July | 1.53 | .39 | 2.80 | .90 |
| August | 1.53 | .33 | 2.47 | .87 |
| September | 1.29 | .27 | 2.40 | .83 |
| October | .87 | .20 | 2.20 | .72 |
| November | .80 | .17 | 2.05 | .69 |
| December | .73 | .14 | 2.01 | .54 |
| 1921 | | | | |
| January | .65 | .14 | 1.96 | .54 |
| February | .63 | .13 | 1.91 | .54 |
| March | .61 | .11 | 1.67 | .52 |
| April | .55 | .11 | 1.38 | .52 |
| May | .60 | .11 | 1.56 | .50 |
| June | .60 | .11 | 1.43 | .49 |
| July | .60 | .11 | 1.22 | .49 |
| August | .55 | .12 | 1.23 | .49 |

Here we have a drop in corn from January, 1920, to August, 1921, of 92 cents per bushel, and on the same dates a drop in cotton of 28 cents per pound and a drop in wheat of $1.40 per bushel. Just think of the millions that were made by those who were on the inside by selling short, knowing that such a policy was being put on. Let us look at some other figures sliding the wrong way for the cattleman.

*Steers at Chicago, 1920*

| | |
|---|---|
| January | $15.93 |
| June | 15.03 |
| October | 14.68 |
| December | 12.09 |

*Steers at Chicago, 1921*

| | |
|---|---|
| January | $9.84 |
| June | 8.09 |
| August | 8.77 |

But, did they restrict credits? The total loans and discounts including bought paper in all of the 12 reserve districts stood as follows:

*1920*

| | |
|---|---|
| October | $3,099,672,000 |
| November | 2,983,103,000 |
| December | 2,974,836,000 |

*1921*

| | |
|---|---|
| January | $2,622,174,000 |
| February | 2,500,013,000 |
| March | 2,356,160,000 |
| April | 2,180,178,000 |
| May | 1,995,051,000 |
| June | 1,782,951,000 |
| July | 1,661,036,000 |
| August | 1,527,255,000 |

In 1921 there were 19,625 business failures as compared with 6,541 in 1919, or an increase of 13,174—more than three for one. The liabilities of these failures aggregated $627,401,000, an increase over 1919 of $514,000,000—more than five to one. In the so-called panic year of 1907, the high tide of business failures, liabilities amounted to only $197,000,000.

In the first six months of 1921 there were 4,527 suicides, against 1,810 for the same period of 1920. Here is what this tragedy of drastic deflation did to the farmer as measured for the years 1919, 1920, and 1921:

| | |
|---|---|
| 1919—Value of farm products | $13,500,000,000 |
| 1920—Value of farm products | 9,000,000,000 |
| 1921—Value of farm products | 5,675,000,000 |

Now, let us see what this Federal reserve deflation policy did for the banker. In 1921 there were 404 bank failures, involving liabilities of $173,027,776. In 1922 the failures numbered 227, with liabilities of $77,735,551. During the 12 months of 1923 there were 504 failures, representing liabilities of $196,790,000. The reports show that in the last calendar year there were failures of 77 national banks, member banks of the Federal reserve system. More national banks failed in this country during 1923 than did from 1914 up to the time of the putting on of the deflation policy.

While this destruction has been arrested somewhat in some sections of the country by tariff legislation, the South, West, and Northwest still have banks breaking almost every day, and farmers in such dire distress until even the President of the United States has gone out begging for them. I merely mention these facts to show you what a few men having control of the great financial system of this country can do.

We have more than 9,000 country member banks of the system, besides twice as many banks outside of the system; and I am sure that when they have had a chance to speak on the matter and when the facts have been put squarely up to them, they will take advantage of the opportunity this summer of putting you wise so that you will be prepared to head off the propaganda that you will be flooded with next December, and you will thereby pass some legislation in the interest of the great masses of banks instead of a special interest, which proposes to run the financial system of this country as well as Congress.

FIRST NATIONAL BANK,
*Ulster, Pa., January 25, 1924.*

Hon. H. P. FULMER, M. C.,
*Washington, D. C.*

DEAR SIR: Yours of the 12th is received. Our people are heartily in favor of your bill, H. R. 3206. Practically all the shareholders of this bank are farmers, and they can not see why 80 people here should furnish the Government funds at no rate of interest while it is paying other people in our midst 4½ per cent.

You may count on our support. Of course, our Mr. MCFADDEN, of this district, is already for the bill.

Yours truly,

R. B. ALLEN, *Cashier.*

---

THE CURWENSVILLE NATIONAL BANK,
*Curwensville, Pa., January 25, 1924.*

Hon. H. P. FULMER,
*House Office Building, Washington, D. C.*

DEAR SIR: We have yours of the 12th advising us of the proposed amendment to the Federal reserve act.

We are mighty glad that somebody has had the courage to make this kind of a proposition.

The present law as it stands is decidedly unfair to the member banks. The member banks are furnishing the capital for the reserve banks to play with, and the fact that we are not getting any small rate of interest on daily balances, and the further fact of their system of acting as clearing house for all checks, is depriving the member banks of a considerable income.

Our contribution or penalty, or whatever it may be called, for being a member of the reserve system is costing us about $200 a month. The only comfort we get out of it is to regard it as cyclone insurance.

My recollection is that in a recent year the 12 reserve banks showed a profit of about $60,000,000. The dividends to the member banks came to about $6,000,000, the difference, under the law, going into the United States Treasury, after the member banks had been liberal to themselves in salaries and expenses. The salary of the governor of the Philadelphia bank some time ago was $30,000 a year; it may be more at this time. That would be equal to about the salaries of 10 ordinary bank presidents and beats playing Congressman about 3 to 1. We have never felt as warm toward the system because of the facts related above, but would feel more enthusiastic if we, with the others, were not being made the goat.

Wishing you all success in your efforts to have this bill passed, we are,

Respectfully yours,

ANTHONY HILE, *Cashier.*

---

THE DUBOIS NATIONAL BANK,
*DuBois, Pa., January 25, 1924.*

Hon. H. P. FULMER,
*Member of Congress, Washington, D. C.*

DEAR SIR: Referring to your House bill 3206, we agree with you that interest should be paid on our reserve account with the Federal reserve bank, or reduced reserve requirements.

The capital of the DuBois National Bank is $100,000, and we are required to maintain a reserve balance in excess of $90,000, without interest. In addition our cash in bank of $50,000 or $60,000 is not considered as part of our reserve. Does this look like justice?

The total earnings of the Federal reserve banks from January 1, 1914, to January 1, 1924, exceeds $425,000,000. The Federal reserve banks, with a capital of $110,000,000, have paid a franchise tax of $130,000,000 to the Government. Our capital in the Federal Reserve Bank of Philadelphia has averaged over $9,000, and we have paid indirectly a franchise tax in excess of $11,000 to the Government. This is in addition to all the corporation taxes, State and national, which we pay as corporations. Does this look like justice?

From about 29,000 banks in the country eligible for membership in the Federal reserve system there are only a little over 9,000 banks which are identified with the Federal reserve as members.

We think the country needs the Federal reserve system, but the minority of banks should not be compelled to carry the entire financial burden of the country.

The Federal reserve system now indicates that it is a reserve city bankers' bank, in which the big banks in the city benefit by the credit they can obtain across the street from the Federal reserve, and loan it to the country banks. The city banks therefore retain the country banks' deposits. As one writer has said on the subject, "The country bank obtains bootleg credit."

I hope to see that this session of Congress will give some relief to the members of the Federal reserve system. I have already taken this matter up with our Congressman, Mr. SWOOPE.

Appreciating your interest, very truly yours,

W. G. BROWN, *Cashier.*

THE ANTILYNCHING BILL

Mr. TILLMAN. Mr. Speaker, in the RECORD of two days ago the author of the antilynching bill, H. R. No. 1, deplored the fact that his favorite measure had no chance of passage during this session. That is as it should be, and yet the black shadow of this vicious proposition still hovers over the Congress and the country. It is time for plain talk about this most unjust and mischievous bill. Taxes are now too heavy to be borne with any degree of patience, and yet this bill seeks to impose upon communities guilty of no wrong heavy penalties for the act or acts of people living in another county, State, or jurisdiction.

This antilynching bill is being used to keep within the Republican ranks the black voters of the Northern States. It will never pass. If it should pass, it will be declared unconstitutional; and therefore the negro vote is being herded in line by Republican false pretense, as usual. The South condemns the lynching evil, although the baleful shadow of the dusky rape fiend hangs over every southern home like the blight of death. The knee-crooking politician in quest of the colored vote views with silent unconcern the cause of many lynchings. They do not seem to realize that in this land of Christ in countless communities, no mother is safe for an hour unless guarded by watchful husband or son. Let us put an end to horrible mob murder; there is no excuse for it; but a measure like the antilynching bill now pending is infamous, and there is no constitutional warrant for its enactment.

FARM LEGISLATION

Mr. ASWELL. Mr. Speaker, under general leave to print on farm legislation, I submit the following telegram from Mr. B. F. Yoakum to the President of the United States:

JUNE 5, 1924.

The PRESIDENT,

*Washington, D. C.:*

Newspaper reports state that you have declined to approve a last-minute farm bill which contemplated establishment of a farm-product marketing scheme under the War Finance Board. Those engaged in and suffering from destructive conditions of agriculture will indorse your stand in refusing to be a party to small, insignificant scheme designed for political effect which would not in any way benefit farmers but tend to lower the standard of the biggest and by far the most important economic problem affecting the Nation's welfare. There is no political paternalistic plan that will overcome self-evident fact that 34,000,000 farm population can not recover their tremendous loss and extricate themselves from bankruptcy so long as existing system of marketing compels them to support 19,000,000 food-dealer population and pay toll through six different channels, each exacting their profits and commissions between farmer and his final customer. After exhausting all unsound and temporary theories you will reach the conclusion that the only plan that will overcome the fundamental difficulties destroying farm industry can be accomplished through national cooperative farm marketing organization, controlled and managed by farmers in same manner that every other business of the country is operated by those who own their plants and raw materials. There is no use for Members of Congress being deceived by designing interest or Government department heads. Agriculture can not restore itself to profitable basis until those who grow and own the products control the sale of them.

B. F. YOAKUM.

SALARIES OF POSTAL EMPLOYEES

Mr. O'CONNOR of New York. Mr. Speaker, early in this session of Congress, when hearings were being held before the Committees on Post Offices and Post Roads of the Senate and the House of Representatives, I prepared and caused to be issued to the press a statement signed by the entire Democratic delegation in the House of Representatives from the State of New York, as follows:

We believe the importance and necessity of adequate postal service is so great that unless the salaries paid to the employees in that service are increased to meet the present cost of living the service must necessarily suffer by losing many of its trained employees and failing to attract the proper types of men and women willing to enter the Government service.

They are among the most efficient and hardest working of our Government employees, and at the same time among the poorest paid.

In 1920 the salaries of clerks and carriers, for instance, were fixed at from $1,400 to $1,800 a year. At that time it was represented to these employees that the cost of living would gradually recede in the following years. Everybody knows this prediction has not come true. To meet the present cost of living an immediate increase substantially to the maximum of $2,400 requested is imperative.

It is absolutely essential to the well-being of the entire country, urban and suburban, that we have the most efficient Postal Service possible. We can not have such a service without trained and efficient employees, and we can not have efficient postal employees unless we pay them a wage commensurate with the present standards of living.

Trained employees are leaving the Postal Service and entering other occupations where they receive higher salaries, and consequently our Postal Service is losing in its efficiency.

There is no public servant upon whom business or other public convenience is more dependent than the postal employee, and we believe every effort possible should be made to adjust conditions that will retain in and attract competent men and women to the service.

The joint committee in charge of this legislation proposes to hold hearings during the first week in March, at which time the Democratic Members of Congress from New York will record their approval and support of this legislation.

America now leads the world in the efficiency of its postal facilities. To maintain that leadership this legislation is indispensable.

The members of our delegation also personally appeared before the committees and advocated relief of these underpaid Government employees. After these committees had reported bills to their respective Houses, application was made to the Rules Committee of the House of Representatives, of which I am a member, for a special rule bringing the subject before the House for immediate action. In that committee I, in conjunction with the three other minority members, constantly urged action on the measure.

We expressed it as our opinion that the Members of Congress were overwhelmingly in favor of readjusting the salaries of postal employees and that no other legislation pending before this Congress was of more vital importance.

The recent overwhelming action of the Senate on the bill pending before that body justified our prediction. This question now comes before us, gentlemen, under a motion to suspend the rules and pass the Senate bill by substituting the provisions of the House bill for those in the Senate bill. This substitution is asked for for the reason that it is the general belief of those Members of the House of Representatives who have studied the question that the provisions of the House bill are more equitable to the postal employees.

While it was hoped when this subject was first being considered that an increase running as high as $600 a year for the city carriers might be obtained, it has been necessary to compromise so that the proposal entails an increase of $300 for those employees.

The postal employees are the direct servants of the Government, numbering about 300,000 individuals located in every community of the United States and its Territories. Their wages have not been advanced to meet the increased cost of living as in other lines of employment. When the readjustment of their salaries was made in 1920 it was contemplated there would be a reduction in the cost of living. You gentlemen all know this anticipated reduction has not materialized. So it is only fair the Government should carry out the arrangement tentatively agreed upon in the 1920 adjustment.

No one who appeared before the committee opposed an increase of salaries of these employees. There was among the advocates, however, a difference of opinion as to the amounts of increases and certain business interests feared that the adjustment of salaries would entail an increase in postal rates. The Post Office Department advocated the postponement of any increase until the sources of revenue by increases in postal rates could be ascertained.

It was apparent to the committee that this latter method was not the correct one to pursue. The Post Office Department should first make up its budget including adequate salaries for its employees, and thereafter postal rates should be fixed so that they would yield sufficient revenue to meet the expenses of the department.

Few persons outside the Postal Service itself realize the magnitude of the operations of this department carried on by its employees. It is a highly specialized line of work requiring years of experience and not fitting those engaged in it for any other line of work. While being trained for this service these men lose all adaptability for other lines of work, so it is only fair and just that they be adequately compensated while devoting their services to their Government.

It is estimated that this bill which we are about to pass involves an increased expenditure on the part of the Government of about $64,000,000, an average increase of about $200 per year for the 300,000 employees. Surely no one can begrudge this small amount to these servants of the Government when it is the first increase they have received in four years,

while other employers have been periodically increasing the salaries of their employees. This Government, above all other employers, can not afford to be niggardly with its employees, and those persons who use the facilities of the Postal Service must unselfishly contribute their mite toward the increased cost entailed by this adjustment through increased salaries.

The business man of New York who mails, at a cost of only 2 cents, an important letter to San Francisco, involving probably thousands of dollars in its safe delivery, does not often realize the service rendered to him by these servants of the Government. I commend to him the inscription over the portals of the New York post office:

Neither snow, nor rain, nor heat, nor gloom of night stays these couriers from the swift completion of their appointed rounds.

THE REVENUE ACT OF 1924

Mr. AYRES. Mr. Speaker, in the last Congress Mr. Mellon, Secretary of the Treasury, convinced one branch of Congress that it was necessary to reduce the income tax of the millionaire income-tax payers from 65 per cent to 32 per cent. In other words, a majority of the House of Representatives allowed themselves to be dictated to in a matter which under the Constitution is exclusively within the jurisdiction of the House—that is, revenue legislation. He succeeded so well in the Sixty-seventh Congress he began early to try the same tactics in the Sixty-eighth Congress. I must say he had plenty of help. Not only the President, Mr. Coolidge, but the greatest organized machinery of propaganda and publicity controlled by great wealth and special interests, ably financed and directed, ever known in the history of this country.

It is estimated one periodical alone spent in postage over $300,000 to put through the Mellon plan. It looked for a while as though the interests had succeeded in getting practically all the magazines and big newspapers fighting for the Mellon plan. Each and all congressional districts were organized. I received thousands of letters from my district, hundreds of them from people who are not income-tax payers but were persuaded to write me. The most glaring misstatements were made in presenting the Mellon plan. People were told it was the only chance to get a reduction of taxes, and notwithstanding the fact the special interests lost in their fight, they are such poor losers they are still fighting by continuing their misstatements about the measure passed as a substitute for the Mellon plan, villifying Congressmen and Senators who had the courage to stand out and pass a measure in the interest of the masses and against the classes. Nothing is too mean or degrading for them to say in the press about individual Representatives or Congress as a whole, both by word and insulting cartoons.

The question is, Are the people going to permit this to influence them to vote in a Congress which will do the bidding of the special interests or support those who have, in the face of all that has been done to drive them, stood steadfast for the interests of the masses?

The measure just passed took into consideration such facts as the ability of the taxpayer to pay. I think it a fair presumption that a tax of $100 to a taxpayer whose income is from $5,000 to $6,000 is even a heavier burden than a tax of a much greater amount to a taxpayer whose income may be from $50,000 to $100,000. Then if this theory or principle is correct, it ought to be equally correct in reducing these taxes. But Mr. Mellon, whose income is millions of dollars, can not reason it that way, and because he and his adherents can not agree to this principle they are keeping up the misrepresentation of the so-called Simmons bill or the present tax measure. Only a day or so ago I saw an insulting cartoon representing Congress refusing to consent to any tax reduction, and also representing that it had tied the taxpayer to heavier burdens. This has a greater influence on the minds of a great many than a deliberate falsehood set forth in plain language, because thousands who do not bother to read are sure to look at and study a cartoon.

Let us see what the present law does in the way of a reduction of taxes. It reduces taxes for the fiscal year ending June 30, 1925, $361,000,000, and will reduce taxes for the fiscal year ending June 30, 1926, over $400,000,000. These estimates are made, not by some one interested in the passage of this bill but by the Actuary of the Treasury. It reduces taxes for the fiscal year 1925, $22,000,000 more than the Mellon plan, and for the year 1926 over $100,000,000 more than the Mellon plan. Of course, the reduction is not on the class exclusively, at least, as Mr. Mellon wanted and directed. It has already reduced individual income taxes for the year 1923 and payable this year $232,000,000 more than the Mellon plan, which carried no provision whatever to reduce the taxes to be paid this year.

That is not all. In the reduction of taxes provided for in this measure is $136,000,000 reduction in excise taxes. Notwithstanding a reduction of a sum of about $480,000,000 in taxes, which is about $250,000,000 more than proposed by the Mellon plan, the Treasury will carry a very nice surplus even after meeting the payment of the adjusted compensation.

I might go on and show what was done regarding estate and gift taxes, and so on, but I am anxious to show by tables just what we have done for the greatest number of taxpayers, which sets forth the exact facts and which I feel will appeal to those who want to be fair and who believe in the theory that government should be administered for the good of the greatest number. The following table, which is correct as it is compiled from the official figures of the Treasury Department and contained in statistics of income for the year 1921, shows the total number of persons making income-tax returns in each State and how they are benefited more by the present law than they would have been by the Mellon plan.

| State | Total number making income-tax returns, 1921 | Number benefited more by Mellon plan | Number benefited more by Democratic (Simmons) plan |
|---|---|---|---|
| Alabama | 43,009 | 25 | 42,984 |
| Arizona | 18,477 | 1 | 18,476 |
| Arkansas | 33,830 | 8 | 33,822 |
| California | 386,082 | 237 | 385,845 |
| Colorado | 69,676 | 25 | 69,651 |
| Connecticut | 123,269 | 96 | 123,173 |
| Delaware | 15,889 | 12 | 15,877 |
| District of Columbia | 89,966 | 68 | 89,898 |
| Florida | 42,249 | 14 | 42,235 |
| Georgia | 67,719 | 24 | 67,695 |
| Hawaii | 11,481 | 22 | 11,459 |
| Idaho | 22,976 | 1 | 22,975 |
| Illinois | 611,558 | 537 | 611,021 |
| Indiana | 150,300 | 52 | 150,248 |
| Iowa | 111,483 | 24 | 111,459 |
| Kansas | 88,785 | 9 | 88,776 |
| Kentucky | 69,498 | 25 | 69,471 |
| Louisiana | 67,960 | 34 | 67,926 |
| Maine | 44,397 | 25 | 44,372 |
| Maryland | 112,963 | 109 | 112,854 |
| Massachusetts | 388,442 | 505 | 387,937 |
| Michigan | 250,147 | 174 | 249,973 |
| Minnesota | 124,501 | 81 | 124,420 |
| Mississippi | 25,614 | 5 | 25,609 |

This, no doubt, will be of but little interest to anyone having already been sold the Mellon plan.

It is, however, barely possible when he sees a table which points out his income and his taxes showing exactly how much he had to pay under the law passed in 1921 and what he will be compelled to pay under the present law which takes its place, also what he would have paid under this so-called Mellon plan, he will be interested; and unless he is so afflicted with mellonitis that he is incurable, he may admit he was mistaken. I am going to insert a table which is absolutely correct, which shows in the first four columns the normal tax paid by a taxpayer under the old, or 1921, law; also what he would have paid under the Mellon plan and what he will pay under the present law. In the next three columns it shows the amounts of surtaxes paid under the 1921 act, what they would have had to pay under the Mellon plan, and what will have to be paid under the present law. The last two columns show the amount of surtax reduction under the Mellon plan and the law as passed.

*Comparison of the Mellon and Act of 1924 tax plans with the Act of 1921 (married persons without dependents), the first $5,000 of all income to be deemed to be earned; balance unearned*

| Number of persons making returns in each class for 1921 | Income | Amount of normal tax under— | | | Amount of surtax under— | | | Amount of surtax reduction under— | |
|---|---|---|---|---|---|---|---|---|---|
| | | Act of 1921 | Mellon plan | Act of 1924 | Act of 1921 | Mellon plan | Act of 1924 | Mellon plan | Act of 1924 |

| | 500,000.00 | 39,680.00 | 29,737.50 | 29,597.50 | 220,960.00 | 114,080.00 | 170,020.00 | 106,880.00 | 50,940.00 |
| 63 | 1,000,000.00 | 79,680.00 | 59,737.50 | 59,597.50 | 470,960.00 | 239,080.00 | 370,020.00 | 231,880.00 | 100,940.00 |

It is argued that it is unfair to compel the rich man to pay 40 per cent of his income while taxing the ordinary or small income-tax payer 1 per cent. That might be true if it were a fact. If one will study the above table, he will find that the rich man pays the same taxes on incomes as the poor man up to an income of $10,000—that is to say, Mr. Mellon or Mr. Morgan or Mr. Rockefeller each pays the same tax as any other taxpayer receiving an income of $10,000 annually. True, when the rich man gets an income over $10,000, then he begins to pay a graduated surtax. The theory is, those who profit out of the economic condition of the country should be willing to give up a part of that profit to maintain the Government which protects them and permits them to make such profits. There is one way they can avoid paying these high surtaxes, and that is cease making such excess profits. An examination of the last table will show that on an income of, we will say, $25,000 annually under the law of 1921 the taxpayer paid $1,680; under the Mellon plan he would have paid $1,237.50, or $442.50 less than under the old law. Under the present law he will pay $1,097.50, or $582.50 less than under the 1921 act and $140 less than Mellon proposed. We will jump now to an income of $50,000. The 1921 act compelled the taxpayer to pay a normal tax of $3,680, while under the Mellon plan he would have paid $2,737.50, being $942.50 less than the 1921 law, while the present law compels him to pay $2,597.50, or $1,082.50 less than the 1921 act or $140 less than the Mellon plan. We will now jump to a $100,000 income, on which under the law of 1921 the taxpayer had to pay a normal tax of $7,680, while the Mellon plan provided for $5,737.50, or $1,942.50 less than that of 1921. The present law provides for a payment of $5,597.50, or $2,082.50 less than the 1921 law or $140 less than the Mellon plan.

It is not the normal tax, however, that tells the story of why Mr. Mellon and others of the same class were so anxious. If you will examine the surtax column, you can easily reach a conclusion as to why the intense interest of the millionaire taxpayer in the Mellon plan. For instance, it will be seen under the 1921 act the surtax on $10,000 was $40, while under the Mellon plan and the present law there is no surtax. Take the case of an income of $25,000; under the 1921 act the surtax was $880. The Mellon plan provided for $640, or $240 less than the 1921 act, while the present law provides for $510, or $370 less than the 1921 act. Take an income of $35,000. Under the old law of 1921 the surtax was $2,150, while the Mellon plan carried a tax of $1,690, or $460 less than the old law. The present law provides $1,430, or $720 less than the old law. A $50,000 income under the old law carried a surtax of $4,960. The Mellon plan provided $3,920, or $1,040 less than the old law, while the present law provides $3,540, or $1,420 less than the old law. You will observe from the table the amount saved by the present law and that proposed by the Mellon plan was all in favor of the present law as against the Mellon plan until you reach an income of $64,000, when it is exactly the same. That is to say the proposed Mellon plan saved the taxpayer in surtaxes on an income of $64,000, $2,260, and so does the present law. I hope all will make a close examination of the table from that on. For instance, take an income of $75,000. The Mellon plan proposed a saving of $3,670, while the present law saves $3,060; while on an income of $100,000 the Mellon plan proposed a saving of $8,380, and the present law saves $5,440. On a $200,000 income the Mellon plan proposed a saving of $31,880, while the present law saves $16,940. Take a $500,000 income; the Mellon plan would have saved the taxpayer $106,880, while the present law saves him $50,940. On an income of $1,000,000 the Mellon plan made a difference in surtax from the old law of $231,880, while the present law makes a difference of $100,940, or a difference between the Mellon plan and the present law of $130,840.

I think these figures explain much. I am inclined to think, however, when a man receives an income of from $50,000 to $64,000 annually he should be satisfied with the reduction he is receiving; and certainly the income-tax payer who gets more than that will be able to keep the wolf away from the door after paying his tax under the new law.

PROPOSED POSTAL LEGISLATION

Mr. BOYLAN. Mr. Speaker and gentlemen of the House, this legislation will not be a charge upon the Treasury because a subcommittee of the Post Office committee has gathered much data to enable them to formulate proposed legislation revising the postal rates on all classes of mail matter. Congressman KELLY, chairman of the subcommittee in charge of the revision of rates program, has advised the Congress that his subcommittee had gone as far as it could go, pending the report of the Cost Ascertainment Commission, and that he expected such report would be in possession of the subcommittee in ample time for the introduction of rate-revision legislation at the opening of the short session next December.

In addition to the above facts I contend that the increased efficiency, productivity, and enthusiasm of the employees and the normal increase in postal receipts will more than absorb any additional appropriation and would enable the department to administer this law and at the same time effect substantial economies in the service.

The following are some of the provisions of the bill:

$300 SALARY INCREASE—OTHER PROVISIONS

A flat increase of $300 for all clerks and special clerks and city letter carriers in first and second class post offices.

The existing legislation granting progression in the automatic grades and credit for substitute service is continued.

Provision is made for the automatic progression of clerks and employees in the automatic grades to the corresponding grade under the new law without interference with the automatic promotion earned by such employees.

Overtime or time in excess of eight hours per day will be compensated for on an hourly computation based on the division of the annual compensation by 306, which would be again divided by 8.

Compensatory time for Sunday service shall be granted on one of the six days following the Sunday of service and for holidays on one of the 30 days following the holiday of service except for the last three Sundays in the calendar year. Compensatory time for the last three Sundays of the calendar year may be granted on one of the 30 days following such Sunday of service, or, if the exigencies of the service require it, the Postmaster General may authorize the payment of overtime for the last three Sundays in the calendar year and for Christmas Day.

Ten days' sick leave with pay in each fiscal year, exclusive of Sundays and holidays, is provided. Such sick leave to be cumulative, but not more than 30 days' sick leave shall be granted in any one fiscal year.

Substitute clerks and carriers will receive 65 cents per hour.

MOTOR-VEHICLE EMPLOYEES

Motor-vehicle employees are classified into grades with automatic promotion and varying salary increases, none of which exceed $300.

SECOND AND THIRD CLASS POSTMASTERS

Second and third class postmasters receive an average increase of $100. Third-class postmasters also receive specific allowances for clerk hire not to be decreased by more than 25 per cent. Fourth-class postmasters receive an average increase of 15 per cent on cancellations.

RURAL CARRIERS

Rural carriers are allowed 4 cents per mile per day for the upkeep of their equipment. This provides an average increase of $300 for such employees.

Laborers, messengers, and so forth, will receive a flat increase of $150.

In view of these facts, Mr. Speaker and gentlemen of the House, I sincerely trust that you will adopt this conference report and give to the faithful employees in the Postal Service a well-deserved and well-merited, though tardy, recognition of their splendid work.

IMMIGRATION ACT

Mr. SABATH. Mr. Speaker, the statements made on the floor of the House yesterday by the gentleman from Kansas [Mr. TINCHER], the gentleman from California [Mr. RAKER], and the gentleman from Texas [Mr. BOX], and which were again stated to-day as to the number of those immigrants to whom my resolution would apply and relieve, have been made without any justification and with willful disregard of facts. The only excuse I can find for their wild and irrational statements is their fierce and unfounded prejudice against the foreign born, as whenever the question of immigration or prohibition is being considered they become hysterical, and their conduct and speech borders on insanity and fanaticism. But, gentlemen of the House, this is not a question of immigration, as was so properly stated by the gentleman from North Carolina [Mr. POU]. This is a question of deportation.

And as has been stated by the gentleman from Georgia [Mr. UPSHAW], it is a humane question—a question whether we should let the wives and children, the fathers and mothers, of American citizens and, in some instances, orphans, and a few hundred others already admitted, to remain in the United States, or whether, in view of the ruling of the Supreme Court, they should be deported.

My original resolution would not have permitted, as has been stated by the gentleman from California [Mr. RAKER], the entry of hundreds of thousands who are on the seas and in

foreign ports. It was carefully prepared to legalize the admission of those who are now in the United States and of those who embarked prior to or on May 26, the date the Supreme Court rendered its decision reversing the ruling of the Federal district and circuit courts of New York.

During my 17 years of service I pride myself that I have never deliberately made misstatements to the House, and I resent any imputation that I have endeavored to mislead the House by the wording of this resolution. For the information of the House I read the text of the resolution:

*Resolved, etc.*, That aliens who embarked for the United States on or before May 26, 1924, arriving in excess of quotas fixed under authority of the act entitled "An act to limit the immigration of aliens into the United States," approved May 19, 1921, as amended and extended, may, if otherwise admissible and if not subject to deportation for other causes, be permitted to enter and to remain in the United States without regard to the provisions of such act of May 19, 1921, as amended and extended.

The resolution comes back from the Senate in amended form, and as the gentleman from California [Mr. RAKER] and the gentleman from Texas [Mr. BOX] have taken it upon themselves to inform some members of the Senate Committee on Immigration that my resolution as originally passed by the House would authorize and permit to remain those designated in the resolution, but would also allow the coming of hundreds of thousands of others and serve as a loophole to defeat our present restrictive immigration laws, I take the liberty of including in my remarks the Senate amendments, which authorize to remain in the United States the following:

(1) Aliens heretofore admitted in excess quota and charged to the quota for a later month;

(2) Aliens heretofore admitted under a construction of such act of May 19, 1921, required by court decision;

(3) Aliens arriving in the United States after May 26 and before July 1, 1924, who departed for the United States on or before May 26, 1924, believing in good faith that they would be admitted pursuant to a construction of such act of May 19, 1921, required by court decision; and

(4) Aliens heretofore temporarily admitted under bond to relieve cases of extreme hardship.

The statements made to some of the members of the Senate committee were unwarranted and unjustified, as the wording of the resolution clearly showed the intent of affording relief solely to the unfortunate immigrants who were already here or who had embarked prior to or on May 26. In no sense of the word would it have permitted the coming of the number charged by the gentlemen who are suffering with immigration hysteria. To disprove the assertion of these gentlemen that I intended to permit the coming of any other, I desire to state that I acquiesced to the Senate amendments which specifically enumerate the classes to be relieved, and this the gentlemen were well aware of at the time of the meeting of the House Committee on Immigration, because the classes named in the Senate amendments were those, and only those, that would be covered by my original resolution. It were they alone that I sought to save and spare from the horrors of deportation and the misery which would follow. I believe that if I to-day called upon this House to disagree to the Senate amendments, a majority would be with me, because they are convinced that my original resolution was not misleading but clear in its scope, meritorious, and entitled to the vote and support of every man who is not blinded by prejudice and uncontrolled by the un-American organization which is responsible for nearly all, if not all, the irrational attacks and activities on the immigration question. Right here I take the privilege of inserting an editorial of a great newspaper—the New York World. It expresses the view of the duty of Congress as to the action that should be taken on this resolution:

IT SHOULD NOT FAIL TO PASS

The Sabath resolution for the relief of immigrants facing deportation as a result of the United States Supreme Court's decision in the Gottlieb case has passed the House. It is inconceivable that it should fail in the Senate.

Many thousands of persons, through no fault of their own, are affected by the Supreme Court's decision. Most of them are women and children—the wives and offspring of immigrants belonging to the excepted classes under the restrictions of the immigration law. They have followed their husbands and fathers in good faith and on the strength of lower Federal court interpretations of the law which the Supreme Court has recently overruled. To tear them away now and send them back homeless and helpless is business little becoming the American Republic.

It must not be. It would shame us unspeakably in the eyes of the civilized world. Congress should not adjourn until the Sabath resolution has been put through.

PUEBLO INDIAN BILL

Mr. MORROW. Mr. Speaker, the passage of Senate bill 2932, which is intended for a quieting of the title to lands within the Pueblo land grants of New Mexico, meets a situation in the State of New Mexico that has needed this legislation for a period of half a century. The history of Pueblo Indians and legislation for them dates back as early as 1551, when they were under the control of Spain.

It was at this period when the Spanish Emperor Charles attempted to have these Pueblos taught the Roman Catholic faith. At this early date these Pueblo Indians were practicing agriculture before any other European settlement had been attempted on the shores of America. The Spanish priests did a great work in bringing to the Indians a certain amount of Christian belief; while most of these Indians practice the Christian religion, they still cling to many of their forms of pagan worship. It ought to be called to the attention of our American lawmakers that these Indians when found here nearly four centuries ago had reached perhaps in some respects as high a degree of civilization as they now possess. In the construction of buildings and in many ways their method of living was, indeed, similar, except that some of the Pueblos resorted to cliff dwellings and cavite habitations. It would appear that this form of habitation was for the purpose of protection to themselves against other warlike or marauding bands.

These real American people led a simple life of hunting and to some extent tilling the soil, and raising corn for food, working the same up into meal by means of stone implements.

To show how complicated much of the titles to this real estate has become it is only necessary to refer to some of the old laws or decrees under the Spanish Government which permitted them to sell at public auction their real estate. This dates back to May 24, 1571. Much of this data that I am stating here I am indebted for to the speech of Hon A. B. Renehan, delivered at the conference of the League of the Southwest at Santa Barbara, Calif., June 9, 1923. In the speech is embodied a very clear history of the Pueblo life from the time that the Government of Spain took charge down to this date.

LAW OF JUNE 18, 1518

(a) So that our vassals may promote discovery and settlement in the Indies and live in the comfort and advantage which we desire for them, it is our will that houses, lands, lots, and caballerias (a piece of land 100 feet wide and 200 feet long) and peonias (a piece of land 50 feet wide and 100 feet long) be set off to all those who went forth to populate new territory in towns and places, which by the governor of the new settlement, shall be marked out to them maintaining the distinction between gentlemen and laborers, and those of higher rank and merit, and in order that they increase and better them, considering the quality of their services, and that they may practice husbandry and stock raising; and having established upon them their homes and farms, and resided in those towns four years, we grant them the power thenceforward to sell them and do with them as they wish, freely, as their own property; and likewise according to their character, the governor or whoever may have our faculty, shall look out for the Indians in the partition which he may make so that they may enjoy their benefits and the stays comformable to the rates and that which may be ordained, etc.

LAW 12 OF THE EMPEROR CHARLES OF MARCH 14 AND MAY 2, 1550

Whereas the grazing of cattle, horses, hogs, and other large and small stock does great damage to the cornfields of the Indians, and particularly where they go at large and without herders.

We command that there be no such pasturing in districts and places where injury may result, therefore let them be aloof from the pueblos of the Indians and their planted ground, without fail, since there are lands and herbage afar off for herding and grazing without doing damage, and let the justices see that the owners of flocks and those interested in the public welfare employ as many herders and guards as may suffice to prevent damage, and if any damage happens take steps for satisfying the same.

Another decree of Charles V, of the year 1533 (which is the 7th law, title 17, book 4, of the Recopilacion de las Indias), commanded that the forests contained within the grants, which may have been made or may be made in the Indies, should be common alike to the Spaniards and to the Indians, "and so we direct the viceroys and courts to cause it to be kept and fulfilled."

And as some persons without authority from his Majesty have occupied a very large portion of the limits and lands without lawful consent for making corrals, building shacks and cabins, and bringing

their flocks there, without their being common to all the residents, any ordinance or regulation to the contrary notwithstanding; and finally by the royal decree of October 20, 1508 (which is law 14, title 8, book 6 of the R. I.), Don Felipe also commanded:

"That if the viceroys, presidents, and governors have provided and taken measures for the fulfillment and accomplishment of the reductions, conversions (required to be made according to the Emperor's will), and if any person should be aggrieved and should interpose an appeal, let it be heard by the council of the Indies and no other tribunal. * * * And as there were to be marked off and given lands, waters, and forests to the Indians if they should be taken away from them by the Spaniards, just compensation therefor shall be made to them somewhere else, and in such case there shall be created a commission of three members of the audiencia (law court) so that if any persons be aggrieved they may hear them on appeal and cause reparation of the injury, as to that which is prohibited to the audiencias."

LAW OF MAY 24, 1571

When the Indians would sell their real estate or personal estate, let them be brought to public auction upon publication of notice by the common crier, real property for the period of 30 days and personal property for the period of 9 days, and let whatever may be struck off in any other way be of no value or effect; but if it seem right to the judge, for any reason, to abridge the time as to personal property he may do so.

And as the properties which Indians usually sell are of little price, and if in all sales they would have to proceed according to these regulations, it would be to cause such costs as the principal would amount to.

We ordain that this law shall be kept and enforced where the principal exceeds $30 in common gold, and not where less, and therefore in such case it will be sufficient for the Indian vendor to appear before the ordinary judge to ask leave to make the sale, and it appearing upon investigation that what he wants to sell is his, and that it will not be injurious to him to alienate it, he may give leave, setting forth his authority in writing which the purchaser shall execute, as being sufficient for the purpose.

LAW OF MARCH 16, 1642

We ordain that the sale, culture, and adjustment of lands be made with such regard for the Indians that all thereof which belongs to them will remain theirs, and even more, as well in private ownership as in community ownership, also the waters and the irrigation; and the lands on which they may have made ditches or other improvements whereby, through their personal industry, they may have been made productive, shall, in the first place, be reserved, and on no account may they be sold or alienated; and the judges who, for this purpose, are sent shall list the Indians whom they find on the lands, and the lands which they leave to each one of the tributaries, old men, reserves, caciques, governors, absentees, and communities.

LAW 17 OF DON FELIPE IV OF JUNE 30, 1646

The more to favor and protect the Indians and so that they may not suffer injury:

We command that the allotments of lands be not of these which Spaniards may have acquired from the Indians contrary to our royal decrees and ordinances or possess by vicious title, for, in respect to these lands, it is our will that the protector attorneys and the attorneys for the audiencias, if there are no protector attorneys, follow equity and the law which empowers them by decrees and ordinances for the purpose of seeking the nullification of such contracts. And we charge viceroys, presidents, and audiencias to give every assistance for its complete accomplishment.

DECREE OF JUNE 4, 1687

Whereas in my royal council of the Indies there is knowledge that the Marquis de Falces, count of Santisteban, while Viceroy of the Provinces of New Spain, promulgated an ordinance on the 26th of May, 1567, whereby he commanded that in the pueblos of the Indians, which might need lands to live upon and to plant, there should be given 500 varas, or so much more as might be necessary, and that therefore there should not be made to any person any grant of any tract of land which might not be at a distance of 1,000 varas, cloth or silk measurement, and away from the settlement and houses of the Indians and lands separated 500 varas from said settlement, as has been shown by the copy of the said ordinance which has come to the council, and that against this proceeding, order, and practice the owners of ranches and lands continue to go upon the lands of the Indians, ousting them or driving them off, sometimes by force and sometimes by fraud, on which account the unfortunate Indians leave their lands and their pueblos, just what the Spanish hunger for and want, intending and attaining that these 1,000 varas, which are to be separate from the pueblos, shall be measured from the Church of Hermitage, which the settlements usually have in the center of the place, and that it should happen that the whole body of the pueblos will be included in the settlements, whereby they will come to be without anything to give them, understanding that from the last 500 varas to all the four winds is meant that which is declared and commanded in laws 12 and 18, title 12, book 9, of the Nueva Recopilacion de las Indias (new compilation of the laws of the Indies), and because of the many impediments, damages, and diminutions which from this conduct would result to these natives (naturales) it has been considered proper to command that to the Indian pueblos which need lands to live upon and to plant there be given not only the 500 varas as provided by the said ordinance but also what varas they may need, to be measured outward from the last boundaries and houses of the place to all the four winds, as, for instance, 500 varas or more to the east, and a like manner to the west, north, and south, the rim of the pueblo always remaining vacant (de hueco el casco), these 500 varas to be given not only to the pueblo which may be a seat (or capital) but to all the others which may ask for them, and need them, as well those already inhabited as those which may hereafter be founded and settled, since in this way all would have lands to plant, and by which they may have something to eat, and upon which to graze their flocks, it being right and very much in accord with my royal kindness for me to look out for the Indians, who, I notice, suffer many injustices and molestations in view of the fact that they are those who sustain, benefit, and fructify my royal crown and all my vassals.

THE AMENDMENT OF THE DECREE OF JUNE 4, 1687

Royal Cedula, of July 12, 1695, asked by the farmers of New Spain to vacate the manner and form to be followed in making the measurement of the 600 varas of land which are to be given to the pueblos of the Indians and assigned to them by the royal decree of the 26th of May, 1567.

The KING, President and civil judges of my royal audiencia of Mexico:

In behalf of the farmers of this New Spain it has been represented to me that many are the vexations and molestations which they undergo and suffer because of the suits which the Indians are continually instituting, from which results the diminution not alone of the public revenues but of my own; and for the remedy whereof they beg that I will be pleased to order that the privileges may be maintained which were granted to them by the lords, kings, my predecessors, to be observed literally and without interpretation, and that there may be given to them an advocate to appear in their causes who should be a minister of the audiencia, and they say that the Indians, with the idea of depriving them of their farms and flocks, find it worth while to build huts of sod and stone and mud and thereupon with this idea run to the audiencia, so that in conformity with the ordinance of Marques de Galves, count of Santistevan of May 26, 1567, there might be caused to be measured the 500 varas which should intervene between their ranches and those of the Indians, and in this manner the Indians bring it to pass that the lands of these farmers conflict with their own, and that although this injury is of great gravity, yet greater is that which results from the cedula issued June 4, 1687, whereby there was granted to the pueblos of Indians another 100 varas over and above the 500 commanded to be measured to them to all the four winds, from the last house, the rim of the pueblo remaining free, and this being of so much detriment to the farmers they ask that it be not followed, and that the requirement of the ordinance have force only in those pueblos which were settled before the grants were made and before the establishment of their ranches, and that the measurements be understood as starting, not from the last house of the pueblo but from the center and the church, which is in the middle, and this should only be effective in those pueblos which are seats, whither the people necessarily repair for the administration of the holy sacraments, and so that the other varas may be measured off to the Indians—which they ask—from the church, sufficient reason is to be found in the fact that the Indians do not have their houses in regular form, for they are distant one from the other 30 or 40 varas, and some of them as much as a quarter of a league from where their farms are injured; and they further ask that the Indians be not permitted to build their huts or brotherhood houses on their farming lands, for thereby they make the pretense of a town for themselves upon false basis, and thence take the measurement of the lands, and the farmers are despoiled of their farms and their places by means of the sales which the Indians make of them and other properties, and besides the quantity of money which the farmers pay to Indian workmen and what more is collected in the woods, and the costs of the visits which the governor and alcaldes mayores—chief local judges—make to their farms and ranches for their own particular ends and objects involve an ever-increasing fee bill, and the matter having been considered in my council of the Indies, with the close attention which it requires, and having considered what you have reported concerning it in the letter of January 7 of this year, and also that which in this regard the attorney general has stated I have resolved that the Cedula, issued June 4 of the year past—1687—already mentioned, shall be kept, fulfilled, and enforced precisely, and of which you acknowledged receipt, but that it shall be understood that the distance of 600 varas which are to lie in between the land and planted places of the Indians

of this jurisdiction and those of the farmers shall be measured from the center of the pueblos, understanding by this from the church of the pueblos, and not from the last house; and that the same practice shall be followed in respect to the distance of the 1,100 varas which there are to be from the pueblo to the livestock ranches which are to be counted in the right way. And if from this method injury be experienced, whether to the partition land of the Indians or to those of the farmers, it shall be compensated to one and the other by lengthening out their line in such places as may be considered just and least prejudicial to one party and the other; and if there are no lands either from the partition of the Indians or the compositions and adjustments with the laborers from which to compensate the injury let it be done from the lands which belong to me, and you will take great care that this be done with so much equality and fairness that no reason for complaint shall be given either to the Indians or to the farmers, and in such manner that among them no lawsuits shall arise, and, particularly, that all show so much equity that each one be encouraged to hold himself within the limits belonging to him, and you will more particularly attend to the welfare and advantage of the Indians as I have commanded.

Wherefore, in order that they may be benefited, for such is my will, and upon receipt of this dispatch, and in order that my direction may remain in observance, you will advise me at the first opportunity.

Decreed at Madrid, July 12, 1695.

(Signed) I, the KING.

By order of the king, our lord.

(Signed) BERNARDO ANTONIO DE PARDINAS,
*Villa de Franco.*

From the time of the early Spanish settlements, extending back nearly 400 years ago, these Indians and Spaniards lived together, trading back and forth, and in many cases intermarried, so that in many instances the lands of the Indians became the Spaniards' and have remained to their descendants. This is especially true of the more fertile lands that could be irrigated when there was a water supply for that purpose.

That these Indians practiced this method of agriculture is evidenced upon every hand in New Mexico and Arizona; that they had dams and ditches and utilized water for the growing of crops, presumed to have been mostly corn, and since the date of the Spanish Government into New Mexico they have cultivated other grains and vegetables.

That the water supply, so as to afford irrigation of land to all of these different pueblos for their support, is in many cases insufficient. In fact, the area of cultivatable land to furnish food for the Indians to remain at home and cultivate the same is in some of the pueblos insufficient, and a problem is presented for solution that after the finding by the "pueblo land board," as is provided in the bill, has been made and when the real needs of these Indians has been determined as to land and water in order to live and develop, steps should be taken to provide for the same before our public land is exhausted.

The joint commission appointed under Senate bill 2932 should act promptly in dealing with this situation of the title to these Indian lands, so that the title of the settlers can be finally and firmly fixed and that the lands of the Indians likewise may be safeguarded.

This law, in my opinion, if carried out to its real finality, should settle for all time the disputes now existing between the settlers, who claim certain title to land which has been in their possession, and the descendants of many settlers for generations. The speedy clearing up of these titles should be brought about by this act; the Pueblo Indians now remaining, I herein set forth according to pueblos and population:

| Northern pueblos: | Population |
|---|---|
| Nambe | 117 |
| Picuris | 108 |
| Pojoaque | 8 |
| San Ildefonso | 100 |
| San Juan | 445 |
| Santa Clara | 334 |
| Taos | 607 |
| Tesuque | 114 |
| Total | 1,833 |

| Southern pueblos: | Population |
|---|---|
| Acomita | 592 |
| McCartys | 182 |
| Paraje Laguna | 182 |
| Old Laguna | 409 |
| Seama | 280 |
| Mesita | 177 |
| Paguate | 545 |
| Encinalanca | 157 |
| Casa Blanca | 93 |
| Santo Domingo | 977 |
| Santa Ana | 225 |
| Sandia | 93 |
| Isleta | 999 |
| Cochiti | 251 |
| Jemez | 561 |
| Sia | 145 |
| San Felipe | 523 |
| Total | 6,511 |
| Navaho Indians under southern pueblos | 300 |
| Grand total | 8,644 |

This population of quasi citizens of New Mexico should receive the attention of the State, and the State should give them the right of full citizenship as intended in the recently enacted legislation. The authorities of the Government to whom is detailed the working out of the problem of this land controversy between the settler and the Pueblo people should make the settlement quickly and in complete conformity with the legislation enacted. Then the State should proceed to bring these people as closely under the jurisdiction of State laws as other citizens, with a view of encouraging individual effort for development among the Indians.

In concluding my remarks upon the discussion I have made I want to add the following as the views of a new Member of Congress. In my short experience in Congress I want to say that I really believe that the Members of this body are hard-working, conscientious men who desire to legislate in the interests of their constituents. And when I say that I also want to add that I am a great believer in environment; that a Member's position upon a public question is frequently swayed by the peculiar conditions of his locality. I have an editorial from the New Mexico State Tribune, of Albuquerque, N. Mex., whose editor is a fearless writer, and I believe in this article, which I here insert and take responsibility for. The article gives a different light concerning Congress than that which the press has been giving the public for some time. The article is of June 1, 1924, and I embody it and extend it as a part of my own views, in perfect agreement with the same, and in contrast with the subsidized press that has so recently abused this Congress.

The article is as follows:

A year ago it was the fashion to speak lightly of Congress. We among others did it. We proposed saving the expense of heating the Capitol by utilizing the oratory, and made other pert remarks. We take all that back.

Congress is the representative body of the country. It is the fundamental thing in government. It should not, could not, be abolished. If Congress could not be made an effective body, worthy of respect, then there is no hope for a government in which the people rule, as we wish ours to be. To treat it as a joke is to invite the only alternative—dictatorship.

But there has been a great change. The growth of the progressive movement, breaking down party lines, old prejudices, and self-interest, has dignified Congress. In the session now closing we find Congress on the whole intelligently acting to pass laws in the interest of the people, killing attempts to put through raw deals, and going even further to show the people just how the administrative officers have betrayed them. Congress to-day is greater and nobler than the Executive. It is worthy of the American people.

Let us never make the mistake again of treating Congress as a joke. As an institution let us give it the dignity it deserves. Let us establish the custom that the greatest honor that can come to any man is to sit in the lawmaking body of his country. Then we shall have all our great public men in Congress, and we can safely give to Congress responsibility for the whole Government by making Cabinet officers report to it.

"WHAT IS THE MATTER WITH CONGRESS?"

Mr. BLACK of New York. Mr. Speaker, this is my answer to the Literary Digest on "What is the matter with Congress?"

Mr. WILLIAM SEAVER WOODS,
*Editor Literary Digest,*
*35½-360 Fourth Avenue, New York, N. Y.*

MY DEAR MR. WOODS: Congress errs in forbearing. We should have ordered some magnates before a firing squad. The people would approve. Then we could stand before the same squad, for the reasons for us would be dead before us. We fail, for the people enact the laws but interests administer them. Our laws are silent while money talks. Rifle shots can silence money.

Fault is found with blocs. Gary prefers one bloc—the big-business bloc with a Mark Hanna as contact.

Legislation is on sale, but only for votes. Voting is vulgar and golf refined. Election day sees the people at the polls and the best minds at the links.

He men call us reds because of us they can not squeeze the red blood out of infants in the mills.

Gary has one vote. For it he would own the United States. King Steel dislikes Congress. Charles I, George III, and Louis XVI were antipathetic to their master's voice.

Business prefers the Executive. Congress operates openly with a spry stenographer on hand. Executive records are in posthumous and charitable memoirs. Business whispers to the Executive that So-and-So should administer that "fool law" affecting "us."

Abolish Congress; its Members have no social hopes but the respect of constituencies. Hang, draw, and quarter Congressmen, for they bawl not "Aye, me lord," when Grand Duke Andy proclaymes his planne to benefit ye riche and further to harrasse ye miserable poore.

Let the chambers of commerce hand us a czar through an ex parte Literary Digest poll.

Waste of time in muckraking, etc; dear brothers of the Senate will meet this count in the indictment of the Self-Sufficients v. Congress. Time was wasted by Calvin and his senatorial satellites trying to cover up instead of to clean up the mess.

We fail to enact needed measures—for we pass a bonus which the veterans do not want—see pictures of veterans refusing the bonus in New York. We pass a fair tax reduction bill framed by Congressmen who were drawing revenue bills when Mellon was in the licit whisky business. We send to the White House ax a pension bill to let aging veterans live less a la Mills Hotel but far from a la Ritz, where the knockers put up. We would pay more to the postal employees, but the Great Heart in the White House is icebound. A decent retirement bill for Federal workers is needed—but retirement has a harsh sound this year in quarters where $75,000 is the prevailing rate of wage.

We are jealous of the Executive—seeing fight pictures at McLean's. What other pictures were shown and who had the hard luck to sit behind Hughes? The Elephant went to a stag.

We are cowards. We fear the voters. We pussy-foot—Calvin is a roaring lion.

How un-American—the local voice is heard in the general government. Washington, poor dullard, wanted more Congressmen, more local voices. We ought to have a Senate made up of Elbert Gary, Inc., and a House of Nicholas Murray Butler (St. Nicholas since he slipped from the vehicle). With Mellon as President, Hughes as the Supreme Court, and Hanihara Secretary of the Navy, Caution could take his cat under his arm and carefully deliberate as to which cow he would confer with on father's farm.

We usurp State rights. We would not let the Pittsburgh prodigy tax State bonds. Tax-exempt bonds will give the people means to recapture their utilities from the exploiters who defy him.

We lack ideals—we will not follow like sick sheep America's bellwethers for since they have made the most money they have the highest ideals.

Subordination of business interests of the country to politics is the conservative expression for conforming business methods to the popular will.

Gary says Congress is the worst thing we have. That is his trouble—he has not Congress. Independent, it draws its judgments from the rule of reason and not from the rule of money or party. We would satisfy better some if we jumped when their whip cracks.

Vote for the "Mellon plan" was a crushing slogan, but the product does not analyze up to democratic standards.

Our judgments are compromises of contending opinions and so approximate fairness. No matter what his mirror reports, to us Gary is not "We, the people."

Very truly yours,

LORING M. BLACK, Jr.

### THE PROTECTIVE TARIFF BRINGS PROSPERITY

Mr. SMITH. Mr. Speaker, when addressing the House on March 2, 1923, I discussed at some length the benefits accruing to our country as a result of the operation of the Fordney tariff law, which had been then in force nearly six months. I said in closing:

And now, Mr. Speaker, I will conclude my remarks by declaring that, all things considered, having in mind the innumerable problems with which Congress had to wrestle, this Fordney tariff law, as a protective measure, a revenue raiser, and a stimulus to industry and agriculture is a splendid piece of work. The Republican Party can go to the country with it in the presidential campaign of 1924 in perfect confidence that it represents a duty well performed. It presents a defense which is impregnable to Democratic assault so long as the great majority of the people hold steadfast to the principles which they have supported for generations.

I am still of that opinion and believe that anyone who is unprejudiced must be convinced, in view of the actual proofs which are so evident that the protective policy represented by the Fordney law not only gives steady employment to labor but enriches our country by keeping our money within our own borders and at the same time brings ample revenues to the Government, thus resulting in the reduction of Federal taxes.

Through the protective tariff policy we discriminate in favor of our own people. Free trade really means giving preference to those not our own, those not of our own house, but to aliens and strangers in foreign lands. By refusing to protect our own we in fact protect our rivals. We create by our neglect a preference for the goods of the people of other nations; we in effect invite them to occupy our market and to supply our needs to the exclusion of the products of our own people. This causes the closing down of industrial plants. Thus our own are thrown out of employment. The more general the free trade, the more widespread our neglect of our own, the greater the distress and want due to unemployment. In the end free trade defeats itself, because the diminished purchasing power of the people, many of whom are unemployed, and others who are limited in their work only to part time, prevents them from making purchases with their usual liberality, and the demand for the foreign products finally becomes less than it would be under adequate protection and with employment general and at good wages.

#### HOW A FREE TRADE IMPORTER BECAME A PROTECTIONIST

In proof of this, I am told of a large importer who called upon a high official of our Government some months after the existing prosperity tariff went into effect to tell him that he had ceased to be a free trader and was now an avowed and ardent protectionist. This importer said that he had given both of his time and money to help defeat the Fordney tariff bill in the belief that it was a menace to the people and convinced that it would greatly restrict his own business. In both of these views this importer found he was mistaken. The enactment of the Fordney tariff not only proved to be a blessing to the people in that quickly it first stabilized, then stiffened, wages and in a number of cases led to increases. It led to the employment of four or five million idle Americans; it greatly stimulated home trade; it established general prosperity; and it enormously enhanced the purchasing power of the people. The result of these changed conditions, this importer said, actually had substantially and profitably increased his own business. With an abundance of money with which to buy, he found that the American market was better for his imports, the consumption of which increased, greatly to his profit and his prosperity.

The proof of this is to be found in our increased imports during the year and a half the prosperity tariff has been in effect when the latest statistics of the Government were issued in the Monthly Summary of Foreign Commerce, from which the following facts are tabulated:

*Imports during 18 months preceding October, 1922, and the 18 months ending with March, 1924, in millions of dollars*

| | Free of duty | Dutiable | Total |
|---|---|---|---|
| 1921—April | 150 | 104 | 254 |
| May | 120 | 85 | 205 |
| June | 118 | 67 | 186 |
| July | 114 | 64 | 178 |
| August | 121 | 74 | 195 |
| September | 113 | 66 | 179 |
| October | 112 | 76 | 188 |
| November | 133 | 78 | 211 |
| December | 158 | 79 | 237 |
| 1922—January | 136 | 81 | 217 |
| February | 133 | 83 | 216 |
| March | 145 | 112 | 256 |
| April | 125 | 92 | 217 |
| May | 149 | 104 | 253 |
| June | 160 | 101 | 260 |
| July | 151 | 101 | 252 |
| August | 169 | 112 | 281 |
| September [1] | 141 | 89 | 229 |
| | 2,448 | 1,568 | 4,014 |

[1] Figures of imports of merchandise cover period Sept. 21.

*Imports during 18 months preceding October, 1922, and the 18 months ending with March, 1924, in millions of dollars*—Continued

| | Free of duty | Dutiable | Total |
|---|---|---|---|
| 1922—October [1] | 213 | 132 | 345 |
| November | 172 | 119 | 292 |
| December | 178 | 115 | 294 |
| 1923—January | 193 | 136 | 329 |
| February | 170 | 133 | 303 |
| March | 211 | 187 | 398 |
| April | 190 | 174 | 364 |
| May | 201 | 172 | 373 |
| June | 178 | 142 | 320 |
| July | 168 | 120 | 287 |
| August | 165 | 112 | 275 |
| September | 143 | 111 | 254 |
| October | 172 | 136 | 308 |
| November | 169 | 122 | 291 |
| December | 176 | 112 | 288 |
| 1924—January | 176 | 119 | 296 |
| February | 186 | 149 | 335 |
| March | 164 | 157 | 321 |
| | 3,220 | 2,448 | 5,671 |

[1] Figures of imports of merchandise cover period from Sept. 22 to Oct. 31.

From this it will be seen that the imports during the 18 months ending with March this year, during all of which the prosperity tariff has been in effect, had a value in round numbers of $5,671,000,000, as compared with $4,014,000,000 during the 18 months preceding the enactment of the Fordney tariff, the increase totaling $1,657,000,000, or 41 per cent.

VAST INCREASE INSTEAD OF DECREASE IN IMPORTS

Our imports, therefore, under the prosperity tariff, instead of greatly decreasing as was so generally and so positively predicted by our free-trade Democratic friends, actually increased no less than 41 per cent. That is something for our Democratic friends to reflect upon. We would be unable to buy foreign goods, these same free-trade Democratic friends told us, because of their greatly increased price due to the increased duty; therefore we could not expect to sell our surpluses to people of other countries, and we would suffer a reduction in our exports, with all of the evil consequences that follow an accumulation of production, preceding a diminution of production, and a final abandonment of it. Of that I shall speak presently. But I am not ready to abandon as yet my study of the tremendous and utterly demoralizing increase in our imports—demoralizing from a free-trade Democratic point of view.

At this point I wish to digress for a moment to state that I have come into possession of a symposium of terse, clear-cut, more or less epigrammatic expressions on the tariff, gathered by the American Protective Tariff League, of New York, which for nearly 50 years has been unceasing in the distribution of tariff arguments and facts, all showing the necessity of maintaining at all times an adequately protective tariff; and it is my plan to interpolate from time to time, in what I have to say at this time on the prosperity tariff, quotations and excerpts culled from that symposium. I quote Senator McLEAN, of Connecticut, as follows:

I heartily approve of the effective work accomplished by the American Protective Tariff League, and if the American people are wise they will continue to give it their hearty support.

And Senator PHIPPS, of Colorado, says:

The protective tariff principle is one which stands at the base of our business and agricultural prosperity.

Of our imports free of duty the total during the 18 months preceding the enactment of the prosperity tariff, in round numbers, totaled $2,448,000,000, but during the 18 months of the present tariff our imports free of duty totaled in value no less than $3,220,000,000, an increase in imports free of duty of $772,000,000 or no less than 31 per cent.

Of our dutiable imports the increase, it will be noted, was from $1,568,000,000 in the 18 months preceding the enactment of the protective tariff to $2,448,000,000 during the 18 months that elapsed after the enactment of that instrument, an increase of $880,000,000, or 56 per cent more than during the 18 months of semifree trade. Notwithstanding the protective duty, therefore, the dutiable imports increased far more than did imports free of duty. I should like to have some of my free-trade Democratic friends explain what to them must be a most amazing protective-tariff phenomenon. It may help them to do so if they will accept as a basic fact a short statement from Senator SHORTRIDGE, of California, who has said:

It is no longer a matter of theory; experience proves that a tariff framed on protective principles is absolutely necessary to national and individual prosperity.

PURCHASING POWER OF THE PEOPLE

Democrats are wise enough to know that there is but one explanation for this phenomenon, and that is that the increased and very general employment of the people at higher wages than they have ever before known in peace times gives to them a purchasing power that in the aggregate pushes aside all barriers to purchases of the things they desire, be they dutiable imports or home products. The protective tariff substituted employment for unemployment, high wages for no earnings, prosperity for poverty, comfort and contentment for misery and deprivation—that is the reason!

Right here we get to the very essence of the difference between protection and free trade in the United States. The increased prosperity, that increased purchasing power of the money in the hands of the great majority of the people—110,000,000 of them, remember—was more favorable to imports than the hard times they endured previous to the enactment of the prosperity tariff.

I pause to quote my friend Representative FENN, of Connecticut, who says:

Despite the assertions of those who opposed its passage I believe the country is convinced now that the Fordney-McCumber tariff bill is the best tariff, taking the world conditions into consideration, ever passed by any Congress.

What a wonderful country this would become if such tariff truths were only acceptable to our Democratic friends.

WHY DO DEMOCRATS FAVOR FOREIGN PRODUCTS

Free traders themselves, therefore, must see, even if unwilling to admit, that conditions are infinitely more favorable to imports under a reasonably protective tariff than they are under a semifree-trade tariff. How are our free-trade Democratic friends to find a way out of their dilemma? If this purpose is to encourage the purchase of foreign goods, protection, not free trade, is the road to it. But if they desire to diminish American purchases of foreign goods, they must put free trade, or semifree trade, conditions in operation. When the great bulk of the people are prosperous they buy more freely, regardless of the cost of purchases, than they do when free-trade conditions make times hard, with employment uncertain and money hard to get.

It has seemed to me that our rates of duty on a great many competing foreign articles are too low; that they could be increased beneficially to everybody in the United States, producers and consumers alike. Which causes me to insert here a remark of my Illinois friend, Representative SPROUL, who said:

I believe that the past year has proven, if proof was necessary, the great good that has come to the country through our present tariff law. If I was to change it in any way, it would be to increase the rates of the various schedules.

Democrats are not likely to approve of that unless they happen to produce sugar, or wool, or rice, or even peanuts. But there is food for thought in the statement.

MINIMUM WAGE IS FREE TRADER'S CHIEF AIM

Of course, the real object of free traders is to force our workers to accept wages that are on a parity with those in less-favored countries, because it will always be found that under free-trade conditions the tendency is constantly to reduce wages, and it is easier to effect reductions in wages when there are more men seeking employment than there is employment offering. The effects of free trade in the United States or semifree trade have been, of course, to diminish the average wages paid to workers, but this diminution has not been anything like as great as free traders have wished; nothing like, for example, as great as would bring wages in this country to a parity with wages in countries whose goods seek to compete with our own in the home market. Instead of being willing to accept reductions that would establish such a parity of wages between American and foreign workers many American workers prefer to quit work until a return of the time when they shall be able to obtain what they regard as proper wages; that is to say, the American standard of wages.

AMERICAN FEDERATION OF LABOR'S VIEW

In my speech of March 2, 1923, on the tariff I quoted from a resolution adopted by the American Federation of Labor in convention at Buffalo in 1917, just as appropriate now as when that great body of workingmen adopted it. Listen to it.

*Resolved*, That this convention go on record in favor of a policy of industrial preparedness and the enactment of laws by Congress that will adequately protect all wage earners of our country against loss of employment through any invasion of the products of any other nation.

Democrats like to beguile themselves with the thought that theirs is the party of the people, the common people, but the

meaning of that resolution, adopted only after the most extended and careful consideration, should clarify such illusive Democratic pipe dreams. The party of protection is the people's party, which stands for the American standard of living with wages adequate to the maintenance of that standard.

DANGER OF FREE TRADE OR SEMIFREE TRADE

If free trade or semifree trade periods were longer in this country than they have been under tariffs for revenue only, such as have obtained during Democratic administrations, possibly the object of free traders in time might be attained; that is to say, workers might be forced, by their very necessities, to save themselves from actual starvation, to accept wages on a parity with those in effect in foreign countries. But the lower our standard of wages the smaller our purchasing power, and real free-trade wage standards would not yield revenue for purchases of foreign products to any considerable extent. As has been so well said by Representative GARBER, of Oklahoma:

The theories of free trade taught in a great many of our universities and the advantage taken by monopolistic corporations constantly require a watchman on the tower to safeguard our national defense of a protective tariff. During the last 60 years we have had but 12 years of free trade or a tariff for revenue only. Select the periods of greatest depression, when manufacturing plants and factories were idle, when laboring men were reduced to want and standing in line for jobs and bread—then you have the periods referred to.

The whole question resolves into whom should be given the employment—the American farmer and the American workingman, or the foreigners with cheap labor and cheap modes of living, who are able to successfully compete and capture our home markets unless prevented from doing so by a tariff high enough at least to more than equalize the difference in such conditions.

FREE TRADERS HIDE THEIR ULTIMATE AIM

Free traders do not like to admit frankly and bluntly that their ultimate object is to force workers to accept minimum wages or wages on a parity with the wages of their competitors in foreign countries. But that is, nevertheless, their prime object. The free trader seeks to establish world-wide conditions where the cheapest product in a given line should be left to the production of people who can produce it most cheaply—usually these are the people least paid. This would establish world conditions in which the great body of workers the world over would be working for starvation wages—barely enough to keep body and soul together—as was the case in Great Britain for so long after the repeal of the corn laws, in 1846. Protection of agriculturists at that time was definitely abandoned with the sole object of obtaining foodstuffs and raw materials from abroad at lower prices than they could be produced for at home. Acquiring these foodstuffs and raw materials at the minimum of cost and forcing labor employed in manufacturing to accept minimum wages, Great Britain was able to continue to be the world's workshop, so to speak. But it will be perceived that it was at the expense of the workers—workers in agriculture as well as in manufactures. The result was that the British home market was of but little value to foreigners, except such as sold Briton's foodstuffs and raw materials. Being the cheapest market in the world for manufactures, of course foreign manufactures had no opportunity to invade the British market. The gradual decline of home production of food products in Great Britain following the repeal of the British corn laws was greatly marked, many agriculturists abandoning agriculture rather than attempt to compete with food producers the world over, perhaps the least-paid laborers in the world.

Naturally, inevitably these workers drifted into manufacturing, practically the only line of general employment open to them. This had a tendency to keep wages in manufacturing always at the minimum—the level of starvation conditions. British propagandists preached free trade to the world in order to secure free access to the foreign markets, and naturally they and their abettors and dupes always were and still are radically opposed to protective measures of any kind.

The great and valuable home market of the United States, the market that all foreigners are so eager to enter, would cease to exist under general and prolonged free-trade conditions—something that we should always strive to prevent.

Representative FAIRCHILD, of New York, a sterling protectionist, clearly sees and thus warns his countrymen against this danger:

Protectionists should be ever on guard against an insidious foe. That is my watchword for everyone who believes in the American policy of protecting home industries. A protectionist should unceasingly and aggressively work to maintain the policy of protection. Free traders, importers, and also whitewashed foreigners among American citizens are constantly and aggressively at work to undermine the protective policy, and protectionists should never for one moment be weary in well-doing.

If American workers really desire to know what would happen to them under prolonged free-trade conditions, let them study the progress of events in Great Britain after the repeal of the corn laws nearly 80 years ago. The more such conditions are studied by American workmen the less inclined they will be to participate in bringing about free trade or semifree trade conditions in this country. Such evils as may arise through long-continued protection can be remedied from within far better than from without; and there are no evils possible under protection that are not infinitely more tolerable than such evils as exist under free trade. This brings me to a statement by Senator MOSES, of New Hampshire, that is most applicable:

While there are some features of the administrative portion of the act which provoke just criticism, the underlying principle of the measure, through which runs the constant forceful thread of maintaining an American scale of wages and American standard of living for American workingmen, is so apparent that even the critics of the bill are shamed into silence.

We have seen what the prosperity tariff has done during 18 months for imports—so much more than the Underwood "tariff for revenue only" accomplished. Let us glance for a moment at what this prosperity tariff has done for our home producers in the way of finding foreign markets for their surplus products.

Democratic prognostications regarding the effects of our protective tariff law at the time of its enactment have proven to be wholly wrong—absolutely and totally wrong. If Democrats believed what they then said, it is manifest now how ill-informed they were; and if, as in many instances was the case, their sole purpose was to mislead, what claim have they to serious consideration? They said our prosperity tariff would cut down imports, whereas they have increased 41 per cent; they said that this "robber tariff" would also curtail our exports—they were positive of that—some of them are positive of it yet.

Let us see therefore, what has happened to our exports during 18 months of this "unspeakable tariff," as compared with what happened to them during the 18 months that preceded the enactment of what is really a prosperity tariff. The following table is prepared from the monthly summary of foreign commerce issued by the Department of Commerce:

*Exports during the 18 months preceding October, 1922, and the 18 months ending with March, 1924, in millions of dollars*

| | Value of exports |
|---|---|
| 1921: | |
| April | 340 |
| May | 330 |
| June | 337 |
| July | 325 |
| August | 367 |
| September | 325 |
| October | 343 |
| November | 294 |
| December | 296 |
| 1922: | |
| January | 279 |
| February | 251 |
| March | 330 |
| April | 318 |
| May | 308 |
| June | 335 |
| July | 301 |
| August | 302 |
| September | 313 |
| | 5,694 |
| October | 371 |
| November | 380 |
| December | 344 |
| 1923: | |
| January | 335 |
| February | 307 |
| March | 341 |
| April | 325 |
| May | 316 |
| June | 320 |
| July | 302 |
| August | 311 |
| September | 381 |
| October | 399 |
| November | 401 |
| December | 427 |
| 1924: | |
| January | 395 |
| February | 366 |
| March | 340 |
| | 6,361 |

Here we find that Democratic forebodings and predictions went for naught. Even our exports have increased during the period of the operation of prosperity tariff, increased in the sum of $667,000,000, in round numbers, or 12 per cent. Democrats can not idly pass this off, any more than they can escape distrust because of their utterly wrong predictions that our prosperity tariff would greatly curtail imports. If they did not know, how dependable are they? If they did know, then, like Bret Hart's Ah Sin, they spoke with "intent to deceive." Which makes me think of what former Senator, now Postmaster General New, so well said:

Campaigns may come and go and new issues be from time to time injected into our politics, but the one principle that must not be and can not be forgotten, and upon which the two great parties are divided, is that of protection to American industry.

WILL FREE-TRADE DEMOCRATS ADMIT THEY WERE WRONG

Democrats may talk loudly and tell about the "issue" they propose making of the protective tariff, but theirs is the spirit in that matter which causes a timid youngster to whistle as he passes a graveyard at night. They will be glad when they get by. They do not want to be pinned down to specific questions, least of all to be asked to give specific data of the really objectionable features of this "robber tariff." They will generalize, but they are not apt to particularize. How can they and tell the truth? But dare they longer attempt to mislead? Note a remark by Representative FLEETWOOD, of Vermont:

The national distribution of Document No. 33, "Comparison of tariff acts of 1909, 1913, and 1922," published by the Ways and Means Committee, has been of much value, I think, in informing the public in regard to the benefit of the protective policy. I think the American Protective Tariff League in the distribution of this document has been of much value.

This document has been placed in public libraries, where whoever chooses may consult it and thus get first-hand official information regarding varying tariff schedules. And it has been sent to practically every newspaper editor in the country, close to whose elbow, if he is on his job, you will find it, well thumbed, its owner ready to "nail" tariff misstatements and at the same time furnish the truth. So anyone thinking of "getting away" with a campaign of untruths on the tariff would better watch out.

Really there is nothing for honest Democrats to say about the prosperity tariff except that it worked out very differently than their party leaders said it would, and that it did just the contrary to what Democratic leaders and newspapers said it would do. But we do not expect Democrats to admit such truths, not during a presidential campaign year; and all of this leads me to believe that Democrats, instead of making an issue of the tariff, will be found dodging such an issue; and they will be wise if they do dodge it, if they can dodge it.

DEPRESSION AMONG WHEAT GROWERS

Unquestionably Democrats and free traders—those who work so strenuously to substitute foreign for American products in the American market—will try to make the most of the depressed condition that affects our wheat growers of the Northwest. Already these producers have been told that they are the dupes, the victims of the tariff; they have been told that the tariff is of no benefit to them; that, on the contrary, it is a thing that increases the cost of everything they buy and has no power to help them. Everything they buy they must pay "high tariff rates" for, they are told, while what they sell must all be sold at world prices. These are deliberate falsehoods, and known to be such by those who utter them. But they are uttered in the belief—at least the hope—that the "ordinary man" does not know the truth and is unlikely to seek it, in respect to a tariff matter.

There is abundant proof that many wheat producers, and others within the area of large wheat production, who are in a state of financial and mental depression, are being told that it is all due to the "robber tariff." They are urged to do all they can to have the tariff repealed, to wipe protection off the American political slate. There is good reason to believe that these statements are all too readily believed by farmers who think they are "up against it," because it happened that the thing they produced in great abundance was in greater abundance the world over than it has been before the World War began. The protective tariff can not alter the law of supply and demand. It can, and it does, prevent competing foreign products from entering the American market without paying a good round duty on the product. The things the farmers have to sell never were so well protected as they are now; but the protection applies in the home market, it protects the farmers against foreign competition at home; it has never been pretended that it would prevent the producer who sells his product abroad from being obliged to accept the world's price for what he sells abroad.

On everything farmers are compelled to buy, especially such things as are peculiar to the needs and the uses of the farmers, there is no duty at all—all of them are on the free list, and tariff does not affect them. But Democrats will never tell you this. If you ask them they will either say this is not true, or they will hedge and evade the point. They think the lie helps them, and perhaps it does—for a time.

MISSTATEMENTS IN NEW YORK TIMES

The New York Times is a great American newspaper, perhaps one of the most prosperous and powerful newspapers in the world. But being a consistent free-trade newspaper, it is difficult for it to state accurately the facts respecting a protective tariff. Even such a newspaper as the New York Times does not hesitate to misstate and distort facts in order to malign and cast distrust upon the prosperity tariff. A case in point is before me in its issue of June 5, 1924, which contains an editorial captioned "Opening the eyes of farmers." It would, indeed, cause well-informed farmers to open their eyes very wide and to rub them, too, if they read it. "Farmers," declares this article, "have found out that the duties levied on agricultural products are wholly illusory." Farmers, in truth, have found no such thing. They have found that duties on agricultural products serve to keep competing foreign agricultural products out of the American market; that such duties preserve the American markets for American farmers. There is at present a duty of 42 cents a bushel on wheat, and every bushel of foreign wheat that seeks to enter the American market must first pay 42 cents to get in. With wheat selling at a little above a dollar this is a serious handicap to place upon foreign wheat that seeks to compete in the American market with American wheat, too serious a handicap for foreign wheat growers to care to try and overcome. Perhaps the worst misstatement in the New York Times article is this:

The tariff can not help the farmer, but hurts him by compelling him to pay high prices for all that he has to buy.

Politicians have not fooled farmers any more than the New York Times seeks to do. Such a statement as I have quoted from the New York Times is unworthy of the high position it occupies in the journalistic field.

The New York Times states that "one Representative proposes gravely to continue the process by asking the Tariff Commission to reduce the duties on farm implements." Every Representative in Congress knows, as the writer of the New York Times editorial under review does, that farm implements are all on the free list, and it convicts itself out of its own mouth when it admits that Canadians "import great quantities of implements used on the farms" and declares that "it is a fact that American manufacturers of farm implements dominate the industry and export to many foreign countries up to the value of $50,000,000 a year." Manifestly American makers of farm implements need no protection from the tariff and enjoy none.

Here the New York Times discloses its purpose in indulging in such wild and purposely misleading statements as are contained in the article quoted:

There is no hope that the American farmer can find a shelter behind a protective tariff. He ought to insist with might and main that others be deprived of it, especially when they enjoy it at his expense.

The New York Times taunts the farmers with their alleged desire to obtain subsidies, but it does not say that it and other newspapers like it enjoy the largest subsidies to-day paid by the United States Government; subsidies that run into tens of millions of dollars each year—aye, perhaps as high as a hundred million dollars—in the rates at which the Government transports their periodicals all over the country. It ill becomes any American newspaper that enjoys second-class mail privileges to inveigh against subsidies, because the general taxpayers of the country are obliged to contribute the great bulk of the money that the Government spends to carry and distribute American newspapers. Let the New York Times tell the farmers of the country how much it would have to pay to the Government if it merely paid the actual cost of having its journal carried and distributed by the Government. Subsidies, forsooth! The New York Times presents a pitiable picture in declaiming against special privileges and subsidies while it is a conspicuous beneficiary of them.

What can be expected of ordinary newspapers when they are set such an example by an American newspaper with the

prestige of the New York Times? The campaign of misrepresentation is on! The great, free-trade New York Times leads! It seems to hate the prosperity tariff even more than it hates the truth.

Farmers know that the tariff protection enjoyed by our manufactures, our mines, and our forests enable them to produce when profitable production would be impossible if competing foreign products were permitted freely to enter our markets. All of those so protected are consumers of American farm products, and they consume far more than they would if unemployed and with no money with which to buy, such as so often obtains when a Democratic revenue tariff is the law of the land.

Speaking on this floor on February 1, 1894, that brilliant American, the late Thomas B. Reed, discussed the tariff interestingly, illuminatingly, eloquently.

In the course of that speech he quoted at length from a published statement of a British editor who had but recently visited this country and who was amazed at the prosperity he found in the United States. Said Mr. Reed:

> I have given you already the glowing testimony of the Englishmen who have seen us with their own eyes. "Amazing prosperity," "Greatest market in the world," "Paradise of the workingman." These are strong words, but let us see if cold mathematics do not put to shame the fervor of adjectives.
>
> We are nominally 70,000,000 people. That is what we are in mere numbers. But as a market for manufactures and choice foods we are potentially 175,000,000 as compared with the next best nation on the globe.

Again, former Speaker Reed said:

> Mulhall gives certain statistics which will serve to make the comparison clear. On page 365 of his Dictionary of Statistics he says the total yearly product of the manufactures of the world are £4,474,000,000, of which the United States produces £1,443,000,000.
>
> I do not vouch, nor can anybody vouch, for these figures, but the proportion of one-third to two-thirds nobody can fairly dispute. We produce one-third and the rest of the world, England included, two-thirds.
>
> The population of the world is 1,500,000,000, of which we have 70,000,000, which leaves 1,430,000,000 for the rest of mankind. We use all our manufactures or the equivalent of them. Hence we are equal to one-half the whole globe outside of ourselves, England included, and compared as a market with the rest of the world our population is equal to 700,000,000. [Applause on the Republican side.]
>
> I repeat, as compared with England herself as a market, our people are equivalent to 175,000,000. As compared with the rest of the world, England included, we are equal as a market to 700,000,000. These figures more than justify the adjectives of the Englishman, and the cold facts of mathematics surpass the spasms of rhetoric.

And this is the market that free traders would turn over to the free competition of all the world! No wonder it is so eagerly sought by the rest of the world, considering what a wonderful consumer we are.

Said the beloved "Tom" Reed further:

> Who have these markets of the world now? There is hardly a spot on the globe where three generations of Englishmen, Frenchmen, or Germans have not been camped in possession of every avenue of trade. Do you suppose that machinery nearly as good as ours and wages at one-half these men are going to surrender to us the markets of the world? Why, the very duties you keep on show that you do not believe it. If we can not without duties hold our own markets, how shall we pay freight, the expense of introducing goods, and meet the foreigner where he lives?

And yet free traders would have us abandon to the foreigner the wonderful home market that we are at perfect liberty to enjoy for ourselves if we but protect ourselves against foreign competition and go roaming the world for other markets to exploit! Let us make the most of that which is ours and that lies all around us.

Our producers of wheat know that at home they possess a market equal to none to be found elsewhere in the world; they know that if tariff protection is withdrawn, if industries close down, factories and mills cease to operate, or operate only on part time, as was the case before the prosperity tariff came into effect, that the diminution of wheat consumption right here in our own market will be the very worst thing that can happen to them.

In the American Economist of June 6, 1924, on page 188, appears an illuminating editorial on "How the tariff favors the farmer." It is an article that the editorial writers on the New York Times and other free-trade newspapers should read and digest. It discusses a great variety of pertinent matters showing how the tariff benefits the farmer, and it shows how uninformed one Representative in Congress was in stating that articles were on the dutiable list of the tariff that are free of duty, proof of which the editor is able to furnish out of the mouth of a well-informed and honest Democratic Representative, Mr. RAINEY, of Illinois, who is quoted as saying that the protection given our farmers—

> is proportionately as large when reduced to equivalent ad valorems as is given to any other articles in the entire tariff schedules, including textiles. * * * In addition, the farmer was given protection on everything else he produces. * * * The protection he has received in terms does not differ in the least from the protection given anyone else, and it is just as high, perhaps higher.

Then the editorial in the American Economist, which, as no doubt you all know, is published by the American Protective Tariff League, discusses the freedom from duties of articles used by farmers. It says:

> As to the cost of farm machinery, it is probably due to the fact that there is no tariff on it that has increased the farmer's cost. Not a single farm implement is on the dutiable list of the Fordney-McCumber Act. And one would gain the impression from reading Mr. Wilson's statement that the farmer buys new machinery every year to harvest his crops. Nothing could be further from the truth. To say that the tariff is reflected in hats and shoes, so far as the farmer is concerned, is likewise somewhat at variance with the facts.
>
> There is a tariff on straw hats, the kind of harvest hats that the farmers use, and it is 25 per cent ad valorem if the hats are valued at $3 per dozen or less—that is, 25 cents each. When sewed straw hats of the type that the city chap wears are imported at 20 cents each to sell for $1.69 each, it can easily be seen that the farmer is rather the victim of the middleman than the tariff.
>
> As to shoes, where in the whole tariff law can Mr. Wilson find the shoes that the farmer wears paying a tariff duty? And where can he find a duty on the leather from which the shoes are made? There is none on either the shoes or the leather, and Mr. Wilson knows it.
>
> The farmer buys fence posts to keep his cattle in. Fence posts are on the free list. The farmer buys barbed wire to make the fence. Barbed wire is also free.
>
> The farmer buys plows, tooth or disk harrows, headers, harvesters, reapers, agricultural drills and planters, mowers, horse rakes, cultivators, threshing machines, wagons, carts, "and all other agricultural implements of any kind and description, not specially provided for in whole or in part, including repair parts," but both Mr. Wilson and Mr. Oliver apparently are unaware of the fact that they are on the free list. Binding twine is also free.
>
> The farmer also is a great bread eater. That is on the free list. He uses common brick and cement—that is, if he is modern—but he pays no duty on them if he brings them in from a foreign country. He must burn coal, wood, or crude oil. These are all on the free list.
>
> He uses cyanide and other chemicals for spraying his crops. These are on the free list. He uses hones and whetstones; he uses all kinds of fertilizers, natural or chemically made; oil cake and oil-cake meal as feed; pads for his horses; plaster rock or gypsum for building walls in his houses; and tea and coffee; but all of these are on the free list.
>
> The only necessities he buys that are taxed, therefore, must be certain cotton and wool clothing that he wears, and he asked for the duties on these things himself.
>
> The farmer knows that his prosperity and industrial prosperity in general are interdependent, because 90 per cent of his products are sold in the home market.

This philosophy was ably set forth by Stuart W. Cramer, of North Carolina, recently at the convention of the American Cotton Manufacturers' Association. In part he said:

> "The interdependence of industry and commerce, of factory and farm, and of all the various activities of life should be so obvious as not to require comment; yet so many think only in terms of agriculture, so many from industrial districts think only in terms of industry, and so many from commercial centers think only in terms of commerce and trade. Is it not true that agriculture prospers only when those engaged in industry and commerce prosper and have full buying power; is it not true that industry prospers only when the farmer and merchant prosper and their buying power is unimpaired; and can the merchant prosper unless the farmers prosper and those engaged in industry are employed and all have money with which to purchase his goods? Strike at one of these institutions and you hit all three. America is happy, contented, and prosperous only as a whole—no North, no South, no East, and no West; no farmer, no manufacturer, and no merchant—all American, pulling together."

The farmer knows that the Republican Party kept its pledge to him with respect to the tariff. He knows that what Mr. Cramer says is

the truth. And the farmer will not be misled by any plain, unadulterated bunk about the tariff and its effect on him, because it has benefited him in no small measure.

It is but fair to state that it never has been claimed by protectionists that the tariff would protect exports. To be sure, free traders and Democrats like to say, mistakenly, or untruthfully, that protectionists claim to be able to protect our farmers in the prices they obtain for the products they export. Protection applies only within the United States and against the importation of competing foreign products. When the products of our farms are so large as to create a surplus not within the ability of our own people to consume, and the surplus has to be exported, manifestly such surplus can not command more than the world price—free-trade price, if you will. How, then, can a protective tariff—applicable only to imports—help protect our exports or the producers of them? How foolish protectionists would be to claim that tariff protection can affect the price paid in the distant markets of the world for our surplus exports.

Again, if producers of wheat will limit its production to what is easily and naturally consumable in the United States, with our present protective duty of 42 cents a bushel on imported wheat, owners of foreign wheat would be obliged to suffer a loss equal to the amount of that protective wheat duty before such foreign wheat could compete in our own market with our own home-grown wheat. Say that the American price of wheat is $1 a bushel. With a duty of 42 cents a bushel on imported wheat—the present rate, recently increased from 30 cents a bushel by President Coolidge—the imported wheat would net the seller but 58 cents sold in our market. The value of foreign wheat, in short, would have to equal the value of our own wheat less the amount of our customs duty on wheat in order to enter our market. That is all that protectionists claim protection through the tariff can do. But if we have a surplus of wheat that must be sold abroad, how can tariff protection help the American seller of exported wheat to obtain the home price for what he sells abroad?

Then, how can the farmer's plight in respect to wheat be blamed against the tariff?

WHEAT EXPORTS DURING PAST SEVEN YEARS

From 1918 there was a tremendous rise in exports of wheat and prices received therefor in foreign markets, while since 1921 the decline has been abrupt, the prices received having so very greatly diminished. Here are the official figures:

*Exports of American wheat*

| Year | Bushels | Value |
|---|---|---|
| 1918 | 34,118,853 | $80,802,542 |
| 1919 | 178,582,673 | 424,543,010 |
| 1920 | 122,430,724 | 306,163,023 |
| 1921 | 293,267,637 | 689,843,094 |
| 1922 | 208,321,091 | 279,656,478 |
| 1923 | 154,950,971 | 192,015,328 |
| 1924 [1] | 67,260,473 | 74,808,474 |

[1] Nine months ending Mar. 31.

There is the record of foreign taking of our wheat. Our exports in 1922 dropped 30 per cent in quantity and 43 per cent in value as compared with the previous (peak) year. But it conveyed a warning that should have been heeded. The war was ended. Inevitably nations that had suspended wheat production would begin to produce wheat for themselves anew, so that the outlook for wheat markets and profitable wheat prices was forbidding. In short, our wheat producers had reason for curtailing production, and on a large scale, as compared with war and post-war production. But they continued to produce abnormal quantities and now they are suffering the consequences. The country sympathizes with them and Congress has sought to help them, if possible, to meet the temporary embarrassment confronting them, but the permanent remedy can only be found in decreased production.

In his report of November 30, 1923, to the President on the wheat situation, Secretary of Agriculture Wallace clearly shows how the demand for vast quantities of wheat began with the outbreak of the World War, how quickly production overtook demand, the drop in 1915–16, the renewed demand and again increased production, with price regulation in 1917, 1918, and 1919 crops. Mr. Wallace says:

Under continuous appeals for production of food the production of wheat rose from an average of 690,000,000 bushels in the period of 1909–1913 to 968,000,000 in 1919, an increase of 40 per cent, and the wheat area expanded from an average of 47,000,000 acres to 75,000,000 in 1919. * * *

When general deflation of prices began in the summer of 1920 wheat prices broke sharply and have continued to decline into the present season. As a result substantial reductions have taken place in both acreage and production of wheat. Nevertheless, the crop for 1923 is 781,000,000 bushels, or 13 per cent, greater than the average before the war, and the acreage is about 24 per cent larger. The corn acreage which was replaced by wheat has now recovered most of this loss, but still slightly under the pre-war average. While there has been some reduction in cultivated crops the total crop area of the country is still between 30,000,000 and 40,000,000 acres larger than before the war.

Secretary Wallace's recommendation to remedy the situation is, in part, as follows:

The increasing foreign competition in wheat production points to a relatively low level of prices for wheat and to the advisability of materially reducing the acreage. Our wheat production should be placed gradually on a domestic basis and then should keep pace with our growth in population and domestic demand. In those regions where wheat displaced other crops in response to war-time prices the acreage of wheat should be reduced as fast as profitable alternatives can be found.

Secretary Wallace says that the wheat surplus may be reduced materially by increased domestic consumption. "The per capita consumption of wheat flour and bread," he says, "has been lessened by the war-time campaign to save food coupled with the high prices for bread which have since been maintained." Statistics show that during the past two years the total wheat retained for consumption in the United States has aggregated about 550,000,000 bushels, which was the average retained for consumption in 1911, 1912, and 1913—in fact, the amount retained for consumption between 1906 and 1910 averaged no less than 560,577,241 bushels. As bearing on whether or not our tariff protects our wheat growers within the United States, note the margin of American No. 1 dark northern wheat prices over Canadian—Winnipeg No. 2 northern—prices during the first 10 months of 1923:

*American margins over Canadian prices, 1923*

| October | 30 | 32 |

This is a good place to interpolate a statement made by my friend Representative BEGG, of Ohio, in January, this year:

Our Democratic friends attack the tariff in general terms as it applies to the farmers, but on checking statistics for 1923 you will find that the farmers of the United States sold more than 711,000,000 bushels of wheat, and the average price in the United States as compared with the average price in Canada was near 30 cents a bushel to our advantage, or something like $210,000,000 in the pockets of American farmers.

A further study of statistics will show that under the Underwood tariff the differential in the wheat crop, comparing the United States with Canada, was as high as 7 cents per bushel. In other words, on 711,000,000 bushels of wheat the average sale over a period of five years showed a direct loss to the American farmer as compared with the Canadian farmer. If the tariff is no good, what is the explanation for this difference?

Again, if the tariff is no good, why is it that the 4,000,000 men who were out of work when the Harding administration took control are to-day all employed and there is a shortage of labor and the wages are the best ever known in peace times? If the protective tariff did not put those men to work, who did?

Representative SUMMERS of Washington made the following contribution on the subject of wheat in January last:

Please be advised that the Western wheat growers, all parties, are agreed for the first time in history that there should be a high tariff on wheat, not less than 50 cents a bushel and preferably 75 cents per bushel.

If all western wheat growers are agreed that there should be such a high duty on imported wheat, surely they all must agree that the protective tariff is helpful to American wheat growers. That being so, why imperil wheat growers by putting

in power the party that took the duty off of wheat and other cereal products during the period of the Underwood tariff?

The real, lasting, and effective remedy for the depression of the wheat producers is to curtail its production and keep it within the domestic requirements of the country, where it can be adequately protected against foreign competition.

In order graphically to contrast conditions affecting our imports and exports since the new tariff came into existence with a similar period preceding its enactment I have adopted the method of grouping our imports and exports in the same manner that they are expressed in the monthly summary of foreign commerce. The figures presented are in millions of dollars, as was done in the earlier part of my remarks.

*Value of imports and exports of the United States in 18-month periods preceding and following enactment of the Fordney tariff*

[The tariff went into effect on September 22, 1922]

| | For the 18 months ending with— | |
|---|---|---|
| | September, 1922 | March, 1924 |
| IMPORTS | | |
| Free of duty: | | |
| Crude materials for use in manufacturing | $1,196 | $1,647 |
| Foodstuffs in crude condition, and food animals | 363 | 427 |
| Foodstuffs partly or wholly manufactured | 74 | 72 |
| Manufactures for further use in manufacturing | 422 | 713 |
| Manufactures ready for consumption | 378 | 358 |
| Miscellaneous | 15 | 6 |
| Total | 2,448 | 3,223 |
| Dutiable: | | |
| Crude materials for use in manufacturing | 214 | 441 |
| Foodstuffs in crude condition, and food animals | 88 | 135 |
| Foodstuffs partly or wholly manufactured | 472 | 710 |
| Manufactures for further use in manufacturing | 206 | 367 |
| Manufactures ready for consumption | 575 | 769 |
| Miscellaneous | 13 | 26 |
| Total | 1,568 | 2,449 |
| Free and dutiable: | | |
| Crude materials for use in manufacturing | 1,410 | 2,088 |
| Foodstuffs in crude condition, and food animals | 451 | 562 |
| Foodstuffs partly or wholly manufactured | 546 | 781 |
| Manufactures for further use in manufacturing | 627 | 1,080 |
| Manufactures ready for consumption | 953 | 1,128 |
| Miscellaneous | 28 | 33 |
| Total | 4,016 | 5,672 |
| EXPORTS | | |
| Domestic: | | |
| Crude materials for use in manufacturing | 1,306 | 1,926 |
| Foodstuffs in crude condition, and food animals | 843 | 400 |
| Foodstuffs partly or wholly manufactured | 914 | 904 |
| Manufactures for further use in manufacturing | 623 | 822 |
| Manufactures ready for consumption | 1,879 | 2,198 |
| Miscellaneous | 10 | 11 |
| Total | 5,574 | 6,230 |
| Foreign | 112 | 92 |
| Grand total of exports | 5,686 | 6,342 |
| Duties collected from customs | 562 | 899 |
| Increase during protective tariff period | | 397 |

Percentage of increase, 52.8 per cent.

This presentation verifies the figures I presented earlier in my remarks in the tables, giving free and dutiable imports separately by months, and free and dutiable imports combined, as well as exports, also by months. But it goes much further and shows the character of our imports, free and dutiable, separately and combined, and the character of our exports. A study of this table will give students of the subject opportunity to satisfy themselves as to whether or not the country is better off because of the variations in the character of our imports and exports.

In the increase of imports free of duty, which increase amounts to $775,000,000, more than one-half represents crude materials for use in manufacturing, which should be pleasing both to protectionists and free traders. The other big increase was in manufactures for further use in manufacturing, which should also be pleasing to all shades of economists. Protectionists will be pleased to note a slight reduction during the period of the prosperity tariff in manufactures ready for consumption, as compared with the preceding period. Altogether the figures revealed of nondutiable imports should be satisfactory to protectionists.

As to the dutiable, substantially smaller in the aggregate, the doubling of crude materials for use in manufacturing is pleasing, as, in fact, are all of the increases, with the exception of manufactures ready for consumption, being nearly $200,000,000 more under protection than semifree trade. This proves, or should prove, that the duties are not burdensome. It will doubtless please free traders to note such a substantial increase in manufactures ready for consumption, since their interest is always keen in that particular feature of our import business.

It is noted, again, that the percentage of increase in nondutiable imports is 31 per cent and in our dutiable imports 56 per cent. This, again, should be most reassuring to free traders and should lead them to feel that a protective tariff that produces such pleasing results can not be the monstrous and unspeakable thing that they are wont to characterize it as being.

No wonder that Senator SMOOT of Utah is moved to remark:

> No American citizen who has any desire whatever to be honest can help but admit that the present tariff bill is accomplishing more than was ever promised for it. In my opinion it is the best tariff bill ever enacted into law. The longer it is in operation the greater will be the benefits to the people of the United States.

And Senator GREENE of Vermont:

> It does seem to me, however, that the United States has had experience enough with tariffs by now to recognize beyond all doubt not merely the wisdom but the economic necessity for maintaining the protective principle.

It should be equally gratifying to free traders that our total imports should increase no less than 41 per cent, whether the increase be due to a protective or a semifree trade tariff. The more we buy abroad the happier they are, and the mere detail that it is under a protective tariff that such increase should occur should not greatly displease them. Of course, it will not altogether delight them to find that a protective tariff is more conducive to large importations than is a semifree trade tariff for revenue only. Doubtless it will somewhat jar their sensibilities to be advised, as I can not refrain from advising them, that this really prodigious increase in imports is due to the tremendously increased purchasing power of the people, millions more of whom are employed in the United States because of the existence of the prosperity tariff than could find employment under the semifree trade tariff for revenue only. When four or five million idle people are able to find steady employment at an average of $5 a day—because wages have decreased but little since the war—of course the aggregate sum of money available for purchases of all kinds, including nondutiable as well as dutiable imports, becomes tremendous. And then, again, the quick employment of such a large army of unemployed Americans had a marked tendency both to stiffen wages paid to those who had been fortunate enough to find employment during the dull period of the semifree-trade tariff for revenue only and in many cases to increase them quite substantially.

Your out-and-out free trader never takes any real pleasure in learning that there has been an increase in wages; to such, increases seem abnormal, something to be corrected.

Protectionists are pleased that the prosperity tariff so completely refuted the predictions of the free traders, made in the heat of anger at the time of the enactment of the protective tariff. They see, but they do not like to dwell upon the fact, that instead of their vehemently predicted decrease in imports there has been a really phenomenal increase instead. If the astonishing, to them, fact should but lead them to study the economic situation with less bias and greater fairness, in time they might be reconciled if not won over to a protective tariff, since it accomplishes so amazingly what they so strenuously contend for—an increase in the consumption of imported articles rather than in the consumption of similar home productions.

But, of course, it is the dutiable feature of the imports that free traders regard as so outrageous, and to think that, once prosperity returned with the new tariff, the people should actually prefer to buy more dutiable than nondutiable articles, surely must seriously arouse them. It only goes to show, they will be apt to remark, how very much larger the consumption by Americans of foreign-made articles would have been had there been no duties at all. Perhaps, like in dear old England, they would have preferred to see the duties piled high on noncompetitive imports, and our desire for increased revenue satisfied in that way.

But then they would be forced back to the conclusion that it was only because these duties were imposed that employment became so general throughout the United States as to furnish the money for these tremendously increased foreign articles. In short, it is a case of not being able to have one's cake and eat it, too.

Protectionists can not study the vast increase in dutiable imports without becoming convinced that the rates of duty are too low; that they could be increased substantially in a manner that would not impair the revenue-producing qualities so much desired and at the same time give greater opportunity for home producers to meet the market demands for competing articles now so largely imported. The purpose of protectionists is to increase home production, not home consumption of competing foreign products; and it should be manifest to all that the new prosperity tariff does not give the full opportunity to our own home producers that protectionists would like to see them enjoy.

It will be noted, however, that, in the items of crude materials for use in manufacturing, foodstuffs in crude condition, and food animals, foodstuffs partly or wholly manufactured, and manufactures for further use in manufacturing, are to be found four-fifths of our imports, and that, after all, only one-fifth actually constitutes manufactures ready for consumption. Four-fifths of our imports contribute to further uses, at least part employment by our own people, before they become manufactures ready for consumption, and only one-fifth imports all ready for consumption. The more one analyzes the prosperity tariff the more one admires it.

As a matter of real fact, the existing prosperity tariff is one that should carry joy to both protectionists and free traders, because it has accomplished what each so strongly desires; that is to say, it has been the active cause of putting the idle in the United States to work at steady and high wages, with all of the material blessings that flow from such a condition; and it has so greatly increased our imports, even of competing foreign products, as to mollify all but the most rabid of free traders—but there are so many free traders who are rabid!

Senator JONES of Washington truly says:

> The need of protection is greater now than ever before.

And Representative FREE, of California, with equal truth declares:

> The recent tariff act, in my judgment, has been a great blessing to the country.

Representative LINEBERGER, also of California, thus epitomizes the situation:

> In order that the necessity of adequate tariff legislation may be kept before us as a people, a continuous and consistent educational campaign must be waged. The effect of the tariff of 1922 speaks for itself more eloquently than I or anyone else could speak for it. Prosperity reigns, and the American workman and the American producer and manufacturer, both equally codependent, are enjoying widespread employment and prosperity, both fundamental requirements for the social and economic well-being of the United States.

EXPORTS INCREASE UNDER PROTECTION

The important fact must not be overlooked that our exports increased 12 per cent during the 18 months as compared with the preceding 18 months of nonprotection. This, too, is an accomplishment that our free-trade Democratic friends predicted was an impossibility. Our protective tariff, they declared, was tantamount to an announcement to the world that we desired isolation; that we were enough unto ourselves; that our tariff duties would hereafter be too high to enable our people to buy abroad; and, as a consequence, we should find that we could not sell abroad if we did not buy. But, having increased our imports 41 per cent—having shown our free-trade Democratic friends how wrong they were in respect to imports—they are prepared, of course, for proof that they were wrong, too, in respect to our exports. Instead of these shrinking, as was predicted, they have expanded instead. What a sorry lot, to be sure, free-trade and semifree-trade Democrats are as forecasters of the consequences of the adoption of what has proved to be our prosperity tariff.

Democrats should sit in sackcloth and ashes in order to expiate the errors they committed in discussing the "robber tariff." But, blithely, notwithstanding they purpose, so it is said, to "make an issue of the tariff"! If that be so, I can only say that their hardihood is only equaled by their assurance. Plenty of Republicans will be around with the figures to refute their misstatements, besides which a splendid opportunity will thus be given to Republican protectionists to refute free-trade Democratic misstatements and to let the people know just how they have benefited, are now benefiting, and are sure to continue to benefit under our splendid prosperity tariff.

CUSTOMS REVENUE GAINS UNDER PROTECTIVE TARIFF

Even though I may be charged with repetition, I can not conclude my remarks on the prosperity tariff without again adverting to, with a view to emphasizing, the extremely important increase in customs duties during the first 18 months of the prosperity tariff as compared with the last 18 months of the semifree trade-blighting tariff of our Democratic friends. The study of these customs returns is something that people of all shades of economic thought should rejoice in, free traders as well as protectionists, because revenue is so badly needed just now in order to keep down taxes. So I ask our friends again to note that during the 18 months preceding the enactment of the tariff under which prosperity is so general, so widespread, and so deep-rooted we collected in round figures the tidy sum of $562,000,000 from customs duties while during the 18 months the prosperity tariff has been in effect we have collected no less than $859,000,000, an increase of 52.8 per cent. That is the crown, the capstone of the prosperity tariff. What on earth can our free-trade Democratic friends say about that? Can they, will they, dare they attack a measure that has yielded more than 50 per cent increase in needed revenue while at the same time prosperity has taken the place of adversity, and especially with employment offering for everyone who wishes to work, and at wages that outrank, individually and collectively, anything this country—or, for that matter, any country—has ever known?

I wholly agree with my friend Representative HICKEY, of Indiana, who says:

> I know of no organization or agency that has had more to do in stimulating interest in the protective system than your organization—the American Protective Tariff League. You should have the support of everyone interested in a protective tariff.

And my other friend, Representative FAIRFIELD, of Indiana, who says:

> No better evidence of the value of an adequate protective tariff could be given to the country than the prosperity which developed almost immediately all over the country upon the passage of the tariff act.

Never in the history of American tariffs—free-trade or protective—has there been such customs collections as have been known under the Fordney prosperity tariff of 1922. Put a pin in there. We all know how greatly revenue is needed in order to moderate the rigor of our war taxes. The people are to enjoy a cut of 25 per cent in their income taxes. What enabled the Government to make that reduction? The receipts—the increased receipts—from the new prosperity tariff.

So we have a prosperity-engendering, an employment-begetting, a revenue-producing, a tax-reducing Republican protective tariff to be thankful for and to hold fast to if we have good sense and proper appreciation of the benefits we enjoy.

Representative VESTAL, of Indiana, says it this way:

> To understand the tariff means to be in favor of the protective policy.

And Representative GREEN, of Iowa, says it like this:

> We begin the year 1924 with renewed assurances of the value of the new tariff. Under its influence the wheels of every factory are turning, there is employment for everybody at higher wages than ever before in peace times, the railroads never carried so much freight, our exports and imports are about double what they were before the war, and the revenue received from our customs duties are twice as much as any Democratic tariff bill ever produced in normal times. All this has been done notwithstanding the free list has been greatly increased over that of any tariff bill, as the average rate of the Fordney bill on all goods imported is only a little over 15 per cent, while under the Payne bill they were 20.61 per cent and under the Dingley bill 25.45 per cent. The new tariff is a phenomenal success.

Representative FROTHINGHAM, of Massachusetts, says:

> If there was ever a time when a tariff act was necessary for this country it was after the World War, when without such a measure this country would have been flooded with cheap goods. The revenues received from this measure exceed the predictions of its fondest admirers.

Former Representative Fordney, of Michigan, author of the prosperity tariff, says:

> The need of an adequate tariff is imperative. Its operation has proved its necessity. Upon its maintenance depends the success of the farm, the factory, and labor employed therein.

Representative PAIGE, of Massachusetts, makes this timely remark:

> The textile industries in Massachusetts are suffering to-day from the high price of cotton, which makes it impossible for manufacturers to produce goods at the price they are being sold. This is not the result of the tariff, but is the result of a short crop of cotton and one of those things that occur frequently. Generally speaking, the

industrial conditions of the country are highly prosperous. The price of cotton and the mild season we have had has prevented a free movement of merchandise, which the enemies of protection will claim is the result of a protective tariff. This is all nonsense. Without the protective tariff our industries would be stagnant, and with the present tariff foreign goods are coming into this country in vast quantities, and I think in many instances the rates should be raised instead of lowered, if we desire to protect the industries all over the country.

Things are not all they should be in the cotton-manufacturing business, especially in Massachusetts, but I am convinced that the tariff is not to blame, as so many of our free-trade Democratic friends, looking around for bricks to throw at the prosperity tariff, would be too ready to say. For example, during the 18 months preceding the adoption of the present protective tariff we imported cotton manufactures totaling $179,652,879, and during the 18 months the prosperity tariff has been in effect our imports of cotton manufactures totaled in value $202,835,045, an increase under the protective tariff of $23,182,166, or not quite 13 per cent, and it should be remembered that the increase in all dutiable imports, of which manufactures of cotton are a part, was 56 per cent. Again, during the 18 months that immediately preceded the enactment of the prosperity tariff we exported cotton manufactures valued at $133,525,843, while during the 18 months immediately succeeding the enactment of the protective tariff our exports of cotton manufactures totaled in value $184,810,500, an increase of $51,284,657, or more than 36 per cent, although, it should be remembered, our total exports increased but 12 per cent during the same period last named.

Representative BACHARACH, of New Jersey, sees it in this way:

The splendid results in our foreign commerce, our increased customs receipts, and in general prosperity of American industry clearly justify all that was claimed for the Fordney-McCumber tariff law, and demonstrates the wisdom of the Republican Party in its policy of an adequate protective law.

And Representative LEHLBACH, from the same State, gives this well-deserved testimonial to an organization that constantly works for an adequate protective tariff:

The American Protective Tariff League is performing a splendid service in disseminating information regarding the workings of the present tariff law, and in correcting the distortions and misrepresentations of its opponents. In so doing it is not only strengthening the Republican Party, the champion of protection, but it is to this extent insuring the prosperity and well-being of the country.

Representative MACGREGOR, of Buffalo, N. Y., also pays this tribute:

There never was a time in the history of the country when a protective tariff was more necessary than at the present time, and I congratulate the league on its willing patriotism and efficient work in bringing tariff truths to the attention of the voters.

If I have not already given convincing proof of the great contribution to the national welfare in the enactment of the prosperity tariff, then I have failed completely in what I have undertaken. But how can that be possible, when the effect of that tariff during the first 18 months of its operation—the whole period of which we have record of its operation—has been to increase our nondutiable imports 31 per cent, our dutiable imports 56 per cent, and our combined free and dutiable imports 41 per cent; and during the same period this same prosperity tariff has increased our exports 12 per cent, and the collections from customs duties more than 52 per cent, as compared with the 18 months immediately preceding the enactment of this prosperity tariff.

Perhaps what I have said will not change free traders into protectionists, but it should stay the hand of any protectionist when he comes to vote next November from helping by his vote to return to power the party that would restore a semifree-trade tariff, such as was in partial effect during the 18 months preceding the enactment of the existing prosperity tariff. No protectionist who claims a valid right to the title will be justified in voting against any representative of the party of protection at the coming election. And this I feel sure of: Whoever does, by his vote, help to restore to control of the Government those who stand for free trade, or as near to free trade as they dare make a tariff for revenue only, will bitterly regret their action, if the total result thereof actually does restore to power the party of free trade, because they and the country as a whole will suffer as a consequence of such restoration.

The Lone Star State does not send a great many protectionist Representatives to Congress, but it does so occasionally, and when it does it generally sends one who is a credit to his State, to his party, and to himself. Such a Representative is in this body now from the Lone-Star State, who has sound views on a protective tariff, a sample of which it is my pleasure to present from the lone protectionist (Republican), Mr. WURZBACH, of Texas:

I have the very strong impression that during recent years protective-tariff advocates, and the Republican Party in particular, are not making an appeal to the wage earners on the merits of the protective policy and who are the greatest beneficiaries of that policy. This was not so in the days of President McKinley. It seems to me that we are losing touch with that great class of American producers. The "full dinner pail" argument could be made just as effective now as it was not so many years ago.

The wage earners of the country are strong for a restrictive immigration policy, and the same arguments they make against immigration on economic grounds and as affecting their wage scale and standard of living can be effectively made against the nonprotective policy of the Democratic Party.

Representative COLTON, of Utah, has this to say:

More than any other factor, in my opinion, the tariff has been the means of restoring the West to normalcy. Our stockmen were nearly all broke and our farmers thoroughly discouraged. While there is still a bad situation in agricultural lines, yet matters are improving every day. The sheep industry has been saved, the alfalfa seed has become one of our great products, and the mines are nearly all running at full capacity. This condition in a large measure can be traced directly to the enactment of the tariff law.

Representative WINTER, of Wyoming, contributes the following:

There is great necessity of special continuous effort from this moment on in order to prevent a reaction to Democratic low tariff or free trade in the next election. There will be a vicious attack made on the party of the protective tariff in the coming campaign. We must remind and reeducate and instruct the people and the new voters from this time on.

I wish to close what I have to say just now on the subject of the existing prosperity tariff with a quotation from a statement made by John T. Adams, of Iowa, the retiring chairman of the Republican National Committee, a splendid protectionist and a Republican to be proud of. He said:

The Fordney-McCumber tariff act in its first year's operation demonstrated that it protected American production and at the same time brought more revenue into the Treasury than was ever before realized from customs taxation. The report of the Secretary of the Treasury shows that the customs receipts for the fiscal year 1923 were $562,189,039, exceeding the receipts of the previous year by $204,644,327, under the Democratic policy of "a tariff for revenue only."

The import and export figures presented in the Secretary's report show that while giving protection to our own producers the new tariff law did not restrict our foreign trade. The imports during the fiscal year 1923 were valued at a billion and a quarter more than those of the preceding year and the exports at nearly $4,000,000,000, and an increase of $185,896,336 over the fiscal year of 1922. The balance of trade in favor of the United States was reduced from $1,163,172,589 in 1922 to $175,818,789 in 1923.

All lines of business and industry in this country have grown under the operation of the new law with a steady increase of employment at the highest wage ever known, and the revival of manufactures with the great volume of earnings has increased the home market for the products of agriculture so as to spread prosperity over the whole country.

The friends of the principle of protection should be vigilant during the next year with the demonstration of the great effect of that principle brought vividly and effectively to the minds of all the people.

Former protective tariffs have been repealed not because they failed to do that which was promised but because after exerting themselves to put it on the statute books the friends of protection ceased their activity. This is the time when all believers in protection should redouble their efforts to sustain the party that has always stood for that principle, so retaining the present tariff laws and maintaining the present prosperity in industry, agriculture, and business.

## THE REVENUE ACT OF 1924

Mr. GREENWOOD. Mr. Speaker, the revenue act is probably the most important legislation that has been passed by the Sixty-eighth Congress, because it reduces the tax burdens of almost 4,000,000 citizens who pay income taxes and many more who pay excise taxes. When Congress assembled in December, 1923, we found a cash surplus in the Treasury of the United States of about $360,000,000, and knowing the people needed relief from the tax burden that had prevailed since the World War, practically all Members of Congress wanted sweeping reductions, and the only question in their

minds was the adjustment of the rates and where the substantial cuts should be made.

The Federal Constitution confers on the House of Representatives the authority to propose revenue measures, but much to the surprise of the Congress when they assembled it was found that the Secretary of the Treasury had proposed a bill commonly called the Mellon plan, and with the help of the metropolitan newspapers and the moving picture shows had proceeded to sell this plan to the country as the only model plan under which the people could have substantial tax reductions. Many people not understanding the details of a tax law fell for this selfish propaganda, but Congress was courageous enough to stand between Mr. Mellon, his cohorts, and the people and have proceeded to give the people a better tax reduction law than the Mellon plan. The metropolitan newspapers, like Mr. Mellon, pay incomes in the higher brackets, and Mr. Mellon with fine political strategy proposed the elimination of the excise tax on admissions to the movies and thereby received their educational influence, but forgot many classes who had equal claims for reductions of excise taxes.

The boldest and most unjust suggestion of Mr. Mellon was that the surtaxes in the higher brackets should be reduced one-half, viz, from 50 per cent down to 25 per cent, and this proved the bone of contention against which many of the Republicans entered their protests the same as the progressives and Democrats, so that at no time could the Mellon plan muster in its support more than one-fourth of the total vote of the House, and upon final passage of the present law only 9 votes in the House and 6 in the Senate were the total that could be found against the present bill. Mr. Mellon had the support of President Coolidge until after passage of the present law, and by a veto the President could have tested the strength of the Mellon plan, but decided not to stand pat on the Mellon plan.

While Mr. Mellon proposed to reduce surtaxes 50 per cent, at the same time he advocated a reduction of only 25 per cent on the normal taxes of the large numbers of the smaller taxpayers. Taking the total taxpayers under the former law for the year 1921, which was 6,662,176, there would have been benefited under the Mellon plan a total of 6,109 more compared to the old law, while under the present Simmons law there will be greater benefits accruing to 6,656,067. Should a Congressman represent the 6,000 or the 6,000,000? In Indiana on the same basis of 1921 taxpayers, totaling 150,300, 52 would have been benefited more by the Mellon plan, while 150,248 will be benefited more by the law that Congress passed. As an Indiana Congressman I preferred to vote for the law that would benefit the 150,248 rather than the 52, none of whom, so far as I know, live in my district. Lincoln once said:

> God must have loved the common people the most, as he made so many more of them.

Congress has withstood the severe denunciation of the large newspapers, the ridicule and characterization of the cartoonist, and the misguided criticism of chambers of commerce and others pulling for the classes, and has stood by the masses and enacted into law a revenue bill constructive in character and much superior to the Mellon plan. Although this bill was framed by men like WILLIAM GREEN, of Iowa, JOHN N. GARNER, of Texas, JAMES A. FREAR, of Wisconsin, and others who have served on the Ways and Means Committee of the House for 20 years and more, even before Mr. Mellon and Mr. Coolidge were known in American politics, yet the newspapers have continued to picture the executive department as the council of wise men and Congress as an aggregation of dishonest politicians. The credit for this legislation should be credited to courageous individuals in both Houses of Congress and not to a political party. Party lines broke down and the best law was enacted, and I propose now to analyze some of the merits of the new revenue law.

They say the present bill is not scientific, yet the administrative features of the law desired by the Treasury Department have been incorporated into the new law, thereby making many improvements. The plan proposed by Mr. Mellon did not give the 25 per cent reduction on the current taxes for 1923 payable this year. Mr. Taxpayer, when you receive this rebate this year you can thank Congress for that, as Mr. Mellon was thinking about surtaxes. The exemption for each dependent in the new law still remains at $400 per capita, and if your income runs over $5,000 you will not be held down to a married person's exemption of $2,000, but will be allowed the same as the person with income under $5,000, namely, $2,500. Is not this scientific, to place both upon an equality? And you can thank Congress for that equality of treatment. Instead of your normal taxes being 3 per cent on net income under $4,000, as proposed by Mr. Mellon, your rate will be 2 per cent; and instead of it being 6 per cent on net incomes between $4,000 and $8,000, as proposed by the Mellon plan, it will be 4 per cent under the present law, and Congress, instead of Mellon and Coolidge, should be thanked for this reduction.

In appraising the present tax law keep in mind the reductions in excise taxes, as follows: That all tax is removed on telegraph and telephone messages, admission to the moving-picture shows up to 50 cents, on soft drinks, candy, theater, and circus tickets, hunting and sporting goods, jewelry in value under $30, watches under $60, ordinary priced carpets, rugs, and traveling luggage, license fees of produce brokers, stamps on notes and bills; and the tax on automobiles, trucks, and wagons under $1,000 entirely exempt, and a cut of 50 per cent on auto parts; likewise all gifts and estates under $50,000 are entirely exempt. The cuts and exemptions are all just and accrue to a great number of people upon whom the tax burden was keenly felt.

The present bill provides for publicity of returns, for examination of returns by committees of Congress and taxing officers of the States, and this feature was strongly opposed by the Treasury Department. Congress believed that since the taxpayer in the States had to list and make oath to his assessment, and the same was made a part of the public records, that a similar provision was equally just as to Federal taxation.

The Secretary of the Treasury, supported by those who possess large estates, opposed the gift and inheritance provisions of the present law. These estates arose from monopoly, exploitation of natural resources, increased value of vested holdings in property created by the growth of communities, with organization and centralization of business, all under the beneficent protection of a stable government; and it seems most just that when death comes to the possessors of these vast fortunes the Government should be entitled to its toll to perpetuate its peace, progress, and safety of the whole society. This policy dissipates these large holdings and estates and takes them back to society without taking the taxes from the current year's operating expenses of the particular business and thereby crippling the business. The death of the possessor becomes the adjusting and distributing period, and carries a portion of these vast estates and wealth back to the people. These taxes begin at $50,000 and are graduated upward.

Now, Mr. Taxpayer, as to some of the details of this new revenue law. Under the old law your surtaxes began at $6,000, whereas under the present law surtaxes begin at $10,000 with 1 per cent and are graduated upward to a maximum of 40 per cent on incomes over $500,000. Here was the bone of contention, and if Mr. Mellon and his colleagues could have dictated this particular schedule all would have been well, as they wanted a flat reduction of 50 per cent from the present rate of 50 per cent down to 25 per cent as the maximum rate on incomes of $500,000 and upward.

In addition to the other advantages of the present law in favor of the small taxpayer, there is allowed a deduction of 25 per cent on earned net incomes up to $10,000, being on items of compensation for personal services, such as wages, salary, fees, and earnings from the store, shop, and farm, and all net incomes under $5,000 are defined by the law as earned incomes. This favors incomes from personal services actually earned as distinguished from interest, rents, dividends, and similar items, allowing an advantage of 25 per cent on the normal tax to the business man, professional man, farmer, storekeeper, and others whose earned incomes are under $10,000. Let the smaller taxpayer study this little table for a comparison of income taxes calculated upon earned incomes of a married person without other dependents than wife or husband and observe the relative taxes to be paid under the old law, the Mellon plan, and the present law, to wit:

| Net income | Tax under the old law | Tax under the Mellon plan | Tax under law of 1924 |
|---|---|---|---|
| $3,000 | $20.00 | $15.00 | $7.50 |
| $4,000 | 60.00 | 45.00 | 22.50 |
| $5,000 | 100.00 | 75.00 | 37.50 |
| $6,000 | 160.00 | 120.00 | 57.50 |
| $7,000 | 240.00 | 180.00 | 87.50 |
| $8,000 | 320.00 | 240.00 | 127.50 |
| $9,000 | 400.00 | 300.00 | 167.50 |
| $10,000 | 480.00 | 360.00 | 207.50 |

Will you in conclusion bear in mind that there are 3,417,626 taxpayers, according to the 1922 returns, whose incomes are under the $10,000, while there are incomes of only 172,350 taxpayers whose incomes exceed $10,000.

Some honestly, no doubt, contend that lower surtaxes will bring money invested in nontaxable securities out into the channels of active business. I ask, who will buy these securities? The money of other American taxpayers; and this is taking out of one pocket and placing it in another. Have you ever considered that the large savings of taxes under the new law, which affects so many, leaves these earnings among the people in the local communities, where it will be used to promote local prosperity? There is but one just conclusion, and Congress should be given the benefit of that conclusion—that the revenue law of 1924 is a great piece of constructive legislation, made in the interest of all, while favoring the smaller taxpayer, while the plan proposed by Mr. Mellow was intended to specially favor the rich. The final observation concerning this legislation is that Congress did not surrender its authority and constitutional duty to propose and enact a revenue law and did not succumb to a gigantic false propaganda, but gave the whole people a superior law to the one proposed by the Secretary of the Treasury, and the actuaries of the Treasury Department have made calculations and reported that the new law will raise the revenue necessary to operate the activities of our Government, will pay the soldiers' compensation, and leave a surplus in the Treasury. Congress has kept the faith with the people.

FLAG DAY

Mr. PHILLIPS. Mr. Speaker, under the leave granted to extend my remarks in the RECORD I include the following:

FLAG DAY ADDRESS BY THOMAS W. PHILLIPS, JR., JUNE 14, 1924, BEFORE THE RICHARD BUTLER CHAPTER, D. A. R., OF BUTLER, PA.

On July 2, 1776, the Continental Congress "resolved that these United Colonies are, and of a right ought to be, free and independent States."

On July 4, 1776, the Declaration of Independence was adopted by the Congress.

On June 14, 1777, 147 years ago to-day, Congress resolved "that the flag of the thirteen United States be 13 stripes, alternate red and white; that the Union be 13 stars, white in a blue field, representing a new constellation."

In 1791 Vermont was admitted to the Union and in 1792 Kentucky became a State, and in 1794 Congress ordered "that from and after the 1st day of May, 1795, the flag of the United States be 15 stripes, alternate red and white, and that the Union be 15 stars, white in a blue field."

From 1796 to 1818 five additional States were admitted, but no official change was made in the flag. It became evident that each new State could not be represented by a stripe so the final act to establish the flag of the United States was approved April 4, 1818, as follows:

> "SECTION 1. *Be it enacted, etc.*, That from and after the 4th of July next, the flag of the United States be 13 horizontal stripes, alternate red and white; that the Union have 20 stars, white in a blue field.
>
> "SEC. 2. *And be it further enacted*, That on the admission of every new State into the Union one star be added to the union of the flag, and that such addition shall take effect on the 4th of July next succeeding such admission."

In these few paragraphs is contained the skeleton, the outline, the chronology of our flag. But our flag is more than an inanimate or inarticulate skeleton; for, as a symbol of unity, liberty, equality, fraternity, it speaks to us as one having flesh and blood and mind and heart and soul. It is the embodiment of valor and virtue, of hope and happiness, of justice and judgment. It is the fulfillment of the visions of the patriarchs and prophets of the ancient world. It is the outgrowth of ethical teaching proclaimed in Palestine long centuries ago. It is the consummation of principles for which the patriots in all ages have fought.

That for which Old Glory stands can not be appraised or appreciated; it can not be painted by word or portrayed by brush; neither can it be woven of threads of wool and silk or of silver and gold, for it is an ideal, an emotion, an inspiration.

We revere it because it wintered with Washington at Valley Forge. We honor it because it protects our homes. We cherish it with loving devotion, because it is our hope for future years.

As Daughters of the American Revolution you are familiar with the trials and triumphs of our ancestors. You know the American flag is to-day flying over a united country, a country which can best be described as a land of opportunity because a noble race counted not the cost but paid the price. Bleeding men, weeping women, and crying children paid that price through sacrifice, sorrow, and suffering. Theirs was the glory, ours the gain; but duty did not die, disintegrate, and disappear with their dust. If liberty is to live, each succeeding generation must give the spirit of liberty a new birth, a new baptism—if need be, a baptism of blood.

"Eternal vigilance is the price of liberty," for liberty may be lost in time of peace as well as in time of war and must be defended by brain as well as by blood. Our Government has drifted into troubled waters and toward uncharted seas. Our flag, with its stars and stripes, signifies a union of sovereign States; but sovereign State to-day has little more than historical significance. Ours was a government of laws, which bureaucracy is turning into a government of men. Our fathers detested tyranny, but we are placing irritating restrictions on private business and private affairs. Our ancestors fought to be free from unjust taxation, but no enlightened nation has ever subjected its citizens to the unnecessary, unjust, and inequitable taxation which is imposed upon us. Formerly we followed the precept that "the best-governed people are the least governed." Our present policy is to enact laws so numerous and nonsensical that soon all, not through choice but of necessity, must become lawbreakers, thereby merging into a new, a common democracy, a single class, a criminal class. By condoning these innovations or conniving at further alterations in the basic principles of our Government we encourage those who seek to stamp out the tricolor and replace it with one color, the red of riot, revolution, and ruin.

It requires initiative, ingenuity, energy, and industry to construct, but only indifference to corrupt. Popular rule, upon which our principles of Government rest, implies popular interest and intelligent participation, but not so much for the purpose of expanding the activities and increasing the burdens of the State as to restrain those who would use the people to serve the State rather than utilize the State to serve and protect the people. Laws should serve to mark out the pathway to a life broad and abundant, rich, and replete in good will and in all good works rather than seek to restrict, restrain, and repress the God-given desire for individual independent expression and development. Paul spoke in the light of history and with a marvelously intimate understanding of human nature when he said "The letter killeth, but the spirit giveth life."

It is right, it is fitting for the Daughters of the American Revolution and other patriotic organizations to erect historic monuments, to keep alive the traditions of the past, to elevate the standard of citizenship by commemorating the praiseworthy deeds of former generations, and to keep green their memory by song and story, but the best tribute that can be paid to our worthy ancestors is to preserve the form of government which their flag and our flag typifies and to perpetuate their noble qualities through a lineal upright posterity. The Colonial and Revolutionary stock is disappearing because unworthy descendants will not pay the price necessary for its preservation. If our respect for ancestry exceeds our love for posterity, the future belongs to others.

You are to be congratulated, not because your accidental or providential birth has made you eligible to become a member of this honorable body, but you and I and all those now living and all those who are to come after us are to be congratulated because you have been willing to assume and discharge a most sacred obligation. In a word, it is your duty and your obligation to teach the children, who will soon take up the tools with which we work and the tasks which we must now perform that all we hold most dear, all that makes life worth while, all our civil and religious liberties were blood bought, were purchased for a great price, and that even as it is our duty now it will in time be their duty to not only love our institutions, not only cherish our institutions, but to preserve our institutions in their perfect symmetry.

"As he thinketh in his heart, so is he." The coming generations must be taught to think right if they are to do right. Doctrine must precede duty; but instruction is imparted by demonstrations, not by declarations; by performances, not by professions; by results, not by resolutions.

The flag typifies American patriotism, American performance, American progress. Flag Day lends itself most appropriately to the teaching of those traditions and the implanting of those ideals of which you Daughters of the American Revolution, are natural guardians—foster mothers.

SIX MONTHS AND THREE DAYS IN CONGRESS

Mr. WATKINS. Mr. Speaker, there is an unwritten rule of Congress to the effect that new Members "should be seen and not heard." From the manner in which Congressmen absent themselves one would conclude that another rule obtains to the effect that old Members "should be neither seen nor heard." Both are wrong, and that Member who subscribes to them is false to his constituency and unfit to be a Congressman.

During my campaign for Congress my enemies stated that I would not be able to accomplish anything, that I would be unknown and unheard of in Congress, and that I would not get a single committee assignment of any value; whereas I promised results and advocated, among other things, selective and restrictive immigration, adjusted compensation, tax reduction, child-labor prohibition, hospitalization for all veterans, increase

and readjustment of pay for postal employees, and adequate pensions for veterans of the Civil War, Indian wars, and the Spanish-American War.

On taking my seat six months ago, after a strenuous fight a place on the Immigration Committee was won, destined to be the most important committee in Congress and at that time the most sought for in the House of Representatives. By virtue of that assignment the opportunity was afforded me to help write and pass the very measure urged in my campaign, namely, a selective and restrictive immigration law, which for its constructiveness and comprehensiveness is unequaled. In the fight for this legislation I made several speeches and also took a leading part in guiding the measure through the committee and the House, incurring by my aggressiveness the hatred of every enemy of America and those alien to our institutions.

Pending before this same committee are several bills introduced by me which, when enacted into law, will solve our naturalization difficulties as well as cause the deportation of every criminal alien within our borders. I shall battle for these measures until they are enacted into law.

My second accomplishment is rooted in soldiers' legislation. I introduced the first adjusted compensation measure in this Congress; appeared before the committee in support of this legislation; made speeches on the floor of the House; voted for its passage and finally helped to pass it over the veto of the President. Furthermore, my bill for general hospitalization for veterans of all wars and for the decentralization of the Veterans' Bureau became and is a part of the omnibus bill passed by Congress this very week.

In pension matters for Spanish-American War and Civil War veterans and increased compensation and better hospitalization for World War veterans much time and effort have been given to the general satisfaction of claimants.

My third campaign pledge was fulfilled when with the help of the progressives of both parties the resolution to amend the Constitution so as to prohibit child labor was reported out. In support of this measure I made a speech and actively assisted in its passage.

Everything within my power was done toward relieving Oregon taxpayers. I actively and substantially helped in securing repeal of the nuisance taxes on telephone messages, telegrams, and candy, and farmers selling their own produce in public markets; total elimination of excise taxes on all surgical instruments, eyeglasses, musical instruments, silver-plated flat tableware, and watches under $60; a partial reduction of excise taxes on automobiles, automobile parts, tires, tubes, and accessories, and admissions to theaters.

I believe that further reduction of income taxes is possible and that all excise taxes should be repealed. These things can be accomplished by rigid economy in governmental expenditures, which I shall continue to advocate.

The Howell-Barkley bill was taken from the Interstate and Foreign Commerce Committee by the petition of 150 progressive Republicans and Democrats. I was the only Member from Oregon on the petition and thereafter the only one from my State favoring and voting for this measure. This is the bill the late President Harding advocated and favored.

A veterans' hospital for Portland is practically assured. General Hines stated that if the general hospitalization bill passed—and it did—there would be a need in Portland for a hospital. Hon. MARTIN MADDEN, chairman of the Appropriations Committee, and the most powerful and influential man in Congress, has promised me to look into the matter and do what he could for Portland. Knowing that a hospital is justified, with the assurances already given, I am certain that the next Congress will authorize a hospital in Portland.

In addition to the accomplishments delineated heretofore, I have actively participated in the general debates on the floor of the House on matters in general, and the following in particular: Alaskan fisheries bill; Crater Lake appropriation, securing $238,000 therefor; securing a $25,000 appropriation for widening and deepening the channel in the Columbia River from the mouth of the Willamette to Vancouver; fixing auctioneers' fees in sale of Army goods not to exceed $100 a day, thereby preventing huge graft heretofore prevailing; secured promise of Major Putnam, of the Lighthouse Service, to include in the next budget the sum of $100,000 for improving the aids to navigation in the Columbia River; made speech condemning excessive and exorbitant profits; aided in adopting measure to create prohibition bureau, thereby insuring better law enforcement; testified in favor of and urged the passage of the Dill bill in the interest of radio broadcasting and musical concerts; aided in passage of Clarke reforestation bill and the Federal aid road bill; active in support of McNary-Haugen bill and much time spent in departmental matters on private claims, pensions, and the like; helped to secure increased appropriation for proper enforcement of immigration laws; and actively aided in passing war minerals relief act.

Finally, I voted against adjournment until relief for agriculture and other equally important legislation had been placed on the statute book.

I now have pending in Congress the following bills: The Columbia River power act, which provides for the development of water power, irrigation, and reclamation and fixation of nitrogen, with dams to be constructed at Celilo Falls and at Umatilla Rapids; a bill to create a department of education along the lines of the Sterling-Reed bill, but without its objectionable features; a bill for the deportation of all criminal aliens; a bill for the convening of Congress immediately after election; a bill to erect a 12-story Federal building in Portland; and a bill for a veterans' hospital in Portland. If Oregon will get behind these measures, their enactment into law is assured.

I have labored night and day in the interests of the people of my district, my State, and my country and without question have fulfilled my promises and kept the trust given me. I challenge anyone to show wherein I voted contrary to the interests of the people of my district; not only that, but I challenge anyone to show wherein I voted wrong.

I came to Congress dedicated to the proposition of voting and working not as a party man but as an American; I shall continue this course as long as I am in public office.

EVERYBODY PROSPERS BUT THE FARMER—WHY?

Mr. THOMAS of Oklahoma. Mr. Speaker, we are now in the closing hours of this the first session of the Sixty-eighth Congress. We have been in continuous session for over six months; and now that the adjournment hour is approaching it may be of interest to make a brief survey of the conditions confronting the country, of what has been accomplished by this Congress, and what, if anything, can be done to bring relief to agriculture, the one great basic industry now suffering as never before in the history of the country. We have in the United States some six major or basic industries, as follows: Finance, manufacturing, transportation, commerce, labor, and agriculture.

A survey, based upon official and authentic reports, shows that a number of these great industries have and are enjoying unprecedented prosperity, while agriculture languishes and bankruptcy and ruin, like a hideous monster, stares millions of our citizens in the face.

Industries which are organized, without exception, are prosperous. Finance, represented by the big banks of the larger cities; manufacturing, represented by the great industrial combinations; and transportation, represented by the great railway systems, have no cause for complaint and are demanding that "well enough" should be let alone.

Without elaboration, let me call attention to the present condition of organized industry as reported by the Wall Street Journal, a New York City publication, reflecting the condition of the Nation's business. The following headlines tell in brief the story:

February 2, 1924: New Haven shows its earning ability—Reduces operating ratio to 75 per cent—Best net in 63 months—Repaid management's efforts.

February 2, 1924: Southern had its best year in 1923.

January 25, 1924: Shareholders had a profitable year.

August 6, 1922: Rail income high first half year—Nearly all carriers indicate better results for 1923 than obtained in 1922.

January 15, 1924: North American does well in 1923—Gross increase $19,000,000—New properties acquired 77 per cent of net derived from electric sales—North American has just completed one of the most successful years in its history. * * *

August 1, 1923: Big increase in Steel's earnings—Net profit reported for second quarter is $47,858,181, against $34,780,069 in previous quarter.

August 2, 1924: Prosperity shown by big earnings—Many concerns reporting show full year's dividend earned in six months, some in quarter.

On April 21, 1924, the Associated Press carried a story under the following headlines:

Railway lines show increase in net profits—Santa Fe, Rock Island, both realize bigger earnings in 1923 over 1922.

Wall Street Journal, March 14, 1924: Why George Baker's bank pays 30 per cent—First National Bank, New York, has many hidden assets—Big investor in securities—Stock scarce.

"Well, I see George Baker has gone and done it again." This was the comment in financial circles when it was made known on Tuesday that First National had declared a quarterly dividend of $15, placing the stock on a 60 per cent annual basis.

During the past few years the larger banks have prospered as never before. Since 1914 the number of banks has increased from 26,800 to more than 30,100, and their combined deposits have increased from some $19,000,000,000 to more than $40,000,000,000.

The larger banks are the ones prospering most in proportion. The 25 larger banks in 1914 had combined deposits of $2,620,100,000, and now their combined deposits are $6,785,400,000.

The following table shows the growth and prosperity of a few of the great banks of the United States during the past 10 years:

| | Deposits | |
|---|---|---|
| | 1914 | 1923 |
| National City Bank, New York | $260,700,000 | $756,700,000 |
| Guaranty Trust Co., New York | 211,100,000 | 491,900,000 |
| Continental and Commercial National Bank, Chicago | 155,700,000 | 379,800,000 |
| Bankers' Trust Co., New York | 140,400,000 | 312,100,000 |
| National Bank of Commerce, New York | 134,100,000 | 426,600,000 |
| Chase National Bank of New York | 126,200,000 | 466,300,000 |
| First National Bank, New York | 108,800,000 | 325,200,000 |
| National Park Bank, New York | 102,700,000 | 167,800,000 |
| Hanover National Bank, New York | 98,400,000 | 170,100,000 |
| Mechanics and Metals National Bank, New York | 89,200,000 | 252,200,000 |
| National Shawmut Bank, Boston | 56,900,000 | 137,400,000 |
| Corn Exchange Bank, New York | 82,200,000 | 214,100,000 |
| Equitable Trust Co., New York | 75,500,000 | 270,500,000 |
| First National Bank, Boston | 75,500,000 | 175,500,000 |
| American Exchange National Bank, New York | 63,400,000 | 153,600,000 |

On February 27, 1924, the Wall Street Journal gave some reasons for this great prosperity; and among others set forth the following:

Easy money with Federal reserve banks showing ratios of 81.4 per cent against 75.8 per cent a year ago, and New York Federal Reserve Bank 87.8 per cent against 79 per cent a year ago.

Record gold holdings which could be employed when the right time comes for placing European countries on a sounder business and financial foundation.

Steel corporation operating ingot mills at 94 per cent of capacity.

Railroads prosperous and taking 30 per cent of all the steel produced.

Unusually large cash holdings of the important industrial corporations.

Generally, mills, factories, and furnaces are active.

This prosperity that has been so widely advertised and which we have heard so much about is the prosperity of the larger banks, the prosperity of the railways, and the prosperity of the organized and protected manufacturing concerns.

Now, permit me to call your attention to another picture; the picture of agriculture; the picture of the American farm and its proprietor, the American farmer.

The Congress has just adopted a resolution declaring agriculture a basic industry, thinking, or perhaps hoping, that this recognition of the great industry would satisfy the millions of our citizens who live and have their being upon the farms of the Nation.

Among all our great industries farming or agriculture, judged from any standpoint, should be the "biggest business" in America.

Agriculture embraces some 6,500,000 farms and practically the total area of our country; claims 33,500,000 of our population as residents of the farm; and values its possessions at over $85,000,000,000, or almost one-third of our national wealth.

Railway managers claim that their business is the "big business" of the country, but railway valuations are less than 25 per cent of the valuation of the farms.

Bankers point with pride to their industry, and claim for it first rank and importance. There are some 30,170 banks, State and National, in the United States, having aggregate resources in the sum of $54,034,911,000, yet agriculture can and does claim almost double aggregate resources.

In 1920 we had 130,344 farmers making income-tax returns and reporting a total net income of $229,193,235. In that year agriculture stood among the first of the major industries in the number of returns submitted and in the amount of income reported.

But what of the conditions to-day? Recently Roger Babson, the business analyst and statistical expert, reported the farm outlook to be critical. To-day reports show that hundreds of thousands of farmers have lost their land through foreclosure, and that other thousands are under suspended sentences through leniency of their creditors. Reports show that farmers are forced to leave their homes and seek work elsewhere at the rate of a million per year. Agriculture in 15 States is reported bankrupt. In South Dakota the Secretary of Agriculture reports 40 per cent of the farmers virtually bankrupt; Colorado, 42 per cent; North Dakota, 50 per cent; Wyoming, 51 per cent; and Montana, 62 per cent.

The failure of agriculture has carried death and destruction in its path. Both banks and business patronized by farmers have been swept away. Since 1920 over 1,600 banks, both State and National, have failed, causing additional losses of over $800,000,000.

Within the past year more than 1,000 banks have failed, and banks are now failing at a constantly increasing ratio.

Agriculture, in failing, has not only carried down many of the smaller banks but has also left its mark on the retail and wholesale trade of the country. On April 2, 1924, the Wall Street Journal printed the following story:

FIRST QUARTER'S FAILURES

R. G. Dun & Co. report 5,655 commercial failures in United States in first quarter of current year, with $184,865,571 liabilities, compared with 5,316 defaults involving $138,231,574 in the 1923 period. The heavy total of liabilities in March of $97,651,026 has never been exceeded in any previous month, and the aggregate for the first quarter of $184,865,571 has only twice been equaled in any quarterly period—by the $218,000,000 of the first quarter of 1922 and the $194,000,000 of the fourth quarter of 1921.

This storm, starting in the producing sections of the West, is moving eastward, is gathering momentum as it approaches, and already the threatening clouds are hanging low over the heretofore prosperous East. Unless the clouds recede and the storm soon spends its force, this cyclone of depression, bankruptcy, and ruin will reach the East; and if it does, the devastated areas of the West will be duplicated in an intensified degree among a people in no sense prepared for such a storm.

How long can this condition last?

How is it possible that at the same time some groups of our people may enjoy unprecedented prosperity while others equally energetic and deserving suffer depression, hardships, and bankruptcy?

What is the cause?

What is the remedy?

What did Congress do to appease the storm and to check its course? After six months of daily sessions and in the closing hours the Congress, dominated by the representatives of the prosperous groups, discovered that agriculture is in a depressed condition and, as a remedy, passed a resolution declaring agriculture to be one of the basic industries.

Why are other industries prosperous? Take the big financial institutions, for example. Is their prosperity due to the fact that they have the Federal reserve system managed by a friendly Federal Reserve Board to serve their special interests?

At the meeting of the American Bankers' Association held at Atlantic City recently Mr. Craig B. Hazlewood, vice president of the Union Trust Co., of Chicago, in addressing the association, said:

I doubt that even as bankers we fully realize what a magnificent financial structure we have in the Federal reserve system. No central banking system now or in the history of the world compares with this in point of resources, in currency-issuing power, or in ability to control business activity that needs restraint, or inactivity that needs stimulation.

Why are the railroads prosperous? Can their prosperity be due to the fact that they have the Esch-Cummins transportation law, with a guaranty of earnings provision, and have a friendly Interstate Commerce Commission to protect their interests as to both rates and competition?

Why are the organized manufacturing concerns prosperous? Can their prosperity be due to the fact that they have the Fordney-McCumber Tariff Act, giving them a high wall of protection, and the further fact that they also have a friendly Tariff Commission to protect their schedules and to serve their interests?

Finance, transportation, and industry are organized. They know exactly what they want and evidently have been extremely successful in getting just what they applied for. Each of the former groups has and is using the powers of government, administered by a friendly Federal board, for its own special and private interest. Federal laws have been passed which, administered by a bankers' board, have given the financial group control of both circulation and credit. Other laws have been passed and are now being administered in the interest of transportation and industry, and this condition—favorable to the big interests and detrimental to the masses—

is due in whole to the fact that such interests are organized and are thereby able to exercise monopolistic control of the businesses in which they are engaged.

Agriculture is not organized. Agriculture neither knows what it needs nor how to get results through legislation. During the past three years demands for relief have been made, and instead of granting aid Congress has passed laws making it easier for the farmers to get deeper into debt. Farmers do not need credit so much as they need conditions whereunder they can sell their products for a price which will cover overhead, cost of production, plus a reasonable profit. To-day they are not getting costs for their products, and until they can get a profit they are and will be helpless.

Agriculture in its unorganized state has just made a feeble effort to have Congress pass a law giving it a privileged status, similar to finance, transportation, and manufacturing. During this Congress there has been presented and briefly considered a bill having for its purpose relief of the farmer, the measure being known as the McNary-Haugen bill. The report submitted by the committee recommending favorable action on this bill set forth the following:

1. That half as many banks had failed between 1920 and 1923 as during the whole period from 1902 to 1923.

2. That four-sevenths of the total farm income is taken to pay taxes and interest on mortgages and debts.

3. That farm labor has become so costly the average farmer can not afford to hire.

4. That more than 1,120,000 farmers and hired men deserted the farm in 1922 to seek industrial employment.

5. That one-quarter of the farm owners in the corn and wheat States are bankrupt.

6. Above all, that the purchasing value of farm products is less than half what it was before the war.

The report advised the House that the McNary-Haugen bill was scientifically devised to cope with this situation.

As described in the report, the bill would—

1. Declare a general emergency exists in agriculture.

2. Create a $200,000,000 corporation, the capital to be furnished by the Government, with a board of directors consisting of the Secretary of Agriculture and four members appointed by the President.

3. Empower the corporation to buy and sell wheat, flour, rice, corn, wool, cattle, sheep, swine, and food products of cattle, sheep, and swine whenever a special emergency is declared.

When the market price falls below the ratio price the corporation will buy sufficient of the commodity for export to restore the domestic price. The ratio price is one which shall bear the same relation to the pre-war price that current average price of all commodities bears to the average pre-war price of all commodities.

To protect the ratio price from foreign competition the Secretary of Agriculture may declare prohibitive or embargo tariff rates.

To maintain the capital of the corporation an equalization fee is withheld from the producer on every purchase made by any buyer, and this fee is deposited with the corporation. If, after selling the surplus abroad, anything remains, this will be restored proportionately to every producer.

In order to operate, the corporation is given broad administrative powers and may, if necessary, construct elevators or any other necessary facilities. The committee's report asserted that once in operation the plan would bring up the price of farm products to levels comparative to other commodities.

The one stock argument used against this legislation was that it would raise the price of the farmer's products and force the public to pay tribute to the farmer. Answering this argument, it is sufficient to say that the farmer is only proposing to do for his business the same things which other groups are doing for their business.

The Government under law makes the people's credit in the form of note issues available to the larger banks, and these banks in turn use this credit for private gain, and in order to make these banks prosperous the borrowing public pays the bills.

The Government permits the railroads to lay such rates and tariffs as will guarantee the cost of overhead, cost of operation, and in addition a reasonable dividend, and in order to make the railways prosperous the passenger and freight paying public pays the bills.

The Government protects our manufacturing institutions by imposing tariff duties on competitive imports and the public is forced to pay the increased price, and in order to make these manufacturing trusts prosperous the buying public pays the bills.

If the other great industries, organized as they are, can not live and thrive without favorable legislation and the use of the powers of Government administered by friendly agencies, how can we expect agriculture, disorganized as it is, to live and exist without the assistance of similar favorable legislation?

If it is for the best interest of the country that the other great interests have special legislation for their private benefit, why not legislate for agriculture, giving it a similar favorable status?

As compared to agriculture—the production of food and clothing—finance, transportation, and manufacturing are luxuries; and if luxuries are entitled to enjoy privileges, why not show the same favor to the one great and necessary industry, that of agriculture?

So long as the Government farms out its money and credit to private interests; so long as transportation is guaranteed prosperity; and so long as manufacturing concerns are protected by tariff walls, just that long will agriculture demand and soon will receive some recognition at the hands of the Government.

While at present agriculture is not organized, and by the very nature of the business can never be successfully organized, yet we do have a number of farm organizations interested in class production, such as wheat, cotton, and livestock, which could be benefited by governmental assistance. These organizations, already in existence, could and should get together in an agricultural conference. The conference should follow the example of the other great groups of industry, employ the best brains obtainable, and such conference with its experts, agents, and assistants, should remain in session long enough to make a complete survey of the economic conditions influencing and controlling each of the other great groups or industries, and then, with this information in hand, such conference should proceed to frame a measure for the benefit of the farmer and for presentation to the Congress which meets in December, and then the conference should remain "on the job" and see that this measure is speedily enacted into law.

If law can make finance, transportation, industry, and commerce prosperous, surely law can help agriculture, and the suggestion made is the one practical way for agriculture to secure early relief at the hands of our National Government.

It is conceded and agreed that we can not have a prosperous Nation unless agriculture is likewise prosperous.

It is conceded and agreed that a number of our major industries have been and are now enjoying unprecedented prosperity.

It is likewise conceded and agreed that at this time agriculture is in an unprosperous, depressed, if not a bankrupt condition.

Therefore it must be conceded that the present prosperity is not evenly prorated and distributed over the country.

The problem, then, confronting those in authority is to so adjust our economic system as to secure a more even distribution of the prosperity now enjoyed by some and denied to others.

Agriculture, through its importance as the supplier of the Nation's daily food and through its dominance in numbers, has the latent power to completely dominate the action of this Congress as well as the administration of the Government. If an agricultural conference made up of delegates of agriculture's own selection could be assembled, and if such conference, after making a complete survey of the economic conditions of the country, should find that some of the major groups or industries are enjoying unwarranted governmental subsidies and privileges, it would be in order for such conference to recommend and demand the repeal or modification of such special privilege granting laws.

As I analyze the situation, three courses of action are open to agriculture, as follows:

1. Action looking to the withdrawal of special privileges to the favored, prosperous groups or industries.

2. Action looking toward giving agriculture a privileged status—a status on a par with the other favored basic industries.

3. Action looking toward modification of the unwarranted privileges being accorded the prosperous groups and at the same time a reasonable recognition of agriculture to the end that all our people shall prosper alike in prosperous times, and all suffer alike in times of depression.

The United States Constitution was prepared and adopted in order to "establish justice * * * promote the general welfare, and to secure the blessings of liberty to ourselves and our posterity."

These great ideals of government have been lost sight of during the present administration at Washington. The Govern-

ment as now organized and administered is of the privileged few, by the privileged few, and for the privileged few.

I hold that laws should be passed, interpreted, and administered on the principle of helping all the most and injuring the fewest the least.

The purposes of our Constitution and the teachings of Thomas Jefferson should be the guiding influences in the impending political conflict, and if those interested in agriculture will get together and apply these principles to their problems, relief will be secured and the forward march of our people will go forth over broad and safe roads mapped out by the fathers of the Republic.

LONGWORTH TAX PLAN JUST TO ALL

Mr. ROBSION of Kentucky. Mr. Speaker, under permission granted to me by the House, I am submitting some tables and facts relative to the revenue measure recently passed by Congress and signed by the President. Until the Republican Party came into power in 1921 we still had the oppressive war taxes. The Republican administration promptly passed a revenue bill which lifted the tax burden of the people of the Nation about $1,000,000,000 annually. The national debt has been reduced from $27,000,000,000 to less than $22,000,000,000, and yet we had a surplus in the Treasury which enabled us to again reduce Federal taxes. It is most remarkable we had two great tax reductions during the present administration. The new revenue act of 1924 reduces the income taxes for the present year 25 per cent and reduces or cuts out many other taxes amounting to hundreds of millions of dollars. Secretary Mellon submitted a revenue plan to Congress. It is known as the Mellon plan. It covered about 200 printed pages. There was not much controversy about any part of it except the question of income taxes, inheritance taxes, and gift taxes. Congressman GARNER of Texas also submitted a plan. The plan that was finally adopted with few minor changes was that of Congressman LONGWORTH, of Ohio, who is the Republican leader of the House. The House adopted the bill with the Longworth plan by a vote of 408 to 8. The bill received almost as impressive vote in the Senate. The Senate made some slight changes and it was necessary to send the bill to conference. This was made up of five Members of the House and five Members of the Senate—four Democrats and six Republicans. These conferees agreed on the revenue measure as it now is. There was a unanimous report. These conferees' report was adopted by the House by a vote of 376 to 9 and by the Senate by a vote of 60 to 6. Some of the nine in the House who voted against the bill were Democrats and some were Republicans. The six persons voting against the bill in the Senate were all Republicans; two of them were what are known as the "stand-pat" or regular Republicans and the other four were what are known as the progressive Republicans. I shall briefly undertake to show why the House and the Senate almost unanimously adopted the Longworth plan. I desire to first call your attention to some tables and statistics. The following table gives the number of income-tax payers and the amount of income in the 15 counties of the eleventh congressional district of Kentucky:

| Counties | Total number | Under $5,000 | $5,000 to $10,000 | $10,000 and over |
|---|---|---|---|---|
| Bell | 976 | 910 | 50 | 16 |
| Clay | 12 | 12 | | |
| Clinton | 3 | 3 | | |
| Cumberland | 17 | 17 | | |
| Harlan | 1,228 | 1,159 | 43 | 26 |
| Knox | 134 | 123 | 8 | 3 |
| Laurel | 62 | 55 | 6 | 1 |
| Leslie | 3 | 2 | 1 | |
| McCreary | 117 | 109 | 4 | 4 |
| Monroe | 23 | 23 | | |
| Pulaski | 391 | 379 | 9 | 3 |
| Rockcastle | 87 | 86 | | 1 |
| Russell | 4 | 3 | 1 | |
| Wayne | 58 | 56 | 2 | |
| Whitley | 653 | 634 | 7 | 12 |
| Total | 3,768 | 3,571 | 131 | 66 |

You will observe there is a total of 3,768 income-tax payers in the eleventh congressional district. The incomes of 3,571 of these are less than $5,000 each. The incomes of 131 others are between $5,000 and $10,000, and there are only 66 persons in this district whose incomes are $10,000 or over. No persons in this district for that year had a taxable income for as much as $50,000, and I doubt if as many as two persons had a taxable income for as much as $25,000.

69,540 INCOME-TAX PAYERS IN KENTUCKY

The records show that there were in the year 1922 69,540 income-tax payers in the State of Kentucky. The income of 64,289 of these was $5,000 or less, the income of 3,732 was between $5,000 and $10,000, only 152 persons had an income between $20,000 and $25,000, 78 persons had an income between $30,000 and $40,000. According to the records only 54 persons had an income of $50,000 or more, only 2 persons had an income of between $150,000 and $200,000. No person in Kentucky had an income of more than $200,000.

3,589,985 INCOME-TAX PAYERS IN THE NATION

The records show that there were 3,589,985 persons in the Nation who paid an income tax in the year 1922. The incomes of 3,417,626 were less than $5,000. There were only 114,244 persons whose incomes reached $15,000. There were less than 6,000 persons whose incomes reached $50,000. There were only 1,367 persons whose incomes reached $100,000. Sixty-four persons' incomes reached $500,000. Only 21 persons whose incomes were over $1,000,000. A study of these figures and facts will give you an idea as to why Congress by a vote of 408 to 8 passed the present tax bill, and why the conferees, made up of Democrats and Republicans, unanimously agreed upon it, and why this report was adopted by the House by a vote of 376 to 9 and by a vote of the Senate of 60 to 6.

MELLON, LONGWORTH, AND GARNER PLANS

The Mellon plan proposed to reduce the taxes of persons of very large incomes and wealth 50 per cent and reduce the income taxes of the persons of moderate incomes about 25 per cent. This was to take effect in the year 1925. It made no mention of the 25 per cent reduction in the present year. Under the act of 1921 the income taxes of persons of large incomes is 50 per cent. Mr. Mellon proposed to reduce this to 25 per cent. This made a cut of one-half in the big income taxes. He proposed a reduction of the income taxes of the smaller incomes of only one-fourth. The Garner (Democrat) plan was to reduce the surtax on the largest incomes from 50 to 44 per cent. Mr. LONGWORTH offered his compromise plan, which reduced the high incomes from 50 to 37½ per cent. This was later on raised to 40 per cent in the Senate. But this 40 per cent only applies to persons whose incomes are $500,000 or more. Comparing the Longworth plan with the 1921 law, Mr. LONGWORTH reduced the income taxes of the incomes of $5,000 and less nearly 64 per cent; on incomes of $6,000, 63 per cent; on incomes of $8,000, 62½ per cent; on incomes of $9,000, 61 per cent; on incomes of $10,000, 60 per cent; on incomes of $11,000, nearly 57 per cent; on incomes of $12,000, 53 per cent; on incomes of $13,000, 50 per cent; and even incomes as high as $25,000 were reduced 37½ per cent; incomes as high as $50,000 were reduced 28¾ per cent; incomes of $500,000 were reduced 23½ per cent. Incomes of more than $1,000,000 are reduced 21 per cent. It will be observed that the bill passed by Congress reduced the income tax one-half or more for all incomes up to and including $13,000, and this embraces 3,474,672 of the 3,589,985 income-tax payers of the Nation. The income of 3,578,816 income-tax payers of the Nation are less than $50,000. We have only 11,169 income-tax payers whose incomes are $50,000 or more. You will readily see that under the Mellon plan 11,169 of the very big taxpayers would get a much greater rate of reduction in their taxes than was given to the 3,578,816 income-tax payers whose incomes were less than $50,000. Under the Longworth plan the 3,578,816 taxpayers received a much greater rate of reduction than did the 11,169. The question is, Could any Member of Congress—unless he represented one of the congressional districts of great wealth, like Wall Street—justify his vote to favor the 11,169 against the 3,578,816? It is not a matter of politics; it is a matter of common justice. Taxes should be laid according to the ability of the person to pay.

LONGWORTH PLAN BEST FOR THE COUNTRY, KENTUCKY, AND THE ELEVENTH CONGRESSIONAL DISTRICT

We have pointed out that the Longworth plan is most reasonable and just to the people of the Nation generally. Now, let us come closer home, to the eleventh congressional district, and to my own State. There are 3,768 income-tax payers in my district. The income of no one of them reaches $50,000. The incomes of all of these 3,768 is less than $13,000, with the possible exception of a dozen persons, and perhaps not more than two of them go as high as $25,000. The incomes of 3,571 of them are less than $5,000 each. Under the Longworth plan their taxes will be reduced 64 per cent. The incomes of 131 of these are between $5,000 and $10,000, and under the Longworth plan their taxes would be reduced anywhere from 60 per cent to 63 per cent, and under the Longworth plan the in-

come taxes of every income-tax payer of my district would be reduced 50 per cent or more, with the exception of perhaps a dozen persons, and under the Longworth plan no income-tax payer in my district would receive a reduction of less than about 40 per cent over the revenue act of 1921. But under the Mellon plan the income taxes of each and all of the income-tax payers of my district would be reduced only 25 per cent, while the income taxes of Henry Ford, John D. Rockefeller, J. P. Morgan, and other men of like wealth would be reduced 50 per cent. While I have very great respect for Mr. Secretary Mellon, yet I could not see my way clear to make such a discrimination as this between the millionaires of the country and the moderate taxpayers of my own district and State.

LONGWORTH PLAN JUST FOR KENTUCKY

As we have pointed out before there are 69,540 income-tax payers in the State of Kentucky. The income of 64,289 of these was $5,000 or less; 68,021 of these had incomes of $10,000 or less. Under the Longworth plan these income taxes will be reduced 60 per cent or more. Under the Mellon plan they would be reduced only 25 per cent. There are only about 54 persons in the whole State of Kentucky who would be benefited more by the Mellon plan than the Longworth plan. How can anyone expect a Kentucky Congressman to vote to give the preference in tax reduction to 54 of the richest taxpayers in the State at the expense of 69,460 less fortunate taxpayers?

TAX-EXEMPT SECURITIES

I know that some claim that billions have been invested in tax-exempt securities. No law could relieve this situation now. If these tax-exempt securities were sold, as some claim would be done if we reduced the taxes of the very rich, I am sure the holders of these securities would have to sell them to somebody. It would merely change ownership of the securities and of the money. This would absorb other people's money. To relieve the situation we should require the holders of all bonds and securities to pay taxes. Congress attempted to submit a constitutional amendment to this effect, but most of the Democrats voted against it, and thereby defeated it. I voted to submit this constitutional amendment. For the further information of those who may be interested I submit a table showing the number of persons who paid income taxes in 1922 and the amount of taxes that a man who is married will pay. If he has one or more children under 18, his taxes will be less. These tables also show the amount of tax that he would pay under the act of 1921 and what he will pay under the new act of 1924.

COMBINED NORMAL TAX AND SURTAX, COMPARING THE REVENUE ACT OF 1924 WITH THE REVENUE ACT OF 1921, AND SHOWING THE AMOUNTS BY WHICH TAXES ARE REDUCED IN EACH BRACKET, WITH THE PER CENT OF REDUCTION

*Comparison of the revenue act of 1924 with the present law (married person without dependents), the first $5,000 of all income to be deemed to be earned; balance unearned*

| Number of persons making returns in each class in 1922 who paid income tax | Net income | Amount of normal tax under— | | Amount of surtax under— | | Amount of total tax under— | | Amount of reduction of total tax under act of 1924 | Percentage of reduction of total tax |
|---|---|---|---|---|---|---|---|---|---|
| | | Act of 1921 | Act of 1924 | Act of 1921 | Act of 1924 | Act of 1921 | Act of 1924 | | |
| | $1,000.00 | | | | | | | | |
| | 2,000.00 | | | | | | | | |
| | 3,000.00 | $20.00 | $7.50 | | | $20.00 | $7.50 | $12.50 | 62.50 |
| | 4,000.00 | 60.00 | 22.50 | | | 60.00 | 22.50 | 37.50 | 62.50 |

*Number paying income taxes in 1922*

| | |
|---|---|
| The number of persons making returns in 1922 | 6,662,176 |
| Of these no tax was paid by | 3,072,191 |
| Taxes were paid by | 3,589,985 |
| Those paying on incomes of more than $10,000 | 172,359 |
| Those paying taxes on incomes of $10,000 or less | 3,417,626 |

The total number paying income taxes were divided according to income, as follows:

| Amount of income: | Number paying |
|---|---|
| $1,000 to $10,000 | 3,417,626 |
| $10,000 to $11,000 | 23,416 |
| $11,000 to $12,000 | 18,743 |
| $12,000 to $13,000 | 14,887 |
| $13,000 to $14,000 | 12,375 |
| $14,000 to $15,000 | 10,393 |
| $15,000 to $20,000 | 34,230 |
| $20,000 to $25,000 | 18,100 |
| $25,000 to $30,000 | 10,848 |
| $30,000 to $40,000 | 12,047 |
| $40,000 to $50,000 | 6,051 |
| $50,000 to $60,000 | 3,431 |
| $60,000 to $70,000 | 2,240 |
| $70,000 to $80,000 | 1,423 |
| $80,000 to $90,000 | 957 |
| $90,000 to $100,000 | 666 |
| $100,000 to $150,000 | 1,367 |
| $150,000 to $200,000 | 450 |
| $200,000 to $250,000 | 205 |
| $250,000 to $300,000 | 84 |
| $300,000 to $400,000 | 98 |
| $400,000 to $500,000 | 64 |
| $500,000 to $750,000 | 46 |
| $750,000 to $1,000,000 | 17 |
| Over $1,000,000 | 21 |

RECORD OF HON. CHARLES D. CARTER IN THE INTEREST OF LABOR

Mr. HUDDLESTON. Mr. Speaker, under general leave to extend my remarks, I call attention to letters from Frank Morrison, secretary American Federation of Labor, and from the national legislative and information bureau of the four railroad brotherhoods concerning the record of Hon. CHARLES D. CARTER, Representative in Congress from the third Oklahoma district, upon issues of particular interest to labor. The letters are as follows:

AMERICAN FEDERATION OF LABOR,
*Washington, D. C., June 5, 1924.*

Mr. R. O. JAGGERS,
*General Secretary Pittsburg County Central Labor Union,*
*McAlester, Okla.*

DEAR SIR AND BROTHER: Your letter of May 30 in reference to the legislative record of Representative CHARLES D. CARTER, of the third Oklahoma district, received.

Inclosed you will find several copies of the legislative record of Representative CARTER on measures of interest to labor. You will note that there are no votes unfavorable to labor. In fact, his labor record is 100 per cent.

With best wishes, I am,
Fraternally yours,

FRANK MORRISON,
*Secretary American Federation of Labor.*

[National Legislative and Information Bureau, Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen, Order of Railway Conductors, Brotherhood of Railroad Trainmen]

WASHINGTON, D. C., *June 12, 1924.*

Mr. R. O. JAGGERS,
*General Secretary, Pittsburg County Central Labor Union,*
*McAlester, Okla.*

DEAR SIR AND BROTHER: Supplementing our joint letter of June 6, 1924, in reply to yours of May 30 requesting the voting record on labor measures of Congressman CHARLES D. CARTER, of the third district of Oklahoma, we are inclosing to you herewith a copy of the voting record of Congressman CARTER as taken from the official CONGRESSIONAL RECORD and compiled in the office of the National Legislative and Information Bureau. You will note that during his long service of 17 years the record of Congressman CARTER'S votes on labor measures is 100 per cent favorable. The voters in the third district will make no mistake in returning him to the position which he has so ably and impartially filled for nine consecutive terms.

It is not the policy of our organizations to support for Congress new men of unknown ability or qualifications in opposition to men of proved ability and integrity and whose records in Congress have been four-

square in support of legislation beneficial to labor, the farmers, and the public in general.

Fraternally yours,

H. E. WILLS,
*Assistant Grand Chief, National Legislative Representative, Brotherhood of Locomotive Engineers.*

ARTHUR J. LOVELL,
*Vice President, National Legislative Representative, Brotherhood of Locomotive Firemen and Enginemen.*

W. M. CLARK,
*Vice President, National Legislative Representative, Order of Railway Conductors.*

W. N. DOAK,
*Vice President, National Legislative Representative, Brotherhood of Railroad Trainmen.*

### POSTAL SERVICE SALARIES

Mr. KELLY. Mr. Speaker, the postal pay bill, after six months of painstaking consideration by the Post Office Committees of the House and Senate, was passed by each body. The record vote in the Senate was 73 in favor of the measure to 3 opposed. The record vote in the House on the final conference report was 362 in favor of the bill and 6 opposed.

Only 9 out of 531 duly elected Representatives of the people voted against the bill, and not one of the opponents took the ground that increases in pay for postal employees were unjustified.

The postal pay bill was enacted by such overwhelming majorities and sent to the President for his action.

At the same time an appeal to the President, written by myself on behalf of the postal employees, was issued in order that the final argument for the postal pay bill in this session might be made.

This appeal was as follows:

DEAR MR. PRESIDENT: We stand before you 300,000 strong, relying on your sense of justice as we respectfully ask you to sign our postal increase bill. It has already been judged by the American people and the Congress of the United States and has received approval well-nigh unanimous. There is no denial anywhere that our cause is blest with our country's favor.

We are the American workers who man the world's greatest public service enterprise. We serve every family in our Nation. We traverse every city street and highway and byway every day. We travel on land and sea and in the air on the mission of intercommunication between Americans.

When we entered this service we laid aside all hope of making a fortune or of ever owning productive capital. But we are at our wit's end now to live. Our pay will not buy things which our physical needs demand. This measure which we bring to you only restores our real wages to the level of 1914. You do not desire us and our families to suffer unjust privations and hardships because of a compensation which is less in purchasing power than we received 10 years ago.

Your Post Office Department has been operated on the basis of service, not profit. It is to-day the cheapest in the world. Charges for the services rendered have been decreased during the past 10 years of universal rise in the cost of production. If postal charges had been increased one-half as much as the average of all other commodities and services there would this year be a surplus of $150,000,000 in the Postal Service.

You will not refuse us just compensation on the ground that it will entail a drain on the United States Treasury and thus force 300,000 of us to bear all the deficit of a service which admittedly sells its product for less than cost. The patrons of the Postal Service and the American public do not desire such injustice. They have urged in countless ways that we be granted just and fair schedules of pay and the expense be made a charge upon the users of the service or the public at large.

We have repeatedly recorded ourselves as individuals and as organizations in favor of postage rates which will maintain the service on a self-sustaining basis. We plead with you not to penalize us now because those rates have been fixed below cost as a governmental policy. Our faith is firm that you will not act on the principle that the postal system should be conducted on a service basis when postage rates are considered, and on the principle that it is an institution for profit when a living wage for its workers is involved.

If our respectful request to you is unjust or unreasonable, it should be rejected without apology. But you have publicly stated that "the postal pay bill is based on justice." We know that you believe that "righteousness exalteth a nation." We beg you to prove that America is great enough to do the just and the righteous thing and afford her a chance to prove that she is wise enough to find the proper means to pay its price.

We will help solve the problem of the cost. We will continue our efforts to adjust postage rates on an equitable basis, which can be determined from the report within a few months of the official results of the arduous and expensive efforts of the Congress and the department to learn the exact cost of carrying the different classes of mail. Grant us this act of justice and the removal of back-breaking burdens will send us to our tasks with an invincible zeal. We have absorbed every prior increase in wages and we will do our part in making additional revenues and efficiency far exceed this added cost.

We are in partnership with you and the American people for indispensable public service. We have kept faith in the past and we will keep it in the future in building and maintaining the best Postal Service for the best Government in the world.

Mr. President, please sign our bill.

Mr. Speaker, on June 7, the last day of the session, the bill was returned to the Senate with the veto message of the President.

It is to be regretted that the manifold duties of the President of the United States make it impossible for him to follow in detail the course of legislation. Had he been able to do so in the case of this measure he would have known that every point raised in his veto message was carefully considered by the committees of Congress and was overruled in the interest of justice and a square deal to the postal workers and the American people, who are served by this great governmental agency of communication.

Let us notice the grounds of the objection urged in the veto message.

#### I. THERE IS NO PROVISION FOR RAISING THE REVENUE TO MEET THE COST

This decision was taken by the Post Office Committees because the Post Office Department earnestly declared that the ascertainment of the cost of carrying the mails would be ready for action by December. That ascertainment has cost more than half a million dollars from tax funds. The bills to provide increases in postage rates were before the committees but they were not enacted because it was believed that the actual figures to be furnished by the cost ascertainment committee would be valuable in a just and scientific revision of rates.

We believe that the first essential in the Postal Service is to assure a living wage to postal workers. With that established we may easily decide upon the proper adjustments to be made in rates. To argue that wages of workers who make an essential service possible should be kept at an inadequate level because the Post Office Department does not know the cost of its own operation is unjust. The department has had 134 years to secure that essential information, and its neglect of business principles is no reason for refusing a square deal to faithful and efficient workers.

#### II. POSTAL SALARIES HAVE ALREADY BEEN ADJUSTED

Postal employees to-day are admittedly receiving less compensation in real wages than they did in 1912. Figures as to average pay for all employees for a certain year do not state the situation correctly. The fact is that the maximum pay for a regular letter carrier and postal clerk in 1912 was $1,200. To-day the maximum is $1,800, an increase of 50 per cent. The cost of living to-day is 70 per cent higher than in 1912. The postal employee who received $1,200 in 1912 is to-day receiving compensation of only $1,080 in purchasing power.

If an average is to be used it should be the average pay received by a postal employee during his actual service.

A clerk or letter carrier who has been in the service since 1912 has had, under ordinary procedure, an average annual income of less than $1,200.

Here is the actual income of a railway postal clerk living in Cincinnatti, Ohio, as given by himself:

I entered the service in December, 1913, as a substitute and served in that capacity until August, 1914. During these eight months I earned $337.37, or $42 per month. In August, 1914, I was made a regular clerk at $900 per year, or $75 per month.

Following is an account of the money I received since entering the service:

| | |
|---|---|
| December, 1913, to August, 1914 | $337.37 |
| For the year 1914–15 | 900.00 |
| For the year 1915–16 | 1,000.00 |
| For the year 1916–17 | 1,100.00 |
| For the year 1917–18 | 1,100.00 |
| For the year 1918–19 | 1,300.00 |
| For the year 1919–20 | 1,300.00 |
| For the year 1920–21 | 2,000.00 |
| For the year 1921–22 | 2,000.00 |
| For the year 1922–23 | 2,000.00 |
| For the year 1923–24 | 2,000.00 |
| Total | 15,037.37 |

The above indicates an average of $1,367 per year. Can anyone really think that postal employees who give 11 years of service for $15,037 are extracting too much from the people, who are all the while demanding the best service obtainable?

The $450,000,000 increase in expense referred to in the message means an advance in pay of $5.75 per week for 300,000 Americans to meet the skyrocketing costs of living in a time of World War and its aftermath.

That sum was paid not by the users of the mails or the taxpayers but in the main by the postal employees. Postage rates were not changed, but by speeding up their work and by increased efficiency and more arduous effort the added cost was absorbed by the very workers who received the advance in pay.

III. PRIVATE EMPLOYEES RECEIVE LOWER PAY

The postal clerk and letter carrier in the highest possible grade receive to-day $34.61 a week.

The United States Department of Labor gives the following scale for skilled workers in various lines:

| | Per week. |
|---|---|
| Newspaper compositors | $41–$51 |
| Men's clothing industry | 41– 55 |
| Plasterers' laborers | 48 |
| Bricklayers' helpers | 48 |
| Cement finishers' helpers | 45 |

Exhaustive tables were presented at the hearing, and the most casual survey is convincing evidence that the postal employees are underpaid skilled workers.

IV. THERE SHOULD BE WAGE DIFFERENTIAL FOR EMPLOYEES IN LARGE CITIES

Ninety per cent of all employees of the Railway Mail Service live in cities of more than 25,000 population. Seventy-five per cent of all letter carriers and postal clerks live in cities of over 25,000.

There are more clerks in the New York post office than in all the cities of less than 5,000 population. There are as many carriers in the Chicago post office as in all the cities of less than 5,000 population.

The work is exactly the same in town as in city, the hours are the same, and the compensation should be the same.

V. THERE ARE MANY ELIGIBLES ON THE CIVIL SERVICE LISTS AND APPLICANTS FOR THE EXAMINATIONS

The figures given simply prove the tremendous labor turnover in the Postal Service, with its attendant costs. Great numbers of substitutes refuse appointments, and about 8 per cent of all appointed resign each year. Inadequate pay is the primary reason for a situation which requires weekly examinations and a standing eligible list of thousands to fill vacancies which are recurring continually. The present turnover in the Postal Service involves an annual loss of $10,000,000, which can only be remedied by just compensation.

VI. THE FARMERS ARE THE LARGEST USERS OF PARCEL POST

In July, 1920, the Post Office Department counted each piece of mail on all the rural free delivery routes in the United States, the only time such an attempt has been made to accurately gauge the mail matter sent to and by the farmers of America.

That month there were 8,534,643 pieces of parcel-post matter delivered to patrons of rural routes, and 1,292,837 pieces collected from them, a total of 9,827,480. Extended for the year it would mean that 117,929,760 pieces of parcel-post mail matter were received and sent by the patrons of all these rural routes.

The Postmaster General's report for 1920 states that "the total number of pieces of parcel-post mail handled during the past fiscal year is estimated to have exceeded 2,250,000,000."

Based on these figures, the only ones available, the farmers of this country receive and send 5 per cent of the number of parcel-post packages handled in the United States mails.

In July, 1920, the total postage received by the Post Office Department from parcel-post mail delivered on rural free delivery routes was $905,110.62. The postage from parcels collected was $122,135.34, a total of $1,027,245.96. Extended for the year that would mean annual revenues from this source amounting to $12,326,951.52.

The Postmaster General's report for 1920 estimates the total postage from parcel post at $150,000,000.

Based on these figures, the only ones available, all the patrons of all the rural free delivery routes paid 8 per cent of the postage received from parcel-post matter.

The total postage received from all classes of mail collected and delivered on all rural free delivery routes in July, 1920, was $4,291,860.93, which makes for a year, $51,502,331.16. The appropriation by Congress for the rural free delivery routes alone for the fiscal year 1920 was $68,800,000. Crediting all the postage on all mail sent to these patrons as well as all postage on all mail sent by them and there remains a deficit of more than $17,000,000.

Mr. Speaker, the postal employees of America are loyal to their Government and their duty. They will faithfully carry out their tasks in the sure hope that justice will be done during the coming session and that just salary schedules and just postage rates will be established for the United States Postal Service, the greatest business enterprise on the face of the earth.

THE M'NARY-HAUGEN BILL

Mr. YATES. Mr. Speaker, I am casting my vote for this bill because otherwise the farmer will have no legislative relief—or legislation aimed to provide relief—from this Congress.

On page 10027 of volume 65 of the RECORD of May 31 is printed a question which I asked the distinguished Member from Oklahoma, the Hon. CHARLES D. CARTER. The RECORD reads:

> Mr. YATES. The gentleman believes, all things considered, that this bill is the best thing for the farmer at the present time, does he not?
>
> Mr. CARTER. I consider it the one, single, solitary piece of legislation that has been offered during this administration to relieve the condition of the farmers of the country, and we all know it is the only measure we will have an opportunity to vote on before adjournment, but this bill does not meet my ideas of the necessary steps for relief.

In fact, it is admitted on all sides that if we are going to try to do anything for the farmer the thing to do is to vote for this bill, whatever its shortcomings may be.

It is certainly not perfect. Like all legislation, it lacks perfection.

Mr. Speaker, I have been puzzled about this bill. I admit it. I have been at a loss how to vote, and I admit it. Some men—very good and very wise men—say, and indeed insist, that this bill will help agriculture, aid the farmer materially and satisfactorily; others, on the other hand, protest that it will not be a real solution for the ills of the farm.

Some men—very good and very wise men—assert that this bill if enacted into law will not, it is true, remedy the situation entirely but will do so in part—will not, confessedly, make whole the farmer and make him a 100 per cent success, but will "help some"—will at any rate do more good than harm—will, perhaps, reach 51 per cent; that is, give, say, 51 per cent of the relief desired.

Others, equally good and wise men, manifest impatience and disgust and demand to be shown one single, solitary advantage or benefit which the farmer would derive from this particular legislation, saying it does not contain 1 per cent of help.

Still others argue that on the one hand a mere temporary gain or benefit or advantage might come to the farmer, because he would, under this scheme, be helped materially for five years to get more for his farm products than he does now; but that, on the other hand, at the end of the five years the "prop"—that is, the artificial support—would be "knocked out"; and the "last end would be worse than the first."

One of the most confusing things that we have witnessed is the sharp difference of opinion among the practical farmers in this body. I can not claim, as so many do, to be a farmer, but I know something about a farm myself. My father owned a farm, owned three of them and cultivated one. My mother owned a farm—480 acres—from 1869 to 1889 and leased it to a tenant. My grandfather, Henry Yates, was a farmer for 35 years—1830 to 1865—owned 10 farms in Illinois—in Sangamon County, Illinois, the heart of the Corn Belt, when he died in 1865.

Of course the result is that I have myself "that mania for the broad acres" that Garfield said every Anglo-Saxon has. I want to own a farm myself some day. And it follows I want to own a real thing—a thing that is real.

And, of course, I am proud of what my forefathers owned, acquired, and did—proud and glad that they were real farmers—proud and glad that they were good and prosperous farmers. So proud and glad that I will, forever and always, honor the farmer and the farm, consider them precious, and vote to help both whenever I can. I have this special reason to boast and help the farmer in addition to the fact that all prosperity depends upon him.

But, whether I know much about methods to keep a market for farm products or not, is it not amazing that the farmers and farm champions of wide repute should be far from agreement?

In this disagreement party lines are forgotten and out of sight.

The gentleman from Minnesota, the Hon. KNUD WEFALD, says (RECORD, p. 11092), voicing the Northwest:

> This measure I am quite confident will fail of passage. Mr. Speaker, the Republican majority will be held mainly responsible by the people for its defeat, yet the Democrats are equally guilty with them. In this matter, as so often in other matters, Democrats come to the assistance of the stand-pat element when

the interests of special and favored interests are at stake. In the matter of sectionalism, the South yields very little to New England. The race question shuts it off forever from understanding the West.

The gentleman from far South, Alabama [Mr. HUDDLESTON], finds a difficulty reflecting a sectional division when he says (see RECORD, p. 11246), concerning freight rates:

Is it proposed to give the products of the farmer an advantage over the products of the mine?

And again (see RECORD, p. 11246):

The farmers are asking for relief. They are entitled to relief, and I am willing to give them relief, but I am not willing to give them relief at the expense of other people.

And again:

I want to do everything that is possible and reasonable and honest for the farmers, but I would not consider it honest to the balance of the people of this country, nor would I consider it good public policy to prefer the agricultural interests at the expense of the other legitimate business.

FRIENDS OF THE BILL

The following organizations and citizens of Illinois have urged me to vote for this bill:

Joint Labor Legislative Board of Illinois; legislative representatives of Illinois State Federation of Labor; United Mine Workers of America; Brotherhood of Railroad Trainmen; Brotherhood of Locomotive Firemen and Enginemen; Order of Railway Conductors; Women's Trade Union League; Sangamon County Farm Bureau, of Springfield; Illinois Agricultural Association, of Chicago; American Farm Bureau Federation, of Washington, D. C.; the Macon County Farm Bureau, of Decatur; George R. Brown, First State Bank of Divernon, of Divernon, Sangamon County; C. R. Carpenter, of Buffalo; George W. Hall, of Alexander, Morgan County; Illinois Grain Dealers' Association, of Champaign; Farmers' Cooperative Seed Co., of Cambridge; the Chamber of Commerce of Lincoln; Tazewell County Farm Bureau; Peoria County Farm Bureau; Stark County Farm Bureau; Bureau County Farm Bureau; Marshall-Putnam Farm Bureau, of Henry, Ill.; Mr. B. P. Taylor, Canton; farm bureaus of Adams, Henry, Schuyler, Fulton, and Knox Counties, of Galesburg, Ill.; Piatt County Bankers' Federation, of Bement; Richland County Farm Bureau, of Olney; Kane County Farm Bureau, of Geneva; Peranwold Stock Farm, Farmingdale; Farmers' State Bank of Orion; First National Bank of Morrisonville; Citizens' State Bank of Milford; Sumners State Bank, of Stockland; Marshall County State Bank, of Varna; Iroquois County Farm Bank, of Watseka; Brown County Farm Bureau, of Mount Sterling; Savings Bank of Kewanee; the Commercial Club of Mount Sterling; Pulaski County Farm Bureau, of Mound City; Equitable Life Insurance Co. of Iowa, of Ottawa; Mr. C. J. Luther, president Will County Farmers' Institute, of Wilmington; Mrs. E. E. Stevenson, chairman of La Salle County League of Women Voters; Ottawa Banking & Trust Co., of Ottawa; Cambridge State Bank, of Cambridge the First National Bank of Pullman; the First National Bank of Leland; North Hampton Cooperative Shipping Association, of Chillicothe, Ill.; and the Walnut Grove Farm, of Cornell.

Mrs. J. F. Garrity, Chicago; W. D. Rishel, of Cambridge; Hon. Jacob A. Bohrer, of Fifer & Bohrer, of Bloomington; E. S. Gilliham, of Edwardsville; F. A. Patton, of Tivoli; Hon. Norman G. Flagg, of Moro; John F. Regan, of Decatur; George H. Hall, of Alexander; J. H. Singleton, Mahomet; the Pioneer Creamery Co., by Louis Nielson, president, of Galesburg.

Among those from Illinois who have also urged me to vote for this law are the following: Knox County Farm Bureau, of Galesburg; Piatt County Farm Bureau, of Monticello; Perkins & Perkins, of Springfield; Cass County Farm Bureau, of Virginia; farmers of Island Grove, of New Berlin, Sangamon County; Pike County Farm Bureau, of Pittsfield; Pana National Bank, of Pana; W. F. Engelman and Mrs. W. F. Engelman, of Nokomis; Farmers' National Union of America, of Kankakee; Graymont Cooperative Association, of Graymont; Milford Grain Co., of Milford; Stronghurst Grain Co., of Stronghurst; James D. Smith and Benjamin Brown, of New Berlin, Sangamon County; Clinton County Farm Bureau, of Breese; H. P. Joy, stock and grain farmer, Chapin, Morgan County; Galva Grange, No. 1591, of Galva; Chicago Producers' Commission Association, of Chicago; Commercial Club of Princeton, of Princeton; Carpera Stock Farm, of Buffalo; Maplehurst Stock Farm, of Chatham; J. W. Whisenand, of Cambridge; G. A. Slater, Polo; Clarence Stell, Cuba; Clay Lawler, of Paloma; Flanagan Stock Farms, of Flanagan; Savings Bank of Kewanee, of Kewanee; John T. Creen, Pontiac; J. B. Roissell, Mattoon; Rev. H. M. Blout, Cornell; Fred I. Talleu, Edwardsville; Fred L. Walker, of Kendall; Harvey N. Ames, Mattoon; T. W. Esmond, of Ottawa; J. P. Lyons, Pontiac; William G. Rushton, of Minooka; Marion County Farm Bureau, Odin; H. T. Marshall, of Serena; E. C. Coulter, of New Berlin, Sangamon County; L. C. Rinker, of Grand Ridge; J. P. Conrad, Monee; Maple Lawn Stock Farm, of Lostant; E. E. Boyer, Ashmore; D. C. Shepper, Lincoln; Ruth Kerns, of Big Rock; J. V. Bogner, Henry; A. J. Gahn, Ransom; Albert G. Weber, Nauvoo; Helmer Hanson, Newark; Alfred Windett, of Bristol; Albert Peterson, of Millbrook; Miss Grace Buxton Brown, of Divernon, Sangamon County; J. M. Weaver, of Oakford; Ernest R. Davis, Pawnee; L. J. Kerns, Big Rock; Clifford V. Gregory, of Chicago; Mrs. Peter J. Schlapp, of Oswego; Walter H. Miles, Plano; R. F. Constant, of Buffalo Hart; James Hamilton, Polo; Streator Drain Tile Co., of Streator; R. T. Gustus, of Ophiem; H. E. Vogelsinger, of Pontiac; Progressive Grain & Feed Co., of Edwardsville; Robert Gibbons, Piper City; J. C. Beekman, Petersburg; E. E. Stevenson, president La Salle County Farm Bureau, of Ottawa; Harry C. Gehring, president Knox County Farm Bureau, of Galesburg; Peter Nelson, of Kendall County Farm Bureau, of Plano; Christian County Farm Bureau, of Taylorville; Logan County Farm Bureau, of Chestnut; farmers of Marshall County, of Yarna; Marion County Livestock Shipping Association, of Iuka; Whiteside County Farm Bureau, of Morrison; Farmers' Grain Co., of Dalton City; Harry C. Dixon, of Covell; Coles County Farm Bureau, of Charleston; Winnebago County Farm Bureau, of Rockford; Pike County Farm Bureau, of Pittsfield; Fulton County Farm Bureau, of Canton; Franklin County Farm Bureau, of Benton; Watseka Farmers' Grain Co. (cooperative), of Watseka; C. R. Carpenter, of Buffalo, Sangamon County; Woodford County Farm Bureau, of Eureka; Ford County Bureau, of Gibson City; Cass County Farm Bureau, of Virginia; Will County Farm Bureau, of Joliet; McLean County Farm Bureau, of Bloomington; Sunset Farms, of Bloomington; Mercer County Farm Bureau, of Aledo; Henry County Farm Bureau, of Cambridge; Jersey County Farm Bureau, of Jerseyville; Marion County Farm Bureau, of Salem.

PROTESTS

I have protests from the following: City Council of Chicago; Millikin National Bank; National Bank of Decatur; Farmers' State Bank & Trust Co.; Citizens' National Bank; A. E. Staley, R. C. Augur, C. W. Brewer, F. M. Robertson, C. P. Cline, J. A. Freemon, L. B. Kizer, C. L. Leiss, P. A. Hendricks, C. T. Moore, W. H. Barnes, S. J. Durbin, R. J. Steven, L. E. Duncan, B. H. Muthersbaugh, H. I. Baldwin, H. J. Kappl, and J. E. Quigley, all of Decatur; B. F. Waters, of Rochester; George W. Cole Grain Co., of Peoria; Illinois Grain Dealers' Association, of Champaign; the Chicago Association of Commerce, of Chicago; Mrs. George Neafus, of Tuesday Art Travel Club, of Chicago; Farmers' National Council, of Washington, D. C.; Illinois Drain Tile Manufacturers' Association, of Streator; Purina Mills, of St. Louis, Mo.; J. C. Shaffer Grain Co., of Peoria; Peoria Board of Trade, of Peoria; Albert Dickinson Co., of Chicago; Frank P. O'Brien, Springfield; the Corn Exchange National Bank, of Chicago; the W. T. Rawleigh Co., of Freeport; Mrs. James Hartley, of Henry; John W. Scott, of Chicago; Nash-Wright Grain Co., of Chicago; James E. Bennett & Co., of Chicago; John S. Lunt, of Chicago; Emory Niles, of Chicago; Miller & Hart, of Chicago; Alden, Latham & Young, of Chicago; Cross, Roy & Saunders, of Chicago; Madison Park Apartment Hotel, Chicago; Sherer-Gillett Co., of Chicago; the Windermere Co., Chicago; John E. Brennan & Co., of Chicago; J. A. Edwards & Co., of Chicago; W. P. Anderson & Co., of Chicago; William A. Neubauer, of Chicago; F. J. Young, of Chicago; James P. Ryan, of Chicago; Pope & Eckhardt Co., of Chicago; F. M. Foster, of Chicago; Cornland Grain Co., Mount Pulaski; T. F. Molyneau, of Chicago; Cross, Roy, Eberhart & Harris, Chicago.

It is to be noticed that the total protests coming from Illinois have numbered only 39, all but 8 from Chicago.

OTHER REMEDIES

Decrease of production is the remedy most commonly suggested for curing the agricultural depression. This, it is pointed out, is the sound and economic way to raise prices to a pre-war level. This theory contemplates that anything you do to make such action unnecessary is unnatural, artificial, unsound, uneconomic. Those who recommend this course either do not regard tariffs, immigration laws, transportation acts, protective labor laws, and similar legislative enactments, that fill the statute books of both Nation and State, as being in exactly the same class as the proposed legislation or else they are willing to contemplate the degradation of agriculture and its perversion from the position that it has occupied in American history from the beginning of the Republic.

Nature, through the operation of the boll weevil and unfavorable weather conditions, reduced the cotton crop of 1923 to but little more than 10,000,000 bales. As a result of diminished supply the price of cotton has been above 37 cents during the past 12 months and is now around 28 cents. This is at least twice the pre-war average money price. Has this been a benefit to American consumers and to consumers of American cotton throughout the world? It has not. Neither has it been a benefit to the cotton grower, except in the fortunate areas where an average yield was obtained, together with the benefit of high prices. Thirty cents a pound for cotton is little help to those cotton growers who produced only 30 to 80 pounds per acre, when the cost of production per acre alone averaged over 27 cents a pound and the average yield was about 128 pounds per acre.

Farming is an industry which in its nature requires a period of years to adjust itself to changed economic conditions by reason of the slow turnover rate. Only once a year does a farmer have a chance to make readjustments in the annual crops, and in most livestock the average period of opportunity is from one to four years. In the case of dairy cattle adjustment is even slower, as a good cow does not come into her maximum production until she is about eight years of age.

Farmers have striven for many years to diversify their crops. This is quite as true of the sections that are suffering at present as of any other in the United States. Cows, hogs, and chickens are synonymous with diversification. The great majority of all farmers, even in the one-crop wheat areas, produce their own milk, their own pork, their own poultry and eggs. The present difficulty is not confined to one-crop areas. Some of our best diversified farm regions are suffering almost as severely from the deflation as are the one-crop farm areas. In fact, the hog producer is even harder hit than the wheat grower. In the more settled, older, and better equipped farming sections farmers were somewhat less in debt and had more capital and credit. Hence the effect of the vicious relation between prices of farm products and other commodity prices was obscured there until a later date. Now the capital and credit are being exhausted with no present hope of replenishment unless and until more normal farm-price relations are restored.

Price fixing with respect to farm products has generally meant, to the lay mind, a guaranteed fixed price. This was the principle upon which the wheat guaranty act of March 4, 1919, was enforced, though such enforcement was not necessarily in accordance with the will of the legislative body. The food control act, under which guaranteed prices were fixed, merely provided that the prices should be not less than $2 a bushel. As a matter of fact, prices very close to $2 a bushel were enforced as the maximum prices. Guaranteed fixed prices have not operated to the satisfaction of the wheat grower in the past. Ratio prices are fluctuating prices moving in unison with the all-commodities index. Some members of the grain trade and of the milling industry, as well as some farmers, desire guaranteed prices. The majority do not.

This bill proposes to equalize domestic supply of export farm products to domestic demand at a fair exchange value in terms of all commodities; in other words, in terms of the general price level. This end is to be attained by diverting the surplus, which is small in relation to the whole annual production, to the world market at the world price. Existing private agencies and existing facilities of processing and distribution are to be used to the fullest possible extent according to their adequacy and availability for this purpose. Import duties on particular products in distress are to be raised to keep out foreign competition, or, if necessary, such products may even be excluded. The loss sustained in selling at the world price, the fraction of the crop exported, after buying it on a higher domestic level, and the expenses of operation are to be borne by the farmer through the operation of a so-called equalization fund.

The export corporation, furthermore, affords a means to remove the abuses reported by the Federal Trade Commission as to the operations of grain exporters and packers in foreign trade. The character of these abuses is partly disclosed on pages 688 to 690 of the hearings on the bill, and on pages 694 to 698, relating chiefly to wheat and its products. Similar information as to the export trade in meat products will be found in part 10 of the hearings.

This bill in effect says that any quantity of a basic agricultural commodity that must be removed from the domestic market in order to maintain the domestic price at a level in keeping with the domestic price of all commodities, is export surplus. The price at which the corporation may purchase this export surplus is called the "ratio price." The act lays down a rule for determining this price and the corporation can not vary from it as to its purchase of the fraction to be exported. It should be borne in mind that the whole crop will not be handled by the corporation—only the amount necessary to maintain the ratio price. In the case of wheat, for instance, our normal average crop is about 750,000,000 bushels. The average amount of export may be taken at approximately 150,000,000 bushels. The whole domestic consumption of 600,000,000 bushels, less the quantity used for seed and fed on farms, would be traded in without interference on the part of the corporation, except to the extent of collecting the equalization fee on each sale made by a farmer. The ratio price at which the corporation will buy the export surplus only may be defined briefly as that money price of a given basic agricultural commodity that will give a unit of it the same purchasing power now, in terms of all commodities, that it had on the average in the 10 years 1905 to 1914. To maintain this price the corporation goes into the domestic market and buys the commodity at the ratio price, thus maintaining the domestic price of the commodity at the level of the ratio price. This is equivalent to saying that the effective domestic supply is reduced to the level of the effective domestic demand at the ratio price, thus lifting the basic agricultural commodities up to a reasonable parity with all commodities.

Opponents who believe that the bill, if enacted, will increase the cost of living fail to take into consideration the fact that, if the situation is allowed to "cure itself," the inevitable method of cure will be reduced production. This reduced production in itself is one of the surest means of sending up prices for farm products, increasing costs to consumers, or increasing the cost of living.

Inasmuch as the purpose of this bill is to raise the price of the certain basic agricultural commodities whose prices are disastrously below pre-war purchasing power, it is probable that there will result some increase in the cost of living. The amount of this increase is, of course, not exactly determinable. Students have generally concluded that a rise of 20 points in the price of wheat would result in an elevation of the wholesale price index of all commodities by one point. This assumes wheat to represent 5 per cent of the total exchange value of all commodities. As a matter of fact its relative importance is about 6 per cent, but for convenience of calculation and as the difference will not be great, it seems best to apply the commonly accepted conclusion that a 20-point increase in the price of wheat will lift the general index one point. Speaking approximately again, the present price of wheat is $1. The ratio price under the bill would be about $1.50. In other words, 20 points divided into 50 points gives 2½ per cent increase, the percentage effect, on the total exchange value of all commodities that would be produced by a 50-cent increase in the price of wheat.

### GENERAL OBJECTIONS

The statement is frequently made by those opposed to this legislation that the law, if passed, will be unworkable. Such statements have been made in regard to practically all important legislation in our history. A few instances may be cited as illustrations. As to each of the following in their time it was seriously asserted:

1. That the Federal reserve act would destroy the banking system.
2. That the Federal farm loan act would dry up the sources of the farmers' credit.
3. That the income-tax laws would ruin the country.
4. That the meat inspection act would drive the packing industry into bankruptcy.
5. That the cotton futures act would rob the cotton producers of millions of dollars.
6. That the food control act would produce a revolution.
7. That the grain futures act would destroy the grain exchanges, and with them the country elevator.
8. That the immigration laws would invite instant and serious retaliation from numerous foreign nations, and could not be administered.
9. That the tariff laws enacted from time to time during our history would be unworkable, invidious, ruinous, and likely to involve countervailing action by other countries.

Under analysis what is the great fact that underlies most statements of the kind mentioned? They arise because interests affected by proposed legislation foresee some degree of inconvenience or some loss of profit in their own particular business without considering the general welfare of all the country. It is almost an axiom that only a few of the far-seeing, progressive, and wise in any trade or industry willingly accept suggestions or directions looking toward changes in their existing methods and practices, even when they are clearly in the common interest.

The committee believes, and so do I, that there is infinitely greater danger to a self-governing country in failure to legislate when conditions require correction than there is in legislating, even though legislation at first may operate but imperfectly.

CONCLUSION

After reading and rereading the indorsements of this bill and the protests against it, I have come to the conclusion that it is the only bill that has a definite and specific method of lifting the markets in which farm produce is sold to an index ratio comparable with other commodities. For this reason I consider it the best of the several measures capable of being passed by this Congress, and I am voting for it on that theory.

I want it distinctly understood that I have only one object in voting for this bill, and that is to do the wisest thing for the farmer. The only way I could find out just what is the wisest thing was to study the bill as well as I could and to get the opinion of the farmers in all parts of Illinois. I am not voting for the bill now because I think it is the best bill that could be devised or because I think it gives entirely satisfactory relief. I am voting for it because I do not want to do anything to hurt the farmers any more than they are hurt at the present time.

THE RECLAMATION LAW

Mr. LEAVITT. Mr. Speaker and gentlemen of the House, it is impossible during the closing moments of a session of Congress to give the full consideration to some measures of vital importance which their effect for the good or ill of perhaps thousands of human beings demand. As a consequence, injustice may be done without definite intention, because there is not sufficient opportunity to clear up misunderstanding and replace it with understanding, wrong actions may be taken.

The House Committee on Irrigation and Reclamation, of which I am a member, had under consideration for some weeks a measure intended to put into effect the principles of legislation shown to be wise and advisable by the President's fact finding commission. We had held hearings and prepared a bill which our chairman was instructed to report when it was learned that most of its features incorporated in a Senate bill had been attached to the deficiency appropriation bill as a rider. Another rider had to do with appropriations for several irrigation projects, provision for whose construction had not been included in any House bill. The fight on these appropriations caused delay and conferences, which modified some and eliminated others. The report of the conferees was accepted by the House and we passed the bill, containing in principle the new reclamation law, so much needed for the success of many of the projects. In the closing hours it failed in the Senate.

But, Mr. Speaker, that is not the end of the struggle for the new law for reclamation projects. Much of the data showing its need has been gathered, but we will make the case even more conclusive this summer, and we will be here again in December with evidence which will convince you and the Members that we have worked out a plan, sound in principle and required by conditions. In my district in Montana I have more Government reclamation projects to represent, both as to number and as to area, than has any other Congressman. I shall visit them all this summer and fall and will come here again in December with new evidence and even stronger facts. Others of the Members from the West are planning in the same way.

During the debate to-day I had opportunity to touch only lightly on what is the heart of the proposed new law—the plan of repayment to the Government on the basis of earning capacity of the lands rather than by a fixed period of years. The RECORD shows, as follows:

Mr. MADDEN. Mr. Speaker, I yield five minutes to the gentleman from Montana [Mr. LEAVITT].

The SPEAKER. The gentleman from Montana is recognized for five minutes.

Mr. LEAVITT. Mr. Speaker and gentlemen of the House, one of the burdens of the western country having great irrigation projects is the lack of understanding—I might say the ignorance—of those who proceed on pure theory and as a result make it difficult for us to continue our development.

In the few minutes I have at my disposal I will speak particularly of the new provisions for payment contained in this bill. That is the heart of this matter, and I want to say that it is not hasty legislation. For several weeks the Irrigation and Reclamation Committee of this House has been holding hearings and investigations and preparing a bill. The committee of this House did not write this rider into the appropriation bill now under consideration. It was put there by the Senate, but it should be passed.

Regardless of the business that any man goes into, he will succeed if he is able to make enough to pay his debts and has the privilege of paying them in such a way that he can meet them out of his business. That is all there is in this proposed new principle of payment on these reclamation projects. It is that, instead of a fixed period of years being set for payment, regardless of the cost of the project or the earnings—and it costs just as much to construct in a State where a single crop is all that can be expected as it does where two or three crops are grown—payment shall be required on a basis of what can actually be raised. It proposes to charge 5 per cent of the gross return, year after year, estimated over a period of 10 years, if there is 10 years of experience; and if not, over a lesser period of time.

That is the only way we will be able to get back the money that has been invested on some of these irrigation projects, simply on the basis of what they can earn instead of the fixed plan that has forced failures in some instances.

Mr. EVANS of Montana. Mr. Speaker, will my colleague yield there?

Mr. LEAVITT. Yes; I yield.

Mr. EVANS of Montana. If this legislation is not passed, thousands of people will be dispossessed of their lands, will they not?

Mr. LEAVITT. Yes.

Mr. Speaker, I notice that on the ceiling of this Chamber of the House of Representatives the seal of my State of Montana is not represented with the rest, although we have been a State for 35 years. Nobody seems ever to have called attention to it before. I have taken steps so that this fall, when we meet again, it shall appear there among the seals of other States. [Applause.] It is in the same way, in urging this legislation for reclamation, that I am asking you, in the interest of development and our farming industry, to recognize my State among the States of the Union on an equal footing. Reclamation is required in a State like mine and in other similar States of the West, so that they will be enabled not only to produce things that can be sold in a market-gardening market but in order that we can produce sure forage crops, making possible the use of other lands for stock raising. We must be able out in that country to go on with this development, and, as has been said by my colleague, Mr. EVANS, unless this relief in the method of payment is afforded, which is not a quickly thought of thing which we are trying to ride through here, but the result of weeks of hearings and investigations by our committee—unless we can have that relief there will be many of my people dispossessed, who, under this fair method of payment, would be able to repay their obligations and put back into the Treasury the money that has been expended in the development of reclamation projects. [Applause.]

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. SNELL. Did we not recently extend the time on them all for three years?

Mr. LEAVITT. Yes; but that does not in any way satisfy the loan companies that are demanding that payments be made, but who will be satisfied if we put them upon a business basis so that they can pay out in time.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. Speaker, the need and wisdom of this business method of repayment was stressed by President Coolidge in the message of April 21, by which he transmitted the report of his fact-finding commission to Congress. He said in part:

*To the Congress of the United States:*

I would respectfully urge on Congress the immediate necessity of revising the present reclamation law.

The Secretary of the Interior appointed a special advisory committee of six members to study reclamation and make report to him. That committee has completed its work and has made its report to the Secretary of the Interior, and he has transmitted that report to me. I herewith transmit it to you.

Many occupants of our reclamation projects in the West are in financial distress. They are unable to pay the charges assessed against them. In some instances settlers are living on irrigated lands that will not return a livelihood for their families and at the same time pay the money due the Government as it falls due.

Temporary extensions of time and suspension of these charges serve only to increase their debts and add to their hardships. A definite policy is imperative and permanent relief should be applied where indicated. The heretofore adopted repayment plan is erroneous in principle and in many cases impossible of accomplishment. It fixes an annual arbitrary amount that the farmers must pay on the construction costs of projects regardless of their production.

In its place should be substituted a new policy providing that payments shall be assessed by the Government in accordance with the crop-producing quality of the soil.

* * * * * * *

Whatever legislation is necessary to the advancement of reclamation should be enacted without delay.

CALVIN COOLIDGE.

THE WHITE HOUSE,
*April 21, 1924.*

The same principle was stressed by the commission itself in these words:

It is idle to assume that lands of equal fertility can bear widely different annual construction payments or that all lands—good, indifferent, or poor—under a single project can bear the same annual construction payments, yet the existing plan of repayment was based upon that assumption. Neither time nor an arbitrarily fixed per cent of cost is a sound basis for determining annual payments. Whether the total construction cost be great or small, it can only be paid out of the produce of the lands; hence productivity is the only safe and fair basis for fixing annual payments. The expense of changing rough desert land into irrigated fields and of adding the new implements and improvements needed involves a large outlay of money, which must be won from the products of the farm. The acre income becomes the basis of any scientific method of repaying construction costs. The more fertile the soil is the higher may be the annual charge; and the more intelligently the farmer cultivates the soil the sooner will title to his water right pass to him. The present method of repayment can not and does not insure a steady return on the investment by the Government in irrigation structures and can not be met by the projects with lower productive capacity. It will be necessary to put into effect a new plan of repayment of construction costs of the Federal irrigation projects—in our opinion one based upon the inherent power of the soil, under intelligent cultivation, to produce crops.

In conformance with this sound policy, Mr. Speaker, we of the House Committee on Irrigation and Reclamation wrote into the bill presented here the following section:

SEC. 8. That hereafter all construction charges on existing reclamation projects upon application of the water users shall be made payable in annual installments based on the productive power of the land as provided in this section. The installment of the construction charge per irrigable acre payable each year shall be 5 per cent of the average gross annual acre income for the 10 calendar years first preceding, or for all years of record if fewer than 10 years are available, of the area in cultivation in the division or subdivision thereof of the project in which the land is located, as found by the Secretary annually. The decision of the Secretary as to the amount of any such installment shall be conclusive. The annual payments shall continue until the construction charge against each farm unit is paid. The Secretary is authorized, upon application of the water user, to amend any existing contract for a project water right so that it will provide for payment of the construction charge thereunder in accordance with the provisions of this section: *Provided*, That whenever two-thirds of the irrigable area of any project, or division of a project, shall be covered by water-right contracts between the water users and the United States, said project shall be required, as a condition precedent to receiving the benefits of this act, to take over, through a legally organized water users' association or irrigation district, the care, operation, and maintenance of all or any part of the project works, subject to such rules and regulations as the Secretary may prescribe, and thereafter the United States, in its relations to said project, shall deal with a water users' association or irrigation district, and when the water users assume control of a project the operation and maintenance charges for the year then current shall be covered into the construction account to be repaid as part of the construction repayments: *Provided further*, That the provisions of this section shall apply to existing reclamation projects, or divisions thereof, on Indian reservations at the request of the water users and with the approval of the Secretary.

There are many other provisions in this bill of mutual value to the Government and the water user, and what is to the benefit of one is likewise of benefit to the other, but this repayment policy is the heart of the matter, and I have confined my brief discussion to it. The opportunity to pay what is justly due in accordance with what can be reasonably earned is businesslike. It gives real opportunity to the farmer on the project and insures the return to the reclamation fund all which should justly be returned.

In closing let me say again, Mr. Speaker, that we will be here with even more complete data and argument in December. The House and Senate have both looked with favor on this principle, and I am certain that the measure will be written into law. The soundness of the proposal and the good judgment of the Congress will surely join to that end.

### POLITICAL TEAMWORK

Mr. JACOBSTEIN. Mr. Speaker, political apathy has been threatening to undermine our national institutions. In recent years there has been an alarming indifference of the masses to political action. One reason for this is that the average voter feels himself too far removed from his Government. He feels that his vote does not count; that his opinion is not effective. Oftener than not he is unaware of what his elected representative is doing. On the other hand, the elected representative is often unaware of the real public sentiment in his district on specific issues. The machinery of government has grown so large and complicated that the individual seems lost. Both the individual voter and the individual public official are submerged.

Unscrupulous public officials take advantage of this remoteness, apathy, and indifference. Secretary Fall undoubtedly felt himself secure in his Teapot Dome transactions. Who would be interested in looking up the legal transactions in transferring oil properties, making oil leases, and disposing of natural public resources?

But while unscrupulous men are encouraged into committing misdeeds, the honest public official misses the encouragement and inspiration which comes from the thought that his electorate is watching the political game intelligently.

We must establish contacts. We legislators and voters must get on speaking terms. We need teamwork. The voters are, in a true sense, stockholders in this greatest corporation—the United States Government.

With this in mind, I purpose to set forth, in a sort of annual report to the stockholders, some of the important happenings of this first session of the Sixty-eighth Congress, which has just closed.

Some 300 bills affecting the public welfare, known as public bills, were enacted into law. Manifestly it is impossible in a brief and sketchy survey, such as this, to deal with all of them, or even some of them, adequately. I shall pick out those of most significance.

### TAXATION

1. Tax reduction: The new revenue act, which the President signed, will cut taxes by about $400,000,000 a year, besides providing for a 25 per cent reduction in last year's income taxes payable this year. I voted for this tax-reduction bill. I opposed, however, that part of the Mellon plan which sought to give a larger reduction to the rich than it gave to those of low and moderate incomes. I voted in every instance to lighten the burdens of those least able to bear the tax. Under the new law the reduction in the income-tax rates ranges all the way from a 20 per cent reduction on the highest incomes to a 65 per cent reduction on the low incomes. I am in favor, however, of reducing still further the high surtax rates. There were many admirable administrative reforms recommended in Secretary Mellon's plan, for which I voted, but which are too technical to discuss here.

2. Excise taxes: The new revenue law repeals or reduces many of the excise taxes, including the theater admission tax, the movie admission tax, the taxes on telephone messages and telegrams, the tax on jewelry, candy, hunting garments and equipment, pleasure boats, automobile trucks and automobile accessories, carpets and rugs, the stamp tax, and other so-called business and nuisance taxes. I voted for the repeal or reduction of these taxes.

3. Estate and gift taxes: The liberals of both parties united in supporting the bill introduced by Republican Members providing for increased tax rates on estates. They are responsible also for writing into our revenue act a tax on gifts, which is a logical corollary to a high inheritance or estate tax. I voted for both of these measures.

4. Tax evasions: I voted in favor of the proposed amendment to the Constitution, the enactment of which would have given to the Federal Government and the State governments authority to abolish tax-exempt securities. These tax-free bonds offer one of the popular methods used by the very wealthy to escape paying the Federal income tax. The proposed constitutional amendment was introduced by the Republicans. I supported it in spite of the opposition of my Democratic friends. The outlawing of these tax-free bonds is the first step in tax reform; it plugs the hole of tax evasion.

5. Original suggestions: I offered two original propositions in the form of amendments to the revenue law. One was that health and education expenses should be exempt from taxation; and the second, that the corporation income tax ought to be graduated so that each corporation would pay according to the rate of profit it earns. Both were defeated, but the latter (the graduated corporation tax) was embodied in a Senate amendment, which was, however, finally stricken out in conference. I believe that both of these measures are sound and will ultimately become a part of our revenue law.

### IMMIGRATION

The present immigration law, passed in 1921, expires on June 30, 1924. New immigration legislation was necessary, therefore, to go into effect July 1. The Johnson bill was offered as a substitute for the present law. It was passed by

Congress and signed by the President. This bill restricts immigration more than the present law, but on the other hand it liberalizes the administration of the law. I favored and advocated restriction even further than the Johnson bill, but I could not vote for the Johnson bill because of its un-American and unjust discrimination against the people of certain nationalities. Furthermore, I voted in protest against the spirit which actuated Congress and the method used in handling the Japanese exclusion question.

MUSCLE SHOALS

I voted against the bill which provided that the United States Government should turn over this wonderful water power to a private corporation for 100 years. I have very great respect and admiration for the industrial genius of Henry Ford, but I could not bring myself to consent to the transferring of this public property, representing an investment of approximately $85,000,000, and with natural resources of untold value, for 100 years, for a paltry sum, even to Henry Ford's corporation. The House passed the bill. The Senate committee, after holding elaborate public hearings, rejected the Ford proposal and offered Government operation as a substitute. Though the Ford proposal was introduced by a Republican, its main support came from the Democrats. The Senate having failed to take action on the bill, it goes over until next December.

ADJUSTED COMPENSATION

I voted for the soldier bonus because I thought it was a just and honorable and decent thing to do. The President vetoed the bonus bill, but Congress passed it over his veto. I voted also to override the veto. I regard the soldier bonus not only as an act of justice, but as the payment of a debt of honor to those who served us in the Great War. To make sure that I was right in assuming that the ex-service men wanted adjusted compensation, I conducted a referendum by sending a ballot to each of the 19,500 ex-service men in Monroe County. The poll showed an almost unanimous vote in favor of adjusted compensation. The original vote in the House of Representatives on the bonus was 355 for and 54 against. The vote to override the veto was 313 for and 78 against.

I am also happy I had the privilege of voting for the veterans' hospitalization bill, by which more generous treatment and more liberal disability allowances will be granted to veterans suffering from diseases, especially tuberculosis.

RELIEF FOR THE DISTRESSED FARMER

Everybody recognizes the economic distress of the farmers in the wheat and cattle areas of the Middle West and the Northwest. As a means of relief the McNary-Haugen bill was considered in the House. It was voted down. It was a price-fixing bill with a Government corporation buying the surplus product and selling it in the foreign market in order to raise and maintain prices in the domestic market. I voted against this measure because I could not see that it would really give effective relief to the farmer and at the same time it would increase the cost of living for all consumers. Besides this, it would injure dairy and poultry farming by increasing the cost of cattle feed and poultry feed. It was not a party measure. I voted against the bill because I regarded it as an economically unsound measure.

THE CHILD LABOR AMENDMENT

Both the House and the Senate passed this constitutional amendment giving Congress the power to regulate child labor. Before it becomes a part of the Constitution it must be ratified by 36 States. The adoption of this amendment does not abolish child labor or even regulate it. That will have to be done by act of Congress after the amendment has been ratified by the States. A constitutional amendment is necessary because a number of States refuse to deal adequately with the child-labor situation. I voted for this amendment, and I trust that the State legislature of New York, as of other States, will quickly ratify the action of Congress. The vote in the House was 297 for and 69 against.

INCREASE IN CIVIL AND SPANISH-AMERICAN WAR PENSIONS

The House and the Senate passed the Bursum bill increasing the pensions of the survivors and widows of the Civil and the Spanish-American Wars. The President vetoed this bill, and as the Senate by a single vote sustained the veto, it did not come back to the House for a second vote. I voted in favor of the Bursum bill.

THE POSTAL SALARY INCREASE

No bill received such overwhelming support in both the House and the Senate as did this measure granting a moderate increase in the salaries of postal employees. It also had the almost unanimous approval of the business, commercial, and civic organizations, not only of my own district but of the country as a whole. I voted for it most gladly. In spite of this wide popular sentiment and overwhelming affirmative vote, the President vetoed it. The Rules Committee of the House delayed consideration of the bill in the first place by withholding the granting of a special rule for its earlier consideration. After the veto the bill was sent back to the Senate on the last day of the session and there was no time to reconsider it. The Senate having failed to take action on this vetoed bill, the House had no opportunity to vote again on it. It therefore goes over until next December. If the bill had come to a vote in the House, I would have voted to override the veto and help enact it into law. The vote in the House was 250 for and 14 against, and in the Senate 73 for and 3 against.

RAILROAD-LABOR LEGISLATION

Under the transportation act of 1920, now in effect, labor disputes are adjusted by machinery provided for under Title III of the act, which also sets up the Railroad Labor Board. A bill known as the Barkley bill was introduced in the House, providing for the abolishment of the Railroad Labor Board and the setting up of new arbitration and adjustment machinery. Because of a determined filibuster against it, which if continued would have successfully held up the work of Congress, this bill was voluntarily withdrawn by the author, Mr. BARKLEY, before it came to a vote in the House. In this instance the fight occurred not on the passage of the bill but on taking it out of the hands of the committee in order to give it consideration on the floor of the House. I voted to take it out of the hands of the committee in order to have it considered. Mr. HOWELL introduced an identical bill in the Senate, and the Senate Committee on Interstate Commerce, after holding public hearings, reported it favorably. The House committee stubbornly refused to grant public hearings, and therefore the House voted to take it out of their hands. The bill goes over until next December.

REORGANIZING OUR FOREIGN SERVICE

An important measure, known as the Rogers bill, which reorganizes and consolidates the Diplomatic and Consular Service of the United States, passed the Senate and the House and was approved by the President. I voted for this bill.

CREATION OF A FOREIGN SERVICE BUREAU IN THE DEPARTMENT OF COMMERCE

The Winslow bill, providing for the creation of a foreign service bureau in the Department of Commerce, was defeated. I voted for it.

PROHIBITION

There was no movement evident in Congress to repeal the eighteenth amendment.

Fifty-nine bills, however, were introduced to modify the Volstead Act by legalizing 2.75 per cent beer. The Judiciary Committee held hearings on these bills, but made no report to the House, so that no action was taken.

In the closing days of the session a bill was introduced and passed creating an independent prohibition unit and putting the force under civil service. While I was in favor of this aspect of the bill, and would have been glad to vote for it, I was forced because of the particular form in which it was presented to vote against it, since it seemed to me that the legitimate business interests using industrial alcohol would suffer unduly and unnecessarily by the reorganization. Believing as I do unqualifiedly in the enforcement of law, I regret I could not vote for this bill, the purpose of which is to strengthen the enforcement machinery.

APPROPRIATION BILLS

There was no special controversy over the 11 appropriation bills. The total of the sums appropriated by this Congress for the fiscal year ending June 30, 1925, amounted to approximately $3,500,000,000.

In 1923 the Government spent $4,000,000,000, in 1924, $3,900,000,000. The estimated expenditures for 1925 are about $3,500,000,000. This includes interest of about $900,000,000 on the public debt and the payment of about $500,000,000 to be applied in reducing the principal of the public debt.

I voted for all the appropriation bills, including the regular Army and Navy bills, except the special appropriation of $150,000,000 for the building of a bigger Navy, which passed the House, but was blocked in the Senate.

OUTLAWING WAR

Most wars are colossal blunders and ought to be outlawed. The avoiding and averting of war is the most important problem of our times. Believing as I do that most wars are neither necessary nor inevitable, and holding firmly to the belief that law should be substituted for brute force in the settlement of all disputes—domestic as well as between nations—I shall con-

time to exert my influence in favor of the President's world court.

I advocated, urged, and voted for the calling of another naval disarmament conference by the President.

LEGISLATION FOR THE DISTRICT OF COLUMBIA

1. The rent act: This act extended the Rents Commission for another year. This commission regulates rents in the District of Columbia. I voted for this rent-control bill. It was signed by the President and became a law.

2. Salary increases: This bill provided for salary increases for teachers, firemen, and policemen, readjusting these salaries to bring them more in line with the high cost of living, which is unusually high in Washington. This bill also was passed by Congress, signed by the President, and became a law. I voted for this salary increase bill.

Other measures were passed affecting the District of Columbia, but these were the two most worthy of note.

MISCELLANEOUS BILLS OF IMPORTANCE

1. The purchase of the Cape Cod Canal: I voted against this measure because I thought that the sum to be paid, $11,500,000, was excessive.

2. German relief: I voted in favor of the bill making an appropriation of $10,000,000 for the relief of the starving women and children of Germany. I was influenced in this largely by the testimony and recommendations of Secretary Hoover and General Allen, commander of the American Expeditionary Forces in Germany.

3. Procedure in the House of Representatives: I voted in favor of liberalizing the rules of procedure in the House of Representatives.

LEGISLATION OF SPECIAL INTEREST TO THE THIRTY-EIGHTH NEW YORK DISTRICT

1. Changing name of the harbor and port of Rochester: I introduced a bill changing the name of Charlotte Harbor and the Port of Charlotte to Rochester Harbor and Port of Rochester. The War Department has promised to cooperate in this matter. The purpose of this change is to call attention to the fact that Rochester is on the highway of the Great Lakes.

2. Creation of new judicial district: I also introduced a bill providing for the creation of a new judicial district in western New York, with Rochester as headquarters. The subcommittee of the Judiciary Committee of the House favored the Dempsey bill creating an additional judgeship rather than an additional judicial district. No action was taken on either bill by the Judiciary Committee or the House. My bill was indorsed by the Rochester Bar Association.

3. Unfinished business: There are a number of bills not specifically mentioned above, which the people of Rochester have expressed an interest in, which have been carried over to the December session. Among them are the following:

The McFadden amendment to the national bank act.
Regulation of the coal industry.
Readjustment of freight rates on agricultural products.
Anti-strike breakers bill.
Manufacturers' name branding bill.
Truth in fabric bill.
Regulation of the sale of nursery stock (compulsory labeling).
Protection of forest lands.
Regulating manufacture and traffic in adulterated foods and drugs.
Changing the name of Mount Rainier, Wash.
Conservation of helium gas.
Amendment to merchant marine act.
Protection of interstate and foreign commerce from corrupt practices.
Pensions for soldiers and sailors of Spanish-American War, the Philippine Insurrection, and China Relief Expedition.
For strengthening the Naval Reserve.
Judicial procedure in Federal courts.
District of Columbia Workmen's Accident Compensation.
And many others.

Whenever legislation was pending which I knew would be of interest to special groups of my constituents, I endeavored to get in touch with that group, either by direct communication or through the newspapers. Whenever a bill was pending of interest to the community as a whole I gave an abstract of the bill through a special newspaper article.

INVESTIGATIONS

The Teapot Dome and other major investigations, reports of which occupied the front pages of the newspapers for several months, were initiated in the Senate and were conducted almost exclusively by committees of the Senate. The House of Representatives spent practically no time on these investigations, and they certainly did not interfere with its work in any way. I mention this not by way of criticism of the Senate nor for the purpose of providing an alibi for the House but merely as a fact, because I feel that the public has an erroneous conception of the time that was spent by both the Senate and the House on these matters. These investigations have served a useful public purpose. The public is entitled to integrity on the part of its officials.

SUMMARY

With respect to all of this legislation, I am happy to record the fact that in not a single instance, so far as I was concerned, was there any pressure from any political boss or leader or organization to influence me for or against any particular measure. At all times I felt and acted as a free agent, and I voted according to conviction and my best judgment on each question on its own merits.

Blind party loyalty has been the curse of American politics. Petty partisanship has too frequently biased the judgment of the legislator. While political parties have played an important rôle and will continue to play an important rôle in our political history, the welfare of the country, and, indeed, the progress within the party, depends upon the independent nonpartisan action of the individual. I came to Congress with this political conviction, and this principle has guided me in every vote on every important piece of legislation in this, my first term in Congress.

In order to attend to his duties a Congressman has to be constantly at work, and I wish to state, with a great deal of satisfaction, that I was not absent from a single daily session, except in cases of illness, death in the family, or on special occasions when I had been invited to deliver addresses on public questions. An inspection of the official voting records will show my record of attendance to have been high. I am not saying this because I wish to claim any credit for it, but merely because I consider it to be one of the important duties of a Congressman.

On many important questions I was helped by the information, advice, and criticism given to me by my constituents regarding pending and contemplated legislation, which help I invited and which I am always happy to receive.

Few people realize the extent to which a Congressman is called upon to render personal service to his constituents by taking up matters for them with the Government departments in Washington. I have had literally hundreds upon hundreds of communications requesting assistance, from veterans of the late war seeking compensation or vocational training, from survivors of the Civil and Spanish-American Wars seeking increase in pensions, from friends of prospective immigrants, from business men seeking adjustment of claims against the Government, together with civil-service cases, and innumerable requests for specific information and for public documents of various sorts. It goes without saying that there were numerous other activities which can not be enumerated in this brief statement.

I trust that this meager recital of the bare facts of the session's work will be sufficient to stimulate interest in public affairs and help to establish the closer contact and teamwork so desirable between the voter and his elected representative.

"THE DEMOCRATIC PARTY—A NATIONAL LIABILITY"

Mr. SEARS of Nebraska. Mr. Speaker, this is June 7, 1924, and for the last of our purposes, the finis. This day's duties and privileges seem to be dedicated to "the state of the Union," as we severally see it, and the responsibility seems to be resting on each Member to inform each of the stockholders of our glorious national corporation as to its condition, so that they may severally know what their several shares of stock are really worth. It will not do for us to say that the stock is at par or better. For we would all say that. But we must say something relative to the activities and the duties and the responsibilities, and as to the functioning. Now, no one can consider those several subjects without taking notice of that great liability of our beloved country—the Democratic Party. It is fearfully and wonderfully made. While in its activities it is a national organization and covers the whole country in its endeavor, yet in the best sense it is not a national party at all. It is a conglomerate bringing together of its component parts without splendid national common purposes. Its parts are only held together by the settled belief, that is controlling, that the political fleshpots can not be attained and enjoyed without these strangely foreign elements sticking together for mutual political profit.

The strength of the Democratic Party is in the South and only maintained in its integrity by the color-line question. This is the better element of the Democratic Party and, if left to itself and normally, might be capable of national good, if it could work normally with the rest of the country. Of course it

can not work normally with the rest of the country by reason of its dominant reason for life in the southern section. Then there is another of its parts made up of the controllers of our great northern cities, the rest having very largely patterned after New York City, under the grip of Tammany Hall. And then there is the strong Bryan element, which might be truthfully described as the "mollycoddle" sentiment, crystallized and attached to any tangent shoot that Mr. Bryan may consider at any particular moment as of issue. Now Bryanism is the sire and dam of general "mollycoddlism" in the United States. Mr. Bryan has such great evangelistic influence in politics because of his grim and set purposes and his overweening ambition and the personal magnetism that flows out from a great actor that the other two component parts of Democracy, while they have nothing in common to either him or his sentiment, yet they are afraid of him. The other parts are trying to so act that he will not fly the track but still keep as far away from his purposes as possible. They know his powers of elimination, and whatever strange and peculiar things he is at any moment advocating they are compelled to accept them as from the Oracle of All Truth. Some years ago Brother Jarvis said, "The sun do move," and there was a general laugh. Mr. Bryan says the same thing in either the theological or political field, and the other two parts of Democracy dare not laugh, because they recall what happened to Parker, and what happened to Parker years ago may happen to Al Smith or McAdoo or RALSTON.

Many quotations might be used from Mr. Bryan's words that delegates to national conventions are bound to carry out the will of those sending them when pronounced. Nebraska instructed Mr. Bryan to vote for Champ Clark for President. The moment had come when by carrying out the instructions Mr. Bryan would have made Mr. Clark his party's nominee. But to Mr. Bryan's political mind he was absolved as an agent from carrying out his principals' instructions because a bad man—Mr. Tammany Hall—was supporting Mr. Clark. So he inserted the kibosh and gave the twist. If Mr. Tammany Hall had commenced voting for Mr. Bryan, of course virtue would have been rewarded. But the other two parts of Democracy dare not say a word, because they remembered what happened to Parker.

For many years I have been a believer in the thought that the legislative should be the strongest branch of the Government and that the House should be the dominant force of the legislative activities. But these discordant elements of Democracy have worked to throttle that thought in my own short time of service here. As an illustration: I have been present in the House when its Members had just known of what was apparently a great bribery of one holding a Cabinet place in a Republican administration.

As a matter of fact, this bribery, if it did take place, was by one who had at the last Democratic convention been a candidate for the exalted office of Vice President. Great overflowing glee was in the eyes and on the faces of practically every one of the Democratic Members of the House because of the hoped-for political profit that might accrue to Democracy in the ensuing campaign because of the heinous charge that could be laid at the door of Republican administration by reason of the bribery in question. This, regardless of the fact that every man in the House knew and still knows that guilt is personal, alone, and not chargeable to our Nation or our Government or any of our parties. A few days after the last-stated circumstance it developed that quite a number of Democratic Cabinet ministers resigned their posts to at once get larger fees and allowances, where their new activities were to clash with the Government's interests. The look of immediate and extreme horror that at once took the place occupied by the former high glee was wonderful to note. Now, this change referred to can not be charged to the quality of individual membership of the Democrats of the House, for a finer lot of men does not exist anywhere of the same number. Individually there are no better. Collectively they are incompetent, immaterial, and irrelevant when the baneful influence of the Democratic organization is resting upon them. No one will deny that the greatest crime known to our national life were the activities of the Federal regional bank during the dominancy of the Democratic Party. The currency was inflated and credits were invited to be asked for, and extended and until practically all of our people were blue-sky artists and were using credit as never before and with the expectation that that condition of easy discount was going to continue, and which they were invited by the authorities of the bank to expect. The small branch of the bank of my home district had so dealt in money and credits that in six months it amassed a profit from the producers of the district of $26,000,000 on $24,000,000 of capital. Without a note of warning, currency and credits were contracted, and the farming and producing classes, who were ordered to pay their notes, commenced to die financially. Ever since our courts have been clogged with foreclosures that previously were unknown for years. And every town saw men commencing over again who had been most prosperous and full of hope. Innumerable business houses closed and many banks followed suit. If the East does not know why orders are not coming to their looms and their shops, I can tell them that it is because the people of the great West are not buying normally. They are the greatest purchasers of the products of the looms and shops that the world has ever known.

Had those in authority of the Treasury Department of the United States and of its currency and of the great Federal bank and those acting in conjunction with them desired to bring ruin to this country and its people, they could not, with all their cunning and with all their knowledge of money and finance, have devised and carried out a scheme more fraught with evil to the American people. This is said at this time because on the floor of the House several times it has been charged that this great crime should be placed at the door of the Republican Party because in the platform of four years ago there was a suggestion that inflation had gone too far. These orators, forgetting that it was a new doctrine that a successful party is bound to carry out suggestions in any degree, of platforms of losing parties. And further and still more so, that the responsibility of carrying on this great trust was on the administration of the Treasury Department by the Democratic Party. If there is political responsibility, it is on those who had the immediate duty of execution and not on those who stood at the side lines with suggestions.

I voted against the adjournment. I wanted Congress to continue in session until farm relief was assured. My people were the greatest sufferers because of the contraction of the currency and the contraction of credits in 1920. There was one measure that might have afforded my people relief, and I thought that my Democratic friends should have kept Congress in session until the McNary-Haugen bill or other proper measures should be passed. During the last administration the blow was struck that wrought their ruin. I thought they had an especial reason to help undo that which had been done during their administration. But it was not to be, and the strong Democratic men of the South, in the main, turned against that proposed farm relief and then voted for the adjournment. Individually I will give those credit for believing, who voted against that bill, that it was not a good one, but when they adjourned I must conclude that they thought the question was of minor importance, or else that the adjournment was good politics. This being the 7th day of June in the year of grace 1924, I hope, Mr. Speaker, that I have not taxed too much the patience of the House.

As a national party force the Democratic Party is without that great national zeal for the common welfare and the great ability for the common welfare that should admit of its asking for a vote of confidence. This is because of its three discordant elements that are only held together for mercenary political purposes. There is only one great national party with a breadth of vision that takes in this Union, with a patriotic purpose that is ample for us all, and I intend to vote for that party in November.

### CHILD-LABOR CONSTITUTIONAL AMENDMENT

Mr. FOSTER. Mr. Speaker, in the last Congress I introduced a child-labor constitutional amendment. It was reported from the Judiciary Committee too late to secure action thereon. Soon after the convening of the present Congress I again introduced a child-labor amendment resolution. Twenty-three similar resolutions were introduced by various Members of the Congress. Between February 7 and March 8, 1924, elaborate and contested hearings were held before the Judiciary Committee. Such printed hearings, known as serial No. 16, constituted a volume of more than 300 pages. As a member of that committee I actively participated in such hearings. After a deliberation of two weeks the Judiciary Committee favorably reported the resolution introduced by me, known as House Joint Resolution 184.

The Judiciary Committee directed me to prepare a report thereon. That report of 21 pages is a public document and is available. It reviewed State, national, and international legislation and conditions relative to child labor. Strenuous efforts were made by employers of child labor and Congressmen from

Southern States to prevent a vote in the House of Representatives. The opposition of such employers was largely mercenary. The opposition of many southern Congressmen was born of a sincere fear of infringement on States' rights.

After a thorough, and at times, heated debate lasting two days the resolution was adopted on April 26 by a vote of 297 to 69. However, such vote was secured only after nine unsuccessful efforts had been made to amend the resolution. It passed the House without a single amendment. One of the most forceful opponents of the resolution was the Hon. A. J. MONTAGUE, of Virginia. He is a valuable member of the Judiciary Committee, a worthy Democrat, and a former governor of his Commonwealth. His opposition was both sincere and effective. During the debate Governor MONTAGUE was kind enough to say:

> But as the gentleman from Ohio has interrupted me, I take occasion to say that his work on this subject has been faithful and able. If this measure should unfortunately meet the approval of the people of the States, its advocates will owe the gentleman from Ohio [Mr. FOSTER] a debt of gratitude. [Applause.] He has worked in and out of season and with generosity to the members of the committee who differ with him upon this subject.

This compliment from such a gentleman was quite naturally appreciated.

The child-labor amendment then went to the Senate. There it was bitterly attacked. The Senate debates covered several days; 11 amendments were proposed and each was defeated. On June 2, 1924, it passed the Senate without amendment by a vote of 61 to 23. It is now submitted to the States for ratification.

Throughout the hearings and the progress in both the House and the Senate the amendment had many valiant supporters. Among them might be mentioned:

National Child Labor Committee.
American Federation of Labor.
American Federation of Teachers.
American Association of University Women.
American Home Economics Association.
Commission on the Church and Social Service, Federal Council of the Churches of Christ in America.
Democratic National Committee.
General Federation of Women's Clubs.
Girls' Friendly Society of America.
National Council of Catholic Women.
National Council of Jewish Women.
National Council of Mothers and Parent-Teacher Associations.
National Council of Women.
National Education Association.
National Federation of Business and Professional Women's Clubs.
National League of Women Voters.
National Woman's Christian Temperance Union.
National Women's Trade Union League.
Republican National Committee.
Service Star Legion.
Young Women's Christian Association.

However, over and above all these organizations stood President Coolidge. When its death was threatened it was he who secured prompt action; without his support the amendment could never have been submitted for ratification. He not only recommended it in his message to Congress but he on several other occasions urged the importance of its passage. Only to-day, on this closing day of this session of Congress, I was called to the White House, where the President felicitated me on my part in this legislation. He took enough time from his arduous duties to have our photographs taken at his desk. No such honor had ever been conferred on me. I shall ever prize it along with the timely efforts of the President in connection with this great piece of humane legislation. Without his help it would have failed. I now feel confident that the States will ratify it and it will become the twentieth constitutional amendment. Its ratification will bring some education, health, and happiness to millions of children both now and hereafter.

Much misinformation has been given out concerning this amendment. A correction is due the public. The States which are to consider ratifying the amendment should not be left in error. No law can be passed unless three-fourths of the 48 States, by action of their legislatures, ratify the amendment. Then, and only then, will it become part of our Constitution. Should it be ratified, then Congress would have the power which Congress thought it had when in 1916 and again in 1919 Congress passed child labor laws, both of which laws were by the Supreme Court declared unconstitutional. Congress may or may not then pass a child labor law. Should Congress pass such a law, that law would serve as a minimum standard beyond which the several States might go in their State child labor laws. A majority of our States now have child labor laws. Some have weak laws, some no laws, and in some States enforcement of their present laws is very ineffective. Several States—Ohio being one—now have State child labor laws of higher standards than any possible Federal standard. No employer in Ohio could be possibly injured by any Federal child labor law, for the reason that our present standard is above any possible Federal standard.

The ratification of this amendment does not mean that Congress will enact laws prohibiting boys and girls under 18 years from working on farms or in homes. This is a rather popular delusion. No advocate of this amendment ever conceived such an idea. Not a single State ever adopted such a law. Neither of the Federal laws—which were declared unconstitutional—contemplated such. There is absolutely no danger of any such law, and the public can be accordingly assured.

The need of granting such power to Congress will become apparent by an examination of present State child labor laws. Thirty-four States now prohibit certain forms of child labor by persons under 18 years of age, such as night messenger work by girls in our large cities, employment in factories manufacturing poisons, and hazardous employment in and about dangerous machinery. The justification for such laws becomes at once apparent. It might become necessary for Congress to legislate along similar lines in order to protect thousands of children in States which have no such legislation or which refuse to enforce such legislation.

Conditions exist that can not be remedied by State laws. For instance, many New York manufacturers send their piecework across the river to be done by thousands of children in New Jersey. Both States have good child labor laws, yet New Jersey can not punish the New York manufacturer; neither can New York remedy the conditions in New Jersey. Only a Federal law can operate effectively under such conditions. Again, one State with no child labor law adjoins another State with with good child labor laws. The employer in the State with good laws is at a disadvantage in marketing his product along with the product of his competitor in the State with no child labor laws. The latter can employ children at a greatly reduced wage. This unfairly handicaps the competitor in the State with good child labor laws. This condition exists in many places and can only be remedied by Federal laws.

The Federal child labor law will be inexpensive to operate. The enforcement of these laws is always secured through work permits, which are handled by representatives of the communities where the children reside. As long as these representatives work in sympathy with the law the Federal authorities never intervene. Because of this system, a small amount of money is required for the expense of its operation.

Nine European countries have a smaller percentage of illiteracy than has the United States. This may appear shocking to many persons; yet it is true. Most of our illiteracy would have been avoided had proper child labor laws been in effect 20 and 30 years ago. The purpose of these child labor laws is not to prevent children from working. Rather it is to see that their work is done under conditions where their health and education may at the same time be cared for. This is but common sense. Our statistics clearly establish the fact that delinquency and illiteracy go hand in hand. Records of our juvenile courts furnish conclusive proof. Without exception, where illiteracy is found among children there delinquency exists in a strikingly proportionate degree. When child labor laws are effectively enforced illiteracy is eliminated and delinquency at once vanishes. No American should hesitate to advocate child labor laws which, if properly enforced, will within the next quarter of a century move the United States up the ladder of literacy at least nearer the top then we now stand.

The 16 national women's organizations whose representatives were present in Washington during the entire contest over the child labor amendment deserve unstinted praise for their remarkable efforts in behalf of this legislation. Child labor was the only measure before Congress looking for social betterment which had the unanimous support of these 16 organizations. Their work was done in a way which could give offense to no one. At the same time their work was most effective and contributed greatly to the success of this legislation. Miss Grace Abbott, of the Children's Bureau, Department of Labor, was a most valuable witness in the hearings before the Judiciary

Committee. She possessed an unlimited fund of information regarding all phases of child labor.

I trust that these remarks may help clear up some of the misapprehensions regarding the proposed child labor constitutional amendment. In States like Ohio, where their State laws are higher than any Federal laws can possibly be made, no fear can be entertained as to the effects of this constitutional amendment. In those States where poor child labor laws exist the passage of this amendment will spur them on to greater efforts. In other States where no child labor laws exist efforts will be made to bring such State laws at least up to the Federal minimum, beyond which most of the States will undoubtedly go. With such a Federal minimum law and with the States cooperating up to and beyond such minimum law better protection will be given to millions of unfortunate children. None of us are favored with more than one childhood. Our laws should not permit any child to be robbed of a reasonable amount of sunshine and play as they pass through this period of their life. They will be better educated, more healthy, and will develop into better men and women if while they are working during their childhood they are given this reasonable degree of protection from the standpoint of health, education, and contentment. However long or short may be my services in Congress, I shall be content with the knowledge that I have been permitted to play my part in securing this constitutional amendment for the better protection of millions of youngsters, the future citizens of the United States.

### A STUDY OF THE POPULATION OF THE UNITED STATES

Mr. JOHNSON of Washington. Mr. Speaker, under general leave granted to Members, I beg to present herewith a study of the population of the United States prepared for the use of the House Immigration Committee by Capt. John B. Trevor, 11 East Ninety-first Street, New York.

Captain Trevor has made an intensive study of the subject, and his views, together with his tables showing the present stock in the make-up of the people of the United States, are of much interest:

Since the immigration committees of Congress caused to be printed a study of the population of the United States (see print for use of Immigration Committee, United States Senate, and House Report No. 350), the data therein presented has been reexamined and checked by a new analysis based on a method distinct in some respects from that previously adopted. A comparison of the allotments made under both systems of computing the numerical equivalent of the persons contributed to our population by the various nations of the world show an approximation sufficiently close to justify the conclusions based upon the preliminary study. The relative simplicity of the method which is about to be explained and the working out of the data to cover all elements of the population, indigenous, native, and foreign born, should make the new table determinative where any discrepancies in the results exist.

The population of the United States as enumerated in 1920 was 105,710,620. It is composed of a white population, native born of native parentage, amounting to 58,421,957; an element characterized by the Census Bureau as foreign stock—that is, foreign born, native born of foreign parentage, and native born of mixed parentage, one parent native and one parent foreign born—amounting to 36,398,958; and a balance of predominately native born of negro descent, some American Indians, and a relatively small proportion of Asiatics, amounting in all to 10,889,705.

The Census Bureau in a publication entitled "Increase of Population in the United States, 1910–1920, Census Monograph No. 1," has amplified the results of earlier researches published in "A Century of Population Growth," concerning the composition of our population in 1900. As reference to this latter publication has been made in the preliminary study of this question it is merely necessary to say now that as a result of a perfected formula (Increase of Population in the United States, 1910–1920, pp. 189 to 193) the Census Bureau estimate the numerical equivalent of the descendants from white persons enumerated in the first census taken by the Government in the year 1790 at 47,330,000 to 47,870,000. Owing to the fact that an adaptation has been made of the method by which the latter figure, 47,370,000, was arrived at, this figure has been selected as the basis for this study. Furthermore, the method itself used in reaching this basic figure has been applied to ascertain the numerical equivalent of the descendants of the 275,000 immigrants who entered the country between 1790 and 1820, which amounts to 1,716,402. It should be added that this figure of 275,000 (Increase of Population in the United States, 1910–1920, p. 195) is an estimate by the Census Bureau based on such data as were available prior to the regular collection of statistics on immigration which commenced in 1820. As the element which entered the country between 1790 and 1820 possessed the same racial characteristics—or national derivation, perhaps we had better say, since we are dealing with national origins—as those who were enumerated by the census of 1790, they should be added to the basic figure of 47,370,000, giving a total of 49,086,402. For the purpose of this study we may call this element the basic stock of the population which we can apportion on a basis of numerical equivalents contributed from foreign sources in such proportion as has been indicated in the census publication, "A Century of Population Growth" (p. 121), hereinbefore referred to.

Now, if to this group of basic stock we add the 36,398,958, characterized by the census as foreign stock to which reference has already been made, and also the composite colored element which has been classified by the census, a total is obtained amounting to 96,375,065, to which we can give national attributions, as will be later demonstrated on the basis of estimates already computed by the United States census authorities prior to the conception of the act of 1924. This sum of 96,375,065 subtracted from the total population of the United States gives a numerical equivalent amounting to 9,335,555, whose derivation is wholly undetermined. In apportioning these various groups for the purpose of this study the basic stock has been allotted to the national groups in the proportion that the nations from which their forebears sprang, contributed to the population as enumerated in 1790. (In order to be consistent, the descendants of the Irish population in the United States in 1790, amounting to 61,534, or 1.9 per cent of the total number of persons enumerated at that time, have been apportioned between the Free State and North Ireland, on the basis of the relation between the present estimated distribution of immigrants originating in those areas, although the evidence points to the fact that the Irish in the United States during the colonial period were predominately from the north of Ireland.)

In a previous paragraph allusion has been made to the element classified by the Census Bureau as foreign stock (Vol. II, United States Census, 1920, page 897). This large group amounting to approximately one-third of the population as enumerated on that date, was apportioned in accordance with their birth or parentage to the nations of the world, on the basis of a pre-war map, it having been found impossible in the case of the native-born of foreign parentage to ascertain the province or city from which the parents of many of these people originated, although their nationality in accordance with the map of the period of their immigration was ascertainable without peradventure of doubt. Owing to this fact, there are not only some inconsistencies in the figures between the census tables for country of birth (page 694), and country of origin of foreign white stock (page 897), but also, as has just been indicated, a redistribution of the whole group is necessary to conform with the present boundaries of Europe.

A reapportionment of the 36,398,958 foreign stock has been accomplished on the basis of distribution of the foreign born in the United States, in accordance with the postwar map; for example, the total number of persons born within the pre-war boundaries of the Austro-Hungarian Empire amounted to 2,021,926 (page 688, Vol. II, United States Census, 1920). The percentage which the foreign born assignable to each of the component parts has been applied to the total foreign white stock as it appears on page 897, Vol. II, United States Census, 1920. (4,240,703 plus 133,996, that proportion of those persons of mixed foreign parentage whose fathers were Austro-Hungarian, as given on page 900, Table 4, Vol. II, United States Census, 1920, that is to say, 4,374,699.) This figure is the total which may be regarded as the Austro-Hungarian strains in accordance with the census enumerations. It should be noted, of course, that in the case of countries such as Poland and Yugoslavia, which are composed of cessions of territory or accretions from various sources, due account has been taken of the fact.

In the case of Ireland a peculiar difficulty arises from the circumstance that no division of the population on the basis of the Free State and North Ireland is printed in Vol. II of the census of 1920. The number of foreign-born persons assigned, therefore, in the table appended to this study has been arrived at by taking the figure for the quota allotted to the Irish Free State on a 2 per cent basis of 1920—see page 17, House of Representatives, Sixty-eighth Congress, first session, Report No. 350—deducting 100, dividing by 2, and multiplying by 100. The result given by this calculation is obviously the Census Bureau's estimate of the number of foreign-born persons whose place of birth is attributable to the Irish Free State, viz, 723,800. This figure of 723,800 deducted from the total 1,037,233 enables us, by calculating the percentage, to arrive at the proportion of persons born within the Free State, which may be applied to the total Irish foreign stock—4,286,720—for the purpose of distributing that element between the Free State and North Ireland. Obviously the balance not assigned to the Free State is grouped for quota purposes under the heading "Great Britain and North Ireland."

Turning now to the third column of the table comprising a group amounting to 9,335,555, to whom reference has been made before as

the numerical equivalent of the native born of native parentage, the national origin of whose parents is wholly indefinite, the following method of apportionment has been adopted. Clearly, this element represents the contribution of eight decades, of which the last which may reasonably be considered as having added substantially to our total population, is that of 1890–1900. Owing to the fact that the proportion of the various nationalities contributed by immigration to our foreign-born population has varied with every decade, each of the eight decades has been treated as a separate group, and the natural rate of increase of the total population has been applied to the net immigration for each of the said decades. The total so arrived at, obviously, is not usable, because it comprises all the persons included in the 36,398,958, who have already been disposed of. The proportions which the descendants attributed to each of the eight decades bear to the total increase of the population by immigration between 1820 and 1900 having been ascertained, it is therefore applicable to the 9,335,555, to give the numerical equivalent of white persons of unidentified origins contributed by each of the eight decades.

These groups representing the descendants contributed by the net immigration of each of the decades has been apportioned on the basis of national contributions by immigration in accordance with the percentages of distribution given on page 695, Volume II, United States Census, 1920, except that the distribution of the first three decades has been assumed to be that as of 1850, the census of 1850 being the first from which we may derive authoritative data respecting the country of birth of our foreign-born population. (While it would be possible to distribute the descendants of immigrants arriving in the United States in the decades 1820–1850 on the basis of data relating to arrival of passengers in American ports from the various nations of the world, the absence of any emigration figures involve an assumption respecting the returns which make it preferable to adopt the definitely ascertained figures of distribution for the foreign born in the United States for the purpose of this study.) While it is true that there is a variable rate of fecundity applicable to the different races, the evidence points to the fact that the variation is balanced by the relatively lower marriage rate and the high rate of infant mortality, but the natural rate of increase of our population having been applied to the composite groups of the respective decades, it is a fair assumption that the distribution given in this table is for all practical purposes substantially in accord with the facts.

In conclusion, it only remains to refer briefly to the method of arriving at the quotas to conform with the provisions of section 11, subsection (b), of the immigration act of 1924. Since the law provides that a minimum quota of 100 shall be assigned to any nationality whose proportion of the total would not reach that figure, it has been ascertained that 23 nationalities fall into this group, and the total, 2,300, has, therefore, been deducted from the 150,000, maximum number of immigrants admissible to the United States, leaving a balance of 147,700, to be distributed proportionately among those nations whose quotas run above the minimum of 100.

*An analysis of the population of the United States*

| Country of birth | Descendants of colonial stock enumerated in first census, 1790, and descendants of arrivals between 1790–1820 (numerical equivalent) | Foreign white stock (foreign born, native born of foreign parentage, and native born of mixed parentage) | Native born of native parentage contributed by arrivals between 1820–1900 (numerical equivalent) | Colored races | Total | Quota on basis of 150,000 (act of 1924, sec. 11, subsec. (b), effective July 1, 1927) |
|---|---|---|---|---|---|---|
| Albania | | 7,461 | | | 7,461 | 100 |
| Armenia | | 44,042 | 899 | | 44,941 | 100 |
| Austria | | 1,249,852 | 66,241 | | 1,316,093 | 2,171 |

TARIFF ON COPPER

Mr. JAMES. Mr. Speaker, I have had many offers of help on this bill when the next tariff bill is before Congress. As I stated in my speech of several weeks ago, we know that there was no chance of a revision of the tariff bill in a presidential year. We hope to be able to get the facts and figures that will convince everyone that a tariff on copper is needed if the industry is not to be driven out of business by foreign competition.

In remarks made on May 29, I stated that the legion would not forget its friends. In further evidence of that fact, I quote letter sent me by Hon. John R. Quinn, national commander of the American Legion, which reads as follows:

THE AMERICAN LEGION,
OFFICE OF THE NATIONAL COMMANDER,
*Indianapolis, Ind.*

Hon. W. FRANK JAMES,
*House Office Building, Washington, D. C.*

MY DEAR CONGRESSMAN: I wish to take the opportunity to express to you as a Member of the Sixty-eighth Congress the sincere and everlasting appreciation felt by the ex-service men and women of the country for the splendid manner in which you supported the national legislation of such vital interest to them during the session just closed.

There was, through your efforts, enacted into law more legislation of vital importance to the returned ex-soldier than ever before in the history of Congress. I need only recall to your attention the Reed-Johnson bill, which will afford aid to more than 100,000 disabled veterans and their dependents, save thousands of lives, and which is in fact the greatest step forward yet made by our country in bringing justice to the disabled.

In the enactment of the hospital construction bills there was provided 2,850 beds in modern fireproof Government hospitals, and this also included an appropriation of $350,000 for a training school for the blind veterans at Evergreen, Md., which we hope will tend to solve the problem of the care of this class of disabled men.

The creation of the Special Veterans' Committee in the House and in the Senate resulted in sympathetic and careful consideration of the relief measures proposed by the American Legion and contributed in a great measure to their ultimate enactment into law.

In particular at this time I want to thank you for your continued and sincere support of the adjusted compensation bill which had been pending before Congress for close to five years. The ex-service men and women throughout the country understand very clearly the situation which existed in Congress, the tremendous amount of pressure which was being brought to bear by the big financial interests throughout the country to prevent its enactment into law, the great flood of vicious and pernicious propaganda which filled the opposition press throughout the country unjustly attacking the Members of the House and of the Senate who were the friends of the soldiers, and through this channel threatening their political future if they opposed the administration leaders and continued to support what they knew and believed would be necessary, honest, and just legislation.

The adjusted compensation is a law, and on account of your interest in it, your efforts and support of it, and so far as the American Legion is concerned, the principle has been established, and it is a closed issue. In spite of this, however, the interests who were opposed to the soldiers are still inclined to continue their vicious attacks on Members of the House and the Senate who, after voting to pass the bill, again voted with more than a two-thirds majority to sustain it over the presidential veto, and this notwithstanding the fact that all of the arguments raised against it and dire threats of great calamity to our country have been proved false by subsequent events and disappeared into the air.

We want you to know that the ex-service men and women throughout the country most heartily approve your support of this legislation, and that the American people approve of your course, for the Nation is always firmly behind measures of justice for its veterans.

As national commander of the American Legion, which is the great organized body of veterans throughout the country, I believe that we are in the best position to interpret their thoughts and their wishes.

The veterans throughout the country are grateful; they will never forget the service that you have rendered them, and through the American Legion extend to you their hearty thanks.

Very respectfully,

JOHN R. QUINN,
*The National Commander.*

ACCOMPLISHMENTS OF THE REPUBLICAN CONGRESS

Mr. WOOD. Mr. Speaker, four years ago the American people commissioned the Republican Party to take charge of the National Government and put into effect policies and practices which would restore constitutional methods, safeguard and strengthen American institutions, protect American interests, compel public economy, and readjust public administration to serve the needs of peace and promote the welfare of the people.

It was the greatest economic task that ever confronted any national administration since the establishment of our Government. Partly due to the World War and partly due to Democratic mismanagement, conditions were well-nigh chaotic. This was true both in the field of private endeavor and the realm of public affairs. Never in the history of this country had there been such a violent dislocation of industry, transportation, commerce, and agriculture as took place during the years immediately preceding the advent of the present Republican administration.

In the conduct of our Federal Government almost incredible extravagance had become the rule. Haphazard methods abounded. The administrative agencies of the Government lacked teamwork, morale, and initiative. The Government securities were below par. Deficits were being incurred in Federal financing. Federal taxes were onerous. An army of 5,000,000 wage earners were in enforced idleness. Agriculture was facing actual bankruptcy. Business was depressed, and all classes of citizens were pessimistic as to the future.

The Republican Party met these conditions with vigorous and constructive statesmanship. The record shows more constructive legislation and administration during the past three years than in any previous decade of American history. It has benefited business and labor, agriculture and industry, the wage earner, the investor, the taxpayer. By contrasting the discouraging conditions which existed in almost every line of activity three years ago with conditions to-day one may see the policies of the Republican Party since March, 1921, translated into results.

PUBLIC DEBT REDUCED $3,000,000,000

June 30 will mark the end of the third complete fiscal, or business, year of the Federal Government since the Republican administration came into power March 4, 1921. The Republican administration during these three years has given the United States the best business administration ever experienced since the beginning of the Government. The credit for this must be largely attributed to Secretary of the Treasury Mellon. The following is a summary of some of the most notable business accomplishments during the past three years:

| | |
|---|---|
| Interest-bearing public debt February 28, 1921 | $24,051,684,728 |
| Interest-bearing public debt May 31, 1924 | 21,286,607,318 |
| Decrease in interest-bearing public debt | 2,765,077,410 |

In addition to this actual decrease in the principal of the public debt, there has been a tremendous decrease in interest charges on the public debt. For every reduction of a billion dollars there is an annual interest saving of $45,000,000. So the reduction in the principal of the public debt under Secretary Mellon has reduced the interest charges $120,000,000 a year. In addition, Secretary Mellon has conducted a refunding of the domestic public debt at a lower rate of interest than it originally carried, and the savings due to this refunding process already amount to tens of millions of dollars.

COLLECTION OF FOREIGN LOANS

When the Republican administration came into power there were outstanding loans to foreign governments made during the war and immediately following the war something in excess of $11,000,000,000, which included accumulated and unpaid interest. There was no arrangement existing at that time whereby either the principal or the interest on any of these foreign loans should be paid. On the other hand, due to the attitude of the Democratic administration, there was a general impression throughout Europe and in certain circles in the United States that the payment of these foreign loans would never be demanded and ultimately they would be canceled. This impression had a very depressive effect upon the credit of the United States, for if this foreign debt is not repaid by the governments owing it, it means tremendous increase in Federal taxes in this country. One of the most, if not the most, important fiscal accomplishment of this administration was the creation of a commission suggested by President Harding and Secretary Mellon and created by the Congress to effect a settlement of foreign loans. Secretary of the Treasury Mellon is at the head of this commission.

Already Great Britain and Finland have reached an agreement with the United States through this commission for the payment of their loans and the accumulated interest, and have actually started the payments. Negotiations are well under way with Belgium, Hungary, and one or two other European nations. The loans to Great Britain and Finland constitute 35 per cent of the total foreign loans. The placing of these foreign loans on a business basis with fixed provisions for their pay-

ment means an acceleration in the reduction of our interest-bearing public debt, a decrease in our Federal taxes, and enhanced value of our Government bonds.

LIBERTY BONDS INCREASE IN VALUE

As a result of these two financial policies of the Treasury Department, taken in conjunction with the general program of economy practiced by every branch of this administration, the Government bonds have advanced under this administration from 85 to par or better. There are about $20,000,000,000 of these bonds outstanding, held by between 12,000,000 and 15,000,000 individuals. The 15 per cent gain in their value under this administration represents a gain of $3,000,000,000, enriching practically one-sixth of the population of the United States.

The reduction of the public debt and fixed interest charges, the constant application of strictest economy in the conduct of every executive branch of the Government reduced routine expenditures of the Government to such a point that it was possible to pass on to the public these savings in the form of reduced Federal taxes. This was done by the revenue bill passed by the Republican Congress late in 1921.

That Republican revenue measure increased exemption in income tax applying to heads of families with a salary or wage income of less than $5,000 a year. This benefited more than 4,000,000 heads of families, or, according to records of the United States Income Tax Bureau, over 90 per cent of the income-tax payers of the country. The exemption for heads of families was increased by $500 a year, with an additional increase of $200 a year for each child or dependent. This reduction, effected in the first year of this Republican administration by an act of a Congress Republican in both branches, saved the "average families" of the United States approximately $100,000,000 a year.

REPUBLICAN TAX LAW BENEFITS COMMON PEOPLE

Other outstanding features of this new Republican tax law was the repeal of all taxes levied on goods shipped by freight, express, and parcel post. This repeal of transportation taxes, which are always added to the price of the commodities which the consumer purchases, saved the American consumers more than $1,000,000 a day. In fact, this new tax law enacted by the Republican Congress benefited the average man and woman more than all other classes of taxpayers put together. It lifted a burden from their pocketbook which had been irritating them day by day since the Democratic war taxes had been enacted and had taken from them hundreds of millions of dollars annually. It repealed the so-called nuisance taxes, such as a tax of 10 per cent on soda drinks, candy, ice cream, medicines, toilet articles, and so forth. It repealed the so-called luxury taxes. The women of the country, at least, realize that they no longer pay 10 per cent tax when they buy millinery, underwear, stockings, kimonos, petticoats, parasols, waists, and other wearing apparel. That they do not is because of that Republican tax law. It repealed all taxes on musical instruments, sporting goods, and household furniture. It repealed all taxes on life, fire, accident, burglar, and other forms of insurance. It repealed all taxes on railroad tickets, which was costing the traveling public a quarter of a million dollars each day.

One of the forms of taxation imposed by the Democratic administration was that upon excess profits, even though they were legitimate profits. During a war almost any kind of taxation can be justified. In times of peace such a tax can not be justified. It penalizes initiative. It completely checks the development of enterprises already established. It prevents extension of industrial projects and thereby reacts to the injury of labor. It discourages investments in new enterprises. It acts as a barrier to pioneering in new fields. Men who are willing to take great risks and invest great sums must be permitted to reap the benefits of their vision and risk. It throttles all business because it renders valueless business foresight and enterprise. The excess-profits tax was one of the heaviest handicaps upon the resumption of normal conditions in the commercial and industrial world. Hence the Republican Congress in framing the revenue act of 1921 repealed that tax in toto.

The Sixty-eighth Congress made a supplementary tax reduction which wiped out all remaining nuisance taxes, such as those on telegraph and telephone messages, amusement tickets, the stamp tax, and the 5 per cent tax on jewelry. The greatest beneficial feature of the tax bill passed by the Sixty-eighth Congress was the 25 per cent flat reduction on all income taxes payable in the present calendar year on incomes for the year 1923. This proposal was in the original bill as advocated by President Coolidge and Secretary Mellon, and it was also urged by President Coolidge as a special piece of legislation early in March, 1924. This feature of the bill alone saves the American taxpayers this year the sum of $350,000,000. Other features of this bill which become operative on taxes paid in 1925 will make still further reductions.

1924 TAX BILL MADE POSSIBLE BY G. O. P. ECONOMY

Let those who desire to cavil debate as to which party should be given the major part of the credit for the enactment of this particular measure. But there is one underlying fact about which there can be no debate. Whatever reductions in taxes this bill of 1924 may make, it could not have been written at all had not the Republican administration since it came into power introduced and practiced economy in the conduct of public affairs. No tax reduction bill could have been written or enacted had not the executive agencies of the Government, which do the spending, and the legislative branch of the Government, which does the appropriating, effectively cooperated with the Budget Bureau—a distinctly Republican creation—in bringing about a radical reduction in public expenditures.

There could not have been written into the tax bill of 1924 by the leaders of either party such drastic reductions in income taxes had not the Fordney-McCumber Tariff Act been bringing into the Treasury more revenue by $225,000,000 a year than any tariff law ever put on the statute books. Every dollar of the $600,000,000 collected at our customhouses through the operation of a Republican tariff means just one dollar less to be collected from the people of the country by income tax. So the Republican Party and the Republican administration may waive the question as to who actually wrote the schedules of the new tax bill, because it is known of all men that the writing of them was made possible by the economy and tariff program of the Republican administration.

DOWNWARD MARCH OF EXPENSES

Proof of this is found in the downward march of public expenditures since the Republican Party grasped the reins of government in March, 1921. This story of the decrease of routine public expenditures—exclusive of public debt interest and sinking fund—is told in the following figures:

| | |
|---|---|
| Fiscal year ending June 30, 1921 (only three months of which were under the Republican administration) | $5,115,927,689 |
| Fiscal year ending June 30, 1922 | 3,372,607,899 |
| Fiscal year ending June 30, 1923 | 3,129,418,776 |
| Fiscal year ending June 30, 1924 | 3,053,000,000 |

In other words, the cost of operating the routine departments of the Government has been slashed over $2,000,000,000 a year since the Republican administration came into power March 4, 1921.

In this work of economy the legislative branch of the Government, both Houses of which have been in control of the Republicans, has heartily cooperated. The reduction in appropriations made by Republicans since they came into control of Congress in April, 1919, is as follows:

| | |
|---|---|
| Fiscal year ending June 30, 1920 | $6,454,596,649 |
| Fiscal year ending June 30, 1921 | 4,780,829,610 |
| Fiscal year ending June 30, 1922 | 4,066,316,366 |
| Fiscal year ending June 30, 1923 | 3,940,579,667 |
| Fiscal year ending June 30, 1924 | 3,706,777,163 |

Democratic politicians in an effort to befuddle the public mind and deprive the present administration of the Republican Party of the credit of the greatest debt reduction, expense reduction, and tax reduction ever made by any established government in the same length of time, draw a comparison between expenses of to-day and those of 1915, a year when the Democratic administration was in power. They point out that the number of public employees on the Federal pay roll is greater to-day than they were under Democratic administration in 1915, and that the routine expenditures of the Government are greater to-day than they were in 1915. This is true, and upon this truth they base the false charge that the Republican administration in times of peace is not managed as economically as the Wilson administration was in times of peace.

PRE-WAR BASIS OF EXPENSES IMPOSSIBLE

The manifest unfairness of this comparison is at once evident when we take into consideration that since 1915 there has come into existence as an aftermath of the war a great many Federal activities which did not exist in the early years of the Wilson régime and which would, even though the Democratic Party were restored to power, continue to exist under Democratic administration.

For example, there is the Veterans' Bureau, which employs in round numbers 30,000 and which expends in round numbers $400,000,000 annually for the aid and relief of the Nation's defenders. It did not exist in 1915 to add its employees to the Federal pay roll and its $400,000,000 to the Federal expenditures, a sum which is greater than any other expenditure of the Federal Government to-day than the single item of taxes on the public debt. Nor would the Democratic Party if re-

stored to power be able to abolish its work, discharge its employees, and eliminate its expenditures.

There was no restrictive immigration act in 1915, and no necessity of a large force to see to it that the provisions of this act, which stands as a safeguard not only to the integrity of American labor and the high level of American wages but a safeguard of American institutions and ideals, are enforced. To do this requires heavy expenses and a large force of employees.

There was no prohibition amendment to the Constitution in 1915 and no bureau was necessary for the enforcement of the laws enacted under that amendment.

There was no Women's Bureau and no Children's Bureau in connection with the Labor Department in 1915.

Our Postal Department, in order to keep pace with the growth of business since the return of prosperity under Republican régime, has been compelled to increase its expenses and its force in a very large degree. That could not be changed except by putting the Democratic Party in power and bringing about such a panic as would prostrate all business.

The Income Tax Bureau of the Treasury Department has been vastly increased since 1915 because of the tremendous increase in the amount of business which it must transact. Even with the enormous force on hand under the Wilson régime this bureau was four years behind in its audits and collections when the Republican administration came into power. Since that time the personnel of the bureau has been decreased, but the amount of current business done has increased and all back business has been brought up and back taxes are being collected. And so the list might be continued.

The argument that there are more employees in the Government to-day and that it is costing more to run the Government to-day than it did in 1915 proves nothing except the fact that the activities of our Government have become greater and therefore necessitate a larger staff to handle public affairs. The main point is that although expenses are greater than they were in 1915 under Wilson, and the number of employees is greater than they were in that year, both expenses and number of employees have been radically reduced since March, 1921, and what is still more to the point, the American taxpayer is getting more work per employee than he did under a Democratic administration, and infinitely more service per dollar from his Government.

REPUBLICAN PARTY SAVED AGRICULTURE FROM RUIN

Next to the record of the Republican Party in debt reduction, expense reduction, and tax reduction, is its record in behalf of agriculture. The Republican Party has always been known as the friend of the American farmer. Under Republican legislation and Republican administration, beginning immediately after the Civil War, the great agricultural section of our Nation was peopled, developed, and became the granary of the world, an inland empire of wealth, prosperity, intelligence, and contentment without a parallel anywhere in the four quarters of the globe.

Agriculture of the country has passed through two or three severe crises. At such times the Republican Party has been the party which has stood by the agricultural interests in the time of their adversity. At such times the Republican Party, generally in the face of popular clamor for hasty and ill-considered action, stood against fantastic and ill-considered proposals which would have been destructive had they been enacted into law. It stood against the greenback craze, against Populism, and against free silver. In each instance its courage and political judgment won the indorsement of the American people, and its application of sound economic theories rescued the agricultural sections from ruin.

The farmer to-day realizes the absurdity of the radical Democratic claims in 1896 that the price of wheat and the price of silver go hand in hand. He also realizes the irreparable injury that would have been done him had the greenback craze succeeded under Democratic guidance. In each economic crisis the adverse conditions affecting the farmer were straightened out not by the adoption of uneconomic theories but by the sound and conservative constructive policies of the Republican Party.

It is so to-day. When the present administration came into power it is no exaggeration to state that the agricultural and livestock interests were on the verge of bankruptcy. It is probably well within the facts to assert that at no previous time in the history of American agriculture had the conditions been so distressing and apparently so hopeless. Without going into the details, it may be stated that these conditions were due almost entirely to two policies of the outgoing Democratic administration.

During the war and immediately following, the Democratic administration urged the farmer to put forth every energy and use every resource to produce a maximum amount of food products. In response to this call of the Government the farmer made large investments, purchased an enormous amount of equipment, made every possible extension to his plant, and almost without exception incurred tremendous liabilities in doing so.

DEMOCRATIC POLICIES WRECK THE FARMER

Then, practically without any warning, the Democratic administration in the summer and fall of 1920, at the very time the harvests were getting into market, restricted credits. The immediate result of this was a deflation of agricultural prices all along the line and, at the same time, the demand by financial institutions upon the farmer for payment of his obligations. This, then, was the situation: He had produced a harvest of unequaled quality at the highest cost in the history of agriculture. He had produced it on high-priced land with expensive machinery and with farm labor receiving unprecedented wages. Just as he was to reap his reward he found his market destroyed and himself compelled to sell his products at whatever price he could obtain in order to meet the demands being made upon him by the financial institutions who had been ordered by the Federal Reserve Board to drastically curtail their loans.

These conditions all existed at the time the Republican Party came into power in March, 1921. They were brought about by policies of the Democratic administration. American agriculture has seldom experienced worse conditions than it faced in the spring and summer of 1921.

The first concern of the Republican administration was relief from those conditions. To supply the need for ready money and temporary credit the War Finance Corporation's powers were extended to make emergency loans, and it loaned to agricultural and livestock interests at the rate of over a million dollars a day for over a year.

To stop the importation of farm and dairy products and protect the home market of the American producer the farmers' emergency tariff was enacted. Relief due to this legislation was immediate.

UNPRECEDENTED LIST OF FARM LAWS

In the three years since March, 1921, the Republicans in Congress have enacted more fundamental, constructive legislation in behalf of the farming interests of the United States than was enacted during the entire half century preceding 1921. The outstanding farming legislation which has been enacted by Republicans in Congress since they were called in special session in April, 1921, by the late President Harding is as follows:

Farmers' emergency tariff.

Revision of act creating War Finance Corporation enabling it to make loans for agricultural and livestock purposes and provide it with a billion-dollar revolving fund for that purpose. The life of the War Finance Corporation as thus revised has been extended three times since the revision.

Revision of the Federal Reserve Board act providing for representation on the board of agricultural interests.

Revision of Federal farm loan bank act, which not only amended the law regarding the sale of Federal farm loan bank bonds so as to facilitate their marketing, but also increased the available funds of the Federal farm loan bank by $25,000,000.

Agricultural credit act, sometimes known as the intermediate credit act.

Revised United States warehousing act. The revision of this act should be bracketed with the agricultural credit act, as the two are complementary.

Cooperative marketing act, authorizing and legalizing the formation of cooperative marketing associations to sell farm products and to buy farm supplies.

Butter standard act.

Filled milk act.

Creation of dairy bureau in the Department of Agriculture.

Packers and stockyards act.

Grain futures act. The first act was declared unconstitutional, and the Sixty-seventh Congress enacted a second law eliminating the unconstitutional features of the first one.

Revised Federal highway act.

Two seed loan acts to relieve emergencies in the drought-stricken districts of the Northwest and Southwest.

A series of acts giving leeway on payments due from those agricultural producers on irrigated or reclamation projects, those who had purchased Indian lands, and those who were using Government lands for grazing purposes. These relief acts were necessary because of crop failures and the agricultural crisis which had brought the producers face to face with bankruptcy and with a loss of all of their land were their contracts with the Government enforced.

Appropriation of $10,000,000 for purchase of food products to be sent to Russia.

Fordney-McCumber Tariff Act which continued all of the protective schedules that were enacted in the farmers' emergency tariff.

In addition to this legislation there has been other extension of aid to the farming and livestock interests. Early in the Harding administration, before the War Finance Corporation had time to function, there was formed, under the direction of Secretary Mellon, a voluntary pool of $50,000,000 for the purpose of relieving the acute situation in the livestock industry. Between $19,000,000 and $20,000,000 of this pool was loaned and the livestock industry tided over until more permanent relief could be obtained.

PRESIDENT COOLIDGE LEADS IN RELIEF

On January 23 of this year, when the situation in the wheat-growing States in the Northwest became so critical as to involve the banks and threaten the entire financial and commercial structure of that section of our country, President Coolidge sent a special message to Congress urging the enactment of certain legislation. At the same time he called a conference of the leaders in agricultural, financial, and business circles of the Northwest and took counsel as to what steps were necessary and advisable to meet the crisis. As a result of this conference a voluntary organization, known as the Agricultural Credit Corporation, was formed under the direction of Secretary Mellon, financed by the banking and commercial interests of the country, with a paid-up capital of $10,000,000 and with the power to borrow from the War Finance Corporation in an amount equal to ten times its paid-up capital. Under this arrangement this corporation has a possible fund of $100,000,000.

Within 60 days from the time this corporation began to function over 200 banks had been so strengthened that they were saved from closing their doors and several of the larger banks in the Northwestern States which had closed their doors were enabled to reopen without loss to their depositors. Arrangements had also been made to redeem delinquent taxes of hundreds of farmers so that they might retain their land and continue operations. Arrangements had been made for financing farmers in the Dakotas for the purchase of spring seed wheat and for the purchase of dairy cows in order that they might be started along the road to diversified agriculture.

REPUBLICANS EXTEND OVER $1,000,000,000 IN ACTUAL AID TO FARMERS

The Republican administration found the agricultural and livestock interests of the country facing bankruptcy as a result of Democratic policies. The first thing needed was financial aid to tide them over until economic processes became normal. A review of the records shows that in the last three years the American farmer has received directly from governmental agencies financial assistance in a sum in excess of $1,314,782,876. The War Finance Corporation contributed $300,000,000 of this amount. Federal farm loans, which practically did not function under Democratic administration, contributed $757,000,000. The intermediate credit banks, establish in August, 1923, had within four months' operation contributed $35,000,000. Congress by direct appropriation contributed $3,500,000 for seed loans in drought-stricken districts. The voluntary pool of financial interests, under the direction of Secretary Mellon, early in 1921 contributed $20,000,000 in cattle loans; reduction of freight rates on strictly agricultural products and livestock contributed $200,000,000. This brings the sum well in excess of $1,314,000,000. In addition, the farmer obtained his share of the benefit of freight-rate reductions on building material, coal, and manufactured goods, which aggregated $500,000,000. The farmer and livestock grower on reclamation and irrigation projects had their payments to the Government and their rentals on Government land rebated or the time extended. So that, all told, the Republican administration, through governmental agencies, has extended directly in cash emergency aid to American agriculture in the last three years a sum conservatively estimated at $1,500,000,000.

POLITICAL DEMAGOGUES ATTEMPT TO "FARM THE FARMER"

Whenever the farmer is in distress he becomes the object of demagogic solicitude by political agitators who seek to cash in upon his adversity, using his misfortunes as stepping stones to place themselves in power. The present crisis has been no exception to this rule. During the campaign of 1922 a number of such demagogues succeeded in insinuating themselves into the confidence of agricultural communities and having themselves elected to Congress, some in one House and some in the other, upon the representation that the Republican Party was not doing its duty by American agriculture and that if elected they would see to it that remedial legislation and remedial measures were taken to bring the farmer out of his difficulty. In this campaign of deception they were aided by the Democratic Party.

These two forces joined hands at the beginning of the Sixty-eighth Congress to control the organization of both Houses. In the House of Representatives they succeeded in bringing about what they styled a "liberalization" of the rules for the purpose of enabling them to force action upon such legislation as they desired brought to the attention of the House. They held up the organization of the Senate for weeks through a fight to control the Committee on Interstate Commerce, which handles railroad legislation. In this fight they were successful, in that the coalition of so-called Progressives and Democrats elected as chairman of that committee Senator SMITH, of South Carolina. The events in connection with the organization of the House and the Senate demonstrated beyond the shadow of a doubt that the combination of the Democratic and so-called Progressive forces could control, if they desired, the action of both branches of Congress. The Republican majority on paper disappeared in point of fact. A number of men who used the good name and the label and the machinery of the Republican Party to get themselves elected to Congress deserted the party, repudiated their party pledges, and joined hands with the Democrats to control Congress, ostensibly in order to enact legislation helpful to the agricultural classes.

DEMOCRATIC-RADICAL COMBINATION FALL DOWN ON PROMISES TO FARMER

The exposure of their hypocrisy is found in the record of the first session of the Sixty-eighth Congress, and is magnified by a comparison of the record of that session with the record made by the Sixty-seventh Congress, which was reliably Republican in both branches. All of the farm legislation, both that of an emergency character and that of a fundamental and constructive nature, which I have enumerated was enacted by the Sixty-seventh Congress, in control of the Republican Party. No farm legislation of any kind, with the single exception of the creation of a dairy bureau, was enacted during the first session of the Sixty-eighth Congress, which was controlled by the combination of Democrats and deserters from the Republican Party.

No legislative proposal brought to the attention of the Sixty-seventh Congress by the organizations of agricultural producers, livestock associations, dairy interests, and other organizations representing the rank and file of the farmer was rejected by that Congress. The Republicans passed every bit of legislation requested of them by the reputable farm organizations of the country, and they did not enact any legislation which was objected to by those organizations. On the other hand, no agricultural legislation asked by agricultural organizations of the Sixty-eighth Congress, controlled by the combination of Democrats and so-called progressives, was enacted. This Congress turned a deaf ear to the petitions of the farm organizations of the United States.

None of the gentlemen who campaigned their districts and their States asking for the support of the farmer vote upon the plea that they were the friend of the agricultural producer exhibited any activity after they were elected in behalf of the farmer.

None of the bills which were introduced and came before the committees during the Sixty-eighth Congress bore the names of any of the agitators and demagogues who were elected upon the ground that they were going to rescue the farmer from the plight in which they alleged the Republican Party had plunged him.

The radical-Democratic combination in the House did not invoke any of the "liberal" rules which they had succeeded in obtaining to call from any committee any bill having for its purpose the relief of any farmer or livestock grower.

Notwithstanding the Democratic-radical combination controlled the Interstate Commerce Committee in the Senate, there was not reported from that committee any legislation looking to a reduction of freight rates for the relief of agricultural sections.

Only when Congress was about to adjourn did these false friends of the farmer begin to assert themselves by filling the newspaper columns with interviews demanding that Congress remain in session all summer in order that the farmer might be given needed legislative relief. But they were strangely silent as to why they had not done anything for the farmer during the six months Congress had been in session, notwithstanding the fact that they were in control of both branches

and had the power to call from any committee any bill upon which they desired to force a vote.

Briefly, it was the Sixty-seventh Congress, reliably Republican in both branches, that has given the agricultural and livestock interests all of the relief and all of the fundamental legislation for the future which they have obtained since the Democratic Party went out of power leaving them facing bankruptcy.

REPUBLICANS INHERITED ARMY OF 5,000,000 IDLE WAGE EARNERS

Not only has the Republican Congress aided the farmer and livestock interests in every possible way, but the Republican executives have left no stone unturned to bring about temporary relief and hasten permanent readjustment of conditions affecting the agricultural sections of our country. One of the most recent examples of this is the Executive order of President Coolidge increasing the duty on wheat 12 cents a bushel, the duty on wheat flour 26 cents per hundred pounds, and at the same time a decrease of 50 per cent in the ad valorem rate on mill feed. This action was taken under the power vested in the President by the flexible provisions of the Fordney-McCumber Tariff Act, which empowers the President, on the basis of recommendations by the United States Tariff Commission, to increase or decrease rates not to exceed 50 per cent, the power to increase being used to afford additional needed protection and the power to decrease being used to prevent abuse of protection. The Executive order in this case afforded needed protection to northwestern wheat growers and millers from Canadian competition and afforded relief to stock growers in the matter of cattle feed.

Great as has been the transformation in the agricultural world since March, 1921, it has been no greater than that in the industrial world. When the Republican Party came into power in March, 1921, the number of idle men and women who normally were wage earners was between 4,000,000 and 5,000,000. This was a direct legacy of the Democratic administration. The unemployment situation began to be serious in the summer of 1920, when the Democratic administration, under the Wilson régime, was in full bloom. So many hundreds of thousands of wage earners were turned into the streets that Mr. Gompers, president of the American Federation of Labor, called a special meeting of the executive committee of that federation in Washington in the fall of 1920 to consider the industrial crisis. In December, 1920, the United States Employment Service of the Department of Labor, then under Democratic control, estimated there were 2,000,000 wage earners then in enforced idleness. On January 6, 1921, the Plumb Plan League, composed of American Federation of Labor unions and railroad brotherhoods, gave out a statement to the effect that 2,350,000 workers ordinarily employed were at that time unemployed. On April 25, 1921, a little over a month after the Republican administration came into power, but before any of its policies could be put into effect, Samuel Gompers, in an address at a labor convention in Philadelphia, made the statement that the number of unemployed was 5,000,000.

The Republican administration immediately set about through legislative and administrative measures to relieve the situation. It did not attempt this by temporary makeshifts, by class legislation, or by appeals to prejudice. It brought about prosperity for the industrial wage earner by giving attention to underlying causes which produced unemployment. Agricultural interests normally consume about 40 per cent of the manufactured goods of the United States. When the Republican Party came into power the agricultural consumers were "out of the market" because agriculture was bankrupt. The relief afforded agriculture by the long list of measures enumerated put that great buying class of people on its feet, and by so doing reopened hundreds of factories and put hundreds of thousands of wage earners back on the pay rolls.

REPUBLICAN LEGISLATION FOR AMERICAN WAGE EARNERS

When the Republican Party came into power there was a Democratic tariff which permitted the flooding of this country by the cheaply made products of Europe. At that time all Europe was on a debased-currency basis. Men were being paid in money worth but a fraction of its normal value. Supplies were being bought on the same basis. Because of this European manufactured goods were being laid down in the United States for a mere pittance compared with normal values. Furthermore, Europe was in a mad race to turn out manufactured goods in an effort to regain the markets she had lost during the war. Industrial production is the one thing for which all Europe was equipped, because the war had turned that Continent into one vast workshop. The Republican Congress remedied this situation by the enactment of a protective tariff, which, while it did not stop the imports, at least did check them.

When the Republican Party came into power the tides of immigration were flowing to this country in a volume never before witnessed. Hundreds of thousands were fleeing devastated Europe and literally millions more were preparing to do so. Every immigrant became an active competitor with American citizens for industrial jobs. One of the first acts of the Republican Congress called in special session in April, 1921, was the enactment of the restrictive immigration law. Had this law not been enacted and put into effect immediately, the unemployment situation, critical though it was, would have been aggravated by the addition of hundreds of thousands of European immigrants. At that time the housing situation in our industrial centers was at its worst and rents were at a peak. The continued immigration would have intensified this situation. It is safe to state that no bit of legislation so operated to stabilize the industrial situation and reassure the American wage earners as this restrictive immigration law.

High interest rates discouraged the borrowing of money upon the part of industrial interests for the purposes of extensions and improvements. Under the policy of the Treasury Department these rates were reduced, and business of all kinds was thereby stimulated, building resumed, and industrial enterprises reopened.

Taxes, which in the last analysis are paid wage earners, were drastically reduced by the revenue act of 1921.

WAGES HIGHEST IN HISTORY OF AMERICA

The result of all this is common information. Within a year the army of unemployed had disappeared. To-day in the United States more wage earners are employed at a better average wage than ever before in the history of the country in times of peace. Proof of this is furnished in a report of the United States Bureau of Labor Statistics, issued in December, which stated that the average union wage in all trades in the United States was the highest ever known in the history of American industry. According to this report, compiled from the union scale of wages and hours of labor of all organized trades in 66 of the principal cities of the United States, wages in 1923 were 9 per cent higher than in 1922, 84 per cent higher than in 1917, 111 per cent higher than in 1913, 123 per cent higher than in 1910, and 135 per cent higher than in 1907.

Not only is American labor under Republican administration employed at better wages than ever before in the history of this country, but the standard of living is higher. Working conditions are better and hours are shorter. The prosperity of the wage-earning class is proved by the fact that they are buying more luxuries than ever before, buying more commodities than ever before, and at the same time are putting more money in the savings banks than ever before.

LABOR ALWAYS PROSPERS UNDER REPUBLICAN RULE

The improvement of the condition of labor under Republican administration since March, 1921, is only typical of what happens under every Republican administration. The workingman of every country turns to the United States as the model Nation for the wage earner. It is because of this fact that the tides of immigration from every quarter of the globe have flowed toward and into the United States. No matter how well off working people have been in their own country compared with their own countrymen, when they wished to improve their conditions they came to the United States. It is due to the policies of the Republican Party during the last 60 years that the standard of living, the standard of working conditions, and the level of wages in this country have been made the highest of any Nation in the world. Practically all laws which have been enacted during the past three-quarters of a century for the betterment of working conditions, particularly those of women and children in industry, are of Republican origin.

It was a Republican Congress which enacted the Federal employers' liability act, the child labor law for the District of Columbia, the Government compensation act, the law requiring the use of safety appliances on railroads. It has been Republican Congresses which have broadened the scope of the activities of the Bureau of Labor from time to time in order that it might best serve the interests and promote the welfare of wage earners. The Bureau of Mines was created by a Republican Congress, and the Children's Bureau and the Women's Bureau.

REPUBLICANS TAKE CARE OF WOMEN AND CHILDREN

It is interesting in this respect to note that the Women's Bureau of the Department of Labor has proved so valuable in safeguarding the interests of women engaged in industry that the Democratic Party has been trying to steal credit for it. Senator ROBINSON, of Arkansas, in his speech notifying Gover-

nor Cox of the Democratic nomination in 1920, endeavored to claim credit for this law, because it was enacted during the incumbency of a Democrat in the White House. The record is clear and unimpeachable. The bill to create this Women's Bureau was introduced in the House by Representative Campbell, Republican, of Kansas. It was introduced in the Senate by Senator Kenyon, Republican, of Iowa. It was passed by the House and Senate, both of which were Republican.

The duty of the Women's Bureau is to promote the welfare and protect the health and life of wage-earning women everywhere. Some of the details intrusted to this bureau are: Seats in industrial establishments where women work, so that they will not have to stand on their feet for hours at a stretch; rest rooms, drinking facilities with good water, proper ventilation and sanitation, separate toilets; guarding against dangerous machinery; proper fire protection and adequate escapes—in short, the supervision and regulation of all the environment surrounding women at work.

President Harding, in his first message to the Republican Congress at the opening of the special session in April, 1921, urged the enactment of a law extending Federal aid to the several States in connection with maternity and child welfare. This was in conformity with the pledges of the party in response to a nation-wide demand by women for such legislation. The Republican House and Senate acted promptly. Both passed the bill by an overwhelming majority and appropriated $1,240,000 to carry out the provisions of this great humane piece of legislation, pronounced by women to be the most forward bit of legislation since the suffrage amendment. Furthermore, that Republican Congress increased the appropriation of the Children's Bureau of the Labor Department $40,000 over the previous year and increased the appropriation of the Women's Bureau $25,000 over the previous year. Altogether the Sixty-seventh Congress during the two first years of this administration appropriated $1,560,000 for women's and children's welfare work in connection with the Labor Department during the current fiscal year, a record that has not been equaled by any previous Congress.

These are only typical of the attitude of the Republican Party.

COMPARATIVE RECORD OF STATES

Minimum wage for women engaged in industries is provided in 11 Republican States and in only one Democratic State.

Mothers' pensions are provided in all but eight States, of which seven are in the Democratic "solid South."

Women are not permitted to work in mines in 19 Republican States.

Thirty-seven Republican States have limited the number of hours per week women may work in factory to 10 or less, but only seven Democratic States have such limitation. Nine Republican States limit the hours to 8, and 12 others to not over 9.

Twelve Republican States prohibit women from working at night in certain industries, but no Democratic State has such a prohibition.

The Republican Party has led the fight to make America safe for children. The child can not protect itself; therefore it must be protected. This is Christianity, "for of such is the Kingdom of Heaven." It is civilization, for the home and fireside are the corner stones of civilization, and the child of to-day is the parent of to-morrow. It is democracy, for the children of to-day are the citizens of to-morrow, who will be largely determined in their attitude toward Government by the Government's attitude of to-day toward them. It is good political economy, because the child of to-day is the man power of industry to-morrow.

That is why no greater duty could be performed by our Government than the safeguarding of the health, lives, limbs, and morals of children. What is the record?

REPUBLICANS CREATED CHILDREN'S BUREAU

The first national conference on child welfare was called by President Roosevelt in 1909 and was known among child welfare workers as the White House Conference. The outcome of this conference was the recommendation of the establishment of a Federal agency connected with the Department of Labor which would devote its time exclusively to the problems of child welfare and child life. Acting upon the recommendations of this conference, the Republican Congress under President Taft's administration established the Children's Bureau in the Department of Labor. The Democrats of Congress opposed its creation. Later on, the Republicans in Congress saved the life of this bureau by making a fight for appropriations adequate to keep it alive. In the second session of the Sixty-fourth Congress (1915–16), under President Wilson, the Democratic-controlled House Committee on Appropriations deliberately omitted appropriating money to the Children's Bureau. It remained for Representative James Good, Republican, of Iowa, to wage a fight on the floor of the House for such an appropriation, which he proposed in the form of an amendment to the committee's report. Every vote against the amendment was Democratic. The Republicans contributed all their voting strength in support of the amendment and thereby saved the bureau.

REPUBLICANS LED IN CHILD-LABOR FIGHT

The Republican Party was the pioneer in the work for the enactment of child-labor legislation. The beginning in such legislation was made in the New England States, New Jersey, Pennsylvania, and Ohio, even before the Civil War. Agitation of Federal child-labor legislation began as early as 1880, because it became evident at that time that the great diversities in child labor laws of the States and the lack of any such legislation in many States penalized the industries of those States which were humane enough to attempt the protection of children by limiting or prohibiting their being employed to their own injury and exploitation and to injury of adult laborers.

The first fight in Congress to enact Federal child labor laws was inaugurated in December of 1906.

Senator Albert J. Beveridge, Republican, of Indiana, and Representative Herbert Parsons, Republican, of New York, introduced bills in that session of Congress "to prevent the employment of children in factories and mines"; and Senator LODGE, Republican, Massachusetts, introduced a bill "to prohibit the employment of children in the manufacture or production of articles intended for interstate commerce." The efforts during this Congress to enact a Federal child labor law were bitterly opposed by the solid southern Democracy, representing cotton fields, turpentine camps, textile mills, and other industries of that section of the country which fatten on child labor. The first Federal child labor law was passed by reason of Republican support. It was reported favorably out of the committee in the House by unanimous Republican backing, with a minority report filed by Democrats. It passed the House with 98 per cent of the Republicans voting for it. Three days before the act went into effect it was enjoined in the Federal courts in the State of North Carolina, and the United States Supreme Court in a 5-to-4 decision declared it unconstitutional. Following this decision a second Federal child labor law was passed as an amendment to a revenue bill, which provided for a tax of 10 per cent on the annual net profits of industries which employed children in violation of the age and other standards enumerated in the act. There was no roll call upon this bill in the House. In the Senate the Democratic Party opposed its passage, and one-third of their number, all from the South, voted against it, while every Republican in the Senate voted for it. This law, like the first law, was immediately attacked in the courts in the Southern States, and the United States Supreme Court again held that it was not within the power of Congress to enact such a law.

DEMOCRATIC STATES WILL NOT PROTECT CHILDREN

It was argued both times by the Democrats in Congress that there was no need for a Federal child labor law, because all necessary legislation regulating the employment of children could be, and would be, enacted by the several States. The contradiction of this argument is found in the fact that none of the Democratic States in the "solid South" whose representatives made this argument have enacted necessary child labor legislation.

The records show that only 13 States have child labor laws which measure up in every particular to the standards established by the two Federal laws that were declared unconstitutional. These States are: Alabama—the only "solid South" State in the list—Connecticut, Illinois, Indiana, Kansas, Kentucky, New York, Ohio, Oklahoma, Oregon, Tennessee, West Virginia, and Wisconsin. In addition, the following five States have child labor laws which measure up to the Federal standards except in regard to employment in mines or quarries: Massachusetts, Minnesota, Montana, New Jersey, and North Dakota; none of which States, with the exception of Montana, have any mines or quarries to such an extent as to make the absence of this provision injurious to the childhood of the State.

Notwithstanding the protest of the Democrats from the "solid South" that States could be depended upon to enact any needful child labor legislation, the records show that since the Federal child labor law has been declared unconstitutional only eight States have enacted legislation raising the standard of their child labor laws. These States are: Delaware, Maine, Michigan, Missouri, North Dakota, Rhode Island, South Dakota, and Wyoming.

"SOLID SOUTH" HOME OF CHILD-LABOR EVIL

It is in the "solid South," where the legislatures are solidly Democratic, that legislation stopping the exploitation of child labor is most needed. While child labor is not confined to any section of the country, it is at its worst in the solid Democratic Southern States. In Tennessee, according to United States census reports, 17 per cent of the total child population is employed contrary to standards fixed by the Government regulating child labor; in Arkansas, 19 per cent; in Georgia, 21 per cent; in Alabama and South Carolina, 24 per cent; and in Mississippi, 26 per cent. In Northern States the percentage is much lower, and in the Pacific Coast States only 3 per cent of the total child population is employed in what is classified as gainful labor. The refusal of the Democratic "solid South" to prohibit or regulate child labor, and its increasing output of manufactured goods produced by child labor at pitiful cost, began to seriously affect northern industries in Republican States which had humane laws prohibiting the employment of children in factories. This situation made it necessary for Congress to amend the Constitution so that it might have the power to regulate or to prohibit child labor.

Congress was petitioned by six Republican legislatures—Massachusetts, California, Nevada, North Dakota, Washington, and Wisconsin—and a long list of national organizations representing organized labor, churches, women, teachers, social and religious bodies, and the Republican National Committee, to propose such an amendment to the Constitution. In conformity with this request a joint resolution was introduced by Representative FOSTER, Republican, of Ohio, in the House, and Senator SHORTRIDGE, Republican, of California, in the Senate. The resolution proposing the amendment passed both Houses, and the amendment—the twentieth to the Constitution—giving Congress power to regulate or to prohibit child labor is now before the several States of the Union for their ratification.

GREATEST WELFARE MEASURE OF CENTURY

What the women of the country characterize as "the greatest welfare measure of the past decade" is the maternity and infancy act which the Sixty-seventh Congress, Republican, enacted in November, 1921. Compelling reasons for this were disclosed by the investigations of the Children's Bureau, established under President Taft's administration. These investigations showed an unnecessarily, and therefore disgracefully, high death rate among mothers and infants. Approximately 250,000 babies were dying annually during the first year of their life and 20,000 women were dying in childbirth. The United States had the highest maternal death rate of any civilized nation in the world, and its infant death rate was higher than that of nine foreign nations. In passing the maternity and infancy act the Republican administration merely recognized the importance of safeguarding the lives of mothers and children and of rendering cooperation with the States in promoting the health and hygiene of maternity and infancy. Forty States have accepted the provisions of this act. As a result of this act 33 of the States have increased their appropriations over the amount which they formerly expended for this purpose.

Turning for a moment to State legislation, we find that 27 Republican States have laws prohibiting children under certain ages from working in certain industries; only 13 Democratic States have such prohibition. Twenty-four Republican States prohibit such working in certain industries over eight hours a day; only 6 Democratic States have such prohibition. Thirty Republican States prohibit night work in industries by children; only 10 Democratic States make such prohibition.

REPUBLICAN PARTY SPONSOR OF EDUCATION

The child and the school are intimately associated. The child's future is largely determined by his schooling. A State's literacy is an index to its school system. Twenty-seven Republican States have compulsory school attendance during the entire school year; only seven Democratic States have such a law. Twenty-one Republican States provide for evening and continuation schools; one Democratic State makes such a provision.

Among all the States the least illiteracy is in the solid Republican State of Iowa. Among all the States the greatest illiteracy is in the solid Democratic State of Louisiana. Only six Democratic States have less than 12 per cent illiteracy. Only two Republican States have illiteracy as high as 12 per cent. Sixty-four per cent of the Republican States have less than 5 per cent illiteracy. Sixty-four per cent of the Democratic States have more than 12 per cent illiteracy.

The striking contrast between the records of northern Republican and Democratic "solid South" States relative to legislation protecting women and children in industry can be duplicated in practically every kind of industrial legislation. The northern Republican States are a generation ahead of the Southern States in legislation affecting the health and safety of employees—such as the prohibition of sweatshops, the necessity of having fire escapes on factories, the prohibition of insanitary rest rooms, minimum wage laws, workmen's compensation laws, mothers' pension laws, and so on through the long list of industrial legislation which has for its object the improvement of the working conditions and the protection of their life, limb, health, and morals.

DEMOCRATIC SOUTH REGARDS LABOR AS MENIAL

This is the logical and inevitable result of the two different viewpoints of the North and the South toward manual labor. Dating from the days of human slavery, when all labor in the South was regarded as menial and degrading, the Southern States have been reluctant to recognize the human rights of the working classes. This reluctance is accentuated because of the additional fact that the bulk of labor is done by the negro, whom the Democratic "solid South" does not regard as entitled to any rights. On the other hand, the North, from the days of the agitation against slavery, has been the citadel and the hope of free labor; labor that was given not only its right but was accorded honor.

The northern industrial States have been developed by free labor. For that reason the northern Republican States lead in the matter of all legislation looking to the upliftment of working conditions, the improvement of industrial standards, and the protection of those who earn their living in the sweat of their brow.

The Democratic Party offers no hope to the wage earners of America. Its traditional policy, that of free trade, has been proved over and over to be the worst economic enemy American wage earners have. In the "solid South," where the Democrats literally hold every office, where they constitute 100 per cent of the legislatures which write the laws, 100 per cent of the judiciary which interprets the laws, and 100 per cent of the executives who administer the laws, wages are low, hours of labor are long, vicious contract-labor systems amounting to peonage and human slavery exist, little children are exploited, women are worked like beasts of burden, conditions surrounding labor are deplorable, the school system is choked and stunted in order to extract from children every possible hour for work, and Federal laws prohibiting these conditions are challenged in the courts.

NO HOPE FOR LABOR IN SOUTH-RIDDEN DEMOCRACY

A stream can not rise higher than its source. What sort of Federal legislation could be expected in behalf of labor from a party which owes not only its strength but its majority to that section of the country? If the Democratic Party really believes in better working conditions for wage earners, if it really believes in better living and educational facilities for children, if it really believes in improvement in the industrial and social world, why have not the solid Democratic States written these reforms into their statute books and put them into effect in their own Commonwealths? The plain truth is that the "solid South" is against these reforms in the industrial world. Their laws prove it. The conditions within their States prove it. The attitude of their representatives in Congress who fought the Children's Bureau, the child labor law, the Women's Bureau, and other labor legislation proves it.

Yet the "solid South" is the heart, the bone, and sinew of National Democracy. The Democratic Party could not make a respectable showing were it not for the "solid South." Out of the 266 electoral votes necessary to elect a Democratic President 157 come from the "solid South." It starts with 157 electoral votes sure in every election. It has that much handicap over the Republican Party. It has this handicap because, primarily, it disfranchises the bulk of its laboring people, because it insists upon the perpetuation of the rule of the aristocrat who looks upon labor as degrading. Whenever the Democratic Party controls Congress the Democrats from the "solid South" control every committee and furnish a majority of the Democratic votes in both branches. So that no matter what pleasant promises are made in the Democratic national platform to catch the labor vote, it must be kept in mind that these promises can never be redeemed by a Democratic Congress, because the votes to redeem them must come from States which are inherently, traditionally, and constitutionally opposed to recognizing the fundamental rights of the working man.

PRESIDENT COOLIDGE POSSESSES UNEQUALED LABOR RECORD

On the contrary, the Republican Party is presenting to the wage earners of the United States as a candidate for the Presidency a man whose record in behalf of the wage earner equals, if not indeed surpasses, the record of any man who has ever offered himself for the consideration of the American electorate.

President Coolidge accepted his nomination for the Vice Presidency from the Governorship of Massachusetts. Massachusetts was the first industrial State in the United States to enact legislation which prevents the employment of women and children for more than 48 hours in any one week; Governor Coolidge was more responsible for this than any other man. After the act was passed by the legislature the associated industries of the State, which had fought the bill at every step, sent a committee of some 25 or 30 to the Governor and endeavored to have the bill vetoed or sent back to the legislature to have the work week lengthened. This he declined to do. Later, referring to his act in signing the bill, he stated that he would rather be known as the governor who signed the 48-hour bill for women and children than to be known as the governor during the police strike.

For more than 50 years the textile workers fought for the passage of a weavers' specification bill which would require textile mill owners to furnish a price list for specified work done by the weavers. Each year the bill would pass the house but would be defeated in the senate. Finally, through the assistance labor received from Governor Coolidge, this legislation was adopted and signed by him.

Significant also of his record for improving conditions of workingmen is a letter written to Governor Coolidge on July 30, 1919, by John Golden, general president of the United Textile Workers of America, in which he tendered the thanks of that organization for his influence upon the textile manufacturers of New England "which," John Golden said, "greatly assisted the bringing about of the successful termination of our request for a 15 per cent increase in wages."

BROTHERHOOD OF TRAINMEN PRAISE COOLIDGE

As another instance I quote the following resolutions unanimously adopted by the convention of the Brotherhood of Railway Trainmen:

Whereas the Hon. Calvin Coolidge, Governor of Massachusetts, has by his acts as a representative of the people of the great Commonwealth of Massachusetts demonstrated on all occasions his fairness and given his support to all legislation favorable to the laboring people of the State: Therefore be it

*Resolved by the second triennial convention of the Brotherhood of Railway Trainmen,* That the thanks of the brotherhood be extended Governor Coolidge for his stand in behalf of the railroad men in matters of legislation while in the house of representatives, the senate, and as chief executive of the State; and be it further

*Resolved,* That the president and the general secretary and treasurer be, and are hereby, instructed to communicate a copy of this resolution to Governor Coolidge, with the best wishes for future success.

As a member of the Massachusetts State Legislature, Calvin Coolidge identified himself as actively favoring a number of measures for the benefit of workingmen. He supported the full crew bill and voted to pass it over the veto of the governor. He urged the adoption of a law which would require street railways to equip their cars with lifting jacks sufficiently heavy to lift a car from the tracks in case of accident. He urged the adoption of legislation which would require first-aid equipment in steam and electric cars and around railway and railroad yards. This legislation was finally adopted while he was governor, and his signature made the law effective.

He urged the passage of the absentee voting bill, a very beneficial piece of legislation for labor, particularly the laboring men who, because of necessity, are away from their homes on election day. This bill met defeat several times, but was finally adopted during President Coolidge's administration as governor.

While Governor of Massachusetts, Coolidge also aided in having adopted, and he as governor approved, among other humane legislation, the following, at the request of the workers:

Bill providing for two-platoon system for firemen in such cities and towns as accepted the act. (This system, as a result of this act, exists in every city and almost every town in Massachusetts at present.)

Bill requiring posting of decrees of minimum wage commission by employers affected. (This bill helps to safeguard the interests of women and children in industry.) This bill was opposed by employers.

Bill empowering insurance commissioner to require insurance companies doing business under workmen's compensation act to deposit with the State treasurer sufficient cash to meet outstanding obligations, thus protecting the interests of the disabled and their dependents.

Bill providing all laborers, workmen, and mechanics in the employ of the State with an annual vacation of not less than two weeks. (Bill had been rejected several years.)

Bill increasing the maximum payment under workmen's compensation law from $14 to $16.

COOLIDGE'S MATCHLESS RECORD OF THINGS DONE FOR LABOR

The Illinois Labor News, a newspaper printed in the interests of organized labor in Chicago, thus epitomizes the activities of President Coolidge in behalf of labor and labor interests:

During his career as a member of the Massachusetts State government he supported the following bills:

Antimonopoly bill.
Injunction modification bill.
Antidiscrimination bill.
Direct senatorial election.
Woman's suffrage.
Honest small coal sales.
One day's rest in seven.
Improved working conditions, women and children.
Factory surgical equipment.
Pensions, widows and children of firemen.
Teachers' pensions.
Playgrounds.
Low fares, workingmen and children.
Full train crew bill.
Improved milk situation.
Forty-eight hour bill, women and children.
Eliminating profiteering in rents.
Preference to veterans.
Employment for veterans.
Revision of banking laws.
Barbers' license bill.
Eight-hour day for women.

Each and every one of these measures had the unqualified support of labor.

I also wish to quote from a letter written by the national legislative department of the Brotherhood of Railroad Trainmen December 18, last, to the chairman of the Illinois State legislative board of the same brotherhood:

COOLIDGE CLEAN AS HOUND'S TOOTH

In requesting your views concerning Mr. Coolidge, it is only proper that I state to you the results of investigations I have made in regard to his labor record while acting as State senator and Governor of the State of Massachusetts. In making this investigation I consulted a former representative of our brotherhood, whose judgment is splendid, and who is as free from bias as it is humanly possible to be, and quote herewith from him as follows:

"During 1912–13 Mr. Coolidge was a member of the Massachusetts Senate and a member of the committee on railroads. There was before the legislature this session some legislation of concern to railway wage earners. President Lee sent me to assist, and under the legislative regulations I was required to register as counselor for the brotherhood. When Mr. Coolidge was approached to state what his attitude would be in the senate on our legislation, he considered the matter for a day or two, and then gave his word that he would support our measures. I can assure you he kept his word, either on a 'yea' and 'nay' or a roll call. Later, when the activity of the railroad lobby was investigated, he was found as clean as a hound's tooth.

"There are two States in the United States which have a real statute for protecting women and children in their limited hours of service, which shall be given in specified periods of the 24-hour day—one is Massachusetts and the other is California. Mr. Coolidge is the first Governor of Massachusetts who approved such a law when it came before him for action, irrespective of the powerful influence of the textile interest, although some of his predecessors had similar opportunity."

TRUTH ABOUT POLICE STRIKE

This same representative of the brotherhood, after having investigated the police strike in Boston, which occurred when Mr. Coolidge was governor of the State, makes the following statement in regard to that matter:

"(1) The law specifically provides that the duties in general of the police commissioner of Boston rests solely upon him; therefore the position is that of a single-handed commissioner.

"(2) The police commissioner can not divide the responsibilities of his office with any other officer of the Commonwealth, not even the governor, and the latter, under the law, can not usurp any of these duties until such time as the emergency indicates a crisis at variance with the adequate protection of the public, as the results of the destruction of discipline, involving disorganization.

"(3) The crisis had developed prior to any action on the part of Governor Coolidge, as witness the acts of the lawless element at the time, and then the latter only sent in the State troops when it was evident that the local militia used by Mayor Peters

with what policemen remained on duty, failed to cope with the situation, with the sanctity of womanhood and the homes of citizens in evident peril.

"(4) The issue was not raised in the State campaign which followed by anybody except Mr. Richard H. Long, the opponent of Governor Coolidge, resulting in the reelection of the latter by an overwhelming majority."

This same member of the brotherhood in summing up his estimate of the action by Governor Coolidge said:

"If there was any particular section of the public which received a greater benefit than another in the action of Mr. Coolidge in the Boston police strike it was the legitimate and regular field of industrial labor unionism."

Other investigations disclose the fact that Mr. Coolidge stood squarely behind minimum wages for women in industry and other measures of importance and that he has been especially friendly to labor; in particular he has supported the railroad men in their endeavor at all times. While he has not had opportunity to demonstrate as yet fully what his attitude will be in a national way, his record in his State, both as a senator and governor, proves his attitude in favor of labor.

AMERICA'S FORTUNATE WORKINGMEN

If one were asked to define what distinguishes the United States from all other nations and sets her above all other nations, the answer would be the superior condition of our working people. The tides of immigration have brought millions of wage earners to our country, attracted by the higher standard of living and better wages than prevailed in their home country. This better living and higher wages which elevates American working people above the working people of any other and all other countries is largely due to the Republican policy of protective tariff.

America's industrial development has taken place during the last 60 years. With few exceptions of brief duration, the United States during those 60 years has been under a protective tariff. It is doubly significant that the years of those exceptions were marked by industrial depression, hard times, and loss of foreign trade. The inevitable aftermath of every Democratic tariff has been closed factories, workingmen walking the streets, the establishment of soup houses, the activity of charitable organizations, the disappearance of savings from the banks, increased sickness and death rate among the working classes due to lack of proper nutrition and proper shelter, prostrated commercial interests because there are no customers, and depressed agriculture because the idle workingman must cut down on his food and does do so.

On the other hand, there has never been a protective tariff that closed a factory or threw a workingman out of a job. There has never been a protective tariff that did not bring good times to all branches of industry and business, to all sections of the United States, and to all classes of citizens. There has never been a protective tariff that did not increase the foreign trade of the United States. There has never been a protective tariff that did not build up, improve, and prosper not only the workingman but all American people and the American Nation.

TARIFF NOT CLASS LEGISLATION

It is charged by those opposed to the principle of protective tariff that it is class legislation. Nothing is further from the truth. The benefits flowing from a protective tariff are enjoyed by capital and labor, by agriculture and industry, by business and finance. It stimulates industrial production and benefits every wage earner by giving him steady and profitable employment. It benefits every enterprise selling raw material or supplies to industrial concerns. It benefits every commercial interest which sells goods consumed by wage earners. It benefits agriculture, which produces foodstuffs for the wage earner.

The Fordney-McCumber tariff, enacted by the Republican Sixty-seventh Congress, going into effect September 21, 1922, has fulfilled all the promises made for it by its Republican supporters and failed to justify any of the direful predictions made by its Democratic opponents. One of the assertions made by the Democrats was that the Fordney-McCumber tariff would erect a "Chinese wall" around the United States which would prevent other nations selling us goods and would also prevent our selling other nations goods. The absurdity of this claim is clearly proved by the import and export figures issued by the United States Bureau of Foreign Commerce.

FOREIGN TRADE INCREASES UNDER TARIFF

The accompanying tabulations and comparisons show that since the Fordney-McCumber tariff went into effect other nations have sold us more goods and we, in turn, have sold them more goods than under the Underwood tariff for comparable periods. The tables compare imports and exports under the Fordney-McCumber tariff with the imports and exports for the same months under the Underwood tariff for two periods, the first period covering the months from the enactment of the Underwood tariff to the outbreak of the European war, the second period covering the operations of the Underwood tariff for 12 months immediately preceding the Fordney-McCumber tariff. The comparison is made all the easier for the reason that the Underwood Act and the Fordney-McCumber Act both went into effect at approximately the same time of the year—the Underwood Act became effective October 3, 1913, and the Fordney-McCumber Act became effective September 21, 1922.

*Comparison of imports under Fordney-McCumber Act with imports under Underwood Act for years and months indicated*

UNDERWOOD ACT

(October, 1913–June, 1914)

| | |
|---|---|
| 1913: | |
| October | $132,949,302 |
| November | 148,236,536 |
| December | 184,025,571 |

FORDNEY ACT
(October, 1922–September, 1923)

| | |
|---|---|
| 1922: | |
| October | $370,718,593 |
| November | 379,999,622 |
| December | 344,327,560 |
| 1923: | |
| January | 335,416,506 |
| February | 306,957,419 |
| March | 341,376,664 |
| April | 325,492,175 |
| May | 316,359,470 |
| June | 319,956,953 |
| July | 302,186,027 |
| August | 310,965,891 |
| September | 381,433,570 |
| Total | 4,035,190,452 |

NOTE: Total amount of exports under the Fordney Act from October, 1922, to June, 1923, inclusive, was $3,040,604,964. The total amount of exports under the Underwood Act in the pre-war period from October, 1913, to June, 1914, inclusive, was $1,797,439,349.

For purposes of comparison on the basis of calendar years, it may be stated that during the calendar year 1923, during all of which period the Fordney-McCumber tariff was in effect, we bought from the world goods in the value of $3,789,000,000. In the calendar year 1921, during all of which period the Underwood tariff was in effect—barring a few schedules embraced in the farmers' emergency tariff—we bought from the world goods in the value of $2,509,000,000. In the calendar year 1913, the last pre-war year, when international trade was normal, we bought from the world goods in the value of $1,792,000,000. So that, in point of fact, other nations are selling us twice as much under the Fordney-McCumber tariff as they did in the pre-war year of 1913 and 50 per cent more than they did in the calendar year of 1921 under the Underwood tariff.

WE SELL MORE TO WORLD UNDER PROTECTION

The same relative condition exists in our export trade. During the calendar year 1923 we sold goods in the value of $4,165,000,000. It is not fair to compare the exports of that calendar year with any previous calendar year since the war, because during the interim between the armistice and 1923 Europe was producing a minimum and was buying an abnormally large amount from the United States. Naturally, therefore, our exports during 1919, 1920, and 1921 were abnormal, but in the calendar year 1913, when trade conditions throughout the world were normal, we exported goods only in the value of $2,484,000,000.

The history of our foreign trade, both imports and exports, under the Fordney-McCumber protective tariff is a repetition of what has happened to our foreign trade under every protective tariff. Instead of a protective tariff diminishing our foreign trade history shows the contrary to be true. Following the enactment of the McKinley law, and again of the Dingley law, there was an increase in both our exports and imports. The reason of this is very simple. Protection encourages American manufacturers to increase production and to become active in seeking markets for their increased output. This results in increased exports. On the other hand, our increased industrial activity calls for increased imports of goods to be used in manufacture. The prosperity of the people which follows industrial activity and prosperity makes them larger buyers of goods of all kinds and stimulates a demand for imported articles.

On the other hand, free trade closes our factories, which lessens our exports, and also so impoverishes our people that they have no money wherewith to buy imported articles.

The proof of these statements is found in the records of foreign trade issued by the Department of Commerce. These records show that under every protective tariff there has been a gradual increase in our exports.

PROTECTION ALWAYS INCREASES EXPORTS

The McKinley protective tariff law was enacted in 1890. The following is the official record of our exports during the years the McKinley tariff law was in force:

| | |
|---|---|
| 1891 | $884,480,810 |
| 1892 | 1,030,278,148 |
| 1893 | 847,665,194 |
| 1894 | 892,140,572 |

The Dingley protective tariff law was enacted in 1897. The following is the official record of our exports during the 11 years that tariff was in operation:

| | |
|---|---|
| 1898 | $1,231,482,330 |
| 1899 | 1,227,023,302 |
| 1900 | 1,394,483,082 |
| 1901 | 1,487,765,991 |
| 1902 | 1,381,719,401 |
| 1903 | 1,420,141,679 |
| 1904 | 1,460,827,271 |
| 1905 | 1,518,561,666 |
| 1906 | 1,743,864,500 |
| 1907 | 1,880,851,078 |
| 1908 | 1,860,773,346 |

The Payne-Aldrich protective tariff law was enacted in 1909. The following is the official record of our exports during the operation of that tariff act:

| | |
|---|---|
| 1909 | $1,663,011,104 |
| 1910 | 1,754,984,720 |
| 1911 | 2,049,320,199 |
| 1912 | 2,204,322,409 |
| 1913 | 2,465,884,149 |

These official figures conclusively prove the falsity of the propaganda that a protective tariff means a loss of our foreign markets. They are an absolute refutation of the free trade and importers' propaganda that unless we permit foreign producers to grab our markets we can not hope to sell abroad.

ALL NATIONS ENACT PROTECTIVE TARIFFS

Another free-trade argument, which may be accepted by those who are ignorant of the facts, is the assertion that the enactment of a protective tariff invites retaliation by other nations. This is untrue, particularly with the Fordney-McCumber Act, because the United States was the last great Nation to enact higher tariff rates following the World War. As everyone knows, the war left the majority of industrial nations practically bankrupt. The currency of those nations declined to a point where it was worth only a fraction of its par value. In some nations like Poland, Germany, and other central European countries currency declined to such a point that it was practically valueless. There were great industrial plants which had been used during the war for making munitions and ordnance and airplanes and other military and naval supplies. As rapidly as possible these plants were transformed into producing commercial commodities. It is stated that the great Krupp works of Germany are now producing over 100 different commercial articles to be sold in the markets of the world. In every European country the workingman was paid in depreciated currency. The costs of production of manufactured goods were thus lowered to a point that was only a fraction of cost of production before the war, when currency was worth par. This enabled the countries with the cheapest currency—and, therefore, the cheapest wage and the cheapest cost of production—to raid the markets of countries whose currency was not so debased. The result of this was that every nation had to erect tariff walls in self-defense.

EVEN ENGLAND GOES TO PROTECTION

One of the first to do this was the United Kingdom, which very aptly styled its tariff law of a flat 33⅓ per cent duty a national defense act. Other nations rapidly followed suit. The following is a brief chronology of tariff legislation the world around since the armistice, all of the nations listed having enacted tariffs prior to the enactment of the Fordney-McCumber Act, which clearly disproved the charge that that act would invite retaliation:

The United Kingdom (England, Scotland, Wales, and Ireland), October 1, 1921.
Australia, March 25, 1920; June 13, 1921.
British Dominion of New Zealand, November 3, 1921.
Dominion of Canada, June 4, 1921; September 1, 1921; October, 1921; still higher tariff law now pending before Canadian Parliament.
British Dominion, Union of South Africa, May 5, 1922.
British India, March 1, 1922.
Newfoundland, May 26, 1921.

BEING OUT OF JOB HIGHEST COST OF LIVING

The companion piece of free-trade fiction to the argument that protective tariff destroys our foreign markets is the argument that protective tariff increases the cost of living. This is a charge which can not be substantiated. The cost of living is determined neither by the income solely nor the outgo solely, but by the amount of money left in the pay envelope after all the expenses of the household have been met. Under a protective tariff this amount has always been greater than the amount under free trade. There can not possibly be any higher cost of living than that of being out of a job. It little matters to the workingman how cheaply he may buy commodities if he has no money wherewith to buy. President Harding in his first message to Congress assembled in special session April, 1921, touched upon this point, saying:

One who values American prosperity and maintained standards of wage and living can have no sympathy with the proposal that easy entry and the flood of imports will cheapen our cost of living. It is more likely to destroy our capacity to buy.

The proof that protective tariff does not increase the cost of living is furnished in the record of savings banks during the periods, respectively, of free trade and protective tariff. Deposits in savings banks increase under a protective tariff. They decrease under free trade. This clearly shows that under a protective tariff the workingman is able to live and to lay by something, while under free trade he must draw upon his savings in order to keep starvation from the door.

WHOLESALE PRICES DECLINE UNDER PROTECTIVE TARIFF

The Fordney-McCumber tariff furnished apt illustrations of the falsity of the argument that such a tariff increases the cost of living. The tariff became effective in September, 1922. The United States Department of Labor periodically issues a report on the average wholesale price of over 400 standard commodities, including the general classifications of farm products, foods of all kinds; metals and metal products; clothing of all kinds—children's, men's, and women's—including boots and shoes; all kinds of cotton textile, hosiery, sheeting, thread, yarn; all kinds of woolen goods and silk; coal, coke, gasoline, petroleum; building materials of all kinds, including lumber, brick, cement, gravel, tiling, roofing, glass, paints, copper, and so forth; chemicals and drugs; all kinds of household furnishing goods; and a list of miscellaneous articles, such as cattle feed, leather goods, rope, rubber, soap, starch, tobacco, and so forth.

The report of the United States Department of Labor showed that the average price of these 400 standard commodities was lower in September, 1923, a year after the Fordney-McCumber tariff had been in operation, than it was in September, 1922, when the law became effective. Each successive report of the United States Bureau of Labor Statistics shows decrease in the average wholesale prices of these 400 commodities.

In other words, wholesale prices of manufactured goods have steadily decreased since the Fordney-McCumber tariff became a law. This conclusively proves the tariff is not responsible for any increase in prices which may have taken place since it became a law. The only force there is to the Democratic argument that a tariff increases prices is the implied charge that American manufacturers protected by a tariff take advantage of it to boost prices and rob the consumer. But the American manufacturer sells to the wholesaler and the jobber, and if the manufacturer boosts prices the first place this would be in evidence would be in the wholesale price. The fact that wholesale prices have decreased since the Fordney-McCumber tariff clearly exonerates the American manufacturer from taking unfair advantage of the tariff to boost his prices and clearly disproves the charge that any increase in price to the consumer is attributable to the tariff.

INCREASE IN LIVING COST ON ARTICLES ADMITTED FREE

This is disproved in another manner. Two of the most important items of expenditure in the ordinary household are fuel and rent. These two items have increased more in the last year than all other household expenses, yet all fuel and fuel substitutes are on the free list, therefore the tariff can not be charged with any increase in the price of fuel. The following building material is on the free list: Building brick, cement, stone, shingles, timber of all kinds used for building purposes. Therefore, rents, in so far as they are attributable to those cost of building material, can not be said to have increased because of the tariff. Another large item of household expenditure is that of furniture, but the fact that all timber and lumber of all kinds which is used in the manuture of furniture is on the free list eliminates the charge that the high cost of furniture can be attributed in any way to the tariff. Boots and shoes and all other articles made from leather are on the free list. Therefore, any increase in the cost of these articles can not be charged to the tariff. Any increase in the cost of clothing can not be charged to the tariff. Wool is protected, yet the cost of woolen textiles to the jobber and wholesaler has not increased since the Fordney-McCumber tariff became effective. On February 1 the textile-trade publications made the following official announcement:

The opening of initial lines of goods by the American Woolen Co.—the largest clothing textile manufacturers in the United States—at prices substantially on a par with prices a year ago has been a matter of surprise to most of the trade.

On February 7, this year, the textile-trade publications contained the statement that the American Woolen Co. at its initial openings quoted standard serges at $2.67½, the same as a year ago, and compared with $2.87½ for the price of similar lines opened in the fall of 1923. This price is quoted in the face of an advance of 12½ per cent in wages.

HARD FOR DEMOCRATS TO EXPLAIN THIS FACT

On the other hand, the price of cotton goods is from 25 to 30 per cent higher now than a year ago, but cotton is on the free list. It is going to be very embarrassing for our Democratic and free-trade orators in the coming campaign to reconcile their arguments with the fact that manufacturers' prices of woolen goods made from material highly protected have not increased, while cotton goods, made from material on the free list, have increased 30 per cent.

It is being alleged by Democratic newspapers and speakers that the Fordney-McCumber tariff bill has so boosted prices as to bring about a buyers' strike. This assertion has repeatedly appeared in Democratic National Committee literature, in literature put out by the so-called Fair Tariff League, and has been repeated on the floor of both the House and the Senate within the last few months.

The commercial agencies of Dun and Bradstreet, the Federal reserve bank, and the newspaper columns are all authority for the statement that the year 1923 was the greatest year ever known in the history of American retail business. The mail-order houses showed the greatest sales in their history, and on the whole their sales were 28 per cent greater than in 1922.

The department stores of Boston, New York, Chicago, Kansas City, St. Louis, Pittsburgh, Philadelphia, all reported the largest business in their history, showing the year 1923 to have been from 12 per cent to 22 per cent greater than 1922.

The 5 and 10 cent stores show their sales for 1923 to have been 18 per cent greater than in 1922.

Chain stores show their business in 1923 to have been on the average 27 per cent greater than in 1922. A report of business done by chain stores for the first three months this year shows they have increased their business over the corresponding months last year by about 10 per cent.

The National Cloak & Suit Co., which does the largest business of its kind of any group of concerns in the United States, shows its business for 1923 to have been 23 per cent greater than 1922.

Without exception the several Federal reserve bank districts report retail business for 1923 in their respective territory to have been greater than 1922.

"BUNK" ABOUT THE FARMERS' FOREIGN MARKET

The greatest piece of political "bunk" of modern times is the Democratic free-traders' reiteration that the prosperity of the American farmer is dependent upon his "foreign markets," coupled with the assertion that a protective tariff "isolates" the United States and causes the American farmer to lose his foreign markets. In point of fact neither the prices of American farm products nor the prosperity of American agriculture is dependent upon farm exports. This is not a statement of an opinion, but a statement of fact based upon official records.

The most exhaustive and accurate survey which has ever been made of agricultural interests of this country is that completed by the joint commission of agricultural inquiry, a commission composed of 10 Members of the United States Congress representing both political parties and States with large agricultural affairs. The work of this commission was absolutely nonpartisan. Its whole purpose was to collect, digest, compile,

and present in an understandable form all data relative to the agricultural industry and its relation to other industry.

The first section of the report of this commission is devoted largely to the discussion of the relation between farm prices, domestic consumption, exports, and imports. The research of the commission extended back to 1890, and tables are presented covering 30 years from that year which substantiate every conclusion reached by the commission.

FARM PRICES NOT DEPENDENT ON EXPORTS

The commission's report emphasizes over and over, and the tables bear out its conclusion, that the prices of farm products bear a very intimate relation to the domestic consumption of those products, and on the other hand are affected scarcely at all by exports. For example, wheat. The report states:

The price of wheat has not borne a very consistent relation to exports. The greatest rise in the price of wheat did not take place until 1917, during which year exports of wheat were relatively low.

In connection with the table showing production of wheat together with export of wheat, per capita domestic consumption, and prices covering the period of 30 years, the report says:

It is notable that per capita consumption of wheat has shown a marked tendency to decrease in periods of industrial depression, such as existed in the period of 1893 to 1896, and during the latter part of 1920. * * * The table seems to indicate that domestic consumption is probably the largest factor in determining the price.

In general the price of wheat has decreased in years of low domestic consumption and increased in periods of high consumption. * * *

Perhaps the most notable fact shown by this table is the tremendous drop in the price of wheat during 1920, notwithstanding an increase in exports. It seems that this drop can be attributed almost wholly to the falling off of domestic consumption which in 1920 was only 4.6 bushels per capita, and the beginning and continuance of industrial depression.

Upon the subject of meat products the report states in connection with voluminous tables to prove its conclusion:

The consumption of beef bears a very close relation to urban employment or unemployment and declines rapidly in periods of industrial depression.

HOME MARKET IS FARMERS' NEED

The conclusions set forth in this report are the same which have been reached by all students of economics. No less an authority upon prices and international trade than Secretary Hoover, of the Department of Commerce, emphasizes the fact that the hope of the American farmer for prosperity and profitable prices rests in his home market rather than in foreign markets. Secretary Hoover voiced this sentiment most emphatically in a statement before the Interstate Commerce Commission relative to the policy of rehabilitation of the transportation system. Secretary Hoover in this connection said that a general program of construction needed by the transportation world would give employment to many thousands, enable them to increase their standards of living—

and thus give increased market to the produce of our farms. Our farmers, who look to foreign markets for their surplus, should stop to consider that our home consumption of meat decreased nearly 7 pounds per capita in 1921, mostly owing to unemployment. If this decrease could be overcome, it would be worth more than 35 per cent increase in exports. We talk glibly of giving credits to foreign countries to increase our farm exports, but I wish to state, with all responsibility for the statement, that a billion dollars spent upon American railways will give more employment to our people, more advance to our industries, and more assistance to our farmers than twice that sum expended outside the frontiers of the United States.

YEAR OF BIGGEST EXPORTS FARMERS WENT "BROKE"

Proof that the "foreign market" means comparatively little to the American farmer compared with his home market is furnished by his experience in the latter part of 1920 and during 1921. If there were anything to the argument that foreign markets mean prosperity to the farmer, he should have prospered in an unprecedented degree during that period. Exports of American farm products for the year 1921 were the greatest ever known in American history. The total exports of American grains—wheat, corn, rice, rye, barley, and oats—during the year 1921 were higher than any year prior to the World War. The export of wheat during the year 1921 was five times that of the five-year period, 1909–1913. The export of corn in 1921 was 129,000,000 bushels, against a five-year average of only 41,000,000 bushels for the pre-war period of 1909–1913. The exports of meat products in 1921 were 80 per cent greater than for the five-year period, 1909–1913. The exports of dairy products for 1921 were eleven times that of any year prior to the World War.

Yet in 1921 the American farmer went "dead broke" because of low prices.

The reason of this is found in the conditions which prevailed in his home market. During the period he was "dead broke" although he enjoyed the greatest quantity of agricultural exports ever known, there were over 5,000,000 American wage earners out of a job. Their buying power was stopped. They had to economize in their consumption of food. That was the cause of the low prices of American farm products during that year. The case was accurately stated by Milo D. Campbell, president of the National Milk Producers' Association, who said:

When millions of factory employees are idle they wear old clothes and fill their stomachs with roughage. The big thing that should interest the farmer is a market where buyers have enough money to pay him a fair price for his products—and that market is right here at home. Unless we have a protective tariff there will be no work for the factories, no employment for the workingman, and no market for the farmer.

COTTON MARKET CONTRADICTS FREE TRADERS

Democratic free traders who argue that foreign markets are essential to good prices for American farm products find their argument completely riddled by the cotton market. We are exporting less cotton than during the pre-war period, but the price of cotton to-day is over double what it was during the pre-war period. During the year ended May 15, 1914, we exported 8,557,148 bales of cotton and the average price of cotton during that year was 12 cents. During the year ended May 16, 1924, we exported only 5,217,458 bales of cotton, but the average price of cotton throughout that period was above 20 cents.

Take another illustration, that of hogs and exports of pork. Our exports of fresh pork in 1922 amounted to 27,000,000 pounds; ham and shoulders, 389,000,000 pounds; bacon, 341,000,000 pounds; and the average price of hogs on the Chicago market for that year was $9.22. Our exports of pork products in 1923 were double that for 1922 and many times the pork exports during the pre-war period, but every farmer who sells hogs knows that prices for hogs slumped in 1923. Notwithstanding our pork exports are maintaining their increase, the price of hogs to-day on the Chicago market is $2 lower than the average for 1922.

These illustrations could be multiplied to show that there is absolutely no relation between the quantity of exports of farm products and prices for farm products.

AMERICA'S "ISOLATION"

Furthermore, there is even less truth in the Democratic argument that under protective tariff the United States has become isolated to the extent that the world no longer is able to sell to us, and we therefore are no longer able to sell to the world. Our imports—or what the world sold to us—for the calendar year 1923, all of which was under the Fordney-McCumber tariff, amounted to $3,788,882,215. This is practically twice our imports of any year of the pre-war five-year period. Tabulated it is as follows:

*Total imports*

| | |
|---|---|
| 1923 (calendar year) | $3,788,882,215 |
| 1914 (fiscal year ending June 30) | 1,893,925,657 |
| 1913 (fiscal year ending June 30) | 1,813,008,234 |
| 1912 (fiscal year ending June 30) | 1,653,264,934 |
| 1911 (fiscal year ending June 30) | 1,527,226,105 |
| 1910 (fiscal year ending June 30) | 1,556,947,430 |

From these figures it is apparent that the world is selling us twice as much under our protective tariff as it did in normal times prior to the World War.

There is a lot of loose uninformed talk about its being necessary for a change in our foreign and domestic policy in order to relieve the farmer by "restoring" his foreign markets. Just what is meant by restoring the farmer's foreign markets? He is enjoying greater export trade to-day than he did at any period prior to the outbreak of the World War when conditions were normal and his foreign markets were normal. That fact is abundantly proved by figures taken from the United States Bureau of Foreign Commerce and the United States Department of Agriculture. The following is a table showing a comparison of the quantity of exports of leading agricultural products for the five-year period immediately preceding the World War and for the calendar year 1923. The figures for the five-year period are taken from the Yearbook of the United States Department of Agriculture for the year 1922; the figures for the calendar year 1923 are taken from the report of the United States Bureau of Foreign Commerce.

*Agricultural exports by quantity for periods indicated*

| | Annual average 5-year period 1910-1914, fiscal years ending June 30 | 1923, calendar year ending Dec. 31 |
|---|---|---|
| Wheat (bushels) | 59,913,228 | 98,524,405 |
| Wheat flour (barrels) | 10,678,635 | 16,309,856 |
| Oats (bushels) | 8,304,203 | 3,226,764 |
| Rye (bushels) | 854,765 | 30,856,189 |
| Barley (bushels) | 7,895,521 | 11,983,177 |
| Corn (bushels) | 39,809,690 | 42,187,732 |
| Dairy products (pounds) | 24,967,357 | 310,878,573 |
| Fresh beef (pounds) | 29,452,302 | 3,385,978 |
| Fresh pork (pounds) | 2,023,911 | 54,691,196 |
| Bacon (pounds) | 182,474,092 | 456,797,497 |
| Hams and shoulders (pounds) | 166,813,134 | 372,092,656 |
| Lards (pounds) | 474,354,914 | 1,035,381,571 |

Expressed in another form the contrast is still more striking. The following table gives the valuation of all kinds of agricultural exports for the periods indicated, the figures in this table being taken from the reports of the United States Bureau of Foreign Trade:

*Valuation of all exports of foodstuffs, prepared and unprepared, for periods indicated*

| | |
|---|---|
| 1909 | $438,248,000 |
| 1910 | 369,088,000 |
| 1911 | 385,419,000 |
| 1912 | 418,737,000 |
| 1913 | 503,111,000 |
| 1923 | 840,844,000 |

These tables clearly show that as compared with pre-war normal peace conditions the American farmer to-day is exporting tremendously in excess of that period. Of course, he is not exporting in the quantity he did during the years immediately following the armistice. During those first two or three years agriculture in Europe was at its lowest ebb and the necessity of importing foodstuffs pushed American agricultural exports to their peak. The year 1921 was the banner year for agricultural exports. It was also the year of the American farmer's nearest approach to absolute bankruptcy because of low prices, which proves incidentally that he can not find prosperity in foreign markets.

EUROPEAN MARKET GONE FOREVER FOR OUR FARMERS

The more nearly Europe recovers and approaches a normal productive basis the less foodstuffs Europe will import. Even though this were not true, the agricultural producer in the United States can never again hope to sell to Europe the quantities he sold following the World War. This is due to the fact that agricultural competitive countries are underselling farm producers in the markets of the world. Argentine, Australia, New Zealand, Russia, British India, Canada, and other agricultural producing countries have cheaper land, cheaper transportation, pay less wages for farm help, and are therefore enabled to undersell the American farmer with his high-priced land, high wages, high freight rates, and other high productive costs. In commenting upon this tendency the United States Department of Commerce, under date of January 28, 1924, said:

The decrease in grain exports (as compared with 1922) as a natural response to the increasing production of Europe, which is now almost back to pre-war production for most of the countries, and also is partly due to the fact that some of the newer producing countries with cheap land and production at low cost have been offering grain at lower prices than the United States exporters could meet. The latter situation is particularly due to the world-wide agricultural exploitation of virgin lands occasioned by the tremendous demands of the war reconstruction period.

In confirmation of this opinion a bulletin of the Foodstuffs Division of the Department of Commerce, under date of March 13, 1924, in discussing the grain trade in Europe states:

At Rotterdam, which is one of the important index markets for central Europe, the American grain has met very strong competition from both Argentine and Russia.

An Associated Press Dispatch of May 13, 1924, out of Berlin states:

American grain has been virtually driven out of the Baltic states and Finland through Russian competition and is rapidly disappearing from the Scandinavian, German, and Dutch markets before Russian grain.

BRITISH COMPETITION TO AMERICAN CATTLE BUSINESS

The above table of quantity exports shows striking decrease in the quantity of exports of fresh beef in 1923 as compared with the pre-war period. One reason for this is found in the fact that British interests have turned to the Argentine for their beef, because they can procure it there from one-half to one-third what they would have to pay in the United States.

An insight as to what is going on in that direction is furnished by a report made by our Government representatives in the Argentine. The largest cattle-buying, meat-packing, and warehousing system in South America, if not the world, is that of the Vestey group, composed of Lord William Vestey and British associates. This group owns ranches, packing plants, cold-storage warehouses in the Argentine, and ocean steamship lines plying between the Argentine and Europe. In England and on the continent it owns wholesale meat establishments, and in the United Kingdom it owns and operates more than 2,500 retail meat shops. This is the kind of competition which the American livestock interests and the American packing interests are meeting in Europe since the war. It is hopeless to expect that in the face of this the American livestock interests can hold their foreign trade.

A bulletin issued by the Department of Agriculture in the month of March sets forth the fact that Argentina is duplicating in her production and exportation of corn her record in the production and exportation of beef and wheat. The bulletin stated that Argentina is now the world's leading corn exporter and as such has become the most important competitor of the United States in world markets. According to the bulletin "exports of corn from Argentina have averaged 132,000,000 bushels annually in the three-year period 1920–1922, as compared with 116,000,000 bushels from the United States. Argentine exports average 71 per cent of its crop." This tremendously high percentage of exportation compared to the total crop is due to the fact that Argentina is sparsely settled and can consume but a comparatively small amount of its tremendous production. This also is true of other agricultural producing countries which are competitors of the United States.

HOPE OF AMERICAN FARMER IS HIS HOME MARKET

From all this it is perfectly clear that there is no such a thing as the "restoration" of the American farmer's foreign market.

The hope of the American farmer is in his home market, with the well-paid, constantly employed wage earner for his customer. He can not expect in any circumstances under peaceful conditions to compete in Europe for European markets with the products raised by the Russian moujik and the peasants of southeastern Europe. He can not hope to compete in the European markets with the products of South America raised on vast tracts of cheap land with cheap labor, shipped to Europe by European-owned steamship lines, and laid down at European ports for less money than it costs him to lay down his products at the nearest railway station.

The hope of the American farmer in the future, as in the past, is in maintaining his home market. That the protective tariff has enabled him to do this is conclusively demonstrated in the fact that since the enactment of the farmer's tariff in 1921 and its embodiment in the Fordney-McCumber Act, Minneapolis and Kansas City have consistently paid more for wheat than Winnipeg; Boston has consistently paid more for potatoes than Montreal; Chicago has consistently paid more for all classes of cattle than Winnipeg and Buenos Aires and more for sheep and lambs than Toronto, Winnipeg, and the primary markets in New Zealand; New York has consistently paid more for butter than Copenhagen, Denmark, or Wellington, New Zealand.

DEMOCRATS TALK SCANDAL

It is predicted by Democratic wiseacres that the "looting of the public domain" is going to be one of the issues in the approaching campaign. If that prediction proves true, the reputations of a great many Democratic leaders are going to be badly damaged before the polls close in November.

The leasing act under which all of the oil reserves, both within and without the naval reserves, were leased to private interests was fathered by Senator WALSH, of Montana, who has devoted the better part of a year in a vain endeavor to fasten some guilt on some member of the Republican administration in connection with the naval oil reserves. The leasing act became a law in February, 1920. Senator WALSH, of Montana was one of its most active advocates, as the pages of the CONGRESSIONAL RECORD abundantly testify. During the debate of the bill he boasted of the fact that he was the originator of the policy of leasing public oil lands to private interests, stating he had drawn up the first bill of that character in 1913, with the assistance of the Democratic Secretary of the Interior, Franklin K. Lane. The records of Congress also show that in 1917 Senator WALSH introduced a leasing bill which gave to the Secretary of the Interior practically unlimited authority to handle the public oil lands, even permitting him to lease them without competitive bids.

DANIELS WANTED AUTOCRATIC POWER

Within two weeks after the leasing act became a law, Secretary of the Navy Josephus Daniels addressed identical letters to Hon. Carroll S. Page, chairman of the Senate Naval Committee, and Hon. THOMAS S. BUTLER, chairman of the House Naval Committee, suggesting that the leasing act be amended so as to give him, the Secretary of the Navy, absolute power over all naval oil reserves. Secretary Daniels urged this be done for the following reasons, as set forth in his letter of March 1, 1920, to Representative BUTLER, and March 29, 1920, to Senator Page:

Some of these tracts (the naval oil reserves) are drilled to such an extent that it will be necessary for the Government to drill offset wells unless oil to the value of millions of dollars is to be drawn from under the Government lands by private owners. * * * It therefore becomes imperative, even when viewed from an economic standpoint only, that machinery be provided against drainage from adjacent lands. That crude oil, whether from Navy-owned wells, royalties from naval reserves, or royalty oil purchased, may be exchanged for refined products, and that excess oil from protective wells may be sold or storage provided if considered advisable.

Secretary Daniels suggested that in order that his ideas might be carried out the naval leasing act be amended in the following language:

*Provided*, That the Secretary of the Navy is directed to take possession of all properties within the naval petroleum reserves as are or may become vested in the United States; to conserve, develop, use, and operate the same, in his discretion, directly or by contract, lease or otherwise, and to use, store, exchange, refine, sell, or otherwise dispose of the oil and gas products thereof and those from all royalty oil. * * *

DANIELS ADMITTED DRAINAGE

Secretary Daniel's letter and the amendment he proposed clearly proves he knew the naval oil reserves were being drained by private interests and that the only way to stop this drainage and save the naval oil supply was for the Government itself to start taking oil from the naval reserves. Secretary Daniels and other Democrats have been attempting in the past few weeks to make it appear that he and they were not in favor of tapping the naval oil reserves and that their consistent policy concerning naval oil reserves has been, to quote Secretary Daniels, "to keep the oil in the ground."

The falsity of such statements is clearly indicated by Secretary Daniel's own letter. He wanted the leasing act amended so as to give him absolute power, to be used in his own discretion, over all naval oil reserves. He wanted this power in order to take the oil out of the ground. He needed no power to leave it in the ground, where it had been for centuries. He asked for power not only to take naval oil out of the ground but to sell it, to exchange it, to put it in storage, even to go into the refining business and, as if this were not enough, he asked for power to "otherwise dispose of the gas and oil products" of the naval oil reserves. Without a dissenting vote both branches of Congress granted his request, with the exception of the power to go into the oil-refining business and the broad power to "otherwise dispose" of the oil. Senator WALSH was on the floor of the Senate when this amendment came to a vote, and he neither protested against it nor voted against it, nor did any other Democrat in the Senate or in the House.

Nor can it be argued that although Secretary Daniels wanted this power he did not avail himself of it. The records of the Navy Department and the Department of the Interior furnish documentary proof that no sooner had he obtained power to take oil from naval reserves by contract with private parties through the leasing system than he availed himself of it. Secretary Daniels then did exactly what Secretary Denby subsequently did, namely, acted in conjunction with the Secretary of the Interior in approving leases to private oil corporations to take oil from the naval reserves.

DANIELS AND PAYNE LEASE NAVAL OIL RESERVES

The private oil corporations which were given leases to take oil from naval reserve No. 2, in California, by agreement with Secretary Daniels and Secretary Payne, were:

The Boston-Pacific Oil Co., July 1, 1920, to drill 5 new wells in section 32 of naval oil reserve No. 2; the Associated Oil Co., July 29, 1920, leases for 2 wells in section 20, 7 wells in section 22, 12 wells in section 26, 8 wells in section 24 of naval oil reserve No. 2; Union Oil Co., August 2, 1920, 4 wells in section 24; Buena Vista Oil Co., August 23, 1920, 2 wells in section 32; Caribou Oil Mining Co., August 24, 1920, 3 wells in section 28; General Petroleum Co., August 24, 1920, 3 wells in section 32; Record Oil Co., August 24, 1920, 4 wells in section 28; United Oil Co., August 24, 1920, 1 well in section 28; Consolidated Mutual Oil Co., February 16, 1921, two tracts of 280 acres each in section 28, naval reserve No. 2; Murvale Oil Co., February 1, 1921, to operate in section 12 and in section 22.

All of these leases to private corporations to take oil from the naval oil reserves were granted during the time Secretary Daniels and Secretary Payne were at the head of the Navy and Interior Departments, respectively.

Furthermore, despite the fact that Secretary Daniels publicly stated that the naval oil reserves were being drained by private corporations with leases to drill wells on public land immediately adjacent to naval oil reserves, and despite the fact that every oil man in the United States knew this to be true, Secretary John Barton Payne went right ahead granting leases to private interests to drill on public oil lands adjacent to naval oil reserves.

PAYNE LEASED TO "DRAINERS"

Mr. Payne came into office March 15, 1920, following the resignation of Franklin K. Lane, who resigned to accept a $50,000-a-year job with Mr. E. L. Doheny. Mr. Payne's term automatically expired March 4, 1921. Within that brief period of less than a year, during all of which time Secretary Daniels was at the head of the Navy Department and knew that naval oil reserves were drained by private corporations drilling on public land adjacent to them, and with these two Democratic Cabinet officials acting in closest harmony in connection with the disposition of our oil resources, Secretary Payne approved of approximately 150 leases to private corporations and interests, giving them the right to drill for oil in public lands immediately adjacent to the Teapot Dome naval reserve No. 3. The amount of public oil lands which he thus leased to private interests aggregated 14,000 acres, which is 5,000 acres greater in extent than the Teapot Dome naval reserve itself. One of the principal beneficiaries of these leases was the Wyoming Associated Oil Corporation. Of the 14,000 acres leased by Secretary Payne, this company received about 4,200 acres. Its president was John T. Barnett, of Denver, Democratic national committeeman at that time.

DANIELS AND PAYNE LEASED WITHOUT BIDS OR RESTRICTION

The official records of the Navy Department and the Department of the Interior also disclose the fact that Secretary Daniels and Secretary Payne leased naval oil reserve to private corporations without public advertising and also without any restriction whatever as to the number of wells that might be drilled. The files of those departments show that the lease made to the Boston-Pacific Oil Co. to operate on section 32 of the naval oil reserve No. 2 was made at a private conference between the representatives of the oil company and the Navy Department. The records show that the maximum royalty obtained out of this lease was 25 per cent, as against a maximum royalty obtained by the Republican administration of 35 per cent from the Doheny lease.

The files of the Navy Department also show that Secretary of the Navy Daniels and Secretary of the Interior Payne in January, 1921, leased 120 acres of section 28 of the naval oil reserve No. 2 to the Consolidated Mutual Oil Co., and that this land was leased without restriction to the number of wells that might be drilled by that corporation. The files also show that the maximum royalty provided under this lease was 25 per cent, as against 35 per cent under the Doheny lease.

In contrast to this, the Teapot Dome lease to Mr. Sinclair was made after competitive bidding. The records of the Department of the Interior and the records of the hearings before the Senate Committee on Public Lands show that five companies were invited to bid on the naval oil reserve No. 1, namely, the Standard Oil Co. of California, the Associated Oil Co., the Pan-American Petroleum & Transport Co., the General Petroleum Co., and the Pacific Oil Co. Three of these companies invited to bid submitted bids, namely, the Standard Oil Co., the Associated Oil Co., and the Pan-American Petroleum & Transport Co. The bids of these three companies are on file in the Department of the Interior.

When these facts were first set forth in answer to the libelous charges being made before the Senate Committee on Public Lands, known as the Walsh committee, they were denied in the public press by Mr. Daniels and Mr. Payne, as well as by Democratic leaders in both branches of Congress and elsewhere. As the records began to be cited and photostatic copies of them began to be circulated both Mr. Daniels and Mr. Payne admitted the facts which they had first denied, but explained their action by saying they gave no leases to private corporations except where it was necessary to protect the interests of the Navy and to stop drainage of naval reserves by private corporations.

That is a fact. Their action was perfectly justified, but the point is that Secretary Denby, in granting leases on naval oil reserves, had the same justification and did so for the same reason.

OIL GONE WHEN DENBY CAME IN OFFICE

There is, however, this difference: When Secretary Daniels came into office and the Department of the Interior was under Secretary Lane the drainage of the naval oil reserves was not serious, although it had commenced. This is proved by an identical letter which Secretary Lane wrote on August 1, 1917, to Secretary of the Navy Daniels, Secretary of War Baker, Secretary of Labor Wilson, Secretary of Commerce Redfield, and Secretary of Agriculture Houston, pointing out that the naval oil reserves were beginning to be drained by private oil wells and suggesting that to stop this the naval reserves should be leased. Notwithstanding this documentary proof that the Cabinet of the Democratic administration knew of the menace of drainage of naval oil reserves, Secretary Lane and Secretary Payne, with the knowledge and the consent of Secretary Daniels, went ahead increasing the number of leases to private corporations to drill wells that would necessarily drain the naval reserves.

As a result of this action of the Democratic administration, Secretary Denby entered office to find that 60 per cent of naval oil reserve No. 2 was privately owned and drilled, that no part of naval oil reserve No. 1 was over 2 miles from private wells busy draining it, and that 70 per cent of the oil in Teapot Dome Reserve was being drained by private corporations. Therefore, if, as was the case, Secretary Daniels and Secretary Payne found it necessary to lease naval oil reserves to private corporations in order to stop drainage, how much more necessary was it for Secretary Denby to do so when he came into office finding those reserves jeopardized by the liberality and prodigality of his predecessors in the matter of making private leases!

WALSH COMMITTEE ADMITS FALSITY OF CHARGES

In passing, it should be noted that in the closing days of the last session of Congress, Senator WALSH of Montana, member of the Public Lands Committee of the Senate, and all of his Democratic associates on that committee, and Senator LADD of that committee, elected to the Senate on a nonpartisan ticket, submitted to the Senate a report of the conclusions of the Public Lands Committee, which had been holding public hearings for nearly a year. It was this committee, known as the WALSH committee, which endeavored to the utmost to entangle the Republican administration in scandal in connection with the leasing of the public oil domains.

It was this committee, under the direction of Senator WALSH, which permitted itself to be made a medium through which the testimony of ex-convicts, train robbers, and other disreputable personages was introduced into the official hearings of the committee regardless of the recognized libel and utter falsity of the utterances.

It was this committee which rummaged the files of telegraph companies in an endeavor to find something to besmirch not only the occupant of the White House, but the office of the Chief Executive of the United States.

It was this committee which carefully introduced innuendo and slander against the former Secretary of the Navy, Edwin Denby, and it was Senator WALSH and other members of this committee who led the fight on the floor of the Senate to pass a resolution demanding that Secretary Denby resign.

It was this committee which spent thousands of dollars of the taxpayers' money to bring disreputable witnesses to Washington at the expense of the Government in order to listen to wild stories to the effect that the Republican National Convention of 1920 was controlled by corrupt oil interests and that the nomination of our late and beloved President was purchased like a piece of cheap merchandise.

Throughout the winter this committee played up to the sensational headliners and professional scandal-mongers of the country in an endeavor to make the people believe that the Republican administration and that the officials of the Government were corrupt and were betraying the public interests.

It is of especial significance, then, that when the conclusions of the Democratic members of this committee were ready to be filed that they did not dare sign their names to an official report giving any credence or countenance to any of the slander and innuendo which they had permitted to stalk through the pages of their committee's record. The report, notwithstanding they had hounded Secretary Denby from office, completely exonerated him, and also completely exonerated Assistant Secretary Roosevelt of any wrongdoing in connection with any naval oil leasing. It completely exonerated all public officials connected with this Republican administration of any wrong connection or dealings in relation to the oil leases. It admitted that there was not the slightest ground for the charge that there was corruption in connection with the Republican National Convention of 1920 and the nomination of Warren G. Harding as the Republican candidate for President. It even admitted that there was no proof that the money Doheny paid to former Secretary Fall was paid to him in the form of a bribe. About the only prominent personage this report did not exonerate of the charges made against him before the committee was William G. McAdoo, whom the facts prove to have been on the pay roll of Mr. Doheny, selling his political influence as a son-in-law of a former President and a former Cabinet officer, and that he remained on the pay roll of Mr. Doheny until his exposure before this committee compelled him to resign for fear that his continuation with Mr. Doheny would injure his chances as the Democratic candidate for the nomination for President. So much for the "scandal" which the Democratic Party says it will make one of the issues of the approaching campaign.

PEOPLE HAVE FAITH IN COOLIDGE'S INTEGRITY

As to the guilt or innocence of parties connected with the leasing of public oil lands, the American people will agree with the statement of President Coolidge that "the determination of criminal guilt is a function of the courts." The people of the country have confidence in President Coolidge to enforce the law, to protect public interests, and to carry out his pledges made in a public statement January 27:

> If there has been any crime, it must be prosecuted. If there has been any property of the United States illegally transferred or leased, it must be recovered. I feel the public is entitled to know that in the conduct of such action no one is shielded for any party, political, or other reason. * * * If there is any guilt, it will be punished; if there is any civil liability, it will be enforced; if there is any fraud, it will be revealed; and if there are any contracts which are illegal, they will be canceled. Every law will be enforced and every right of the people and the Government will be protected.

No other nation in the world has so liberally provided for its defenders as has the United States. Up to July 1, 1924, the Federal Government has expended for pensions, exclusive of any aid, compensation, or insurance to World War veterans, the sum of $6,841,356,621. Of this sum, Civil War veterans have received over $6,000,000,000 and Spanish-American War veterans, under pension laws passed by the Republican Congress in 1922, have received over $110,000,000. More pensions have been paid each year of the last five fiscal years under legislation enacted by Republican Congresses than in any previous year in the history of the United States. The disbursements of pensions during the last five fiscal years, exclusive of aid, compensation, or insurance to World War veterans, have been as follows:

| | |
|---|---|
| 1920 | $213,295,311 |
| 1921 | 258,715,842 |
| 1922 | 253,807,583 |
| 1923 | 263,012,500 |
| 1924 | 235,000,000 |

The veterans of no other war engaged in by the United States Government were ever provided for as liberally as the veterans of the World War are being provided for by the Republican Party.

The Republicans came into control of Congress November, 1918. The first session of the Republican Congress then elected began May, 1919. From that time dates practically all Federal appropriations and legislation in behalf of World War ex-service men of the United States. Since that time—a period of a little over five years—the Republicans in Congress have appropriated more money for the relief of the World War veterans than was ever appropriated in any previous 15-year period for pensions and relief of all kinds for the veterans (their families, widows, or dependents) of all previous wars (including the Civil War) engaged in by the United States.

BILLIONS FOR WORLD WAR VETERANS

Up to July 1, 1924, there have been congressional appropriations for ex-service men of the World War in the sum of $2,774,370,240. This sum does not include any of the money which will be expended under the provisions of the "soldiers' bonus" or adjusted compensation act, enacted in May, 1924. The appropriations are itemized as follows:

| | |
|---|---|
| Compensation claims (to ex-service men and their dependents) | $758,600,000 |
| Vocational training | 678,866,370 |
| Hospitalization | 315,233,112 |
| Hospital construction | 48,895,000 |
| Allowances and allotments (to ex-service men) | 298,615,000 |
| Insurance | 214,235,000 |
| Bonus allowance (act passed February 24, 1919, voting $60 to every enlisted man) | 237,979,340 |
| Administration | 196,946,418 |
| Payment of claims | 25,000 |
| Total | 2,774,370,240 |

Of this amount, $2,253,220,439 has been appropriated since the Republican Party came into control of Congress May 19, 1919. It includes the appropriation of $349,065,000 made by the Congress, just adjourned, for the Veterans' Bureau during the fiscal year beginning July 1, 1924. With the single exception of the items of interest on the public debt and the sinking fund for reduction of the public debt, this is the largest single appropriation made by the Congress for any department or function of the United States Government.

REPUBLICAN CONGRESS LIBERALIZES VETERAN LAWS

In addition, the first session of the Sixty-eighth Congress, just adjourned, authorized the expenditure of $8,000,000 for new hospital construction, $350,000 for the establishment of a school for blind ex-service men, and $548,000 for the erection of permanent stone crosses in overseas cemeteries.

It enacted the Reed-Johnson bill, bearing the name of Senator REED, Republican, of Pennsylvania, and Representative JOHNSON, Republican, of South Dakota, liberalizing the laws affecting disabled World War veterans and their dependents. By the terms of this last act increased benefits will accrue to over 118,000 disabled World War veterans and their dependents at an increased cost of approximately $30,000,000 a year to the Government. The act provides that free hospital treatment will be given any veteran who has seen service since April, 1917—this includes all Spanish-American War veterans—regardless of whether his sickness or disability was contracted while in service or not. It also extends the time from three to six years in which ex-service men exhibiting tubercular symptoms or neuropsychiatric trouble may be presumed to have contracted the same while in service and entitled to hospital treatment and compensation. The act also provides a special compensation of $150 a month for loss of both eyes and $200 per month for loss of both eyes and a limb, and provides that the loss of the use of limbs be declared equivalent to the actual loss of limbs, which entitles the patient to a permanent disability classification.

In addition, the Congress just adjourned enacted the "soldiers' bonus" or adjusted compensation act, which provides compensation for all World War veterans and for their dependents in certain cases in the basic amount of $1 a day for every day of home service and $1.25 for every day of overseas service. A maximum of 500 days is allowed in computing compensation due under this act. The bonus applies to all World War veterans up to and including the rank of captain in the Army and Marine Corps and lieutenant in the Navy. It also includes women who served as yeomen in the Navy and Marine Corps. The law provides that veterans whose compensation at the above rate amounts to $50 or less will be paid in cash, but the cash payments will not be distributed until after March 1, 1925. Dependents of deceased veterans whose compensation would have amounted to $50 or less likewise will be paid in cash. Ex-service men whose compensation is in excess of $50 will be given a 20-year endowment paid-up life insurance policy.

The value of this policy will be the equivalent of what the amount of the adjusted-compensation credit, plus 25 per cent, will purchase at regular insurance rates, based on 4 per cent interest compounded annually. All policies will be dated as of January 1, 1925. After two years from the date of the issuance of the policy the holder may borrow up to 90 per cent of its current face value. The loans on these policies may be made at any National or State bank. It is estimated the total cost of compensation under this act, together with the cost of administering it, will not be less than $3,500,000,000.

An appropriation amounting to $131,000,000 to pay for the first year's administration of the adjusted compensation act and the payment of the cash bonuses of $50 or less, as provided in the act, was carried in the second deficiency appropriation bill, which failed of passage in the closing hours of the last session of the Congress by reason of a filibuster conducted by Senator PITTMAN, Democrat, of Nevada.

PRESIDENT COOLIDGE PROVIDES FOR ADMINISTRATION OF BONUS LAW

Under the regular procedure this failure of the Congress to provide funds to carry into effect the bonus act would have resulted in a suspension of all activities in that direction until after the next session of the Congress convenes next December. Although the act was passed over his protest President Coolidge believed that it, like every other law, should be executed in good faith without delay. He accordingly issued orders for emergency use of existing appropriations to carry out the provisions of the act. His Executive orders to this effect were contained in a letter dated June 13, 1924, which he addressed to General Hines, Director of the Veterans' Bureau; Secretary Weeks, of the War Department; and Secretary Wilbur, of the Navy Department, the three departments which have charge of the work preparatory to paying the bonus. The letter follows:

DEAR MR. SECRETARY: On May 19, 1924, Congress enacted into law the World War adjusted compensation act. Following the enactment of this law I submitted to Congress estimates for the funds necessary to meet the cost of its administration. These estimates were considered by Congress in framing the second deficiency bill, but this bill was not passed before the adjournment of Congress.

No funds have therefore been appropriated by Congress to enable you to do those things which the World War adjusted compensation act directs you to do.

The World War adjusted compensation act became a law over my protest. I am not willing, however, to let the administration of this law remain practically in abeyance until Congress again convenes simply because I would be justified under existing conditions in so doing.

Rather do I regard this law as imposing certain obligations upon the executive branch of the Government which do not permit of delay in performance.

If this law is to be carried into effect so as to permit of the cash payments being made within a reasonable time after March 1, 1925, as contemplated by it, and if the other provisions of the law are to be given reasonably prompt administrative action, it is essential that the application forms and instructions pertaining thereto be placed in the hands of the veterans and dependents without delay. Arrangements have previously been made for the printing of these forms and they are now ready for distribution.

It is equally as essential that when the completed applications are received from the beneficiaries of the law they be given the administrative action which the law prescribes. Otherwise your department will become the storehouse of millions of applications which can receive little or no attention until Congress convenes next December and makes an appropriation of the funds necessary to give them administrative action. The same situation, though to a modified degree, will obtain in the Navy Department.

Action has already been taken to give you sufficient additional personnel with which to distribute the application and instruction forms and to meet the administrative action which will be required in the completed applications which may be received from the beneficiaries of the law during the remainder of this fiscal year.

This leaves for consideration the matter of meeting the administrative requirements of the law for the first six months of the next fiscal year, which involves not only your department but the Navy Department and the United States Veterans' Bureau.

To meet these requirements I am to-day instructing the Director of the Veterans' Bureau to apportion his appropriation for salaries and expenses and his appropriation for printing and binding, fiscal year 1925, so as to make available for the six months commencing July 1, 1924, the following amounts for the administration of the World War adjusted compensation act, namely, War Department, salaries and expenses, $1,800,000, and printing and binding, $14,000; Navy Department, salaries and expenses, $250,000, and printing and binding, $7,700.

Your requisition for personnel, supplies and equipment, and printing and binding will be forwarded to the Director of the United States Veterans' Bureau, who will honor it to the extent of the amount herein mentioned.

It is my desire that your requisitions be kept to a minimum consistent with efficient and proper administration, and that so far as possible your requirements for supplies and equipment be obtained from the surplus stocks of the General Supply Committee and from any available War Department stocks. I am to-day advising the Secretary of the Navy of the arrangement set forth in this letter.

Sincerely yours,

CALVIN COOLIDGE.

REPUBLICANS CREATE VETERANS' BUREAU

The Republican Party has done far more for the ex-service men than merely appropriating money to be expended in their behalf. Of vastly greater importance than the appropriation of money was the coordination, under the Sweet Act, of all the Federal agencies dealing with the ex-service men into one organization known as the Veterans' Bureau. Following the creation of the Veterans' Bureau there was a gradual reform in the manner of handling of matters relating to ex-service men which has resulted in making easy, expeditious, and inexpensive the dealings of an ex-service man with his Federal Government.

That this is being done economically under the present management of the Veterans' Bureau and that money appropriated by the Congress for relief of ex-service men is being used for the purposes appropriated is proved by the following analysis of the distribution of the money appropriated by the Congress

for the Veterans' Bureau. Every dollar appropriated is distributed as follows:

| | Cents |
|---|---|
| Vocational training | 28 |
| Compensation | 26 |
| Insurance | 25 |
| Medical and hospital services | 12 |
| Salaries (including those of 27,000 employees of the Veterans' Bureau) | 6 |
| Rentals and other administrative expense | 3 |

To sum it up, the program of Federal aid to ex-service men, all of which has been put into effect by the Republican Party, the money for which has been appropriated by Republican Congresses, and which is under the direction of the present Republican administration, may be stated as follows:

(1) Over 400,000 ex-service men have received hospital treatment, 23,000 ex-service men are now receiving hospital treatment, over 1,000,000 ex-service men have been called for examination in order to ascertain if they are entitled to hospital or medical treatment.

(2) Over 173,000 ex-service men have entered vocational training; approximately 54,392 are now receiving such training, and 150,000 more have been declared eligible to receive such training.

(3) Over 100,000 medical examinations are being made free every month in order to ascertain the physical and mental treatment needed by afflicted ex-service men.

(4) Disbursements direct to disabled ex-service men or their dependents are being paid out at the rate of in excess of $800,000 in cash every day of the year, including Sundays.

(5) Free medical treatment is being given 20,000 ex-service men every month outside of hospitals in cases where confinement in a hospital is not necessary for proper medical treatment.

(6) Over 200 new claims are being handled every day by the Veterans' Bureau, and all work in that bureau is being conducted practically up to date at a minimum loss of time to all parties concerned and at a minimum expense both to the Government and to the ex-service men.

(7) An insurance business for over 561,000 ex-service men is being conducted by the Government without any cost of administration to the ex-service men at premium rates far below those which private companies charge for like policies.

The Republicans since they have come in control of Congress in April, 1919, have appropriated $364,128,000 for hospital work and hospital construction for ex-service men. As a result of these appropriations and the program of hospitalization carried out under the Republican administration since March, 1921, the United States to-day has the most up-to-date, scientific, and humanitarian system of hospitalization in existence. According to the records of the United States Veterans' Bureau as of April 24, 1924, there were 18,137 former ex-service men in hospitals under control of the United States Government, and there were 5,156 occupying beds in civil and State hospitals. The Veterans' Bureau operates three classes of hospitals—general, tuberculosis, and neuropsychiatric. The following is a list of hospitals owned and operated by the Veterans' Bureau, together with the location, classification, and capacity of each:

*United States Veterans' Bureau hospitals*

| Location | Beds available | | | |
|---|---|---|---|---|
| | General | Tuberculosis | Neuropsychiatric | Total |
| West Roxbury, Mass | | | 248 | 248 |

| American Lake, Wash | | | 306 | 306 |
| North Little Rock, Ark | | | 273 | 273 |
| Muskogee, Okla | 261 | 40 | 26 | 327 |
| Legion, Tex | | 393 | | 393 |

In addition to the above hospitals operated by the Veterans' Bureau are the beds which have been made available for ex-service men by the War Department, the Navy Department, and the national soldiers' homes, as mentioned above.

Construction of additional hospitals by the United States Veterans' Bureau is under way at several points. A 400-bed tuberculosis hospital is being constructed at Chelsea, N. Y.; a 268-bed tuberculosis hospital at Livermore, Calif.; and a 200-bed tuberculosis hospital at San Fernando, Calif. The neuropsychiatric hospital listed above at North Little Rock is being enlarged by 327 beds, and the hospitals listed above at Augusta, Ga., and New Orleans, La., are being enlarged by 290 beds and 160 beds, respectively. The site has been purchased for a 165-bed general hospital at Memphis, Tenn.

During the last year these various hospitals under the direction of the Veterans' Bureau handled a total of 78,014 patients. In addition they operated dispensaries and outpatient clinics, giving 89,517 treatments and 55,000 examinations.

FINEST SYSTEM OF REHABILITATION IN THE WORLD

The termination of the World War left a most serious problem for our Government to solve. Thousands of soldiers who before the war were capable of caring for themselves were left incapacitated. The task of rehabilitating these disabled ex-service men has been assigned to the Veterans' Bureau. It has built up the finest system of vocational education and training in the world.

The bureau has made use of the best educational facilities available to every section of the country and in addition has established schools and training facilities of its own. In still other cases it has cooperated with local authorities to modify courses in institutions not under its control. Unlike older vocational methods, the bureau's system aims at a specific employment for a specific man, instead of training men blindly, hoping that they may fit into some niche in the working world. The bureau provides such facilities as will most fully meet the requirements of the disabled man. It determines how much and what knowledge he already possesses. It then provides him with additional information and skill to enable him to do well the particular work for which he is to be trained. This may include training in State universities, colleges, technical institutions, trade schools, or commercial schools. In any event each disabled ex-service man is given individual attention and intensive individual training.

So little of this work was done under the Democratic administration that it may be truthfully stated all of the vocational training and rehabilitation work now being carried on in behalf of ex-service men is solely the product of the Republican policy.

The original bill creating vocational training facilities for ex-service men was introduced by Representative FESS, Republican, of Ohio, now United States Senator from that State, while the Democratic Party was still in control of Congress. Beyond the passage of the bill, the Democratic Congress did nothing. The Republican Congress, elected in November, 1918, appropriated $127,000,000 for vocational and rehabilitation work.

Up to July 1, 1921, only 5,050 men had been given training and discharged as rehabilitated. Since that time, a period of three years, the vocational and rehabilitation agencies of the Government, under Republican administration, have trained and discharged as rehabilitated 63,514 men, at the rate of 21,000 a year.

To April 1, 1924, 644,242 former service men had applied for vocational training. Of this number 329,659 were declared eligible. Of these 172,763 have entered training. Of this number 68,624 have completed their training and 57,511 are undergoing training. Of those in training 26,076 are in schools and colleges, 24,539 are in placement training, 4,264 in project training, and 2,632 are in the Veterans' Bureau vocational schools. Analyzed as to their training, 13,745 are pursuing courses, 24,850 trades and industries, 7,640 agricultural courses, 10,635 professional courses, and 641 fundamental courses. Resident vocational schools are being operated by the Veterans' Bureau at Evergreen, Md.; Pascagoula, Miss.; San Antonio, Tex.; Pocono, Pa.; Bellevue, Nebr.; Chillicothe, Ohio; Chicak Springs, S. C.; and Federal Park, Md. During the course of his training, which is at the Government's expense, the ex-service man is also allowed a monthly salary to provide for his living until he has completed his course.

EMPLOYMENT SERVICE OF VOCATIONAL TRAINING BUREAU

The Veterans' Bureau is now graduating these men at the rate of 3,000 a month. It feels that it is quite as much a part of its task to find employment for the rehabilitated ex-service men as it is to give them training. Very positive progress has been made in the employment phase of the rehabilitation work, especially during the past year. On March 31, 1924, after a total of 53,103 case had been referred to the employment service of the Veterans' Bureau there were but 1,102 rehabilitated men who were classified as "not in employment." It should be noted that under this classification are included those who "do not desire employment," and those who are sick.

Finding a position for a rehabilitated ex-service man is not an idle phrase or a gesture with the Veterans' Bureau. It does not consist merely in finding him a job and then leaving him to work out his own salvation. The employment service of the bureau maintains a follow-up system whereby a man is not listed as "employed" until he has shown for a period of four months that he is able to fill a position. The figures for employment, then, are bona fide figures, and not merely the number of men for whom "jobs have been found."

As to the practical value of the vocational training for ex-service men, statistical studies made of "unpicked" 38,000 rehabilitated ex-service men now employed show that they are earning more than they did before they received their disabilities or handicaps in service for their country. This is a remarkable tribute to the efficiency of the vocational and rehabilitation work carried on by the Government under the policies and the administration of the Republican Party.

The Veterans' Bureau, under its present administration, gives to every person disabled to a degree of 10 per cent or more in military service medical or surgical attention made necessary by the disability; also every person who, in the opinion of the bureau, has suffered a vocational handicap because of his disability is automatically placed in the list of those entitled to receive vocational education. Under the administration of Director Hines of the Veterans' Bureau, a rule has been made giving to ex-service men having temporary partial disability the rating of a permanent partial disability. The effect of this order has been to reduce the number of medical examinations required of ex-service men, thus relieving them from needless trouble and expense. It has also reduced the personnel required in the bureau for constant reexamination and rerating of partially disabled ex-service men. Under the ruling, the permanent rating is permitted to stand without further change for a period of two years unless the claimant, of his own volition, requests a reexamination.

In addition to legislation in connection with the Veterans' Bureau, the Republican Congresses since the armistice have enacted other laws in behalf of the ex-service man. Some of these are as follows:

Granting of preferred rights to ex-service men in homestead interests; authorization permitting absence at homestead entries of all ex-service men who are being treated by the Government for disability incurred in line of duty; appropriation of approximately $50,000,000 for bringing home from France the remains of ex-service men; the provision for transportation home from Europe of ex-service men who were discharged in Europe and who have since become destitute; creation of a committee to revise and codify all World War veteran legislation; authorization of a survey of all hospitals, homes, and institutions utilized for and by ex-service men of all previous wars; Federal incorporation of blind veterans of the World War.

ADMINISTRATIVE ACTS FAVORING EX-SERVICE MEN

In addition the Republican administration has continually exhibited a keen and abiding interest in seeing that all ex-service men are given preference in the Federal employment. President Harding set the example by issuing an Executive order providing for the addition of 5 points to the grade of any ex-service man who took examination for appointment in civil service. He also issued an Executive order prohibiting the dismissal from Government employment of any ex-service man whose record as a Government employee is good. This order enables ex-service men to hold their positions in the various Federal departments and bureaus while thousands of other civilian employees are being dismissed in the process of reducing the Government pay rolls to a peace basis.

The personnel of the Veterans' Bureau furnishes a striking illustration of the effect of this policy. Fifty-two per cent of the male employees in the central office of the Veterans' Bureau are ex-service men. The percentage of ex-service men in other Federal departments at Washington is not as high as that of the Veterans' Bureau, but, due to the preference shown the World War veterans, the percentage is constantly increasing. In the Post Office Department there have been 2,102 presidential postmasters named from the ranks of ex-service men since March 4, 1921.

Turning to State legislation one finds the record of the Republican and Democratic Parties in dealing with ex-service men forming as great a contrast as their record in connection with Federal administration and legislation. Since the armistice the legislatures of 22 States have definitely provided for the payment of cash bonuses to ex-service men. Those legislatures were Republican and the States are known as Republican States. The following is a tabulation of State bonuses authorized by the State legislatures, together with the basis of the computation:

| | |
|---|---|
| Illinois: Fifty cents for each day of military services, with a maximum of $300 | $55,000,000 |
| Iowa: Fifty cents for each day of service, with a maximum of $350 | 22,000,000 |
| Kansas: One dollar for each day of military service | 25,000,000 |
| Maine: Provides for payment of $100 for each ex-service man | 3,000,000 |
| Massachusetts: Paid a cash bonus of $100 to each ex-service man; also a bonus of $10 a month was paid for service from Feb. 3, 1917, to Jan. 15, 1918 | 32,000,000 |
| Michigan: Fifteen dollars for each month of military service | 30,000,000 |
| Minnesota: Fifteen dollars for each month of military service | 23,000,000 |
| Missouri: Ten dollars for each month of military service | 15,000,000 |
| New Hampshire: A flat payment of $100 to each ex-service man | 1,500,000 |
| New Jersey: Bonus of $10 for each month of military service, with a maximum of $100 | 12,000,000 |
| New York | 45,000,000 |
| North Dakota: Paid $25 for each month of service, to be used for certain definite purposes | 11,000,000 |
| Ohio: Ten dollars for each month, with a maximum of $250 | 32,5000,000 |
| Oregon: Fifteen dollars a month for each month of service, with a maximum of $500 | 30,600,000 |
| Rhode Island: Cash bonus of $100 to each ex-service man | 2,500,000 |
| South Dakota: Basis of pay $15 for each month of service, with a maximum of $400 | 6,000,000 |
| Vermont: Ten dollars for each month of service, with a maximum of $120 | 1,500,000 |
| Washington: Fifteen dollars for each month of service | 12,500,000 |
| Wisconsin: Ten dollars for each month of service, with a minimum of $50; in lieu of bonus, veterans may choose educational benefits of larger amounts | 2,000,000 |
| Grand total | 380,600,000 |

In the following States the legislatures have provided for bonus for ex-service men, which legislative provision has been submitted to a referendum:

Colorado, $8,000,000.
Pennsylvania, $35,000,000.

The Montana Legislature enacted a bonus law carrying an appropriation and bond issue of $4,500,000. It was declared unconstitutional by the Montana courts. The succeeding legislature enacted a resolution to amend the constitution so as to provide for a bonus. The amendment is now before the State to be voted upon at the next general election.

REPUBLICAN STATES TAKE CARE OF THEIR EX-SERVICE MEN

In the above list of States providing for a bonus New York is included. The New York Legislature voted $45,000,000 and authorized a bond issue. The New York courts declared it unconstitutional. The legislature then provided for a referendum on an amendment to the constitution to permit a bonus, and the voters passed favorably upon the amendment.

This makes a total of $427,000,000 in cash bonuses which have been voted ex-service men by Republican legislatures of Republican States. In addition, the Republican Legislature of the Republican State of California provided for the issuance of $10,000,000 in bonds to be administered by the Veterans' Welfare Finance Commission. The money is to be expended for ex-service men and their dependents, providing educational and vocational aid and financial assistance for the purchase of farms and homes.

But the voting of cash bonuses is not the only or even the most important legislation enacted by the Republican State legislatures for the benefit of ex-service men. According to data compiled from the American Legion Weekly and from the annual report submitted to the convention of the American Legion at San Francisco, the following State aid—exclusive of any State bonus—has been extended ex-service men by the several States:

Twenty-one Republican States have by law granted ex-service men preference in public employment. These northern Republican States are California, Colorado, Connecticut, Illinois, Indiana, Iowa, Kansas, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nevada, New Jersey, New York, Oregon, Rhode Island, South Dakota, Washington, and Wisconsin. No southern Democratic State has enacted such a law.

Eleven northern Republican States have enacted legislation exempting ex-service men from poll and property taxes. They are Connecticut, Iowa, Maine, Massachusetts, Oregon, New Hampshire, New Jersey, New Mexico, North Dakota, South Dakota, and Wyoming. Only three southern Democratic States—Oklahoma, Texas, and South Carolina—have enacted such legislation.

Fourteen northern Republican States have provided for educational aid for ex-service men. They are California, Colorado, Illinois, Indiana, Iowa, Maine, Minnesota, Nebraska, New York, Ohio, Oregon, South Dakota, Utah, and Wisconsin. Only three southern Democratic States have made such provision—Kentucky, South Carolina, and Tennessee.

Four northern Republican States have enacted laws which provide for financial assistance to ex-service men wishing to buy homes. They are Arizona, California, Oregon, and South Dakota. No Democratic State has made such a provision.

Ten Republican States have enacted legislation providing financial assistance to ex-service men wishing to settle on land, to buy and equip farms. They are Arizona, California, Colorado, Idaho, Minnesota, New Mexico, Oregon, South Dakota, Washington, and Wyoming. One Democratic State—North Carolina—has such a provision.

Sixteen northern Republican States have made provision for State relief for needy ex-service men and their dependents. This is exclusive of any bonus legislation. They are Connecticut, Idaho, Maine, Massachusetts, Minnesota, Montana, Nebraska, New Hampshire, New York, Ohio, Oregon, Rhode Island, South Dakota, Washington, West Virginia, and Wisconsin. Two southern States—Oklahoma and Tennessee—make such a provision.

Eight northern Republican States make provision for assisting ex-service men to find employment. They are Illinois, Indiana, Massachusetts, Missouri, Nebraska, Nevada, New Jersey, and Washington. Only one southern Democratic State—North Carolina—makes such a provision.

Ten northern Republican States have established welfare commissions or boards to assist ex-service men and their dependents in many ways. They are California, Idaho, Iowa, Minnesota, Montana, Nebraska, Oregon, Rhode Island, Washington, and Wisconsin. Two Democratic States—Georgia and Oklahoma—have made such provision.

Eighteen northern Republican States have by legislation provided for the admission of ex-service men to State or public hospitals with free treatment. They are Arizona, California, Connecticut, Illinois, Indiana, Iowa, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New York, Ohio, Oregon, Pennsylvania, Utah, Washington, and Wyoming. Only three southern Democratic States—Maryland, Oklahoma, and Texas—make such provision.

Three northern Republican States make provision for loaning funds to needy ex-service men. They are Oregon, South Dakota, and Washington. No southern Democratic State makes such provision.

Two northern Republican States, in addition to providing a bonus for all ex-service men and State aid to needy ex-service men and their dependents, also provide a State pension for ex-service men made blind by reason of their service. These two States are New York and New Jersey.

DEMOCRATIC SOLID SOUTH DOES NOTHING FOR EX-SERVICE MEN

It will be noted that with rare exceptions no State in the Democratic "solid South" has enacted any legislation lending any material assistance to ex-service men or according them any recognition or preference in public employment. The four Democratic States of Alabama, Arkansas, Georgia, and Mississippi have done nothing for the ex-service men. The only legislation of any character which Alabama, represented in the Senate by Senators HEFLIN and UNDERWOOD and in the House by such leaders as HUDDLESTON, has enacted has been to exempt ex-service men from having to pay a license in order to practice medicine. The State of Arkansas is represented in the Senate by JOSEPH T. ROBINSON, floor leader of the Democratic minority, and THADDEUS CARAWAY. This State has done nothing for the aid, relief, or recognition of its ex-service men. The State of Georgia has exempted ex-service men from having to pay a license to peddle. Mississippi, represented by PAT HARRISON, the keynoter of the Democratic National Convention, has made but one provision for its World War veterans: it records their discharge papers without any charge. Yet in each of these States there have been at least two regular sessions of the State legislature since the close of the war, and in all but two there have been three sessions.

While the need of the World War veterans have naturally been emphasized since the armistice, legislation affecting other veterans of the United States has not been neglected. The Republican Congress elected in 1918 enacted a law May 1, 1920, revising and equalizing pension rates to veterans of the Civil War and previous wars, together with their dependents, widows, and orphans. This legislation greatly liberalized the Civil War pension act. One of its provisions granted $72 a month to Civil War veterans helpless or blind or so nearly helpless as to require regular personal attendants. During the first year this amendment was in effect 39,000 Civil War veterans applied for the $72 rate. The administration of this Republican law was handicapped by the Democratic pension officials in that they ruled that the $72 pension should be granted only from date of the certificate of medical examination by the regular board of surgeons. The effect of this was to penalize Civil War veterans because of the slowness of the Pension Bureau in making medical examinations. As soon as the Republican administration came into power March, 1921, this ruling was set aside under an order of the Secretary of the Interior dated April 25, 1921. This new ruling provided that all Civil War veterans entitled to a $72 rate under the law should have their pension paid from the date of their application for the increased rate.

REPUBLICANS PROVIDE SPANISH-AMERICAN WAR PENSIONS

The Republican Congress elected in 1918 also enacted June 5, 1920, the first Spanish-American War pension act, known as the Sells bill, because it was introduced by Representative Sells—Republican—of Tennessee. This provided a pension of not less than $12 nor more than $30 a month to all persons who had served 90 days or more in the military or naval service of the United States during the war with Spain, the Philippine insurrection, or the Boxer revolution. The Sixty-seventh Congress, under the act of September 1, 1922, liberalized the Spanish-American War pension by including pensions to widows and minor orphans of deceased Spanish-American War veterans as well as their dependent parents.

On May 3, 1922, the Sixty-seventh Congress enacted legislation which provided that all pensions should be paid monthly after September 4, 1922, instead of quarterly, as heretofore. The Pension Bureau, under the administration of Secretary Work, has still further liberalized this law, issuing an order which does away with the necessity of the execution of vouchers preliminary to the issuance of pension checks. The cost of having to prepare these vouchers in many cases amounted to a full month's pension. In addition a great many widows and disabled veterans found it practically impossible to comply with the regulations, as it frequently necessitated monthly travels of considerable distance. Under the present ruling vouchers are required only where the pension is to be paid to some other than the pensioner. The Pension Bureau under the present administration has also been so reorganized as to speed up the mailing of the 520,000 monthly pension checks, with the result that pensioners are receiving their checks from 24 hours to 1 week sooner than previously.

PENSION RULINGS LIBERALIZED

During the past two years of the Republican administration the Pension Bureau, under the orders of the Secretary of the Interior, has made several important modifications in practices and rulings, with the result that pensionable rights have been conferred upon hundreds of veterans who formerly had been

denied pensions through narrow and technical construction of the laws. Criticisms of the Pension Bureau which existed throughout the Democratic administration because of the narrow, restricted, and technical interpretations of pension laws which worked to the injury of the soldiers of the Civil and Spanish-American Wars and their widows have given way to a feeling of confidence in the Pension Bureau among all those with whom it deals.

THAT "DO-NOTHING CONGRESS" PIECE OF FICTION

Our Democratic critics are still reiterating the falsehood that the Republicans in Congress have done nothing under this administration. The following is an enumeration of some of the principal laws enacted by the Republicans in Congress since the inauguration of the Republican administration in March, 1921, the Congress being called in special session in April, that year. The record will bear out the statement that no American Congress in times of peace ever enacted so much helpful, fundamental, constructive legislation. First in importance and almost first from the standpoint of chronology was the enactment of the Budget law, which created the Budget Bureau and armed it with authority to do what it has done. In view of the fact that the bulletin put out by the Democratic National Committee for Democratic Women's Clubs has claimed that the Budget system now in operation is of Democratic origin, it might not come amiss to state in a few words the facts regarding the Budget system.

The first concrete proposition for a Federal budget system was made by the Taft Commission on Efficiency and Economy. It was submitted to the Democratic Congress during the closing months of President Taft's administration. Its proposal was received by the Democrats in both the Senate and the House with violent denunciation. Not satisfied with denouncing the proposal for a Federal budget, Democratic House leaders inserted a paragraph in appropriation bills denouncing the Budget system and providing that none of the money appropriated by the Democratic Congress should be expended under the direction of such a system.

DEMOCRATS FOUGHT BUDGET SYSTEM

On March 4, 1913, President Wilson was inaugurated, and for six years the Democrats had control of both branches of Congress and all the executive offices of the Federal Government. During that period no attempt was made by the Democratic Congress to enact a budget law, and no effort was made by the Democratic Executive to install a budget system in the handling of their finances.

A Republican Congress was elected in 1918. That Congress enacted a Federal budget law practically identical with the Budget which is now on the books and in successful operation. President Wilson vetoed it.

There were 191 Democrats in the House at that time. Of this number only 36 votes in favor of the Budget and to override President Wilson's veto. Fifty-five refused to vote, and thus refused to go on record in favor of the Budget system. Among them were Representative THOMAS HEFLIN, of Alabama, now in the Senate, and Representative T. H. CARAWAY, of Arkansas, now in the Senate. An even 100 Democrats voted to sustain the President's veto and thereby put themselves directly on record as against the Budget. Among them was Champ Clark, of Missouri, Democratic leader at that time, and CORDELL HULL, of Tennessee, now chairman of the Democratic National Committee.

LIST OF ACTS OF "DO NOTHING" CONGRESS

To continue the list of laws enacted by the Republicans in Congress since March, 1921:

Created a foreign debt funding commission which has already closed an agreement with Great Britain for the payment of her debt of $4,800,000,000, which amounts to about 35 per cent of the total foreign loans.

Revised the War Finance Corporation and increased its power so that it could make loans to agricultural and livestock interests and provided it with a billion dollar revolving fund; twice extended the life of this reconstructed organization.

Created the Veterans' Bureau, which consolidated all governmental agencies dealing with ex-service men; appropriated over $1,000,000,000 for the use of this bureau; appropriated $17,000,000 for a hospitalization program; enacted a series of minor laws extending relief to ex-service men, such as giving them a longer time in which to file claims, and so forth.

Gave the Federal Government power over all foreign cable landings on American territory as a protection to American commercial interests.

Revised the Federal highway act and appropriated $75,000,000 for expenditure on public highways.

Passed an act regulating trading in grain futures which was declared unconstitutional; enacted a second law of this character, eliminating the unconstitutional features of the first act.

Passed a seed loan act for relief of farmers in drought-stricken areas in the Northwest.

Passed a resolution declaring an end to the state of war between Germany, Austria, and Hungary.

Voted an appropriation of $10,000,000 for the purchase of food to be sent to Russia for the relief of destitute.

Passed a series of laws giving leeway on payments due from those who had settled on irrigated or reclamation projects, who had purchased Indian lands, and who were using Government lands for grazing purposes.

Restrictive immigration act.

Emergency or farmers' tariff.

Maternity and infancy act.

Reduction of United States Regular Army to 125,000 men and reduction of United States Navy to 86,000 enlisted personnel.

Reorganized the Indian Bureau.

Reorganized Philippine fiscal conditions; extended to the Philippine government millions of extra credit and borrowing power in order to save the islands from complete bankruptcy due to maladministration under Democratic régime.

Edge Act, which facilitated organization of corporations wishing to engage in foreign trade.

Increased available funds of Federal farm loan bank by $25,000,000 and amended law regulating sale of Federal farm loan bank bonds so as to facilitate their marketing.

The Volstead Act, providing for enforcement of Federal prohibition amendment.

Packers and stockyards act, regulating handling of livestock in interstate commerce.

Fordney-McCumber permanent protective tariff.

An act authorizing the Interstate Commerce Commission to issue order providing for sale of highway mileage books at 20 per cent less than rates for single tickets.

Special appropriation to enable Department of Justice to prosecute war graft and frauds.

Legalized the formation of cooperative marketing associations on the part of producers.

Increased the Federal judiciary by 24 judges and provided for transfer of judges to relieve congestion in Federal courts.

Filled milk act.

Rural credits act.

Created a coal fact-finding commission.

Soldiers' bonus or adjusted compensation act.

Created commission to codify all laws pertaining to World War veterans.

Increased United States Coast Guard equipment and personnel for purpose of more rigidly enforcing the laws, particularly the prohibition laws, by stopping rum running or the smuggling of liquor into the United States.

Created a dairy bureau in the United States Department of Agriculture.

Provided for compensation of United States employees who are injured in line of duty.

Approved agreements reached by United States Foreign Debt Funding Commission with the Governments of Finland and Hungary.

Provided for the reorganization of Consular and Diplomatic Service.

Authorized the official participation of the United States in an international conference for the purpose of suppressing the opium and narcotic traffic.

Passed a joint resolution providing for an amendment to the Federal Constitution giving Congress the right and power to enact legislation prohibiting and regulating child labor.

In addition to the above, the United States Senate, as the coordinate treaty-making body of the United States, has made a record in respect to handling foreign treaties. It ratified peace treaties, formally bringing to a close the state of war between the United States, Germany, Austria, and Hungary. It ratified in less than 40 days the seven treaties formulated at the Washington Conference for Limitation of Armaments. All told, the United States Senate has since March, 1921, ratified 49 treaties which have been entered into between this Government and foreign powers.

AMERICANS HAVE PROGRESSED LONG WAY SINCE 1921

The American people have traveled a long way forward since March, 1921. During the last year, in striking contrast to the general depression which prevailed in all lines of activities three years ago, our industries were producing more than ever before in any period of peace, our mercantile interests were selling more, our railroads were transporting more, our industrial

workers were getting better wages and living better, the American people as a whole were enjoying more luxuries, buying more insurance, and putting more money in the savings banks than in any previous period since this Republic was founded.

This marvelous transformation has taken place under the Republican Party and because of its policies and administration. It has taken place because during the major portion of that time there was the utmost cooperation between the executive and the legislative branch of the Government, both under complete control of Republicans commissioned by the people in 1920 to take charge of the Government and put into effect Republican policies. The only time since 1921 when there appeared to be a recession of general prosperity and a slackening of public confidence in the future has been during the last few months, when due to a Democratic radical coalition in Congress that legislative body began to thwart the constructive program of the Republican administration. There can be no doubt that the election of a Congress hostile to the executive branch of our Government would be disastrous to the prosperity of the country and inimical to the welfare of the people. There can be no doubt that the election of a Democratic President as well as a Democratic radical Congress would bring about national disaster. It would be taken to mean, and it would mean, the return of all the evil and destructive policies and practices that prevailed under the last Democratic administration, all the evil policies and practices which have prevailed under each Democratic administration since the Civil War. It would mean extravagance and profligacy instead of economy and thrift in public affairs. It would mean a return to destructive interference with legitimate business which under the Wilson administration resulted so disastrously, not so much to the commercial interests of the country as to the agricultural and industrial interests, to the impoverishment of the farmer and the wage earner. It would mean a renewal of national flirtation with cheap and fantastic systems of currency and credit, for Democracy has always been tainted with greenbackism, populism, and free silverism. It has always sought to cure economic evils by increasing the coinage of the country instead of increasing the productive capacity of our mills and farms and railroads and other enterprises upon which our national prosperity and progress depends.

MERE THOUGHT OF DEMOCRATIC VICTORY FRIGHTENS COUNTRY

The mere fear of the possibility of a return of Democratic administration or the election of a Democratic-radical Congress has already laid its dead hand upon the activities of our myriad interests. Business men, manufacturers, farmers, men with investments everywhere, know that the history of the United States since the Civil War records the indelible and unvarying fact that inauguration of a Democratic administration is followed by a panic. The Democratic Party has never exhibited the capacity to govern wisely and in accordance with the fundamentals of political economy. It lacks utterly the ability to vision the affairs and needs of the American people as a Nation. This is because the Democratic Party is sectional—it is lopsided in its control by a few States with rotten boroughs.

It is incredible to believe that after the American people have taken an invoice of their national administration, have heard the accounting of their public servants placed in power by the Republican Party, and review the progress of the last three years of Republican rule that they will not go to the polls and by an overwhelming vote commission the party which has brought about this improvement to continue the work so well begun.

PEOPLE WILL KEEP COOLIDGE AND ELECT REPUBLICAN CONGRESS

The American people have always proved their wisdom when presented with the facts. They will prove their wisdom in November by electing the presidential ticket nominated at Cleveland with a unanimity never before equaled in any political convention and by electing a loyal, reliable, old-fashioned Republican majority in both branches of Congress to work with and cooperate with the Republican executives. The Republican Party goes before the people in this campaign confident of their verdict in November, because it is able to present to the people a record of three years of hard work, wise administration, constructive legislation, rigid economy, reduction of taxes, revival of industrial activity, relief for agriculture, prosperity for the wage earner, recognition of womanhood, protection of childhood, unstinted aid for ex-service men, stability for business, encouragement of private enterprise, promotion of world peace, and a general economic improvement which has made America prosper and progress to a degree never before equaled by it and its people.

NAVY OIL RESERVE LEASES

Mr. WINTER. Mr. Speaker, since addressing the House on March 17 and April 17, 1924, on the subject of the naval oil reserve leases, in which addresses I attempted to place the full facts as to the merits of the leases before the country, there have appeared in the CONGRESSIONAL RECORD two contributions on the subject neither of which controverted or attempted to controvert the facts, figures, documents, records, arguments, and conclusions of those addresses.

The first of the contributions I have referred to furnishes an interesting and illuminating side light on the question whether the attacks upon the leases were and are sincere, in good faith, and in the public interest, or whether partisan political purposes were the impelling motive. It is found on page 7003 of the CONGRESSIONAL RECORD of April 21, 1924, and needs but to be read to disclose that the foremost prosecutor of the oil committee was moved by party zeal and so blinded to the facts by his prejudice that a great mistake was nearly made and a deception of the people nearly consummated in respect to a very important phase of the leasing matters. It was an attempt to deny the truth of statements of Republican speakers and writers that the leases granted under the Republican administration actually returned higher royalties to the Government than the leases made under the preceding Democratic administration, accompanied by the statement that he desired to save the public from being imposed upon. The press reporting the address spoke of it as a denunciation of a Republican plot to deceive the American people. The record demonstrates beyond the shadow of a doubt that such original statements were absolutely correct, and that the charge of attempted deception of the people recoils upon the head of the author of this record.

I quote from the record:

Prior to March 4, 1921, there were leased upon competitive bidding all of the lands adjacent to naval reserve No. 3 within the Salt Creek field, and those leases all carried a royalty—bear in mind, the immediately adjacent territory—of 33⅓ per cent flat, with a large bonus in the case of many of them and some bonus in the case of practically every one of them. The story about that is as follows:

Direction was given under the statute to offer that territory to competitive bidding on a basis of 25 per cent royalty with a bonus. Secretary Payne approved the letter, but struck out 25 and inserted 33⅓ per cent, and the territory was leased under that arrangement—33⅓ per cent for the inside tracts and 30 per cent for the outside tracts, but they were secured upon bidding bonuses as follows:

"For the first lease a bonus of $26,700 was secured on a flat royalty of 25 per cent cent."

On the next lease a bonus of $279,000 was secured upon a flat royalty of 33⅓ per cent.

On the next lease a bonus of $2,000 was secured upon a flat royalty of 25 per cent.

On another lease a bonus of $226,000 was secured upon a flat royalty of 33⅓ per cent.

The lands adjacent to the Teapot Dome were thus leased under an arrangement for competitive bidding by which the Government secured a total bonus of $1,680,000 and an average royalty of 28.76 per cent.

These are the facts about the matter as disclosed in the testimony. Now former Secretary Denby is going about the country, after having told us before the committee that he did not know anything at all about the matter, detailing facts such as these to which I have directed the attention of the Senate. For instance, in a speech reported in the papers on Saturday last he tells us, as follows:

"Meanwhile the hundreds of oil wells upon private lands within and adjoining the reserve were draining the oil from under the Government lands in the reserves, the total number of these wells, as stated by the bureau of mines March 4, 1921, being 785."

That means there were 785 wells up in the Salt Creek field, the total number of wells there.

Mr. KENDRICK. Will the Senator yield again?

Mr. WALSH of Montana. I yield.

Mr. KENDRICK. Can the Senator tell us whether or not the territory adjoining or contiguous to the oil structure, the naval reserve, was leased after Secretary Fall became Secretary of the Interior?

Mr. WALSH of Montana. Some were leased afterwards and some before.

Mr. KENDRICK. But those wells on the territory between Salt Creek, we may say, and the naval reserve, were actually leased by Secretary Fall himself?

Mr. WALSH of Montana. I think that is so; but the proceedings were instituted, as I have indicated, under the administration of Secretary Payne.

Thus it appears that the distinguished Member was engaged, apparently, in an attempt to do that with which he had charged ex-Secretary Denby and Hon. Leslie Shaw. The whole

structure thus carefully built up with the announced purpose of exposing the duplicity of Republicans collapsed upon the crucial point as to which administration had made the 22 very advantageous leases for the Government of 44 160-acre tracts on the east, southeast, and south parts of the Salt Creek field adjacent to the Teapot Dome. All that was presented in this record, except minor inaccuracies, was true as to the favorable features of the leases from the Government standpoint as to high royalties and bonuses, but in an unguarded moment, wittingly or unwittingly, as the truth has a habit of emerging at times, his colleague disclosed the very important fact that those valuable leases for the Nation were made by Secretary Fall. They were auctioned off and the bonuses secured under the direction of Secretary Fall on behalf of the Government, June 15, 1921, three months and a half after the Democratic administration had ended. All the credit, therefore, the speaker attempted to claim for his party must be given, under his own facts and figures, as to their great merit, to the Republican administration. Once more the cloud is removed and the light of the truth emerges and another political, partisan, prejudiced misrepresentation is dispelled. The speaker showed beyond a doubt that the leases he enumerated called for the highest flat royalty and brought the highest bonuses of any leases made by and on behalf of the Government. Thus the claims made by the Republican speakers he criticized for the Republican administration as to the highest returns netted by the Government were absolutely true. Yet he was willing and apparently anxious to leave Congress and the people under the false impression created by him in this record, which was headlined in the press of the country the day the speech was made that these leases had been let by the Democratic administration. The truth was curiously enough disclosed by the two simple questions of fact of his Democratic colleague.

This record is characteristic and typical of the whole proceedings of investigation into the Navy oil reserve leases, presenting a mass of inferences, misrepresentations, wild charges, and false conclusions, and omitting facts and conditions which were essential to a true judgment.

In notable contrast to this record of April 21, 1924, and to the record of January 29, 1924, which contains the first statement and denunciation of the spokesman and prosecutor of the oil committee against the leases, which resulted in the resolution of Congress to have court actions brought in an attempt to have the leases canceled, is the report now made on behalf of the majority of the Senate Public Lands Committee which carries on the oil investigation, which report is found on pages 11041 to 11053, inclusive, of the CONGRESSIONAL RECORD of June 6, 1924, and to which I now desire to direct your close attention.

This final report following the conclusion of the taking of vast volumes of evidence, drawn and presented by the lawyer and the judge rather than the party advocate, prosecutor, and politician, is, in its recitals of fact, an acquittal of Secretaries Fall and Denby, a confession of false charges, a withdrawal of the early indictments, and an exoneration so far as the merits of the naval leases and the interests of the Government are concerned.

It must be borne in mind that the representative of the oil committee in this final report properly and judiciously leaves, as we have contended should be done, the matter of gifts or loans of money by Doheny and Sinclair to the courts, as also the effect upon the validity of the leases, if the court shall find criminal guilt. This majority report in its recital of facts, as distinguished from inferences, opinions, and conclusions, discloses no detriment to the Government in these leases and frees from the charge of wrongdoing entirely every Navy and Interior Department official, excepting only the case of Mr. Fall in regard to money transactions.

The only questions left under this report of the Senate Public Lands Committee are two direct questions of law and fact, on which it is clear there could be and were honest, justifiable differences of opinion. Each view was and is sustained by respectible expert advice and reasoning. The whole matter has been reduced by this report to a question of correct judgment or incorrect judgment, of right opinion or wrong opinion, of proper conclusions or improper conclusions, as is demonstrated by the following excerpts from an editorial in the Christian Science Monitor:

> The report of Senator WALSH of Montana, chairman of the committee which investigated the naval oil leases, does credit to him as a lawyer, though it will doubtless be disappointing to the eager Democratic partisans who had hoped to make of it an essential document in the coming presidential campaign. * * * But these charges are not of a kind of which campaign ammunition can be readily made. It would not be difficult to argue from the report of the Senate committee that former Secretary Denby and Assistant Secretary Roosevelt had been martyred by public clamor at the time of the investigation, for the report completely exonerates both from having had any part in the negotiations which led up to the transfer of the oil fields to Doheny and Sinclair. * * * Politicians hoping to make a major issue in the pending campaign will undoubtedly deprecate the sense of judicial responsibility which has led Senator WALSH to refrain from any apparent partisan effort to make his report a campaign document. * * * It will be better that this contest between the parties for the control of the Federal Government should be waged upon economic and industrial issues rather than carried on upon the plane of mud slinging and mutual recrimination. There were eminent Democrats just as there were eminent Republicans tainted somewhat with the touch of oil.

I agree with that editorial that the report of the committee is toned down immeasurably from the first denunciations, and it is so because the cold, hard facts finally appeared out of the muck and ruck of partisan charges, and they did not support the lurid headlines of the early days of the investigation or the rabid utterances of politicians and demagogues anxious to spread the slime of scandal, who were disappointed because it did not reach into the grave or the executive chamber. But so far as the terms of the leases are concerned and the actions of the Secretaries in making them, there was and is no taint of oil. The leases and contracts were, as I have maintained and, as I believe, conclusively shown in my previous addresses, good leases and contracts on behalf of the Government and had to be made to protect the oil resources of the Nation from depletion.

The question of fact is: Was there such drainage or danger of drainage of the oil of the naval reserves as made it necessary and wise to enter into leases for the purpose of extracting the oil?

The committee report itself now admits the fact of actual drainage going on at the time the leases were made, that it would continue, and that it was necessary that something be done to protect the Government's oil.

I quote from the report:

> It developed in the hearings, however, and was otherwise revealed that drainage was taking place, particularly in naval reserve No. 2, and perhaps at the eastern extremity of naval reserve No. 1, to arrest or minimize the effect of which it was desirable to clothe some one with the authority to provide for the drilling of offset wells or line wells, or otherwise to meet the situation.

Nos. 1 and 2 were the California reserves. No. 2 was leased first by Mr. Daniels; No. 1 by Mr. Fall. As to No. 3, the Teapot Dome in Wyoming, the report states as to drainage:

> The reports of the geologists—the committee's experts—confirmed the view that drainage was actually taking place and that loss was being suffered not only by the actual migration of oil but by the reduction of the gas pressure within the reserve area, affecting the amount of oil which could eventually be recovered. There seems never to have been any sound reason for the contention that it was geologically impossible to drain the reserve to some extent at least through the wells in the Salt Creek field.

Thus the fact of actual, substantial drainage from each of the naval reserves is settled beyond the question of a doubt. The report further shows that the Bureau of Mines estimated the loss which actually occurred by delay in leasing reserve No. 2 by Mr. Daniels up to March 4, 1921, was 6,800,000 barrels, valued at $8,000,000. This loss was directly due to Mr. Daniels "obdurately," as the committee says, refusing to lease, despite the conclusive evidence of loss constantly going on. Under the theory of the committee, based on the evidence of Geologist Fred G. Clapp, one of its experts, it is admitted that had no lease been granted on the Teapot Dome 4,000,000 barrels would have been lost. If they had taken the evidence of the other committee expert—James O. Lewis—and the Bureau of Mines, they would have had to admit a loss in time of many more millions of barrels, and if they had accepted the opinions of other disinterested geologists they would have admitted a probable loss of 16,000,000 barrels, or from 60 to 70 per cent of the total content of the field which was finally determined, after drilling had given the necessary data for certainty, at 26,000,000 barrels.

The report advances the view that perhaps the drainage could be guarded against by leases for merely offset wells across the lines from privately owned wells rather than by leases for the entire structures, but it is forced to admit again that such was not the view of Geologist Lewis and the Bureau of Mines, the practical instrument of the Government in actual charge of the Government's interests on the ground. The complete ex-

haustive report of Mr. Lewis holds that drainage would effect the entire Teapot field and that it was the part of wisdom and in the Government's best interest that the whole structure be leased to some one financially strong enough to drill the whole field simultaneously, thus securing a comprehensive, complete, and economical development. The opposite theory subjected the Government to the danger of losing practically all the oil, as it depended upon gas wells and oil wells paraffining and sealing themselves up. Mr. Fall and Mr. Denby came to the conclusion that they could not and would not take such enormous risk for the Government in addition to the absolute certainty of many millions of barrels of oil which it is admitted were lost and many more millions that would be lost if leases were not made. Let it be remembered that the Denby-Fall plan was comprehensive; that it included the exchange of royalty nonfuel oil for fuel oil of Navy specifications delivered in steel storage tanks on the coasts and the Hawaiian Islands, available for instant use for defense in time of war. And let it be further remembered that these leases called for much higher royalties to the Government than most of the leases of reserve No. 2 entered into by Mr. Daniels. The rates of royalty for the Nation were recognized very high, running from 12½ per cent on wells of 50 barrels capacity to 50 per cent on wells running 1,000 barrels.

The report would leave the impression that all the Government received from the Teapot Dome production was 6 per cent of the oil and gas. The fact is that the actual royalty paid, in more than a year's operation, was 17 per cent, and that had the wells been of greater capacity, a matter beyond anyone's knowledge or control, it might have been as high as 50 per cent. Eleven per cent of the royalty oil was paid for the tankage and approaches thereto, which were erected and provided at actual cost by the lessees under the contracts. Every interest of the Government was carefully provided for in the drawing up of these leases, as is apparent upon a reading of them. The report further concedes that the leases were drawn after conference by the Secretaries with the highest officials of the Bureau of Mines.

The law question involved is, Does the act of June 4, 1920, which empowered the Secretary of the Navy to—

> conserve, develop, use, and operate the same in his discretion, directly or by contract, lease, or otherwise, and to use, store, exchange, or sell the oil and gas products thereof, and those from all royalty oil from lands from the naval reserves for the benefit of the United States—

authorize him to lease and contract as he did, including the exchange of royalty oil for tankage and approaches to the tanks, as well as the exchange for other fuel oil or their products, which is admitted?

In my former addresses I went into this phase in detail and showed that there was no limitation in the act: the Secretary had the right to rely on the plain language of the act and did not exceed his authority; that his authority was derived directly and fully for all the provisions of the leases and contracts from the said act of June 4, 1920, which, as we have seen, was passed at the request of Mr. Daniels, then Secretary of the Navy under President Wilson, and with Mr. Wilson's sanction and complete approval, as well as the approval of Congress, which passed the act without debate.

It is not necessary to enter into further argument to show all this. It is obviated by the report of the committee itself, which, while still denying in theory, admits in fact that the Secretary was given this complete authority to do all that was done with respect to these leases and contracts, when it recommends, as it does, that the act be amended. I quote:

> In view of what has transpired, it [the act] should be made plain—
>
> 1. That no lease or other contract authorizing or providing for the extraction of oil or gas from the reserves should be entered into except upon competitive bids, for which proposals should be duly advertised.
>
> 2. That no such lease or contract should be entered into for any purpose, except to protect the reserves from drainage and for such limited areas as should be drilled to that end, unless in the case of an emergency, to be proclaimed by the President of the United States.
>
> 3. That every such lease or contract should be submitted to and approved by the Comptroller General before taking effect.
>
> 4. That the authority conferred by the act of June 4, 1920, to exchange is restricted to the exchange of crude oil or gas for fuel oil or other products or derivatives of oil or gas.

All laymen as well as lawyers will understand at once that if the law does not now prohibit these things then Secretaries Denby and Fall did not violate the law. If they did violate the law, then no amendment is necessary.

It is nevertheless contended that it was the province of Congress to say whether Navy oil was to be exchanged for tanks and approaches and to appropriate money for the purpose, and the report further says there was disclosed some evidence of glee that Congress was outwitted in the course pursued. But what are the facts, and what does the undisputed evidence show in this regard? At a hearing held before the Subcommittee on Appropriations of the United States Senate on May 4, 1922, within a month after the first leases and agreements with the Mammoth Oil Co. and with the Pan-American Petroleum Co. were made, and long before the Pan-American Co.'s lease, dated December 11, 1922, in reply to questions by various members of the committee, Secretary Denby stated:

> Now we are planning to get the war reserve oil above ground because we can not keep it below ground. * * * The oil was being drained off. * * * The contractors build the tanks at points designated by the department, points along the Atlantic coast, on the Pacific coast, and in Hawaii. * * * The tanks are to be built out of the royalty to be paid to the Government. They are a part of the contract. * * * This was a matter that the Department of the Interior would know about very much better than we, but as soon as it was discovered (referring to the loss of oil by drainage) that such was the situation, I asked the Secretary of the Interior to handle it for the Navy thereafter and we went to the President and secured the executive order transferring the naval oil reserves to the Secretary of the Interior, to administer in trust for the Navy, the Secretary being a party to the policy but not to the actual administrative work. For instance, I signed the Teapot lease agreeing that it should be opened, because we discovered that that also was being drained off.

The hearing from which the above quotations are made is contained on pages 180–188 of the hearing of the House and Senate naval appropriation bill, 1923, Sixty-seventh Congress, second session, March–June, 1922. Can anyone say with reason in the face of that record that Congress was "outwitted"? Here it is disclosed that Congress had full knowledge of the acts and intentions of the Secretary of the Navy to proceed with the exchange of oil for tankage to store the remaining royalty oil. This was before any operation had been started on the Sinclair Teapot lease and many months before the main Doheny lease for Elk Hills No. 1 reserve. Yet Congress, knowing, did not differ, did not dissent, did not question, did not claim such exchange was not authorized and did nothing to prevent operation under the Sinclair lease and made no objection to the proposed similar later lease to Doheny. This is conclusive that Congress was not "outwitted" nor attempted to be "outwitted"; that Congress had the same view of the act of June 4, 1920, as had Secretaries Denby and Fall; that they were right in their interpretation of the act and acted with due authority. This makes plain as day the fact that criticisms of the leases made a year later were an afterthought, the motive of which could be only political.

For a year the investigating committee took testimony and had elicited all this evidence as to the terms of the leases and the necessity for making the leases, on all of which it had the above information a year before, without the committee on naval appropriation, or the investigating committee, or the newspapers attributing enough importance to all these facts to be even noticed in the press of the country. The first headlines concerning these leases in the general press appeared in October, 1923, and they were to the effect that the committee's expert geologists employed to examine and report on the Teapot Dome had made their report, which was that Teapot Dome was being drained. Nothing further appeared in the press until the evidence regarding the Fall ranch purchases and loans of money came out. All this but proves that there was nothing wrong with the leases.

But the Fall transactions gave the political assassins, the character destroyers, the court-usurpers, the political knife throwers, the party ghost dancers, the scandal mongers, the reputation killers, the fact jugglers, the office-holding mountebanks, the ambitious office seekers, the shrewd and unscrupulous political managers an opportunity to turn loose their poison gas, to raise a hue and cry that the Navy had been robbed of its oil, that the public interests had been betrayed, that a vast political plot had been laid in the Republican national convention of 1920 to exploit the public domain, and that our natural resources had been stolen. They made the most of the opportunity while it lasted. But gradually the real facts became known, prominent Democrats were found to have accepted great sums of money for their influence with the Democratic administration from which they had resigned to enter the employ of these same oil companies. And now we have the final report of the oil committee itself toning the whole matter down to a valid, justifiable difference of opinion. Would that it could receive the same publicity, notwithstanding its unwarranted inferences and expressions of opinion and judgment,

that the original charges were given. Will the truth overtake the broadcasted misrepresentations and false accusations? We can only hope that it will.

The report of the committee practically—indeed, it absolutely—removes the question of facts as to whether there was drainage of oil from the reserves necessitating the leases. It clearly admits that the reserves were being drained and had to be protected by producing the oil. The report of the committee practically removes the question of law as to whether the act of June 4, 1920, authorized the making of the leases and contracts and all the provisions thereof, because it recommends that the act be amended in order to prevent further leases with the same provisions. The only thing remaining in the entire matter under the report of the committee being these two questions, and they being determined in favor of the leases and contracts and acts of Secretaries Denby and Fall, there is no other conclusion possible than that they were justified in making them and that these were and are meritorious leases; and, as I have heretofore stated on April 17, 1924, in this body, they should not be canceled; they should be enforced.

Finally, the committee states that diligent inquiry into reports of official speculation in the stocks of the oil companies revealed no facts of sufficient importance to report. It further states that the evidence failed to establish the existence of a conspiracy between oil operators and others at the Republican National Convention of 1920.

Let me reiterate, now that the committee of investigation has reported, the naval oil reserves of the Nation have not been "given away"; the country has not "lost them" or the oil in them; there was no "wanton waste of $1,000,000,000 worth of oil"; the public domain has not been "looted"; the people of this country have not been "deprived of the means of national defense"; the Navy is not "without adequate oil for Navy fuel to meet any war emergency," and would not be and will not be if these leases continue in operation; the leases were not illegally entered into without authority; and there was not by these leases a change of policy with regard to the naval oil reserves except as authorized by Congress.

I maintain again that these were fair, reasonable, and good contracts for the Government and that it was necessary to make these or similar contracts and leases with some one in order to carry out the Government's policy of preserving oil in its public lands within oil naval reserves for the future use of the Navy; that the method of preservation in the ground had ceased to be possible and preservation on the surface became the only other alternative; that this being the alternative, it was a wise provision of the leases, I repeat, to build permanent storage tanks at such points as were designated by the Navy officers as the best and most strategic locations for fuel oil; and that the exchange features in the leases were wise and beneficial for the reason that the Teapot oil is a paraffin-base oil, with a large gasoline, kerosene, and wax content impossible to be used and unprofitable to refine for use for fuel oil in our ships. I further contend that even had it been possible to have retained this oil in the ground that it could never have been extracted or refined or exchanged, 2,000 miles from the Atlantic and 1,000 miles from the Pacific, for proper fuel oil in time to meet a war emergency.

I reiterate that as the matter now stands if the Teapot lease is enforced by the Government, the titles are cleared, production is conserving the oil otherwise draining away by private wells; the Government is surely and rapidly securing under a contract and lease providing in its terms the highest of royalties a good proportion of the oil. It is further securing by exchange a fair, large, and adequate supply of accessible Navy fuel oil, safely and permanently conserved at the proper places on the coasts for our Navy defense and future safety.

The Government is getting the benefit of an expenditure of $40,000,000. The great pipe line, 715 miles in length, connecting the field with the mid-continent and eastern markets, is built and the program of tank building and filling is proceeding according to contract. The Nation is getting 40 per cent more for its Teapot and Salt Creek royalty oils than it would have received without this lease. What more can we reasonably expect from any lessee? Experience has shown that Government operation would not bring as good results. Much time and litigation would be required to place the Government in possession, even though the courts should cancel the lease, if it could ever be done. Some of the mining claims on the structure, the committee report says, "unquestionably had some merit." Hence complete repossession by the Government, so as to prevent production entirely, is practically impossible. During all the litigation production would be going on and drainage continuing. Even now, with receivers appointed by the court in charge of the field, it is not practical to cease operations, and production is going on because it must. This is simply a continuation of the conditions which made the lease necessary in the first instance and is the most emphatic admission and confirmation that the oil can not safely be retained in the ground.

Shall we not take a second thought? Even if voidable, the Government should enforce the Teapot naval reserve No. 3 lease and consider the same course as to the Doheny naval reserve No. 1 lease. It is fortunate that the Congress refused to accept the offer of Mr. Doheny to surrender his lease on the repayment of his expenditures, and fortunate that no such offer was considered as to the Sinclair lease. On neither reserve will the Government be able to secure as good leases in the Government's interests as those now in force.

Let the people be not alarmed. Let there be no anxiety. There has been no breaking down of government. The guilt of one man, if proven, can not affect the stability of this great country. It does not change the integrity, the power, and the genius of this great Government of the United States. No guilty person will be shielded. No party wants any criminal protected. At the same time the fairness and common sense of the American people, under the steady guidance of the President, will secure even-handed justice for all. The interests of the people on the one hand and constitutional rights of individuals on the other hand will both be held safe. Let the people continue to hold and have faith in their President, in the Congress, in their courts, in their Government, which under either party, through all the years of the past, has proven its virtue and honesty, to the benefit and glory of the Republic and all its people. The past, with its great achievements and its great figures, is the infallible guaranty to the people for the future. "The Government at Washington," the best and strongest on earth, "still lives." The United States of America and its officials are sound and safe and still hold to the "righteousness which exalteth a nation."

### FEDERAL WATER POWER ACT SHOULD BE AMENDED

Mr. McDUFFIE. Mr. Speaker, in addressing the House on June 3, with reference to the status of the legislative program for the development of rivers and harbors, I made brief reference to a provision in the bill proposed by the Rivers and Harbors Committee for the completion of the survey of the Tennessee River, and I also made reference to the Federal Water Power Commission and stated that some people believed that the act creating the Federal Water Power Commission was a wonderful piece of legislation, and I made the following comment on the Federal water power act:

> While many believe that the act creating the Federal Water Power Commission was a wonderful piece of legislation, I want to say to you that it says more and means less than any act of Congress I have ever read.

I believe the Federal Power Commission has established more rules and regulations than perhaps any bureau in the history of the Government, which contributes so little or nothing in protecting public welfare, and the act ought to be amended, and I believe at the next session of Congress will be.

I was interested, Mr. Speaker, to find that very soon after the Rivers and Harbors Committee finished its hearings and the chairman of our committee reported the bill (H. R. 8914) authorizing the construction, repair, and preservation of certain public works on rivers and harbors, Mr. Merrill, secretary of the power commission, on May 16 addressed a letter to Senator RANSDELL of Louisiana, and in the letter to the Senator on the subject of a bill which the Senator introduced into the Senate (S. 3328) for the development of water resources for electric power, agriculture, flood control, navigation, and other purposes, Secretary Merrill of the power commission, in part says:

> Of all our major national resources we know less about our water-power resources than any other. We have made extensive examinations of our coal, oil, and gas fields, have plotted their location, and have estimated the total resources available. We have done similarly with respect to other of our important mineral resources. We have made a fairly careful estimate of our total timber resources, both those upon public lands and those upon private lands, and we can predict fairly closely the extent to which we can use these resources if we are to maintain a continuous supply.

Again, Mr. Merrill, in his letter to Senator RANSDELL says:

> On only a few streams in the United States have studies been carried to the point where reasonably complete information is available on which to draw the general plan of river development, not only for purposes of water power but for such other related uses as navigation, irrigation, public water supply, and flood control.

And then he refers to the survey of the upper Tennessee River. In his letter to Senator RANSDELL, Mr. Merrill further says:

Section 4 of the Federal water power act authorizes the commission "to make investigation and to collect and record data concerning the utilization of the water resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development costs, and relation to market of power sites"; that is, the commission has the authority to conduct adequate investigations on any stream of the United States where the question of water power is involved. The conduct of such surveys is, therefore, contemplated as one of the items in the administration of the Federal water power act.

It is conceivable, Mr. Speaker, that the bill introduced by Senator RANSDELL into the Senate (S. 3328) was satisfactory to Mr. Merrill, secretary of the Federal Power Commission, and I call the attention of the House to Mr. Merrill's letter to Senator RANSDELL and the bill introduced by Senator RANSDELL in order to make clear to the House that there is a head-on collision between the activities proposed by the Federal Power Commission through its secretary and surveys proposed in the river and harbor bill (H. R. 8914) reported to the House April 26 by Mr. DEMPSEY, chairman of the Rivers and Harbors Committee. In that bill I call the attention of the Members of the House to two provisions, one of them as follows:

Tennessee River and tributaries, North Carolina, Tennessee, Alabama, and Kentucky: The completion of the survey recommended in House Document No. 319, Sixty-seventh Congress, second session, is hereby authorized at a cost not to exceed $315,800 in addition to the amount authorized in the river and harbor act approved September 22, 1922.

And the other provision reads as follows:

The Secretary of War is hereby authorized and directed to cause to be made by the Corps of Engineers, United States Army, such investigations as may be necessary for the preparation of a general plan for the most effective navigation improvement in combination with the most efficient development of the potential water power on those navigable streams of the United States and their tributaries where such power development appears feasible and practicable, together with an estimate and report of the cost of conducting such investigations as to all such streams and tributaries, at a cost not to exceed $500,000, with recommendation that $250,000 be immediately appropriated.

In the bill (S. 3328)) introduced in the Senate by Senator RANSDELL we find in part the following:

*Be it enacted, etc.*, That in pursuance of the authority conferred upon it by section 4 of the Federal water power act the Federal Power Commission is hereby authorized and empowered to prepare a comprehensive plan of development of the water resources of the United States for the purpose of providing electric power for farms, rural communities, cities, and industries, of promoting navigation, of controlling floods, and of securing other beneficial public uses of such resources. In the preparation of such a plan the commission shall utilize all data available in the records of the various departments, bureaus, and other agencies of the Federal, State, and municipal governments or obtainable from other sources or by examinations or surveys.

SEC. 2. The commission is authorized to bring into coordination so far as practicable the data and work of the engineering, scientific, and construction services, bureaus, boards, and commissions of the several governmental departments of the United States that relate to the study, development, or control of rivers and their tributaries, and of lakes, swamps, and other bodies of water, and to utilize the personnel of said services, bureaus, boards, and commissions with a view to unity of method and economy of service in the investigation, development, and control of rivers and river systems in the United States in the interest of navigation and protection from floods, and with particular reference to the most complete and efficient development and use of the waters thereof for hydroelectric power and to the coordinated operation of hydroelectric and fuel-electric plants in interconnected systems of the widest scope that may be found physically and economically practicable.

Mr. Speaker, when Members of the House compare the two provisions which I have quoted from the bill introduced in the House by the chairman of the Rivers and Harbors Committee with the extracts I have made from the bill introduced by Senator RANSDELL it will be most obvious that Congress ought to amend the Federal water power act with respect to those provisions in the act which conflict in the administration of the act by the power commission with laws which authorize, direct, and control the surveys on our navigable streams, wisely carried on now by the United States engineers.

It can no longer be a matter of controversy, debate, or doubt that there is conflict, confusion, and duplication of organized effort between the power commission and the United States engineers. It is imperative. There is a demand of no uncertain sort calling on Congress to cause the Corps of Engineers of the United States Army to make such surveys of our navigable streams and their tributaries as will disclose the most effective navigation improvement in combination with the most efficient development of potential water power on the navigable streams and their tributaries in the United States.

We can not ignore the conflict between the Federal Power Commission and its activities and its administration and the activities and work of the United States Engineer Corps on our navigable rivers. Neither can we shut our eyes to the litigation now of record between the States and the Federal Government as shown by the suit of the State of New York against the Federal Power Commission, in which suit other States have joined.

Mr. Speaker, I have drawn the attention of Members of the House to this important subject and indicated not as clearly and definitely as I hope to some time in the future that it is a duty resting upon the House to pass legislation which will remove the conflict, confusion, and duplication of work and effort which now exists between the administration of the Federal water power act and the work of the United States Engineer Corps on our navigable streams.

In connection with this wonderfully important subject I ask each Member of the House this question: What are the undeveloped water-power resources of the United States? Shall the Federal Water Power Commission make the investigations and secure the facts to answer this question, or shall the United States Engineers make the surveys and investigations and answer this question?

WHAT ARE THE UNDEVELOPED WATER-POWER RESOURCES OF THE UNITED STATES?

The water powers of the United States which are capable of economic development constitute one of the most inexhaustible of this country's resources. Wherever 12½ cubic feet of water per second falls through a height of 1 foot it is capable of developing 1 horsepower in a hydroelectric plant having machinery which is 70 per cent efficient.

It is evident, then, that in order to determine how much undeveloped water power there is in the United States which is capable of economical development we must know the flow of each river and how much it falls. We must also know that there is a suitable site for a dam and its appurtenances that can be built without too great expense, and that there is a market for the power within reasonable distance at a rate that will make the enterprise reasonably profitable to the investor.

To make an estimate of the commercially feasible undeveloped water powers of the United States is not an easy task. Consider first the question of the flow of the stream. This, of course, varies from day to day and from month to month, and a record over a period of years is very desirable in order to determine just how low the water really gets at times, for it is the low-water flow of the stream which must form the basis of all calculations. This low-water flow can frequently be built up by means of storage, but the feasibility of such storage depends upon the topography of the country, and this in turn calls for a survey of the river itself.

The United States Geological Survey has been carrying on systematic stream measurements all over the country since 1899. On account of the small appropriations, however, the work has been seriously handicapped, and there are but few streams which have been continuously measured during this period. Most of the information consists of fragmentary records extending over a period of two or three years. The report of the Secretary of the Interior for the fiscal year ended June 30, 1922, showed that 11,000 measurements of stream flow had been made that year in 41 States and in Hawaii, and that 1,540 gauging stations were being maintained. "In this work," he says, "31 States and Hawaii have cooperated by contributing $217,010, and several Government bureaus have contributed largely to the flow of particular streams." Probably the bureaus which have cooperated most extensively are the Corps of Engineers and the United States Weather Bureau.

The Geological Survey investigates ore deposits in mining districts, studies present and possible oil and gas fields, investigates coal fields and deposits of other useful minerals, makes explorations for potash, researches paleontology, studies geochemistry and geophysics, compiles State and National statistics of mineral production, prepares statistics and makes studies of water resources both on the surface and under ground,

classifies the public lands, as coal land, phosphate land, oil land, and so forth, and is continuing the work of making a general topographic and geological map of the United States. For all of this work the appropriations for the Geological Survey amounted in 1922 to $1,754,340, but a proper study of our water powers in a country the size of the United States would call for at least this amount for stream measurement alone. Such investigations would lead to a far greater development of our water powers and would be the best money we could spend, for water power developed is the creation of economic wealth and taxable values.

Knowing the flow of the stream, the next question is the fall; and to determine the fall of the stream and to locate suitable sites for dams and also to determine the possibilities for storage which is economically feasible without flooding too much land—these are considerations which call for a careful survey on the ground.

The first estimate of our water powers from a national viewpoint was made by M. O. Leighton, then of the Geological Survey, who prepared a report on the undeveloped water powers of the United States for the National Conservation Commission, created by Theodore Roosevelt in 1908. This estimate was based upon such Geological Survey records as were available, certain river surveys made for navigation purposes by the United States Engineer Corps, railroad surveys, and miscellaneous maps and reports of various State and other organizations. From this assortment of data Mr. Leighton, having no appropriations or time for field work, prepared an office study, and concluded that without storage the minimum undeveloped water power of the United States was 36,916,250 horsepower, while his estimated maximum was 66,518,500 horsepower, without storage. By considering storage he estimated that the total was some 212,000,000 horsepower by one method of figuring and 230,800,000 horsepower by another method.

In 1912 the commissioner of corporations, an officer in the Department of Commerce and Labor at that time, reviewed the Geological Survey's estimate of 1908 and called attention to the statement of the Geological Survey to the effect that—

> The surveys and examinations necessary to a thorough and accurate report of the water-power resources of the United States have never been completed. In certain parts of the country the facts are sufficiently well known to make it possible to present a tolerably accurate statement. In other parts the information is fragmentary and, therefore, power estimates must be considered approximate.

The commissioner emphasized these facts and stated that—

> each water-power development is a distinct problem by itself. Preliminary estimates, while usually based in part on available records of stream flow, rainfall, and run-off, are almost always supplemented by additional specific data obtained by engineers. In other words, the preliminary estimate on a specific project is almost certain to be much more accurate than any general estimate for the entire basin in which the project is located. Yet many financial houses identified with hydraulic developments—several of which have their own engineers—state that experience has led them to consider preliminary estimates of power only after dividing by two. * * * Various estimates of potential water power in the United States have been made, but, with the exception of that of the United States Geological Survey above referred to, they are practically mere guesses.

The commissioner of corporations reviewed the report of the Geological Survey of 1908 and revised its estimates downward for reasons which he gave, and concluded that without storage the minimum potential water power in the United States was 26,736,000 and that the maximum was 51,398,000 horsepower. In discussing the question of storage the commissioner said:

> Various estimates have been made as to the total water-power possibilities of the United States, including storage, but none of them has been based upon sufficiently reliable data to warrant unquestioned acceptance. The difficulties of estimating the possible power development of a stream are multiplied when an attempt is made to estimate the supplementary reserve force that can be put into it by storage. * * * Different authorities show a wide variation for comparatively limited areas. For instance, one authority allots to California 11,400,000 horsepower, while another allows only 5,000,000 horsepower. One authority gives Oregon nearly 9,000,000 horsepower; another allows only 3,300,000. One gives New York, Maine, California, and Washington a total of 34,000,000 horsepower, while other authorities give these States a total of only 17,000,000 horsepower. There are comparatively few distinctive storage developments in the United States. Any estimate including storage therefore must be mainly theoretical. * * * In the light of the foregoing considerations this bureau is unwilling to suggest any estimate as to the extent to which the water-power possibilities of the country may ultimately be increased by storage or even to cite such estimates as others have made.

Summing up his observations on the undeveloped water powers of the United States the commissioner says:

> In view of the actual conditions and in the light of facts that have been developed during the course of this investigation, it is evidently but little better than pure speculation to estimate what may be the ultimate water-power development of this country.

The only other estimate of the potential water powers of the United States which is generally known is that of the Electrical World, which from time to time publishes revised estimates of the undeveloped water powers of more than 10,000 horsepower classified according to their various drainage basins. This estimate, given in the Electrical World for July 30, 1921, showed a total maximum undeveloped water power of 52,829,500 horsepower.

As an example of how far wrong these estimates are likely to be, the Geological Survey estimate of 1908 for the Tennessee River and tributaries in Kentucky, Tennessee, Mississippi, Alabama, Georgia, North Carolina, and Virginia was a maximum of 1,950,000 horsepower. This was before Muscle Shoals or Hales Bar was even surveyed. Deducting 850,000 maximum at Muscle Shoals and 54,000 maximum at Hales Bar, leaves 1,046,000 horsepower for all other developments in the Tennessee River and its tributaries.

Major Fiske has testified before the Rivers and Harbors Committee that as a result of the survey he is making of the Tennessee Valley he has found 52 dam sites outside of Muscle Shoals, and in estimating their power possibilities he said:

> Outside of Muscle Shoals the rest of the Tennessee River, including all the tributaries, 3,000,000 horsepower is a fair estimate at this stage of the proceedings.

The commissioner of corporations published a map in which he undertook to show the power section of the various streams in the United States. As an example of the inadequacy of his information, consider that this map which represents the best available data on the subject from a national standpoint in general does not show the navigable streams as having any power possibilities at all. For example, the map shows no power on the Cumberland River and yet the district engineer has shown that there is a possibility of developing 100,000 horsepower between Nashville, Tenn., and Burnside, Ky., and the Commonwealth-Edison Co. interests of Chicago have recently been granted a permit for three dams in the Cumberland River at and above Burnside, having a total capacity of 200,000 horsepower. One of the best power streams tributary to the Tennessee River is the Hiwassee, which is hardly shown at all, and its branch, the Ocoee, on which 45,000 horsepower has been developed, is not shown. The facts are that no one knows what the undeveloped power possibilities of the United States are, and until the United States Government will make the investment which is necessary in order to determine the extent of these resources we will never know what they are.

One thing is certain, that the present rush to develop water power under the terms of the Federal water power act on a hit-or-miss basis without having any general survey of the river valley in which the new development is being made is certain to result in an unnecessary limitation of the total amount of power developed, for after full information has been obtained we may expect to find that the locations and height of dams and other features of present developments now being made will prevent the full utilization of the power of the stream in the future. This is no reflection upon the Federal Power Commission, who have never been in position to get this information, nor upon the power companies, whose business it is to secure the most for their money rather than to conserve the undeveloped water powers of the United States.

It should be remembered that the water of these streams belongs to the States, and that aside from navigation the State is the authority which has the power to make rules and regulations regarding the use of the water. For, to quote from the report of the subcommittee on the power of the Federal Government over the development and use of water power in its report to the Committee on the Judiciary of the Senate in 1916:

> Except as the owner of riparian lands and except for the purpose of regulating interstate commerce, the United States has no property in or sovereignty over the streams or water courses within the boundaries of the several States. The sovereignty and ultimate control is in the State * * *.

Therefore any action by the United States to be constitutional must be based upon the right of the Federal Government to regulate navigation. As to the question of what constitutes a navigable stream, Supreme Court decisions have been quoted in the reference stated above in support of the statement that—

the question of navigability is one of fact in each case. If a stream can be used for commerce or trade in any form to any substantial extent, even for the floating of rafts or logs, or lumber, it is held to be a navigable stream.

This subcommittee further concludes:

For the purpose of promoting and regulating foreign and interstate commerce Congress is given plenary power over all the navigable waters of the United States, to the end of improving and maintaining their navigability; and this power is not limited to the navigable sections of streams, but extends to the tributaries and feeders of the same, for without the control of these the power over the navigable sections might become wholly impotent. (United States v. Rio Grande Co., 174 U. S. 690.)

Since the only constitutional control that can be exercised by the Federal Government over the improvement of our streams is the control of navigation, the only Federal authority having constitutional jurisdiction is the Chief of Engineers, and he must approve every license for power development not only on every navigable stream, but on every tributary of a navigable stream.

Such data will not hinder the development of water power under the Federal water power act, but will give a tremendous impetus to it. With this information at hand the Government will know from its own records what should be done and will not have to depend upon information furnished by interested individuals and companies which is the case at present.

Such a study will undoubtedly disclose thousands of feasible power sites not at present recognized and to judge by the competition to develop the sites disclosed by the survey of the Tennessee River, the result will be the conservation of our water powers by their early and rapid development.

PERMISSION TO ADDRESS THE HOUSE

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent that the gentleman from Nebraska [Mr. HOWARD] have two minutes in which to address the House.

The SPEAKER. The gentleman from South Carolina asks unanimous consent that the gentleman from Nebraska may address the House for two minutes. Is there objection?

Mr. TINCHER. I object. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

Mr. SCHAFER. Mr. Speaker, I object.

The SPEAKER. The Chair will state that, of course, no more business can now be transacted. But it is likely various bills will come over for the Speaker's signature. The Chair will sit here, and the Chair——

Mr. SNELL. Mr. Speaker, would it be in order to move to take a recess for a few minutes.

Mr. LONGWORTH. Mr. Speaker, under the circumstances, I ask unanimous consent that the House stand in recess until one minute of 7 o'clock.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the House stand in recess until one minute to 7. Is there objection? [After a pause.] The Chair hears none.

AFTER RECESS

The recess having expired at 6 o'clock and 59 minutes p. m., the House was called to order by the Speaker.

Mr. LONGWORTH. Mr. Speaker, I ask unanimous consent to occupy the one minute between now and 7 o'clock.

The SPEAKER. The gentleman from Ohio asks unanimous consent to occupy the one minute between now and 7 o'clock. Is there objection? [After a pause.] The Chair hears none.

Mr. LONGWORTH. Mr. Speaker, a most successful and useful session of this Congress has been marred by what has occurred within the last few minutes in another body. The great deficiency appropriation bill, which contains among other things the bonus for the soldiers of the late war amounting to $136,000,000, and the payments to the dependents of soldiers who died in the late war, amounting to something like $25,000,000, has gone by the board.

This bill has failed through the selfishness of a few men who insisted on killing this bill because, forsooth, the House would not permit them to put in a certain reclamation project of at least doubtful value. Since then the House has passed a resolution by unanimous vote providing for the amount necessary to pay these soldiers. [Applause.] This has just been defeated in the Senate by the same influence. There is nothing now left to do except to adjourn.

ADJOURNMENT SINE DIE

The SPEAKER. The hour of 7 o'clock having arrived, the Chair wishes all Members a safe journey home, a pleasant vacation, and declares this session adjourned sine die.

EXECUTIVE COMMUNICATIONS, ETC.

555. Under clause 2 of Rule XXIV, a letter from the Acting Secretary of War, transmitting with a letter from the Chief of Engineers report on preliminary examination and survey of Crisfield Harbor, Md. (H. Doc. No. 355); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. EDMONDS: Committee on Claims. H. R. 8879. A bill for the refund of customs duties paid by the Canadian Car & Foundry Co. (Ltd.), on materials imported into the United States to be further manufactured for shipment abroad and which materials were destroyed by fire after such manufacture and before such shipment; with amendments (Rept. No. 1020). Referred to the Committee of the Whole House.

Mr. HAUGEN: Committee on Agriculture. H. R. 9362. A bill to provide for the establishment of a dairying and livestock experiment station at Dalhart, Tex.; without amendment (Rept. No. 1029). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. R. 9398. A bill to provide for the establishment of a dairying and livestock experiment station at Columbia, S. C.; with amendments (Rept. No. 1030). Referred to the Committee of the Whole House on the state of the Union.

Mr. ELLIOTT: Committee on Public Buildings and Grounds. H. R. 8588. A bill authorizing the Secretary of the Treasury to sell the United States marine hospital reservation and improvements thereon at Detroit, Mich., and to acquire a suitable site in the same locality and to erect thereon a modern hospital for the treatment of the beneficiaries of the United States Public Health Service, and for other purposes; without amendment (Rept. No. 1022). Referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of South Dakota: Committee on World War Veterans' Legislation. H. R. 7845. A bill to amend section 210 of the war risk insurance act; without amendment (Rept. No. 1028). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ASWELL: A bill (H. R. 9761) to regulate the transmission in interstate commerce and through the mails of pistols and revolvers; to the Committee on the Judiciary.

By Mr. WINTER: A bill (H. R. 9762) to add certain lands to the Medicine Bow National Forest, Wyo.; to the Committee on the Public Lands.

By Mr. STEPHENS: A bill (H. R. 9763) to provide that certain fees may be used for the purchase, repair, and rebinding of law books for the libraries of the United States district courts and the United States court of appeals; to the Committee on the Judiciary.

By Mr. GREENE of Massachusetts: A bill (H. R. 9764) to amend section 4492 of the Revised Statutes of the United States; to the Committee on the Merchant Marine and Fisheries.

By Mr. SANDLIN: A bill (H. R. 9765) granting to certain claimants the preference right to purchase unappropriated public lands; to the Committee on the Public Lands.

By Mr. JOHNSON of Washington: A bill (H. R. 9766) to provide for the revenue of the Government and to protect and maintain the cedar-shingle industry of the United States; to the Committee on Ways and Means.

By Mr. CANNON: A bill (H. R. 9767) providing for the purchase of a site and erection of a public building at Union, Mo.; to the Committee on Public Buildings and Grounds.

By Mr. THOMAS of Oklahoma: A bill (H. R. 9768) to amend section 10 of the Federal reserve act approved December 23, 1913, and amended June 3, 1922; to the Committee on Banking and Currency.

By Mr. REECE: A bill (H. R. 9769) to amend an act entitled "An act to establish a Veterans' Bureau and to improve the

facilities and service of such bureau, and further to amend and modify the war risk insurance act," approved June 9, 1921, and amendments thereto; to the Committee on World War Veterans' Legislation.

By Mr. UPSHAW: A bill (H. R. 9770) to establish State engineering experiment stations in the States and Territories in connection with institutions of higher technical education for the promotion of engineering and industrial research as a measure of industrial, commercial, military, and naval progress and preparedness in times of peace or war; to the Committee on Education.

By Mr. PORTER: A bill (H. R. 9771) to authorize the payment of an indemnity to the Government of China on account of the killing of two of her nationals by members of American military forces; to the Committee on Foreign Affairs.

By Mr. TINCHER: A bill (H. R. 9772) to authorize the Secretary of Agriculture to advise and assist cooperative associations of producers of agricultural products and others by the promotion of sound business practices, establishing uniform standards of classification, providing for the registering of cooperative associations, inspection of agricultural products, a market news service, and for other purposes; to the Committee on Agriculture.

By Mr. SNYDER: A bill (H. R. 9773) to amend section 26 of the interstate commerce act, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. LARSEN of Georgia: A bill (H. R. 9774) providing for the American cotton growers' commission, and for other purposes; to the Committee on Agriculture.

By Mr. KELLY: A bill (H. R. 9775) creating and defining the duties of a commission on an immigration policy; to the Committee on Immigration and Naturalization.

By Mr. LOWREY: Joint resolution (H. J. Res. 292) to create a body corporate for the exportation of agricultural products; to the Committee on Agriculture.

By Mr. SWEET: Joint resolution (H. J. Res. 293) directing the Chief of the Board of Engineers of the Army to reestimate the cost of constructing a 30-foot depth ship canal from the Hudson River to Lake Ontario, based upon present-day figures; to the Committee on Interstate and Foreign Commerce.

By Mr. PORTER: Joint resolution (H. J. Res. 294) extending the sovereignty of the United States over Swains Island and making the island a part of American Samoa; to the Committee on Foreign Affairs.

By Mr. MADDEN: Joint resolution (H. J. Res. 295) providing appropriations for administrative expenses of the World War adjusted compensation act; to the Committee on Appropriations.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DAVEY: A bill (H. R. 9776) for the relief of Fred Sauler; to the Committee on War Claims.

By Mr. DOWELL: A bill (H. R. 9777) granting a pension to Nellie L. Brackett; to the Committee on Invalid Pensions.

By Mr. FREDERICKS: A bill (H. R. 9778) granting a pension to Rebecca Backman; to the Committee on Invalid Pensions.

By Mr. GARDNER of Indiana: A bill (H. R. 9779) granting an increase of pension to Carrie Hurt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9780) granting an increase of pension to Minervie Thralls; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9781) granting a pension to Eliza J. Rawlings; to the Committee on Invalid Pensions.

By Mr. GLATFELTER: A bill (H. R. 9782) granting an increase of pension to Maggie Sponsler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9783) granting an increase of pension to Catherine Bupp; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9784) granting an increase of pension to Louisa Stough; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 9785) granting an increase of pension to Mitchell Johnson; to the Committee on Pensions.

Also, a bill (H. R. 9786) to restore to the pension roll the name of Nancy Hoskins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9787) granting a pension to Joseph Wilder; to the Committee on Pensions.

Also, a bill (H. R. 9788) granting an increase of pension to John Salyer; to the Committee on Pensions.

By Mr. LEA of California: A bill (H. R. 9789) for the relief of Charles O. Dunbar; to the Committee on Claims.

By Mr. LINEBERGER: A bill (H. R. 9790) granting a pension to William J. Finley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9791) granting a pension to William W. Shoch; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9792) granting a pension to Mary L. Kinsey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9793) granting a pension to Sarah A. Morgan; to the Committee on Invalid Pensions.

By Mr. MANLOVE: A bill (H. R. 9794) granting an increase of pension to Martha E. Lowery; to the Committee on Invalid Pensions.

By Mr. MERRITT: A bill (H. R. 9795) granting an increase of pension to Mary Louise Playfoot; to the Committee on Invalid Pensions.

By Mr. NEWTON of Minnesota: A bill (H. R. 9796) for the relief of Robert E. Towey; to the Committee on Military Affairs.

Also, a bill (H. R. 9797) for the relief of Enza A. Zeller; to the Committee on Claims.

By Mr. ROBSION of Kentucky: A bill (H. R. 9798) granting a pension to Lizzie McDaniel; to the Committee on Invalid Pensions.

By Mr. THOMPSON: A bill (H. R. 9799) granting an increase of pension to Rachel Woggerman; to the Committee on Invalid Pensions.

By Mr. WILSON of Indiana: A bill (H. R. 9800) granting an increase of pension to Susan M. Capehart; to the Committee on Invalid Pensions.

By Mr. WOLFF: A bill (H. R. 9801) granting a pension to Charles A. Sheets; to the Committee on Pensions.

By Mr. WOODRUFF: A bill (H. R. 9802) granting a pension to Vernie Pope; to the Committee on Invalid Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3031. By the SPEAKER (by request): Petition of president and members of the board of trustees of the village of Depue, Ill., protesting against the use of the Illinois River by the city of Chicago for sewage disposal; to the Committee on Rivers and Harbors.

3032. Also (by request): Petition of president and members of the board of trustees of the village of North Utica, Utica, Ill., protesting against the use of the Illinois River by the city of Chicago for sewage disposal; to the Committee on Rivers and Harbors.

3033. By Mr. MONTAGUE: Petition of sundry citizens of Richmond and Norfolk, Va., requesting the Congress of the United States to pass the equal rights amendment; to the Committee on the Judiciary.

3034. By Mr. WINGO: Petition of the First Baptist Church, Fort Smith, Ark., of 1,100 members, in support of the constitutional amendment to prohibit sectarian appropriations (H. J. Res. 159); to the Committee on the Judiciary.
